Ana *beg, entreat, beseech, implore, supplicate, impotent: appeal, petition, sue, pray (see under PRAYER)
require 1 exact, claim, *demand
Ana *prescribe, assign, define: warrant, *justify
2 lack, want, need

requirement, requisite, prerequisite can all mean something that is regarded as necessary to the success or perfection of a thing. Although requirement, the more general term, may be employed in place of requisite, it is the customary term when the idea to be conveyed is of something more or less arbitrarily demanded or expected, especially by those who lay down conditions (as for admission to college, for enlistment in the army or navy, for membership in a church, or for entrance into a course) (college entrance requirements) (a list of requirements for all campers) (action was instituted... to compel the school board to revoke the oath requirement—Clinton) Requisite is the customary term when the stress is on the idea of something that is indispensable to the end in view, or is necessitated by a thing's nature or essence or is otherwise essential and not arbitrarily demanded (the first requisite of literary or artistic activity, is that it shall be interesting—T. S. Eliot> The requisites of our present social economy are capital and labor (intellectual freedom... is the prime requisite for a free people—Science> Prerequisite differs from requisite only in a stress on the time when something becomes indispensable; it applies specifically to things which must be known, or accomplished, or acquired as preliminaries (as to the study of a subject, the doing of a kind of work, or the attainment of an end) (answered the questions put to him by the Senators as a prerequisite to his confirmation—Current Biol>) (he possesses the prerequisite of an original poet—a percipience unifying, exact and exhilarating—Day Lewis)

requisite adj *needful, necessary, indispensable, essential
Ana compelled or compulsory, constrained, obliged or obligatory (see corresponding verbs at FORC): fundamental, *essential, cardinal, vital

requisite n *requirement, prerequisite
requisite nutrient, requisite
requisite *reciprocate, retaliate, return
Ana repay, recompense, compensate (see PAY): *satisfy, content: revenge (see AVENGE)
rescind *revoke, reverse, repeal, recall
Ana cancel, expunge, *erase: abrogate, *annul, void
and usually suggests the status of a guest either in a hotel or in a private home (two seasons ago I put up at a farmhouse—T. H. White) (where does he put up when he is in Chicago?) Stop, which is often used in the sense of stay (he is stopping at the largest hotel in the city) often specifically implies the breaking of a trip or journey by a short stay (where shall we stop for the night?)

Ana remain, abide (see stay): continue, endure

residence *habitation, dwelling, abode, domicile, home, house

resident n *inhabitant, denizen, citizen

residue residuum, remains, leavings, *remainder, rest, balance, remnant

residuum residue, *remainder, remains, leavings, rest, balance, remnant

resign 1 yield, surrender, leave, abandon, *relinquish, cede, waive

Ana *forgo, eschew, sacrifice, forbear, abnegate: *abjure, renounce, forswear

2 *abdicate, renounce

resignation 1 compliance, acquiescence (see under COMPLY)

Ana submitting or submission, yielding, deferring or deference (see corresponding verbs at yield): meekness, modesty, humbleness or humility, lowness (see corresponding adjectives at humble)

2 *patience, long-suffering, longanimity, forbearance

Ana endurance, toleration, suffering or sufferance (see corresponding verbs at bear): *fortitude, backbone, pluck

resigned *compliant, acquiescent

Ana submissive, subdued (see tame): reconciled, adjusted, adapted, accommodated, conformed (see adapt)

Ant rebellious

resile recoil, *rebounce, reverberate, repercuss

resilient 1 *elastic, springy, flexible, supple

Ana recoiling, resiling, rebounding (see rebound): recovering, regaining, retrieving (see recover)

Con rigid, *stiff, inflexible, tense

2 *elastic, expansive, buoyant, volatile, effervescent

Ana responsive, sympathetic (see tender): *spirited, high-spirited, mettlesome

Ant flaccid

resist, withstand, contest, oppose, fight, combat, conflict, antagonize are comparable when they mean to set one person or thing against another in a hostile or competing way, and they may be roughly distinguished according to the degree to which one of the things or forces takes the initiative against the other. Resist and withstand suggest generally that the initiative lies wholly with the person or force competed against. Resist implies an overt recognition of a hostile or threatening force and a positive effort to counteract it, repel it, or ward it off (the very region which had resisted and finally destroyed the Roman Empire—Malone) (it is hard to resist the thought that metaphor is one of the most important heuristic devices—R. M. Weaver) (resist the pressure of political orthodoxy)

Withstand may suggest a more passive yet often successful resistance in which if nothing is gained, at least nothing is lost (most plants cannot withstand frost) (built to withstand work and worry—Yoder) (having withstood the pressure of her parents—Rose Macaulay) Contest and oppose suggest a more positive action against a threatening or objectionable force. Contest often stresses the raising of the issue or the bringing into open question of the matter over which there is conflict (the board's power to inspect private welfare agencies was later contested and restricted—Amer. Guide Series: N. Y.) (it is impossible to contest your principle—Meredith)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
resonant, sonorous, ringing, resounding, vibrant, orotund

2 determine, *decide, settle, rule
*Ana purpose, propose, design, *intend, mean: plan, scheme, project (see under PLAN n)
3 *solve, unfold, unravel, decipher
*Ana dispel, dissipate, disperse (see SCATTER): clear, *rid, purge, disabuse

resonant, sonorous, ringing, resounding, vibrant, orotund

are applied to the sounds or tones of speech and music and mean conspicuously full and rich. Resonant implies intensification or enrichment of tone by sympathetic vibration (as by the soundboard and body of a violin or by columns of air above and below the vocal cords in the larynx). It applies especially to musical tones (the tones produced by this piano are very resonant) *heard the beating of the small drums—a hollow, resonant sound—Nordhoff & Hall) but in more general use it is applicable to a sound (as of speech or a bird note) that seems more than naturally full and rich *his deep resonant voice that makes even a line from a financial statement have the ringing, rhythmic tones of a Yeats quotation—Saarinen

Sonorous implies a quality of tone or speech suggesting the reverberant sound elicited by striking some metals (as copper or brass) or some kinds of glass; it may apply to a voice that is high and clear or, more often, to one that is deep and rich, but loudness and fullness are usually clearly implied *a herald chosen for his sonorous voice—Frazer) *the deep, sonorous voice of the red-bearded Duke, which boomed out like a dinner gong—Doyle

As applied to language or utterance as distinct from voice sonorous may suggest depth and richness *its earnestness and patience, and its utter lack of synthetic drama, give many of its pages the sonorous sureness of pure philosophy—Marquand) but is more likely to suggest an obscuring or the absence of real meaning by lush verbiage or florid presentation *detains thought within pompous and sonorous generalities wherein controversy is as inevitable as it is incapable of solution—Dewey) *adept at distilling from the sonorous official speeches the three or four words that contain the meaning the speechmakers sought to conceal—New Yorker

Ringing usually implies a sound made by or as if by a bell; the word suggests a vigorous, stirring quality *her beautiful, ringing, honest voice, the expression of her whole personality—Ellis) *a perfect ecstasy of song—clear, ringing, copious—Burroughs)

Resounding applies not only to vocal or instrumental sounds but to any sound that seems to reecho or to awaken echoes. It usually implies the increase of sound by something that throws it back *the sound of a great underground river, flowing through a resounding cavern—Cather) but it may imply a loudness and fullness of sound that seem to call forth echoes *put into circulation many resounding phrases which rang from the hustings—Krock)

*closed the door behind him with a resounding bang—Brennan

Vibrant, when used of sounds or tones, suggests vibration but not necessarily resonancy; rather it implies qualities of life, vigor, or strong feeling *the speaker paused a moment, his low vibrant tones faltering into silence—Zangwill) *it concentrates in one vibrant poem the despair and the hopes of millennia—Edmund Wilson

Orotund usually describes an acquired or an affected quality of speech. It implies fullness, roundness, and dignity of utterance which may be regarded either objectively or contemptuously *it is rather the exquisite craftsmanship of France than the surging and orotund utterances of Leaves of Grass that has given to free verse . . . its most distinctive qualities—Lawrence) *the voice was like no voice ever heard before—orotund, massive, absolute, like the sound of thunder—Styron)

Ana *full, replete; *rich, opulent: intensified, enhanced, heightened (see INTENSIFY)

Described words

resort n *resource, expend, shift, makeshift, stopgap, substitute, surrogate

Ana see those at RESOURCE 2

resort vb Resort, refer, apply, go, turn are comparable when they mean to betake oneself or to have recourse when in need of help or relief. Resort often implies that one has encountered difficulties or has tried ineffectually to surmount them; when it carries the latter implication, it often also connotes an approach to desperation *he found he could not get relief, unless he resorted to the courts) *most powers conceivably may be exercised beyond the limits allowed by the law . . . But we do not on that account resort to the blunt expedient of taking away the power—Justice Holmes) *Refer usually suggests a need of authentic information and recur to someone or something that will supply such information *every time he comes across a new word he refers to the dictionary) *most men refer to their own watches when someone reports the time) *Apply suggests having direct recourse (as in person or by letter) to one having the power to grant a request or petition *apply to a hospital for aid) *apply to the court for relief) *determined, that if he persisted in considering her repeated refusals as flattering encouragement, to apply to her father, whose negative might be uttered in accomplishing what must be decisive—Austen)

Go and turn are more general but often more picturesque or dramatic terms than the words previously considered, for they directly suggest action or movement *the president decided to go to the people with his plan for reorganization) *there was no one to whom she could go for sympathy) *she had taken fright at our behavior and turned to the captain pitifully—Conrad)

Ana *direct, address, devote: *use, employ, utilize

resounding *resonant, sonorous, ringing, vibrant, orotund

Ana *loud, stentorian, ear-splitting: intensified, heightened (see INTENSIFY)

resource 1 in plural form resources assets, belongings, effects, *possessions, means

2 Resource, resort, expend, shift, makeshift, stopgap, substitute, surrogate can all denote something to which one turns for help or assistance in difficulty or need when the usual means, instrument, or source of supply fails one, is not at hand, or is unknown to one. Resource applies to an action, activity, person, method, device, or contrivance upon which one falls back when in need of support, assistance, or diversion *he has exhausted every resource he can think of) *I must e'en hasten to matters of fact, which is the comfortable resource of dull people—Shenstone) *I am doomed to be the victim of eternal disappointments; and I have no resource but a pistol—Peacock) *with all the resources of her slovenliness, she was cunningly protecting herself against him by inducing him to believe she was a slut—Callaghan)

Resort is less often used than resource except when qualified by last or in the phrase "to have resort to" *have resort to a fortune-teller) *thus the income tax became a last resort—Shaw) *for many plankers transparency of body is a chief resort for concealment—Coker) *courts are the ultimate resorts for vindicating the Bill of Rights—Frankfurter

Expedient applies to a means, device, or contrivance which serves in place of what is usual or ordinary, or sometimes as a means, a device, or a contrivance to accomplish a difficult end easily or without waste of time *everything is brought about . . . through the medium of the author's reflections, which is the clumsiest of all expedients—Scott) *is not this a desperate expedient, a last refuge likely to appeal only to the leaders of a lost cause?—Krutch)

A shift is commonly a ten-
tative or temporary and often imperfect expedient; the term when applied to plans or stratagems typically implies evasiveness or trickery <the dear delicious shifts I used to be put to, to gain half a minute's conversation with this fellow!—Sheridan> <not amused by her shifts and her shameless deceit—Tinker> Makeshift is even more derogatory than shift for it implies substitution of the inferior for the superior and often it imputes carelessness, indifference, or laziness to the one who chooses or makes use of it <his ingenuity had been sharpened by all the recent necessity to employ makeshifts—Forster> <three or four rooms . . . have been kept nearly habitable by makeshifts of patchings—Pierce> Stopgap applies to a person or thing that momentarily or temporarily supplies an urgent need or fills a gap, hole, or vacancy <both vigilantes and mass meeting were looked upon as temporary stopgaps, to be disbanded as soon as governmental machinery was provided—Billington> Substitute (see also SUBSTITUTE 2) does not carry as strong a suggestion of an emergency or exigency as the preceding terms do; the word is applicable to something one chooses, accepts, or prefers, whether rightly or wrongly, rationally or irrationally, in place of the usual or original thing, or which has been invented or devised to take its place or to do its work <a substitute for milk . . . could be manufactured from the soya bean—Heiser> <daydreams, in adult life, are recognized as more or less pathological, and as a substitute for efforts in the sphere of reality—Russell> <this mock king who held office for eight days every year was a substitute for the king himself—Frazier> Surrogate is a somewhat learned word for a substitute <slang is . . . a facile surrogate for thought—Lowe> It is frequently applied to people whether as literal replacements or as replacement figures in psychological or sociological analyses <college presidents or their surrogates appealed for a revival of idealism—Adler> <to primitive men the cranes were . . . the surrogates of the resurgent sun-god—E. A. Armstrong> <the relationship to the mother surrogate retains the qualities . . . of the little boy's attachment to his mother—Scientific American> **Ana** device, contrivance, contraption: invention, creation (see corresponding verbs at INVENT): *method, manner, way, fashion, mode, system* respect **n** regard, esteem, admiration **Ana** reverence, awe, fear: *honor, homage, deference: veneration, reverence, worship, adoration (see under REVERE) **Ant** contempt respect **vb** regard, esteem, admire (see under REGARD n) **Ana** reverence, *revere, venerate: value, prize, cherish, *appreciate **Ant** abuse: misuse respecting concerning, regarding, *about respectively *each, apiece, severally, individually respite *pause, respite, lull, intermission **Ana** leisure, ease, *rest: interruption, interval, *break resplendent *splendid, gorgeous, glorious, sublime, superb **Ana** effulgent, refugent, radiant, brilliant, *bright: blazing, glowing, flaming (see BLAZE vb) respond *answer, reply, rejoin, retort **Ana** react, behave, *act **Con** stimulate, excite, quicken (see PROVOKE) response *answer, reply, rejoinder, retort (see under ANSWER vb 1) responsible, answerable, accountable, amenable, liable can all mean subject to an authority which may exact redress in case of default. Responsible, answerable, and accountable are very close, all meaning capable of being called upon to answer or to make amends to someone for something. Although often used interchangeably they are capable of distinction based on their typical applications. One is responsible for the performance of a task or duty, or the fulfillment of an obligation, or the execution of a trust, or the administration of an office to the person or body that imposes the task, duty, or trust or delegates the power <the governor is responsible to the electorate for the administration of the laws> Sometimes the to phrase or the for phrase is suppressed but still implied <the salesmen are responsible to the manager and the manager is responsible to the owner> <a teacher is responsible for the conduct of pupils in the classroom> <the ideally free individual is responsible only to himself—Henry Adams> <while held responsible for the bank's operations, the president has powers considered largely nominal—Current Biol> Sometimes when both phrases are suppressed, responsible implies manifest ability to fulfill one's obligations especially by reason of developed powers of judgment and sense of moral obligation <his record shows that he is a responsible person> One is answerable to someone for something who, because of a moral or legal obligation or because the one who is supposed to give an account of such an obligation for another, may be called upon to pay the penalty for a violation of the law or a neglect of duty; the term usually indicates or implies the existence of a judge or tribunal <men in business, who are answerable with their fortunes for the consequences of their opinions—Hazlitt> <there was something ineradicably corrupt inside her for which her father was not answerable—E. K. Brown> <the minister who is answerable to Parliament for the affairs of the BBC—Beachcroft> One is accountable to someone for something who because of something entrusted to him is bound to be called upon to render an account of how that trust has been executed. Accountable is much more positive than responsible or answerable in its suggestion of retributive justice in case of default <if the physicist discovers new sources of energy that may be readily released for destructive purposes, he should not be held accountable for their use—Gauss> <the Russian leaders . . . are not accountable to their people—The Reporter> Amenable and liable especially stress subjection and suggest the contingency rather than the probability or certainty of being called to account. One is amenable, usually to something, whose acts are subject to the control or the censure of a higher authority and who, therefore, is not self-governing or absolute in power <is it to be contended that the heads of departments are not amenable to the laws of their country?—John Marshall> <scholar and teacher alike ranked as clerks . . . amenable only to the rule of the bishop—J. R. Green> One is liable that by the terms of the law may be made answerable in case of default <a surety is liable for the debts of his principal> <the present United States . . . took nothing by succession from the Confederation . . . was not liable for any of its obligations—Taney> Liable does not, however, always imply answerability. It may imply mere contingent obligation <every citizen is liable for jury duty> <he is only 39, and liable for military service under the new act—Shaw> **Ana** subject, open, exposed (see LIABLE): *reliable, dependable, trustworthy* responsive **1** *sentient, sensitive, impressee, impressionable, susceptible* **Ana** answering, responding, replying (see ANSWER vb): reacting, acting, behaving (see ACT vb) **Ant** impasse 2 sympathetic, warm, warmhearted, compassionate, *tender* **Ana** gentle, mild, lenient (see SOFT): sensible, conscious,
alive, awake, *aware: sensitive, susceptible, prone (see LIABLE)

rest n
Rest, repose, relaxation, leisure, ease, comfort are comparable when they mean freedom from toil or strain. Rest, the most general term, implies withdrawal from all labor or exertion and suggests an opposition to the term work; it does not in itself explicitly imply a particular way of spending one's time, but it does suggest as an aim or as a result the overcoming of physical or mental weariness (there the wicked cease from troubling; and there the weary be at rest—Job 3:17) (night came, and with it but little rest—Hardy) (there was rest now, not disquietude, in the knowledge—Glasgow) Repose implies freedom from motion or movement and suggests not only physical quiet (as in sleeping or slumbering) but also mental quiet and freedom from anything that disturbs, annoys, agitates, or confuses. Typically the term suggests tranquillity or peace or the refreshment that comes from complete quiet or rest (heavily passed the night. Sleep, or repose that deserved the name of sleep, was out of the question—Austen) (eighteen years of commotion had made the majority of the people ready to buy repose at any price—Maclavoy) (walls... that shut out the world and gave repose to the spirit—Cather) Relaxation may imply rest that comes from diversion or recreation but it usually stresses either a releasing of the tension that keeps muscles taut and fit for work or the mind keyed up to the processes of clear and protracted thinking, or a physical and mental slackening that finally induces repose (those who wish relaxation from analysis... the tired scientist, and the fatigued philologist and the weary man of business—Babbit) (now and then came relaxation and lassitude, but never release. The war towered over him like a vigilant teacher—H. G. Wells) (found relaxation in her unobtrusive company—Shirer) Leisure implies exemption from the labor imposed upon one by a trade or profession or by duties; it may apply to the hours in which one is not engaged in one's daily work, or to the period in which one is on vacation, or to the entire time of a person who is not compelled to earn his living (have little leisure for reading... he looked forward to the prospect of a full month of leisure) (those who lead lives of leisure) Leisure, therefore, stresses freedom from compulsion, or routine, or continuous work; it usually suggests not freedom from activity but the freedom to determine one's activities (labor is doing what we must; leisure is doing what we like; rest is doing nothing whilst our bodies and minds are recovering from their fatigue—Shaw) Ease (see also READINESS) stresses exemption from toil, but it also implies a freedom from whatever worries or disturbs and from what demands physical or mental activity. In contrast to leisure it implies rest and repose; in addition it suggests either complete relaxation of mind and body or a state of mind that finds no attraction in work or activity (all day I sit in idleness, while to and fro about me thy eyes and thoughts wander) (I am weary of my lonely ease—Millay) But ease may also imply absence of strain, especially mental or nervous strain, rather than freedom from toil (not only devoted, but resourceful and intelligent, one who would be at his ease with all sorts of men—Cather) Comfort differs from the other words of this group in carrying little if any suggestion of freedom from toil; it applies rather to a state of mind induced by relief from all that strains or inconveniences or causes pain, dishquie, or discontent. Positively it suggests perfect well-being and a feeling of quiet enjoyment or content (he had bought for himself out of all the wealth streaming through his fingers neither adulation nor love, neither splendor nor comfort—Conrad) (this sudden calm and the sense of comfort that it brought created a more genial atmosphere over the whole ship—Dahl) (spent every dollar he earned on the comfort of his family—Wouk) Ana intermitting or intermission, suspending or suspension, deferring (see corresponding verbs at DEFER): stillness, quietness or quiet, silence or silence (see corresponding adjectives at STILL): calmness or calm, tranquillity, serenity (see corresponding adjectives at CALM)

rest vb
base, found, ground, bottom, stay (Ana) (depend, hang, hinge: rely, depend, count
rest n remaining, residue, residuum, remains, leavings, balance, remnant
Ana excess, superfluity, surplus, surplusage, overplus
restful comfortable, cozy, snug, easy
Ana soft, gentle, mild, lenient: still, quiet, silent: placid, peaceful, calm, serene, tranquil

restitution
amends, redress, *reparation, indemnity
Ana repayment, recompense, reimbursement (see corresponding verbs at PAY)

restitute
1 contrary, perverse, balky, froward, wayward
Ana intractable, *unruly, ungovernable, refractory: obstinate, stuborn, mulish, stiff-necked, pigheaded
2 restless, *impatient, nervous, unquiet, uneasy, fidgety, jumpy, jittery
Ana see those at RESTLESS

restless
restive, *impatient, nervous, unquiet, uneasy, fidgety, jumpy, jittery
Ana *fitful, spasmodic: inconstant, capricious, unstable, fickle: agitated, disquieted, perturbed, discomposed (see DISCOMPOSE)

restorative adj
*curative, remedial, corrective, sanative
Ana stimulating, quickening (see PROVOKE)

restore
1 *renew, refresh, rejuvenate, renovate, refurbish
Ana save, reclaim, redeem, *rescue: reform, revise, amend (see CORRECT vb): recover, regain, retrieve, recoup, recruit
2 Restore, revive, revivify, resuscitate can all mean to regain or cause to regain signs of life and vigor. Restore (see also RENEW) implies a return to consciousness, to health, or to vigor often through the use of remedies or to treatments (it took many months to restore him to health) (gave her aromatic spirits of ammonia to restore her to consciousness) Revive, when used in reference to a person, implies recovery from a deathlike state (as stupor or a faint or shock); it carries a stronger suggestion of apparent death in the victim and a less positive suggestion of restored health and vigor than does restore (slowly revived from the effects of shock) (revived her by throwing water on her face) But the term is often applied to spirits or to feelings that are depressed, to plants that seem withering, to states, arts, industries, or fashions that are not flourishing and implies a return to a prior state (as of animation, freshness, or activity) (the flowers have been revived by the shower) (ambitious hopes which had seemed to be extinguished, had revived in his bosom—Macaulay) Revivify differs from revive in suggesting an adding of new life and in not carrying so strong a suggestion of prior loss or depletion of vital power; hence, it is applicable to normal persons or to their powers (a good night's sleep revivifies every healthy person) (cessation in his lovemaking had revivified her love—Hardy) The term is also applicable to something that tends to become exhausted of interest through long usage or familiarity and then suggests a freshening or a vitalizing from a new source (being a true poet, he was able... to revivify them [old, much-used words] as poetical agents—Day Lewis) (tradi- tion is dead; our task is to revivify life that has passed away—Buchan) Resuscitate implies commonly a restora-
tion to consciousness, but in comparison with revive it usually also implies a condition that is serious and that requires arduous efforts to correct or relieve (uncertain of success in resuscitating the boy they had taken from the water) especially in extended use it can suggest a bringing again to a quick or vital state of someone or something in which life appears to be extinct (resuscitate an old interest) it was Delta's turn to be silent. The past was too overwhelmingly resuscitated in Charlotte's words—Wharton

*Ana* cure, heal, remedy: arouse, rouse, rally, *stir

*restrain*, curb, check, bridle, inhibit are comparable when they mean to hold a person or thing back from doing something or from going too far in doing something. *Restrain*, the most comprehensive of these terms, may imply the intent either to prevent entirely or to keep under control or within bounds, but it usually suggests the operation of some force, authority, or motive that is sufficiently strong or compelling as to achieve the desired end (to produce in the child the same respect for the garden that restrains the grown-ups from picking wantonly—Russell) (her voice is not usually one of her assets...the whines, the snarls and the sneers of a poor childhood are restrained with difficulty—Mailer) *Curb* can imply either a sharp, drastic method of bringing under control (attempts to curb lynching by legislation—F. W. Coker) or a guiding or controlling influence that tends to restrain or moderate something or to restrict a person's freedom of action (the sober scientific method does not stimulate the imagination; it curbs it—Brothers) (it was necessary to set up devices for curbing the swindles of the speculators—Edmund Wilson) (the feudal nobility was civilized here—Coulton)

*Check* (see also arrest 1) often implies the use of a method suggestive of a checkrein which holds up a horse's head and prevents him from getting the bit between his teeth (Father Latour checked his impetuous vicar—Cather) but it may carry implications derived from other senses of the noun such as those of delaying or impeding motion or progress (the ship, hauled up so close as to check her way—Conrad) (a spot where her footsteps were no longer checked by a hedgerow—George Eliot) or of attacking or defeating some force or influence (the ambition of churchmen...disciplined and checked by the broader interests of the Church—Henry Adams) (check for a time the inward sweeping waves of melancholy—Bromfield)

*Bridle* (see also STRUT) carries a strong implication of bringing or keeping under one's control (as by subduing, moderating, or holding in); it is used chiefly in respect to strong or vehement emotions or desires (bride his wrath) (potential violence of feeling is bridled by good form—N. Y. Herald Tribune Book Rev.) (strong in censuring and bridling the wicked—H. O. Taylor) (bridled his curiosity) (he could no longer bridle his passion) *Inhibit* (see also FORBID) is a synonym of these terms in a predominantly psychological sense in which it implies the repression or suppression of certain emotions, desires, or thoughts by a curbing influence (as one's conscience or religious principles or the social conventions of one's class) (a people long inhibited by the prevailing taboos—Ellery)

*Ana* *arrest, check, interrupt: abstain, *refrain, forbear: *hinder, impede, obstruct, block

*Ant* impel: incite: abandon: *refrain (oneself)

*restraint* constraint, compulsion, *force, coercion, duress, violence

*Ana* curbing, checking, inhibiting (see RESTRAIN): hindering, impeding, obstructing, blocking (see HINDER)

*Ant* incitement: liberty

*restrict* *limit, circumscribe, confine

**restrain**

- *spend, reserve, forebear, deny, curtail, restrict, curb, check*
- *divert, contain, suppress, repress, control, deter, hold back, moderate*
- *circumscribe, confine, confine, limit, repress*

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
when merited punishment is administered, not by the vic-
tim, but by a higher power or impersonal chance (his coat pockets . . . a mess of broken eggs, studded with coins and miscellaneous objects. This mishap was retribu-
Fishing for robbing nests—C. L. Barrett: (to be left alone
and face to face with my own crime, had been just retribu-
Longfellows)

Ana punishment, disciplining or discipline, correcting
or correction (see corresponding verbs at PUNISH): rec-
compassing or recompense, indemnification, repayment
(see corresponding verbs at PAY)

retard *delay, slow, slacken, detain
Ana reduce, lessen, *decrease: *arrest, check, interrupt:
clog, fetter, *hamper: balk, baffle (see FRUSTRATE)
Ant accelerate: advance, further

reticent *silent, reserved, uncommunicative, taciturn,
secretive, close, close-lipped, closedmouthed, tight-lipped
Ana restrained, inhibited, curbed, checked (see REST-
strain): discreet, prudent (see under PRUDENCE)
Ant frank —Con candid, open, plain (see FRANK)

retrive
Ana return, revert: *reverse, invert: relapse, *lapse,
yield, surrender, abandon
Ant relate

retort vb rejoin, reply, *answer, respond
Ant rejoinder, answer, reply, response (see under
ANSWERS vb 1)

Ana retaliation, reprisal, revenge: repartee (see WIT)

retract 1 retrograde, back, *recede, retreat
Ant protract
2 recant, *abjure, renounce, forswear
Ana eliminate, *exclude, suspend, rule out

retract n *shelter, cover, refuge, asylum, sanctuary
Ana *haven, harbor, port: safety, security (see cor-
responding adjectives at SAFE): seclusion, *solitude

retray vb *recede, retrograde, back, retract
Ana withdraw, retire, depart, *go: *recoil, shrink, quail

retranche
Ant curtail, abridge, *shorten, abbreviate
Ana *decrease, lessen, reduce, diminish

retribution reprisal, vengeance, revenge, *retaliation
Ana *reparation, redress, amends, restitution: visitation,
rebuked, *affliction

Con *mercy, clemency, lenity, grace: forgiveness,
pardoning or pardon, remitting or remission (see corre-
ponding verbs at EXCUSE)

retrieve *recover, regain, recoup, recruit
Ana amend, remedy, redress, reform (see CORRECT vb):
repair, * mend, rebuild

Ant lose

retrograde adj *backward, retrogressive, regressive
Ana reversed, inverted (see REVERSE vb): relapsing,
lapsing, backsliding (see LAPSE vb)

retrograde vb * recede, retreat, back, retract
Ana *return, revert: * reverse, invert: relapse, *lapse, back-
slide

retrogressive regressive, retrograde, *backward
Ana reversing, inverting (see REVERSE vb): receding,
retreating, retrograding (see RECEDE)
Ant progressive —Con advancing, furthering, forward-
ing (see ADVANCE vb): improving, bettering (see IMPROVE)

return vb 1 Return, revert, recur, recrede are compara-
tible when they mean to go or come back (as to a person or
to a place or condition). The same distinctions in impli-
cations and connotations are evident in their corresponding
nouns return, reversion, recurrence, recrudescence. Return
is the ordinary term of this group; it usually implies either
a going back to a starting place or a source (they returned
as wolves return to cover, satisfied with the slaughter that
they had done—Kipling) (the sickness of a child
caused their sudden return) or it may imply, especially
in the case of the noun, a coming back to a former or
proper place or condition (now shall the kingdom return

to the house of David—1 Kings 12:26) (look forward to the return of spring) (he was greeted with enthusiasm
on his return home) (he returns here tomorrow) (sorry
to hear you had a return of your rheumatism—Whitman)

Revert and reversion (see also REVERSION 2) most fre-
quently imply a going back to a previous, often a lower,
state or condition (the conception of a lordly splendid
destiny for the human race, to which we are false when we
revert to wars and other atavistic follies—Russell) (in
the last hours of his life he reverted to the young man
he had been in the gutter days in Vienna—Shirer) (the
reversion to barbarism in political trials and punishments
—Cobban) Both terms, however, are often used when a
return after an interruption is implied (as to a previous
owner, to a previous topic, or to a previous decision)
(when the lease expires, the property reverts to the lessor)
(thought that he would not pass between these two—then
he decided that he would hurry up and do so, then he
reverted to his former decision—H. G. Wells) (on re-
version to private trading in aluminium in this country
—Financial Times) Recur and recrudescence imply a return,
or sometimes repeated returns at more or less regular
intervals, of something that has previously happened,
that has previously affected a person or thing, that has
previously been in one's mind, or that has been previously
known or experienced (the idea kept recurring, and
growing stronger each time it came back—Cloete)
(they came back to her as a dream recurs—Bennett)
(a melancholy tempered by recurrences of faith and resig-
nation and simple joy—Joyce) (incessant recurrence
without variety breeds tedium; the overiterated becomes
the monotonous—Lowes) Recrudescence and the more fre-
cquent recrudescence imply a return to life or activity;
usually the terms imply a breaking out again of something
that has been repressed, suppressed, or kept under control
(the general influence . . . which is liable every now and
then to recrudescence in his absence—Gurney) (the recru-
descence of an epidemic of influenza)

graduate will almost always reveal the differences in their formal education—Joseph. Discover (see also discover, invent) implies an exposing to view by or as if by uncovering; the term usually suggests that the thing discovered has been hidden from sight or perception but is not, as often in the case of reveal, in itself beyond the range of human vision or comprehension (go draw aside the curtains and discover the several caskets to this noble prince—Shak.) (it is a test which we may apply to all figure-painters—a test which will often discover the secret of unsatisfactory design—Binyon). Disclose is more often used in this sense than discover (a black dress which disclosed all she decently could of her shoulders and bosom—Wouk) (the stress of passion often discloses an aspect of the personality completely ignored till then by its closest intimates—Conrad). More often disclose implies the making known of something that has not been announced or has previously been kept secret (the court refused to disclose its decision before the proper time) (the confessions of St. Austin and Rousseau disclose the secrets of the human heart—Gibbon) (there was a hint that disclose his objective, and the Vicar asked no questions—Cather). Divulge differs little from disclose in this latter sense except in often carrying a suggestion of impropriety or of a breach of confidence (his voice became secretive and confidential, the voice of a man divulging fabulous professional secrets—Dahl) (he knew of the conspiracy and did not divulge it—Bello) or in implying a more public disclosure (it seemed to me an occasion to divulge my real ideas and hopes for the Commonwealth—L. P. Smith) (Tell (see also count 1) may come very close to divulge in the sense of making known something which should be kept a secret (gentlemen never tell) but more often it implies the giving of necessary or helpful information, especially on request or demand (tell me the news) (why didst thou not tell me that she was thy wife?—Gen 12:18) (she never told her love—Shak). Betray (see also deceive) often implies a divulging of a secret, but it carries either a stronger and more obvious suggestion of a breach of faith (had . . . written no letters that would betray the conspiracy he had entered into—Anderson) or of a disclosure (as through signs or appearances) against one’s will (life moves on, through whatever deserts, and one must compose oneself to meet it, never betraying one’s soul—Rose Macaulay) (the stamp of desire on his face had betrayed him once and he did not want to be betrayed by disappointment or anger—Cheever).

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

revelation, vision, apocalypse, prophecy are comparable whereas they mean disclosure or something disclosed by or as if by divine or preternatural means. Revelation is often specifically applied to the religious ideas transmitted by writers of books regarded as sacred or divinely inspired, especially the Bible; by extension it has come to mean a body of knowledge distinguishable from that attained by the ordinary human processes of observation, experiment, and reason (his revelation satisfies all doubts, explains all mysteries, except her own—Cowper). Revelation differs from natural knowledge, he says, not by being more divine than certain than natural knowledge, but by being conveyed in a different way—Arnold. Vision implies, as revelation does not, a seeing of something not corporeally present; often, especially in mystical and poetic language, it suggests a profound intuition of something not comprehensible to the ordinary or unaided reason and often implies the operation of some agent (as the Holy Spirit) or the gift or accession of some inexplicable power (as genius or poetic rapture) not attributable to all men. Vision, however, unlike revelation, does not necessarily imply that what is seen or realized is true or of value to oneself or others (and some had visions, as they stood on chairs, and sang of Jacob, and the golden stairs—Lindsay) (the ecstasy of imaginative vision, the sudden insight into the nature of things, are also experiences not confined to the religious—Edmund Wilson) (an age in which men still saw visions . . . seeing visions . . . was once a more significant, interesting, and disciplined kind of dreaming—T. S. Eliot). Apocalypse in religious use denotes a type of sacred book (of which the Book of Revelation is an example) which presents a vision of the future in which the enemies of Israel or of Christianity are defeated and God’s justice and righteousness prevail. In its general application apocalypse usually denotes a vision of the future, when all the mysteries of life shall be explained and good shall magnificently triumph over evil. The noun and still more its adjective apocalyptic often carry one or more connotations as various as those of a spectacular splendor or magnitude suggestive of the Book of Revelation or of wild and extravagant dreams of the visionary or passionate reformer (the apocalyptic imagination of Michelangelo—N. Y. Times) (this allegedly universal religion is challenged today by another secular religion with an alternative apocalypse of history—Niebuhr) (the writers of political apocalypse and other forms of science fiction . . . have dealt in absolutes—Davis). Prophecy has become rare in its original meaning except in learned use and in some religious use. Its occasional connotation of the prediction of future events has been emphasized to such an extent that its historical implications have almost been lost, with the result that the word in older writings is often misinterpreted. Prophecy in this narrow sense implies a commission to speak for another, especially and commonly for God or a god. It therefore further implies that the prophet has been the recipient of divine communications or revelations or that he has been granted a vision or visions (though I have the gift of prophecy, and understand all mysteries, and all knowledge . . . and have not charity, I am nothing—1 Cor 13:2) (prophecy is not prediction, it is not a forecasting of events. Rather, it is the vision which apprehends things present in the light of their eternal issues—Seaver). Ant. adulation.

revenant *apparition, phantasm, phantom, wraith, ghost, spirit, specter, shade

reversion

ments or attributes or things associated with or symbolic of such persons or institutions {that makes her loved at home, revered abroad—Burns} {revered for the wisdom of his counsels and the nobility of his character—Collier} {islands and cities which he revered as the cradle of civilization—Buchanan} {towards Johnson ... his [Boswell's] feeling was not sycophany, which is the lowest, but reverence, which is the highest of human feelings—Carlyle} One reverences things more often than persons, especially things (as laws and customs) which have an intrinsic claim to respect or are commonly regarded as inviolable {we reverence tradition, but we will not be fettered by it—Inge} {sincerity and simplicity! if I could only say how I reverence them—Benson} {pledged to reverence the name of God—Steck} One venerates persons as well as things that are regarded as holy, sacred, or sacrosanct because of character, associations, or age {veneration painting and heroes} {for Socrates he had an almost religious veneration—Nicholls} In a narrow sense one worships only a divine being, God, a god, or a thing deified, when one pays homage by word or ceremonial churches are buildings in which God is worshiped {pagans worship idols, the sun, and the stars} In wider use worship implies a kind of veneration that involves the offering of homage or the attribution of an especially exalted character, whether the object is a divine being or not {there is a difference between admiring a poet and worshipping at a shrine—Replinger} {in his calm, unexcited way, he worships success—Rose Macaulay} Adore (see also adore 2) is often used for worship in application to divinity; worship, however, usually suggests the group approach, and adore the personal approach, to deity. Adore therefore commonly implies love and the performance of individual acts of worship that express unquestioning love and honor (as by obeisance, prostration, and prayer) {the devil said to him: all these will I give thee, if falling down thou wilt adore me—Mt 4:9} {quiet as a nun breathless with adoration—Wordsworth} In more general application adore implies an extremely great and usually unquestioning love {his staff adored him, his men worshiped him—White} Ana esteem, respect, regard, admire (see under regard n) cherish, prize, value, treasure, *appreciate Ant flout

reverence n 1 *honor, homage, deference, obeisance Ana piety, devotion, fealty, loyalty, *fidelity: esteem, respect, *regard, admiration 2 veneration, worship, adoration (see under reverence) Ana fervor, ardor, zeal, *passion: devoutness, piousness, religiousness (see corresponding adjectives at devout) 3 Reverence, awe, fear are comparable when they denote the emotion inspired by something which arouses one's deep respect or veneration. Reverence distinctively implies a recognition of the sacredness or inviolability of the person or thing which stimulates the emotion {a profound reverence for and fidelity to the truth—Mencken} {Richter's reverence for the throne was constant—Bello} {I feel a reverence for this place. Wherever humanity has made that hardest of all starts and lifted itself out of mere brutality, is a sacred spot—Cather} Awe, in all of its shades of meaning, fundamentally implies a sense of being overwhelmed or overcome by great superiority or impressiveness, typically manifested by an inability to speak in its presence or to come near to it. Otherwise, it may suggest any of such widely different reactions as adoration, profound reverence, wonder, terror, submissiveness, or abashment {stood in awe of his teachers} {my heart standeth in awe of thy word—Ps 119:161} {make me as the poorest vassal is that doth with awe and terror kneel—Shak} {he is a great man of the city, without fear, but with the most abject awe of the aristocracy—T. S. Eliot} Fear (see also fear 1) occurs, in the sense here considered, chiefly in religious use {the fear of the Lord is the beginning of wisdom—Ps 111:10} In this sense and as referred chiefly to the Supreme Being as its cause, it implies awed recognition of his power and majesty and, usually, reverence for his law {and calm with fear of God's divinity—Wordsworth} reverence vb venerate, worship, adore, *revere Ana love, enjoy (see like): esteem, respect, regard, admire (see under regard n) reverse vb 1 Reverse, transpose, invert can all mean to change to the contrary or opposite side or position. Reverse is the most general of these terms, implying a change to the opposite not only in side or position but also in direction, order, sequence, relation, connection; thus, to reverse a coin is to turn it upside down; to reverse a process is to follow the opposite order of sequence; to reverse a judgment is to change a previous judgment to another that is contrary to it; to reverse a garment or part of a garment is to turn it inside out; to reverse the direction of a locomotive is to make it go backward instead of forward {having his shield reversed—Scott} {half were put on a diet of unpolished rice; half on polished. The latter group came down with beriberi. Then the diets were reversed—Heiser} Transpose implies a change in position, usually by reversing the order of two or more units (as letters or words) or by an exchange of position {the printer was instructed to transpose the letters sr in the word set as vesr} {if the term b in the equation a + b = c is transposed, the result obtained is a = c - b} But transpose often, especially in grammar or anatomy, implies merely a change in the natural order or position {he frequently transposes words for the sake of effect} {a transposed heart} Invert implies a change from one side to another chiefly by turning upside down but occasionally, especially in surgery, by turning inside out or outside in {invert a tumbler} {invert a comma} {invert the uterus} {the photograph of the pond showed the inverted images of the trees on its bank} In its secondary senses it approaches reverse but applies within narrower limits {invert the order of words in a sentence} {invert the relation of cause and effect} {the custom ... to invert now and then and the order of the class so as to make the highest and lowest boys change places—Thomas Moore} Ana *overturn, upset, capsize 2 *reverse, repeal, rescind, recall Ana upset, *overturn: retract, recant, *abjure, forswear: abrogate, *annul reverse n *converse, obverse Ana back, rear, posterior (see corresponding adjectives at posterior): opposite, contrary (see under opposite adj) reversion 1 return, recurrence, recrudescence (see under return vb) 2 Reversion, atavism, throwback are comparable when they mean return to an ancestral type or an instance of such return. The same distinctions in implications and connotations are evident in the adjectival forms reversionary and atavistic. Reversion and reversionary are the technical terms in the biological sciences for the reappearance of an ancestral character or characters in an individual, or for an organism or individual that manifests such a character we could not have told, whether these characters in our domestic breeds were reversions or only analogous variations—Darwin} {similar mutations are paired together; divergent or reversionary individuals are eliminated—J. A. Thomson} Atavism and atavistic are widely used
both in general and in technical English. Their implication is of an apparent reversion to a remote rather than to an immediate ancestral type through the reappearance of remote, even primitive, characters after a long period of latency. Often, in general use, this connotation of primitiveness carries with it a suggestion of barbarism or even degeneration of a magnificat atavism, a man so purely primitive—London> (those who had made England what it was it had done so by sticking where they were, regardless of their own atavistic instincts, which might have led them back to France or Denmark—Brooks) Throwback is preferred to reversion or atavism by those who seek a picturesque or less technical word. It is chiefly applied to the concrete instance and is often extended to other than living things (the racial laws which excluded the Jews from the German community seemed . . . a shocking throwback to primitive times—Shirer) <an aristocrat of the old line, a throwback to another century—White> Ana relapse, lapse, backsliding (see under Lapse vb)

reversionary atavistic (see under REVERSION)

anachronous—Editions of old books are often published in the form in which they were written, with no attempt to correct the spelling or grammar of the time. This can give a quaint, nostalgic feeling to the original text, but it can also be confusing to modern readers who are not familiar with the writing style of the past. The term "anachronous" means "out of its proper time," and it is often used to describe historical events, literary works, or other things that do not fit in with the current era. The word is derived from the Greek words "ana" ("up") and "chronos" ("time").

Ana
Additionally, rhythm phenomena where a comparable pulsing movement is strongly apparent to the senses. Consequently, rhythm is used not only in reference to speech sounds and musical tones ordered with relation to stress and time, but also to dancing, games, and various natural phenomena where a comparable pulsing movement is apparent, and even to the arts of design, where fluctuations in line or pattern suggest a pulsing movement (the wavering, lovely rhythms of the sea—Rose Macaulay) (every one learned music, dancing, and song. Therefore it is natural for them to regard rhythm and grace in all the actions of life—Ellis) (lost their talent in the deadening rhythms of war, its boredom, its concussion, and . . . its injustice—Mailer) Meter implies the reduction of rhythm to system and measure. Poetry that has meter has a definite rhythmical pattern which determines the typical foot or rhythmical pattern which determines the typical foot or

**rhythm, meter, cadence** can all mean the more or less regular rise and fall in intensity of sounds that one associates chiefly with poetry and music. Rhythm, which of these three terms is the most inclusive and the widest in its need not suggest regular alternation of these sounds, but it fundamentally implies the recurrence at fairly regular intervals of the accented or prolonged syllable in poetry or of the heavy beat or the accented note in music, so that no matter how many unaccented or unstressed syllables or notes lie between these, the continuing up and down movement is strongly apparent to the senses. Consequently rhythm is used not only in reference to speech sounds and musical tones ordered with relation to stress and time, but also to dancing, games, and various natural phenomena where a comparable pulsing movement is apparent, and even to the arts of design, where fluctuations in line or pattern suggest a pulsing movement (the wavering, lovely rhythms of the sea—Rose Macaulay) (every one learned music, dancing, and song. Therefore it is natural for them to regard rhythm and grace in all the actions of life—Ellis) (lost their talent in the deadening rhythms of war, its boredom, its concussion, and . . . its injustice—Mailer) Meter implies the reduction of rhythm to system and measure. Poetry that has meter has a definite rhythmical pattern which determines the typical foot or rhythmical pattern which determines the typical foot or

riddle n puzzle, conundrum, enigma, problem, *mystery

ride vb 1 Ride, drive as verbs (transitive and intransitive) and as nouns may both involve the idea of moving in or being carried along in a vehicle or conveyance or upon the back of something. The basic meaning of ride is a being borne along in or upon something; when this idea is upper most, it makes little difference who or what controls the animal, the vehicle, or mechanism by which one is borne along; thus, one rides or rides on a horse, a bicycle, or a motorcycle when, mounted upon it, one controls its operation or movements, but a woman seated on a pillow behind the saddle may also be said to ride the horse, and a person in the rear seat of a tandem bicycle may be said to ride the bicycle, but a person in a sidecar of a motorcycle rides in the sidecar (not rides the motorcycle). Sometimes ride, the transitive verb, is preferred when the management of the horse and vehicle is also implied, and ride, the intransitive verb, when merely the being mounted upon a moving horse or vehicle is suggested <when he rides his horse his small daughter usually rides on it with him> The basic meaning of drive (see MOVE 1) is a causing to move along; the term therefore primarily refers to the action of an agent that controls the movement of a vehicle whether it is drawn by an animal or self-propelled <drove a four-horse brewery wagon> <it is usually wise to have your child taught to drive by a professional> There is usually a further distinction between ride and drive when movement in a vehicle or conveyance is implied. Ride usually suggests movement in a vehicle (as a train, a bus, or a stranger's automobile) which is not in any sense under one's control <it is a long train ride from New York to Chicago> <he said he preferred riding in a bus to riding in a train> <will you give me a ride to the next town?> Drive often suggests movement in a horse-drawn or motor ve hicle the course of which is in some way or in some degree under one's control, whether one is the actual driver or one (as an employer, patron, or guest) whose wishes the actual driver observes <take a drive along the shore of the lake> <we are going for a short drive>

ridicule vb Ridicule, deride, mock, taunt, twit, rally are comparable when they mean to make a person or thing the object of laughter. Ridicule implies deliberate and often malicious belittling of the person or thing ridiculed <the old State religion which Augustine attacks, ridiculing the innumerable Roman godlings whose names he perhaps found in Varro—Inge> <the man who wants to preserve his personal identity is ridiculed as an eccentric—Harris> Deride implies a bitter or contemptuous spirit <he took his revenge on the fate that had made him sad by fiercely deriding everything—Huxley> <sardonic wisecracks in which supposedly lofty ideals are mercilessly derided—Times Lit. Sup.> Mock stresses scornful derision and usually implies words or gestures or sometimes acts expressive of one's defiance or contempt <nowhere can men be entirely happy while human nature is still being mocked and tortured on other parts of the globe—Kennan> When used in reference to things, mock often implies a setting at naught that suggests scorn or derision <a perishing that mocks the gladness of the spring—Wordsworth> <a joke was a good way to mock reality, to dodge an issue, to escape involvement—MacInnes> Taunt implies both mockery and reproach; it often connotes jeering insults <taunted in fun or in earnest with the foibles and short comings of their fathers—de Laguna> <he . . . took no part in the revivals and usually teas ed and taunted those who did—J. M. Hunt> Twit may come close to taunt and imply a mocking or cruel casting something up to someone <the absence of ideas with which Matthew Arnold twits them—Inge> <a British author snooting American food is like the blind twitting the one-eyed—Liebling> but twit, like rally, may imply no more than good-natured raillery or friendly ridicule <the paper delights in taunting new laws—Newsweek> <a useful place for getting away from the cheery rallying of . . . the English govern ess—Nancy Hale>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
rightful...condign

Right...prerogative, privilege, perquisite, appanage, birthright can all mean something to which a person has a just or legal claim. They differ in their implications both of the nature of the thing claimed and of the grounds of the claim. Right, the most inclusive term, may designate something (as a power, a condition of existence, or a possession) to which one is entitled by nature, by the principles of morality, by grant, by the laws of the land, or by purchase: (the right to life, liberty, and the pursuit of happiness) <rights in a patent> (we do not lose our right to condemn either measures or men because the country is at war—Justice Holmes) (every person has a right to a certain amount of room in the world, and should not be made to feel wicked in standing up for what is due to him—Russell) Prerogative denotes a right which belongs to an actual or an alleged person by virtue of status (as in sex, rank, office, or character) and which thereby gives precedence, superiority, or an advantage over others (the fundamental fact that eminent domain is a prerogative of the State—Justice Holmes) (endurance and stamina in the last analysis are prerogatives of the male—Gerald Beaumont)

Privilege applies to a special right either granted as a favor or concession or belonging to one as a prerogative; privilege often implies an advantage over others (equal rights for all, special privileges for none—Jefferson) (a propertyed class struggling for its privileges which it honestly deems to be its rights—White) (what men prize most is a privilege, even if it be that of chief mourner at a funeral—J. R. Lowell) Perquisite signifies something, usually money or a thing of monetary value, to which one is entitled, especially by custom, as an addition to one's regular revenue, salary, or wages (fees that constitute the perquisites of an office) (a domestic servant often regards her mistress's cast-off clothing as her perquisite) (the petty graft and favoritism which are normal perquisites of machine rule—Green Peyton) Appanage is often used as if it meant merely an adjunct or appurtenance (whose literary work had become a mere appanage of his domestic life—Brooks) but more precisely it can denote something to which one has a claim through custom, through tradition, or through natural necessity (the religious supremacy became a kind of appanage to the civil sovereignty—Milman) (beauty, which is the natural appanage of happiness—Patmore) (their acquired prestige as a token of power and dignity makes appanage of the ruling classes—Anny Latour) Birthright, which basically applies to the property or possessions belonging to one by right of inheritance (see HERITAGE), has acquired extended use in which it differs from right only in being restricted to a right to which one is entitled by some reason connected with one's nativity (as by being a man, a native-born citizen, or a descendant of a particular family line) (we sell our birthright whenever we sell our liberty for any price of gold or honor—Whipple) (the poetic imagination that was his Elizabethan birthright—Parrington)

Ana *claim, title: *freedom, license, liberty

Ant clastic—Con resilient, flexible, supple, springy (see ELASTIC)

2 Rigid, rigorous, strict, stringent are often used interchangeably in the sense of extremely severe and stern, especially when applied to laws or imposed conditions or to the persons who enforce them. There are, however, differences in implications and in range of application. Basically rigid and rigorous imply extreme stiffness or utter lack of elasticity or flexibility, while strict and stringent imply tightness so extreme as to permit no looseness, laxity, or latitude. These implications are preserved in their extended uses. Rigid (see also STIFF) in extended use is applied less often to persons than to their acts or to the conditions the persons make for themselves or others; it usually suggests uncompromising inflexibility (rigid laws) (rigid discipline) (a rigid system, faithfully administered, would be better than a slatternly compromise—Benson)

Rigorous is applied to persons, to their acts, to their way of life, and to the natural or artificial conditions under which they live. It commonly implies imposed severities or hardships; thus, a rigid rule admits of no change or compromise, but a rigorous rule imposes exacting or harsh conditions; a rigorous enforcement of a law makes the people feel its rigors; a rigid enforcement of a law admits of no relaxations in anyone's favor; one can speak of a rigorous winter, a rigorous disciplinarian, the rigorous life of an explorer or a monk. Strict is applied chiefly to persons or their acts and denotes showing or demanding undeviating conformity to rules, standards, conditions, or requirements; thus, a strict rule demands obedience; a strict teacher may impose rigorous discipline and adhere to a rigid system of grading; a strict watch admits no relaxing of vigilance, and strict silence no freedom to speak; a strict construction of a law is one confined to the letter of that law (the strictest obligations of intellectual honesty—Inge) (strict justice, either on earth or in heaven, was the last thing that society cared to face—Henry Adams)

Stringent is to strict as rigorous is to rigid, in that it usually emphasizes the effect or effects rather than the presence of a quality in an agent or his act. Both stringent and rigorous connote imposition, but stringent suggests impositions that limit, curb, or sometimes coerce; thus, a stringent rule narrows one's freedom or range of activities; a stringent interpretation of the constitution may either be narrower or more restrictive in its effects than the letter of the constitution warrants; poverty may be described as stringent when it narrows one's opportunities to satisfy one's aspirations; necessity may be called stringent when it forces one to live within bounds or forces one into distasteful acts (he endeavors by the most stringent regulations to prevent the growth of inequalities of wealth—Dickinson) (colleges with the most stringent admissions requirements—Frederiksen) (with energy sufficiently great to burst the bounds of the most stringent confinement—Rogow)

especially intellectually, spiritually, or aesthetically {the skylark} singing still dost soar, and soaring ever singest—Shelley {up from the eastern sea soars the delightful day—Housman} {young soaring imaginations—John Reed} {the soaring melody of the rondo in the Waldstein sonata is Beethoven’s . . . transfiguration of the air of a ribald folk song—Lowes} Tower is used more often in reference to things that attain conspicuous height through growth or thrusting upward, or building than in reference to things that actually move upward; it also frequently connotes extension to a height beyond that of such comparable neighboring objects as buildings, trees, mountains, or, when eminence is suggested, persons {the Empire State Building towers above New York City} {full thirty foot she towered from waterline to rail—Kipling} {this towered but erratic genius . . . combined in his tempestuous character so many of the best and the worst qualities—Shirer} When the word does imply movement upward, it usually evokes a picture of something shooting up so as to suggest a tower or steepie {the nimble flames towered, nodded, and swooped through the surrounding air—Hardy} Rocket suggests the inordinately swift ascent of a projectile; it is used chiefly with reference to things that rise with extraordinary rapidity or wildly and uncontrollably (as under the impetus of events) {prices have rocketed sky-high—Kenn} {cock pheasants rocket from the misty spinneys—Glover} (Indian pride was reawakened; Indian hopes rocketed—J. M. Brown) Levitate implies a rising or floating in or as if in air that suggests the intervention of antigravity; the term connotes actual or induced lightness or buoyancy and ease of movement {a 1 1/2-in. niobium sphere levitated in a liquid helium bath—J. L. Taylor} {we are levitated between acceptance and disbelief—O’Faloain} {dwellings . . . levitated by his imagination into new structural creations—Flanner} The word is sometimes specifically associated with supra-normal and especially spiritualistic practices {the levitation of a table at a séance} and with illusory risings {it is asserted that a man or a woman levitated to the ceiling, floated about there, and finally sailed out by the window—T. H. Huxley} Surge suggests the upward heaving or spurring of waves. It is used often with up, in reference to emotions and thoughts that rise powerfully from the depths of subconsciousness {strong emotions surged through him as he strode on—Röläva} {things half-guessed, obscurely felt, surged up from unsuspected depths in her—Wharton} Quite as often, usually with an adverb of direction, it suggests a rolling movement comparable to that of oncoming waves {the troops surged forward} {traffic surging past}

romp vb  frolic, rollick, gambol, deport, sport, play (see under play vb)

room n 1 Room, chamber, apartment all denote space in a building enclosed or set apart by a partition. Room is the word in ordinary use. Chamber is somewhat elevated; it is used chiefly of a private room, especially of a bedroom on an upper floor (high in her chamber up a tower to the east—Tennyson) (he . . . hardly ever slept two nights successively in one chamber—Southey) Apartment is decreasingly frequent in the sense of a single room (her morning room was an airy apartment on the first floor—Braddon)

berth, basically a nautical term meaning maneuvering space for a ship, in more general use denotes a space kept between one and some source of potential danger (an orderly place to which outlaws and criminals gave wide berth—Holbrook) Play (see also play, fun) can specifically imply freedom of movement and action especially with reference to two or more things which must work together in close relation or without interference or conflict (some play must be allowed to the joints if the machine is to work—Justice Holmes) (the free play of passion and thought . . . were crushed out of existence under this stern and rigid rule—Dickinson) Elbowroom does not greatly differ from room except that it is somewhat more forceful and definitely implies freedom from interference or constraint as well as space for movement or for action (which would give him more elbowroom to act against France—Chesterfield) Leeway, basically a nautical term meaning the drift to leeward especially of a sailing vessel, in its closest extended sense means a space kept for interests which can develop into avocation—Sat. Review (the president was given wide leeway in deciding what constituted a threat to public safety—C. E. Black & K. D. White)

Play (see also play, fun) can specifically imply freedom of movement and action especially with reference to two or more things which must work together in close relation or without interference or conflict (some play must be allowed to the joints if the machine is to work—Justice Holmes) (the free play of passion and thought . . . were crushed out of existence under this stern and rigid rule—Dickinson) Elbowroom does not greatly differ from room except that it is somewhat more forceful and definitely implies freedom from interference or constraint as well as space for movement or for action (which would give him more elbowroom to act against France—Chesterfield) Leeway, basically a nautical term meaning the drift to leeward especially of a sailing vessel, in its closest extended sense means a falling off from the line of progress and therefore may connote something (as a shortage) to be made up (Africa has been late in its emergence into modern civilization and it has still considerable to make up—Simnett) More frequently, however, leeway tends to mean room or margin for freedom of action (educational program . . . must allow leeway for interests which can develop into avocation—Sat. Review) (the president was given wide leeway in deciding what constituted a threat to public safety—C. E. Black & K. D. White) (he asked his creditors to allow him a little leeway) Margin (see also border) implies an amount (as of time, money, or material) additionally allowed or made available so as to provide for contingencies or emergencies which cannot be foreseen (the King, in his instructions, left a wide margin of discretion to the generals—Froude) (an enormous margin of luxury . . . against which we can draw for our vital needs—Lippmann) Clearance stresses lack of obstruction.
Typically it implies a carefully calculated amount of space between two physical objects such as the water level and the underside of a bridge, or a roadway and the underside of a viaduct above it, or a shaft and the hole into which it is fitted easily but not loosely. Sometimes it may appear to intangible obstructions and then stress removal (as by the satisfying of legal or official requirements) rather than planned avoidance.

**roost vb** *perch, alight, light, land*

**roost v** *perch, alight, light, land*

**rough adj** 1 Rough, harsh, uneven, rugged, scabrous are comparable when they mean not having a smooth or even surface, exterior, or texture. Rough, the usual and comprehensive word, basically applies to whatever may be said to have a surface or an exterior which to the sense of touch or to the sight is not smooth but is covered with perceptible inequalities (as points, bristles, projections, or ridges) *rough ground* *(a rough block of stone) (the rough skin of a chapped hand) (a rough tongue) (a rough unshaved face)*

2 Often when applied to materials and substances employed in the arts and in manufacturing, rough means lacking a final finish (as of polishing, smoothing, or dressing) *(a rough diamond) (rough steel) (rough lumber)* By extension the term applies also to things which impress another than the tactile sense or one's nerves or feelings as lacking in smoothness and evenness *(rough words) (rough winds) (rough sounds) (he has had a rough time) (see also rude)*

**Harsh** suggests a more definitely disagreeable sensation or impression than rough; when applied to what is felt with the hand, it implies a surface or texture that is distinctly unpleasant to the tactile sense *(a harsh fabric) (a harsh sand)* or when applied to something heard, it suggests a rasping, grating quality *(harsh voices)* *(harsh din broke the fair music—Milton)* and when applied to something seen, tasted, or smelled, it suggests a character or quality that is offensive or repellant to a sensitive person *(a harsh liquor)* *(a harsh stink)* *(a harsh combination of coughs)*. Unlike rough, harsh in its extended senses seldom implies a lack of polish or refinement, but rather it suggests a nature that is unfeeling, cruel, and indifferent to the pain it inflicts *(a harsh critic) (a harsh parent)* or when applied to things, effectiveness in promoting discomforts or in imposing rigors *(a harsh reboke) (a harsh climate) (a harsh sentence)*. Uneven applies either to surfaces or to lines and suggests a lack of uniformity in height through all the points of the surface *(an uneven road) (an uneven floor)* or a lack of straightness and the presence of curves or angles *(an uneven edge)* *(an uneven hem)*. In extended use it implies a lack of uniformity especially in excellence or agreeableness in all the parts (as of a life, a performance, or a work of art) *(the artist's brushwork in this painting is uneven)* *(the trio's playing of the sonata was uneven)*

**Rugged** more often applied to persons so strong and healthy or machines so strongly made that they can survive great stress and strain, is not uncommonly employed in the sense of rough; in such use it applies chiefly to surfaces broken by ridges, prominences, gorges, and gullies that can offer serious difficulty to the traveler or worker *(a rugged road up a mountain)* or which (as in the case of faces or countenances) are gaunt, seamed, or heavy-tended use *(scaly, scurfy)* *(scabby)* *(thorny)* *(prickly)* *(knobby)* *(and knotty)* *(when applied to surfaces)* *(a scabby leaf) (a scabby hide)*

**Scabrous** applies basically to a surface that is rough to the touch though not necessarily uneven; in this sense it is a generic term including such species as scaly, scurfy, scabby, thorny, prickly, knobby, and knotty *(when applied to surfaces)* *(a scabrous leaf) (a scabrous hide)*

In extended use scabrous applies chiefly to subject matter or to writings and works of art having subject matter that is prickly or thorny, or difficult to treat, often because it is offensive to the tastes or morals of the community *(what writer... has spoken more acutely on the somewhat scabrous, but none the less important subject of feminine temperamant?—Huxley)*

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
2 Rude, ill-mannered, impolite, discourteous, uncivil, ungracious can all mean not observant of the manners or forms required by good breeding. Rude suggests lack of delicacy or consideration for the feelings of others; it does not necessarily suggest lack of breeding, for it is applicable to persons of all stations or conditions. It usually stresses impudence, insolence, or a generally insulting manner (a rude answer) demanding an explanation of the rude familiarity with which Jim had treated him—Anderson. Ill-mannered is a more general and less explicit term, and it seldom carries a suggestion of an intent to offend or insult such as rude usually carries; it is therefore applicable to a person, act, or utterance that shows ignorance of, indifference to, or a disregard of the proprieties (the tone . . . seems to me as gratuitously ill-mannered as the sentence itself is foolish—Corker). Impolite, discourteous, and uncivil, as the negatives of polite, courteous, civil (for all three, see CIVIL), imply merely the reverse of the care in observing the proprieties of good or formal society that is suggested by polite (scientists may form schools of thought, but these ungracious (compare GRACIOUS) stresses the lack of kindliness or courtesy resulting from awkwardness, callowness, surliness, or irritation (an ungracious refusal) (an ungracious answer) these criticisms of a book that is a labor of love and piety may seem ungracious—Cohen). Ana brusque, curt, gruff, crusty (see BLUFF): *impertinent, intrusive, meddlesome: surly, crabbed (see SULLEN). Ant civil: urbane. ruiful dolorous, doleful, lugubrious, plaintive, *melancholy. Ana depressed, weighed down, oppressed (see DEPRESS): piteous, *pitiful: despairing, *despondent, hopeless. rugged *rough, scabby, harsh, uneven. Ana robust, *healthy: brawny, husky, *muscular: *rank, rampant: arduous, *hard, difficult. Ant fragile. ruin n. Ruin, havoc, devastation, destruction are comparable when they mean the bringing about of disaster or what is left by a disaster. They are general terms which do not definitely indicate the cause or the effect yet suggest the kind of force operating to produce the kind of disaster involved. Ruin implies generally a falling or tumbling down and is applicable to anything that through decay, corruption, neglect, or loss is unable to maintain its wholeness or soundness and so gives way or falls apart; this idea underlies all of the many uses of the word (the old castle has fallen in ruins) (this carelessness . . . was to be his ruin—M. A. Hamilton) (cases of hopeless ruin . . . in which the body has first been ruined through neglect or vice—Elliot) (the possessive instinct . . . when pushed too far becomes the cause of the ruin of . . . society—Ellis). Havoc suggests an agent that pillages, despoils, or ravages and brings confusion and disorder with it (appropriated by the havoc and loss of life caused by the earthquake—Crowley) (he was now the blockaded . . . for Agrippa had worked havoc with his sea communications—Buchan). Hookworms live a long, long time in the small intestine, creating havoc all the while—Heiser. Devastation basically implies a laying waste, usually of a widespread territory (as by war or a natural catastrophe) the terrible devastation wrought by the great tidal wave which followed the earthquake at Lima—T. H. Huxley) but it also is applicable to something (as disease) that overthrows the individual or his property or resources like a natural catastrophe (those [letters] . . . make clear the devastation in her health that was soon to be revealed—Ellis). Destruction implies an unbuilding or pulling down or apart, but, since it is used alike of material and of immaterial things, it may suggest not only demolition but a killing, an undoing, or an annihilation; also, although it often connotes a conscious attempt to pull down, it as often suggests rather an inevitability or an irony in the effect produced (an unjust society wreaks cruel if subtle imprisonments and destructions of personal energy—Mailer) the destruction of a man's edifice [life work] by his own instruments of construction—Bellloc. Ana disintegration, crumbling (see corresponding verbs at DECAY). Ruin vb. Ruin, wreck, dilapidate can all mean to subject a person or more often a thing to forces that are destructive of soundness, worth, or usefulness. Ruin usually suggests a bringing to an end the structural or mental integrity, the value, beauty, or the well-being of something or of someone through such destructive agencies as weather, age, or neglect, through partial destruction by fire, flood, or collision, or through loss of something vital to happiness or success (as one's fortune, one's good name, or one's chastity) (the storm has ruined the garden) (the firm's reputation was ruined by rumors) (there was in all of them [persons] something ruined, lost or broken—one precious and irretrievable quality which had gone out of them and which they never could get back again—Wolfe). Wreck implies a ruining by or as if by crushing or being shattered. Basically it is used in reference to a ship, a train, a vehicle, or an airplane (the ship was wrecked on the rocky coast). In its extended sense wreck is often used in place of ruin when there is an intent to imply injury, often to something intangible such as one's career, one's credit, or one's prospects, past all hope of repair or of reconstruction (his health was wrecked by dissipation) (their plans were wrecked by the unexpected change in weather). When the pulling down of a building is implied, wreck is often preferred to demolish or destroy because it does not necessarily carry the suggestion implicit in those words of the uselessness of that which is left. Dilapidate historically implies ruin especially of a building, or of developed property, or of one's fortune or financial resources through neglect or through wastefulness; the term in such use carries, as the other terms do not, a strong implication of culpability [men bent . . . upon intriguing for places at court, for salaries, and for fragment after fragment of the Royal fortune which they were dilapidating—Bello] (the church . . . was . . . shamefully suffered to dilapidate by deliberate robbery and frigid indifference—Johnson). In more general use dilapidate implies a shabby, run-down, and often tumbledown condition and is used chiefly in the past-participial form as an adjective (negotiating the dilapidated and pubblind vehicle over the curving roads—Cheever) (an aged man, traveling alone, and wearing the dilapidated look of a retired missionary—Glasgow) Ana destroy, demolish, raze: *deface, disfigure: *maim, mutilate, mangle. Rule n. Law, regulation, precept, statute, ordinance, canon. Ana order, mandate, dictate, *command: *principle, axiom, fundamental: etiquette, *decorum, propriety.

sadness, depression, melancholy, melancholia, dejection,

gloom, blues, dumps are comparable when they mean a state of mind when one is unhappy or low-spirited or an attack of low spirits. Sadness is the general term; apart from the context it carries no explicit suggestions of the cause of the low spirits or of the extent to which one is deprived of cheerfulness (a feeling of sadness and longing that is not akin to pain—Longfellow) (we feel his underlying sadness . . . but Rome may have felt more strongly than we do his cheerfulness and pride—Buchan) (the leafless trees left her with unearned sadness. She mourned the long age before spring and feared loneliness in winter—Malamud) Depression applies chiefly to a mood in which one feels let down, discouraged, and devoid of vigor or to a state of mind, usually outwardly manifested by brooding, in which one is listless, despondent, or sullen; the term usually implies a precipitating or predisposing cause which may be external but is as often inherent in the nature of the affected individual (as for his look, it was a natural cheerfulness, striving against depression from without, and not quite succeeding—Hardy) (Tina's love was a stormy affair, with continual ups and downs of rapture and depression—Wharton) (a defeat would bring me closer to a general depression, a fog bank of dissatisfaction with myself—Mailer) Melancholy often applies to a not unpleasant or displeasing mood or a mental state characterized by sadness, pessiveness, and deep but not depressing or heavy seriousness (tend our hearts and spirits wholly to the influence of mild-minded melancholy—Tennyson) (the lively, curious mind, the wit, the gaiety of spirit tinged with a tender melancholy—Hudson) (fate did not bring her dreamed-of love. Instead, it gave her cause for melancholy, disappointment, and disillusionment—Farrowly (in spite of her civic zeal, she had a taste for melancholy—for the smell of orange rinds and wood smoke—Cheever) Melancholia may denote a disordered mental state characterized by a settled deep depression (the excited phase is called mania and its counterpart is known as melancholia . . . . The latter phase is marked by mournful and self-accusatory ideas and a countenance disfigured by despair—Ellery) Dejection suggests especially the mood of one who is downcast, discouraged, or dispirited; the term differs from depression chiefly in its suggestion of an external cause and in its more frequent application to a mood than to a prolonged state of mind (it was the last of the regiment's stay in Meryton, and all the young ladies in the neighborhood were dropping apace. The dejection was almost universal—Austin) (full of the dejection of a nice child whose toy has been snatched from its hand—Tracy) Gloom applies either to the effect produced by melancholy, dejection, or extreme sadness on the person afflicted or to the atmosphere which a person of low spirits or a depressing event creates; the term carries a suggestion of darkness and dullness and it further connotes lack of all that enlivens or cheers (the leaden gloom of one who has lost all that can make life interesting, or even tolerable—Hardy) (the idea that I am being studied fills me, after the first outburst of laughter, with a deepening gloom—Huxley) Blues and dumps are familiar, expressive terms for an attack of low spirits. Blues may suggest an acute attack of depression or melancholy which afflicts one almost as if an illness (a fit of the blues) (I believe that the attack of intense blues which caught me in that moment would have taken weeks to shake off—Ingamells) while dumps, usually in the phrase in the dumps, is more likely to suggest a deep sullen persistent dejection of spirits (doeful dumps the mind oppressed—Shak) (where someone else would have been in the dolefulest dumps . . . this young fellow took it out in joking—Overstreet)

Ana

safety

safety
make a venture without fear, or the provision of safe-
guards or protective devices which make a thing safe
to use or follow (the offer of a partnership by making his
future secure also made his marriage possible) (now that
the foundations were in good repair they regarded the
bridge as secure) (a provident, rather thoughtful people,
who made their livelihood secure by raising crops and
fowl—Cather) (an independent, stubborn man who
knew what he wanted, a man who was firmly rooted,
established, secure against calamity and want—Wolfe)
Often the term suggests not only a freedom from fear of
danger but a position, condition, or situation free from
all hazards (has made a secure place for himself in the
history of English poetry) (university graduates who had
been unable to find suitable jobs or any secure place in
normal society—Shirer)

Ana protected, guarded, shielded (see DEFEND): *reliable,
dependable, tried

Ant dangerous — Con precarious, hazardous, risky,
perilous (see DANGEROUS)

safeguard vb guard, shield, protect, *defend

Ana conserve, preserve, *save: secure, insure, *ensure,
assure

sag vb *droop, wilt, flag

Ana sink, slump, subside, *fall, drop: *hang, dangle,
suspend

saga *myth, legend

sagacious perspicacious, astute, *shrewd

Ana *sharp, keen, acute: penetrating, piercing, probing
(see ENTER): *wise, judicious, sage, sapient

sage adj *wise, sapient, judicious, prudent, sensible, sane

Ana *intelligent, knowing, brilliant: *learned, erudite:
sagacious, perspicacious (see SHREWED)

sail vb float, skim, scud, shoot, dart, *fly

sailor *mariner, seaman, tar, gob, bluejacket

salary *wage or wages, stipend, pay, hire, emolument, fee

salient conspicuous, outstanding, signal, striking, arresting,
prominent, remarkable, *noticeable

Ana significant, important, weighty (see corresponding
nouns at IMPORTANCE): impressive, *moving: obtrusive,
intrusive (see IMPERTINENT)

salubrious *healthful, healthy, wholesome, salutary,
hygienic, sanitary

Ana *beneficial, advantageous: benign, *favorable

salutary wholesome, *healthful, healthy, salubrious,
hygienic, sanitary

Ana *beneficial, advantageous, profitable

Ant deleterious: evil

salutation *greeting, salute

salute vb *address, greet, hail, accost

salute n *greeting, salutation

same, selfsame, very, identical, *identical, equivalent, equal,
tantamount can mean either not different from the other
or others or not differing from each other. Same may
imply, and selfsame invariably implies, that the things
under consideration are in reality one and not two or
three different things (this is the selfsame book that John
once owned) (they go to the same summer resort year
after year) (voted out of power . . . by the selfsame
people who had put them into office in the first place—
Fairless) (perhaps the selfsame owl that used to fly
overhead—Eve Langley) But same may also be applied
to things actually distinct but with no appreciable dif-
fERENCE in quality, kind, appearance, amount, or signifi-
cance (say Wheeler riding in state in the great Dewey
parade . . . in 1898, wearing the same uniform that Miles
and Merritt wore—Long) would be looked upon as one of
the afterguard, and would eat the same rations as the
captain—Chippendale) Very, like selfsame, implies

complete absence of difference and therefore oneness in
the things under consideration (you are the very
man I have been anxious to see) (that is the very
thing that I was saying—Shelley) (here in this very
town there was once a café—McCullers) identical (see also LIKE)
implies either selfsameness (I found it at the identical
spot where I left it) (the authors of the anonymous
Waverley and of the popular Lady of the Lake were
found to be identical) or absolute agreement in all details
(as of quality, shape, and appearance) (since the sculp-
tures are identical one must be a replica of the other)
(no two leaves from the same tree are identical) (twins
that are identical develop from a single fertilized egg)
(a thousand identical guant gray houses—Rowecht)

the same measures . . . may flow from distinct powers;
but this does not prove that the powers themselves are
identical—John Marshall) identical occurs chiefly in
diplomatic or governmental use and like identical
implies absolute agreement in all details (the Allies sent
identic answers to the ultimatum) (identic notes utilized
by the powers in making joint representation to a government
—Stuart) equivalent is used of things that amount to
the same thing or are freely interchangeable in some respect
(as worth, force, significance, or import) (some heirs
received their legacies in cash, some in real estate of
equivalent value) (in economics, the equivalent of
a beautifully composed work of art is the smoothly running
factory in which the workers are perfectly adjusted to
the machines—Huxley) equal implies complete corre-
spondence (as in number, amount, magnitude, or value)
and therefore equivalence but not selfsameness (equal
salaries) (equal quantities) (equal merit) (divide in
equal shares) (the General . . . greeted Mrs. Churchill
in English, and spoke it throughout the meal. To make
things equal, I spoke French—Sir Winston Churchill)
tantamount, otherwise identical with equivalent, is
restricted in application to one of a pair of usually
immaterial things that are in effect equivalent the one to
the other (as in value, significance, or effect) (such a move-
ment . . . would be tantamount to a confession of failure
—Trollope) (refusal to prolong the truce . . . would be
tantamount to a threat—Current Biog.)

Ana alike, *like, akin, parallel, uniform

Ant different

sample n specimen, example, *instance, case, illustration

Ana piece, *part, portion, segment, fragment

sanative remedial, *curative, restorative, corrective

Ana salutarv, hygienic, sanitary, *healthful: healing,
curing, remedying (see CURE vb)

sanctimonious 1 pietistic, religious, *devout, pious

Ana see those at SANCTIMONIOUS 2

2 hypocritical, pharisical, canting (see under HYPOCRISY)

Ana affected, feigned, simulated, counterfeited, as-
sumed, pretended (see ASSUME): perfervid, fervid, ardent,
fervent (see IMPASSIONED)

sanctimonious *hypocritical, pharisical, canting

Ana pretending or pretense, simulation, feigning, counter-
feiting, affecting or affectation (see corresponding verbs
at ASSUME): enthusiasm, zealotry, fanaticism (see nouns
at ENTHUSIAST)

sanction vb *approve, endorse, accredit, certify

Ana *authorize, license, commission: confirm, *ratify:
enforce, implement

Ant interdict

sanctity *holiness

sanctuary refuge, asylum, *shelter, cover, retreat

Ana safety, security (see corresponding adjectives at
SAFE): protection, shielding or shield, guarding or guard

A colon (:) separates groups of words discriminated. An
asterisk (*) indicates place of treatment of each group.
sangfroid phlegm, composure, "equanimity
Annadifference, unconcernedness or unconcern, aloofness, detachment (see corresponding adjectives at INDIFFERENCE): self-possession, aplomb, self-assurance, assurance, self-confidence, "confidence
sanguine *bloody, sanguine, sanguineous, gory
sanguineous *bloody, sanguine, sanguineous, gory
sanitize disinfect, *sterilize, fumigate
sarcasm satire, irony, *wit, humor, repartee
sapid *palatable, appetizing, savory, tasty, toothsome, flavorsome, relishing
satellite *follower, adherent, henchman, partisan, disciple, sectary
sate vt *satiate, surfeit, clay, pall, glut, gorge
satiate, sate, surfeit, clay, pall, glut, gorge are comparable when they mean to fill or become filled to the point of replenishment. Although both sate and sate can imply no more than a complete satisfying, both terms more often imply an overfilling or an overfeeding so that there is no longer a pleasure in what once pleased or seemed desirable (the ordinary Roman . . . sated alike with the fervors of the democrats and the rigidity of the conservativeness—Buchan) (when even then if a few common words of explanation, a few sober words of promise, would not have satisfied the crowd, already sated with eloquence—Repliplier) (so overwhelmed by information . . . that curiosity becomes sated, discrimination dulled—W. R. Parker) Surfeit distinctly implies a feeding or supplying to excess with consequent nausea or disgust (surfeited herself with candy) (surfeited a person with flatter) (readers surfeited with the . . . wild overstate-ments and wild understatements of public dispute—Montague) (if music be the food of love, play on; give me excess of it, that, surfeiting, the appetite may sicken, and so die—Shak.) Stress the resulting disgust or boredom more than the surfeit which induces them (and thus, with sinning cloyed, has died each Murtagroyd—Gilbert) (poetic wit itself is a rarity . . . Large in-discriminatory doses of it tend to cloy—Horace Gregory) Pall differs from cloy only in its greater emphasis upon the loss of all power in something with which one is surfeited to challenge one's interest or attention or to what one's appetite; the term therefore refers rather to things that tend to satiate than to the persons whose appetites or desires have been sated by such things (there anguish or desires have been sated by such things with unpaid gestation of greed or satiation <banks glutted with unpaid commercial paper—Lehman) Gorge usually implies the stimulation of a greed that knows no limits except those imposed upon it by physical necessity (its hunger was already all but glutted, and its purpose seemed to be, mainly, to kill—C. G. D. Roberts) Gorge may be used also in reference to impersonal things, implying merely an overloading, and carrying no suggestion of greed or satiation <banks glutted with unpaid commercial paper—Lehman)

sand 709
satiate

sand n *fortitude, grit, backbone, pluck, guts
Annacourage, mettle, spirit, resolution, tenacity
sanewise, judicious, prudent, sensible, sage, sapient
Annarational, reasonable: right, *good: sound, cogent, convincing, compelling (see VALID)
Antinsane
sangfroid phlegm, composure, "equanimity
Annadifference, unconcernedness or unconcern, aloofness, detachment (see corresponding adjectives at INDIFFERENCE): self-possession, aplomb, self-assurance, assurance, self-confidence, "confidence
sanguine *bloody, sanguine, sanguineous, gory
sanguineous *bloody, sanguine, sanguineous, gory
sanitize disinfect, *sterilize, fumigate
sarcasm satire, irony, *wit, humor, repartee
sapid *palatable, appetizing, savory, tasty, toothsome, flavorsome, relishing
Annaindidsp—Convapid, flat, inane, jejune (see INSIPID): bland, *soft, mild
sapientsage, *wise, judicious, prudent, sensible, sane
Annalearned, erudite, scholarly: sagacious, perspicacious
(see SHREWID)
sarcasm satirize, irony, *wit, humor, parterre
Annainciviness, trenchancy, bitingness, cuttingness (see corresponding adjectives at INCISIVE): mockery, taunting, derision (see corresponding verbs at RIDICULE)
sarcastic, satirize, ionic, sardonic can mean having or manifesting bitterness and power to cut or sting. A person, a mood, a remark, or an expression is sarcastic when he or it manifests an intent to inflict pain by deriding, taunting, ridiculing (see corresponding verbs at RIDICULE): *sinister, malign
satevt *satiate, surfeit, clay, pall, glut, gorge
satiate, sate, surfeit, clay, pall, glut, gorge are comparable when they mean to fill or become filled to the point of replentishment. Although both sate and sate can imply no more than a complete satisfying, both terms more often imply an overfilling or an overfeeding so that there is no longer a pleasure in what once pleased or seemed desirable (the ordinary Roman . . . sated alike with the fervors of the democrats and the rigidity of the conservativeness—Buchan) (when even then if a few common words of explanation, a few sober words of promise, would not have satisfied the crowd, already sated with eloquence—Repliplier) (so overwhelmed by information . . . that curiosity becomes sated, discrimination dulled—W. R. Parker) Surfeit distinctly implies a feeding or supplying to excess with consequent nausea or disgust (surfeited herself with candy) (surfeited a person with flatter) (readers surfeited with the . . . wild understate-ments and wild understatements of public dispute—Montague) (if music be the food of love, play on; give me excess of it, that, surfeiting, the appetite may sicken, and so die—Shak.) Stress the resulting disgust or boredom more than the surfeit which induces them (and thus, with sinning cloyed, has died each Murtagroyd—Gilbert) (poetic wit itself is a rarity . . . Large in-discriminatory doses of it tend to cloy—Horace Gregory) Pall differs from cloy only in its greater emphasis upon the loss of all power in something with which one is surfeited to challenge one's interest or attention or to what one's appetite; the term therefore refers rather to things that tend to satiate than to the persons whose appetites or desires have been sated by such things (there anguish or desires have been sated by such things with unpaid gestation of greed or satiation <banks glutted with unpaid commercial paper—Lehman) Gorge usually implies the stimulation of a greed that knows no limits except those imposed upon it by physical necessity (its hunger was already all but glutted, and its purpose seemed to be, mainly, to kill—C. G. D. Roberts) Gorge may be used also in reference to impersonal things, implying merely an overloading, and carrying no suggestion of greed or satiation <banks glutted with unpaid commercial paper—Lehman)

more—Kipling\) (heaven can gorge us with our own

desires—Defoe)\n\n**Ana** *satisfy, content: pamper, humor, *indulge: gratify, regale (see PLEASE)\n\nsatiny silky, silken, velvet, glossy, *sleek, slick\n\nsatire irony, *wit, humor, sarcasm, repartee\n\n**Ana** railly, persiflage, *badinage: lampoon, pasquinade, *libel, skit: ridiculing or ridicule, deriding or derision, taunting (see corresponding verbs at RIDICULE)\n\nsatiric ironic, sardonic, *sarcastic\n\n**Ana** *pungent, piquant, poignant: ridiculing, deriding or derivative, taunting, mocking (see corresponding verbs at RIDICULE): mordant, *caustic, scathing\n\nsatisfied content (see under SATISFY)\n\n**Ana** gratified, gladdened, pleased (see PLEASE): appeased, pacified (see PACIFY)\n\nsatisfy 1 Satisfy, content or contented. Satisfy implies full appeasement not only of a person's desires or longings but also of his needs or requirements (walks that satisfy a wish for exercise, a pupil) <a little, upright, pert sitting bird—Ruskin>\n\n2 recompense, compensate, remunerate, repay, *pay, plies exact agreement with the test or measure and there-\nwith the world, not because fulfillment, a requirement, or a hypothesis) and found to be fulfilled human hopes—A. E. Stevenson\n\n*Ant* tantalize\n\n2 recompense, compensate, remunerate, repay, *pay, reimburse, indemnify\n\n**Ana** balance, *compensate, offset\n\n3 Satisfy, fulfill, meet, answer all can mean to measure up to a condition, a need, a claim, a hope, or a requirement. They are seldom interchangeable, however, without loss of precision or expressiveness or without violation of idiom. Satisfy, with this meaning (compare SATISFY 1), is used chiefly in reference to things or to persons considered impersonally which are submitted to a test (as a condition, a requirement, or a hypothesis) and found to be such in constitution or makeup as not to fall short (there is one condition that a lyric ought to satisfy: it ought to pass the test of being read aloud—Binyon) <he will satisfy Newman's famous definition of a gentleman as one who never inflicts pain—Montague>\n\nFulfill usually connotes more than adequacy or richness and fullness of measure; also what is fulfilled is not determined by something calculable but usually by something indefinite or immeasurable (as expectations, hopes, desires, or needs) (a son seldom fulfills his father's hopes) \n\n2 impregnate, interpenetrate, penetrate, permeate, pervade\n\n**Ana** *infuse, imbue, inoculate: penetrate, pierce, probe (see ENTER)\n\nsaturine dour, gloomy, *sullen, glum, morose, surly, sulky, crabbed\n\n**Ana** grave, *serious, solemn, somber, staid: taciturn, reserved, uncommunicative, *silent\n\n**Ana** genial: mercurial\n\nsaucy, pert, arch are comparable when they mean flippant and bold rather than serious and respectful in one's manner or attitude. Saucy is rarely strongly derogatory though it implies some degree of lack of proper respect (a saucy pupil) <a saucy retort> Usually it also implies piquancy and levity with a hint of smartness or of amusing effrontery <a little saucy rosebud minx can strike death-damp into the breast of doughty king—Browning> Sometimes it is applied also to birds and small animals on similar grounds <some saucy puppies on their hind-legs—Ruskin>\n\nArch usually implies roguish or coquettish audacity or mischievous mockery sometimes carried to the point that it seems forced or awkward <imperious expressions and arch posturing—Osbert Lancaster> \n\nElizabeth . . . turned to him with an arch smile, and said—"You mean to frighten me, Mr. Darcy, by coming in all this state to hear me?"—Austen\n\n**Ana** flippant, frivolous, volatile, light-minded (see corresponding nouns at LIGHTNESS): intrusive, obtrusive, meddlesome, *impertinent: brash, impudent (see SHAMELESS): piquant, snappy (see PUNGENT)\n\nsaunter, stroll, amble can all mean to walk slowly and more or less aimlessly, especially in the open air. Saunter suggests a leisurely pace and an idle and carefree mind <sauntering> about the streets, loitering in a coffeehouse—Fielding> <he had stepped out into the street well ahead of the man sauntering toward the doorway—MacInnes>\n\nStroll differs from saunter chiefly in its implications of an objective (as sight-seeing or exercise) pursued without haste and sometimes with wandering from one place to another <then we strolled for half the day through stately theaters—Tennyson> (the notables of the town . . . stroll past with the dignity of Roman senators—Huxley>\n\n**Amble** occasionally conveys the same implications as saunter or sometimes stroll, but it more often suggests merely an easy, effortless gait comparable to that of a saunter—Fielding>
of an ambling horse <you were just ambling around that party, eating, drinking, carefree as a bird—Wouk>

savage adj 1 *fierce, ferocious, barbarous, inhuman, cruel, fell, truculent

Ana implacable, relentless, unrelenting, merciless, *grim: rapacious, *voracious, ravenous

Con gentle, mild, lenient (see soft): humane, benevolent, *charitable

2 barbaric, *barbarian, barbarous

Ana primitive, primeval (see primary): *rough, harsh: untutored, untutored, *ignorant

Con *tame, submissive, subdued: civilized, cultured (see corresponding nouns at civilization)

save vb 1 deliver, redeem, *rescue, ransom, reclaim

Ana *free, release, liberate, emancipate: *defend, protect, shield, guard, safeguard: *recover, retrieve, recoup, recruit

Ant lose: waste: damn (in theology)

2 Save, preserve, conserve can mean to keep free or secure from injury, decay, destruction, or loss. Save may imply measures taken to protect something from danger of loss, injury, or destruction <they had her in a Sunday-go-to-meeting dress . . . never washed or worn, just saved—Welty> <saved his papers in a vault> <he wavered around an atomistic explanation of the world, yet held fast to the Biblical Creation, to save his orthodoxy—H. O. Taylor> but, more often, it suggests rescue or delivery from a dangerous situation (see under rescue). Preserve stresses the idea of resistance to destructive agencies and hence implies the use of means to keep something in existence or intact <old records are preserved by protecting them from light and moisture> <preserve food for winter use> <constitutions are intended to preserve practical and substantial rights, not to maintain theories—Justice Holmes> <there's nothing like routine and regularity for preserving one's peace of mind—Dahl> Conserve, on the other hand, suggests keeping sound and unimpaired and implies the use of means to prevent unnecessary or excessive change, loss, or depletion <a conveyancing must conserve his energy if he is to make rapid progress> <our constitutional rights can be conserved only by an intelligent electorate> <the air is recirculated within the cabin in order to conserve heat—Armstrong> <sipped his coffee, made from his carefully conserved supply brought with him from England—Bambrick>

Ana *have, hold, own, possess, enjoy: *keep, retain, reserve

Ant spend: consume

savour faire poise, *tact, address

Con awkwardness, clumsiness, ineptness, maladroitness, gaucherie (see corresponding adjectives at awkward)

savor n *taste, flavor, tang, relish, smack

Ana *quality, property, character, attribute: peculiarity, individuality, characteristic, distinctiveness (see corresponding adjectives at characteristic): *impression, impress, print, stamp

savory *palatable, appetizing, tasty, toothsome, flavorous, relishing

Ant bland (to taste): acrid (in taste and smell)

say n *saying, adage, proverb, maxim, motto, epigram, aphorism, apothegm

vb Say, utter, tell, state are comparable when they mean to put into words. Say often means merely to articulate or pronounce <say the words after me> <the baby has not yet learned to say "mama" or "daddy" > or is used in reporting something voiced <he said over the telephone that he would be late in coming home> <"I am going now," he said> Say may also imply the fact of putting in speech or in writing without necessarily suggesting the actual wording <you must learn to say what you mean> <he meant what he said> <do as I say and everything will be all right> Utter (see also express) stresses the act of putting into speech or spoken words, often with reference only to the use of the voice and with no indication of motive or impulse in speaking <she sat still, not uttering a single word> <just as the actor uttered his first speech> <he formed this speech with his lips many times before he could utter it—Dickens> Tell (see also count, reveal) carries no clear implication of whether what is said is put into speech or writing, for the stress is upon imparting an idea or thought and not upon the method used. Consequently tell may suggest a putting into spoken or written words, or it may connote an equally clear or forcible means of impressing an idea upon the mind of a person or of revealing a condition or a sequence of events <I am telling you the truth> <the rocks tell the story of past ages> State (see also relate) is often used in place of say when the added implication of clearness and definiteness is necessary <perhaps I had better take this opportunity of stating he need have no expectations from me; all my money will go in public bequests—Deland> <one should know what one thinks and what one means, and be able to state it in clear terms—Rose Macaulay>

saying, saw, adage, proverb, maxim, motto, epigram, aphorism, apothegm can all denote a sententious expression of a general truth. A saying is a brief current or habitual expression that may be anonymous, traditional, or attributable to a specific source <the saying is true, "The empty vessel makes the greatest sound”—Shak> A saw is an oft-repeated and usually traditional or old saying <full of wise saws and modern instances—Shak> <the old saw that ignorance is bliss—M. W. Childs> An adage is a saying given credit by long use and general acceptance <if there is verity in wine, according to the old adage—Thackeray> <there's an adage to the effect that a good horse eventually comes back to his best form—Audax Minor> A proverb is an adage couched, usually, in homely and vividly concrete or figurative phrase <accused (in the phrase of a homely adage) of being "penny-wise and pound-foolish”—Spectator> <we hear, that we may speak. The Arabian proverb says, "A fig tree, looking on a fig tree, becometh fruitful”—Emerson> A maxim offers a general truth, fundamental principle, or rule of conduct often in the form of a proverb <the difference between principles as universal laws, and maxims of conduct as prudential rules—Robinson> <we have reversed the wise maxime of Theodore Roosevelt: "Speak softly and carry a big stick”—Warburg> A motto is usually a maxim or moral aphorism adopted by a person, a society, or an institution as a guiding principle or as a statement of an aim or ideal <William of Wykeham's old motto that "Manners maketh Man” —Quiller-Couch> he adopted the maxim "Napoleon is always right," in addition to his private motto of "I will work harder" —George Orwell> The last three terms, epigram, aphorism, and apothegm, commonly imply known authorship and a conscious literary quality. An epigram gets its effectiveness from its terseness and a witty turn of phrase; it characteristically presents a paradox or a cleverly pointed antithesis <what is an epigram? A dwarfish whole,
its body brevity, and wit its soul—Coleridge> An aphorism is a pithy epigram that requires some thought <when Mark Twain utters such characteristic aphorisms as “Heaven for climate, hell for society”—Brooks> An apothegm is a sharply pointed and often startling aphorism such as Johnson’s remark, “Patriotism is the last refuge of a scoundrel.”

scabrous 1 rough, harsh, uneven, rugged

Ant glabrous: smooth
scale vb climb, mount, *ascend
scamp villain, scoundrel, blackguard, knave, rascal, rogue, rascallion, miscreant

Ant malefactor; culprit, delinquent, *criminal
scampers vb *scuttle, scurry, skedaddle, sprint

Ant speed, hurry, hasten: *rush, dash, shoot
scan vb scrutinize, examine, inspect, audit

Ant consider, study, contemplate: observe, survey, remark, notice (see see)

scandal n 1 *offense, sin, vice, crime

Ant indignity, insult, *affront: offending or offense, outraging or outrage (see corresponding verbs at OFFEND): wrong, grievance, injury, *injustice

2 *defraudation, calumny, slander, hackbitching

Ant gossiping or gossip, tattling (see corresponding verbs at Gossip): maligning, defaming or defamation, traducing (see corresponding verbs at MALIGN)

scanning scrutiny, examination, inspection, audit (see under SCRUTINIZE)

Ant study, application, *attention, concentration: *over-sight, supervision, surveillance: analysis, dissection (see under ANALYZE)

scant scanty, skimpy, scrumpy, *meager, exiguous, spare, sparse

Ant *deficient, defective: scarce, rare, *infrequent

Ant plentiful: profuse

scanty scant, skimpy, scrumpy, *meager, exiguous, sparse, sparse

Ant *deficient

Ant ample, plentiful: profuse

scarce rare, uncommon, *infrequent, occasional, sporadic

Ant *deficient: curtailed, abridged, shortened (see SHORTEN)

Ant abundant

scare vb alarm, *frighten, fright, terrify, terrorize, startle, affray, affright

Ant daunt, appall, *dismay: *intimidate, cow, browbeat: astound, amaze, flabbergast, astonish, *surprise

Ant enite

scathing *caustic, mordant, acrid

Ant scorching, searing, burning (see BURN): *fierce, ferocious, truculent, savage: *incisive, biting, cutting, trenchant

scatter 1 Scatter, disperse, dissipate, dispel can mean to cause a group, mass, or assemblage to separate or break up. Scatter may imply the use or operation of force which drives the persons or things in different directions <the hurricane scattered the ships of the fleet> <the heavy assault scattered the troops> <the wind scattered the leaves> <but the whip—in fancy he cracked it aloft and sent his adversaries scattering—Hervey> On the other hand, scatter may imply little more than throwing or casting so that the things thrown will fall by or as if by chance <scatter pennies> <scatter seeds> Disperse usually implies a wider separation of the units than scatter and a complete breaking up of the mass or assemblage <the rain quickly dispersed the crowd> <in a few years, the Bureau was dismembered, its staff dispersed—Heiser> <a sea where all the ships in the world might be so dispersed as that none should see another—Cowper>

Disperse suggests definitely the idea of complete disintegration or dissolution (as by evaporation, crumbling, squandering, or blowing away) and consequent vanishing <the sun dissipates the mist> <dissipated her energy in futile efforts> <from the far-off wooded hills the haze . . . had not yet dissipated—D. H. Lawrence> <had a small patrimony . . . that he dissipated before he left college—Meredith> Dispel carries less suggestion of separation of units or particles than any of these words but it stresses a driving away as if by scattering of something that clouds, confuses, or bothers <the rising sun dispelled the darkness> <a blind man whose darkness no street lamp can dispel—Shaw> <truth and frankness dispel difficulties—Russell> if there were any lingering doubts in his mind they were dispelled by an incident which occurred . . . on February 17—Shirer

Ant *throw, cast, fling, toss: *distribute, dispense, divide: *discard, shed, cast

Con *accumulate, amass, hoard: collect, *gather, assemblage: *compact, concentrate

2 *strew, straw, broadcast, sow

Ant *spread, disseminate: *sprinkle, besprinkle

scent n *smell, odor, aroma

Ant emanation, issuing or issue (see corresponding verbs at SPRING)

schedule n 1 *list, table, catalog, register, roll, roster, inventory

2 *program, timetable, agenda

scheme n 1 *plan, design, plot, project

Ant *proposal, proposition: arrangement, ordering (see corresponding verbs at ORDER): *device, contrivance: expedient, shift, makeshift (see RESOURCE)

2 *system, network, complex, organism, economy

Ant organization, arrangement, ordering (see corresponding verbs at ORDER): whole, total, *sum

scheme vb plan, design, plot, project (see under PLAN n)

Ant propose, purpose, *intend: *aim, aspire: manipulate, *handle, swing, wield

schism split, rupture, *breach, break, rent, rift

Ant division, separation, severance (see corresponding verbs at SEPARATE): estrangement, alienation (see corresponding verbs at ESTRANGE): *discord, dissension

schismatic n *heretic, sectarian, dissenter, nonconformist

Ant academic, scholastic, *pedantic: abstruse, *recondite: accurate, exact, precise (see CORRECT)

scholarship learning, erudition, *knowledge, science, information, lore

scholastic academic, *pedantic, bookish

Ant *conversant, versed: *dry, arid: formal, conventional (see CEREMONIAL)

school vb discipline, train, *teach, instruct, educate

Ant *practice, exercise, drill: *guide, lead: *conduct, control, direct, manage

science n 1 *knowledge, learning, erudition, scholarship, information, lore

2 *art

scintillate *flash, gleam, glance, glint, spark, glitter, glister, coruscate, twinkle

scoff, jeer, gibe, fleer, gird, sneer, sniff can all mean to show one’s scorn or contempt in derision or mockery. Scoff stresses insolence, irreverence, lack of respect, or incredulity as the motives for one’s derision or mockery <it is an easy thing to scoff at any art or recreation; a little wit mixed with ill nature, confidence, and malice, will do it—Walton> <fools, who came to scoff, remained to pray—Goldsmith> <in jesting mood his comrades heard his tale, and scoffed at it—Lowell> Jeer carries a stronger implication of loud derisive laughter than scoff; it usually

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
scold

connotes a coarser and more vulgar or, at least, a less keenly critical attitude than scoff (how does it come that men ... in its streets and see the faces of men—Dos Passos) 

to him—Rational Preoccupations of Childhood—Krutch

Gibe stresses taunting, often in derisive sarcasm, sometimes in good-natured raillery (you...with taunts did give...in audience—Shak.) after one of her visitations you gibe each other good-naturedly over the extent to which you found yourself nibbled from other fisher of reasoned conclusion—Mary Austin

generosity of spirit which had prevented him from gifting at individuals for characteristics beyond their control—Gwethalyn Graham

Fl eer throws the emphasis upon derisive grins, grimaces, and laughs rather than on utterances (look like two old maids of honor got into a circle of feering girls and boys—Gray) he listened with a s sneering mouth to his father's long dogmatic grace before meat—Hergesheimer

Gird implies an attack marked by scoffing, gibing, or jeering (the subprior was bidden to sing...the 'Elegy of the Rose': the author girding cheerily at the clerkly man's assumed ignorance of such compositions—Pater (it worked off steam and got its comedy largely by girding at the great ones of the past—Times Lit. Sup.)

Sneer carries the strongest implication of cynicism and ill-natured contempt of any of these terms; it often suggests the use of irony or satire the real purport of which is indicated by an insultingly contemptuous facial expression, tone of voice, or manner of phrasing (it has become...fashionable to sneer at economics and emphasize 'the human dilemma'—Mailer) people are nowadays so cynical—they sneer at everything that makes life worth living—L. P. Smith

Flout may imply any of the actions suggested by the preceding terms, but it carries a heightened implication not only of disdain and contempt but of refusal to heed or of a denial of a thing's truth or power (that bids him flout the law he makes, that bids him make the law he flouts—Kipling) no form of Christianity which flouts science is in the true line of progress—Inge

(for the past eight years they had watched an administration purposely flout the intellectual life—Michener)

Ana *ridicule, deride, mock, taunt: scorn, disdain, scoff, contempt, *despise

scold vb Scold, upbraid, rate, berate, tongue-lash, jaw, bawl, chew out, wig, rail, revil, vituperate can all mean to reproach, rebuke, or censure angrily, harshly, and more or less abusively. Scold, the term most common in ordinary use, usually implies a rebuking in a mood of irritation or ill temper, with or without sufficient justification (his father scolded him for staying out late) (our great authors have scolded the nation more than they praised it. Often their scolding has been...wholly justified, but often too it has been eccentric or ill-informed—Malcolm Cowley

U p b r a i d stresses reproaching or censuring on more definite grounds than scold does and usually suggests justification or justifiable anger (the judge upbraided the parents for the delinquency of their children) (I think he'd meant to upbraid me for sneaking off, but he didn't—Cather)

he had so often upbraided her for her superficiality—Sackville-West

R a t e and the more common berate usually imply more or less prolonged, angry, and sometimes abusive scolding either in censuring or in reprimanding (the voice continued violently rating me—Hudson) (hearing Ed Hall berate a farmer who doubted the practicability of the machine—Anderson)

Fairly close synonyms of rate and berate are the expressive tongue-lash which stresses the punitive effect on the person berated (tongue-lashed them in a way that could be heard blocks off—Fast) (suffer from a fifteen-minute tongue-lashing) and the crude terms jaw, bawl, usually with out, chew out, and wig (chiefly British), which emphasize the noisy prolonged ranting which usually attends a berating (I have been jawed for letting you go—Marryat) you'll get bawled out when you pull a boner—Mathewson) some niggling Quartermaster lieutenant chewed them out because they were a few hundred cases short—Liebling (a student with a riding habit who presumably had been severely wigged by his chief—The Times)

Rail carries a more definite implication of either abusive or scoffing language than rate or berate (enemies...rail at him for crimes he is not guilty of—Junius) the couples railed at the chant and the frown of the witchmen lean, and laughed them down—Lindsay Revile carries a much stronger implication of abusive, scurrilous language than rail does but little, if any, suggestion of scoffing; it often also implies deliberate vilification (the words humiliated her, the tone reviled her...they were the clashes of naked hate—Farrell) her tenants, who have to earn the money she spends abroad...revile her as a fugitive and an absentee—Shaw

Vituperate implies much violence in the censure and in the method of attack than does revile, but otherwise they are close synonyms (he vituperated from the pulpit the vices of the court—Froude) (the last image that crossed my mind was Sir James with his angry face and his trembling hands vituperating him—Archibald Marshall)

Ana reprehend, reprobe, censure, blame, *criticize: reproach, reprimand, *reprove, rebuke, admonish, chide: *execute, objurgate

scop vb *dip, bail, ladle, spoon, dish

scope *range, gamut, reach, radius, compass, sweep, orbit, horizon, ken, purview

Ana *expanses, amplitude, spread, stretch: *field, domain, sphere, territory, province: extent, area, *size

scorch vb *burn, char, sear, singe

Ana *wither, shrivel

scorn n disdain, contempt, despite (see under DESPISE)

Ana superciliousness, insolence, disdainfulness (see corresponding adjectives at PROUD): scoffing, flouting, jeering, gibing (see SCOFF): deriding or derision, ridicule or taunting, mocking or mockery (see corresponding verbs at RIDICULE)

scorn vb disdain, scoff, *despise, contempt

Ana repudiate, spurn, reject (see DECLINE vb): flout, scoff, jeer: deride: mock, taunt, *ridicule

Scotch, Scottish, Scots can all apply to what constitutes, or derives from Scotland or its people. Scotch is most widely used outside Scotland, especially in the spoken language (the entire Scotch people) the inconvenience of having nothing in England like the Scotch one-pound note—Todd (a schism in the Scotch Church—Justice Holmes) the overwhelming proportion being English, Scotch, or Irish in descent—Carnegie Mag.) a Scotch painter not all the Scottish names that survive today are truly Scotch in origin—Menchken Scottish has a more literary, less casual flavor and use (the zest, courage, and good humor of the nineteenth-century Scottish author are infectious—Bloom) she left for Edinburgh the following year to assume the Scottish crown—Bran & Commager (the Scottish Universities—Winant) Scottish literature Scots is used in the same way as Scottish (the names of Scots and English shipowners—Conrad) a Scots writer—H. M. Jones) except

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
that Scots is sometimes preferred in reference to law and in historical references to money (a pound Scots) In Scotland itself Scottish and Scots are often preferred to Scotch (a delegation of Scottish editors—The Scotsman) (Scottish cricket—The Scotsman) (the Scots community in New York—The Scotsman) (new Scots airlink—The Scotsman) but Scotch also is used (the signs confirmed my recollection that the Scotch Scotch are not ashamed of the word Scotch and do not go out about protesting that Scottish and Scots are preferable forms—Liebling) especially with regard to the products of Scotland (wool jersey . . . and Scotch tweeds are favorite fabrics—Women's Wear Daily)

Scottish, Scots adj •Scotch
scoundrel *villain, blackguard, knave, rascal, rogue, scam, rascallion, miscreant
*seek, search, hunt, ransack, rummage, comb, scour
villain, blackguard, knave, rascal, rogue, Grind implies a sharpening of the edge or point of a tool or weapon or the smoothing of a surface (as of glass) by friction; in both uses the sound made in the act of grinding is often stressed (I have ground the axe myself; do you but strike the blow—Shak.) (Grind lenses for eyeglasses) In extended use the word often implies a wearing down by friction and also often suggests a particularly harsh or rough method of gaining one's ends or of making one's way (laws grind the poor, and rich men rule the law—Goldsmith) (we went aground—grinding, grinding, till the ship trembled in every timber—Martineau)

scour vb *seek, search, hunt, ransack, rummage, comb, ferret out
Ana investigate (see corresponding noun at INQUIRY): *scrutinize, inspect, examine: range, roam, rove, *wander
scout vb scorn, *despise, contemn, disdain
An Ana *criminal, felon, malefactor, culprit
scour vb *seek, search, hunt, ransack, rummage, comb, ferret out
An Ana investigate (see corresponding noun at INQUIRY): *scrutinize, inspect, examine: range, roam, rove, *wander

scrape vb Scrape, scratch, grate, rasp, grind are comparable when they mean to apply friction to something by rubbing it with or against a thing that is harsh, rough, or sharp. Scrape usually implies the removal of something from a surface with an edged instrument; the term then commonly suggests a purpose (as erasing, smoothing, or freeing from dirt, paint, skin, or peel). Additionally the term commonly implies the making of a distinctive and often unpleasant sound (a scrape the dishes before washing) (a scrape potatoes) (a scrape off paint) (a twig that scraped upon the very parchment of his soul as a lead pencil upon a slate—Powys) (the chairs were scraped along the floor—Anderson) Scratch differs from scrape in its common implication of less purposiveness in the agent and of definite damage to the thing that is scratched; it usually also suggests the use of a pointed rather than an edged instrument which gouges a line or furrow in a surface and seldom stresses the noise produced (a substance hard enough to scratch glass) (scraped by the thorns of a rose) (a scratch a mosquito bite) (this pen scratches) (his wooden plow scarcely more than scratched the surface of the earth—A. R. Williams) Grate usually stresses the harsh sound or the sensation of harshness made by rubbing something with or against a rough indented or cutting surface (as of a file); the term implies removal of material from a body in particles, and in itself as distinct from context suggests nothing about the aims or effects (as abrasion, wearing or rubbing away, or pulverization) (grate nutmeg) (grate cheese) Often grate implies little more than a harsh or creaking sound made by friction (a key grated in the lock) (till grates her keel upon the shallow sand—Byron) In extended use the term tends to be used in reference to things that irritate, exasperate, or harass with the implication that their effect is like the harsh sound or the sensation of harshness characteristic of a physical grating (an unctuous heartiness . . . which grated upon David's ear—Turnbull) Rasp usually implies a harsher or rougher and more disagreeable effect than either scrape or grate. It may suggest the use of or as if of a rough instrument (as a coarse file called a rasp) or of something equally effective or as trying to the nerves (thin a stick by rasping) (these rocks are known to have their angles rasped off, and to be fluted and scarred by the ice—Tyndall) (her hard, metallic voice had rasped the invalid's nerves—Carey) (when you laid a tight hold on your fiddletick . . . you could do nothing but rasp—Shaw) Scrape implies a skimming off, and to a lesser extent a fluting, of the surface (as of glass) by friction; in both uses the sound made in the act of scraping is often stressed (I have scraped the axe myself; do you but strike the blow—Shak.) (Grind lenses for eyeglasses) In extended use the word often implies a wearing down by friction and also often suggests a particularly harsh or rough method of gaining one's ends or of making one's way (laws grind the poor, and rich men rule the law—Goldsmith) (we went aground—grinding, grinding, till the ship trembled in every timber—Martineau)

scrape n •predicament, dilemma, quandary, plight, fix, jam, pickle
An Ana *difficulty, vicissitude: perplexity, bewilderment, distraction (see corresponding verbs at PUZZLE) (embarrassment, discomfiture (see corresponding verbs at EMBARRASS)

scrape vb Scrape, scratch, grate, rasp, grind
An Ana *ear, rend: *injure, damage, mar, impair, hurt: *deface, disfigure
scrape vb *discard, junk, cast, shed, molt, slough
scrap vb *scratch, scrape, grate, rasp, grind
An Ana *defend, protect, shield, guard, safeguard: *disguise, dissemble, cloak, mask, camouflage

scrape vb Scrape, scratch, grate, rasp, grind are comparable when they mean to apply friction to something by rubbing it with or against a thing that is harsh, rough, or sharp. A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
inspection, examination, and audit. Scrutinize and scrutiny imply close observation and attention to minute detail <scores of plain-dress detectives closely scrutinized the hidden guests as they arrived—Lucius Beebe> <living among the absurd magpie scrutinies of wife, children, colleagues, patients . . . most analysts are obliged to be more proper than proper—Mailer> Scan and scanning are usually employed in reference to something that is surveyed from point to point; the terms may imply careful observation or study but sometimes imply the opposite and suggest a cursory glancing from one point to another; thus, to scan the newspaper each morning may admit of either interpretation. Only a context can make the implication clear <the more one scans the later pages of Mark Twain's history the more one is forced to the conclusion that there was something gravely amiss with his inner life—Brooks> <scanned, with raised brows, yesterday's Jewish paper that he had already thoroughly read—Malamud> <a quick scanning of the items will help you—S. L. Payne> Inspect and inspection in general use often imply little more than a careful observation <he had perched himself upon the edge of the desk . . . and was absorbed in an unabashed inspection of her—Hervey> but in legal, military, governmental, and industrial use they imply a searching scrutiny for possible errors, defects, flaws, or shortcomings <every length of cloth is inspected before it leaves the factory> <the troops prepared for the daily inspection> <this report will not pass inspection> <freshly picked grapes are inspected and cleansed before delivery—Amer. Guide Series: Pa.> Examine (see also ASK 1) and examination imply a close scrutiny or investigation to determine the facts about a thing or the real nature, character, or condition of a thing or to test a thing's quality, validity, truth, or functioning <the critic refused to give an opinion before he had examined the painting closely> <the doctor sent him to the hospital for a thorough examination> <they examined the house from cellar to attic before deciding to purchase it> <could it be the intention of those who gave this power, to say that . . . a case arising under the constitution should be decided without examining the instrument under which it arises—John Marshall> <he began to . . . examine the speeches of its leaders, study its organization, reflect on its psychology and political techniques—Shirer> <examination of the bedroom has convinced me that it was possible for them to have escaped . . . as they said they did—Prewett> Audit, as verb or noun, implies a searching examination of accounts in order to determine their correctness <an annual audit of the tax books> <each bank is audited annually by a certified public accountant—Safety for Your Savings> In its extended sense audit often carries a suggestion of a final accounting <the general day of account and audit to be made at the throne of God—Udall> <when it comes to the audit before high heaven—Lowes> Ana *consider, study, contemplate, weigh: *analyze, resolve, dissect: penetrate, pierce, probe (see ENTER) scrutiny examination, scanning, inspection, audit (see SCRUTINIZE) Ana investigation, research, probe, *inquiry, inquisition: surveying or survey, observing or observation, viewing or view (see corresponding verbs at SEEN) scud skim, shoot, sail, *fly, dart, float scuffle vb *wrestle, tussle, grapple Ana fight, *contend: clash, conflict, collide, *bump sculpture, sculpt, sculp *carve, chisel, engrave, incise, etc Ana shape, fashion, form (see MAKE): depict, portray, *represent scum *foam, froth, spume, lather, suds, yeast Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
secret

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
plexing, mystifying (see PUZZLE vb): hidden, concealed, secreted, screened (see HIDE)

secure vb hide, conceal, screen, cache, bury, ensconce

Ana dissemble, cloak, mask, disguise, camouflage

secretive close, close-lipped, closemouthed, tight-lipped, silent, uncommunicative, taciturn, reticent, reserved

Ana cautious, circumspect, wary: restrained, inhibited (see RESTRAIN)

Con talkative, loquacious, garrulous, voluble, glib: candid, open, plain, frank

sect religion, denomination, cult, communion, faith, creed, persuasion, church

sectary 1 adherent, follower, disciple, partisan, henchman, satellite

Ana devotee, votary, addict

2 also sectarian heretic, schismatic, dissenter, nonconformist

Ana enthusiastic, zealous, fanatic, bigot

section n segment, section, division, part, portion, piece, sectary 1

secular worldly, mundane, earthly, terrestrial

Ant religious (as schools, journals, authorities): sacred (as music, drama): regular (as priests)

secure adj safe

Ana firm, solid: protected, shielded, guarded, safeguarded, defended (see DEFEND): certain, positive, sure: impregnable, unassailable, invulnerable, invincible

Ant precarious, dangerous

secure vb 1 Secure, anchor, moor, rivet can in all extended use mean to fasten or fix firmly or immovably. They are, however, not often interchangeable because of implications derived from their primary senses. One secures something that may get lost, may escape, or may permit invasion or intrusion if allowed to remain loose or to work loose; the word usually implies care or protection as the end of the action (secure doors and windows before retiring to keep out intruders) (replace the nut, and tighten it down to secure the capacitor to the panel—J. A. Stanley) (getting intelligence which... will secure your own countrymen against brutality and outrages—Kenneth Roberts) One anchors or moors something unstable or subject to tugging or pulling by external forces or influences to another thing strong enough to hold it down or in place or powerful enough to counterbalance or counteract the opposing forces (most classrooms had benches and desks lined up in rows and anchored to the floor—Mumford) (anchor the cables of a suspension bridge to towers at either end) (moored to the rock on two sides, the cabin stood firm—Tyndall) But moor, which in its primary sense implies a making fast between two anchors or two or more lines or cables, may in extended use suggest greater steadiness or an even balancing of forces that make for stability (her reticent childhood sweetheart... whose idea of the good life is anchored to his dream of... whose idea of the good life is anchored to his dream of... one joins things normally or actually separate from each other as closely together as though a rivet had been driven through them (fire riveted him to his chair) (why should I write this down, that's riveted, screwed to my memory—Shak) (the head of the state, in whose name he insisted that all his victories were won, to rivet the loyalty of the army to the civil administration—Buchan) (stood riveted to the earth... in the fascination of that dreaded gaze—Le Fanu)

Ana establish, set, settle, fix: fasten, attach, affix

2 ensure, insure, assure

Ana protect, defend, safeguard, guard, shield: preserve, conserve, save: guarantee, guaranty (see corresponding nouns at GUARANTEE): warrant, justify

3 procure, obtain, get, acquire, gain, win

Ana seize, take, grasp: reach, attain, achieve, gain: have, hold, own, possess

security surely, guaranty, guarantee, bond, bail

Ana pledge, earnest, token

sedate grave, staid, earnest, sober, serious, solemn, somber

Ana placid, calm, serene, tranquil; collected, composed, imperturbable (see COOL): decorous, seemly, proper

Ant flighty

sediment n deposit, precipitate, dregs, lees, grounds

sedition, treason are comparable when they mean an offense against a state to which or a sovereign to whom one owes allegiance. Sedition applies to conduct that is not manifested in an overt act but that incites commotion and resistance to lawful authority without in itself amounting to insurrection (sedition is... a matter of expressing opinions, not of committing acts—The Reporter) Treason applies to conduct that is manifested by an overt act or acts, is variously defined by various governments and at various times but typically has for its aim the violent overthrow of the government, the death of the sovereign, or betrayal to or aid and comfort of the enemy (one cannot commit treason simply by talking or conspiring against the government; he must actually do something, and there must be witnesses—Ogg & Ray) (sedition has come to be applied to practices which tend to disturb internal public tranquility by deed, word, or writing but which do not amount to treason and are not accompanied by or conducive to open violence—Chafee) (sedition... is traitorous behavior that falls short of treason because it does not actively levy war against the United States or give aid to an enemy of the United States. It stirs up resistance to law or encourages conduct that may become treason—Smelser & Kirwin) (a rebellion, revolt, revolution, uprising, insurrection, mutiny, putsch, coup: disaffection, alienation, estrangement (see corresponding verbs at ESTRANGE)

Con fidelity, allegiance, loyalty, fealty

seditious mutinous, rebellious, factious, insubordinate, contumacious

Ana traitorous, treacherous, perfidious, disloyal, faithless: disaffected, alienated (see ESTRANGE)

seduce tempt, entice, inveigle: lure, decoy

Ana mislead, beguile, delude: deceive: corrupt, debauch, deprave, pervert, debase: bewitch, captivate, allure

(see ATTRACT)

sedulous assiduous, diligent, industrious, busy

Ana persevering, persistent (see corresponding verbs at PERSEVERE): untiring, unwearyed, indefatigable, tireless

see vb 1 See, behold, descry, espy, view, survey, contemplate, observe, notice, remark, note, perceive, discern can all mean to take cognizance of something by physical or sometimes mental vision. See, the most general of these terms, may be used to imply little more than the use of the organs of vision (he cannot see the crowd for he is blind) but more commonly it implies a recognition or
appreciation of what is before one's eyes (they can see a great deal in Paris, but nothing in an English meadow—Jefferies) (If the policeman saw him at all, he probably observed him with misgiving—Wolfe) (the look of one who has seen all, borne all, known all—Styron). The term may imply the exercise of other powers than the sense of sight, including a vivid imagination (I can see her plainly now, as she looked forty years ago) ("Methinks I see my father."). "Where, my lord?" "In my mind's eye, Horatio!—Shak.) or mental insight (he was the only one who saw the truth) or powers of inference (though he appeared calm, I could see he was inwardly agitated). Behold carries a stronger implication of a definite ocular impression and of distinct recognition than see; it also suggests looking at what is seen (we have sailed many weeks, we have sailed many days, (seven days to the week I allow), but a Snark, on the which we might lovingly gaze, we have never beheld till now—Lewis Carroll) (a whole tribe living in a craterlike valley, every member of which believes it would be death for him or her to behold the sea—Frazier). Descry and espy imply a seeing in spite of difficulties (as distance, darkness, or partial concealment). Descry often suggests an effort to discover or a looking out for someone or something (the grass was high in the meadow, and there was no describing her—George Eliot) (Sir Austin ascended to the roof . . . and described him hastening to the boathouse by the riverside—Meredith) but esp'y usually implies skill in detection (as of what is small, or not clearly within the range of vision, or is trying to escape detection) (the seamen espied a rock within half a cable's length of the ship—Swift) (flowers we esp'y beside the torrent growing; flowers that peep forth from many a cleft and chink—Wordsworth) View and survey, on the contrary, imply the seeing of what is spread before one or what one can examine steadily or in detail. Both terms as often imply mental consideration as a physical seeing or looking over. View usually implies or requires a statement of a particular way of looking at a thing or a particular purpose in considering it (view the panorama with delight) (viewed a piece of property that he thought of buying) (view a painting from various angles) (view the industry of the country, and see how it is affected by inequality of income—Shaw) (the effort is an interesting one if you view it in terms of the techniques of political symbolism—Lerner). Survey more often implies a detailed scrutiny or inspection by the eyes or the mind so that one has a picture or idea of something as a whole (the captain surveyed him from cap to waistcoat and from waistcoat to leggings for a few moments—Hardy) (he surveyed the room from the weathered blue jalousies to the frayed rush mats, from the inevitable spireders on the ceiling to the ants . . . over the floor—Hervey) (a man surveying Europe today discovers this strange anomaly: it is one great culture, yet it is at deadly issue with itself—Belloq) Contemplate (see also CONSIDER I) implies little more than a fixing of the eyes upon something, sometimes in abstraction, but more often in enjoyment or in reference to some end in view (he had a way of looking her over from beneath lowered lids, while he affected to be examining a glove-button or contemplating the tip of his shining boot—Wharton). Observe and notice both imply a heeding and not passing over; they commonly imply seeing but may suggest the use of another sense (he observed every detail in the arrangement) (did you notice the man who just passed us?) (he noticed a peculiar odor) Especially in scientific use observe may carry a stronger implication of directed attention (in order to get fresh light on this subject, I have observed my own children carefully—Russell) (keeping an ear pricked to observe the movements of the Viceroy and his group—Woolf) (things which are always about us . . . are the easiest to observe with accuracy—Grandgent). Notice often implies some definite reaction to what is seen or sometimes heard, felt, or sensed such as making a mental note of it or a remark about it or, if what is noticed is a person, recognizing him by a salute or a greeting (by Mrs. Hurst and Miss Bingley they were noticed only by a curtesy—Austen) (she didn't notice. She drove single-minded and unaware there was anyone next to her—Pynchon). Remark (see also REMARK) and note carry an even stronger implication than notice of registering mentally one's impression. But remark is more likely to suggest a judging or criticizing of what is noticed (a young lady was talking and laughing with two young gentlemen. I remarked their English accents and listened vaguely—Joyce) (I could not help remarking the position of her left arm—Quiller-Couch) and note to suggest a recording, sometimes by a mental note, but sometimes in writing or in speech (a certain ungraciousness, noted in later years by his nearest colleagues—Ellis) (he carried a map and noted every stream and every hill that we passed). Perceive carries a stronger implication of the use of the mind in observation than any of the preceding terms. The word basically implies apprehension or obtaining knowledge of a thing, not only through the sense of sight but through any of the senses. It is often used in place of see in the simple sense of that word, but since it always implies distinct recognition of what is seen, the words are sometimes used in contrast, especially by psychologists (an infant sees objects long before it is able to perceive them as definite persons or things) (when he drew nearer he perceived it to be a spring van, ordinary in shape, but singular in color—Hardy). In its richer meaning perceive suggests not only dependence on other senses than that of sight but also usually keen mental vision or special insight and penetration (dissuaded with every person who could not perceive . . . these obvious truths—Bennett) (his lightning dashes from image to image, so quick that we are unable at first to perceive the points of contact—Day Lewis). Discern, like descry, often implies little more than a making out of something by means of the eyes (at length he discerned, a long distance in front of him, a moving spot, which appeared to be a vehicle—Hardy) (sometimes we discern the city afar off—Benson). In its more distinctive use the term usually implies the powers of deeply perceiving and of distinguishing or discriminating what the senses perceive (ye can discern the face of the sky; but can ye not discern the signs of the times?—Mt 16:3) (his grave eyes steadily discerned the good in men—Masefield) (he tried quickly to think of something else, lest with her uncanny intuition she discern the cloud of death in his mind—Buck). Ana * scrutinize, scan, examine, inspect: pierce, penetrate, probe (see enter): consider, study, contemplate 2 See, look, watch can all mean to perceive something by means of the eyes. See (see also seeI) stresses the reception of visual impressions (he is now able to see clearly) (have the power of seeing) Look stresses the directing of the eyes to something or the fixing of the eyes on something in order to see it (if you will only look, you will be able to see what I am doing) (he refused to look in the mirror the nurse gave him). Watch (see also TEND) implies a following of something with one's eyes, so as to observe every movement, every change, a sign of danger, or a favorable opportunity (watch for a while and tell us what you see) (spend the night watching a sick friend) (watching the clock as closely as a cat watches a mouse).
seek, search, scour, hunt, comb, ferret out, ransack, rummage are comparable when they mean to look for or go in quest of in the hope of finding. Seek has become widely extended in application and may take as its object either a person or a concrete thing or something intangible or abstract and may imply either a quest involves great effort or one that makes slight demands; the term is more often used in the written than the spoken language. They sought him among their kinsfolk and acquaintance. And when they found him not, they turned back again to Jerusalem, seeking him—Lk 2:44-45 (seek the truth) A small sadistic streak that caused me to seek a more subtle and painful punishment for my victim—Dahl (wisdom must be sought for its own sake or we shall not find it—Inge) Search implies both effort and thoroughness. It differs from seek especially in taking as its object the place in which or the person on whom something is sought; it therefore connotes an investigating, an exploring, a penetrating scrutinizing, or a careful examining (search every section of the country for spies) Search the house from top to bottom for a lost ring I have searched every nook and cranny. Search all the persons present when the money disappeared (search his memory for a name) (the book was edited in a way no editor could ever have time or love to find; it was searched sentence by sentence, word for word—Mailer) Scour, which means in general to run over or to traverse swiftly especially in pursuit or in search, can be used more narrowly to mean to make an exhaustive search of a territory or of something comparable to a territory for a thing that must be found. Scour the coast for lurking submarines. Scour the neighborhood for the missing child. The next morning Archer scourred the town in vain for more yellow roses—Wharton. Scoured the coppices and woods and old quarries, so long as a blackberry was to be found—D. H. Lawrence. Hunt basically comes close to scour in its general sense for it implies a pursuit of and often a search for something, but especially game. In the extended sense in which the term is here considered it implies specifically a vigorous and, often, unavailing search for something as elusive as game (they hunted till darkness came on, but they found not a button, or feather, or mark—Lewis Carroll) Hunt evidence far and wide. I’ve hunted for the lost papers everywhere but I can’t find them. I’m… hunting up earlier quotations for recent words—Murray Comb implies methods of searching as painstaking or thoroughgoing as those involved in going through the hair with a fine comb. Comb the countryside for the escaped convicts. Comb the factories for more men for the army. The Pacific Ocean between San Francisco and Hawaii is being combed today by aircraft and shipping for signs of the two planes—Morning Post. Ferret out stresses the finding of something that is difficult to get at and usually suggests a vigorous, arduous, persistent and, often, tricky method of search. Ferret out a secret. One of the professor’s specialties being to ferret out captured… political commissars for execution—Shirer. I have ferreted out evidence—Dickens. Ransack and rummage imply a search usually of a limited area; both tend to stress the manner of going through what is examined and suggest a haphazard and often disorderly or heedless pulling about and turning over of miscellaneous items. Though the two are often interchangeable, ransack is especially appropriate when one wishes to stress careless haste, lack of regard for the rights of others, or improper motives on the part of the searcher, while rummage may be chosen when a more neutral word is needed or when lack of a definite object of search is to be implied; thus, a thoughtless child might ransack the refrigerator to make himself a snack and then go rummage through his toys after a lost ball; a thief ransacks a house in search of loot, but rummages through a drawer with no clear and specific notion of what he may find (pass a rainy day rummaging about in the attic) The men ransacked the thatched huts, rummaged among the pots, the fishing gear, the shell ornaments—M. S. Douglas (apparently unlimited search, such as ransacking parts of an office can never be justified—Paul Wilson) (ransacked his father’s shelves, dipped into a multitude of books—Macaulay) (stooped and deliberately rummaged in the dust at his feet, as if searching for the squirming threads of death it might contain—Wylie) (the impatience with which a community without tradition rummages through ways of life which other peoples, other cities have worked out for themselves slowly and painfully—Gordimer) Ana inquire, question, *ask, interrogate: pursue, chase, *follow, trail seem, look, appear can mean to be as stated in one’s view or judgment, but not necessarily in fact. Often they are used interchangeably with apparently no difference in meaning (he seems tired) (the students look eager) (the orchestra appeared ready to begin) But even in such phrases seems suggest an opinion based on subjective impressions and personal reaction rather than on objective signs (a tiny bubble in the middle of your back seems to grow all night, and by the crack of dawn has grown to boulder size—Boy Scout Handbook) (my other visits to Greece were over twenty years ago. How would it seem after such a long time, and seen in such a different way—Chubb) while look implies that the opinion is based on a general visual impression (her… lips looked parched and unnatural—Glasgow) Appear may convey the same implication as look but it sometimes suggests a distorted impression such as can be produced by an optical illusion, a restricted point of view, or another’s dissembling (his tongue… could make the worse appear the better reason—Milton) (the attempt has been made to make it appear that this conflict is not between religion and science, but between the latter and theology. This seems to me a cheap and worthless evasion—Cohen) Ana *infer, gather, judge, deduce, conclude seeming *apparent, illusory, *ostensible Ana *plausible, specious, credible: dissembling, disguising, masking, cloaking, camouflaging (see disguise) Seemly proper, nice, *decorous, decent Ana fitting, suitable, appropriate, meet (see fit): congruous, compatible, congenial, consistent, *consonant Ant unseemly seethe *boil, simmer, parboil, stew segment section, sector, division, *part, portion, piece, detail, member, fraction, fragment, parcel segregate vb *isolate, seclude, insulate, sequester Ana *separate, divide, part, sever: *detach, disengage: *choose, select, single seize *take, grasp, clutch, snatch, grab Ana *catch, capture, snare, ensnare, trap, entrap: appropriate, confiscate, usurp, *arrogate select adj Select, elect, picked, exclusive can mean marked by a superior character or quality which distinguishes the person, the thing, or the group so qualified from others (as in value, excellence, or favor). Select implies that the person or thing has been chosen with discrimination in preference to others of the same class or kind (the hotel caters to a select clientele) (the Milton of poetry is, in his own

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
words again, the man of "industrious and select reading"
—Arnold} Select is also often used, with little or no impli-
cation of choice or selection, in the sense of superior or
eXceptional (a select audience) (persecution of that sort
which bows down and crushes all but a very few select
spirits—Macaulay} Elect commonly implies careful or
discriminating selection and it carries a stronger implica-
tion than select of admission to some carefully restricted
or inner circle; sometimes it also suggests the award of
special privileges (that delicious phantom of being an
elect spirit . . . unlike the crowd—Kingsley) (Darwin was
one of those select persons in whose subconscious, if not
in their conscious, nature is implanted the realization that
"science is poetry"—Ellic). Picked, like select, may or
may not imply actual choice; the term commonly applies
to what is conspicuously superior or above the average
though it may suggest little more than the best available
(a picked team) (the candidates are all picked men)
(the picked moments of exaltation and vision which great
tragedy brings—Montague) Exclusive in its most general
sense implies a character in a thing that forces or inclines
it to rule out whatever is not congruous or congruous
with it or is its opposite or antithesis in constitution or
character (mutually exclusive colors when mixed in the
right proportions form a neutral gray) (exclusive con-
cepts—animal and vegetable, for instance—Bowen)
(didacticism and a sense of humor are mutually exclusive
qualities—Lowe) As applied especially to persons,
groups, or institutions exclusive implies tendencies or
rules which prevent free acceptance or admission of those
not conforming to imposed standards or not satisfying the
requirements of those who are fastidious, snobbish, or
highly critical (a weak, critical, fastidious creature, vain
of a little exclusive information or of an uncommon knack
in Latin verse—Eliot) (the exclusive caste system of a
rigid feudalism—Binyon)

send, dispatch, forward, transmit, remit, route, ship are
comparable when they mean to cause to go or to be taken
from one place or person or condition to another. Send,
the most general term, carries a wide range of implications
and connotations and is capable of replacing any of the
remaining terms especially when joined with a suitable
modifying adverb. Basically it implies the action of an
agent or sometimes an agency or instrumentality that
initiates passage of one to another typically by ordering or
directing (sent a messenger to the bank) (if the body is
rotated in any dimension of space, certain definite and fixed
messages will be sent to the brain by the vestibular sense
—Armstrong) or by using force (send an arrow into a
target) (there can come a cloudburst, an inch or two or
two falling within an hour to wash out fields, send rivers
flooding, wreck houses—La Farge) or by employing some
available facility or inherent capacity or power (send a
letter by airmail) (the burning forest sent smoke over the
city) (diseases that rack the human frame and send
epidemics of sickness over great tracts of the earth's
surface—Swinton) Often the term carries special conno-
tations characteristic of particular idioms; thus, when
one sends a child to college, one makes it possible for him
to go by providing funds; when a teacher sends her pupils
back to their books after recess she leads them to shift
their focus from one activity (play) to another (study);
when a story sends its hearers into gales of laughter it
impels attention and alters mood; when something (as
music or a personality) sends one, it induces an intense
A colon (:) separates groups of words discriminated. An
asterisk (*) indicates place of treatment of each group.
emotional response. Dispatch tends to suggest speed in sending and to heighten notions of specific destination or cause, though the use of a speedy means is as likely to be stated as implied (<the police chief dispatched several detectives to the scene of the murder> <two destroyers were dispatched to the aid of the sinking vessel> <dispatch word to them by radio> <a messenger was dispatched with a reprieve but failed to arrive before the soldier had been shot—Amer. Guide Series: Conn.>). Forward (see also advance) implies a sending on or forward especially of something that has been delayed or stopped before reaching the person to whom it is to be delivered (<the letter had been forwarded from his old address—J. D. Beresford> or, in commercial use, of something that has been asked for or ordered (<the goods ordered will be forwarded by parcel post>). Transmit (see also carry) fundamentally implies a sending or passing from one place, person, or point to another; it often emphasizes the means rather than the fact of sending (<the information can be most rapidly transmitted by radio> <the virus of yellow fever is transmitted by a mosquito> <prophets, who are . . . a vehicle through which to transmit a revelation—W. W. Howells>). Remit (see also excuse) especially in reference to money can mean merely to send (<profits, dividends, interest, rents and royalties may be remitted to any country—Mikesell>) but often implies a sending in response to a demand (<please remit the balance due on your account>). In more general and in legal use the term is likely to imply a sending or referring back (as for further action or consideration) (<where an appellate court . . . reverses an original sentence . . . and remits the record for appropriate action, the lower court may proceed to sentence the defendant anew in proper form and according to law—U. S. v. Keenan> (<there may be disputes whether . . . and each person has and observes his own color and sound sensa, just as he has and observes his own twinges, nausea and touch sense-data—A. C. Garnett>). A sense-data is by definition whatever appears to the senses and in so far as we confine ourselves to a description of our sense-data we cannot possibly be in error—Pap (<our sense organs must select certain predominant forms, if they are to make report of things and not of mere dissolving sensa—Langer>). Image (see also image 1) applies to a sensation that results in a mental representation of the thing seen, the sound heard, and the odor smelled and in the retention of that mental representation in the memory (<after I had looked long at it, and passed on, the image of that perfect flower remained . . . persistently in my mind—Hudson>). Image also refers to a mental representation that can be evoked in the mind in the absence of the thing represented; in this case, the term may apply to a mental representation that is in the memory as a result of previous sense experience or that is a construction of the imagination or fancy out of various bits of sense experience or as a result of a verbal description (when I recall London, Paris, Rome . . . the image that first presents itself is the earliest one—Grandgent>). A succession of efforts to call up before us veracious images of a bedroom, a bed, pillows, a lighted candle, a woman asleep, a man speaking to himself—Montague>).

sensation 1 Sensation, percep, sense-datum, sensum, image can denote the experience or process which is the result of the activity of a sense organ and its associated neural structures. Sensation (see also sensation 2), the most general of these terms, is applicable to a specific awareness (as of heat, pain, or odor) resulting from adequate stimuli (<sensation>). Sensory perception implies a stimulus from without or within the body, whether this awareness enters fully into consciousness or not; specifically it means an impression received by a sensory end organ (as the retina of the eye, the taste buds of the tongue, or the tactile corpuscles of the skin) or by a combination of such end organs (<the four basic taste sensations, sweet, sour, bitter, and salty> <gave himself up to the enjoyment of the sensations provided by a perfect spring day> <a reptile that appears . . . to squander more than two-thirds of its existence in a joyless stupor, and be lost to all sensation for months together—Gilbert White>). Percep, sense-datum, and sensum are technical terms especially of epistemology that are subject to widely varied interpretation, but that typically denote a strictly individual and personal neural event occurring centrally in response to sensory stimulation and constituting an immediate unanalyzable private object of sensation (<it makes for a neat little burlesque of the central debate between concept—the large, institutionalized idea, and percep—the irreducibly personal vision which must be coped with in its own terms—Rago>). Instead of an irregular mass of pink sensation mixed with blue and red and topped with brown, he recognizes his mother's face. These emerging organized groups of sensations which cluster together (and soon seem to belong together) and serve to indicate things in the physical environment are called percepts; these may be defined briefly as "sensations plus meaning"—that is, groups of sensations that have become organized into meaningful wholes or patterns. Thus every physical object represents a percept, or at least a potential one—Hunter Mead). Observation of physical objects is primarily the noticing of sense-data; and each person has and observes his own color and sound sensa, just as he has and observes his own twinges, nausea and touch sense-data—A. C. Garnett> (<a succession of efforts to call up before us veracious images of a bedroom, a bed, pillows, a lighted candle, a woman asleep, a man speaking to himself—Montague>).

sensations 2 Sensation, sense, feeling, sensibility are comparable when denoting the experience or process which is the result of the activity of a sense organ and its associated neural structures. Sensation (see also sensation 1), the most general of these terms, is applicable to a specific awareness (as of heat, pain, or odor) resulting from adequate stimuli (<sensation>). Sensory perception implies a stimulus from without or within the body, whether this awareness enters fully into consciousness or not; specifically it means an impression received by a sensory end organ (as the retina of the eye, the taste buds of the tongue, or the tactile corpuscles of the skin) or by a combination of such end organs (<the four basic taste sensations, sweet, sour, bitter, and salty> <gave himself up to the enjoyment of the sensations provided by a perfect spring day> <a reptile that appears . . . to squander more than two-thirds of its existence in a joyless stupor, and be lost to all sensation for months together—Gilbert White>). Percep, sense-datum, and sensum are technical terms especially of epistemology that are subject to widely varied interpretation, but that typically denote a strictly individual and personal neural event occurring centrally in response to sensory stimulation and constituting an immediate unanalyzable private object of sensation (<it makes for a neat little burlesque of the central debate between concept—the large, institutionalized idea, and percep—the irreducibly personal vision which must be coped with in its own terms—Rago>). Instead of an irregular mass of pink sensation mixed with blue and red and topped with brown, he recognizes his mother's face. These emerging organized groups of sensations which cluster together (and soon seem to belong together) and serve to indicate things in the physical environment are called percepts; these may be defined briefly as "sensations plus meaning"—that is, groups of sensations that have become organized into meaningful wholes or patterns. Thus every physical object represents a percept, or at least a potential one—Hunter Mead). Observation of physical objects is primarily the noticing of sense-data; and each person has and observes his own color and sound sensa, just as he has and observes his own twinges, nausea and touch sense-data—A. C. Garnett> (<a succession of efforts to call up before us veracious images of a bedroom, a bed, pillows, a lighted candle, a woman asleep, a man speaking to himself—Montague>).
reactions (as pleasure or pain or curiosity). It therefore may apply to responses to other than purely physical stimuli (the sensation of finding a command of no avail is to the mind what sitting down upon a suddenly withdrawn chair is to the body—Deland) (there are sensations you cannot describe. You may know what causes them but you cannot tell what portions of your mind they affect nor yet, possibly, what parts of your physical entity—F. M. Ford) Sense is applied specifically to any one of the perceptive powers associated with the sensory end organs (the sense of taste) (the sense of smell) or in the plural (occasionally in the singular) to the combined powers which enable a sentient being to establish relations between itself and what is external to itself (the sudden, violent shock almost took away my senses—Hudson) (my brain immediately stirred, my senses unusually quickened—Galsworthy) but it differs from sensation, when applied to the power or act of responding to stimuli, in suggesting a less corporeal and a more intellectual re-action and often a less objective stimulus. In fact its most emphatic implication in this sense is often that of intense awareness or of full consciousness (she had no sense at all of any word I said—W. H. Davies) (filled with a sense of pleasure so great that it constantly gave me pins and needles all along the lower parts of my legs—Dahl) (with a haze suspended all around them so that...their sense of direction and their sense of time were obscured—Cheever) (a deep sense of loss...a sense of loss and unbelief such as one might feel to discover suddenly that some great force in nature had ceased to operate—Wolfe)

Feeling (see also feeling 2; atmosphere 2) in its most specific meaning denotes the sense that has its end organs in the skin; usually it signifies the sense of touch (had no feeling in his fingertips) but often it is more inclusive and suggests other sensations (as heat, cold, or pressure) that are typically perceived through stimulation of the skin (a feeling of chill in the air) But feeling is also used to denote a response to a stimulus or a set of stimuli that is a combination of sensation, emotion, and a degree of thought (judged a situation by his feelings rather than by the facts) (you know her feelings about the vulgarity of these people) Often also, the term denotes not the response, but the power to respond in general or as a characteristic (he complains that she has no feeling) (the delicacy of his feeling makes him sensibly touched—Hume) In this latter sense feeling is often replaced by sensibility, especially when a keenly impressionable nature and unusually delicate powers of appreciation or its opposite are implied (the extreme sensibility to physical suffering which characterizes modern civilization—Inge) (she was a creature of palpitating sensibility, with feelings so delicate that they responded to every breath—Croters) Sometimes sentimental or affected responsiveness is suggested (the nerveless sentimentalist and dreamer, who spends his life in a weltering sea of sensibility—James)

Ana perceptibleness or perceptibility, tangibleness or tangibility, palpableness or palpability, ponderableness or ponderability (see corresponding adjectives at perceptible): reaction, action, behavior (see corresponding verbs at act): response, answer (see under answer vb)

sense n 1 *sensation, feeling, sensibility

Ana awareness, consciousness, cognizance (see corresponding adjectives at aware): perception, *discernment, discrimination, penetration

2 Sense, common sense, good sense, horse sense, gumption, judgment, wisdom can all mean the quality of mind or character which enables one to make intelligent choices or decisions or to reach intelligent conclusions. Sense, because of its numerous significations, is often, when this meaning is intended, called common sense, good sense, or horse sense. All four terms imply a capacity—usually a native capacity—for seeing things as they are and without illusion or emotional bias, for making practical choices or decisions that are sane, prudent, fair, and reasonable and that commend themselves to the normal or average good mind (when it came to taking care of myself, I had little to offer next to the practical sense of an illiterate sharecropper—Mailer) (Jane is a goose," said the doctor, irritably. "Maggy is the only one that has any sense in that family"—Deland) (the common sense of common men...has not been seriously affected by these still academic aberrations of our alleged wise men—Niebuhr) (women have often more of what is called good sense than men. They have fewer pretensions; are less implicated in theories; and judge of objects...more truly and naturally—Hazlitt) Gumption implies native wit or sound common sense often combined with initiative and drive (there isn’t a grain of intelligence in it. Nobody with more gumption than a grasshopper could go and sit and listen—D. H. Lawrence) (in practical talk, a man’s common sense means his good judgment, his freedom from eccentricity, his gumption—James) Judgment seldom applies to a native quality though it usually suggests a foundation in native good sense. But it also suggests intellectual qualities (as discernment of facts or conditions that are not obvious as well as knowledge of those that are ascertainable and an ability to comprehend the significance of those facts and conditions and to draw correct unbiased conclusions from them) which are the result of training, discipline, and experience (tis true that strength and bustle build up a firm. But judgment and knowledge are what keep it established—Hardy) (the ultimate test of true worth in pleasure, as in everything else, is the trained judgment of the good and sensible man—Dickinson) Wisdom is of all these terms the one of highest praise. It often suggests great soundness of judgment in practical affairs and unusual sagacity (common sense in an uncommon degree is what the world calls wisdom—Coleridge) but it is also capable of suggesting an ideal quality of mind or character that is the result of a trained judgment exercised not only in practical affairs but in philosophical speculations, of wide experience in life and thought, of great learning, and of deep understanding (for wisdom is better than rubies; and all the things that may be desired are not to be compared to it—Prov 8:11) Wisdom is said to be the funded experience which man has gathered by living; but for so many harvests the crop is still a light one. Knowledge he has gained and power, but not goodness and understanding—Repliplier

2 *sensuous, luxurious, voluptuous, sybaritic, epicurean

Ana see those at SENSUAL 1

sensum sense-datum, percept, *sensation, image

sensuous, sensual, luxurious, voluptuous, sybaritic, epicurean are comparable when they mean having to do with the gratification of the senses or providing pleasure by gratifying the senses. Both *sensual and sensual can imply reference to the sense organs and to perceptions based on the reactions of these organs and then come very close to *sensory in meaning, but more typically both apply to things of the senses as opposed to things of the spirit or intellect. In this use *sensual is more likely to imply gratification of the senses for the sake of the aesthetic pleasure or the delight in beauty of color, sound, or form that is induced while sensual (for fuller treatment see CARINAL) tends to imply the gratification of the senses or the indulgence of the appetites (as of gluttony and lust) as an end in itself. *Nobody can resist the Bay of Naples, or if he can, then all the simple and *sensual delights of this world must turn to bitterness and ashes in his mouth—Mackenzie

[*]. To fly the reeling faun, the great sunken tub, the warmth of sudsy water—Mackenzie

[2]. When Kenneth Mackenzie—Connolly

[3]. For his sake—Connolly

[4]. It was not inexorably condemned, as so many had feared at first, to be a vassal state in Hitler's unspeakable New Order—Shirer

[5]. It is often employed in curses, imprecations, or expressions of strong disapproval (I give thee sixpence! I will see thee damned first)—Canning

[6]. In general use, when it carries no implication, it is often employed in curses, imprecations, or expressions of strong disapproval (I give thee sixpence! I will see thee damned first)—Canning

sentence vb Sentence, condemn, damn, doom, proscribe can all mean to decree the fate or punishment of a person or sometimes a thing that has been adjudged guilty, unworthy, or unfit. Sentence is used in reference to the determination and pronouncement of punishment or penalty following an act of judging and an adverse verdict (was tried on the charge of inciting to riot and sentenced to thirty days in jail—E. S. Bates) (he tries and sentences them on their merits, in the swift summary way of boys, as good, bad, interesting, silly—Emerson) Condemn (see also CRITICIZE) implies both an adverse judgment and a sentence which carries with it a penalty (as forfeiture of one's freedom, one's rights, or one's life) (Napoleon was condemned to exile) (for condemned prisoners) (was not inexorably condemned, as so many had feared at first, to be a vassal state in Hitler's unspeakable New Order—Shirer) or, in the case of a thing, a forfeiture of its existence or of some status which has legally protected it from invasion; thus, to condemn an old building is legally to decree its destruction; to condemn a piece of property is to take it over for the uses of the state, on payment of its appraised value. Damn, akin to condemn, is not employed in modern law. In theological use it implies the condemnation of the soul to hell or to eternal punishment (he that believeth not shall be damned—Mk 16:16). In general use, when it carries no implication, it is often employed in curses, imprecations, or expressions of strong disapproval (I give thee sixpence! I will see thee damned first)—Canning

Otherwise it usually implies a verdict that is destructive or annihilating in its effects (if we fail, then we have damned every man to be the slave of fear—Baruch) Doom adds to condemn the implication of a punishment or penalty that cannot be evaded or escaped because imposed by an inexorable power (I am thy father's spirit, doomed for a certain term to walk the night—Shak.) (he does certain things that are very brave... he gambles that he can be terribly, tragically wrong, and therefore be doomed, you see, doomed to Hell—Mailer) This idea of fate or destiny is so strongly stressed in doom that in some cases the impli-
sententious sensitive, impressible, impressionable, responsive, sentient,

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

occasionally and regularly a readiness to be influenced, not only by a stronger power, but by a implies Morrison) to some specific influencing factor (as light, heat, or shock) which is abnormally or excessively reactive to only to a part of the body (as a section of skin or an organ) which is abnormally or excessively reactive to stimuli but to inanimate things (as a photographic film, sensitive Sometimes <the high vacuum tubes which constitute the sensitive brain of modern radio—Morrison> Impressive implies occasionally and impressively regularly a readiness to be influenced, not only by a stronger power, but by a power that succeeds in producing an impression. They do not imply, as sensitive usually does, a power to judge accurately and delicately; rather they suggest crudeness or immaturity or indifference to the quality of the thing that impresses (the mind impressive and soft with ease imbibes and copies what she hears and sees—Cowper) what he couldn’t think of was David submitting, during his most impressionable years, to the worst superstitions of Capitalism—Mary Austin> Responsive, which implies sensitiveness to stimuli in particular or in general, suggests in addition a readiness to respond or react in the way that is wanted. Since it usually occurs only in a good sense, it is likely to connote alertness, cooperativeness, and enthusiasm <we shall presumably find them most responsive to the language, literature, and history of their own country—Inge> she took up life, and became alert to the world again, responsive, like a ship in full sail, to every wind that blew—Rose Macaulay> Susceptible (see also LIABLE) suggests a fitness in disposition or in temperament to be affected by certain stimuli. Though it comes close to impressionable or responsive it more often implies weakness than does either of them, the weakness sometimes being stated but more frequently implied or suggested (as by the person considered or the circumstances attending) in France it is ... bad manners to be too susceptibility—Browell> she is susceptible to flattery he is very young and very susceptible to the charms of women his temper was not very susceptible of ... enthusiasm—Gibbon

sentiment 1 emotion, affection, *feeling, passion Ana thought, impression, notion, *idea: ideal, standard, exemplar (see MODEL) 2 *opinion, view, belief, conviction, persuasion Ana *truth, verity: conclusion, judgment (see under INFERN)
sentimental, romantic, mawkish, maudlin, soppy, mushy, slushy are comparable when they mean unduly or affectedly emotional. Sentimental usually suggests emotion that does not arise from genuine or natural feeling but is evoked by an external cause, by a particular mood, by an excess of sensibility, or for the sake of the thrill, or is merely an affectionation that is temperamental, the moment's fashion, or designed to achieve an end <sentimental songs> his sense of character is nil, and he is as pretentious as a rich whore, as sentimental as a lollipop—Mailer> a sentimental person, interested in pathetic novels and all unhappy attachments—Thackeray we are all for tooting on the sentimental flute in literature—Stevenson> he had an alert and a sentimental mind and worried about the health of Mr. Hiram's cart horse and ... the inmates of the Sailor's Home—Cheever> Romantic implies emotion that has little relation to things as they actually are, but is derived more from one's imagination of what they should be ideally or from one's conceptions of them as formed by literature, art, or daydreams the process of growing from romantic boyhood into cynical maturity—Shaw> its premise is romantic, if only because it assumes that every sparrow ... is a warbler, if not a nightingale—J. M. Brown> it has become the fashion to smile a little at romantic hopes for the world ... But it could be that it is precisely such dreams and visions that are needed—Edman> Mawkish, when it implies sentimentality, suggests a kind that creates loathing or disgust because of its insincerity, emotional excess, or other signs of weakness or futility <stale epithets, which, when I only seem to smell their mawkish proximity, produce in me a slight feeling of nausea—L. P. Smith> stories simpering with delight and mawkish with pathos—J. D. Hart's Maudlin stresses a lack of balance or self-restraint
that shows itself in emotional excess (as unrestrained tears and lamentations); usually also it suggests extreme or contemptible silliness (the mob became not only enthusiastic but maudlin—Disraeli) (seizing things that were inept, maudlin, unhinged, and knowing then that these very words must drive him on and on toward . . . more helpless depths of drunkenness—Styron) Soppy, mushy, and slushy come close to mawkish in their suggestion of distasteful and disgusting sentimentality. Soppy (chiefly in British use) often carries a strong suggestion of silliness in showing affection (they do not permit themselves to show much family affection, so who are we to object if they go soppy over a few four-footed friends?—Holmes) (a naturally sad but never soppy poet—Fraser) Mushy may suggest softness or wishy-washiness (Stuffy rolled over on her back and paddled the air hysterically, a hypocrite, trading shamelessly on her sex and the mushy hearts of humans—Panter-Downes) (you may . . . be a sharp, cynical sort of person; or you may be a nice, mushy, amiable, good-natured one—Shaw) Slushy applies chiefly to utterances or personalities that are so sentimental or emotionally confused as to seem senseless (slushy stories) (pander to everything that's shoddy and slushy and third-rate in human nature—Buchan)

Ana emotional, affectionate, feeling, passionate (see corresponding nouns at FEELING): affecting, *moving, pathetic, touching: affected, pretended, counterfeited, feigned, simulated (see AFFECT)

separate vb Separate, part, divide, sever, sundry, divorce can all mean to become or cause to become disunited or disjoined. Separate implies a putting or keeping apart; it may suggest a scattering or dispersion of units (forces that separate families) (separate the parts of a watch) or a removal of one from the other (separate a husband from his wife) (the business of government cannot and should not be separated from the day-to-day lives of the human beings who conduct it—T. E. Dewey) (separate the wheat from the chaff) (separated his feelings from his work) or the presence of an intervening thing or things (the Atlantic separates Europe from America) (a thousand miles separate the two branches of the family) ("What separates the men and the girls? A fence or something?" "Just foliage, dear, and upbringin'"—Wouk) Part usually suggests the separation of two persons or things in close union or association; often also it suggests a complete or final separation (as by death or violence) (if aught but death part thee and me—Ruth 1:17) (part two combatants) Divide commonly stresses the idea of parts, groups, or sections resulting from literal or figurative cutting, breaking, or branching (divide a pie into six pieces) (divide the government into the executive, legislative, and judicial branches) (he that will divide a minute into a thousand parts—Shak) Divide often, in addition, carries an implication of apportioning, distributing, or sharing (divide the candy among the children) (divide profits) (the grocer got along well with his assistant. They divided tasks and waited on alternate customers—Malamud) (divided his estate equitably among his heirs) Often divide is used in place of separate, especially when mutual antagonism or wide separation is connoted (united we stand, divided we fall) (the broad and deep gulf which . . . divides the living from the dead, the organic from the inorganic—Inge) (the suspicion which the Citizens' Committee predicted would divide neighbor from neighbor—Clinton) Sever adds the implication of violence by or as if by cutting and frequently applies to the separation of a part from the whole or of persons or things that are joined in affection, close affinity, or natural association (sever a branch from the trunk by one blow of the ax) (sever the head from the body) (severed from thee, can I survive?—Burns) (the hour is ill which severs those it should unite—Shelley) (finding herself severed from formal and religious education, she struggled with a sense of guilt—Hervey) Sunder often implies a violent rending or wrenching apart (even as a splitted bark, so sunder we—Shak) (the Romans sundered copper-bearing rock by alternately playing fire and water on it—New Yorker) (man's most significant personal relationship is sundered in an atmosphere of chicanery and buffoonery—Cohn) Divorce implies the separation of two or more things so closely associated that they interact upon each other or work well only in union with each other (its academic tendency to divorce form from matter—Day Lewty) (you cannot divorce accurate thought from accurate speech—Quiller-Couch) Divorce can specifically refer to the legal dissolution of a marriage, a use in which it contrasts with separate which implies a mutually agreed ending of cohabitation without actual legal termination of the marital state. appearance is to be implied (loved to exaggerate, to
astonish people by making extravagant statements with the
gravest air—Hall) and it may be used of things with qualities
suggestive of human gravity (the richness and grave
dignity of its carved staircase and interior wood-
work—Amer. Guide Series: Pa.) (my father’s many-
volumed edition of the Talmud . . . the look of those
tales—grave, wide, solid columns of text—Behrman)
Solemn usually heightens the suggestion of impressiveness
or awesomeness often implicit in grave (perhaps it was
natural . . . to mistake solemn dignity for sullenness—
Sher) (the solemn splendor of that most wonderful
poem, the story of Job—Quiller-Couch) (it was a solemn
moment, for these were the last words of Augustus to his
people—Buchan) Somber applies to a melancholy or
depressing gravity, completely lacking in color, light,
or cheer (the Scots, famed for somber Calvinism and its
intellectual theologizing, did not expect to warm to the
eloquent kind of religion—P. D. Whitney) Sedate
implies composure and decorous seriousness in character
or speech and often a conscious avoidance of lightness or
frivolity (good sense alone is a sedate and quiescent
quality—Johnson) (her habitual expression was sedate
and serious, a permanent reproof, as it were, to those
who were first attracted by the voluptuous quality of her ad-
mirable figure—Linklater) Staid implies a settled sedate-
ness, often a prim self-restraint, and an even stronger
negation of volatility or frivolity than sedate (the side
streets here are excessively maiden-lady-like . . . the
knockers have a very staid, serious, nay almost awful,
quietness about them—Keats) (the staid Roman citizen
was repelled by the wild dances and the frenzied peans—
Buchan) Sober sometimes stresses seriousness of purpose (if
our pupils are to devote sober attention to our in-
struction—Grandgent) but it more often suggests gravity
that proceeds from control over or subdual of one’s
emotions or passions (come, pensive Nun, devout and
pure, sober, steadfast, and demure—Milton) (this work
is certainly of more sober mien than most of its author’s
others. It is very long and very serious, and both these
qualities are certainly deliberate observances—Virgil
Thomson) Earnest implies seriousness of purpose as well
as sincerity and, often, zealousness and enthusiasm (an
earnest student) (and men are merry at their chores, and
children earnest at their play—Millay) (she set out on an
earnest and grim quest for the dollar—Wouk)

Ant authoritative
servitude, slavery, bondage agree in meaning the state of
submission to a master. Servitude may refer to the state
of a person, or of a class of persons, or of a race that is bound
to obey the will of a master, a lord, or a sovereign, and
lacks the freedom to determine his or their own acts, laws,
and conditions of living. The term is often vague or
rhetorical, sometimes implying lack of political freedom,
sometimes lack of liberty to do as one pleases (I am as
free as Nature first made man, ere the base laws of servitude began, when wild in woods the noble savage ran—Dryden) More specifically servitude denotes the
condition of one who must give service to a master and
perform labor for him, whether he has bound himself (see
BOUND adj) voluntarily or is a convicted sentenced to penal
servitude or a slave. Slavery implies subjection to a master
who is the owner of one’s person or who may treat one
as his property (taken by the insolent foe and sold to
slavery—Shak.) or entire loss of personal freedom and
subjugation to another (is life so dear, or peace so sweet,
as to be purchased at the price of chains and slavery?—
Henry) Bondage applies to the state of one bound as a
serf to the soil and sold with the land when conveyed to a
new owner: it can also apply to a state of subjection from
which there is no hope of escape except by breaking one’s
chains (what more oft, in nations grown corrupt, and by
their vices brought to servitude, than to love bondage
more than liberty—Milton)
set vb 1 Set, settle, fix, establish mean to cause someone
or something to be put securely in place. Set is the most
inclusive of these terms, sometimes implying placing in a
definite location, especially to serve some definite purpose
(set a light at each window) (set out trees) (set food
on the table) or to permanently fill some void (set a diamond
in a ring) or establish some limit (set a limit to discussion)
the law of God determines the laws of this world and sets
the bounds and the character of the institutions and activi-
ties of men—Donald Harrington) (the question of
whether human nature is set by heredity or can be changed
by environmental factors—Bauer) and sometimes imply-
ing a placing under orders (as in an occupation, a
situation, an office, or a sphere of life) or under conditions
where something or someone must perform an allotted
or prescribed function (set a boy to work) (set the maids
to cleaning house) (set proctors to watch the students)
or occasionally suggesting a prescribing or ordaining of
an object or objects on which one or one’s efforts, mind,
heart, or eyes concentrates (set the subject for a debate)
(set a goal for his efforts) (set his heart on winning a
prize) (set duty before pleasure) Settle comes close to
set but carries a much stronger implication of putting a
person or thing in a place or condition of stability, rest,
or repose and often a weaker implication of regulative
or dictatorial power (settle an invalid in an easy chair)
(settle themselves in their new home) (offered to escort
her to Paris and see her settled in a reasonably cheap
hotel—Wouk) (the tendency to settle standards on the
level of the “common man”—Edmund Wilson) Often
the word carries an implication of decisive quieting,
calming, or ordering of something that is disturbed, upset,
unstable, or fluctuating (settle a person’s stomach)
(settle his doubts) (the white of an egg will settle the
coffee) (everything’s settled now. You need not worry,
Reuben; there will be no fuss—Gibbons) (there’s nothing
will settle me but a bullet—Swift) Fix (see also ADJUST 1;
FASTEN) usually implies more stability and permanence
in position, condition, or character than set or even settle
(he resolution was already fixed—Buchan) (truth which the
scientist strives to catch and fix—Lowes) (his place in the
McCoy household had become fixed—Anderson) (what
I have most at heart is, that some method should be
thought of for ascertaining and fixing our language forever
—Swift) (the undifferentiated, inchoate religious sense
is thus intensified and fixed, to the great and lasting injury
of the spiritual life—Inge) Establish (see also FOUND)
stresses not so much the putting in place or the bringing
into existence as the becoming fixed, stable, or immovable.
**set**

although in some use both ideas are connoted (do not transplant a tree once it is established) (American sculptors ... whose reputation was already established — Wharton) (the child initiates new processes of thought and establishes new mental habits much more easily than the adult — Eliot) (the novel as I have described it has never really established itself in America — Trilling) (at the end of the first growing season, the grass was firmly established — Farmer's Weekly)

Ana *harden, solidify: *compact, consolidate, concentrate

set 1. Set, circle, coterie, clique can all denote a more or less carefully selected or exclusive group of persons having a common interest. Set applies to a comparatively large group, especially of society men and women bound together by common tastes (a solid citizen of the fast and fratic international set — Kenneth Fearing) (I was myself living in several sets that had no connection with one another — Maugham) (her college set had stayed rigidly in a zigzag path ... which they considered smart — Wouk) Circle implies a common center of the group (as a person or a cause that draws persons to him or it) or a common interest, activity, or occupation (the work of the younger writers ... has even penetrated into academic circles — Day Lewis) (like sex, the word segregation was not mentioned in the best circles — Lillian Smith) (she felt violently the gaps that death made in her circle — Pritchett) (an active figure in Madrid's literary and theatrical circles — Current Biog.) Coterie stresses the notion of selectness or of congeniality within the small circle; clique highlights the implication of an often selfish or arrogant exclusiveness (we three formed a little coterie within the household — Symonds) (the poetry of revolt is apt to become the poetry of a coterie — Lowes) (the best English society — mind, I don't call the London exclusive clique the best English society — Coleridge) (the corruption and debauchery of the homosexual clique — Shirley Jackson) (every hoodlum in every crack gang and clique who fancied himself with the blade — Mailer)

severe, stern, austere, ascetic can all mean given to or characterized by strict discipline and firm restraint.

Severe is applicable to persons and their looks, acts, thoughts, and utterances or to things (as laws, penalties, judgments, and styles) for which persons are responsible. In all these applications it implies rigorous standards of what is just, right, ethical, beautiful, or acceptable and unspiring or exacting adherence to them; it not only excludes every hint of laxity or indulgence but often suggests a preference for what is hard, plain, or meager (a severe teacher) (severe impartiality) (severe in dress) (these bleak and severe Sunday mornings, though they left me with a respect for the Bible, had the effect of antagonizing me against it — Edmund Wilson) Very often the word suggests harshness or even cruelty (a severe penalty) (severe discipline) (severe criticism) (a severe test of his endurance) It is then by extension referable also to things for which persons are not responsible but which similarly impose pain or acute discomfort (a severe attack of lumbago) (I do not think that she anticipated anything so severe as arsenic on her blackberries — Shirley Jackson) (a severe winter) Stern, though it often implies severity when applied to persons or their acts or words, stresses inflexibility or inexorability of temper; thus, a severe judge may appear kindly though dispassionately just, but a stern judge reveals no disposition to be mild or lenient; to be made of stern stuff is to have an unyielding will or an extraordinarily resolute character (he wanted to bang on his desk, arise magnificently, like a good confessor, being purposeful and stern — Styrone) In extended use stern is applied to what cannot be escaped or evaded (stern necessity) (the stern compulsion of facts — Buchan) or to what is harsh and forbidding in its appearance or in its external aspects (the stern and rockbound land ... on which his lot was cast — Faulkner) (a marble bath that made cleanliness a luxury instead of one of the sternest of the virtues, as it seemed at home — Shaw) Austere is chiefly applied to persons, their habits, their modes of life, the environments they create, or the works of art they produce; in these applications austere implies the absence of appealing qualities (as feeling, warmth, color, animation, and ornament) and therefore positively implies dispassionateness, coldness, reserve, or barrenness (my common conversation I do acknowledge austere, my behavior full of rigor — Browne) (secretly, these austere tyrants seized with delight upon so estimable an excuse for censuring a member of the set they deprecated — Mailer) Sometimes the word tends to add such connotations as restraint, self-denial, economy of means, and stark simplicity and becomes a term of praise rather than of depreciation (the austere dignity and simplicity of their existence — Pater) (mathematics, rightly viewed, possesses not only truth, but supreme beauty — a beauty cold and austere, like that of sculpture — Russell) (a landscape lightly strewn with snow, and rendered graciously austere by long, converging lines of leafless poplars — Wyile) Ascetic implies laborious and exacting spiritual training or discipline, self-denial, abstention from what is pleasurable, and even the seeking of what is painful or disagreeable (strong-willed and ascetic, he discovered in discipline the chief end for which the children of Adam are created — Parrington) (a people possessed of the epicurean rather than the ascetic ideal in morals — Brownell) The idea of discipline, especially by abstention from what is pleasurable or easy or self-indulgent for the sake of spiritual or intellectual ends may be emphasized (for science is ascetic. It is a discipline and a control of personal impulse that could arise only in a relatively mature civilization — Baker Brownell) (there was in him a real nobility, an even ascetic firmness and purity of

**Ant** tolerant: tender—Con lenient, clement, *forbear*—merciful, indulgent: gentle, mild, *soft*

**shabby** 1 Shabby, dilapidated, dingy, faded, seedy, threadbare refer to the appearance of persons and of things and mean showing signs of wear and tear. Shabby applies to persons and places and suggests a lack of freshness or newness in those items that contribute to appearance; sometimes the term applies directly to the things, especially clothes, which so contribute. Poverty is often suggested as the cause of this run-down condition but various other causes (as neglect or indifference) may also be suggested 〈old Bart, shabby and inconspicuous, dunking pound cake with his dirty fingers—W. S. Burroughs〉 (villages ... with their shabby, unpainted shacks, dropping with decay—Brooks) 〈everything had been done to make the accused look as shabby as possible. They were outfitted in nondescript clothes—Shirer〉 〈the old house ... is too elegant for poor people, and too large; too shabby, in too shabby a neighborhood, for the rich—Tate〉

**Dilapidated** (compare dilapidate under ruin) implies a worse appearance than shabby, usually suggesting a broken-down or tumble-down condition resulting from neglectful lack of repairs or from careless abuse 〈a dilapidated fence with its gate hanging from one hinge〉 〈sat down in a dilapidated easy chair minus a cushion—Purdy〉 〈an old toy is so much better ...〉 The very fact that it was worn and dilapidated caused it to create a feeling of warmth—Henry Miller>

**Dingy** applies to what is no longer fresh or new in appearance and shows the effects of gradual soiling that dulls the colors or dims the brightness 〈out of his dingy retreat, dirty and uncomfortable, he would appear resplendent—Osbet Siviwell〉

**Faded** also implies lack of freshness but it connotes the loss of vigor or brightness that shows that a person or thing has passed its prime and is revealing signs of drooping and withering 〈her slightly stale and faded gush about Chopin and her memories of Paris in the spring—Edmund Wilson〉 〈she lives with her mother, a faded tired woman who played Lady Capulet—Wilde〉 〈her clothes were always the same and it is hard to remember what she wore. She seemed to sink into the faded anonymity of the old street—Tate〉 〈so many of the old friends are dead, and those who live are older and changed, and everything seems a bit faded and drab—H. L. Matthews〉

**Seedy** does not go so far as shabby in implying deterioration and lack of freshness but it does suggest some loss of those signs that marked a person or thing as strong or at the peak of value and usefulness 〈sordid squabbling with his landlady about the rent he owes on a seedy room—McCarter〉 〈an English setter, a bitch, and rather seedy now and smelly—Henry Miller〉 〈a table on which was a clutter of seedy Western souvenirs—a rusted, beat-up placer pan ... and the shellacked tail of a beaver—Stafford〉

**Seedy** is also used in reference to a person who feels himself not really sick but not up to the mark 〈we were all feeling seedy, and we were getting nervous about it—Jerome〉

**Threadbare** (see also TRITE) in its basic use implies such wear of fabric that all nap is worn away and the threads are visible 〈the curves of hips and breasts already discernible under the too short and often threadbare clothes—Metalious〉 but often this basic notion is lost and the emphasis is on the shabby state typical of or the fact of extreme grinding poverty 〈the only opportunity ... to find escape from the grim, drab, threadbare unpicturesque poverty of her inharmonious home—Dorothy Canfield〉 〈England, which has a threadbare Treasury—Sulzberger〉 〈finally got threadbare enough and hungry enough to overlook my scruples—O'Leary〉

**Ana** worn (see HAGGARD) dowdy, frowzy, *slatternly: shopworn, *trite: decrepit (see WEAK)

**Ana** restrain, curb, check, inhibit: *hinder, impede, obstruct, block, bar: restrict, circumscribe, confine, *limit

**Con** disencumber, disembarrass, *extricate: release, liberate, *free

**shade** n 1 Shade, shadow, umbrage, umbra, penumbra, adumbration can mean the comparative darkness caused by something which intercepts rays of light. Shade carries no implication of a darkness that has a particular form or definite limit but the term often stresses protection from the glare, heat, or other effect of the light that is cut off 〈the forest, one vast mass of mingling shade—Shelley〉 〈chiaroscuro, by which light reveals [in paintings] the richness of shade and shade heightens the brightness of light—Ellis〉 〈the trees afforded shade and shelter—Cather〉 Shade usually applies to shade which preserves something of the form of the object which intercepts the light 〈it [the garden] ... has neither arbor, nor alcove, nor other shade, except the shadow of the house—Cowper〉

〈saw ... the shadow of some piece of pointed lace, in the Queen's shadow, vibrate on the walls—Tennyson〉 〈the shadowless winter, when it is all shade and therefore no shade—Jefferies〉 In extended use shade implies darkness or obscurity; shadow, insubstantiality or unreality 〈there no shade can last in that deep dawn behind the tomb—Tennyson〉 〈tis but the shadow of a wife you see, the name and not the thing—Shak〉

**Umbrage** (see also OFFENSE) applies chiefly to the shade cast by heavy foliage or trees, though sometimes it refers to the mass of trees or foliage which make for heavy shade 〈branches ... spreading their umbrage to the circumference of two hundred and seven feet—Strutt〉

〈the thrush sings in that umbrage—L. P. Smith〉 Its occasional extended use can draw meaning from either of these aspects and suggest, on the one hand, an indistinct indication, as if of something seen in deep shadow 〈the least umbrage of a reflection upon this accident—North〉 or, on the other, an overshadowing influence 〈to compete in the umbrage of big city ... wages and other costs he had to simplify his ... process—J. R. Malone〉

**Umbrage** and penumbra are largely astronomical and optical terms. Umbrase applies to the perfect or complete shadow that results from the complete or nearly complete eclipse, and penumbra to the imperfect or partly illuminated shadow which often surrounds the umbra. Umbrase rarely and penumbra are often used in extended senses, the former implying a complete overshadowing or eclipse, the latter denoting the marginal region or border between areas which are themselves clearly one thing or the other, or in which the exact differences between one thing or another are so obscure as not to be clearly discernible 〈his memory was eclipsed in the umbra of a more compelling personality—Cobby〉 〈physiology having rudely investigated its phenomena upon the same level as other biological processes, it [love] has been stripped of the mystical penumbra in whose shadow its transcendental value
seemed real, though hid—Krucho. (the great ordinances of the Constitution do not establish and divide fields of black and white. Even the more specific of them are found to terminate in a penumbra shading gradually from one extreme to the other—Justice Holmes) Adumbration applies to something that is so faint or obscure a figure, sketch, or outline of something which actually exists or is to come that it serves as a foreshadowing of it or a hinting at it (the lugubrious harmony of the spot with his domestic situation was too perfect for him, impatient of effects, scenes, and adumbrations—Hardy) (if the Parthenon has value, it is only as an adumbration of something higher than itself—Babbit) Ana darkness, dimness, obscurity (see corresponding adjectives at dark) *shelter, cover, retreat Con brightness, brilliancy, radiance, effulgence (see corresponding adjectives at bright) *glare, glow, blaze (see under blaze vb) 2 ghost, spirit, specter, *apparition, phantasm, phantom, wraith, revenant 3 *blind, shutter 4 tint, *color, hue, tinge, tone 5 *gradation, nuance Ana distinction, difference (see dissimilarity) *touch, suggestion, suspicion, soupçon, dash, tinge 6 *touch, suggestion, suspicion, soupçon, tinge, smack, spice, dash, vein, strain, tincture, streak Ana *trace, vestige: tint, tinge (see color) shadow n *shade, umbrage, umbra, penumbra, adumbration Ana *form, figure, shape, configuration, configuration: darkness, obscurity, dimness (see corresponding adjectives at dark) silhouette, contour, *outline shadow vb *suggest, adumbrate Ana *foretell, forecast, predict, prognosticate: *foresee, foreknow, divine Con *reveal, disclose, discover, divulge, tell shake vb 1 Shake, tremble, quake, totter, quiver, shiver, shudder, quaver, wobble, teeter, shimmy, dither are comparable when they mean to exhibit vibratory, waverling, or oscillating movement often as an evidence of instability. Shake, the ordinary and the comprehensive term, can apply to any such movement, often with a suggestion of roughness and irregularity (the earth itself seemed to shake beneath my feet—Hudson) (he shook with fear) (his body shook with laughter) tremble applies specifically to a slight, rapid shaking of the human body, especially when one is agitated or unnerved (as by fear, passion, cold, or fatigue) (she stood with her hand on the doorknob, her whole body trembling—Anderson) (she is so radiant in her pure beauty that the limbs of the young man tremble—Meredith) The term may apply also to things that shake in a manner suggestive of human trembling (not a breath of breeze even yet ruffled the water: but momentarily it trembled of its own accord, shattering the reflections—Richard Hughes) Quake may be used in place of tremble but it commonly carries a stronger implication of violent shaking or of extreme agitation (his name was a terror that made the dead quake in their graves—Ouida) (his accusing hand ... stiffly extended, quaking in mute condemnation—Terry Southern) Often the term suggests either an internal convulsion (as an earthquake or something suggestive of one) or an external event which rocks a person or thing to its foundations (the sounding of the clock in Venice Preserved makes the hearts of the whole audience quake—Addison) (I thought of the sounds that must be coming from those men, and at that thought my insides quaked; I thanked God we couldn’t hear them—Kenneth Roberts) Totter usually suggests great physical weakness (as that associated with infancy, extreme old age, or disease); it therefore often connotes a shaking that makes movement extremely difficult and uncertain or that forebodes a fall or collapse (the mast tottered before it fell) (the little calf that’s standing by the mother... totters when she licks it with her tongue—Frost) Quiver suggests a slight, very rapid shaking comparable to the vibration of the strings of a musical instrument; it differs from tremble chiefly in being more often applied to things (as pen leaves quiver in the slightest breeze) (it is not a dead mass of stone and metal, but a living thing, quivering and humming like a great ship at sea. A splendid piece of architecture—Higher) or in carrying a less necessary suggestion of fear or passion and a stronger implication of emotional tension (the little boy’s lips quivered as he tried not to cry) (I was quivering and tingling from head to foot—Kipling) (eagerness that made me quit—Thackeray) quiver—Roberts) (Seymour sat whimpering and quivering with panic and temper and discomfort—Davenport) Shiver and shudder usually imply a momentary or shortlived quivering, especially of the flesh. Shiver typically suggests the effect of cold (came into the house snowcovered and shivering) but it may apply to a similar quivering that results from an emotional or mental cause (as an anticipation, a premonition, a foreboding, or a vague fear) (such thoughts... may make you shiver at first—Montague) (he shivered with pleasure as he conceived robberies, assaults—murders if it had to be—Malamud) or to a sudden, often seeming, quivering of a thing (his heart shivered, as a ship shivers at the mountainous crash of the waters—Bennett) (when the first star shivers and the last wave pales—Flecker) Shudder usually suggests the effect of something horrible or revolting; physically it implies a sudden sharp quivering that for the moment affects the entire body or mass (the spotted shadow of the heaven tree shuddered and pulsed monstrously in scarce any wind—Faulkner) (I am afraid of it, she answered, shuddering—Dicksen) (it was one of those illnesses from which we turn away our eyes, shuddering—Delacl) (the chill of an age-old recognition shuddered my spine; a voice was sounding in the dimly lit air—Miller) Quaver sometimes implies irregular vibration or fluctuation, especially as an effect of something that disturbs (the breeze... set the flames of the streetlamps quavering—Stevenson) but often it stresses tremulousness especially in reference to voices and utterances affected by weakness or emotion (a reedy, quavering voice—Doyle) (dread returned, and the words quavered as she spoke them—Meredith) (the quavering, envenomed voice of... Scrooge—Styron) Wobble implies an unsteadiness that shows itself in tottering, or in a quivering characteristic of a mass of soft flesh or of a soft jelly, or in a shakiness characteristic of rickety furniture (this table wobbled) (bumping when she trots, and wobbling when she cantered—Whyte-Melville) French automobiles wobbling giddily along the road—Panter-Downes) (picked up his glass and half emptied it. His hand wobbled so that some of it ran down his chin—Charteris) Teeter implies an unsteadiness that reveals itself in seesawing motions (an inebrated man teetering as he stands) (stood on chairs and teetered on stepladders—Dos Passos) Shimmie suggests the fairly violent shaking of the body from the shoulders down which is characteristic of the dance of that name and, therefore, may suggest vibratory motions of an abnormal nature (all kinds of starlets get an opportunity to shimmie around for the edification of Pharaoh and his court—McCarten) (a lizard shimmied across her path—Miller) (I often see the
shallow

walls of my house shimming a bit—Lucas> (the shimming of unbalanced front wheels of an automobile) Dither implies a shaking or a hesitant vacillating movement often as a result of nervousness, confusion, or lack of purpose <dithering to his feet, he crept downstairs—Cronin> Ana oscillate, fluctuate, vibrate, waver, *swing, sway 2 Shake, agitate, rock, convulse can mean to cause to move to and fro or up and down with more or less violence. Shake, the most general of these words, in its specific senses usually retains this basic meaning <as there is a high wind blowing nearly all the time, the nests are continually shaken—Seago> but it seldom conveys merely this idea. Very often its meaning is narrowed but enriched by an implication of the particular intent or purpose of the movement; thus, to shake a rug implies an intent to dislodge dust; to shake a tree, to bring down its fruit; to shake a cocktail, to mix ingredients; to shake hands, to greet or to acknowledge an introduction; to shake one's fist, to threaten. Even in its extended use shake commonly implies movement, usually physical movement <he was visibly shaken by the news> <the exposure of unsuspected depravity in the highest circles shook the social fabric to its foundations—Lucius Beebe> <just one single example of real unreason is enough to shake our belief in everything—Theodore Sturgeon> Agitate usually carries a much stronger implication of tossing or of violent stirring than shake; it often also suggests a prolongation of the movement <a churn has a dasher for agitating cream> <the leaves on the trees were agitated as if by a high wind—Hudson> <brown water in the basin . . . slightly agitated by concentric ripples, as though someone had recently thrown a stone into it—James Helvick> When the recipient of the action is a person agitate connotes emotional disturbance or excitement <he started a discussion which has agitated thinkers ever since—Whitehead> <the physician interposes, frightens the family, agitates the patient to the utmost—Overstreet> Rock suggests a swinging or swaying motion; it tends to lose the implication of lulling derived from its earliest associations with the movement of a cradle and to emphasize those of upheaving, derived from the violent swaying (as of a ship in a storm or of the earth in an earthquake) <the wind rocked the house> <the entire city was convulsed by the explosion> <Tokyo rocks under the weight of our bombs—Truman> Often, especially in extended use, rock suggests, as shake does not, tottering and peril of falling <the stock market was rocked by the rumor of war> <constant insinuations finally rocked his faith in his friend> <the explosions that rocked the world today are nothing less than the stirring of the common man the world over—Hansen> Convulse often implies more violence in the motion than any of the others; it also commonly suggests a pulling to and fro or a wrenching or twisting (as of the body in a paroxysm or of the earth in seismic disturbances) <Lucetta . . . convulsed on the carpet in the paroxysms of an epileptic seizure—Hardy> <they were convulsed with laughter> <the ferment of change that has convulsed, distorted, and reshaped our twentieth-century world—A. E. Stevenson> Ana *move, drive, impel: flourish, brandish, *swing, wave: disturb, derange, unsettle, *disorder 3 *swing, wave, flourish, brandish, thrash shallow adj *superficial, cursory, uncritical Ana slim, slight, slender, *thin: trivial, trifling, *petty, paltry: empty, hollow, idle, *vain sham n *imposture, cheat, fake, humbug, fraud, deceit, deception, counterfeit Ana *pretense, pretension, make-believe: *trick, ruse, feint, whe, gambit, ploy A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
sharp, keen, acute can all mean having a fine point or edge, however, by an acute critical sense, a liking for research, and his genius for teaching—Starr—my very acute grandmother, who at eighty-eight is clear and definite in her political convictions—Current Bio. The acutest philosophers have succeeded in liberating themselves completely from the narrow prison of their age and country—Huxley—As applied to something perceptible through the senses sharp often suggests a disagreeably cutting or biting quality (sharp as vinegar) (a sharp voice) (a sharp flash) (a sharp wind) or it may emphasize distinctness or clearness of definition (a sharp outline) (sharp contrasts) had happened close on twenty years ago. Yet how short a time it seemed, so sharp was the impression of that night—Mackenzie—Keen, in contrast, may suggest a bracing, zestful, or piquant quality (the wind came keen with a tang of frost—Mosefield) (very keen is the savor of the roast beef that floats up—Benson) Acute, less common in this sense, may impute an intensely perceptible and often distasteful quality to what it qualifies (the stench was acute—Maier) (the sound rose to an almost painfully acute note) As applied to the senses themselves, all imply exceptional functional efficiency and choice is predicated on idiom; thus, sharp is used especially of sight and hearing, keen, of sight and smell, and acute, of hearing. As characterizing pleasures and pains, sharp suggests most definitely something that seems to cut or pierce, keen implies intensity, and acute implies poignantness (a sharp pain) (keen zest) (acute anguish) Ana *incisive, trenchant, cutting, biting: mordant, *caustic, scathing: piercing, penetrating, probing (see enter): tricky, cunning, artful, wily, guileful, *sly Ant dull: blunt shear vb shiver, *break, crack, burst, bust, snap Ana demolish, *destroy: *ruin, wreck: rend, slice, rive (see tear) shave vb *brush, graze, glance, skim Ana touch, contact (see corresponding nouns at contact): *escape, avoid shear vb Shear, poll, clip, trim, prune, lop, snip, crop are comparable when they mean to cut off something (as a piece, an excrement, or a limb). Shear is the most general word of this group; it usually implies the use of a sharp cutting instrument (as shears, a razor, or a sharp knife) and, as its result, a close and even or a clean cut through, or off, or away, or from something. The term may or may not imply injury and suggests improvement more often than destruction (a machine with blades strong enough to shear a steel bar at one stroke) (shear the fleece from sheep) (each year he sheared his sheep) (a shark's curved razor-like teeth shear cleanly through the bone—Heiser) Poll implies the cutting of the hair as closely as if shaved; in this sense the verb seldom takes the person as its object, but the part affected (monks with their hair poll'd) or that one (David parlor) (such a hair that he had not polled his head—Whiston) (monks with polled crowns) It sometimes refers to the cutting off of the top or head of trees (as willows), often in order to provide new growth suitable for basketry, but sometimes in order to encourage the throwing out of branches from below (there were some beautiful willows, and now the idiot Parson has polled them into wretched stumps—Morris) Clip suggests a cutting evenly or closely without any indication of how much or how little is cut off (clipped her little son's curls) (clipped the shrubs into elaborate forms) (clip an article from a newspaper) Trim (see also stabilize) always implies the removal of something unwanted or overlong by or as if by cutting or clipping in order to improve the appearance of a thing, or to ad-
just it to something, or to prepare it for a definite use

(trim a straggly hedge) (trimmed his hair and beard)
(trim the rough edges from a piece of cloth) (what was not trimmed from our pages by an editor's nudge was given away in the hagglings of publisher and author—Mailer) Prune implies a trimming of a plant (as a tree or shrub) by cutting out superfluous parts (as dead branches) not only to improve its shape but to promote its growth or bearing (prune the rosebushes in the garden) Consequently prune in broader use implies a cutting down or out or excision so as to remove useless or needless material (as in written matter) (prune a manuscript before sending it off to the printer) (a good personal library, like a tree, must be pruned occasionally to stay healthy—advt)

Lop implies a cutting off or away by or as if by an axe, especially of what is superfluous; typically it suggests pruning and the removal of dead or unnecessary branches or boughs, but it may suggest the similar removal of something that may be regarded as improperly associated or as an encumbrance, a nuisance, or an interference (superfluous branches we lop away, that bearing boughs may live—Shak) (Virginia, even after Maryland had been lopped off, remained a dominion of imperial extent—Morison) Snip, like clip, may imply the employment of scissors, but it may also suggest the use of sharp fingernails or of any other instrument by which a part may be pinched or cut off; it differs from clip in emphasizing suddenness and quickness in movement. It, therefore, often suggests a cutting off of a small piece at a time or a cutting into bits (snip off a loose thread) (snip the dead flowers from a plant) (the child, with its newfound toy, a pair of scissors, was snipping the newspaper into pieces) Crop, in most of its meanings, implies the cutting off of the top (as of a tree or grass), but when it emphasizes that implication, it usually suggests the cutting off of a piece at the top (as for identification or punishment) or a cutting extremely close (as of the hair) (the stiff-necked sectaries . . . who had been glad to stand in pillories and suffer their ears to be cropped rather than put bread in the mouths of priests—Brooks) (this hair . . . had been cropped by the prison barber—Teats)

Ana *cut, slit, slash, hew: split, rive, cleave (see tear)

Ana remove, shift, transfer (see move): reject, repudiate, Ana Ana

place of natural shelter (as a copse, thicket, or dense shelter Wouk) inside it, and you're less vulnerable—sanctuary in a deserted house) <our clubs are refuge—Seldes) Asylum stresses usually voluntary retreat from danger or annoyance and escape to a condition or place promising safety or security or peace. It often suggests remoteness, solitude, quiet, or, in religious use, conditions affording opportunities for prayer and meditation (a hermit's retreat) (ah, for some retreat deep in yonder shining Orient—Tennyson) (regard the hut as a retreat and a camp rather than a home—Canby) Refuge also suggests an attempt to escape whatever threatens one's peace, safety, or happiness, but it usually implies fleeing from an attack or from pursuers, or something (as a thought or emotion) that harasses like a pursuer (refuse refuge to political exiles) (the escaped convict found refuge in a deserted house) (our clubs are . . . not refuges for bored husbands and homeless bachelors—Brownell) (millions of people . . . feel . . . the secrecy of the voting booth is their last refuge—Selden) Asylum adds to refuge the implications of exemption from seizure or plundering and the finding of safety (as in the care of a protector or in a place outside the jurisdiction of the law) (the embezzler sought asylum in a country that had no extradition treaty) (during the war that followed, Britain gave asylum to many exiles from different lands—Victor Ross) Sanctuary stresses the sacredness of the place and its claim to reverence or inviolability; thus, a sanctuary for wildlife is an area which is exempt from intrusion by hunters and trappers and in which predators commonly are controlled so that the forms of life which are their prey may flourish (if thou beakest aught that can attain the honor of my house, by Saint George! not the altar itself shall be a sanctuary—Scott) (the most important single event . . . in our history is that it is our turn to be freedom's shield and sanctuary—A. E. Stevenson)

Ana protection, safeguarding or safeguard (see corresponding verbs at DEFEND): *harbor, haven, port

shelter vb *harbor, lodge, house, entertain, board

shoal vb quiver, shudder, quaver, *shake, tremble, quake, totter, wobble, teeter, shimmery, dither

shoal n Shoal, bank, reef, bar can all mean a shallow place in a body of water. In ordinary use shoal is applied

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
to a shallow place, especially one that is difficult to navigate. <dangerous shoals in uncharted waters> Bank, often as the plural banks, is applied to one that is formed by a muddy, sandy, or gravelly elevation but is deep enough to make navigation safe for lighter craft (as fishing boats) <the Grand Bank, also called the Banks of Newfoundland, is a noted fishing ground> and reef, to one where rock lies dangerously close to the surface <the reef-bound shores of Bermuda> Technically shoal is applied to elevations which are not rocky and on which the water is not more than 6 fathoms deep, bank to a similar elevation rising from the continental shelf and usually having a broad flat top under deeper water, and reef to a rocky elevation on which the water at low tide is 6 fathoms or less in depth. Bar carries implications found in many senses (as of length, narrowness, and hindrance). It is applied to a ridge of sand or gravel piled up and often across or nearly across a river’s mouth or an entrance to a harbor and obstructing navigation.

**Shore**

Shore, coast, beach, strand, bank, littoral, foreshore

---

**Shoot**

Shoot, branch, bough, limb can mean one of the following:

- **Shoot** vb 1 *rush, dash, tear, charge
  - *brief
  - *concise, terse, laconic

- **branch**
  - *excellence, merit, virtue, perfection

- **bough**
  - *imperfection, deficiency, fault

- **limb**
  - *excellence, merit, virtue, perfection

---

**Shorten**

Shorten, curtail, abbreviate, abridge, retrench can all mean to reduce in extent, especially by cutting. Shorten commonly implies reduction in length or duration <shorten a road by eliminating curves> <to shorten a visit> It is also often used of apparent rather than actual length <they shortened the journey by telling stories> <if we really shorten your own young life would be to let him know how clever you are—Mary Fitt> <the vaccines will not even shorten the course of a cold—Fishbein> Curtail adds to shorten the implication of making cuts that impair completeness or cause deprivation <the interruption of curtailed his speech> <the outdoor ceremony was curtailed because of the storm> <curtailed rights> <emergency order drastically curtail the use of fuel—Current Biog.> Abbreviate implies reducing by omitting some normally present or following part; thus one abbreviates a word by cutting out or cutting off letters; one abbreviates a discussion by bringing it to a close sooner than planned or anticipated <their outing was abbreviated by a sudden downpour> <a stocky square-jawed man of great physical strength and energy, though of abbreviated intelligence—Shirer> Abridge expresses reduction in compass or scope rather than in length <I feel you do not fully comprehend the danger of abriding the liberties of the people—Lincoln> but it may imply the retention of all that is essential and the relative completeness of the result <abridge a dictionary> Retrench stresses reduction in extent or costs of something felt to be in excess <retrench expenses> <the lords are retrenching visibly, and are especially careful to avoid any form of ostentation—Nancy Mitford>

Shore, coast, beach, strand, bank, littoral, foreshore
shout

*presently, soon, directly

shout vb Shout, yell, shriek, scream, screech, squeal, holler, whoop are comparable when they mean as verbs to make or utter a loud and penetrating sound that tends or is intended to attract attention and, as nouns, a sound or utterance of this character. All, when used in reference to human utterance, can apply to either meaningful speech or inarticulate cries. Shout ordinarily implies vocal utterance in an energetically raised voice intended to carry a considerable distance or to rise above conflicting sound; in itself and apart from context the term carries no information about the emotional or meaning content or the tonal quality of the sound (the peddler...shout their wares with a cry which is like the howl of a wolf—Gardner) (the geishas followed us, shouting insults in English, Japanese and pantomime—Mailer) (the lusty yells of the brown-shirted masses or the shouts of the Fuehrer blaring from the loudspeakers—Shirer) (the cuckoo shouts all day at nothing in leafy dells alone—Housman)

In its extended use shout stresses attention-gaining quality (the brassy, peremptory shout of the ship's siren sounded... urgent and startling—R. B. Robertson) (his conservatory in winter is a shout of warring geraniums, which fills his heart with joy—G. W. Johnson) Yell is used chiefly with reference to human utterance and implies not only loudness but sharpness and stridency of sound and usually either the uncontrolled expression of an emotion (as horror, fear, rage, or triumph) or an urgent attempt to attract attention (the two boys yelled with fear—Buck) (stood a waiting crowd that let out a tumultuous yell of greeting—Sandburg) (heard the boy yell for help)

In its extended use yell may apply to a sound suggesting a human yell (heard the lacerating yell of a scared bird shrill in his ears—Gibson) (the long, sunless winters, with their wild storms, their yelling gales—C. D. Roberts) or to an urgent appeal (they have exposed the flimsiness of satellite power, which—when the chips are down—must yell for Red Army help—Goldstein) Shriek implies a piercingly shrill sound or tone and, as applied to human utterance, suggests a strong emotional background (as of fear, horror, or anguish or less often of some pleasant or neutral emotion) (a case of goods from Paris to examine with little shrieks of excitement—Jesse) (the heavy booming of surf...could not drown the shriek of the tortured metal in her damaged forepart—Porteous) (this instant's hesitation seemed to fill him with a tremendous, fantastic contempt, and he damned them in shrieked sentences—Crane) (I threatened the three men with my revolver, but they shrieked for mercy and I did not fire—R. H. Davis) In extended use shriek, like shout, stresses attention-gaining quality (the slogans and hyperboles of boundless confidence. The advertising columns shrieked with them—F. L. Allen) (the shriek of red furnaces against the sky—Brand) Shrimp in its basic use differs little from shriek (how quick the crows come flapping with their screams—Vance) (she screamed and fainted and came to and screamed and fainted all over again—Bromfield) (screaming to God for death by drowning—Millay) and it may be similar in extended use (the growing industries of Utah are screaming for water—Time) (the papers carried screaming headlines—Lovett) but more often its extension refers to something of which the action or occurrence is accompanied by or suggestive of physical screaming (every one of you will scream your lives out at the block within a year—George Orwell) (while smoke-black freight...screaming to the west coast, screaming to the east, carry off a harvest, bring back a feast—Lindsay) (smells of concentration camps and the basements of secret police. There are screaming nerves in it—Plessisley) Screech implies a prolonged, typically inarticulate shriek that is conspicuously harsh or discordant or trying to the nerves (the groan...had changed to a screech like an electric butcher saw on bone—Wouk) (three overfed fish house cats were screeching at each other—Joseph Mitchell) (their ungeased wooden wheels screeching a cacophony that could be heard for miles—Amer. Guide Series: Minn.)

In extended uses it is closely comparable to such uses of scream (many photographers...congratulate themselves when they have almost blown you down with screeching hues alone—a bebop of electric blues, furious reds, and poison greens—Fortune) (the driver applied his brakes with a jerk, and the car screeched to a standstill—Bruce Marshall) Scream implies a sharp shrill sound that is not necessarily especially loud and that, if of human origin, is ordinarily less emotion-charged than a shriek, scream, or screech (the hulk of this man belied the squeal of his piping voice like a run-down wheel—Salomon) (on the stage the talk of Mr. Steinbeck's characters occasionally hits the ear with the effect of chalk squealing on a slate—Lardner) Often the term is used with specific reference to the natural cries of certain animals (the urgent squeals of a hungry pig) (rats squealing between the walls) Holler ordinarily refers to human utterance that in tone and volume is equivalent to shout (his holler and shout made the bobcat shiver—Warren) Often it implies a purpose (as of warning or attracting attention) (hollered again and again until the boy turned) or an expression (as of surprise or distress or anger) (let out a holler as the stone whizzed by his head)

In extended use the term stresses vehemence (as in expositulating or criticizing or demanding) (the correspondents holler so...because the legend of the profession demands that one must be objective in all things—Belden) (I didn't see he'd taken my line at first and when I did I put up a holler—Brace) (in spite of six rate increases in the last seven years, casualty companies are already getting ready to holler for more—Time) Whoop, like holler, usually refers to human utterance equivalent in quality to shout, but ordinarily it implies eagerness, enthusiasm, or enjoyment as a cause (made a man want to cry and whoop all at the same time—Kroy) In its varied extended uses it is likely to suggest exuberant, often noisy, vigor or vitality (whoops up a selling boom—Stegner) (whooped through on a voice vote a stopgap foreign aid appropriation bill—Current Biog.)

Ana *roar, bellow, bawl, howl

shout n yell, shriek, scream, screech, squeal, holler, whoop (see under SHOUT vb)

Ana bellow, vociferation, clamor, bawl, roar (see under ROAR vb)

shove vb *push, thrust, propel

Ana *force, constrain, oblige, compel, coerce: impel, drive. *move

show vb 1 Show, manifest, evidence, evince, demonstrate are comparable when they mean to reveal something outwardly by or as by a sign, or to serve to make something outwardly apparent or visible. Shows imply enabling others to see, but in this case what is revealed can only be inferred (as from acts, words, or looks) (he never shows what he thinks) (Tony...asked a question or two designed to show his intelligence—Archibald Marshall) (in this decision he showed his capacity for extreme boldness—Buchan) Slacksness among civilians
or display. He . . . looked me over as if I had been an analoguous words playing anomalous

The term sometimes means little more than to exhibit, shows, exhibits, or displays it consciously or unconsciously—which he puts forward prominently or openly, either with the express intention or with the result of attracting others’ attention or inspection. One shows something which he enables others to see or look at (as by putting it forward into view intentionally or inadvertently or by taking another where he may see it) <showed his tongue to the doctor> <show our new home to friends> <show the city to an out-of-town guest> <the picture purported to show the earth’s convexity—Martin Gardner> (I don’t think he ever showed his full powers—Lasky) One exhibits something which he puts forward prominently or openly, either with the express intention or with the result of attracting others’ attention or inspection <exhibit the museum’s collection of Whistler engravings> <exhibit articles made by children in school> (in many fashionable gown shops, garments are not exhibited but are shown only to prospective purchasers) <exhibit unreasonable fear> (if any crave redress of injustice, they should exhibit their petitions in the street—Shak) (he exhibited with peculiar pride two cream-colored mules—Cather) <a group of rectangular buildings, exhibiting the stark functionalism of a toy village—Marquand> One displays something when he spreads it out before the view of others or puts it in a position where it can be seen to advantage or with great clearness <the exhibition was criticized because many paintings were not properly displayed> <the male makes a play for the female . . . by strutting before her, displaying his accomplishments, his prowess, his charms—Edmund Wilson> One exposes something when he brings it out of hiding or concealment or from under cover and shows, exhibits, or displays it consciously or unconsciously. The term sometimes means little more than to exhibit or display <he . . . looked me over as if I had been exposed for sale—Conrad> <the tide was low and the mudbanks were exposed and reeking—Cheever> Often it means to reveal publicly something and especially something disagreeable that has been or should be concealed <afraid to expose his ignorance by asking questions> (it was my duty to leave no stone unturned to discover and expose the awful truth—Rose Macaulay) Frequently it carries the additional implication of unmasking (it was . . . his friends . . . that he attacks in this terrible story of the passing stranger who took such a vitriolic joy in exposing their pretensions and their hypocrisy—Brooks)

One parades something by displaying it ostentatiously or arrogantly <smugly parading his honesty> <I can’t believe that God wants the strong to parade their strength—Hellman> <he is a writer who does not raise his voice. He avoids emphasis. His finest phrases . . . are tucked away, not paraded—J. M. Brown> Sometimes the term implies not merely ostentation or arrogance but an intent to deceive or mislead <parades her love for her husband only because she actually did not love him—Parshley> <speaking with open contempt of mature persons who paraded their deference to the wishes of a father—Krutich>

One flaunts something when one parades it shamelessly, often boastfully, and offensively <they flaunt their conjugal felicity in one’s face—Wilde> <ye vaunted your fathomless power, and ye flaunted your iron pride—Kipling> <over this was an unbelievable flaunting of opulence—Hervey>

Ana *indicate, betoken, attest, bespeak, argue, prove: intimate, hint, *suggest

Ant disguise

Show n *exhibition, exhibit, exposition, fair

Showy, pretentious, ostentatious can mean making or presenting an outward display that is by implication greater than what is necessary or justifiable. Showy, the ordinary term, carries less definite implications than the other words. It implies an imposing, striking, or impressive appearance, but it often suggests cheapness, inferiority, or poor taste <showy brass ware—Shaw> <showy furniture> <showy decorations> or undue conspicuousness or gaudiness <a showy wallpaper design> <showy peonies> or overattention to superficial qualities <the showy talents, in which the present age prides itself—Newman> Pretentious (see also AMBITIOUS 2) suggests even less warrant for display, for it usually implies an appearance that is not justified by the thing’s actual value or actual cost or by the person’s actual worth, rank, performance, or capability; the term therefore implies a criticism of whatever is described <I’d rather you didn’t call me “sir” . . . it might give rise to the idea that I had asked you to . . . It might appear rather pretentious—Mackenzie> <his sense of character is nil, and he is as pretentious as a rich whore, as sentimental as a lollipop—Mailer> (a brilliant sham, which, like a badly built and pretentious house, looks poor and shabby after a few years—Cather)

Ostentatious stresses vainglorious display or parade but it does not necessarily imply either showiness or pretentiousness <ostentatious public charities—Wilde> <the ostentatious simplicity of their dress—Macaulay> <thought their cortège ostentatious . . . slaves marching ahead with drums, porters bearing food and . . . gifts, and an armed escort—Hervey>

Ana *gaudy, tawdry, garish, flashy, meretricious: splendid, gorgeous (see SPLENDID): opulent, sumptuous, *luxurious

Shrew scold, vixen, termagant, *virago, amazon

Shrewd, sagacious, perspicacious, astute can all mean acute in perception and sound in judgment, especially in reference to practical affairs. Shrewd implies native
cleverness, acumen, and an exceptional ability to see below the surface; it often also connotes hardheadedness
\(<\text{a shrewd bargain}\>\) \(<\text{a shrewd observer}\>\) \(<\text{a shrewd remark}\>\) \(<\text{the shrewd wisdom of an unlettered old woman}\>\) \(<\text{Pater}\>\) \(<\text{the hard mind of a shrewd small-town boy, the kind of boy who knows you have a real cigar only when you are the biggest man in town—\text{Mailer}}\>\) \(<\text{she had had a mania for buying and selling land, and was a shrewd judge of values—\text{Wolfe}}\>\) \(<\text{Sagacious}\>\) \(<\text{Perspicacious}\>\)

Perspicacious is usually applied to persons or their decisions, their judgments, and their methods of pursuing their ends; it stresses penetration, discernment, judiciousness, and often, farsightened \(<\text{the auctioneer, a small sagacious individual . . . , was directing his two blue-jowled assistants in the business of displaying to their best advantage the remaining pieces—\text{Wylie}}\>\) \(<\text{he left an estate of approximately $172,000, accumulated through sagacious investments—\text{Dillard}}\>\)

|[sigh, sob] |[moan, groan] |[sigh implies a deep audible respiration that is a usually involuntary expression of grief, intense longing, regret, discouragement, weariness, or boredom][sigh no more, ladies, sigh no more, men were deceivers ever—Shak.][A sigh uttered from the fullness of the heart—Hazlitt][The stranger sometimes seemed to be under stress, sighed much and muttered inaudibly to himself—Malamud.][Sigh] implies a sound made by a convulsive catching of the breath when weeping or when both speaking and crying or when trying to restrain tears; the noun, however, more often refers solely to this sound and does not use the verb, which often implies accompanying tears and speech (“Ah!” It was a long, grieving sound, like a sigh—almost like a sob—Dickens)[The mother...][knelt by his side, and they prayed, and their joint sobs shook their bodies, but neither of them shed many tears—Meredith][She sobbed out her story (like a child sobbing itself to sleep) Moan] implies a low, prolonged, usually inarticulate sound, especially one that is indicative of intense suffering of mind or body (they are quick to hear the moans of immemorial grief—Blunden)[Polly moaned, overwhelmed with retrospective shame and embarrassment—Huxley][To hear the piteous moan that Rutland made—Shak.][The term, however, is often extended to sounds suggestive of pain, complaint, or murmuring (the moan of the wind) (the moan of doves in immemorial elms—Tennyson) (the rain and the wind splashed and gurgled and moaneded round the house—Kipling)[Groan] implies a heavier sound than moan and more often suggests an unbearable weight of suffering or a strong spirit of rebellionness to pain or discomfort (thy groans did make wolves howl—Shak.)(The whole creation groaneth and travaileth in pain together until now—Rom 8:22)[Often however, in extended use the term carries no hint of suffering but implies noises made in strong disapproval or in pretended suffering (greet a speaker with groans or by something that moves or swings heavily (trees groaning in the wind) (the door upon its hinges groans—Keats)](The groan under the floorboard had changed to a scream—it shrieked)[Ana] [sigh out][moan, sob (see under sigh vb)Ana][sigh][regret, *sorrow, grief][sigh][look, view, glance, glimpse, peep, peekAna][sigh][prospect, outlook: vision, *revelation][sigh][blind, purblind][sigh][1 Sign, mark, token, badge, note, symptom can denote a sensible and usually visible indication by means of which something not outwardly apparent or obvious is made known or revealed. Sign is the most comprehensive of these terms, being referable to a symbol (see also CHARACTER 1) or a symbolic device or act (the mace is the sign of authority) (make the sign of the cross) or to a visible or sensible manifestation of a mood, a mental or physical state, or a quality of character (good manners are signs of good breeding) (they are gestures of exclusion—not snobbery, merely signs of a private life with all its unique standards—Fadiman). Suicide is the sign of failure, misery, and despair—Ellis) or to a trace or vestige of someone or something (the signs of her fate in a footprint here, a broken twig there, a trinket dropped by the way—Conrad) or to objective evidence that serves as a presage or foretoken (signs of an early spring) (there are signs that poetry is beginning to occupy itself again with the possibilities of sound—Day Lewis) (two men that night watched for a sign, listened for a wonder—Gwyn Jones) and concretely to a placard, board, tablet, or card that serves to identify, announce, or direct (watch for a road sign) (a brilliantly lighted bar sign) (did you see the sign announcing the new play?) (“for rent” signs in the dingy windows)[Mark (see also CHARACTER 1) may be preferred to sign when the distinguishing or revealing indication is thought of as something impressed upon a thing or inherently characteristic of it, often in contrast to something outwardly apparent or displayed (the bitter experience left its mark on him) (courtesy is the mark of a gentleman) (the distinguishing marks of Victorian poetry) (what, then, are the marks of culture and efficiency?—Suzallo) (the unrealized schemes of [the] past... have usually left their mark in the shape of some unfinished pier, half completed parade—Angus Wilson)[Concretely also mark is applied either (1) to some visible trace (as a scar or a stain or a track) left upon a thing (birthmark) (the marks of smallpox) (the high-water mark is observable on the pier's supports) (the marks of an army's passage) (they found not a button, or feather, or mark, by which they could tell that they stood on the ground where the Baker had met with the Snark—Lewis Carroll) or (2) to something that is affixed in order to distinguish, identify, or label a particular thing or to indicate its ownership (a trademark) (a laundry mark) Token (see also PLEDGE) can replace sign and also mark except in their specific concrete applications when the sensible indication serves as a proof of or is given as evidence of the actual existence of something that has no physical existence (how could he doubt her love when he had had so many tokens of her affection?) (the savages bore gifts as tokens of their desire for peace and friendship) (tokens tossed his way—an occasional salute, a “well done” for the prefigliths...)[sagas smile—were hoarded fervently—Pynchon)[Badge designates a piece of metal or a ribbon carrying an inscription or emblem and worn upon the person as a token of one’s membership in a society or as a sign of one’s office, employment, or function (a policeman’s badge) (each delegate wore a badge) (a gold key is the badge of Kappa Alpha) (in every use badge often is employed in place of sign, mark, or token when it is thought of in reference to a class, a group, a category of persons, or as a distinctive feature of their dress, their appearance, or their character (for suffering is the badge of all our tribe—Shak.) (essentially we were taught to regard culture as a veneer, a badge of class distinction—Malcolm Cowley) (the diplomat wearing his badge of office, the Homburg—Siler)[Note usually means a distinguishing or dominant mark or characteristic; it differs from mark, its closest synonym, in suggesting something emitted or given out by a thing, rather than something impressed upon that thing (a fertile oasis possesses a characteristic color scheme of its own...)[The fundamental note is struck by the palms—Huxley] (you walk on stage... and somehow you’re alive, and inside the part, and yet you’re projecting a peculiar note, your own—Wouk) (the note of sadness... which... poems were to find so much more to their taste than the note of gladness—Henry Adams) Note may be used in place of mark for a characteristic that seems to emanate from a thing that strikes one as true or authentic and therefore is the test of a similar thing’s truth, genuineness, or authoritativeness (the grand manner that is the note of great poetry)]

**sing** vb *Sing, troll, carol, descant, warble, trill, hymn, chant, intone all mean to produce musical tones by or as if by means of the voice. Sing is the general term used of human beings and of animals and things that produce musical or sustained tones. In its primary application to human beings it usually implies utterance in words with musical inflections or modulations and often suggests such modulated utterance as an art to be practiced, studied, or learned <sing an aria> <sing the part of Faust> <sing a plaintive song> <she studied singing diligently but lacked the voice to profit from instruction> <grasshoppers chirping, and birds singing—Shaw> <the rigging sang in the wind> Troll usually suggests the use of full round tones in singing <while mountains were unloosing their hair to the music waterfalls trolled like bells for the wedding—Babette Deutsch> and is especially applicable to the hearty voices of jovial men raised in singing or the resounding celebration in song of great events or deeds <let us be jocund. Will you troll the catch you taught me but whiere?—Shak> <strange adventure that we’re trolling: modest maid and gallant groom—Gilbert> Carol suggests the voices of youthful, lively, or joyous singers, usually of persons, sometimes of birds; it may or may not suggest the singing of carols, but it often implies merriment or effortlessness and spontaneity <used to carol cheerfully in the morning, locked in the single bathroom—Canby> <a wren on a tree stump caroled clear—Masefield> Descant (see also **DISCOURSE**) implies part singing or, especially, the singing of a higher part in harmony with the plainsong of the tenor in a contrapuntal treatment. Descant often merely implies harmonious singing or singing in harmony with <they will . . . sing so sweetly, and withall descant it so finely and tunably—Topsell> <a device by which several singers appear to be descanting, when in fact only one is doing so—Grove’s Dict. of Music> Warble frequently implies singing in a soft and gentle voice but with various modulations (as turns and trills and quavers); often it means no more than to sing melodiously or with sweetness <warble his native woodnotes wild—Milton> <the skylark warbles high his trembling thrilling ecstasy—Gray> Trill basically means to sing with trills or vibrations (as by rapidly alternating two notes a degree apart) <trill like a canary> but it is often extended to refer to the making of sounds involving vibration without much thought of musical quality <with a shrill trilling from the countless leaves in between gusts of wind—Idriess> <rilled his soup into his mouth with a swift sucking vibration—The Use of English> <could hear the noise of a telephone trilling—James Heilvick> Hymn implies a lifting of the voice in some sort of worship or praise, especially of God <evening by evening, as they came to the setting sun, they hymned Father, Son, and Holy Ghost—Pusey> <the thrush concerting with the lark that hymned on high—Pollok> Chant may mean little more than sing, but often it is used specifically to imply the method of singing adopted by priests or choristers singing unmetrical verse where the emphasis is upon musical recitation of phrases, measured even tones, and a reverential spirit. Intone also comes very close to the specific sense of chant in meaning but sometimes carries a stronger connotation of reciting in sustained monotone <the Psalms were chanted> <the priest intoned the Gospel of the Mass> <I joined with choirs of monks, intoning their deep sonorous dirges—L. P. Smith> <they would take hands and ring-a-rosy about him, chanting at the tops of their voices, until good humor was restored—Mary Austin>

**singe** see, *burn, scorch, char

**single** adj 1 *unmarried, celibate, virgin, maiden

2 Single, sole, unique, lone, solitary, separate, particular can all mean one as distinguished from two or more or all others. Something single is not accompanied or supported by, or combined or united with, another <a single instance may be cited> <the strength of the lyric lies in
single

741

sinister

the complete statement of a single selected facet of experience—Day Lewis> (that was the greatest single thing that had ever happened to her. No one had ever looked at her and made a respectful gesture before—Theodore Sturgeon) Something sole is the only one that exists, that acts, that has power or relevance, or that is to be or should be considered (he is the sole heir) (this is his sole invention) (your conscience must be the sole judge in this case) (acquire the sole rights of publication) (his sole object was to study the form of his sitter's head in every detail—Alexander) (California is not the sole repository of political virtue in the United States—Armbister) Something unique (see also strange) may be the only one of its kind in existence (the medal is unique, for no duplicates were made) (of the world's geniuses he strikes me as being unique—Mailer) or it may stand alone because of its unusual character (the unique character of the English conquest of Britain—Malone) (they stand alone, unique, objects of supreme interest—Osborne) Something lone (see also alone) is not only single but also separated or isolated from others of its kind; the word often replaces single to note a point contrast (to sit beneath a slip lone beechen tree—Keats) (the ambitious Aaron Burr, who played a lone hand against the field—Parrington) (constitutes the lone industry of the community—Amer. Guide Series: Vts.) Something solitary (see also alone) stands by itself, either as the sole instance or as a unique thing (her world was the Church, in which she hoped that her solitary child would some day be a polished pillar—Buchan) (began to eat again fiercely, like a great strong animal, tackling the solitary meal of its day—O'Flaherty) Something separate (see also distinct 1) is not only single, but disconnected from or unconnected with any of the others in question (turning over in his thoughts every separate second of their hours together—Wharton) (group consciousness . . . makes the individual think lightly of his own separate interests—Cohen) Something particular (see also special; circumstantial; nice 1) is the single or numerically distinct instance, member, or example of the whole or the class considered or under consideration (a special provision for a known and particular territory—Taney) (Richard . . . replied that he had an engagement at a particular hour, up to which he was her servant—Meredith) (reality is a succession of concrete and particular situations—Huxley) Ana individual, particular, *special, especial, specific Ant accompanied; supported: conjugal single vb prefer, *choose, select, elect, opt, pick, cull Ana *take, seize, grasp: grab: accept, *receive, admit: *decide, determine, settle singular *strange, unique, peculiar, eccentric, erratic, odd, queer, quaint, outlandish, curious Ana *different, diverse, divergent, disparate: *exceptional: *abnormal, atypical, aberrant Con ordinary, *common, familiar: *usual, customary, habitual sinister, baleful, malign, malefic, maleficient all mean seriously threatening, portending, or promising evil or disaster, usually imminent or already initiated evil or disaster. Sinister is the most commonly employed of these words and the widest in its range of reference. It may be applied not only to something perceptible (a sinister cloud) (a sinister look) but to something imperceptible (a sinister influence) (a sinister intention). In either case sinister often expresses a judgment based on experience or on an interpretation of outward signs and implies on the part of the observer a resulting fear or apprehension of approaching evil or of lurking dangers; thus, a cloud is describable as sinister when it has the color, shape, or general character of one that the observer believes to precede a tornado; a person's influence may be interpreted as sinister when it is judged in the light of some of its visible effects (she was about half a mile from her residence when she beheld a sinister redness arising from a ravine a little way in advance—Hardy) (some of the customers did look sinister enough—scar-faced thugs in ragged caps—Wouk) (I did not wish him to know that I had suspected him of harboring any sinister designs—Hudson) Sinister is also applied to something that works or operates so covertly, insidiously, or obliquely that it is likely to find those whose well-being it threatens off guard (a sinister disease) (a sinister policy) (the sinister power exercised . . . by the combination in keeping rivals out of the business and ruining those who already were in—Justice Holmes) Baleful carries an even stronger suggestion of menace than sinister for it implies inevitable suffering, misery, or destruction; often it implies perverseness, noxiousness, or hellishness to the thing so described. It is applicable to something that works openly and without indirection (this dread power . . . can be made a giant help to humanity but science does not know how to prevent its baleful use—Baruch) as well as to something that works occultly or obliquely (deceit contrived by art and baleful sorcery—Shak.) (culling their potent herbs and baleful drugs—Milton) (the baleful power of fanaticisms and superstitions—Edmund Wilson) (the baleful horoscope of Abdallah had predicted the downfall of Granada—Prescott) Malign (see also malicious) carries over from its earliest sense a suggestion of an inherently evil or harmful tendency or disposition, even though the term in this sense is characteristically applied to inanimate things (as appearances, aspects, forces, or influences) rather than to persons (the eyes were no longer merely luminous points; they looked into his own with a meaning, a malign significance—Bierce) (believe that lions will only kill humans under a malign human influence—Wyatt) It also carries connotations (as of boding evil or disaster) derived from its reference in astrology to the aspects or the influences of the stars (a struggle between two forces, the one beneficent, the other malign—Bryce) (the spirit of competition, which, according to Rousseau, was one of the earliest of the malign fruits of awakening intelligence—Grandgent) (dense masses of smoke hung amid the darting snakes of fire, and a red malign light was on the neighboring leafage—Meredith) and occasionally suggests a force or power contributory to boded disaster (the prickly topic of symbolism, with its malign power to set the wise by the ears—Montague) Malefic and maleficient carry a stronger suggestion of balefulness than does malign, for both regularly imply not only a tendency toward but an active force productive of evil or disaster; thus, a malign influence bodes disaster; a malefic or maleficient influence is putting the threat of disaster into effect (the malefic arts of sorcery, witchcraft, and diabolism) (conjunctions for the expulsion of malefic demons—Norman Douglas) (Saturn . . . represents malefic force. Cold, hostile, merciless . . . he blights all that he gazes on—Evangeline Adams) (like everything that has outlived its usefulness nationalistic has changed from a beneficent force into a maleficient force—C. K. Street) (at times his maleficient power burst open the peak, sent fire through the jagged holes, and destroyed villages—Dickens) Ana *ominous, portentous, fateful, unpromising, insidious: *secret, covert, furtive, underhand, under-

2 *state, condition, mode, posture, status
Ana *junction, pass, crisis, exigency, emergency: *predicament, plight, quandary, dilemma: case, *instance

size n Size, dimensions, area, extent, magnitude, volume

are here compared primarily as terms meaning the amount of space occupied or sometimes of time or energy used by a thing and determinable by measuring. Size usually refers to things having length, width, and depth or height; it need not imply accurate mathematical measurements but may suggest a mere estimate of these <the size of this box is 10 inches long, 8 inches wide, and 5 inches deep> <these trees are not the right size> <what is the size of the room?> <that exceptional mushroom, skull-like in its proportions and bold in size—Molier>

Size is also referable to things which cannot be measured in themselves, but can be computed in terms of the number of individuals which comprise them or the amount of space occupied by those individuals <the mere complexity and size of a modern state is against the identification of the man with the citizen—Dickinson> Since dimension means measurement in a single direction (as the line of length, or breadth, or depth) the plural dimensions, used collectively, is a close synonym of size: in contrast, however, it usually implies accurate measurements that are known or specified <the window frames must be exactly alike in dimensions> <the dimensions of the universe are not calculable> <the dimensions of the lot are 75 by 100 feet> <no reliable calipers exist long enough to stretch into the next century and measure the dimensions of greatness—Fadiman>

Area is referable only to things measurable in the two dimensions length and breadth. It is used of plane figures or of plane surfaces (as the ground, a floor, or an arena) and is computed in square measure <the estate is 200 acres in area> <the forest fire covered an area of ten square miles> <the area of a rectangle is computed by multiplying its length by its breadth> <the major areas of the world are in the throes of revolutionary social change—Geismar>

Extent is referable chiefly to things that are measured in one dimension; it may be the length or the breadth, but it is usually thought of as the length <the driveway's extent is 100 feet> <the wings of the airplane are 75 feet in extent> However it is often used as though it were the equivalent of area <the base- ment of St. Katherine's Dock House is vast in extent and confusing in its plan—Conrad> <the reports . . . constantly express amazement at the extent and severity of Russian attacks and counterattacks—Shirer>

The word is also referable to measured time or to space measured in terms of time; thus, the duration of a thing is the extent of its existence <few lives reach the extent of one hundred years> <Germany was . . . a nine days' march from north to south, and of incalculable extent from west to east—Buchan>

Magnitude, largely a mathematical and technical term, may be used in reference to size or two-dimensional extent <a queer little isolated point in time, with no magnitude, but only position—Rose Macaulay> It may be used also in reference to something measurable whose exact quantity, extent, or degree may be expressed in mathematical figures; thus, the magnitude of a star is indicated by a number that expresses its relative brightness <an alpha particle bearing a positive charge equal in magnitude to twice the electron charge—Darrow> <the magnitude of the structure as a whole and the massive nature of its details are never obtrusive—O. S. Nock>

Volume (see also BULK) is also a technical term; it is used in reference to something that can be measured or considered in terms of cubic measurements; thus, the volume of a solid cylinder is equal to the cubic measure of air it displaces, and that of a hollow one, to the cubic measure of its capacity; two objects that are equal in volume may differ greatly in weight; when a thing expands, it increases in volume <we could readily store a million times as many stars in the present volume of the system—B. J. Bok> <you may say that the waves . . . are not like real waves; but they move, they have force and volume—Binyon>

Ana amplitude, *expansive, spread, stretch: *bulk, mass, volume

skedaddle *scuttle, scurry, scamper, sprint

Ana flea, fly, *escape, decamp: retreat, *recede: withdraw, retire (see GO)
skeleton *structure, anatomy, framework

skepticism *uncertainty, doubt, dubiety, mistrust

sketch n 1 outline, diagram, delineation, draft, tracing, plot, blueprint (see under SKETCH vb)
Ana design, plot, *plan, scheme, project: *chart, map
2 précis, aperçu, *compendium, syllabus, digest, pandect, survey

sketch vb Sketch, outline, diagram, delineate, draft, trace, plot, blueprint are comparable when they mean to present or to represent something by or as if by drawing its lines or its features. The same distinctions in implications and connotations are observable in the corresponding nouns sketch, outline, diagram, delineation, draft, tracing, plot, blueprint. Sketch may imply a drawing, a painting, a model, or a verbal presentation (as in a description or exposition) of the main lines, features, or points with the result that a clear, often a vivid, but not a detailed impression or conception of the whole is given <then, in a calm historian's tone, he proceeded to sketch . . . some pictures of the corruption which was rife abroad—Joyce> <this lecture is a humble attempt to sketch out a metaphysics of natural science—Inge> <a sculptor's sketch of his design for a memorial> <in some of Miss Jewett's earlier books . . . one can find first sketches, first impressions, which later crystallized into almost flawless examples of literary art—Cather>

Outline (compare outline n 1) differs from sketch in suggesting emphasis upon the contours of a thing that is represented or the main points of a thing expounded and in implying more or less inattention to the details which fill up, amplify, or particularize; the term therefore usually implies a more rigid selection and greater economy in treatment and less consideration for qualities which give pleasure than sketch implies and, often, suggests a presentation of a thing as a simplified whole <outlining a plan for a future investigation—Conant> <the detailed study of history should be supplemented by brilliant outlines, even if they contained questionable generalizations—Russell> <the gist of these books was preserved in a series of small outlines—Southern>

Diagram implies presentation by means of a graphic design (as a mechanical drawing, a pattern showing arrangement and distribution of parts,
or a chart, map, or graph) of something which requires explanation rather than representation or portrayal. The nervous system (diagram) his route on the table—Cather (spread out on the table a number of maps and aerial photographs that diagrammed what the Authority is up to—Robert Rice (there was little or no desire to amend the comprehensive diagram of constitutional theory—Times Lit. Sup.) Delinate and delineation come close to describe and description and depict and depiction. Though they carry a strong implication of drawing a thing so as to show its lines or features with great distinctness, they tend to stress amplifying details and therefore often imply greater fullness or richness in treatment than the preceding words (his brush did its work with a steady and sure stroke that indicated command of his materials. He could delineate whatever he elected with technical skill—Jefferies) (the cult of beauty and the delineation of ugliness are not in natural opposition—Pound (he had a capacity for delineating emotions he had never felt—Edman) Draft, especially as a verb, implies accurate drawing to scale, especially of an architect's plan for a building to be constructed or of a design (as for a ship, a machine, or an engine) (young architects usually spend their first years in drafting plans rather than in designing buildings) The term may apply to the drawing up of a preliminary statement which when corrected, polished, and copied will serve as a final statement (draft me a proper letter to send him—Shaw) (I have three or four drafts of each essay or chapter that I have written, and ... all of them run to about twice the length of the finished piece—Geismar) (the legislature did pass a measure ... yet the controls were suggested—some insist drafted—by the industry itself—Armbister) Trace and tracing in their perhaps most common use refer to redrawing an existing design by following its lines as seen through a superimposed transparent sheet, but they can also apply when a precise and detailed pattern is to be formed by or as if by drawing. The terms are more likely to suggest accuracy in or as if in following or sometimes shakiness resulting from or as if from following a continuous line than they are to imply anything about the qualities of what is to be traced (trace an outline to be colored with crayons) (make a tracing of a diagram) (continuous blood pressure tracings have been recorded—Armstrong) (time was tracing purple reminders on his nose and cheeks—Costain) (Kurler swore, a palsied, tottering sound, and traced his name, a shaking, wandering line—Lowell) (with my eyes I traced the line of the horizon, thin and fine, straight around till I was come back to where I'd started from—Millay) (his fumbling brain had traced the braille of an enduring and bitter truth—Hervey) Plot is often used in place of diagram or draft or, less often, sketch when a map, chart, or graph rather than a design is implied; distinctively it throws emphasis upon the indicating of specific locations (as points, areas, sections, or objectives) so that their relation to each other or the whole is clear; thus, one who diagrammatically represents the condition of business during a given year by means of a graph is said to plot a graph or to make a plot of the course of business (plot the course of a hurricane) (plot ... the exact position of the ship—Heaton) Blueprint, from its common application to a photograph in white lines on blue paper of a draftsman's mechanical drawing or of an architect's plan, in extended use implies precise and detailed sketching or delineation; it suggests not the act of drawing or drawing up but the effect produced by what is drawn or drawn up (people engaged in the amusing and innocuous pastime of blueprinting a new social order—The Commonweal) (the political leaders of the two coun-

or a chart, map, or graph) of something which requires explanation rather than representation or portrayal. The nervous system (diagram) his route on the table—Cather (spread out on the table a number of maps and aerial photographs that diagrammed what the Authority is up to—Robert Rice (there was little or no desire to amend the comprehensive diagram of constitutional theory—Times Lit. Sup.) Delinate and delineation come close to describe and description and depict and depiction. Though they carry a strong implication of drawing a thing so as to show its lines or features with great distinctness, they tend to stress amplifying details and therefore often imply greater fullness or richness in treatment than the preceding words (his brush did its work with a steady and sure stroke that indicated command of his materials. He could delineate whatever he elected with technical skill—Jefferies) (the cult of beauty and the delineation of ugliness are not in natural opposition—Pound (he had a capacity for delineating emotions he had never felt—Edman) Draft, especially as a verb, implies accurate drawing to scale, especially of an architect's plan for a building to be constructed or of a design (as for a ship, a machine, or an engine) (young architects usually spend their first years in drafting plans rather than in designing buildings) The term may apply to the drawing up of a preliminary statement which when corrected, polished, and copied will serve as a final statement (draft me a proper letter to send him—Shaw) (I have three or four drafts of each essay or chapter that I have written, and ... all of them run to about twice the length of the finished piece—Geismar) (the legislature did pass a measure ... yet the controls were suggested—some insist drafted—by the industry itself—Armbister) Trace and tracing in their perhaps most common use refer to redrawing an existing design by following its lines as seen through a superimposed transparent sheet, but they can also apply when a precise and detailed pattern is to be formed by or as if by drawing. The terms are more likely to suggest accuracy in or as if in following or sometimes shakiness resulting from or as if from following a continuous line than they are to imply anything about the qualities of what is to be traced (trace an outline to be colored with crayons) (make a tracing of a diagram) (continuous blood pressure tracings have been recorded—Armstrong) (time was tracing purple reminders on his nose and cheeks—Costain) (Kurler swore, a palsied, tottering sound, and traced his name, a shaking, wandering line—Lowell) (with my eyes I traced the line of the horizon, thin and fine, straight around till I was come back to where I'd started from—Millay) (his fumbling brain had traced the braille of an enduring and bitter truth—Hervey) Plot is often used in place of diagram or draft or, less often, sketch when a map, chart, or graph rather than a design is implied; distinctively it throws emphasis upon the indicating of specific locations (as points, areas, sections, or objectives) so that their relation to each other or the whole is clear; thus, one who diagrammatically represents the condition of business during a given year by means of a graph is said to plot a graph or to make a plot of the course of business (plot ... the exact position of the ship—Heaton) Blueprint, from its common application to a photograph in white lines on blue paper of a draftsman's mechanical drawing or of an architect's plan, in extended use implies precise and detailed sketching or delineation; it suggests not the act of drawing or drawing up but the effect produced by what is drawn or drawn up (people engaged in the amusing and innocuous pastime of blueprinting a new social order—The Commonweal) (the political leaders of the two coun-

tries are guided by the same political blueprints—Bevan) Ana design, plot, plan, scheme, project (see under PLAN n): chart, map, graph (see under CHART n) skewbald *variegated, parti-colored, motley, checkered, checked, pied, piebald, dappled, freaked skid vb *slide, slip, glide, glissade, slither, coast, toboggan skill *art, cunning, craft, artifice Ana profiency, adeptness, expertness (see corresponding adjectives at PROFICIENT): efficiency, effectiveness (see corresponding adjectives at EFFECTIVE): *readiness, facility, dexterity, ease skilled skillful, *proficient, adept, expert, masterly Ana apt, ready, *quick, prompt: practiced, exercised, drilled (see PRACTICE vb): competent, qualified, *able, capable Ant unskilled skillful proficient, adept, expert, skilled, masterly Ana *dexterous, adroit, deft: efficient, *effective: *conversant, versed Ant unskillful—Con *awkward, clumsy, inept, mala-
droit, gauchy skim 1 float, *fly, dart, scud, shoot, sail 2 *brush, graze, glance, shave Ana *slide, glide, slip, slither: float, scud, shoot, sail, dart, *fly: *flit, hover skimpy scrimpy, exiguous, *meager, scanty, scant, spare, sparse skin n Skin, hide, pelt, rind, bark, peel can all denote an outer removable coat which adheres to and protects the inner tissues of a body or organism. Skin, the most general term, applies especially to the outer covering of animals, whether it is as delicate as the one which covers the human body or as tough as the one which covers a rhinoceros; it is used also of the outer coverings of various fruits, plants, and seeds especially when they are thin and tight (the skin of an apple) (the skin of an almond) Skin applies to this integument whether it covers the living organism or has been stripped from it. Hide applies to the tough skin of large animals (as the rhinoceros or the horse); in commercial use it is applied specifically to the raw or undressed skins of cattle, horses, and other large animals, sometimes in distinction from those of calves, sheep, and goats, which are commonly described merely as skins. Pelt is applied chiefly to the skin of an animal that is covered with hair, fur, or wool; in commerce it usually denotes an undressed skin of any of these animals and especially of a furred animal. It is applied also to the skin of a sheep or goat stripped of wool or hair and ready for tanning. Rind applies chiefly to the thick, tough, and often inelastic outer layer which covers certain fruits (as oranges and melons) or the stems and roots of some woody perennial plants (then usually called bark). The hardened skin on smoked meats (as bacon) and the hardened crust of molded cheeses are also called rinds. A skin or rind of a fruit or a portion of it that is or may be stripped free is called peel (slip on a banana peel) (can-
died orange peel) skiv vb Skin, decorticate, peel, pare, flay can mean to divest something of its skin or thin outer covering. Skin is the most general of these terms, being applicable to any animal as well as to any plant or plant part that is covered by or as if by a skin (skin calves slaughtered for the market) (do not skin, but wash the eggplants in iced water—Dione Lucas) (skin the bark off a birch tree) Decorticate is applicable when an outer layer (as of bark, fiber, or husk) is to be removed by stripping (obviated the necessity of fully decorticating the canna stalks—Edward Samuel) (the decorticated seeds are crushed and pressed—Riegel) Peel and pare are fre-

vb

Skip, bound, hop, curvet, lope, lollipop, ricochet can all mean to move or advance with successive springs or leaps. The first three words are commonly referable to persons or animals but they may be used in reference to inanimate things. Skip suggests quick, light, graceful movement and a continuous alternation of touching a surface and springing clear of it; often also when referred to living creatures it connotes sportiveness or excess of animal spirits (wanting as a child, skipping—Shak.)

Small yachts skipped here and there—Villiers

Bound (see also JUMP) implies longer and more vigorous springs than skip and carries a stronger suggestion of elasticity and buoyancy of spirit (like a roe I bounded o'er the mountains—Wordsworth)

I saw her bounding down the rocky slope like some wild, agile creature—Hudson

The ball struck the earth and bounded across the field—Dorothy Canfield

Curvet may suggest a leap of a horse in which he raises both forelegs at once and as they are in reference to children it suggests a jumping on one foot only (chalked out a hop-step) whereas a true hop suggests a less flowing or springy movement than hop and usually implies a gradual slant (a mountainous road)—Auchincloss

Curvet may be applied largely to persons often in threats or in descriptions of torture or of cruel punishment (as scourging) (he said he would flay the man alive if he again caught him prowling around) (they killed and flayed a number of slaves and captives—Cook)

Campaign pledge to ban the medieval practice of flaying unruled convicts—Time

The son and his mother flay one another with their words—Fowlie

Ricochet is referable almost exclusively to things which are thrown, shot, or cast. It suggests a skipping caused by a series of glancing rebounds after the object first strikes a surface (the smaller the angle, under which a shot is made to ricochet, the longer it will preserve its force and have effect—Spearman) (fretting as her husband ricocheted from job to job—E. W. Pike) Our minds ricochet from the race problem to the housing problem, from the problem of foreign trade to the problem of displaced persons—C. W. Ferguson

**slant**

vb Slant, slope, incline, lean are comparable when they mean to diverge or cause to diverge from a vertical or horizontal line. Slant carries the sharpest and clearest implication of such divergence of any of these terms but it carries no explicit implication of how great or how little the divergence is; consequently it is accepted generally as the comprehensive term implying a noticeable physical divergence (the Tibetans are of Mongol race, but their eyes slant less than those of the Japanese or Chinese—Harrier) (lines of gray, plunging tropic rain slanted across the whole world—Beebe)

One side of his body seemed to slant towards the other, he settled so much more heavily upon one foot—M. E. Freeman

Slope is often used interchangeably with slant, but it is especially likely to be chosen when the reference is to a surface like the side of an elevation (as a hill or a roof) and there is an intent to suggest a gradual divergence from a vertical or horizontal line; thus, "the ground slopes to the left" usually suggests a lack of steepness; "a sloping roof," unless qualified by such adverbs as sharply or steeply, usually implies a gradual slant (the road slopes downward from this point) (enjoyed their wide sloping lawns with the sprinklers idly turning—Auchincloss) (wooded valleys and rolling hills slope away to the horizon—Amer. Guide Series: Pa.)

Incline (see also INCLINE 2) carries a stronger implication of bending or tipping or of being bent or tipped; it is therefore
especially appropriate not only when human or similar agency is implied but when what is bent or tipped is an immaterial thing (as one’s will, one’s thoughts, or one’s intentions) <just as the twig is bent, the tree’s inclined—Pope> (inclined his head to the right > the garden terraces incline to the south) <there is another theory to which the late Professor Freeman inclined (if so sturdy a figure could be said to incline)—Quiller-Couch> Lean differs from incline in carrying either a stronger implication of a definite directing of the inclination by a human agent or by some shaping or molding force <the old man leaned the mast . . . against the wall—Hemingway> <olive trees leaning from the hillsides, twisted by the sun—Davenport> <without looking up at him she leaned towards him—Marsh> or of a resting or an intent to rest either literally or figuratively against a support <both items lean heavily on nostalgia, both bring happy memories of an era unfortunately ended—Cerf> <the others treated me gingerly, fearing to be classed as Bolsheviks by association. Naturally, I leaned toward those who leaned toward me—Dent> Ana veer, *swerve, deviate, diverge slant n *point of view, viewpoint, standpoint, angle Ana attitude, *position, stand: bias, prejudice, *predestination slap vb *strike, hit, smite, punch, slug, slog, swat, clout, cuff, box slash vb slit, *cut, hew, chop, carve Ana rive, rend, cleave, split (see TEAR): penetrate, pierce, *enter slatternly, dowdy, frowzy, blowsy all mean deficient in neatness, freshness, or smartness, especially in dress or appearance. Slatternly stresses notions of slovenliness, untidiness, and sordidness <a small, slatternly looking craft, her hull and spars a dingy black, rigging all slack and bleached nearly white, and everything denoting an ill state of affairs aboard—Melville> <lived with them, in the slatternly apartment among the unwashed dishes in the sink and on the table, the odor of stale tobacco smoke, the dirty shirts and underwear piled in corners—Warren> Dowdy is likely to imply a complete lack of taste typically marked by a blend of something untidy, drab, or tawdry <her shoes were bought a long time ago and have no relation to the dress, and the belt of her dress has become untied and is hanging down. She looks clean and dowdy—Hellman> <surely . . . it was old-fashioned, dowdy, savored of moth-eaten furs, bugs, cameos and black-edged notepaper, to go ferreting into people’s pasts?—Woolf> <so dreadfully dowdy that she reminded one of a badly bound hymnbook—Wilde> Frowzy suggests a lazy lack of neatness, order, and cleanliness <a dummy, frowzy woman, clad in old dress and apron—Coutts> <theater packed, and just as dirty and frowzy as when I first entered it in the year 1903—Bennett> but frowzy also may apply to a natural and not unwholesome disorder <white spruce, and the frowzy, slender jack pine thrive on the high land—Rowlands> <a live oak, frowzy with dry Resurrection ferns that is the first rain startles to green life—M. S. Douglas> or it may suggest drab misery and squalor as an inevitable result of circumstances <a frowzy feeling, a mean, sleepy, stupid, fed-up, incomplete feeling—Jonas> <one may see women like this in poor districts are not quite anxious, not quite starved, but by circumstances reduced to a daily diet of frowzy economy—Swinnerton> <if a fully fed, presentably clothed, decently housed, fairly literate and cultivated and gently mannered family is not better than a half-starved, ragged, frowzy, overcrowded one, there is no meaning in words—Shaw> Blowsy implies dishervelment or disorder <her hair, so untidy, so blowsy—Austen> to which is often added a notion of crudity or coarseness or grossness <that blowsy hyoid of an America that existed when Grant was accounted a statesman and Longfellow an epic poet—Sinclair Lewis> <the pleasant but plebeian scent of Bouncing Bet, that somewhat blowsy pink of old English gardens—Peattie> Ana slovenly, unkempt, disheveled, sloppy, *slipshod Con *neat, tidy, trim, spick-and-span slaughter n *massacre, butchery, carnage, pogrom slavery *servitude, bondage slavish servile, menial, *subservient, obsequious Ana *mean, abject, ignoble, sordid: *tame, subdued, submissive: *miserable, wretched slay *kill, murder, assassinate, dispatch, execute sleazy *limp, flimsy, floppy, flaccid, flabby Ana *thin, tenuous, slight: *loose, slack sleek, slick, glossy, velvety, silken, silky, satiny are comparable when they mean having a smooth bright surface or appearance. sleek and slick are sometimes interchangeable with this meaning <dark slick leaves—Langley> <the sleek blue plums—Wylie> but more often sleek connotes a smoothness or brightness that is the result of close attention or is an indication, especially when the reference is to a person or animal, of being in excellent physical condition <let me have men about me that are fat: sleek-headed men and such as sleep o’ nights—Shak.> <a beautiful panther . . . so bright of eye, so sleek of coat—Thackeray> <the metal felt sleek and warm to his touch—Clioe> <a child’s mind thrills at the touch of fur because it is sleek—Montague> and it may also suggest a smoothness of finish resulting from overattention to or overrefinement in dress and appearance <curse me the sleek lords with their plumes and spurs—Lindsay> <something sleek about him, something that suggested a well-bred dog—Anderson> <the poise, assurance, and sophistication of all these sleek faces—Wolfe> Slick, by contrast, is more likely to apply when the intent is to suggest such an extreme of smoothness as to provide an unsafe or slippery surface <the grass was slick from the night’s dew, and the men slipped frequently—Mailer> In extended use slick is less likely than sleek to suggest desirable qualities and often carries more than a hint of contempt <as much a slick-surfaced commercial product as a serious piece of literary art—Gurko> <new hotels . . . so slick and shiny—Basso> <everything was to be slick, which was Marvin’s term of approbation; but not too slick, which was his abomination—Mary Austin> Glossy implies a surface that is exceedingly smooth and shining, whether by nature or by art <the glossy leaves of the beech tree> <downy peaches and the glossy plum—Dryden> <glossy as black rocks on a sunny day cased in ice—Dorothy Wordsworth> Velvety implies the extreme softness associated with the surface or appearance of velvet. The word is often used of things as they appeal to the sense of touch or of sight or of both <a velvety skin> <a velvety flower> <a land of velvety meadows and lush gardens—Mumford> <the velvety flanks of the cattle—Glasgow> but it is also applicable to sounds that caress the ear or to tastes or odors that are delightfully bland <even her high notes are velvety> <the boy reading in his queer, velvety bass voice—Galsworthy> Silken implies the smoothness and luster as well as the softness of silk <silken hair> <to what green altar . . . lead’st thou that heifer lowing at the skies, and all her silken flanks with garlands dressed—Keats> <the lazy movement of their bodies beneath their silken doekskins—O’Meara> The term is used in reference both to things that appeal to other senses than those of touch or sight and to imma-

terial things that are softly soothing and pleasant to the spirit or mind. A silken sonority of the strings—Virgil Thomson | silken words Silky is sometimes used in place of silken | fingers, silky and soft—Watts-Dunton | blue, silky October days—Glover | his eyes between his | silky lashes gone soft—Boyle | but when the reference is to persons or their voices, manners, or productions it, more often than silken, suggests an ingratiating or a speckish quality. | put his talent for writing silky satire to most profitable unliterary uses—Derwent May | Tchaikovsky's Meditation was no silky sipper of tone, but something that glowed inside—Cassidy | there have been many able varmints since, but none quite as silly or loathsome—Perelman | Satiny applies to | what is not only soft but smooth and shining | the satiny petals of a flower | beautiful women with satiny backs were moving through the crowd—Wolfe | Ana | *bright, lustrous, brilliant: smooth, even (see level). |

sleep vb | Sleep, slumber, drowse, doze, nap, catnap, snooze | mean to take rest by a suspension of consciousness. Sleep, the usual term, implies ordinarily the periodical repose of this sort in which men and animals recuperate their powers after activity, but it may imply such repose indulged in temporarily or at odd times.<br>

The young baby | sleep | most of the time | he sleeps | fitfully | they slept soundly all night | slept away his fatigue | sleep off the effects of an opiate | doped to make him sleep<br>

away | the hours of travel—Erviné | Sleep can also refer to a condition (as dormanty, indolence, or death) felt to resemble true sleep | the restless enmity of the Angevin never slept—Freeman | beneath those rugged elms . . the rude forefathers of the hamlet sleep—Gray | Slumber implies sleeping but it has acquired connotations that usually distinguish it from sleep.<br>

When applied to persons it usually means a sleeping quietly and easily | covered the sleeper with a blanket and the girl slumbered | peacefully to Buffalo—LaCassitt | hush, my dear, lie still and slumber! holy angels guard thy bed!—Watts<br>

In extended use it is likely to connote the repose of death and inactivity and suggest prolonged heavy sleep | that I may slumber in eternal sleep—Shak. | this New England of ours slumbered from the dawn of creation until the beginning of the seventeenth century—Coolidge | Drowse suggests a dull heavy condition of body and mind when one is falling asleep or is half asleep | sit drowsing by the fire | it is idle to pretend that a man lectures as well if half his audience are drowsing—Whitehead | In extension it implies a sluggishness that makes something move or act slowly.<br>

The villages that once drowsed in the sun about the placid center squares—Theodore White | Doze carries somewhat the same implications as drowse but the term often suggests a falling asleep, unintentionally or naturally, and does not emphasize a previous drowsy condition; often it suggests a falling asleep for a brief period or a drifting in and out of sleep, and it may imply a state of bewilderment when suddenly awakened | he had just dozed off when the explosion occurred | the sun drowsing on crooked streets, old men dozing in the parks—Green Peyton | I have been dozing over a stupid book—Sheridan | she dozed off for a moment or two, and then she got up and began . . washing her hands—Goudge | Nap basically implies a taking of a short light sleep, especially in the daytime; in extended use it commonly implies an opposition to watch or be on the alert and does not necessarily suggest the taking of a nap but merely a relaxation of care or activity (as in preventing, protecting, or detecting) | while I nodded, nearly napping—Poré | the Tory party is organized now; they will not catch us napping again—Disraeli<br>

Catnap implies a frequent taking of brief refreshing naps, usually at odd intervals fitted between one's periods of activity | stays in top form by catnapping whenever he has a spare moment—Time | Snooze, a somewhat casual or slangy term, may be used in place of nap and others of the preceding terms but without any emphasis on their distinctive or figurative connotations | snooze by the fire | the smaller, quieter resorts, where snoozing in a deck chair on the beach, salon orchestras and ornamental gardens are emphasized—Kenneth Young | Ana | rest, repose, relax (see corresponding nouns at rest). |

sleepy, drowsy, somnolent, slumberous mean affected by a desire to sleep or inducing such a desire. Sleepy, the ordinary term of this group, applies not only to persons but to things that suggest a resemblance to persons who show a readiness to fall asleep | away, you rogue, away! I am sleepy—Shak. | a sleepy town | the quiet, sleepy railroad station—Anderson | The term also applies to conditions or to things which incline one to sleep or to dozing or dreaming | the yellowhammer trills his sleepy song in the noonday heat—L. P. Smith | Drowsy differs from sleepy in carrying a stronger implication of the heaviness or loginess associated with sleepiness than of the actual need of rest | become drowsy after a heavy dinner | when the sun could burn through the leaves of the trees | Mrs. Barkley would grow drowsy . . and go off to take a nap—Deland | When applied to things rather than to persons, drowsy connotes more obviously than sleepy a soporific power | not poppy, nor mandragora, nor all the drowsy syrups of the world, shall ever medicine thee to that sweet sleep which thou owestst yesterday—Shak. | drowsy tinklings lull the distant folds—Gray | the leisurely swishing of the water to leeward was like a drowsy comment on her progress—Conrad | Somnolent may be used in place of drowsy; usually, however, it connotes the sluggishness or inertness characteristic of one who is sleepy or drowsy or the capacity for inducing this rather than the actual impulse to sleep or doze | a somnolent want of interest—De Quincey | Eustacia waited, her somnolent manner covering her inner heat and agitation—Hardy | the somnolent pages of a three-volume novel | Slumberous is often used in the sense of sleepy or drowsy or somnolent; occasionally it carries a distinctive connotation in which it usually suggests quiescence or the repose of latent powers | I . . . heard the mountain's slumberous voice—Shelley | Eustacia's manner was as a rule of a slumberous sort, her passions being of the massive rather than the vivacious kind—Hardy | Ana | *lethargic, sluggish, comatose | slender *thin, slim, slight, tenuous, rare | Ana | *lean, spare, lanky, skinny: flimsy, flaccid, flabby, *limp; trivial, trifling, *petty, paltry, puny | slick adj 1 *slick, glossy, velvety, silken, satiny, silky<br>

Ana | finished, *consummate: flawless, *impeccable, faultless: shallow, *superficial | 2 *fusile, oily, uncouth, oleaginous, soapy | Ana | bland, smooth, diplomatic, political, *suave, urbane: specious, *plausible | slide vb | Slide, slip, glide, skid, glissade, slither, coast, toboggan can mean to move along easily and smoothly over or as if over a surface. Slide usually implies accelerating motion and a continuous contact with a smooth and slippery surface; it is used normally in reference to persons and to moving things (as vehicles) (boys like to slide down banisters) | the foot slides o'er the ice that you should break—Shak. | when it's quiet you can slide in there in a skiff—Gardner | but also, especially in extended use, with reference to things which pass rapidly
before one because of one's own swift and easy motion
(a house after house slide by as we neared the city) or
which move easily, unobtrusively, or gradually from one
place or condition to another (prose that slides into
poetry) (shadows slid along the huge wooden tables—
Sinclair Lewis) (slide one's hand into another's pocket)
(it was inevitable that existentialism should slide out of
men's minds—Cousins) Slide carries a stronger impli-
cation than slide of a frictionless and unobstructed sur-
face but a weaker suggestion of continued contact; it
typically suggests involuntary rather than voluntary sliding,
only often definitely implying a loss of footing and a fall
slide on the ice (he had hurt his elbow through dropping
his stick and slipping downstairs—Bennett) (half-slipped,
half-slid down toward the wide level ribbon that marked
the frozen Schuykill—Mason) When only swift, easy
motion is implied, slide heightens the emphasis upon quiet-
ness, stealth, or skillfulness (while we were talking, he
slipped from the house) Things adrift to slide that pass
quickly or without notice (as from one's grasp, one's con-
trol, one's memory, or one's observation) (the book
slipped from her feeble hands) (the details have slipped
from his mind) (it leaves us without our being aware
that it is slipping away—J. M. Brown) (a father can't
make offhand remarks to a 4-year-old and have them
gently slip into oblivion—McNulty) or as a result of one's
negligence or inattention (the bus slipped by while they
were engrossed in conversation) (the tool slipped and
cut his hand) (he slips into occasional inaccuracies—
Anthony Boucher) Glide comes closer to slide than to
slip in its stress upon such continued smooth, easy,
usually silent motion as is characteristic of some dances,
but it may or may not imply uninterrupted contact with
a surface and, apart from its context, it seldom carries
any suggestion of danger (they glide, like phantoms,
into the wide hall—Keats) (even the swallows, the rest-
less swallows, glided in an effortless way through the
busy air—Jefferies) (two monsterlike cameras on trucks
that glided backwards and forwards—Edmund Wilson)
A glide over these interesting items to dwell at some
length on two men, now dead—Henry Miller A
often, like slide and, to a lesser extent, slip, glide is used in
reference to things that apparently move because the
observer is moving (the landmark marks have failed, the
fogbank slides unheeded—Kipling) (soft fell the splash
of the oars . . . softly the banks glided by—Meredith)
Skid is employed especially in regard to wheeled vehicles
the tires of which on an icy, wet, or dusty road fail to
achieve a velocity of 25,000 mph—A. C. Clarke) (swal-
loows were coasting in and out the smashed mill roof—
Bartlett) and often suggests an easy drifting (the country
seems in a mood to coast along—U. S. News and World
Report) while toboggan is likely to stress a building up
of momentum and a resulting wild speed in a usually un-
controllable downward movement (three depth charges,
each weighing 400 pounds, broke loose and tobogganed
wildly on the main deck—Bigart) (could it be possible
that man, who fondly called himself Homo sapiens, was
tobogganing into another self-destructive war while the
wounds of the last were still throbbing—Pinckney). The
Chinese dollar, which, amid all the speculating, had been
tobogganing steadily—Vanya Oakes

adj tenuous, rare, *thin, slender, slim

when the context carries a note of tenderness, pathos, or affection (our little house) (the air turned cold . . . so that the littlest kids cried from cold as much as from grief—Grau) (her pathetic little smile) (sleep, my little one—Tennyson) Diminutive not only carries a stronger implication of divergence from a normal or usual size or scale than small or little, but it often carries the meaning of extremely or even abnormally small or little (the bedrooms are small but the parlor is diminutive) (in so hot a climate peach trees will produce only diminutive fruits in very small quantities) (the horses are so diminutive that they might be, with propriety, said to be Lilliputian—Cowper) (a diminutive financial wizard, who looked like a Kewpie doll—J. D. Hart) Petite is the usual term to describe a trim, well-shaped woman or girl of diminutive size (a bit incongruous that such a petite woman should write such huge tomes—Fisher) Wee is found especially in dialectal use in place of small or little (a wee lad) (a wee drop of whisky) or in more general use as an equivalent of diminutive (a little wee face, with a little yellow beard—Shak.) (the one to the bachelor uncle . . . was sweetly girlish, and just a wee bit arch—Gibbon) Tiny goes further than diminutive or wee in suggesting extreme littleness or a smallness out of proportion to most things of its kind or in comparison with all other things (they were prominent eyes yellowed with tiny red veins—Avram Davidson) (the behavior of the invisible, intangible, inconceivably tiny electrons and atoms—Darrow) (tiny, Swiss-made replicas . . . each . . . about the size of a small, oblong wristwatch—Terr Ey Setter) Teeny and weeny, found chiefly in childish or playful use, occur also in paired or reduplicated forms (as teeny-weeny and teeny-tiny) (one day this teeny-tiny woman put on her teeny-tiny bonnet and went out of her teeny-tiny house to take a teeny-tiny walk—Fairy Tale) (he gave a weeny, weeny yawn—Wiggin) Minute means extremely small on an absolute scale, usually a microscopic or near-microscopic scale (a minute animalcule) (minute grains of sand) (ants that marched their minute columns over the floor—Hervey) (the tremendous forces imprisoned in minute particles of matter—Inge) Microscopic applies to what is so minute that it is literally observable only under a microscope (microscopic organisms) or is of a comparable minuteness in its class (no matter how microscopic his wage, he forced himself to save a dollar or two a year—Irving Stone) (the lady of the dreadnought class with a leash on the microscopic Chihuahua—Cross) Miniature applies to what is complete in itself but is built, drawn, or made on a very small scale (in circus parades, Tom Thumb and his menage rode together in a miniature red coach, drawn by two small ponies—Green Peyton) (it was one of the miniature Italian cities . . . all compact and complete, on the top of a mountain—L. P. smell, scent, odor, aroma all denote a property of a thing that makes it perceptible to the olfactory sense. Smell not only is the most general of these terms but tends to be the most colorless. It is the appropriate word when merely the sensation is indicated and no hint of its source, quality, or character is necessary (our horses . . . often reared up and snorted violently at smells which we could not perceive—Landor) (the smells of these offices—the smell of dental preparations, floor oil, spitoons and coal gas—Cheever) It is also the preferred term when accompanied by explicitly qualifying words or phrases (the rank smell of weeds—Shak.) (the rented coarse black gown . . . gave out a musty smell, as though it had been lying long disused—Wouk) (a smell of marigold and jasmine stronger than even the reek of the dust—Kipling) and occasionally, even when unqualified, it implies offensiveness (traced the smell to a stopped-up drain) (Cobden was much upset when he saw the middle classes leaving the smells of the . . . towns for the scents of the countryside—Lewis & Maude) Scent tends to call attention to the physical basis of the sense of smell and is particularly appropriate when the emphasis is on the emanations or exhalations from an external object which reach the olfactory receptors rather than on the impression produced in the olfactory centers of the brain (the scent of the first wood fire upon the ken October air—Pater) (if the air was void of sound, it was full of scent—Galsworthy) (the heavy scent of damp, funereal flowers—Millay) (presently a scent came with it, dank and pervasive. It was the must of the forest—Hervey) but scent can apply specifically to emanations evidencing the passing of a body (as an animal) and may suggest a high level of sensory efficiency in a perceiver (the dog caught the scent of a rabbit) or from its use as a synonym of perfume the term may suggest a pleasant quality (the rich, vital scents of the plowed ground—Glasgow) Odor is oftentimes indistinguishable from scent, for it too can be thought of as something diffused and as something by means of which external objects are identified by the sense of smell. But the words are not always interchangeable, for odor usually implies abundance of effluvia and therefore does not suggest, as scent often does, the need of a delicate or highly sensitive sense of smell (the odors of the kitchen clung to her clothes) (he smelled her perfume, a sweet pungent odor, intimately coquettish—Styron) (gave off a kind of sweetish rich animal-vegetable odor, such as one associates with the tropics—Purdy) For these reasons odor usually implies general perceptibility and is the normal word in scientific use especially when the classification or description of types is attempted (science, while recognizing the potency of our sense of smell, has not yet satisfactorily classified and catalogued the many varieties of odors that we recognize—Morrison) Aroma usually adds to odor the implication of a penetrating, pervasive, or, sometimes, a pungent quality; it need not imply delicacy or fragrance, but it seldom connotes unpleasantness, and it often suggests something to be savored, with the result that it is used of things that appeal both to the sense of smell and taste or by extension to one's aesthetic sense (the fresh river smell, rank and a little rotten, and spiced among these odors was the sultry aroma of strong boiling coffee—Wolfe) (an atmosphere, impalpable as a
smidgen verb *particle, bit, mote, whit, atom, iota, jot, tittle

smile verb *Smile, grin, simper, smirk

smirk verb *smirks, grin, Simper, Graves)

smog verb *smog, simper, grin, smile (see under SMILE

smoother verb *suffocate, asphyxiate, stifle, choke, strangle, throttle

smug self-complacent, self-satisfied, priggish, *complacent

smother self-respecting, self-esteeming, self-admiring (see base words under REGARD n): pharisaical, sanctimonious, hypocrical (see under HYPOCRISY)

smuggled, bootleg, contraband are comparable in meaning transported in defiance of the law but each has implications and applications not shared with the others. Smuggled applies to what is taken out of or brought into an area (as a nation or district) clandestinely, especially to avoid payment of taxes or duties or to contravene the law <smuggled diamonds> (the same route that the pirates used in taking their smuggled goods to market—Amer. Guide Series: La.) In extended use it may stress deftly evasive action or surreptitious procedure <make use of local knowledge and smuggled information to sow alarm among Communist officials—Economist> (to the ordinary beholder there seem to be so many smuggled assumptions in the literature of social science—R. M. Weaver) Bootleg denotes a material thing (as liquor) made in or imported into a country or district and offered for sale or distribution in defiance of its prohibition in that country or of legal restrictions (as by rationing or licensing) on its use <bootleg whiskey> The term can imply fraud, deceit, and often secrecy or concealment; thus, bootleg wiring is done by one who is not a legally qualified electrician and who may disregard safety requirements; bootleg prizefighting is conducted without legal sanction and often with disregard of the welfare of fighters or patrons (Congress arbitrarily said, "We know better than unions what is good for employees."). . . Today several thousand employers and several million employees are operating under bootleg agreements in flagrant violation of the statute—A. E. Stevenson> Contraband applies to something of which the importation or exportation is declared illegal by law, proclamation, or treaty. Often the term is perfectly interchangeable with smuggled <waterfront resorts were notorious as smuggling centers . . . contraband cargoes were carried aboard motorboats and dories—Amer. Guide Series: Mich.> or it may nearly replace bootleg <Benzedrine . . . has been extremely common as a contraband item for introduction into prisons and correctional institutions—Maurer & Vogel> but it alone is specifically applied to something of which the exportation to beligerents is expressly prohibited and which, therefore, is liable to seizure (eventually Great Britain was seizing as contraband almost everything sent to Germany and to the neutral states on Germany's borders—Roehm et al)

snag noun *obstacle, obstruction, impediment, bar

snarl verb *jerk, twitch, yank

Ana *cut, slit, slash, chop: *bite
so therefore, hence, consequently, then, accordingly
snooze vb *sleep, slumber, drowse, doze, nap, catnap
snug 1 trim, trig, shipsheep, *neat, tidy, spill-and-span
Ana compact, *close: *orderly, methodical, systematic
2 *comfortable, cozy, easy, restful
Ana *safe, secure: *familiar, intimate, close: sheltered, harbored (see HARBOR vb)
so *therefore, hence, consequently, then, accordingly
soak vb Soak, saturate, drench, steep, impregnate, sop, waterlog can mean to permeate or be permeated with or as if with water. Soak suggests immersion in a liquid so that the substance absorbs the moisture and usually becomes thoroughly wetted, softened, or dissolved; soak a sponge in water; the blotter soaked up the spilled ink; the world was all sobbed, waterlogged (see corresponding adjectives at COMPLEX): *difficulty, hardship
sob vb moan, groan, *sigh
Ana weep, wail, *cry, blubber
sob n moan, groan, sigh (see under SIGH vb)
Ana weeping, wailing, crying, blubbering (see CRY vb)
sober 1 Sober, temperate, continent, unimpassioned can mean having or manifesting self-control or the mastery of one's emotions, passions, or appetites. Sober basically describes moderation in the use of food and drink and often specifically implies freedom from intoxication; this implication is often found with another (as of habitual abstention from intoxicating liquors or merely of not being drunk at the time in question) (he is, by reputation, a sober man) (Gilda, a drink comra, squealed on Cabot Wright. Later, sober, she denied her own story —Purdy) In more general application sober implies a cool head, composure especially under strain or excitement, and freedom from passion, prejudice, fear, or any unreasonable excess (sound, sober advice) (a man of sober judgment) (his bearing was sober, his comments courteous—Wouk) (a sober book, written without hysteria or excitement—A. T. Steele) Temperate (see also MODERATE) implies control over the expression of one's feelings, passions, appetites, or desires or the restrained exercise of one's rights, powers, or privileges, with the result that one never exceeds the bounds of what is right or proper (in what temperate language Horace clothes his maxims ... not a flourish! Not a gesture! —Repple) He was a scholar and a stoic; what temperate virtues he owned had been hard won—Styron) Continent (compare continence under TEMPERANCE) carries a stronger implication of deliberate restraint placed upon of the essence of one thing so that it becomes part and parcel of the other; thus, one steeps tea leaves in boiling water in order to make the beverage tea. In extended use the acquisition of the qualities of one thing by a process suggestive of such steeping is often implied (epistles . . . steeped in the phraseology of the Greek mysteries —Inge) (language simple and sensuous and steeped in the picturesque imagery of what they saw and felt —Lowes) but often the term means little more than to envelop with or as if with the quality (as color or light) shied from or emanated by something else (her tall spars and rigging steeped in a bath of red-gold—Conrad) (the world was all steeped in sunshine—D. H. Lawrence)
Impregnate (see also PERMEATE) commonly carries a suggestion of soaking in something other than water; it implies the interpenetration of one thing by another until the former is everywhere imbued with the latter; impregnate rubber with sulphur) (when the mind was, as it were, strongly impregnated with the Johnsonian ether—Boswell) (this poem, everywhere impregnated with original excellence—Wordsworth) Sop usually applies to food soaked in meat juices or wine; sop bread in gravy); serve cake sopped in sherry and covered with a soft custard) but it may apply also to something (as soil) that is heavily soaked with liquid; sopping wet clothes) sоп plants with too much water)
Waterlog suggests a thorough soaking or drenching that makes a thing either useless or too heavy and sodden (as for floating or cultivating) (a waterlogged rowboat) (soil waterlogged by lack of proper drainage)
Ana *dip, immerse, submerge: *permeate, pervade, penetrate
soak n *drunkard, inebriate, alcoholic, dipsomaniac, sot, toper, tosspot, tippler
soapy slick, *fulsome, oily, unctuous, oleaginous
soar *rise, arise, ascend, mount, tower, rocket, levitate, surging
Ana *fly, dart, shoot: aspire, *aim
sog vb moan, groan, *sigh
Ana weep, wail, *cry, blubber
sog n moan, groan, sigh (see under SIGH vb)
Ana weeping, wailing, crying, blubbering (see CRY vb)
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
oneself, upon one's feelings seeking expression, or upon one's desires, especially sexual desires, seeking satisfaction. "my past life hath been as continent, as chaste, as true, as I am now unhappy—Shak." their strength is the strength of men geographically beyond temptation: the poverty of Arabia made them simple, continent, enduring—T. E. Lawrence. Not a subject of irregular and interrupted impulses of virtue, but a continent, persisting, immovable person—Emerson. Unimpassioned so stresses the absence of heat, ardor, or fervor that it often connotes lack of feeling and, therefore, coldness, stiffness, or hardness of heart. When love is not involved in a union, any differences are likely to settle into . . . unimpassioned enmity—Hervey. He was tired, excited, on fire, and Deborah seemed so unimpassioned—Webb. But it often implies a subduing of feeling or passion by rationality (the unimpassioned administration of disciplinary measures) (his manner resembled their manner, reserved, logical, unimpassioned, and intelligent—W. C. Ford).

Analogue words

She became a gregarious creature—Cowper. Impelled by gregarious instincts, Peter followed the crowd—H. G. Wells. He used the gregarious bustle goes on as a matter of routine. Streets intersect, shops advertise, homes have party walls, and fellow citizens depend upon the same water supply; but there is no cooperation between human beings—Joyce. Or a living contiguously rather than an active participation in the life of an integrated society (the ordinary gregarious human life, led by us in contact with others and in the stress of our normal pursuits—Powyss). Many solitary insects are gregarious, that is, they share certain common needs or react in the same way to certain external stimuli so that dense populations assemble locally—O. W. Richards. It is at least plausible that the domestication of animals—which are almost exclusively gregarious animals—is based on the relation of the hunter to the wild herd (Franz Boas). The remaining terms describe partial aspects of being social. Cooperative implies the existence of common ends which serve as the objectives of a group, a community, or society at large and of the need of mutual assistance in the attainment of those ends; the term therefore usually suggests shared effort, helpfulness, and a willingness to work for the welfare or well-being of the entire group (leadership of a cooperative rather than of a competitive type—Sellars). Capacity for cooperative industrial effort—Mumford. With regard to a young English statesman, we want to know two things mainly—his intrinsic value, and his capacity—Pall Mall Gazette. If we are to develop a cooperative foreign policy, we shall have to learn to consult continuously with other nations—Dean. Convivial is applied chiefly to persons, groups, or activities that manifest enjoyment of the company of others especially in festive joviality and eating and drinking (at the insistence of a convivial uncle . . . she permits herself to drink three glasses of champagne—Edmund Wilson). Has a convivial temperament . . . gets on a first-name basis quickly—Dwight Macdonald. Dinners convivial

that no other work quite possesses—More) Hospitable
usually implies a disposition to receive and to entertain
not only one's friends but especially strangers; it there-
for its more positive and generous more than any of the preceding terms (it was no small joy to these
west-movers . . . to find this hospitable, talkative man who
was everywhere bustling about, trying to be of service
to them—Röważq) (your criticism, so hospitable to
ideas, so inoffensive in judging right from wrong—Quiller-
Couch)

Ana *gracious, cordial, sociable, genial, affable: *amicable,
neighboring, friendly

Ant unsocial, antisocial, asocial

society 1 elite, *aristocracy, nobility, gentry, county
2 *association, order, club

soft adj Soft, bland, mild, gentle, smooth, lenient, balmy
are applied to things with respect to the sensations
they evoke or the impressions they produce and mean
pleasantly agreeable because devoid of all harshness or
roughness. Soft is applied chiefly to what soothes, calms,
or induces a sensation of delicate quiet (as sweet as
balm, as soft as air, as gentle—Shak.) (a soft answer turneth away wrath—Prov 15:1) (ever, against eating
cares, lap me in soft Lydian airs—Milton) (to feel forever
its soft fall and swell—Keats) This positive connotation
is often apparent in the use of soft even when its major
implication is the absence or the subdued quality
(as pungency, vividity, intensity, or force); thus, a
soft fragrance is lacking in richness but is quietly agreeable
and not overpowering; a soft color is lacking in vividness,
but it is mellow rather than dull; a soft voice though lacking
in resonance is not faint or feeble but is pleasingly flat
and without harshness or stridency (the far shore of the
river's mouth was just soft dusk—Galsworthy) (the
soft shock of wizened apples falling from an old tree—
Millay) (listen to Yuriko's voice as it floated, breathlike
and soft, through the frail partitions—Mailer) Bland
(see also suave) may be interchangeable with soft, but
it generally suggests smoothness and suavity and stresses
the absence of whatever might disturb, excite, stimulate,
or irritate; thus, foods and beverages which are not un-
pleasant to the taste yet tend toward the insipid or are
lacking in pungency, tang, or richness of flavor or ingre-
dients may be described as bland; a bland climate not
only is free from extremes but is neither stimulating nor
depressing (bland fruits such as bananas) (the doctor
prescribed a bland diet) (there was an unusual softness
to the dark air and the bland starlight and an unusual
density to the darkness—Cheever) (the whole shabby
performance . . . the bland reassurances instead of the
difficult chores—Michener) (full, clear, with some-
thing bland and suave, each note floated through the
air like a globe of silver—Cather) Both mild and gentle
stress moderation; they are applied chiefly to things that
are not, as they might be or often are, harsh, rough, strong,
violet, unduly stimulating, or irritating and are therefore
pleasant or agreeable by contrast (a mild cigar) (mild
weather) (a man of mild and simple character who

. . . had shown no interest in anything at all except his
collection of modern paintings—Dahl) (a gentle breeze)
(a gentle heat) However, both words are capable of
connoting positively pleasurable sensations, mild often
being applied to what induces a feeling of quiet measured
beauty or of serenity and gentle to what evokes a mood
of placidity or tranquillity, or a sense of restrained power
or force (a mild,rosy spring evening in which blackbirds
sang on the budding boughs of the elms—Gibbons)
(some did shed a clear mild beam like Hesperus, while the
sea yet glows with fading sunlight—Shelley) (O gentle
sleep, nature's soft nurse—Shak.) (he was gentle, waiting
for whatever he awaited with a grace she respected—
Malamud) (she had a gentle face, and her eyes were
fired with compassion—Theodore Sturgeon) Smooth
(see also easy, level) in most of its senses suggests
the absence or removal of all unevennesses or obstacles
(as to use or enjoyment); often it comes close to mild
in stressing the pleasant quality of what might be harsh
or irritating, but unlike mild and bland it rarely if ever
hinds at weakness or insipidity. Distinctively it may
approach mellow (which see under nature) and suggest
qualities of excellence that come with time (as through
ripening or aging) or are the result of careful and skilled
handling that eliminates all harshness (a smooth whiskey)
(dancing every night to the island's smoothest orchestra
—N. Y. Times) In reference to persons or their works
and accomplishments (as in the arts) smooth may carry
further the notion of care and skill in handling and suggest
a polished finish stemming from experienced knowledge-
ability or craftsmanship (Gotfried's style is urbanbe and
smooth and full of understatement, but the story he tells
is one of wild passion—Artz) (behind the smooth perfor-
ance of choir, organ and minister were hours of prepa-
ration and careful timing—Dawson & Wilson) (they
themselves were smooth in manner, and they saw to it
that in their presence life had no rough edges—Webb)
or, in a less complimentary sense, a slick sophistication
or meretricious attractiveness (he may be an authentic
worker-wonder, but he's also a smooth customer—
Gilman) (a smooth little blonde glides out of the bedroom
—Time) (a smooth wolf who has a highly polished tech-
nique in sidestepping marriage—Tilden) Lenient (see also forbearing) is applicable chiefly to things that
are grateful to the senses or to the mind because they exert
an emollient, relaxing, softening, or assuasive influence
(earthly sounds, though sweet and well combined, and
lenient as soft opiates to the mind—Cowper) (in the
lenient hush, strong torpid rhythms somehow flowed—
E. P. O'Donnel) (I poured her a lenient rum and water
—Morley) Balm also implies a soothing influence on
the senses or mind, but beyond this it suggests refresh-
ment and sometimes exhilaration. Coupled with one or another
of these implications there is also frequently a suggestion
of fragrance, especially the aromatic fragrance of balm-
producing trees (all balm from the groves of Tahiti,
came an indolent air—Melville) (a lovely soft spring
morning at the end of March, and unusually balmly for the
time of year—Butler d. 1902) (in the balmy atmos-
phere of that second victory she basks today—Fishwick)
Ana moderate, tempered (see moderate vb): smooth,
effortless, *easy; velvety, silken, *sleek, slick: serene,
tranquil, *calm, placid, peaceful

Ant hard: stern—*Con *rough, harsh, uneven, rugged:
*intense, vehement, fierce, violent

soil, dirty, sullty, tarnish, foul, befoul, smirch, besmirch,
grimne, begrime can all mean to make or become unclean.
Soil basically implies fundamental defilement or pollution
(as of the mind or spirit) (why war soils and disregarding

A colon (:) separates groups of words discriminated. An
asterisk (*) indicates place of treatment of each group.
whatever it touches, I cannot say—Kenneth Roberts

<making that room our Chapter, our one mind where all that this world soiled should be refined—Masefield>

but in much of its use it applies to a making or becoming superficially and literally unclean (as by spotting or staining or smudging) <dressed in gray shirt and trousers appropriately soiled and wrinkled from a day's work—MacInnes>

In this sense the word is very close to the corresponding sense of dirty, which is slightly stronger in its implication of uncleanness and especially of disagreeable uncleanness; thus, "to soil one's clothes" may merely imply that the freshness of a clean or new thing is lost, but "to dirty one's clothes" usually implies some activity which has plainly left its unclean traces upon the garments.

In its extended use, too, dirty tends to stress the unpleasant effect and typically suggests a making squalid or nasty of something that in itself is normal, wholesome, or clean (their religion took most of the rural whites' pleasures away from them, dirtying sex and the human body until it was a nasty thing—Lillian Smith) <a burlesque which diries the idea of chivalry—Canby>

Sully implies the staining or soiling of something that is pure, fresh, limpid, or innocent <they would not sully their fingers when eating human flesh—Elisofon>

It is used more often in reference to immaterial or spiritual than to physical soiling (if it is bounderish to traduce one's host, it is an even worse breach of etiquette to sully one's own nest—Guérard) <those sins of the body which smear and sully, debase and degrade, destroy and ruin, condemn to the deepest pits of Hell—Farrell>

A merciless massacre sullied the fame of his earlier exploits—J. R. Green

Tarnish basically implies the dulling or dimming of the luster of a thing by chemical action (as of air, dust, or dirt) <silver tarnished by the sulfur in egg yolks> In extended use it suggests a dimming rather than a total sullying of something of value <with similar scandals . . . it is not surprising that the image of state government is woefully tarnished—Armbrister> <her tawdry, shoddy, garish looks are now not complimentary>

Foul and the intensive form befoul stress a making filthy or nasty and apply either to a material or an immaterial thing. They often suggest pollution or defiling by some-thing highly offensive or disagreeable <earth was scarred by mining pits and railway tracks; air was fouled and darkened by factory soot—J. D. Hart> <it is senseless to fouls our municipal personnel with unproved charges of general corruption—Moses>

<having befouled their own minds for hire, they made their living by befouling the minds of others—Anderson> <Milton was . . . virtuous after befouling himself; once smeared with the sluggish filth of an evil woman, he had finally been won over—Styrong>

Smirch and the intensive form besmirch may emphasize a discoloring by or as by soot, smoke, or mud; usually they come close to sully in implying a destruction of immaculateness <now, with the singular ratio-
cination of the politician besmirched, he sought to go before the electorate and be washed whitier than snow by their votes—S. H. Adams>

<the parson's well-practiced and spellbinding condemnation of the besmirching, degrading, befouling, hideous, and bestial sins of the flesh—Farrell> but they seldom carry as clear an implication of an effect on real virtue or purity as they do of a darkening or blacking of appearance, reputation, honor, or good name <their infamy spreads abroad, smirching the whole class to which they belong—Jefferies> <as black-hearted a brigand as ever smirched a page of Highland history—Joseph>

<her reputation ... was not smirched by gossip, for she was known to love her husband and to be virtuous—Bowers>

Grime and the more usual begrime intensify the meaning of dirty and typically suggest deeply imbedded dirt often accumulated over a prolonged period <a rudely cut inscription grimed with dust of many a year—Henry Phillips>

<she was always filthy, her legs grimed, her hair bedraggled, her face anything but clean—W. C. Williams> <wearing a dress that virtually swept the street; that would in fact actually sweep it from time to time, battering and begriming the hem—F. L. Allen> <they had stood, begrimed with train smoke—Stafford>

sojourn vb *reside, lodge, stay, put up, stop, live, dwell

solace vb *comfort, console

artificiality of manner, overrefinement, and absence of enthusiasm as the price paid for experience that brings knowledge of men and their ways (the Negro . . . could rarely afford the sophisticated inhibitions of civilization, and so he kept for his survival the art of the primitive, he lived in the enormous present—Mailer) From another point of view it implies a type of mentality marked by distinction, urbanity, cleverness, together with an indifference to all that is simple or banal in life (she didn’t want to ride on the roller coaster and he guessed that her ideas of pleasure were more sophisticated—Cheever) From still another it may imply a cultivation that enables a man to rise above the ordinary or usual (the lack of a body of sophisticated and civilized public opinion, independent of plutocratic control and superior to the infantine philosophies of the mob—Mencken) photographs realistic enough to catch the quality of the milieu which produced Pope John, surely the world’s simplest and most sophisticated of men—Casey) Worldly-wise and worldly imply a wisdom gained by attention to the things and ways of the world. Often they stress alienation from true spiritual interests and, as a result, devotion to aims that will make one happy in this world, typically suggesting a concentration upon material ends or aims or upon a wealth of worldly experience (we apply the term “worldly-wise” to a man who skillfully chooses the best means to the end of ambition; but we should not call such a man “wise” without qualification—Sidgewick) (religion has been leading man toward a nobler vision, a better day, a higher hope, and a fuller life. The church, on the other hand, has been worldly, obscurantist, arrogant and predatory—Pfeffer) Blasé implies a lack of responsiveness to things which have once been a joy or delight. It usually suggests satiety, but also it tends to suggest such real or affected overexperience and overcultivation as leads to disdain for all that arouses the average person’s interest (the blasé indifference of both the authorities and the people to the war was like cold water . . . on my spirits—Belden) (I was going through a period of adolescent awfulness in which I was trying to appear pale, interesting, and world-weary (the popular term . . . was “blasé”), and incapable of any real enthusiasm—Skinner) Disillusioned implies having had experiences that have completely destroyed a person’s illusions, with resulting hopelessness; it applies to a person who from experience is no longer capable of enthusiasm or of idealistic motives and who has grown not only realistic but scornful of the sentimental, the visionary, the emotional (in a few years the young [newspaper] man will become a cynic, appraising the world and his fellows with disillusioned eyes, even with bitterness—Walker) (the world, grown disillusioned and afraid, has neglected the one source that answers every problem, fills every need—Oursler) Ana cultivated, cultured (see corresponding nouns at culture): intellectualized (see corresponding adjective at mental): knowing, brilliant, *intelligent, clever, alert Ant unsophisticated —Con *natural, simple, ingenuous, naïve, artless: crude, uncouth, callow, raw (see rude) sophistry *fallacy, sophism, casuistry Ana plausibility, speciousness (see corresponding adjectives at plausible): equivocation, *ambiguity, tergiversation: evading or evasion, avoiding or avoidance (see corresponding verbs at escape) soppiness *sentimental, romantic, mawkish, maudlin, mushy, slushy sorcery *magic, witchcraft, witchery, wizardry, alchemy, thaumaturgy sordid *mean, ignoble, abject Ana *mercenary, venal: squalid, foul, filthy, nasty, *dirty: *contemptible, despicable, sorry, scurvy, cheap, beggarly, shabby sorrow n Sorrow, grief, heartache, heartbreak, anguish, woe, regret, though not close synonyms, share the idea of distress of mind. Sorrow is the most general term, implying a sense of loss or of guilt (when you depart from me, sorrow abides and happiness takes his leave—Shak.) (virginity she thought she had parted without sorrow, yet was surprised by torments of conscience—Malamud) Grief denotes intense emotional suffering or poignant sorrow especially for some real and definite cause (compare grieve) (a stifled, drowsy, unimpassioned grief, which finds no natural outlet—Coleridge) (I have lain in prison . . . Out of my nature has come wild despair; an abandonment to grief that was piteous even to look at; terrible and impotent rage; bitterness and scorn—Wilde) but grief may also denote a more mundane distress of mind that is representative of the distress and trials of day-to-day life or often of a particular situation in life (he had a thankless job which gave him all of the grief of running a war and none of the glory—Time) Heartache is used especially of persistent and deep sorrow that is slow to heal but that often gives little or no outward indication (the heartaches of a would-be author) (the heartache of a hunted race—Zangwill) (the dumb heartaches of those days—Churchill) Heartbreak can imply a yet deeper and more crushing grief (the sorrow and the heartbreak which . . . abide in the homes of so many of our neighbors—Truman) Anguish implies a distress of mind that is exorcising or torturing almost beyond bearing (anguish so great that human nature is driven by it from cover to cover, seeking refuge and finding none—Rose Macaulay) (a mild perturbation . . . about as like real anguish as three little eruptions on your arm are like confluent smallpox—Montague) (then came another sob, more violent than the first—a strangled gasp of anguish—Rölaag) Woe implies a deep or incon solable misery or distress usually induced by grief (the suffering people whose woes he has not alleviated—W. P. Webb) (outcast from God . . . condemned to waste eternal days in woe—Milton) Regret seldom implies a sorrow that shows itself in tears or sobs or moans; usually it connotes such pain of mind as deep disappointment, fruitless longing, heartache, or spiritual anguish; consequently the term is applicable within a wide range that begins with the disappointment one feels, sometimes sincerely but sometimes merely as suggested by the language required by convention, in declining an invitation and ends with the pangs of remorse for something done or left undone or of hopelessness repining for what can never be restored (with a sigh that might have been either of regret or relief—Wharton) (in moments of regret we recognize that some of our judgments have been mistaken—Cohen) (that expression of mildly cynical regret and acceptance that one often notices in people who have seen much of life, and experienced its hard and seamy side—Wolfe) Ana mourning, grieving (see grieve): *distress, suffering, misery, agony: melancholy, dejection, *sadness, depression Ant joy sorrow vb mourn, *grieve Ana *cry, weep, wail, keen: sob, moan, groan (see sigh vb) sorry pitiable, *contemptible, despicable, scurvy, cheap, beggarly, shabby Ana *mean, ignoble, sordid, abject: *miserable, wretched: palpity, *petty, trifling, trivial

\*Ant\* fallacious

\*sound\* n \*Sound, noise\ both mean a sensation or effect produced by the stimulation of the auditory receptors of the ear and the auditory centers of the brain. \*Sound\ is the general term applicable to anything that is heard regardless of its loudness or softness, its pleasantness or unpleasantness, or its meaningfulness or meaninglessness \*he waited a good half hour after the last sounds of the departing enemy came down the wind—Mason\* \*it is impossible, words being what they are, to read the sound without reading the sense at the same time—Mac-Leish\* \*heard a sound, rather shrill and tentative, swell into hoarse, high clamor, and suddenly die out—Galsworthy\* \*approximates a laugh formed by . . . squeezing guttural sounds out of the throat—Pynchon\* \*Noise basically applies to confused sounds emanating from many persons and usually suggests a clamor made by mingled outcries or shouts; in more general use, it may apply to a disagreeably loud or harsh sound, whatever its source

\*souvenir\* 1 \*remembrance, remembrancer, reminder, memorial, memento, token, keepsake

\*the terrific noise of an explosion\* \*a noise like that from just one stringy throat must be an impossibility, and yet, there it was—Theodore Sturgeon\* \*dense jungle, restless with the shrill noise of wild life—Shipton\* \*he could not endure the noise of the machine shop\* \*the hell of distracting noises made by the carts, the cabs, the carriages—Mallock\* \*Although the connotations of unpleasantness and discordance typically distinguish noise from sound, noise may sometimes be applied to a sound that merely engages the attention \*still the sails made on a pleasant noise till noon, a noise like of a hidden brook—Coleridge\* \*the wetted earth gave out a cool delicious fragrance; there was a noise of birds—Huxley\* \*Ant silence

\*sound\* n \*strait, channel, passage, narrows

\*sound\* vb \*fathom, plumb

\*soupçon\* suspicion, suggestion, \*touch, tincture, tinge, shade, smack, spice, dash, vein, strain, streak

\*sour, acid, acidulous, tart, dry\ mean having a taste devoid of sweetness. All but \*dry\ suggest the taste of lemons, vinegar, or of most unripe fruits. \*Sour and acid\ are often interchangeable, but \*sour\ is more likely to be chosen to describe something that through fermentation has lost its natural sweet or neutral taste or, sometimes, smell \*sour milk\* \*sour wine\ and the term may additionally suggest a spoiled or rancid state \*sour garbage\ \*Acid, on the other hand, is appropriately used to describe something having a sharp sweetness in its natural state usually due to the presence of chemical acids \*acid fruits\* \*acid drinks\* \*Acidulous and tart\ are applied, as a rule, to things which may be described as \*acid, acidulous\ implying a modest degree of acidity and tart, a sharp but often agreeable acidulousness or, sometimes, acidity \*some mineral waters are pleasantly acidulous\* \*most cooks prefer tart\* \*for pies and puddings\* \*Dry\ is usually applied to wines which, although without any sweetness, are bland and therefore neither definitely acid nor definitely sour.

In their extended senses \*sour\ applies especially to what is crabbed or morose \*a man with a prim \*sour\* mouth and an expression of eternal disapproval—Dahl\* \*and acidulous and tart\ to what is characterized by asperity, pungency, or sharpness \*tart temper never mellowes with age—Irving\* \*what has been dull and dead in your years is now tart to the taste—Mailer\* \*said in acidulous jest that in Congress the South takes a recurrent and unending revenge in behalf of the long-dead Lee—W. S. White\* \*Acid, partly by allusion to the corrosive powers of some acids, is likely to describe what is biting or caustic \*his wit became acid; his letters are filled with caustic comment to sharpen the temper of those on the fighting line—Parrington\* \*while dry\* may suggest matter-of-fact impersonal presentation of what is humorous, ironic, or sarcastic \*there seemed to be a faint tinge of appeal in his eyes, presentation of what is humorous, ironic, or sarcastic—Mallock\* \*dry\* instead of \*sour\* is now jest \*it often takes a war to lay bare the soul of a people—Shipton\*

\*sour\* \*acid, partly by allusion to the corrosive powers of some acids, is likely to describe what is biting or caustic—Dahl\* \*and acidulous and tart\ to what is characterized by asperity, pungency, or sharpness—Mallock\* \*what has been dull and dead in your years is now tart to the taste—Mailer\*

\*Ant\* silence

\*sour\* adj

\*Ant\* termination: outcome

\*souffle\* \*dip,immerse, submerge, duck, dunk

\*Ana\* \*soak, steep, saturate, impregnate

\*souvenir\* 1 \*remembrance, remembrancer, reminder, memorial, memento, token, keepsake

sparing, frugal, thrifty
profuse

Sparing, frugal, thrifty, economical can all mean exercising or manifesting careful and unwasteful use of one's money, goods, and resources. Sparing connotes abstinence or restraint <sparing in the expenditure of money> <sparing in giving praise> he was lavish of encouragement, sparing of negation—S. H. Adams
he had always been a sparing eater of plain foods but now he ate heartily—Buck

Frugal suggests the absence of all luxury and lavishness especially in food and ways of living and dress; positively it implies simplicity, temperance, and, often, content<Roman life was a frugal thing, sparing in food, temperate in drink, modest in clothing, cleanly in habit—Buchan> <the cost of the war was appalling to his frugal mind—Forester> he likes frugal fighters. Every kind of serious trouble a fighter can get into, he says, has its origin in the disbursement of currency—Liebling
Thrift implies industry, good management, and prosperity as well as frugality <lived in affluence for half a century; but memories of her early straits had made her excessively thrifty—Wharton> <her sober, thrifty, industrious life, concentrated upon moneymaking—Mumford> <the difference between a miserly man who hoards money out of avarice and a thrifty man who saves money out of prudence—Empson>
Economical often is used interchangeably with thrifty when the sparing use of money and goods is emphasized <an economical housekeeper> However the word often implies more than saving, for its chief implication is prudent management or use to the best advantage, without waste, and it is therefore far more widely applicable than thrifty, which refers only to persons or their expenditures <the verse, which nowhere bursts into a flame of poetry, is yet economical and tidy, and formed to extract all the dramatic value possible from the situation—T. S. Eliot> (historically, sea power is the most mobile and therefore the most economical form of military force—Time> <he applied his skill to the economical use of words, the brief but vivid description—Fellows>

castrate, *sterilize, emasculate, alter, mutilate, geld, cauponize

speak, talk, converse can all mean to articulate words so as to express one's thoughts. Speak is, in general, the broad term and may refer to utterances of any kind, however coherent or however broken or disconnected, and with or without reference to a hearer or hearers (not able to speak above a whisper) (I shall speak to him about it) (let him speak for the organization) (most of the material in this book was spoken before it was printed, as may perhaps be inferred from the style—Davis) (she repeated them, angered . . . but once the words were spoken she was sorry—McCullers) (the Bellman looked scared, and was almost too frightened to speak—Lewis Carroll) Talk, on the other hand, usually implies an auditor or auditors and connected colloquy or discourse (he left the room because he did not care to talk) (we talk in the bosom of our family in a way different from that in which we discourse on state occasions—Lowes) (she talked and talked and talked, yet it seemed to Marjorie that she could never hear enough of this girl's worldly wisdom—Wouk) But speak is also used of relatively weighty or formal speech (often public speech), and talk, of what is more or less empty or frivolous (a fool may talk, but a wise man speaks—Ben Jonson) (a good old man, sir; he will be talking—Shak.) (yet there happened in my time one noble speaker who was full of gravity in his speaking . . . . No man ever spoke more neatly, more pressly, more weightily, or suffered less emptiness, less idleness, in what he uttered—Ben Jonson) Converse implies an interchange in talk of thoughts and opinions (in the press conference the President can converse with the public rather than preach to it—Cater) (don't ever remember hearing my parents converse, and they never even chatted. My father would expound on law with the public rather than preach to it—Ben Jonson) (if the whole of nature is purposive, it is not likely that any of the following can be differentiated) (groups of especial rank) but in more general use it tends to stress unicity and to imply a relation to one thing or one individual as distinguished from all others that can be felt to fall into a category with that one (whether the specific freedoms we know and cherish . . . can be maintained—Sidney Hook) (make it possible for the imaginative talent to develop along those lines that reward with specific fruition—Hudson Review) (the binding of some ions is highly specific with respect to the protein involved—Cannan & Levy) However, specific also may mean no more than explicitly mentioned, or called into or brought forward for consideration (if such injuries . . . result in any of the following specific losses—insurance policy) (would be glad to hear of specific cases of scholars having difficulty with either passports or visas—ACLS Newsletter) (interested in any specific field only for its contribution to a view of the world as a totality—Cohen) In this last sense of specific particular is sometimes preferred on the ground that the term is clearly opposed to general and that it is a close synonym of single (for fuller treatment see single). The differences between the two words in this sense are not easily discoverable, but specific seems to be chosen more often when the ideas of specification or of illustration are involved, and particular, when the distinctness of the thing as an individual is to be suggested; thus, one gives a specific illustration to indicate a word's normal use but describes the particular uses of the word (in this connection, one of Don Quixote's adventures deserves particular mention—Muggeridge) (we get a sense for particular beauties of nature, rather than a sense for Nature herself—Binyon) Particular is often used also in the sense of special and especial (some half-dozen particular friends—Dickens) (the Debussy selection was the particular gem of the evening—Watt) In logic particular is opposed to universal and applies to matters (as propositions, judgments, and conceptions) which have reference to a single member or to some members of a class rather than to all; thus, "some men are highly intelligent" is a particular proposition, but "all men make mistakes" is a universal proposition. Often, in less technical use, particular implies an opposition to general as well as to universal (one is apt to amplify a particular judgment into a general opinion—Mackenzie) (we shall venture beyond the particular book in search of qualities that group books together—Woolf) Individual unequivocally im-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
plies reference to one of the class or group as clearly distinguished from all the others (the aspect of every individual stone or brick—Conrad) (one could hardly maintain the courage to be individual, to speak with one’s own voice—Mailer) (it was not the magnitude or multiplicity of burdens that created martyrs and saints; it was the individual capacity to bear suffering—Hervey)

**Ana** distinctive, peculiar, individual, *characteristic:*
*exceptional: uncommon, occasional, rare (see infrequent)*

**Con** *common, ordinary, familiar: *usual, customary, habitual

**species** cash, currency, *money, legal tender, coin, coinage

**specious** specimen example, sample, illustration, *instance, case

**specific** adj 1 *special, especial, particular, individual

**Ant** generic
2 definite, *explicit, express, categorical

**Ana** designating, naming (see designate): *clear, lucid, perspicuous: precise, exact (see correct adj)

**Ant** vague

**specific n.** remedy, cure, medicine, medicament, medication, physic

**specify** *mention, name, instance

**Ana** cite, *quote: stipulate (see corresponding noun under condition)

**specimen** example, sample, illustration, *instance, case

**species** plural, believable, colorable, credible

**Ana** vain, nugatory, empty, hollow, idle: delusory, delusive, *misleading, deceptive: deceitful, dishonest, untruthful, mendacious, lying

**speculate vb** *spot, spatter, sprinkle, mottle, fleck, stipple, marble, spangle, bespangle

**speculated** spotted, spattered, sprinkled, motled, flecked, stippled, marbled, spangled, bespangled (see under spot vb)

**spectator, observer, beholder, look-on, onlooker, witness, eyewitness, bystander, kibitzer** are comparable when they mean one who sees or looks upon something. Spectator can be used precisely in place of spectator broadly to denote one who regards himself or is felt to be wholly apart from and in no manner identified with what he sees and what he sees is stressed (the onlookers, not the participants, see most of the game) looks-on often see what familiarity obscures for the participants—Moberly

they dropped, panting, while the onlookers repeated that it was a shame and somebody ought to stop them—Davis

**Witness** specifically denotes one who has firsthand knowledge and therefore is competent to give testimony (no person shall be convicted of treason, unless on the testimony of two witnesses to the same overt act—U. S. Constitution) The term sometimes applies to a person who knows because he has seen (standing there, I was witness of a little incident that seemed to escape the rest—Quiller-Couch) but since witness does not necessarily imply seeing, eyewitness is often preferred as more explicitly implying actual sight (there were no eyewitnesses of the collision) (incontrovertible evidence, with occasional corroboration from the eyewitness accounts of the few survivors—Shirer)

Bystander primarily denotes one who stands by when something is happening; sometimes it carries the implication of onlooker (the policeman took the names of all the bystanders) (men have been haunted recurrently by the question “Am I my brother’s keeper?” . . . It is what makes being a bystander more and more impossible—Rothman) but at other times it suggests little more than presence at a place (difficult for each member of the society really to participate . . . . He begins to be an onlooker at most of it, then a bystander, and may end up with indifference to the welfare of his society—Kroeber) (a bystander was injured by the explosion) Kibitzer specifically applies to one who watches a card game by looking over the shoulders of the players and who may annoy them by offering advice; in extended use the word denotes an onlooker who meddles or makes unwelcome suggestions.

**specter spirit, ghost, *apparition, phantasm, phantom, wraith, shade, revenant

**speculate reason, reflect, *think, cogitate, deliberate

**speculative 1** contemplative, meditative, *thoughtful, reflective, pensive

**speech** 1 *language, tongue, dialect, idiom
speechless *dumb, mute, inarticulate

speech n 1 *haste, hurry, expedition, dispatch
Ana *celerity, legerity, alacrity: fleetness, rapidity, swiftness, quickness (see corresponding adjectives at fast): velocity, pace, headway (see speed)

2 Speed, velocity, momentum, impetus, pace, headway are comparable but not all mutually synonymous terms that basically apply to motion through space. Speed (see also haste n) denotes rate of motion, a value computable by dividing the distance covered by the time taken (a car that covers 300 miles in 5 hours has an average speed of 50 miles an hour.) Velocity denotes the speed of something that is directed along a given path. Ordinarily velocity suggests rate of motion in a straight line (linear velocity) or in an arc or circle (angular velocity) (the velocity of a bullet) (the velocity of a skier) (velocity of a wind) (velocity of light) (a body rotating about a fixed axis with a constant angular velocity) Momentum in general or casual use may take the place of speed or velocity, but in technical use it denotes not rate of motion but quantity of motion, a value determinable by multiplying the mass of a moving body by its velocity (falling stone gathers momentum) (the momentum of an iron ball rolling down an inclined plane is greater than that of a cork ball of the same diameter rolling with the same velocity) (as photons are always in motion, we may also speak of the momentum of a photon, much as we speak of the momentum of a motorcar—Jeans) Impetus (see also stimulus) is a popular rather than technical synonym of momentum. In practice it is a closer synonym of impulse in the sense of the effect of an impelling force, for it regularly carries an implication of a rushing upon or an onset, with the result that it usually suggests great momentum or implies a powerful driving force as the cause of such momentum (whether the steam ... retains sufficient impetus to carry it to our shores—T. H. Huxley) (the circulating blood receives a new impetus from the contraction of the ventricles of the heart) Pace belongs here not as a technical term but as a term in general use to denote the speed of or as if of one (as a person or horse) going afoot (he set the pace for his companions on the hike) (the pace was too slow for the rest of the party) Pace often finds extended use in describing such things as activities, progress, or rate of production (keep pace with the times) (the factories were asked to increase their pace) (in New York he had moved on from speed to speed and from height to height, keeping pace with all the most magnificent developments in the furious city—Wolfe) Headway basically applies to motion forward and in this sense is used chiefly in reference to ships (he started the screw turning until the African Queen was just making headway against the current—Forester) However it frequently denotes rate of movement ahead and then is used in reference not only to ships but to whatever is capable of advancing or making progress (our mutual security program had suffered a year of lost headway—Barnett) (the independent movements of nominalism and German mysticism made great headway—Thilly)

speed vb Speed, accelerate, quicken, hasten, hurry, precipitate can mean to go or make go fast or faster. Speed emphasizes rapidity of motion or progress; as a transitive verb it suggests an increase in tempo; as an intransitive verb, a high degree of swiftness (speed up an engine) (speed up the work in a factory) (the bullet speed through the air) (arrested for speeding) (the stoutest of the boatmen seized the staff out of turn and hurrying through the air) (arrested for speeding) (the stoutest of the boatmen seized the staff out of turn and hurrying through the air)

speed n 1 *haste, hurry, expedition, dispatch
Ana *celerity, legerity, alacrity: fleetness, rapidity, swiftness, quickness (see corresponding adjectives at fast): velocity, pace, headway (see speed)

Spent, spendthrift, prodigal, profligate, waster, wastrel are
comparable when they denote a person who dissipates his resources foolishly and wastefully. All are more or less pejorative terms but they may differ significantly in emphasis and application. *Spent* and *prodigal* are the most nearly neutral terms and in themselves, as apart from context, carry little suggestion of moral obliquity; they are, however, the members of the group with specific legal applications and are generally applicable when the basic notion is one of unwise and wasteful expenditure usually of material resources (as wages, wealth, or property). *Spent* stresses lack of prudence in spending and usually implies imbalance between income and outgo rather than lavishness (to *spendthrift* there is only one limit to their fortune,—that of time; and a *spendthrift* with only a few crowns is the Emperor of Rome until they are spent—Stevenson) (a *spendthrift* is a man ... that they shall be mere mechanisms in working hours 

**Word List**

- sphere: field, domain, province, territory, bailiwick
- spew: *belch, burp, vomit, disgorge, regurgitate, throw up

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
led into wild shooting frays by a high-spirited girl—
Anthony Boucher} <too high-spirited to be passive in-
stuments in his hand—William Robertson} <they were
high-spirited, perhaps a little insolent as well as reckless
—Ellis} Mettlesome differs little from high-spirited ex-
cept in its tendency to stress fearlessness and vigor more
than restiveness <he found himself immediately at grips
with one of the watch, a mettlesome fellow who fought
like a wildcat—Costain} <his occasional scarcities are no
more than a high-spirited gaiety and his quarrels no
more frequent or violent than might be normal in any
mettlesome youngster—Edgar Johnson} Spunky often
implies qualities similar to those suggested by high-spirited
and mettlesome but it carries a stronger implication
of quickness in taking fire and of an incapacity for being
downright or daunted; also, the term is often applied
to unlooked-for courage in persons or animals <she was
under five feet and weighed less than ninety pounds,
but he would have had an armful of spunky vitality—
Thurber} <one of the great subjects for biography is that
spunky, crotchety, illiterate, and wonderfully gifted maker
of things, Henry Ford—Gill} Fiery, peppery, and gingery
are used as synonyms of the preceding terms when one
prefers a more concrete term. Fiery, suggesting the heat
of flame or fire, implies impetuosity, passionateness,
or sometimes irascibility in addition to spiritedness <a
fiery soul, which, working out its way, fretted the pygmy
body to decay—Dryden} <a fiery, tortured spirit, aiming
at something greater than could be conceived by anything
that was bound up with the flesh—Maugham} <the
fiery thinker who flattened a generation with the hail of
his words—Tracy} Peppery adds to spirited suggestions
of a hotness or pungency characteristic of pepper and
often distinctively connotes asperity or excitability <a
peppery response} <Master Rickey is a peppery young
man. Love and war come as natural to him as bread and
butter—Meredith} <as he makes clear in peppery foot-
notes and caustic asides, he has aimed at an absolute
precision of factual detail—Kazin} Gingery carries a
heightened suggestion of a zest, spiciness, or snap asso-
ciated with ginger <in gingery good health at 55—News-
week} <he learned the high quick gingery ways of
thoroughbreds—Masefield}

surpassing, transcending or transcendent (see corresponding verbs at *EXCEED*)

**splenetic** *irascible, choleric, testy, touchy, cranky, cross AnA morose, *sullen, glum, gloomy: *irritable, querulous, peevish, snappish: captious, carping, caviling (see *CRITICAL*)

**split** vb *rend, cleave, rive, rip, *tear AnA *separate, part, divide, sever: *cut, chop, hew

**split** n *break, break, schism, rent, rupture, rift AnA *crack, cleft, fissure: estrangement, alienation (see corresponding verbs at *ESTRANGLE*): schism, heresy (see corresponding nouns at *HEREGETIC*)

**split second** *instant, moment, second, minute, flash, jiffy, twinkling

**spoil** n *Spoil, plunder, booty, prize, loot, swag can mean something of value that is taken from another by force or craft. Spoil applies to the movable property of a defeated enemy, which by the custom of old-time warfare belongs to the victor and of which he strips a captured city or place (*fire the palace, the fort, and the keep—leave to the foe no spoil at all*—*Kipling*) With changes in methods and customs of warfare spoil, and especially its plural spoils, tends to be applied not only to property or land taken over by conquering forces in actual warfare or demanded by them from the conquered as a condition of making peace but also to whatever by custom and often unethical custom belongs to a victor whether in warlike endeavor or more peaceful pursuits; thus, in political use spoils applies chiefly to appointive public offices and their emoluments which the successful party in an election regards as its peculiar property to be bestowed as its leaders wish. But spoil may also apply to something gained by skill or effort (*the spoils of a conservative industrial life—*Brooks) or sometimes acquired as casually as if by looting (*the car filled with country spoils*) (*brought back all sorts of frivolous spoils from her trip*)

Plunder implies open violence (as of marauders) and is a more inclusive term than spoil because not restricted to warfare; it consistently implies robbery, whether as incidental to war or as dissociated from it and is applicable to what has been seized not only by spoilers, pillagers, and sackers but by such ruffians as bandits, brigands, and highwaymen (*often the pirates were glad to accept money instead of plunder, and ransom for the slaves—*Forester) (*a useless compiler, who fills letters and sermons with the plunder of the ancients and Holy Writ—H. O. Taylor*)

**Booty** like plunder, is applicable to martial spoils as well as to what is seized by or as if by robbery or theft (*birds like the berries. They gather them, fly to top branches where they can be on the lookout for danger, and eat their booty—*Dorrance*) (*a cat springing on an oriole and marching proudly off with her golden booty projectting . . . from her mouth—*Brooks*)

In international law booty is technically used in distinction from *prize, booty referring to spoils taken on land, and prize, to spoils captured on the high seas or in the territorial waters of the enemy (*finished, but never published, a Latin treatise on the right of seizing prizes at sea—*Barr*)

**Loot** may be used in place of *plunder, booty, or spoils* when a highly derogatory or condemnable term is desired (*thrown into the conflict by a hope of sharing in the loot of the Church—*Bellow*) (*they believed that the revolution which they had fought by brawling in the streets would bring them loot and good jobs—*Shirer*)

The term is also applied specifically to the plunder of those who rob the dead or helpless victims of a catastrophe or who steal anything left of value in the ruins of buildings wholly or partly destroyed (as by fire, flood, earthquake, or violent storm) (*prowlers among the ruins in search of loot*) In more general use the term is applicable to gains felt as ill-gotten (*corrupt officers enriched by the loot of years*) Swag is also often used in place of *loot or plunder especially to imply a collection or sackful of valuables gathered by or as if by thieves (*asserted that the swag from . . . graft was kept hidden . . . in a metal box buried in the backyard—F. L. Allen*) (*certain the great swag of doubloons was there—if he could only find it—*Dobie*)

**Ana** *theft, robbery, larceny, burglary: acquisitions, acqurements (see singular nouns at AcQuireMENT*)

**spoil** vb 1 *injure, harm, hurt, damage, impair, mar AnA *ruin, wreck: *destroy, demolish Con preserve, conserve, *save: amend, redress, remedy (see correct vb)

2 *endulge, pamper, humor, baby, mollycoddle AnA *injure, harm, hurt, damage: favor, accommodate, *oblige: *debase, deprave, vitiate, debauch

3 *decay, decompose, rot, putrefy, disintegrate, crumble AnA corrupt, vitiate (see DEBASE): *ruin, wreck: impair, harm, *injure

**spoliator** despoil, *ravage, devastate, waste, sack, pilage AnA *rob, plunder, rifle, loot: defraud, swindle, *cheat

**sponte** *parasite, sycophant, favorite, toady, lickspittle, bootlicker, hanger-on, leech

**sponsor** n Sponsor, patron, surety, guarantor, backer, angel are comparable when they denote a person who in a greater or less degree accepts responsibility for another person or for a particular venture or undertaking. Sponsor usually implies public acceptance of a responsibility and a definite engagement to perform what is promised; the word implies making a pledge in behalf of another and thereby accepting responsibility for its fulfillment; thus, the sponsor of an infant in baptism makes the promises in the child's name and pledges himself to be responsible for the child's religious training if the latter is deprived of his natural guardians. In a wider sense sponsor suggests assumption of the role of promoter or supporter and may imply acceptance of any degree of responsibility from one that is complete (*it is my way, when I have finished a book, to let it drop with a resigned shrug . . . The charm it once possessed for me, its sponsor, has long since vanished—Thomas Mann) to that which is indirect or remote and often purely economic (*the major sponsors of scientific research, governments and business corporations—*Flew*) (*for every person whose passage was paid to Virginia, the sponsor received fifty acres of land—Smelser & Kirwin*)

**Patron** stresses the acceptance of the relation as a protector or benefactor especially in return for service, honors, or devotion; it often implies the obligation to assist, support, or defend; thus, a patron of an artist or of a poet is a wealthy or influential person who makes him a protégé presumably in return for honors paid him: the patron of an institution, a cause, or a charity is one whose generous and regular contributions to its support are publicly recognized. Surety and guarantor imply answerability for another's debt or performance of duty in case of default because of prior acceptance of responsibility. Backer, less specific in denotation than the other terms, is used chiefly in relation to enterprises (as of sports, politics, and the theater); it often implies the giving of financial support, sometimes merely moral support or encouragement, but it carries no implication that responsibility for debts is assumed. *The success of a publication is the success of its editors, and not of its business managers and its backers—*Hendrick

**Angel** is a somewhat derogatory or contemptuous term for a financial backer, especially of a theatrical enterprise. AnA supporter or support, upholder, champion, advoca-
spontaneity abandon, *unconstraint

Analogous words

Ana spontaneousness, instinctiveness, impulsiveness (see corresponding adjectives at SPONTANEOUS): extemporaneous, offhandedness, unpremeditated (see corresponding adjectives at EXTEMPORANEOUS): naturalness, simplicity, unsophisticated, naïveté, ingenuousness (see corresponding adjectives at NATURAL)

Impulsive, instinctive, automatic, mechanical in application to persons or their movements, acts, and utterances mean acting or activated without apparent thought or deliberation. Spontaneous can describe whatever is not affected or effected by an external or internal compulsion of the will and comes about so naturally that it seems unpremeditated as well as unprompted (a spontaneous burst of applause) (a spontaneous expression of feeling) (the spontaneous wish to learn, which every normal child possesses) should be the driving-force in education—Russell (the Witticisms are never planted: they are spontaneous and over in a flash, like the quick striking of a match—Edmund Wilson) Impulsive applies to someone or something acted upon suddenly and impetuously under the stress of the feeling or spirit of the moment and seeming to be involuntary and forced by emotion rather than voluntary and natural (an impulsive act of generosity) (my heart, impulsive and wayward—Longfellow) (he made an impulsive gesture, and opened his lips; but he dared not speak—Deland) (to promote the carefree, impulsive purchasing of new items—Packard) Instinctive implies the guiding influence of instinct and a native and unreasoned prompting to actions characteristic of the species and presumably contributing to its life and well-being; when referred to human beings, the term is applied to actions, movements, or feelings which are instantaneous, unwilled, and often unconscious (as reflex movements, habitual actions, or automatic, mechanical) apply to what at least to outward appearances seems to engage neither the mind nor the emotions and to suggest the operation of a machine. But automatic, like instinctive, stresses promptness in the response. It differs from instinctive, however, in implying adaptability to changing circumstances and readiness to react or to respond immediately and unvaryingly each time a given situation or stimulus recurs (the response of a well-trained soldier to commands are automatic) (he pulled the hall door open, and he held it, in automatic and habitual caution, scarcely ajar—Boyle) (in fact, voting is so nearly automatic that a cynic might ask why we have election campaigns at all—Bliven b.1889) Mechanical, on the other hand, stresses the lifeless and, often, the perfunctory character of the response. It does not, as automatic often does, suggest perfect discipline; rather, it suggests a mind dulled by repetition of the act, motion, or operation and capable only of routine performance (he would deal you out facts in a dry mechanical way as if reading them in a book—Hudson) (engaged in futile and mechanical lovelmaking, compulsive drinking, and considerations of suicide—Aldridge)

Ana *extemporaneous, extempore, impromptu, improvised, offhand, unpremeditated: *natural, simple, ingenious, unsophisticated 2 *automatic

Spot n *place, position, location, situation, site, station

Ana *locality, district, neighborhood, vicinity: region

*area, tract, belt, zone: section, sector (see Part)

Spot vb Spot, spatter, sprinkles, mottle, fleck, stipple, marble, speckle, spangle, bespangle can mean to cover or to mark or to become covered or marked with spots or streaks. The same distinctions in implications or connotations are found in their participial adjectives (often used as simple adjectives) spotted, spattered, sprinkled, mottled, flecked, stippled, marbled, speckled, spangled, bespangled. Spot usually suggests either accident or a result of nature. When accident or carelessness is suggested, a staining or smirching is often connoted (spot a dress with mud) (spot a cloth with iodine) (the book was spotted with grease) (spotted her stockings in the rain) but, when the agency of art or nature is suggested, some design is usually implied that decorates, covers, or distinguishes; this use occurs mainly in the participial adjective (spotted muslin) (no spotted pony is ever pure Shetland—Riker) (a spotted leopard) (a spotted orchid) Spatter (see also Sprinkle) essentially implies a dispersing or scattering in fragments; in general it presupposes an action (as of boiling grease, of dashing rain, or of a person washing) that causes something to fly out in drops or bits upon something or someone (do not get the lard too hot, for it will spatter all over you) (spray from one of the hoses spattered over the longshoremen—Pizer) (his every good fortune spattered others with misfortune—Malamud) (do ye wait for the spattered shrapnel ere ye learn how a gun is laid?—Kipling) Sprinkle (see also Sprinkle) implies an effect of or as if of scattering a liquid in small drops; the term may emphasize the numbers or frequency of tiny spots or the thin streaking of larger ones (his ill-fitting clothes were usually sprinkled with cigarette ashes—Lubel) (the massed rows of black skullcaps and white prayer shawls, sprinkled here and there with the frilly hats . . . . of women—Wouk) (a heavily wooded section, sprinkled with small lakes—Amer. Guide Series: Pa.) Mottle stresses an irregular spotting (as in streaks of color, of light, or of clouds) (overhead the still blue is scarcely flecked by a cloud—Black) (one hillside is flecked by a herd of black goats—Edmund Wilson) (immature birds . . . recognizable by their dark, flecked
plume—E. A. Armstrong> Stipple basically refers to a technique in engraving, painting, or drawing in which dots or short touches rather than lines are used, especially to depict masses or to indicate shadows. The term is often extended to other things that suggest this technique or its effect (accidentally juggled his arm in such wise as to stipple ink over the coat—Perelman) (sunlight that fell through the trees and stippled the sidewalks—Basso) (the quail that spills out of the stippled corn to windy air—Southerly) (a play stippled alternately with tenderness and dynamite—Nathan) Marble comes close to motile, but it is specifically used when by intent or by nature the irregularly streaked effect of variegated marble is reproduced (for the endpapers we use handmade paper marbled by hand—Notes on The Art of Bookbinding) (well-marbled beef) (his uneven eyes, one blind, marbled and sunken in his skull—Malcolm Cowley) Speckle suggests a covering with small and often crowded spots (as of color); the term is sometimes used with a suggestion of the cause or nature of the marks (a few drops of unenthusiastic rain ... speckled the shoulders of his coat—Charteris) (his arms were speckled from wrists to biceps with the punctures of a hypodermic needle—Kohler) (bright stars speckled the sky—Mansfield) Spangle and harmless suggest a thick strewing with tiny sparkling bits (as of shiny metal) or with something giving a similar effect (an evening sheath ... spangled with black sequins—Lois Long) (the spangled palaces of sin and fancy dancing in the false West of the movies—Steinbeck) (grass ... all bespangled with dewdrops—Cowper) (a cold perspiration bespangled his brow—Gilbert) Ana splash, bespatter, besprinkle, asperse (see SPINKLE): *soil, sully, dirty, smirch, besmirch: variegate, checker, dapple, freak (see corresponding adjectives at variegated)

spotted spattered, sprinkled, mottled, flecked, stippled, marbled, speckled, spangled, bespangled (see under spot vb)

sprain n *strain

sprain vb strain (see under strain n)

spread vb Spread, circulate, disseminate, diffuse, propagate, radiate can all mean to extend or cause to extend over an area or space. Spread basically implies a drawing or stretching out to the limit (spread a net) (spread a cloth on the ground) (the bird spreads its wings) (spread a sail) and in the sense here considered emphasizes distribution or dispersion (as by stirring or scattering or being strewed or scattered) over an extent of space that may be large or small or incalculable or calculable (spread fertilizer over a field) (this troublesome weed has spread over a large section of the country) Often it suggests an applying in or a taking the form of a thin layer (spread butter on bread) (the paint spreads thinly and evenly) (the clouds shifted, spread against the sky ... and enveloped everything below—Styron) or a making or becoming more prevalent or more widely known or felt (don't go on spreading that nonsense—Rose Macaulay) (the heretic should be crushed before his heresy can spread—Fitzroy Maclean) (news of us might spread far beyond that town—Shipton) Circulate may imply in its primary and largely technical use a continuous or repeated movement over the same course from starting point to starting point (the blood circulates from the heart through the arteries and veins back to the heart again) (steam circulating through a heating system) In its more general applications the term tends to stress a moving about or a causing to move about freely and continuously, often to the more or less complete loss of the notion of going over the same course again and again (the seats were being filled up rapidly and a pleasant noise circulated in the auditorium—Joyce) (the satire, circulating in manuscript copies, had a great local vogue—Lucas) (all of us circulating ominously, and incognito, throughout the city, sizing up elevator operators—Salinger) Disseminate implies much the same as spread when that word suggests distribution here and there (disseminate information) (the London ladies were indignant, and naturally they started disseminating a vast amount of fruity gossip about the new Lady Turton—Dahl) (in those days the Boy Scout movement was already in existence, but it had still to disseminate sound views about knot-tying among the rising generation—H. G. Wells) Diffuse suggests a spreading throughout a space; it is applied primarily to things (as sound, light, odor, or vapor) that in moving permeate the medium through which they move and in its extended sense to things (as education, knowledge, fame, and spirit) that have or are felt to have a similar pervasive quality in their dissemination (the colors of the sky are due to minute particles diffused through the atmosphere—Tyndall) (it would surely be hard to find any country ... where instruction is more widely diffused—Ellis) (a State in which power is concentrated will ... be more bellicose than one in which power is diffused—Russell) (the so-called "correct speech" is being diffused to the mass of the populace through migration, mass education, and mass communication media—Amer. Sociological Review) Propagate (see also generate; compare propaganda under publicity) implies extension for the sake of increase (as of believers or members or of activity or operation) (propagate the faith) (propagate a false rumor) (I am bound by my own definition of criticism: a disinterested endeavor to learn and propagate the best that is known and thought in the world—Arnold) (extraordinary plebeians who rise sharply ... and so propagate the delusion that all other plebeians would do the same thing if they had the chance—Mencken) Radiate implies a spreading from a center outward in or as if in rays; in general use it is often applied to the spreading of something material or immaterial from a fixed center (soul-searching Freedom! here assume thy stand, and radiate hence to every distant land—Barlow) (her face ... was still pretty, even with the web of little wrinkles that radiated from the corners of her eyes—Basso) (a superb self-confidence radiated from him, as it does from any healthy animal—Gibbons) but in its common technical use the term is largely restricted in reference to diffusion in the form of rays (as of heat or light) (the sun radiates both light and heat)

Ana *distribute, dispense, deal: *scatter, dissipate

spread n *expansile, amplitude, stretch

 Ana extent, area, magnitude, *size: *range, reach, scope, compass

Ana *active, live, dynamic: *agile, nimble, brisk, spry: *merry, blithe, jocund

spring vb 1 Spring, arise, rise, originate, derive, flow, issue, emanate, proceed, stem can mean to come up or out of something into existence. Spring stresses sudden or surprising emergence especially after a period of concealment or hidden existence or preparation (plants spring from seed) (thoughts that sprang up in his mind) (he had not chosen his course. It had sprung from a necessity of his nature—Brooks) (freedom of the mind, the basic freedom from which all other freedoms spring—Davis) Arise emphasizes the fact of coming into existence or into notice more than the conditions attending the event; often it conveys no clear suggestion of a prior state (a rumor arose and was widely circulated) (after Alfred no rival native

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
house arose to dispute the throne with Alfred's heirs—Malone.

When used with from, however, it usually implies a causal connection between what is the object of the preposition and what is the subject of the verb; in such cases it is synonymous with result, though it neither loses nor obscures its primary implication of coming into existence mistakes often arise from ignorance the mischief arose from careless gossip the depression, the shock arising from what had happened abovestairs, left him almost at once—Bromfield.

Sometimes, when the context suggests a cause, the from phrase is omitted where there is continued discontent, trouble is certain to arise the right never existed, and the question whether it has been surrendered cannot arise—John Marshall.

Rise and arise (see also under rise 2) are often used interchangeably, but usage usually favors arise except where, in addition to the implication of beginning, there is either in the word or the context a strong suggestion of ascent new nations rise only to fall mighty forces rise from small beginnings.

The Gothic cathedrals rose in England in the first half of the thirteenth century—Saunders. Great regimes rose based upon the irrational and negative in man's nature—Straiton.

Origin suggests a definite source or starting point which may be specified or located (the theory of evolution did not originate with Darwin) the fire originated in the base ment the newspaper, originated . . . in France, was introduced in the United States in 1910—Mott.

Its founding originated in the Puritans' conviction that learning was essential for godliness—Murdock.

Derive also suggests a source; usually it does not imply, as originate implies, actual inception but presupposes a prior existence in another form or in another person or thing and connotes descent (as by inheritance, endowment, transference, or deduction) the power of the executive derives from the people our thoughts often derive from our wishes the principle of symmetry derives, I suppose, from contemplation of the human form—Binyon.

Much of our thinking about the rights and duties of the citizen derives directly from Greco-Roman thought—Higher.

Flow, issue, emanate in common imply a passing from one thing to another, the former being the source from which the latter is derived. All of these words are colored by their basic meanings. Flow suggests passage like water, easily as if from a spring or abundantly as if from a reservoir praise and remonstrance flowed Gibbons.

Issue most frequently suggests emergence into existence, as if from a womb how far Arnold is responsible for the birth of Humanism would be difficult to say; we can at least say that it issues very naturally from his doctrine—T. S. Eliot. If the naturalist's logic rests on wind, and the ologinous sentences flowed easily from her pen Gibbons.

Emanate is used largely in reference to immaterial constructions (as a law, a principle, a power, or a system of thought); it connotes the passage of something impalpable or invisible and suggests a less obvious causal connection between the source and the thing derived than flow or issue but the house . . . was Carrie's and it was from her issue . . . was Gibbons.

Flowage suggests passage like water, easily as if from a spring or abundantly as if from a reservoir praise and remonstrance flowed Gibbons.

Issue most frequently suggests emergence into existence, as if from a womb how far Arnold is responsible for the birth of Humanism would be difficult to say; we can at least say that it issues very naturally from his doctrine—T. S. Eliot. If the naturalist's logic rests on wind, and the ologinous sentences flowed easily from her pen Gibbons.

Emanate is used largely in reference to immaterial constructions (as a law, a principle, a power, or a system of thought); it connotes the passage of something impalpable or invisible and suggests a less obvious causal connection between the source and the thing derived than flow or issue but the house . . . was Carrie's and it was from her issue . . . was Gibbons.

spring n

1. motive, impulse, incentive, inducement, spur, goad
2. origin, source, root, inception: cause, determinant, antecedent: stimulus, stimulant, excitant, incitement, impetus

springy

elastic, resilient, flexible, supple

spring

yielding, submitting (see yield: recoiling, rebounding (see rebound)

stain n * stigma, blot, brand

Ant: blemish, defect, flaw: mark, * sign, token: * disgrace, dishonor

stake *bet, wager, pot, ante

stalemate n * draw, tie, deadlock, standoff

starvart * strong, stout, sturdy, tough, tenacious

Ant: jaunty

stammer vb Stammer, stutter both mean to speak in a faltering, hesitating, or stumbling manner. Stammer usually implies a proximate cause (as fear, embarrassment, or a sudden shock) which deprives one for the time being of control over his vocal organs and inhibits his power to speak straightforwardly; the word can suggest a blocking in which one either cannot form sounds or a slow con-
fused articulation or an involuntary repetition of sounds or words (the eloquent tongue forgot its office. Cicero stammered, blundered, and sat down—Froude) ("Why—why—" stammered the youth struggling with his talking tongue—Crane) Stutter usually stresses the involuntary repetition of sounds, especially of consonantal or syllabic sounds. It is less likely than stammer to imply a proximate cause and typically, especially in medical use, implies a constitutional defect (as a nervous affliction or a speech defect) which results in a habitual and persistent speech problem (no two persons stutter alike . . . a stutterer who stumbles over the initial of "Peter" may have no trouble with any other p in . . . "Peter Piper's peppers"—Scripture) (this gentleman has . . . a small natural infirmity; he stutters a little—Foote) In nontechnical use the terms are often used interchangeably especially in their extended senses, in which both terms are freely employed either in reference to a fluctuating repetitive sound or to something that halts or progresses by fits and starts like the speech of a stammerer or stutterer (<climbed into his Ford and stuttered down the hill—Steinbeck> (her pen sometimes stammers with the intensity of the emotion that she controlled—Woolf) (<a brilliant idea stands still and stuttering—Pritchett>)

**Stamp**

*mark, brand, label, tag, ticket*

**Standard, criterion, gauge, yardstick, touchstone** can apply to a simple device by which authenticity or value may be determined and especially to an authentic or superior instance of a class of things by comparison with which another thing may be judged authentic or superior (<consistency is a touchstone by which the basic doctrine can often be distinguished from the propaganda line—L. C. Stevens> (a Marxist critic using economic determinants, social perspectives, and class consciousness as his touchstones—Glicksberg) (<the chief touchstone to folklore is the manner in which it is transmitted: one man tells another, one man shows another—Emrich>)

**Ana** norm, median, par, mean, *average: rule, *law: *principle, fundamental, axiom: *model, pattern, exemplar

*ideal, beau ideal, *model, pattern, exemplar, example, mirror*

**Standard** n 1 *flag, ensign, banner, color, streamer, pennant, pendant, pennon, jack

2 **Standard, criterion, gauge, yardstick, touchstone** can all mean a measure by which one judges a thing as authentic, good, or adequate or the degree to which it is authentic, good, or adequate. **Standard** applies to an authoritative rule, principle, or measure used to determine the quantity, weight, or extent or especially the value, quality, level, or degree of a thing (each generation . . . has its own ideals and its own standards of judgment—Crothers) (<the ideal of general cultivation has been one of the standards in education—Eliot> (the building . . . by all the standards of St. Botolph's . . . would be condemned as expensive, pretentious, noisy and unsafe—Cheever)

**Criterion** denotes the thing, whether formulated into a rule or principle or not, by appeal to which one arrives at or confirms a given judgment (as of value, quality, fitness, or correctness) (<the sole criterion of the truth of illusion is its inner congruity—Lowes> (<the size of sunspots is a meaningless criterion in predicting the havoc which may occur to radio transmission—Dawes> (<no exact criterion for a just and fruitful apportionment of the surplus wealth—Hobson>) (<these laws . . . did establish useful criteria of conduct—Handlin>) **Gauge**, concretely a standard measure or scale or an instrument for measuring something that fluctuates (as in size or height), can in extension apply to a standard measure whether tangible or not (<a piece of 1/8 inch thickness fiber or wood makes a convenient gauge in setting brush holders—Mill & Factory> (<the inarticulate, whose ferocity was a gauge of the injustices they had suffered—Bruce Marshall>) (<the degree of public acceptance of the opinions of leaders is the ultimate gauge of the importance and validity of those opinions—Rafferty>) **Yardstick**, basically a measuring stick a yard long and subdivided into inches and fractions of inches, is often extended to standards or criteria especially for something intangible or immaterial (<no absolute or universal yardstick about what constitutes a frustration—Kardiner>) (<the consumption of petroleum products, an accurate yardstick of economic growth—The Lamp>) **Touchstone** can apply to a simple device by which authenticity or value may be determined and especially to an authentic or superior instance of a class of things by comparison with which another thing may be judged authentic or superior (<consistency is a touchstone by which the basic doctrine can often be distinguished from the propaganda line—L. C. Stevens> (a Marxist critic using economic determinants, social perspectives, and class consciousness as his touchstones—Glicksberg) (<the chief touchstone to folklore is the manner in which it is transmitted: one man tells another, one man shows another—Emrich>)

**Ana** see those at **Standard 2**

**Stand-in** *substitute, supply, understudy, double, locum tenens, alternate, pinch hitter

**Standoff** n *draw, tie, stalemate, deadlock

**Standpoint** *point of view, viewpoint, angle, slant

**Ana** stand, *position, attitude

**Stanza** *verse

**Stare** vb *gaze, gape, glare, peer, gloat

**Stark** *stiff, rigid, inflexible, tense, wooden

**Ana** settled, established, fixed, set (see set vb)

**Con** *elastic, resilient, springy, flexible, supple: fluid, liquid

**Starry**, stellar, astral, sidereal can mean of, referring to, or suggestive of a star or group of stars. **Starry** is the ordinary nontechnical term, capable of being used in reference to stars of various kinds (as the celestial bodies known as stars or the geometrical figure with five, six, or more points that is the conventionalized star) (<a starry night> (<a starry banner> (<a starry eyes> (here are the skies, the planets seven, and all the starry train—Housman>) (<a starry towers of Babylon Noah's freshest never reached—Yeats>) **Stellar** has the same range of reference as **starry**, but, since the connotations of the words are not the same, they are rarely interchangeable; **starry** gathers its connotations (as of brilliancy, remoteness, and beauty) chiefly from the appearance of the celestial stars to the ordinary observer; **stellar** derives its suggestions chiefly from astrological lore of the stars as influencing all things and as shaping human destinies or from astronomical knowledge of the constitution, arrangement, and classification of stars; thus, one tends to speak of a **stellar**, rather than a **starry**, influence or aspect; of a **stellar**, rather than **starry**, eclipse or nebula (<these soft fires . . . shed down their stellar virtue on all kinds that grow on Earth—Milton>) (<Kapteyn worked nearly alone in the field of stellar astronomy—G. H. Gray>) **Stellar** is also used more often than **starry** of theatrical or cinematic stars (<stellar roles in operas and musical festivals—Current Bio>) and it alone is freely used to imply outstanding quality or position in other relations (<a dependable working staff, and a stellar panel of consultants—Hartwell>) (<he just wasn't a stellar naval officer in the eyes of his subordinates—Lois & Don Thorburn>) **Astral** is in much of its use a technical term in theosophy and similar cults, and in more general use it is likely to bear connotations of spirituality, mysticism, and remoteness from the fleshly that derive largely from mythological
and other conceptions of the stars as the abode of celestial spirits or of supersensible beings whose nature and constitution are rarer and finer than those of earthly human beings. <enchantments that unlock a crystal cage; an alphabet with astral fire seasoned—Wylie> <an astral thinker with disturbing, visionary thoughts of helping the whole world—Newsweek> <an astral myth> a state of mind which may resemble that of a soul in its astral body looking back upon its corporeal one—Beebe> Sidereal is sometimes interchangeable with the other terms <walls of interlocked magnolias, sidereal with white, fragrant blossoms—Nat'l Geog. Mag.> <I felt that he was an Intelligence which had borrowed form and substance in deference to the requirements of sidereal politeness—Henry Miller> but distinctively it is used in opposition to solar, especially as applied to periods of time measured by the rotation of the earth with reference to a given star; thus, the sidereal day, determined by reference to Aries, is 3 minutes and 59.91 seconds shorter, as measured in solar time, than the mean solar day.

start vb *begin, commence, initiate, inaugurate

Ana institute, *found, establish, organize: *enter, penetrate: originate, proceed, *spring

startle scare, alarm, terrify, terrorize, *frighten, fright, startle

Ana *surprise, astonish, astound: rouse, arouse, *stir: electrify, *thril

state n State, condition, mode, situation, posture, status can all mean the way in which a person or thing manifests his or its existence or the circumstances under which he or it exists or by which he or it is given a definite character. State may be used so generally that it denotes merely a form of existence which has little or no relation to material being (as in space or time or as substance) but is purely immaterial and typically mental or spiritual. <Dante's Inferno> reminds us that Hell is not a place but a state—T. S. Eliot> The term may also be used specifically to name the combination of circumstances affecting a person or thing at a given time or the sum of the relations, qualities, or characteristics involved in his or its existence at the time under consideration. <Aries fifty years happily in the state of marriage> <the present state of industry> <the historian . . . visited Alexandria during the reign of this king. He was disgusted with its state—Farrington> <parents have probably gone too far in one direction and nature's reacting, trying to get back to the state of equilibrium—Huxley> Condition is interchangeable with state only when the effect or influence of present circumstances on actual or concrete existence is implied <the present condition of the country> it is a condition which confronts us, not a theory—Cleveland> It regularly carries a stronger implication than state of a relation to the causes or circumstances which produced or are producing the effect and a weaker suggestion of the duration of that effect; also, condition may be used in the plural in the sense of combination of circumstances and of qualities or characteristics, as state may not <his physical condition improved with rest and sufficient exercise> <under the best conditions, a voyage is one of the severest tests to try a man—Emerson> <I probably had been hoping . . . the book would not change my life too much. I wished at that time to protect a modest condition—Mailer> <there is no possible method of compelling a child to feel sympathy or affection; the only possible method is to observe the conditions under which these feelings arise spontaneously, and then endeavor to produce the conditions—Russell> This suggestion of a relation to an external cause or causes is often so strong that the word frequently denotes a circumstance that serves as a causative influence or prerequisite rather than a combination of circumstances that form a state of being (see under condition 1) Mode (see also method; fashion 2) is basically a philosophical term; typically it implies an opposition to the underlying reality which can be known only from its external manifestations (as color, form, and texture), and it usually applies to the combination of characters by which substance is manifested in a particular individual or instance <no mode . . . can exist except as the mode or modification of a substance; the substance is the abiding principle, the mode is transitory. The particular mode . . . is but a temporal expression of the substance—Thilly> <nearly all [painters] use color as a mode of form. They design in color, that is in colored shapes—Clive Bell> In somewhat less restricted use the term can apply to something that expresses or exemplifies a typical form or value of a larger class; thus, the mathematical mode is the most frequent value in a statistical array; the mode of a rock is its specific mineral composition as distinguished from the norm of its kind <Rousse's mode unit is the smallest isolated item pertaining to a prehistoric manufacture . . . This mode, or attribute, is a concept many archeologists work with in pottery classification—Willey> Situation applies to a state or condition that represents a combination of definite concrete circumstances, often such a conjunction of particular circumstances that the whole has a peculiarly interesting character; more than state or condition, situation implies an arrangement of these circumstances not only with reference to each other but also with respect to the character or circumstances of the persons involved so as to make for a particular resulting condition (as of difficulty or advantage, embarrassment or elation, or uncertainty or security) <such views of life were to some extent the natural byproducts of her situation upon her nature—Hardy> <there was a dizzy succession of events and of constantly changing situations for a politician to watch—Shirer> <that slender, unrugged erectness, and the fine carriage of head, which always made him seem master of the situation—Cather> The term is also applied to a comparably striking and interesting combination of events in a narrative, especially one whose outcome involves uncertainty or suspense <one knows the situation in fiction—the desperate girl appealing out of her misery to the Christian priest for help. So many women have this touch of melodrama, this sense of a situation—Rose Macaulay> <a master of plot and situation, of those elements of drama which are most essential to melodrama—T. S. Eliot> Posture (see also posture 1) may be used in the sense of condition when that represents a state into which one is forced by need of preparation for something to come <put a warship in a posture of defense> <Christ insisted upon a certain . . . posture of the soul as proper to man's reception of this revelation—Liddon> <Spanish chansons have no solemnity: . . . which doesn't preclude a general devout posture of mind—Santayana> The term is often a closer synonym of situation than of condition <a virgin of thirty-two, already lapsing, though naturally attractive and sprightly, into the mental posture of old maidhood—Follett> <production which will permit us to maintain both a strong economy and a strong military posture—Truman> Status may indicate an individual's state or condition as determined with some definiteness for legal administrative purposes or by social or economic considerations <the change in the status of the Negro, under the Thirteenth Amendment, from three fifths of a person to a whole person in computing state apportionment—C. L. Thompson> <a married woman's status was determined entirely by that of her husband—Ogg & Ray>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
state 773 steady

§the job which a person is supposed to do . . . is what Linton and others call his role. The position which he occupies on the social ladder, as a result of his general practice of leading or following, supervising or being supervised, in the totality of his activities, is his status—Coon

§the social sciences have been, since their institution, jealous of their status as science—R. M. Weaver

§the city’s status as a tourist attraction—Sargeant!

Sometimes the term specifically denotes a superior state or condition and then implies elevated rank in a hierarchy <make him feel a man of status in the community—Beaglehole> <the status seekers . . . continually straining to surround themselves with visible evidence of the superior rank they are claiming—Packard> <because she could not accept less than twenty pounds a week without loss of status and got it but barely, she was doomed to remain an amateur—Yeats> Even in uses in which it comes close to the specific aspect of state or the corresponding aspect of condition, status tends to retain some suggestion of a hierarchical relation and correspondingly, of comparison; thus, one might comment “his mental state, or condition, is a cause for concern” as a simple declaration, but “his mental status is unsatisfactory” implies comparison <established the bank’s status as an independent international organization—Collier’s Yr. Bk.> <Keynes regards the rate of interest and the marginal efficiency of capital as possessing something like the status of independent variables—Feuer> <a quiet German-American farming community, a status it managed to maintain for nearly two decades—Amer. Guide Series: Mich.>

state vb 1 *say, utter, tell

2 report, *relate, rehearse, recite, recount, narrate, describe

Ana expound, *explain, elucidate, interpret: *assert, affirm, declare, profess

stately magnificent, imposing, majestic, august, *grand, noble, grandiose

Ana princely, regal, royal, *kingly, imperial: *splendid, glorious, superb, sublime: sumptuous, opulent, *luxurious

statesman *politician, politician

station n 1 *place, position, location, situation, site, spot

Ana *locality, district, vicinity, neighborhood: region, *area, zone, belt, tract

2 *habitat, biotype, range

statue *image, effigy, icon, portrait, photograph, mask

stature *quality, caliber

Ana capacity, *ability: competence, qualification (see corresponding adjectives at ABLE)

status situation, posture, condition, *state, mode

statute 1 ordinance, regulation, *law, rule, precept, canon

2 *bill, act, law

staunch *faithful, loyal, true, constant, steadfast, resolute

Ana trusty, trustworthy, *reliable, dependable, tried: stout, *strong, tough, tenacious, sturdy, stalwart

Con *inconstant, fickle, mercurial, unstable, capricious

stay vb 1 Stay, remain, wait, abide, tarry, linger can mean to continue to be in one place for a noticeable time.

Stay, the most general of these terms, stresses continuance in a place or sometimes in a specified condition; it often specifically connotes the status of visitor or guest <they could not decide whether to stay or to go> <they went for tea and stayed for dinner> <staying a while at the Joneses, he could quietly insinuate . . . hilarious things about the Joneses when he weekended with the Browns—Theodore Sturgeon> Remain is often used interchangeably with stay but distinctively means to stay behind or to be left after others have gone <few remained in the building after the alarm was given> <a little verse my all that shall remain—Gray> <she remembered her decision to send the young people of the village into the woods. There would have been many more casualties had they remained—Linklater> Wait implies a staying in expectation or in readiness <at his request no one waited for him at the pier> <the taxi waited while they were shopping> <the lights in the window had a leering, waiting look, like that on the faces of old pimps who sit in the cafés—Gibbons>

Abide implies prolonged staying or remaining after at length and usually connotes either stable residence or patient waiting for an outcome <she hated the change; she felt like one banished; but here she was forced to abide—Hardy> Tarry implies staying when it is time to depart or to proceed <do not tarry if you wish to catch the noon train> <some children like to tarry on the way to school> (the celebrated trade winds . . . ceased to blow, and over the island a horrid stillness tarried—Stafford)

Linger, like tarry, usually implies outstaying one’s appointed or allotted time; frequently, however, it also implies either deliberate delay or disinclination to depart (strange, that now she was released she should linger by him—Meredith> <she shouldn’t have come to the hotel suite. She shouldn’t have lingered—this was fatal—after the others had left—Wouk> <after the guests had tarried long over their tea and had done with their jokes, the woman still lingered—Buck>

Ana *delay, procrastinate, lag, loiter: *arrest, check, interrupt: *continue, persist

2 sojourn, lodge, put up, stop, *reside, live, dwell

3 *defer, postpone, suspend, intermit

stay vb *base, found, ground, bottom, rest

steadfast staunch, resolute, constant, true, *faithful, loyal

Ana settled, established, set, fixed (see set vb): *steady, constant: stable, durable, perdurable, *lasting: enduring, persisting, abiding (see continue)

Ant capricious

steady adj Steady, uniform, even, equable, constant are comparable when they mean neither markedly varying nor variable but much the same throughout its course or extent. Steady is the most widely applicable of these terms; in general it suggests regularity and lack of deviation, especially in movement, but it may imply such fixity in position as to be immovable or unshakable <steady as a rock> (a steady pole) or such consistency in character or conduct as to be perfectly reliable <a steady workman> (maybe she’d marry the first nice and good steady fellow with a steady job who’d be a steady provider—Farrell)

When movement, motion, or direction is implied, the term may connote lack of fluctuation (a steady market) <steady prices> (a steady flame) (you can’t make millions on books, but it’s a steady respectable business—Buck) or lack of nervousness with hinged knees and steady hand to dress wounds—Whitman> (a steady voice) or a constant uninterrupted flow or pursuit (a steady stream) (a steady rain) (steady work)

Uniform stresses the sameness or likeness of the elements, parts, units, or instances that comprise a whole (as an aggregate, a series, a combination of instances, a course, or a texture) (the cells of the human organism are not uniform in structure and function) (the progress of civilization is not wholly a uniform drift towards better things—Whitehead) <one of the most fundamental social interests is that law shall be uniform and impartial—Cardozo> <the
steady vb *stabilize, poise, balance, ballast, trim
Con *shake, rock, agitate, convulse

steal, pilfer, filch, lurk, lift, pinch, snitch, swipe, cop are comparable when they mean to take another's possession without right and without his knowledge or permission. Steal, the commonest and most general of the group, can refer to any act of taking without right, although it suggests strongly a furtiveness or secrecy in the act (steal a pocketbook) (steal jewels) (steal a kiss) (steal a glance at someone) Pilfer suggests stealing in small amounts or with cautious stealth and often bit by bit (the pantry mouse that pilfers our food—Gustafson et al) (the ladies of unexceptionable position who are caught pilfering furs in shops—L. P. Smith) (pilfer the secret files of the foreign office—Morgenthau) Filch is close to pilfer but may suggest more strongly the use of active though surreptitious means, especially quick snatching (in pursuit of a thief who had filched an overcoat—McKenzie Porter) (a lot of fellows were too hungry to wait, and so some of the rations were filched—Autry) (a bulky, dark youth in spectacles ... filching biscuits from a large tin—Sayers) Purloin usually shifts the stress onto the idea of removal or making away with for one's own use, often becoming generalized to include such acts as plundering or plagiarism (had purloined $386,920 from the New York reality management firm for which he worked, then absconded—Time) (had added theft to her other sin, and having found your watch in your bedroom had purloined it—Butler d. 1902) (to quote him is not to purloin—Dryden) Lift, when it does not mean specifically to steal by surreptitiously taking from counters or displays in stores, is used frequently in spoken English in the sense of purloin (women shoplifters often work in gangs of three. The act as shields while the third does the lifting—The Irish Times) (lift money from the cash register—imitators who lifted everything except the shirt off his back—F. S. Fitzgerald) Pinch, swipe, snitch, and cop are virtually interchangeable with filch. Pinch and swipe are often used in place of steal to suggest an act more morally reprehensive (loot having been pinched by him from the British ship Mary Dyer—Sydney Bulletin) or sometimes more dashing (well-dressed crooks really did steal the Gold Cup at Ascot ... drove up in a handsome car ... and pinched the cup out of the Royal Enclosure—J. D. Carr) (the bloke who pinched my photographs—Richard Llewelyn) and occasionally to suggest a petty meanness (hovering outside the dying butcher's bedroom waiting to ... pop in and swipe the old man's private notebooks—Time) Snitch possibly stresses more the removal by quick, furtive snatching (while he was bathing, somebody snitched his uniform—Widehouse) (snitched people's ideas without telling them—Sayers) Cop usually lays stress upon quick, often spur-of-the-moment filching or purloining (some woman put on a dinner gown, mingled with guests, copped fifty thousand bucks in jewelry—Gardner) (ran home and copped a piece of beefsteak from his old lady—Farrell) Ana *rob, plunder, rifle, loot, burglarize

stealthy *secret, covert, furtive, clandestine, surreptitious, underhand, handkerchief
Ana *sly, cunning, crafty, artful, tricky, wily: sneaking, slinking, skulking (see lurk)

steel vb *encourage, inspirit, hearten, embolden, cheer, nerve

Ana fortify, reinforce, invigorate, *strengthen: determine, resolve (see decide)
Con *unnerve, enervate, emasculate, unman: sap, undermine, *weaken, enfeebles: *discourage, dishearten, dispirit, deject

steep adj. Steep, abrupt, precipitous, sheer mean having an incline approaching the perpendicular. The words are here arranged in ascending order of degree of perpendicularity. Steep implies so sharp a slope or pitch that ascent or descent is difficult (a military road, which rises ... by an acclivity not dangerously steep, but sufficiently laborious—Johnson) (the trail ... then struck up the side of the mountain, growing steeper every foot of the way—Quillian) Abrupt adds to steep the suggestion of a sharper pitch or angle of ascent or descent and usually of a sudden break in a level (high abrupt banks in places become hanging cliffs with a drop of 100 feet or more—Amer. Guide Series: N. C.) Precipitous suggests extreme steepness and an abruptness like that of a precipice (a precipitous height) (a deep gorge, with precipitous, volcanic walls which no man could scale—London) Sheer implies precipitousness approaching the perpendicular and showing no break in its line (sheer cliffs that fell from the summit to the plain, more than a thousand feet—Caithery

Ana elevated, lifted, raised (see lift): lofty, *high

steep vb *soak, saturate, impregnate, drench, sop, waterlog (see steep)

steer vb *guide, lead, pilot, engineer

Ana *conduct, direct, manage, control: *govern, rule

stellar *starry, sidereal, astral

stem vb proceed, issue, emanate, derive, flow, originate, *spring, arise, rise

stentorian *loud, earsplitting, hoarse, drench, sop, waterlog (see steep)

sterile vb *soak, saturate, impregnate, drench, sop, waterlog

sterile, barren, impotent, unfruitful, infertile mean not
having or not manifesting the power to produce offspring or to bear literal or figurative fruit. Sterilize, opposed to fertilize, in its basic application to living things implies an inability to reproduce (sterile hyphae that protect the fruiting body of a fungus) (a sterile marriage) (the workers among ants and bees are sterile) (the attempt will be made to distinguish between those who are childless from choice and those who are sterile—Jour. of Heredity) But sterile is widely extendible to things that might reasonably be expected to be fruitful but that in fact are not so; thus, poor worthless land in which plants will not grow is described as sterile; minds deficient in ideas are sterile; funds left in a safe-deposit box and drawing no interest are sterile; whatever offers no return (as of pleasure, profit, value, or use) is sterile (beneath his fun lurked the sterile bitterness of the still young man who has tried and given up—Wharton) (his unsatisfactory relations with women; and his impulses toward a sterile and infantile perversity—Edmund Wilson) Barren (see also bare 1) applies especially to a female who has borne no offspring or who is or is believed to be incapable of bearing any (a barren heifer) (she hath also conceived a son in her old age: and this is the sixth month with her, who was called barren—Lk 1:36) In extended use the term can imply a lack of return or profit (a barren conquest which brought him no special repute—Buchan) Impotent (see also powerless) applies to the male and implies a lack of the ability to copulate and a corresponding inability to reproduce his kind (a pink Sulton with his pale harem maidens and a yellow blob of eunuch lolling impotent in the background—Marchie) Only rarely is the term in this sense used of other than the male animal, and in such use it approaches the aspect of impotent discriminated at powerless (whole groups of animals and plants are rendered impotent by the unnatural conditions—Darwin) Unfruitful is sometimes used in place of barren not only as applied to the female but as applied to land, vegetation, or efforts which bear no fruit (an unfruitful tree) (unfruitful soil) (this unsavory and unfruitful piece of research—Cater) Infertile is often interchanged with sterile (an infertile egg) (infertile matings) but it is as likely to imply deficiency as absence of fertility and is appropriately used when a relative rather than an absolute sterility is to be implied (the infertile grazings of those hills—H. Fraser) (an infertile strain of beef cattle) (has our history shown that liberty is so unfruitful a thing) (Chenery) (animals and plants, when removed from their natural conditions, are often rendered in some degree infertile—Darwin) Ana *bare, barren, bald, naked; arid, *dry: *meager, exiguous: empty, hollow, nugatory, *vain Ant fertile: exuberant—Con bearing, yielding, producing, turning out (see bear): fecund, fruitful, prolific (see fertile)

sterilize 1 Sterilize, castrate, spay, emasculate, alter, mutilate, geld, caaponize mean to make incapable of producing offspring. Sterilize, the most general of these terms, is applicable to both human beings and animals and is used whether the end is attained accidentally (as by undue exposure to X rays which kill germ cells) or deliberately (as by a surgical operation which prevents the germ cells from reaching the site where fertilization can occur or by removal of the gonads). Sterilize often suggests a legalized procedure undertaken to prevent the reproduction of undesirables (as imbeciles and habitual criminals); the term does not imply physical disfigurement and does not in itself necessarily imply interference with the capacity for copulation. Castrate, a narrower term than sterilize, means to deprive of the testes, the male reproductive glands. It is used of both human beings and animals and usually implies a surgical procedure and a loss of libido as well as of procreative power. By extension castrate may also mean to deprive of the ovaries, the female reproductive glands, and therefore is often used in place of spay, the specific term for this operation. Emasculate is often preferred to castrate when the reference is to human males and especially when there is the intent to stress the loss of virile or masculine qualities. Alter may replace castrate especially in reference to domestic pets and when an ambiguous or euphemistic term is appropriate. Mutilate (see also MAIM) is sometimes substituted for castrate especially when the intent is to convey strongly the idea of physical disfigurement or violence or when a euphemism is desired. Geld, meaning to castrate, is used chiefly in reference to domestic animals, especially the horse, and caaponize, also meaning to castrate, most commonly has reference to the male domestic fowl, but both are sometimes used contemptuously of human beings. Ant fertilize

2 Sterilize, disinfect, sanitize, fumigate can mean to subject to a process or treatment for the destruction of living organisms, especially microorganisms. Sterilize suggests drastic methods (as the application of intense heat, boiling, or the use of strong chemicals) with the intent of destroying all microorganisms whether they are disease-producing or not. The term usually suggests means taken to avoid infection. Disinfect also suggests vigorous methods (as exposure to strong sunlight and fresh air, thorough washing, and the use of special chemicals) with the intent of destroying all infective agents; the term usually suggests an intent to free from germs something that is known or feared to be infected. Sanitize, which basically means to make sanitary, is often preferred by public health officials when the reference is to preventive measures affecting the health of a community (as the treatment of drinking water or the cleansing of food processing facilities) and when neither sterilize (because it suggests complete destruction of microorganisms and often implies taking of measures too drastic for general use) nor disinfect (because it suggests the actual presence of disease germs) exactly fits their needs or makes clear their intention. Fumigate is associated with these terms only because fumigation was once the usual method of disinfection; it implies the use of fumes (as smoke or gas) that are destructive not only of microorganisms but of such pests as cockroaches, beetles, and bedbugs. stern adj *severe, austere, ascetic Ana strict, *rigid, rigorous, stringent: *grim, implacable, unrelenting: *inflexible, inexorable: disciplined, trained, schooled (see teach) Ant soft: lenient stertorous *loud, stentorian, earsplitting, hoarse, raucous, strident Ana harsh, *rough stick vb *boil, seethe, simmer, parboil stick 1 Stick, adhere, cohere, cling, cleave can mean to come to be or become closely, firmly, or indissolubly attached. Stick implies attachment by affixing; one thing or a person sticks to another, or things or persons stick together when they are literally or figuratively glued together and can be separated only by tearing or forcing apart (the stamp stickers to the envelope) (by sticking together they gained their objective) (marriage . . . was nothing more than a token that a couple intended to stick to each other—F. M. Ford) (whether . . . there will be anyone more than a token that a couple intended to stick to him—
stickle

Davis) (I'm the celestial drudge... and I stick to my work till I drop at it—Gilbert) When referred to things, adhere is interchangeable with stick (the mud adhered to their shoes). It is narrower in idiomatic range than stick but is the usual term when the attachment results from growth of parts normally distinct or separate (abdominal tissues sometimes adhere after an operation). When referred to persons, adhere usually implies deliberate or voluntary acceptance (as of the creed of a church, the platform of a political party, or the doctrines of a philosopher) (he believes passionately that India will adhere to her traditional democracy if it can be made to work—Jerome Ellison) (he liked a certain order in his life; when he had made a plan he adhered to it—Sackville-West) (the then current fashion, which royal ladies have adhered to ever since—Rose Macaulay) Cohere takes for its subject a collective singular or a plural noun that names things that stick together to produce a mass, a body, or a unified whole (the dry ingredients of a cake cohere only when liquid is added) (did not the whole composition cohere, were its unity broken, it would not be one picture or one quartet—Edman) (passing his hand over his cool forehead, he closed his eyes. The sounds cohered as in delirium—Stafford) But occasionally when the notion of producing a unified whole is to be stressed cohere may replace stick or adhere (the necessity that he shall conform, that he shall cohere—T. S. Eliot) (with weariness, anger, and disappointment I passed out and fell with my heavy musket... to the floor. Arms and the man did not cohere—Lovett) Cling usually implies attachment by hanging on (as by the arms, by roots, or by tendrils) and may suggest, often strongly, a need of support in one that clings (cling to a capsized boat) (the vine clings to the wall) (a man whose breeches clung to his bony legs as if he'd been wading waist-high in a river—Kenneth Roberts) In its extended use cling may add to the suggestion of need of support one of dependence (she clung to her father and mother even after her marriage) but at other times it suggests tenacity in holding on to something possessed, believed, or used (cling to the superstitions described cannot be bent or flexed without breaking it (an airship with a rigid hull) (a bridge supported by a series of rigid masonry arches) (a rigid crosspiece) Inflexible (for extended sense see INFLEXIBLE 2) differs from rigid only in suggesting a lack of limberness or an incapacity for being bent rather than a texture or consistency that resists bending or deforming. Consequently it is often used when a less precise term is needed and merely an approach to rigidity is suggested (an inflexible metal) (snakes... with portions of their bodies still numb and inflexible, waiting for the sun to thaw them out—Thoreau) Tense (see also TIGHT 1) occurs especially in reference to bodily structures (as muscles, fibers, or membranes) that are stretched so tight, or so strained by effort or excitement, that they have lost their elasticity or flexibility either for the time being or permanently (tense arteries) (tense nerves) (with muscles as tense as those of a tiger about to spring) (only his tense movements, the rather rigid way he held himself, the habitual drumming of his fingers, were in any way abnormal—Wouk) Stark usually suggests a stiffness that is associated with loss of life, warmth, power, vitality, or fluidity and therefore often also connotes desolation, barrenness, death, or present valuelessness; frequently it is accompanied by stiff or rigid (many a nobleman lies stark and stiff—Shak.) (cut flowers before they actually die... stretch themselves out with a palpable jerk, stark and rigid—Powys) (here all the surfaces remained stark and unyielding, thin and sharp—Santayana) (rats... danced comically before they died, and lay in the scuppers stark and ruffled—Sinclair Lewis) Often stark is merely an intensive (often an adverb) meaning little more than such as is stated or described without qualification (rich men who were once stark poor—Brinig) (he stood in stark terror) (they... wrote stark nonsense—Quiller-Couch) Wooden

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
stiff-necked suggests not only the hardness and inflexibility of wood but its dryness and its lack of suppleness and plasticity; consequently the term suggests not only stiffness and lack of life and grace but often clumsiness or deadness or heaviness of spirit (Kim took a few paces in a stiff wooden style—Kipling) (the courtroom scene was . . . prosy, wooden, and lifeless—Elmer Rice) (she appears wooden, remote, often addicted to incredible posturings—Rothman.)

Ana tough, tenacious, *strong, stout: *firm, hard, solid: formal, conventional, ceremonious (see CEREMONIAL): frigid, *cold, cool: difficult, •hard, arduous

Ant relaxed: supple

stiff-necked *obstinate, stubborn, mulish, dogged, pertinacious, pigheaded, bullheaded

stile *suffocate, asphyxiate, smother, choke, strangle, throttle

stigma, brand, blot, stain can denote a mark of shame left on a name, reputation, or character. Stigma, though often implying dishonesty or public shame, usually applies to a mark or a charge or judgment that is fastened upon a person or thing or is attached to it so as to discredit it and cause it to be generally disapproved or condemned (curmudgeonly inability to praise others which has ever been the stigma by which we may recognize the ungenrous—Partridge) (they can attach a social stigma to the relief by taking away the pauper's vote—Shaw)

Brand carries stronger implications of disgrace and infamy than stigma; it often suggests impossibility of removal, permanent social ostracism, and public condemnation (for the sorrow and the shame, the brand on me and mine, I'll pay you back in leaping flame—Kipling) (it may mean nothing very much to you, but . . . those words carry the ultimate, ignominious brand of incompetency and failure—Sayers) (segregation, however "equal" the physical facilities, does put the brand of inferiority on Negro pupils in the schools—N. Y. Times.)

Blot and stain imply a blemish that diminishes the honor of a name or a reputation or that sullies one's reputation for purity or virtue but does not bring either name or reputation into utter disrepute (thou noteless blot on a remembered name—Shelley) (there are blot's on the chronicle, moments of the petulance . . . and the unhappy record of the meaningless and aimless slighting of General de Gaulle. But these are minor blemishes—Anthony West) (to have loved one peerless, without stain—Tennyson) (England will have a nasty stain on her flag if she sees this man go down without a hand lifted to save him—Parker)

Ana *disgrace, dishonor, opprobrium, odium, shame: contamination, tainting or taint, defilement, pollution (see corresponding verbs at CONTAMINATE)

still adj. Still, stilly, quiet, silent, noiseless can all mean making no stir or noise. Still applies to what is motionless or at rest, often with the further implication of hush or absence of sound; sometimes one implication is stressed, sometimes the other, and sometimes both (ha! no more moving? still as the grave—Shak.) (the crowd remained still, quietly stumped, and with a shaky reverence—Styron) (that chair, when you arose and passed out of the room, rocked silently a while ere it again was still—Millet.)

Stilly emphasizes the absence of sounds, but it usually implies also the absence of stir or motion (oft, in the stillly night, ere Slumber's chain has bound me—Thomas Moore) (the rigidly quaint forms stretched out, with crossed arms upon their stillly hearts, in everlastingly undreaming rest—Melville) (a mad rush of heavy feet went past his door, to speed over the stillly house—O'Casey) Quiet, like still, may imply absence of perceptible motion or sound or of both, but it carries stronger suggestions of lack of excitement, agitation, or turbulence, and of tranquility, serenity, restfulness, or repose (through the green evening quiet in the sun—Keats) (the happy stillness of dawn . . . the quiet morning air—Meredith) (a quiet town filled with people who lived quiet lives and thought quiet thoughts—Anderson) (all the impetuous restlessness of her girlhood had left her and she had bloomed into a quiet half-indolent calm—Buck)

Silent and noiseless differ from the other words of this group in being frequently applied to motion, movement, or stir that is unaccompanied by sound. Silent usually carries more positive suggestions of stillness or quietness (the Earth . . . from West her silent course advance[s]—Milton) (three mountaintops, three silent pinnacles of aged snow—Tennyson) whereas noiseless usually connotes absence of commotion or of sounds of activity or movement (along the cool sequestered vale of life they kept the noiseless tenor of their way—Gray) (this quiet sail is as a noiseless wing to waft me from distraction—Byron) (i looked out on a thoroughly crowded with traffic, but yet a noiseless one—Fairchild)

Ana *calm, tranquil, serene, placid, peaceful: restful, *comfortable

Ant stirring: noisy

still vb *calm, compose, quiet, quieten, lull, soothe, settle, tranquilize

Ana allay, assuage, alleviate, *relieve: *pacify, placate, mollify, appease: silence (see corresponding adjective at STILL)

Ant agitate

stilly *still, quiet, silent, noiseless

Ana *soft, gentle, mild, bland: placid, peaceful, *calm, tranquil, serene

Con agitated, disturbed (see DISCOMPOSE)

stimulant *stimulus, excitant, incitement, impetus

Ana provocation, excitement, stimulation, quickening, galvanizing (see corresponding verbs at PROVOKE): incentive, spur, goad, *motive

Ant anesthetic: anodyne

stimulate excite, *provoke, quicken, pique, galvanize

Ana *quicken, animate, enliven, vivify: activate, energize, vitalize: arouse, arouse, *stir, rally, awaken, awaken

Ana unnerve: deaden

stimulus, stimulant, excitant, incitement, impetus can all mean an agent that arouses a person or a lower organism or a particular organ or tissue to activity. Only the first three words have definite and common technical use. Stimulus, in this use chiefly a physiological or psychological term, applies basically to something (as a change in temperature, light, sound, or pressure) that occurs in the internal or external environment of an organism, is perceived by sense organs, and if sufficiently intense induces a neural or equivalent (as tropistic) response (any physical energy that acts upon a receptor of a living organism. A stimulus causes a reaction in an organism, but not necessarily a response (a reaction of a muscle or gland)—Charles Morris) (so long as a system recognizes stimuli, and reacts to them with fitting responses, it exercises control. And it may then remain intact and functioning, despite stresses which would otherwise upset its internal coordination—Weizs) Stimulant, typically a medical term, applies chiefly to a chemical substance and especially to a medicament that does or is intended to vitalize bodily activity, either generally or in respect to a particular system or organ or function (tea, coffee, and cocoa are true stimulants to the heart, nervous system, and kidneys; coffee is more stimulating to the brain, cocoa to the kidneys, while tea occupies a happy position between the two, being mildly stimulating to most of our
bodily functions—Ukers. *drugs which speed up cell activity are called stimulants—Clemens et al.* Alcohol produces a false sense of well-being and efficiency, but actually it is a depressant rather than a stimulant—T. L. Engle

Excitant can come very close to stimulant in some of its uses; thus, one may speak of a substance as a stimulant or an excitant of intestinal motility. But distinctly excitant can apply to either a sought or an unwanted reaction and it can imply, as stimulant often but stimulant rarely does, either the initiating or the vitalizing of a process or activity (these amines, being excitants of the central nervous system, increase intellectual and motor activity, produce insomnia, nervousness, and tremors and have the property of antagonizing mild drug depression—Thienes) (a great many allergists believed that pine pollen contained little or no excitant of allergy. That is to say, the element within the pollen which stimulates antibody production was absent in pine pollen—Swartz).

In their more general use these three terms are seldom as clearly differentiable as in their basic use. Stimulus and stimulant are usually interchangeably applicable to whatever exerts an impelling or invigorating effect (as on a process, an activity, or a mind) (whenever an idea loses its immediate felt quality, it ceases to be an idea and becomes, like an algebraic symbol, a mere stimulus to execute an operation without the need of thinking—Dewey) (to borrow from commercial banks increases the money supply and is a business stimulus—F. M. Knight) (the colonial-development money is the extra stimulus to generate development faster than would otherwise be possible—Lewis) but excitant, here too, is more likely to suggest an initiating (we hold that ethical statements are expressions and excitants of feeling which do not necessarily involve any assertions—Ayer) and it is applicable when unwanted or undesirable ends result (the desire to gain vast and lucrative readership and audiences is the major excitant to the excesses of which so many are aware—Newsweek) incitement applies to something that moves or impels usually a course of action; the term tends to emphasize an urgent or pressing intended to drive one into moving or acting quickly rather than the result attained (to issue a solemn public condemnation and warning that this attack against the Jewish people is an incitement to massacre—The Nation) (energies slumbering in him which the incitements of the day do not call forth—James) (nor could all the incitements of its master induce the beast again to move forward—Galsworthy) impetus (see also SPEED) usually stresses the stimulation of an increase in the momentum of activity already initiated (what also gave an unusual impetus to the mind of men at this period was the discovery of the New World—Hazlitt) in estimating the social importance of this movement, we must be careful to discount the temporary . . . impetus it received from the economic slump of this period—Day Lewis) But the term sometimes applies also to a stimulus that initiates action (it is the impetus that I ask of you: the will to try—Quiller-Couch) Ana spur, goad, incentive, *motive, inducement: ex- citement, piqing, provocation (see corresponding verbs at PROVOKE): irritation, nettling (see corresponding verbs at IRRITATE)

stingy, close, closefisted, tight, tightfisted, niggardly, parsimonious, penurious, miserly, cheeseparing, penny-pinching can mean unwilling or manifesting unwillingness to share one's goods with others or to give to another a part of one's possessions. Stingy implies mainly a lack of generosity; the term is applicable whenever there is a suggestion of a mean or illiberal spirit (if I want anything, he says that it cannot be afforded. I never thought before that he was stingy, but I am sure now that he must be a miser at heart—Trollope. *stingy at heart, Cabot, refusing to plunk down what they were asking for movies and plays, began browsing in a . . . public library—Purdy*) Close and closefisted and tight and tightfisted usually imply stinginess of nature, but they also ordinarily suggest the power to keep a tight grip upon whatever one has acquired (closefisted in all his expenditures) (men and women who are closefisted and make a gift do not want their next week's mail loaded with appeals—William Lawrence) (he wasn't as tight as you . . . but he was a little bit close. So the bargain hung fire—Hammett) (must be eagle-眼 and tightfisted about these expenditures—A. E. Stevenson) Niggardly implies the character of one who is so stingy and so closefisted that he grudgingly gives the smallest portion or amount possible; the term may refer not only to the giving or spending of money or the giving of material goods but to the provision of what would add to the comfort, happiness, or well-being of oneself or of others (as poor and niggardly as it would be to set down no more meat than your company will be sure to eat up—Swift) (this niggardly allowance for rent and food) (they were not niggardly, these tramps, and he who had money did not hesitate to share it among the rest—Maugham) (literature is so lavish with wealth and titles . . . the real world is so niggardly of these things—Huxley)

Parsimonious stresses frugality, but it suggests also niggardliness; because of this double connotation the term usually suggests not a virtue but a fault or, often, a vice (a lonely bachelor life in caring for his property and in adding to it by parsimonious living—Long) Penurious adds to parsimonious the suggestion of a niggardliness so great as to give the appearance of extreme poverty or of excessive closefistedness (a grudging master . . . a penurious niggard of his wealth—Milton) (I had a rich uncle . . . a penurious accumulating curmudgeon—Irving) Misery implies penuriousness but it stresses obsessive avariciousness as the motive (her expenditure was parsimonious and even miserly—J. R. Green) (a miserly man who hoards money out of avarice—Emerson) Cheese- paring and penny-pinching suggest frugality and parsimoniousness carried to the extreme (the cheeseparing guardians of the city's finances) (a campaign of administrative cheeseparing—Alan) (a penny-pinching appropriation for relief)

Ana *mean, sordid, ignoble: scrumpy, skimpy, *meager: *offensive, repulsive, revolting

Ant generous—Con *liberal, bountiful, bounteous, openhanded, munificent: *profuse, lavish, prodigal

stinking *malodorous, fetid, noisome, putrid, rank, rancid,usty, musty

Ana foul, filthy, nasty, *dirty: *offensive, repulsive, revolting

stint n *task, duty, assignment, job, chore

Ana quantity, amount (see SUM): allotment, apportionment (see corresponding verbs at ALLOT): prescribing or prescription, assigning (see corresponding verbs at PRESCRIBE): sharing or share, participation (see corresponding verbs at SHARE)

2 *spell, bout, shift, tour, trick, turn, go

stipend *wage or wages, salary, fee, emolument, pay, hire

Ana remuneration, compensation, recompensing or re-compense (see corresponding verbs at PAY)

stipple vb *spot, spatter, sprinkle, mottle, fleck, marble, speckle, spangle, bespangle

stippled spotted, spattered, sprinkled, mottled, flecked, marbled, speckled, spangled, bespangled (see under

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
**stipulation** *condition, terms, provision, proviso, reservation, strings*

**Ana** specification (see corresponding verb at MENTION); restriction, circumscription (see corresponding verbs at LIMIT)

**stir** vb Stir, rouse, arouse, awaken, wake, rally can all mean to cause to shift from quiescence or torpor into activity. Stir, often followed by up, usually presupposes excitement to activity by something which disturbs or agitates and so brings to the surface or into outward expression what is latent or dormant (a dreamy, faraway look came into Mr. Bohlen's eyes, and he smiled. Then he stirred himself and began leafing through the plans). If the ... teacher longs to stir the sluggish mind of one of her scholars, she must first find out what the sluggishness is due to—Eliot (she wants stirring up. She's got into a rut—Bennett). Sometimes the word suggests the evoking of rebellion or revolt (movements that begin by stirring up hostility against a group of people—Dewey). More often it implies the evocation of profound, agitating, but usually agreeable, emotion (peace has no drums and trumpets to stir the pulse—Love-man) (men lacking an arm or leg stirred universal pity—Wecter). Rouse, arouse, awaken, waken all presuppose a state of rest or repose, often of that of sleep. Rouse derives its implications from its application to the starting of game from coverts or lairs by the cries of hunters or by beating of bushes and often suggests incitement to activity by startling, frightening, or upsetting. In addition it commonly implies intense or vigorous activity and often ensuing commotion or turbulence (every tent awoke, by that commotion or turbulence <every tent <every tent Arouse, though frequently used interchangeably with rouse, roused spoken words which deriving his attention—rally after—<that tree always Laski (had and heard the lion—awakened his strength rallied).<the new force stirred Mailery pelling influence <now I had to guard against arousing <peace has no drums and trumpets to stir the pulse—Love-man) (men lacking an arm or leg stirred universal pity—Wecter). Rouse, arouse, awaken, waken all presuppose a state of rest or repose, often of that of sleep. Rouse derives its implications from its application to the starting of game from coverts or lairs by the cries of hunters or by beating of bushes and often suggests incitement to activity by startling, frightening, or upsetting. In addition it commonly implies intense or vigorous activity and often ensuing commotion or turbulence (every tent roused by that clamor dread—Shelley) (roused out of sleep by a heavy pounding on the door—Wechsberg) (Antony ... had spoken words which roused the mob to fury—Buchan). Arouse, though frequently used interchangeably with rouse, tends to be weaker in its implications and often means little more than to start into activity and conveys no hint of what follows; thus, a noise in the night arouses a sleeping soldier if he merely wakes up into consciousness of it, but it rouses him when he also makes determined efforts to trace its source or hastily arms himself; a fear may be aroused and immediately dispelled; passions are roused when they are so stirred up that they exert a compelling influence (now I had to guard against arousing the emotions of others—Mallor). (the new force stirred and aroused the people—Anderson). Awaken and waken, like arouse, frequently imply an ending of sleep; in extended use they are employed chiefly in reference to mental or spiritual powers or faculties which need only the proper stimulation to be called forth into activity or to be elicited (waken love) (the conscience of the nation was awakened) (her eyes brightened, her features appeared gradually to awaken, and life flowed back into her face—Farrell) (had wakened and heard the lion—Hemingway) (waken to the point about seven minutes after—Laski) (that tree always awakened pleasant memories, recalling a garden in the south of France—Cather). Rally (see also RIDICULE) presupposes a diffusion of forces or a lack of concentration that promotes lethargy or inertia; it therefore implies a gathering together that stirs up or arouses (he rallied his strength for a final blow—Prescott) (as if his memory were impaired ... [he] made an effort to rally his attention—Dickens) (they stirred and rallied a divided, defeated people—Shirer).

**Ana** analogous words *excite, *provoke, stimulate, quicken, galvanize: *incite, foment, instigate: activate, energize, *vitalize: *move, drive, impel, actuate

stout

Malamud> The short story and a newspaper story may treat of but one incident. Narrative in its common use is more often factual than imaginative (his part of the book is impeccable; the narrative is a pleasure to read and the material of great interest—Geographical Jour.> (histori- cal narrative) > (a narrative of discovery) As a literary composition narrative usually suggests a plot or causally connected series of motivated incidents; thus, a chronicle or a diary is not ordinarily called a narrative (at this point he spun into the narrative a little yarn which he had fabricated last night in bed—Rötvaaq) Tale suggests, in consequence of its historical connection with oral telling, a more leisurely and more loosely organized recital, characteristically treating legendary or imaginary happen- ings, often those of ancient times, and may be in verse (Oriental tales) (folktales) (tales of the court of King Arthur) (tales based on folklore, legends of great men and small—Mahler) Anecdoté, retaining something of its original sense of an unpublished item, applies to a brief story of a single detachable incident of curious or humorous interest, often illustrative of a truth or principle or of the character or foibles of a notable person (an anecdote of Lincoln's boyhood) during the meal he entertained them with anecdotes of his travels—Meredith (an occasional anecdote, given as an example of the indignities she was made to suffer—Sackville-West)

Yarn often suggests a rambling and rather dubious tale of exciting adventure, marvelous or incredible, ingenious or fanciful, and not always reaching a clear-cut outcome (without motive a story is not a novel, but only a yarn—Caine) (the uncle . . . would arrive from Australia once every few years bringing no gifts but his wonderful yarns. As far as Victoria remembered, he'd never repeated him- or fanciful, and not always reaching a clear-cut outcome

A 1 * strong, sturdy, stalwart, tough, tenacious adj

forthright, aboveboard when applied to a forward course of action) answer)

Ana narration, description (see corresponding verbs at relate): > fiction, fable, fabrication 3*lie, falsehood, untruth, fib, misrepresentation

stout adj 1 *strong, sturdy, stalwart, tough, tenacious

Ana *brave, bold, intrepid, valiant, valorous: indomi- table, > invincible: resolute, staunch, steadfast (see FAITHFUL): > vigorous, energetic, lusty

2 *fleshy, fat, portly, corpulent, obese, plump, rotund, chubby

Ana thick, thickset, >stocky: burly, brawny, husky, >muscular

Ant cadaverous —Con >lean, lank, lanky, spare, angular, rawboned, skinny, scrawny

straightforward, forthright, aboveboard when applied to persons, their actions, or their methods mean honest and open. Something straightforward is consistently direct and free from deviations or evasiveness (a straightforward course of action) (a straightforward answer) (he is a man; with clear, straightforward ideas, a frank, noble presence—Disraeli) Something forthright has directness like that of a thrust, or goes straight to the point without swerving or hesitating (a forthright appeal for votes) (thought that this must be the true air of success: no conceit or obvious triumph, but a forthright glance, a confident smile, a new erectness in the shoulders—Woolf) Something aboveboard is free from all traces of deception or duplicity. Aboveboard is chiefly used predi- catively and applies more often to actions or methods than to persons (one whose life had been so well-ordered, balanced, and aboveboard—Galsworthy) (the peace of mind that comes from being completely honest and aboveboard—Haupt) Straightforward, forthright, and aboveboard are also used adverbially with the same im- plications and connotations as their adjecitval forms.

Ana honest, >upright, honorable, just: >fair, equitable, impartial: candid, >frank, open, plain

Ant devious: indirect

strain n 1 *variety, subspecies, race, breed, cultivar, clone, stock

2 *streak, vein, >touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash

strain vb 1 sprain (see under strain n)

2 * demur, scruple, balk, jib, shy, boogle, stickle, stick

strain n 1 * stress, pressure, tension

2 Strain, sprain as nouns can mean an injury to a part of the body through overstretching and as verbs to cause or to suffer such an injury to a part of the body. Strain, the more general and less technical term, usually implies an injury to a body part or organ or to muscles as a result of overuse, overexercise, or overexertion or of over- effort (in an attempt to regain one's balance or to lift too heavy an object); the injury may range from a slight soreness or stiffness to a disabling damage; thus, eyesstrain is a condition of the eye or of the muscles of the eye in- volving pain and fatigue such as occurs in those who do close work with their eyes or in those who suffer from uncorrected defects of vision; charley horse is a familiar term for a stiffness resulting from muscular strain in the arm or leg (as of an athlete) he strained his back while trying to avoid a fall on a slippery sidewalk. But strain may specifically apply to an injury resulting from a wrench or twist and involving overstretching of muscles and liga- ments and is then nearly interchangeable with, though typi- cally suggesting less severe injury than, sprain which de- finitely implies an injury to a joint, usually as a result of a wrenching, with stretching or tearing of its ligaments, damage to the synovial membrane, swelling and pain, and disablement of the joint; thus, one may strain or sprain an ankle by a sudden slip that wrenches it (crippled by a sprain of the hip)

strained >forced, labored, farfetched

Ana tense, taut, >tight: >artificial, factitious: unnatural (see IRREGULAR): > stiff, rigid, inflexible, wooden

strait n 1 Strait, sound, channel, passage, narrows can all denote a long and comparatively narrow stretch of water connecting two larger bodies. Strait, often as the plural straits with either singular or plural construction, denotes a relatively short and very narrow waterway (the Strait of Dover connecting the English Channel and the North Sea) (the Straits of Gibraltar connecting the Atlantic Ocean and the Mediterranean Sea) Sound applies to a longer and more extensive waterway than a strait; the term is often applied to a long passage of water be- tween the mainland and an island or group of islands and therefore at each end opening into the same ocean or sea or arms of the same ocean or sea (Long Island Sound lying between the Connecticut shore and the north shore of Long Island opening at both ends into the Gulf of Mexico) Channel is less frequent than strait or sound as a tech- nical term in the sense here considered, but when it is so used it denotes a relatively large sound (The English Channel between southeastern England and the north coast of France) (the Mozambique Channel between the coast of southeastern Africa and Mozambique Island) Passage is practically synonymous with channel, denoting a connecting body of water wider than a strait (Mona Passage between the islands of Hispaniola and Puerto Rico) Narrows designates a strait or a contracted part of a body of water; it is especially used of the necklike part of a bottle-shaped harbor (the Narrows of New York harbor) 781

straitlaced

2 pass, exigency, pinch, emergency, *juncture, contin-

gency, crisis

*difficulty, hardship, vicissitude, rigor: perplexity, bewildernent, mystification (see corresponding verbs at PUZZLE): plight, *predication, fix, quandary

straitlaced *prim, priggish, prissy, prudish, puritanical, stuffy

*narrow, narrow-minded, hidebound, intolerant (see ILLIBERAL): *rigid, rigorous, strict

Ant
libertine

strang *shore, coast, beach, bank, littoral, foreshore

*unique, singular, peculiar, eccentric, erratic, odd, queer, quaint, outlandish, curious can mean vary-

ing from what is ordinary, usual, and to be expected.

Strange, the most comprehensive of these terms, suggests unfamiliarity; it may apply to what is foreign, unnatural, inexplicable, or new <some strange and potent élan was released in Cabot shortly after the second treatment >

. . . He bloomed, as so few men do—Purdy <to most of us the art of China and Japan, however much it may attract and impress, is strange—Binyon <the people in the streets have their usual air, tranquil and indolent.

No curiosity, no emotion in their faces. A strange people! —Edmund Wilson>

Singul al distinctively implies differ-

ence from every other instance of its kind and therefore stresses individuality <a distinguished and singular excellence—Mencken >

<the taxi driver had lugged the parcel . . . for the woman, and then—proving himself a singular example of his species—had broken a ten-

dollar bill for her—Kahn > Often, however, the word suggests strangeness that puzzles one or piques one's curiosity (I experienced a singular sensation on reading the first sentence . . . There are sensations you cannot describe—F. M. Ford >

*his singular that even within the sight of the high towers of Antioch you could lose your way—Shelley >

Unique implies not only singularity but the fact of being unparalleled without suggesting, as singular does, a strange or baffling character or quality <personality always contains something unique—Justice Holmes >

> he has the almost unique distinction of having made speeches which were both effective when delivered and also models of literary eloquence—Inge >

The majestic, the enduring novels treat of subjects which are rarely unique—Elizabeth Bowen>

Peculiar (see also CHARACTERISTIC) implies marked or conspicuous dis-

tinctiveness in character or quality <this difference arises . . . from the peculiar character of the Government of the United States—Taney>

<the peculiar etiquette attached to elevators was rigidly observed by members of both households—Bemelman >

<only subtle and delicate minds . . . catch the characteristic aroma, the peculiar perfume—Brownell >

Often peculiar is employed where one of the succeeding terms (as eccentric or queer) might well be used <he is growing very peculiar >

<made little effort to remember the day; with its peculiar quality of dementia it seemed not a commonplace and civilized social event but a nightmare—Styron >

Eccentric implies divergence from the beaten track; erratic adds to eccentric a stronger implication of caprice and unpredictability <an eccentric preference for beginning his dinner . . . in the late afternoon—Cather >

<i the house had grown, reflecting the eccentric turns of Justina mind—Cheever >

<the workings of his mind were erratic >

this towering but erratic genius . . . who combined in his tempestuous character so many of the best and the worst qualities of the German—Shirer >

Odd stresses a departure from the usual, the normal, or the regular; it sometimes suggests an element of the fantastic; queer even more strongly implies eccentricity and often suggests that the thing so qualified is dubious or questionable <great men whose odd habits it would have been glorious piety to endure—George Eliot >

<the oddest sense of being herself invisible; unseen; unknown—Woolf >

<Alice was not much surprised at this, she was getting so well used to queer things happening—Lewis Carroll >

<completely out of control . . . her voice had become louder and her smile queerer—Wouk> Quaint implies pleasant or especially old-fashioned oddness; outlandish, uncouth or bizarre oddness <a quaint village, full of half-

		timbered houses >

<to post-Freudian ears, this kind of language seems touching quaint and ingenious—Huxley >

(an outlandish custom) <he wore the prophet's robe with a difference. He never let it look outlandish—Montague >

<he introduced outlandish or unbelievable people and situations into his work; that is, . . . fantasy was not a mode of escape but a device of satire—FitZell >

Curious usually implies extraordinary oddness or a sin-

gularity that invites close attention, study, or inquiry.

When the word is employed as an equivalent of one or another of the foregoing words it tends to retain to a greater or less degree the notion of extraordinariness and it often suggests that the thing so described merits notice or investigation <a curious sickening smell >

<curious bits of folklore >

<curious customs and habits of speech surviving from an earlier age >

<my only guiding principle has been that the examples should be curious, striking and even, in certain cases, extravagant—Huxley >

<a curious sensation, sitting only a yard away from this man who fifty years before had made me so miserable that I had once contemplated suicide—Dohly >

<loneliness, far from being a rare and curious circumstance—Wolfe >

*abnormal, atypical, aberrant: *fantastic, bizarre, grotesque: surprising, astonishing, amazing, flabber-

gasting (see SURPRISE)

Ant
familiar

stranger, foreigner, alien, outlander, outsider, immigrant, émigré can all designate a person who comes into a com-

munity from the outside and is not recognized as a member of that community. This is the primary denotation of some of the words, but the secondary sense of the others, especially the last three. Stranger and foreigner may both apply to one who comes from another country or some-

times from another section as a resident or visitor. They have somewhat different implications, however, stranger stressing the person's unfamiliarity with the language and customs and foreigner the fact that he speaks a dif-

ferent language, follows different customs, or bears alleg-

cience to another government <the time came when I was the observant foreigner, examining education in France. To tell the truth, I was not a stranger to it, having lived in France as a child and again as a youth—Grandgent >

Alien emphasizes allegiance to another sovereign or government and is often opposed to citizen; thus, one may be called a foreigner after naturalization, but not with accuracy an alien. In extended use alien can imply either exclusion from full privileges of or inability to identify oneself with a group <the older I grow, the more of an alien I find myself in the world; I cannot get used to it, cannot believe that it is real—L. P. Smith >

<he is anesthet-

ic to their theological and political enthusiasms. He finds himself an alien at their feasts of soul—Mencken >

Outlander, in its general sense, is preferred to foreigner only for a literary or rhetorical reason or because it carries the implications of outlandish <to this vast matriarchal blackness he had returned, bringing a bride, an outlander—Hervey >

<his neighbors were . . . outlanders of that particular type to which . . . his own fastidiousness found the greatest objection—Tarkington >

Outsider usually

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
implies nonmembership in a group, clique, or caste largely because of essential differences in origin, interests, backgrounds, customs, and manners (was the only outsider in a company of which every member was privy to the origin, developments, and existing state of its complications—Sackville-West) Immigrant and émigré are often used of foreigners who are residents and no longer aliens. Immigrant usually is applied to a foreigner who has come voluntarily, typically in search of a better means of earning a living or a more satisfying way of life; émigré implies that the foreigner is a fugitive or refugee from his native land or, in a weaker sense, that he has left his abiding place rather than dissatisfaction than from a strong hope for a better future (Hemingway, whom the young émigrés to Montparnasse . . . had hailed as a major prophet of the emptiness of everything—F. L. Allen)

strangle vb *suffocate, asphyxiate, stifile, smother, choke, throttle

stratagem *trick, ruse, maneuver, gambit, ploy, artifice, strangle

strategic tactical, logistic (see under STRATEGY)

strategy, tactics, logistics as used in relation to warfare are not always clearly distinguished. Strategy is the art or science involved in the direction of the forces at his disposal by the commander in chief of a belligerent nation or by those assisting him. The term usually implies the planning of major operations intended to gain the objectives of the war, and often, but not necessarily, connotes the effective presence of these officers at home or behind the lines. Tactics is the art or science of handling forces in the field or in action; the term implies not only the presence of the enemy as affecting the disposition or maneuvering of troops, ships, planes, and matériel but the direction of a commanding officer upon the scene (the theater of war is the province of strategy, the field of battle is the province of tactics—Hamley) Logistics is the art or science of military supply and transportation; the term usually implies both planning and implementation and covers such varied matters as design and development, acquisition, stockpiling, shipping and distribution, upkeep, and ultimate evacuation and disposition of matériel; acquisition, preparation, assignment, distribution, and physical care of personnel; preparation, operation, upkeep, and disposal of facilities; and provision of services. Broadly logistics constitutes the theory and practice of military housekeeping (generals and admirals and their staffs plan campaigns. That is strategy. They fight battles and these combat operations are known as tactics. A third element determines the success or failure of strategy and tactics. This is called logistics. A large part of an army, a fleet, or an air force, and nearly the entire civilian population today play a role in logistics. What they accomplish in producing and distributing the resources needed to implement strategy and tactics controls the outcome of war—Donald Armstrong)

The same differences in meaning are also found in strategic, tactical, and logistic (or logistical) as referred to the conduct of a war (strategic air war now being conducted so effectively upon German cities and factories by the Royal Air force and the United States 8th air force will in due time be supplemented or in part substituted by tactical air operations on which our ground forces will depend to cover advances of troops and to devastate the huge fortifications erected by the Nazis in northern France, Belgium and along the northern coast of the continent—David Lawrence) (the outstanding military lesson of this campaign was the calculated application of air power . . . in the most intimate tactical and logistical union with ground forces—MacArthur)

strength *power, force, might, energy, puissance

Ana stoutness, stubborness, toughness, tenaciousness (see corresponding adjectives at STRONG): soundness, healthiness (see corresponding adjectives at HEALTHY): *possessions, means, resources, assets

strengthen, invigorate, fortify, energize, reinforce can mean to make strong or stronger. Strengthen is the most general term, applicable not only to persons or their physical, mental, or moral condition but also to things material or immaterial (as a structure, a system, an aggregation, or an influence); the word can connote increase either in force, energy, vigor, and power of resistance, or in intensity, authority, or effectiveness (their friendship strengthened as they grew older) (exercise is necessary to strengthen the body) (opposition will only strengthen their belief) (his case was greatly strengthened by the newly discovered evidence) (the handle of the tool had been bound by ordinary picture wire, apparently to strengthen a fracture in the wood—Hynd) (impulses to submission strengthened by habits of obedience bred in the past—Dewey) (after a period of hoarse whispering, her voice changes its tone and strengthens—Hearn)

Invigorate is commonly used in reference to living things or of some power or activity of a living thing and is sometimes extended to things that have powers suggestive of life; it implies an increase in vigor or vitality or active or effective strength or force (their minds and bodies were invigorated by exercise—Gibbon) (the series of Midwestern novels that followed shocked and invigorated American thought—S. R. L.) (the general run of Canadians are invigorated when our athletes win recognition—Charles Cooper) (invigorating sea breezes) Fortify, which primarily means to strengthen a town or city by defensive structures, in a more general sense means to strengthen against attack or stress of any sort (a certain uneasiness had come upon her, and even fortified by food she could not bring herself to go—Boyle) (fortified himself with a stiff drink) (I have been fortified in my belief, the utterances of this Court from the time of Chief Justice Taney to the present day—Justice Holmes) (set up on a pedestal, fortified by the strongest bulwark in executive acts, those principles which we would abandon at our peril—Vannevar Bush) (the old-fashioned polemical sermon followed, fortified with texts and garnished with quotations in Greek—Brooks) Energize implies a strengthening in the form of supplying the active power for working or for being ready for work and, therefore, is used of whatever can be roused into strong activity or infused with a desire to act (the office of Inspector General was greatly improved, and energized, during
the first administration of Mr. Pitt—Chalmers} \( \langle \text{as between husband and wife, hers was definitely the stronger spirit. She was more highly energized, more industrious, more ambitious—S. H. Adams} \rangle \)

\( \text{Ant} \) peace: accord

\( \text{strike} \ ) \text{vb} \ *\text{Strike, hit, smite, punch, slug, slog, swat, clout, slap, cuff, box are comparable when they mean to come or bring into contact with or as if with a sharp blow. Strike, hit, and smite are the more general terms. Strike, the most general of the words, may indicate the motion of aiming or dealing the blow, the motion prior to contact with the hand, fist, instrument, weapon, or missile (strike at the enemy and miss) \langle \text{strike out at random} \rangle \langle \text{It may}
indicate various types of contact from a light, often stroking contact (the light breeze struck the ship on the north side) to a forcible collision or blasting contact (the car struck a post and overturned) (the lightning struck the house) (strike a man down with a heavy blow) (the enemy struck with full force) It may suggest several types of physical or emotional effect or impression (strike someone dead) (strike a line on paper) (strike out a name from a list) (to be struck by the beauty of the scenery) (grief-stricken) (consciousness-stricken) or it may be used to indicate any of the types of contact suggested by the other words in this group. Hit, although it is used in most of the situations in which strike occurs, emphasizes more than the latter the physical or figurative contact with or impact upon an object, usually one aimed at; it tends to stress forcefulness (hit a child on the wrist) (the shell hit the tank and tore through the side) (the dinner-bell . . . hit him hard—H. G. Wells) (hit the right road home) (hit the winning number in a lottery) Smite, likely to appear in rhetorical or bookish contexts, commonly stresses the injuriousness or destructiveness of the contact and often suggests a motivation of anger or desire for vengeance (with the hammer she smote Sisera, she smote off his head—Judg 5:26) (conscious-smitten) (smitten with grief) Punch, slug, slog, swat, and clout are generally used to suggest the giving of various kinds of usually sharp or heavy blows. Punch suggests a quick blow with or as if with the fist (would handcuff everybody rather than face the risk of having their noses punched by somebody—Shaw) Slug emphasizes the heaviness of the impact and may suggest a certain viciousness in the delivery of the blow (was attacked by an assault suspect, who slammed him with a 5-ft. iron pipe—Time) Slog emphasizes the heavy and typically haphazard quality of the blows (“Slog them on the head with your club . . . .” shouted Tammers. And as the twisted knot of men reeled conveniently towards me I did what execution I could—Strand Mag.) and in sports (as cricket or golf) it may stress power as opposed to finesse (hayfields fringed the very putting greens . . . and a man had to slog and slog again before he got out of them—Bernard Darwin) Swat suggests a forceful, slapping blow, usually with an instrument (as a bat, weapon, or flyswatter) (in off moments he would swat the regiments of cockroaches—de Kruif) (swat flies) (swat a baseball out of the ball park) Clout suggests a heavy careless blow (as with the hand or fist) (a shoe clouted his skull and inflicted a fracture—McCrack) (they clout our heads the moment our conclusions differ from theirs—Shaw) Slap, cuff, and box all denote blows of varying force with the open hand. Slap is the most general and indicates a sharp, stinging blow with or as if with the palm of the hand (slap a person in the face) (slapped the coverlet angrily—Kenneth Roberts) Cuff suggests a blow often forcible enough to dizzy or throw off balance and often deal with the back of the hand (it was pointed out . . . that children could be hurried and delayed, cuffed or bribed, into becoming adults—Mead) (I swear I'll cuff you, if you strike again—Shaker) Box suggests the delivery of an openhanded blow but is ordinarily limited to one against the ears (the mother boxed her child's ears in a fit of temper) Ana *beat, pummel, buffet, pound, baste, belabor, thrash 2 impress, touch, influence, *affect, sway striking arresting, signal, salient, conspicuous, outstanding, *noticeable, remarkable, prominent Ana *effective, effectual, efficacious: telling, convincing, compelling, cogent (see valid): forcible, forceful, *powerful: impressive, *moving string n 1 *succession, progression, series, sequence, chain, train 2 in plural form strings *condition, stipulation, terms, proviso, proviso, reservation stringent strict, *rigid, rigorous Ana *severe, austere, stern: limiting, restricting, circumscribing, confining (see limit vb): restraining, curbing (see restrain vb): exacting, oppressive, *onerous strip vb Strip, divest, denude, bare, dismantle can mean to deprive a person or thing of what clothes, furnishes, or invests him or it. Strip stresses a pulling or tearing off rather than a laying bare, though the latter implication is frequent; it often connotes more or less violent action or complete deprivation (strip the bark from a tree) (he was quickly stripped of his clothes) (where pasturing cattle stripped the ground) (once start stripping poetry of what you imagine are inessentials and you will find . . . the anatomy is made visible but the life will have gone—Day Lewis) (I had stripped a few of my habits, seconal and benzodrine at any rate, but I was . . . tense and brain-deadened—Mailer) Divest, in contrast to strip, does not suggest violence; it usually implies a taking away of what a person or thing has been clothed or equipped with especially as a sign of power, rank, influence, or prestige (divesting capitalists of further increments of power—Cohen) Therefore it often connotes an undoing or a dispossessing or a degrading (divest an officer of all authority) (naturalism divests life, whether physical or spiritual, of all that separates it from the inanimate and inorganic—Inge) (the king is thus divested of his kingship and now becomes merely a corpse—Frazer) Denude implies a stripping or divesting, but distinctively it implies a resulting bareness or nakedness (striped of its vines and denuded of its shrubbery, the house would probably have been ugly enough—Cather) (a ghostly lunar rainbow—the spectrum cleansed and denuded of all the garish colors of day—Beebe) (modern agriculture . . . denudes the land of the protective cover and food that wild creatures need—G. S. Perry) Bare, although it suggests a removal of what covers or clothes, seldom carries implications of violent or complete stripping; it is chiefly used in idiomatic phrases which imply more than the mere act; thus, to bare one's head is to take off one's hat usually as a sign of respect or reverence; to bare one's sword is to unsheathe it and to have it ready for action; to bare one's heart to another is to reveal feelings one has concealed; to bare the secrets of the grave is to disclose, often as a result of a discovery of documents, something which had been known only to persons now dead (no hidden secrets are bare in this biography—Lubell) (bare her teeth at the audience with comic ferocity—Wouk) Dismantle is used chiefly with reference to the act of stripping a house, a building, a ship, or a complex installation (as of machinery) of its entire equipment and furnishings (dismantle a factory) (the cottage itself was built of old stones from the long dismantled Priory—Hardy) (hurriedly dismantled a second bomb that he had brought along—Shirer) Ana despoil, spoliate, devastate, waste, *ravage: rifle, loot, plunder, *rob Ant furnish: invest
stripe

786

strong

a surface referred to and the sections bordering upon it (each white petal had a stripe of red) (gray cloth with alternate stripes of blue and red) (when one or more strips of braid have been sewn on a soldier's sleeve to indicate his rank or his length of service, they are called stripes). If actual separation is not implied stripe may be employed when the difference between the portion of surface referred to and its neighboring portions is a matter of use, ownership, or physical character (the stripe between sidewalk and curb belongs to the city) (each man on relief was allotted a strip of land for raising vegetables). However stripe may be used in such cases in preference to strip when the division is made evident by a contrast in appearance (narrow stripes of ice separated from each other by parallel moraines—Tyndall) (stripes of cultivated land in various shades of green). Band (see also bond 1) may mean either a strip or stripe but often also connotes either an encircling with or without a suggestion of confining or uniting or a horizontal position rather than the vertical position so often connoted by stripe (the lower parts of the sleeves and of the skirt were adorned with bands of blue silk) (bands of colored light in the sky at dawn) (at closer range, the mountain showed three bands, the lowest green, the middle gray, and the highest white). Ribbon designates concretely a length of narrow woven material with selvage edges, usually one that is fine and firm in texture and is used for ornamental bands, ties, and bows. In extended use ribbon is often used in place of stripe when the strips are very long, very narrow, and very thin and when the material is flexible enough to appear like ribbon or to be handled like ribbon (steel ribbon for use in springs) (ribbons of red, green, and gold paper for tying Christmas packages) (the sails were torn by the hurricane into ribbons) (the road was a ribbon of moonlight over the purple moor—Noyes). Fillet, which basically denotes a narrow strip of ornamental material (as a band of ribbon for restraining the hair or a narrow molding or beading that forms the inner part of a picture frame), is often extended to various things that have no inherent ornamental quality and are otherwise describable as strips, ribbons, or bands (as a metal strip or ribbon from which coins are punched, a very thin molding, one of certain bands of white matter in the brain, or a long narrow piece of meat or fish without bone).

stripe

n 1 *strip, band, ribbon, fillet
2 charcter, description, nature, *type, kind, sort, kidney, ilk

strive struggle, endeavor, *attempt, essay, try

striving n struggle, endeavor, essay, attempt, try (see under attempt vb)
Ana *work, labor, toil, travel: contending (see contend): *contest, conflict, combat, fight
stroll vb *saunter, amble

strong, stout, sturdy, stalwart, tough, tenacious can all mean having or manifesting great power or force (as in acting or resisting). Strong, the most inclusive of these terms, fundamentally implies the possession of great physical power and may connotate such varied causes as sound health or physical size and vigor or soundness of construction and substance (a strong constitution) (the hammock is not strong enough to bear the weight of two persons) (a strong foundation) (his hands were large. They looked neither strong nor competent—Salinger) but in extended use it may apply to groups whose force is dependent upon numbers, organization, or discipline (a strong army) (a strong majority forced a wavering minority along the road of rectitude—Replier) or to a spiritual or mental power or faculty that acts with force and vigor (a strong mind) (a strong will) (a strong critical instinct) or to some very potent or powerful thing (strong liquor) (a strong poison) (a strong current) (a strong battery) (the memorandum was couched in strong language and the Russians replied to it . . . with equally stern words—Shirer) or to something (as color or light or emotion or sentiment) that is particularly intense or violent (a strong purple) (the strong light of the setting sun) (strong love) (a strong attachment) (the impulse to fight is something so strong, so deep-seated, so uncontrollable by . . . reason—Edmund Wilson) Stout (see also Fleshy) carries a stronger implication than does strong of an ability to resist aggression or destructive forces or of an ability to endure hard use, severe pain, or great temptation without giving way. When applied to persons, it often suggests resolution, doggedness, or fearlessness (a stouter champion never handled sword—Shak.) (and let our hearts be stout, to wait out the long travel . . . to impart our courage unto our sons—Roosevelt). When applied to things, stout usually also suggests solid, substantial construction (a stout cane) (a stout ship) or a texture that resists stress or strain (a stout canvas) (a stout paper) (their feet were protected by stout boots—Mason). In fact the term is generally applicable when the suggestion of power to resist or endure is more emphatic than that of a power to do or to effect. Sturdy implies qualities in inanimate as well as in animate things that suggest the possession of rugged health; the term carries no suggestion of powers derived from such qualities as size, intensity, or vehemence but connotes rather an inner strength typically derived from healthy vigorous growth, close solid construction, or a determined spirit that gives it staying power and stoutness (the little fellow has sturdy legs) (was a sturdy, handsome, high-colored woman—Van Doren) (it is the sturdiest of creepers, facing the ferocious winds of the hills, the tremendous rains that blow up from the sea, and bitter frost—Jefferies). Our people are . . . conspicuous for a sturdy independence—Inge) Stalwart usually implies strength derived from what is so deeply established or firmly rooted that it is unassailable or impregnable or is completely dependable (William Law . . . was a stalwart Churchman, and showed no sympathy with the sectaries—Inge) (Dryden brings his stalwart common sense to bear upon the problem, and clarifies the issue—Lowes). What is best in our society will have to be saved by the advocates of some older and more stalwart system of thought—Kirk) When applied to persons with reference to their physique or prowess, stalwart regularly suggests great strength, but it often throws the emphasis upon heroic build or largeness of frame (a stalwart man, limbed like the old heroic breeds—J. R. Lowell) Tough suggests the strength that comes from a texture or a spirit that is firm and unyielding and effectively resists attempts to pierce, destroy, or overcome; it stresses hardiness rather than vigor, resistant elasticity or wiriness rather than hardness or solidity, or a capacity for yielding that is just sufficient to increase rather than to destroy a person's or thing's strength or stoutness (a tough membrane) (a tough opposition) (tough resistance) (any type who reached the age of six, was a pint of iron man, so tough, so ferocious, so sharp in the teeth that the wildest alley cat would have surrendered a freshly caught rat rather than contest the meal—Mailer) (physically fragile, she was spiritually tough—Sackville-West). Tenacious comes very close to tough in its most general implications, but it places greater emphasis upon
retentiveness of what has been gained or of adherence to a support, position, or idea; it carries a strong suggestion of holding on, of adhesiveness, or of maintaining strength or position in spite of all opposing forces that would dislodge, dispossess, thwart, or weaken. He had always held with tenacious devotion to one of the ancient traditions of his race—Wolfe. He seemed to hold on to life by a single thread only, but that single thread was very tenacious—Arnold.

When applied to material things and especially to substances it may suggest a powerful clinging quality and extraordinary resistance to forces that tend to effect separation or pulling apart (tenacious mud).

Tenacity, tenacious

Bold and tenacious as the bamboo shooting up through the hard ground of winter—Binyon.

When applied to persons it suggests a stubborn hold upon something (as a possession or an opinion) that defies the efforts of others to break. (If the sale it is possession is probable as tenacious of their rights as any one else—Lucas.)

Ant.

Intense, fierce, exquisite, violent.

Stronghold

Citedel, fort, fortress, fastness.

Framework

For the house) Skeleton is frequently used in the building trades for a rigid framework, especially one made of steel; it is often used in place of structure, design, outline in reference to literary constructions, sometimes to imply that the design is carefully developed and its parts definitely articulated (the skeleton of his argument is now finished) but more often, probably, to indicate a sketchy conception of the whole which serves as a starting point (he has the skeleton of his plot in mind).

In either case it is usually further implied that the writing out in literary form and the elaboration of atmosphere,

details, characters remain to be accomplished.

Anna integration, articulation, concatenation (see under integrate): organization, arrangement (see corresponding verbs at order): system, organism, scheme, complex

Struggle

Strive, endeavor, essay, attempt, try

Anna: contend, fight: compete, vie, rival, emulate: toil, labor, work, travel (see corresponding nouns at work)

Struggle

Striving, endeavor, essay, attempt, try (see under attempt vb)

Anna: toil, labor, work, travel: contest, conflict, fight, affirm, fray: contending (see contend)

Stout

Strut, swagger, bristle, bridle can all mean to assume an air of dignity or importance. Strut implies a pompous or theatrical affectation of dignity, especially as shown in one's gait or by one's bearing in movement (a poor player that struts and frets his hour upon the stage—Shak.). (Dr. Goldsmith... went... strutting away and calling to me with an air of superiority—Boswell.)

Swagger implies ostentation, a conviction of one's superiority, and, often, an insolent or overbearing gait or manner (scarcely designed to set foot to ground, but swaggered like a lord about his hall—Dryden). (What a swaggering puppy must he take me for—Goldsmith.)

Bristle implies an aggressive manifestation sometimes of anger or of zeal but often of an emotion or desire that causes one to display conspicuously one's sense of dignity or importance (all the time he stuck close to her, bristling with a small boy's pride of her—D. H. Lawrence). (The bourgeoisie, bristling with prejudices and social snobberies—Rose Macaulay.)

Bridle usually suggests awareness of a threat to one's dignity or state and a reaction (as of hostility, protest, scorn, or resentment) typically expressed by a lofty manner with a tossing up of one's head and a drawing in of one's chin (by her bridling up I perceived she expected to be treated hereafter not as Jenny Distaff, but Mrs. Tranquillus—Trollel) in everything that poses, prances, bridles, struts, bedizens, and plumes itself—Ward.) (Military commanders who had bridled against... interference—Time)

Anna: expose, exhibit, flaunt, parade (see show vb)

Con: cringe, cower, fawn, truckle: grovel (see wallow)

Stubborn

Obstinate, dogged, pertinacious, mulish, stiff-necked, pigheaded, bullheaded

See also explanatory notes facing page 1
stumble, trip, blunder, lurch, flounder, lumber, galumph, lollop, bumble can mean to move unsteadily, clumsily, or with defective equilibrium (as in walking, in doing, or in proceeding). Stumble, trip, blunder, lurch, and flounder as applied to physical movement or gait usually suggest a departure from the normal and imply some extraneous influence to be responsible for such departure. Stumble characteristically implies striking an obstacle or impediment which hinders free movement or direct progress and therefore usually suggests a fall or a check or a cause of embarrassment or perplexity (the horse stumbled over a stone and threw its rider) (he found himself running from tree to tree . . . stumbling wildly towards the cleared ground—Caldwell) (his thought staggers, and reels, and stumbles—Martin Gardner) (the classic instance of the second-rate man who is offered a first-rate destiny, and who, in stumbling after it, loses his way in the world—Buchan) Occasionally stumble implies nothing more than accidental discovery or a coming upon without design (she tried to rationalize his death as we will, stumbling onto such conclusions as that it was time for him to go; he was meant to die young—Cheever) Trip definitely implies a loss of footing or of something comparable to a loss of footing, often on account of the interposition of an unseen obstacle; therefore in extended use trip often connotes a falling into a trap, a lapsing in speech, or making a wrong move (his plump hands wavering uncertainly away from his body as he tripped, and caught up and tripped, trying desperately not to fall behind the men running—Mailer) (how I rejoiced when I found an author tripping—Tyn dall) (his tongue tripped over the word) (any military man familiar with firearms could trip you up, and if you were found out, you'd be hanged—Kenneth Roberts) Blunder stresses awkward confusion in movement or in proceeding that may suggest blindness, aimlessness, clumsiness, ignorance, or a failure to perceive where one is going or what is to be accomplished (unsteady on his feet and taken completely by surprise, he blundered headlong through the open doorway . . . and fell sprawling—Isherwood) (there was the constant danger of blundering into a house at a time when it was being ransacked by the Gestapo—Valtin) (the van . . . blundered away down the cart track like a drunken bee—Jan Struther) (各种 blundering attempts were made at alliance between various branches of thought—T. S. Eliot) Lurch suggests the heavy, ungracefully rolling or swaying movement of a ship in a storm or of a drunken man; when applied more generally to persons, it usually implies loss of muscular control or extreme clumsiness (the distraught and frightened man . . . raised himself on his hands and lurched forward—Anderson) (sometimes, down the trough of darkness formed by the path under the hedges, men came lurching home—D. H. Lawrence) (the conductor . . . lurched through the car asking for tickets—Styr on) Flounder stresses stumbling, struggling, or sprawling rather than rolling and usually implies an effort to proceed when one is out of one's element (as a fish out of water or a horse in the mire) or when one does not know the road or the way (went swiftly into the forest, leaping with sure feet over logs and brush. Pilon floundered behind him—Steinbeck) (they floundered on foot some eight miles—Cathcart) (in its extended use flounder usually implies the confusion of mind and the uncertainty of one who is completely muddled or at a loss but nevertheless proceeds (individuals who can't get a foothold in life, who flounder about in bewildered desperation—Deutsch) (nature has been floundering along for a great many millions of years to get things as they are—Furnas) Lumber, galumph, lollup, and bumble by contrast with the foregoing terms tend to suggest clumsiness, irregularity, or heaviness as a natural or usual manner of movement or gait. Lumber implies a ponderousness or clumsiness in movement (as of one heavily burdened or of great weight) (the jeep, opening its siren at a column of Quartermaster's trucks that lumbered along half a mile ahead, summoned them with stentorian wails to move over—Coozens) (a veritable mountain of a man, [he] deeply resented the attention he invariably attracted when he lumbered down a Manhattan thoroughfare—Cerf) In extended use it implies comparable ponderousness or clumsiness in proceeding or accomplishing (wide spread exaggeration with the union leadership and at the lumbering slowness of the machinery of negotiation—New Statesman) (where so many other historical novels lumber along beneath their load of conscientious detail, Mr. Graves's imagination is invariably stimulated by what he finds—Strong) Galumph adds to lumber the suggestion of a thumping, bumping, weighty gait (Frankie lived by day beside the ceaseless, dumping shuffle of the three-legged elephant which was the laundry's sheet-rolling machine. When he piled onto his narrow pad in the long dim-lit dorm at night and turned his face to the white-washed wall, the three-legged elephant of the mangle roller followed, galumphing, through dreams—Algren) (doors banged, voices rose shrilly, several pairs of feet galumphed down the passage—Monica Stirling) The notion of thumping or of heavy, lurching irregularity is often prominent in extended use (I was sweating in the cool air, my heart galumphing as I stood up—MacHug h) (the morning are enlivened by the spectacle of high-ranking naval and Air Force officers, who will be horse- borne in the procession, uneasily galumphing along the bridle path on their mounts—Panter-Downes) but sometimes it retains an earlier implication of gaily clumsy prancing (to a country that liked to think of its leaders as . . . mad but never without their dignity, Low brought the manhandling democratic touch. He made rank and office commonplace, turned politics into a galumphing merry-go-round—Pritchett) Lollop is more likely to suggest bounding irregularity than clumsiness or heaviness (elves lolloped in long grass—Patrick White) (the lioness . . . started to charge and seemed to come on in great bounds. She appeared to be lolloping along with a lot of up-and-down motion—F. G. Stewart) (an interurban trolley line (which terrified me the way it went lolloping around curves)—Palmer) (the breeze went lolloping along the corridors, blowing the blinds out—Woolf) Bumble suggests a blundering, haphazard progress (the hot auditorium where the June bugs bumbled foolishly against the window screens—Stafford) (the plane . . . hit the ground, her tail wheel exploded, and she came leaping like a grasshopper up the runway on a flat tail wheel . . . She bumped and bumbled up to the line—Steinbeck) and, especially in its extended use, may carry more than a suggestion of floundering and blundering (this novel describes a whole small town as it bumbles its way towards an acceptable life under conditions it never made—Graham Bates) (so long as we continue pursuing so shortsighted and blind a policy, so long, I believe, will we bumble and stumble into error—Cherin) "stagger, totter, *reel: *plunge, pitch, dive: falter, *hesitate, waver, vacillate: chance, *venture: encounter, *meet, confront A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
**stupid**

stupid adj **Stupid, slow, dull, dense, crass, dumb** are comparable when they mean conspicuously lacking in intelligence or power to absorb ideas or impressions or exhibiting such a lack. **Stupid** can apply to a sluggish slow-witted lack of intelligence, typically congenital or habitual, or it can apply to a usually more or less transitory benumbed or dazed state of mind that is typically the result of drunkenness, shock, or illness; although the term seldom is applied to the insane or the imbecile, it often also suggests senselessness.

---

**stylish**

**Stylish** is close to being simultaneously its exiles, queer ducks and catalyts—Vierock** (the new business buildings in the City of London represent British philistinism in its most crass and shortsighted form—Mumford**). He represented him as a crass and stupid person who had fallen through luck into flowing prosperity—Malamud**. Dumb (see also DUMB 1) is a term of contempt that may be used in place of any of the preceding terms especially when obtuseness and inarticulateness are also implied. How dumb do you think people are? Or how obtuse are you, actually?—Wouk**.

**stupendous** tremendous, prodigious, monumental, *monstrous

Ana enormous, immense, *huge, vast, colossal: gigantic:

---

**Dense** implies a quality of dullness of delicate mental processes (as analysis, discrimination, and evaluation) or impervious to refined or spiritual ideas. It may imply qualities (as obtuseness or stolidity) that reveal lack of perception, sensitiveness, or subtlety (a woman may be a fool, a sleepy fool, an agitated fool, a too awfully noxious fool, and she may even be simply stupid. But she is never dense—Conrad** never offered to take me over the house, though I gave her the broadest hints. She's very dense—Clive Arden**. Crass suggests a gross unfeeling quality that makes the mind incapable of delicate mental processes (as analysis, discrimination, and evaluation) or impervious to refined or spiritual ideas (crass ignorance) (those dedicated guardians of man's aspiration who somehow redeem their crass society by being simultaneously its exiles, queer ducks and catalysts—Vierock** (the new business buildings in the City of London represent British philistinism in its most crass and shortsighted form—Mumford**). He represented him as a crass and stupid person who had fallen through luck into flowing prosperity—Malamud**. Dumb (see also DUMB 1) is a term of contempt that may be used in place of any of the preceding terms especially when obtuseness and inarticulateness are also implied. How dumb do you think people are? Or how obtuse are you, actually?—Wouk**.

---

**taste, zest, gusto, relish: *form, convention, usage, convenance**

2 *fashion, mode, vogue, fad, rage, craze, dernier cri, cry

Ana modishness, smartness, chinciness, stylishness, fashionableness (see corresponding adjectives at STYLISH)

3 *name, designation, title, denomination, appellation

**style**

**Stylish** is often interchangeable with **fashionable** (a fashionable address in the new part of the city) (recently it has been more **stylish** to assume that the author of a story is a complete victim and tool, either of his purse and social position or of his parents' neuroses and theories about child-raising—Smart** (a former college classmate of mine. . . . he had been a high wheel under the elms, a miracle of scholarship and coordination, and classified, in the jargon then **stylish**, as a snake, or suave operator—Perelman**). She has restored delight . . . to poetry, has written her poems with the completest possible clarity (here you will find no **stylist** obscurantism, so dear to the avant-garde—Charles Jackson**). **Fashionable** is often interchangeable with **smart, chic, chic, fancy, dressing** can mean conforming to the choice and usage of those who set the vogue (as persons of wealth and taste or often the avant-garde). **Stylish** is likely to stress currency and, correspondingly, transitoriness (a **style** in the new part of the city) (recently it has been more **stylish** to assume that the author of a story is a complete victim and tool, either of his purse and social position or of his parents' neuroses and theories about child-raising—Smart** (a former college classmate of mine. . . . he had been a high wheel under the elms, a miracle of scholarship and coordination, and classified, in the jargon then **stylish**, as a snake, or suave operator—Perelman**). She has restored delight . . . to poetry, has written her poems with the completest possible clarity (here you will find no **stylist** obscurantism, so dear to the avant-garde—Charles Jackson**). **Fashionable** is often interchangeable with **smart, chic, chic, dressing** can mean conforming to the choice and usage of those who set the vogue (as persons of wealth and taste or often the avant-garde). **Stylish** is likely to stress currency and, correspondingly, transitoriness (a **style** in the new part of the city) (recently it has been more **stylish** to assume that the author of a story is a complete victim and tool, either of his purse and social position or of his parents' neuroses and theories about child-raising—Smart** (a former college classmate of mine. . . . he had been a high wheel under the elms, a miracle of scholarship and coordination, and classified, in the jargon then **stylish**, as a snake, or suave operator—Perelman**). She has restored delight . . . to poetry, has written her poems with the completest possible clarity (here you will find no **stylist** obscurantism, so dear to the avant-garde—Charles Jackson**).
or fashionable rather than one beyond this point (he was handsome, he was rich, he was a sportsman and he was good company. . . . he had been long established as one of the smartest men in London—Maughan) (her college set had stayed rigidly in a zigzag path through the town, traversing a few hotel bars, nightclubs, and eating places which they considered smart—Wouk) (black is often used in smart, sophisticated interiors—Hazel & Julius Rockow) Chic is sometimes used simply as an equivalent to modish or smart (the good corporation wife does not make her friends uncomfortable by clothes too blatantly chic—Whyte) or even of fashionable (whether or not he (the artist) liked it, he became chic—Harper's) However it may not imply conformity to the latest style so much as an effectiveness in style which suggests the exercise of a knack or skill and the achievement of distinction (the natural elegance which enables her to look chic in camouflage parachute's overalls—Edmond Taylor) (decided to put her culinary tricks into book form for other women who want to whip up a chic meal—Butcher) (achieved so great a virtuosity that now he not only can do anything but does everything, fluctuating between a wistful religiosity and a chic diablerie—Untermeyer) Dashing applies to people or to things which they wear or use; it implies not only stylishness or, more often, modishness but a bold, shining quality that enables one to cut a figure in any group or assemblage (you're willing to be a dashing knight, but you also want to be a careful knight—Gardner) (he was a tall, handsome, dashing chap . . . whose magnificent disregard for money cut a wide swath in the social life of the town—Amer. Guide Series: N. J.) (a pair of dashing young brokers)

**Ana** *new, novel, new-fashioned, newfangled, modernistic:* showy, ostentatious, pretentious

**Suave, urbane, diplomatic, bland, smooth, politic** as applied to persons, their demeanor, and their utterances can mean conspicuously and ingratiatingly tactful and well-mannered. These words at times can convey so strong a suggestion of insincerity or of a surface manner that their distinctive implications are obscured. It is chiefly in their nonderogatory use that essential differences in meaning are apparent. Suave suggests qualities that are or have the appearance of being acquired through discipline and training and that encourage or are intended to encourage easy and frictionless intercourse with others. Negatively, it suggests the absence of everything that may offend or repel; positively, it suggests such qualities as affability without fulsomeness, politeness without stiffness, and persuasiveness without evident desire to force one's opinion on others (what gentle, suave, courteous tones!—Jackson) (a slight disturbance of his ordinary suave and well-bred equanimity—Lyttton) (they could be as suave in advancing their bromides as we could be gauche in establishing our originalities—J. M. Brown) Urbane implies a high degree of cultivation, poise, and wide social experience; it also commonly suggests an ingrained or inbred courtesy which makes for pleasant and agreeable intercourse among all kinds of men regardless of size or social or intellectual standing (writes with fluent charm, in the easy, urbane, richly allusive manner of an Oxford and Cambridge savant—Wecht) (men of delicate fancy, urbane instinct and aristocratic manner—in brief, superior men—in brief, gentry—Menckcn) Since urbanity and an ability to deal with difficult or ticklish situations with great tact are theoretically the qualities of the typical diplomat, the adjective diplomatic, when used in reference to nondiplomats, carries these implications, often adding in addition a hint of artfulness in gaining one's own ends (Gabrielle's busy, active, diplomatic managing of the party—E. E. Hale) (the diplomatic manner . . . of a government official whose career depended on politeness to his equals and deference to his superiors—MacInnes) (I have grown to believe that the one thing worth aiming at is simplicity of heart and life; that one's relations with others should be direct and not diplomatic—Benson) Bland is negative as well as positive in its implications, for it usually implies the absence of irritating qualities as strongly as it suggests serenity, mildness, and gentility. Nevertheless, in spite of this vagueness, the term often carries a hint of benignity or the appearance of it and usually directly implies an ingratiating pleasantness (his manners were gentle, complying, and bland—Goldsmith) (he's simply a distinguished-looking old cleric with a sweet smile and a white tie: he's just honorable and bland and as cold as ice—Santayana) (most of the time he sat behind a look of bland absorption, now and then permitting himself an inscrutable smile—Hervy) Smooth differs from bland chiefly in being more positive in its implications and in being more consistently derogatory. Sometimes it stresses suavity, often an assumed suavity (the words of his mouth were smoother than butter, but war was in his heart—Ps 55:21) At other times it carries even a stronger implication of tactfulness and craft than diplomatic (I was not even my parents' son in 1928 but a devilishly smooth imposter, awaiting their slightest blunder . . . to assert my true identity—Salinger) (the sales talk of our government for the second one was a smooth and professional job—Edmund Wilson) Politic (see also EXPEDIENT) when applied to persons implies both shrewdness and tact; the term usually suggests the ability to gain one's ends or to avoid friction through ingratiating means or diplomatic methods. It varies considerably, however, in its implication of artfulness, sometimes connoting cunning or craft and sometimes little more than just the right degree of suavity (I . . . am an attendant lord . . . deferential, glad to be of use, politic, cautious, and meticulous—T. S. Eliot) (the mayors and corporations as a rule guided their cities through difficult times with politic shrewdness—Edwin Benson) Ana *gracious, cordial, affable, genial, sociable: courteous, courtly, polite* (see CIVIL): fuscous, unctuous, slick

**Ant** bluff

**subdue** subjugate, reduce, overcome, surmount, overthrow, rout, *conquer, vanquish, defeat, beat, lick* Ana control, manage, direct (see CONDUCT vb): discipline, *punish, correct: foil, thwart, circumvent, *frustrate: suppress, repress

**Ant** awaken (sense 2), waken

**subdued** *tame, submissive* Ana meek, *humble, modest, lowly: timid, timorous: docile, tractable, amenable (see OBEDIENT)

**Ant** intense: barbaric (of taste): bizarre (of effects): effervescent (of character and temperament)

**subject** n 1 citizen, national

**Ant** sovereign

**Ant** objective, matter, subject matter, argument, topic, text, theme, motive, motif, leitmotiv can mean the basic idea or the principal object of thought or attention in a discourse or artistic composition. Subject is the most widely applicable as well as the least definite in denotation of these words; it implies merely some restriction in one's field of choice and a governing principle determining the selection of one's material and demanding some concentration in the treatment of it (as in a discourse or work of art) (what is the subject of his painting?) (your subject is too comprehensive to be treated adequately in so short an article) (it was the first of the . . . major mistakes in World War II and became a subject of violent controversy
subject

—Shirer> Matter and the more usual subject matter are often used as close synonyms of subject (Chail, Son of God, Saviour of men! Thy name shall be the copious matter of my song—Milton) <Mr. Lytton Strachey . . . chose, as subject matter of a book, four people of whom the world had heard little but good—Repliер> As often, however, these terms refer not to the idea, object, or situation selected for treatment but to a restricted field or range of material from which one selects the specific subject he intends to treat <Alexander's Bridge was my first novel, and it does not deal with the kind of subject matter in which I now find myself most at home—Cather> Argument (see also reason, argument 2) can denote the subject, especially the carefully delimited subject, for a particular discourse (as a poem or a part of a poem) that is planned in advance of execution <the argument of the book is as simple as you could wish for—Paris> The word sometimes implies explicit statement of the leading idea or a summarizing of its development <Pope prefaced each epistle of his Essay on Man with an argument of it> Topic applies to a subject, usually of general interest, chosen because of its possibilities for individual or original treatment or for discussion by different persons holding diverse views <the students were asked to write an essay on one of the assigned topics> <I can't remember in a prolonged conversation what topic's been covered and what hasn't—Purdy> Text can mean a verse or passage, usually from Scripture, chosen as providing or suggesting a subject for a sermon or similar discourse <the excellency of this text is that it will suit any sermon; and of this sermon, that it will suit any text—Sterne> In extended use it is often applied to whatever suggests itself as a good starting point for a discourse the subject of which is yet to be defined or which lacks a definite subject <my text for this chapter is . . . any good daily newspaper—La Barre> Theme denotes a subject which one selects for literary or artistic treatment; it is applicable to something (as an idea, proposition, text, melodic phrase, or mood) which a writer, composer, or artist proposes to develop (as in a poem), to elaborate upon (as in a movement of a symphony), or to illustrate (as in a mural or series of murals) or which can be detected in a completed work as the dominant object of his concern <tools are my theme, let satire be my song—Byron> <waterfalls are from very early times a favorite theme for the painter—Binyon> Theme does not necessarily suggest a clearer definition than subject or topic, but, in distinction from them, it invites comparison with the treatment and calls attention to the quality, the form, the design, or the execution of the completed work; thus, an overworked theme implies a lack of freshness in the thought or design; a compelling theme suggests force and enthusiasm in its treatment <to produce a mighty book you must choose a mighty theme—Melville> Motive and motif are restricted in reference to works of art to those in which design or treatment is the dominant feature of the design and is repeated at appropriate intervals <the chief motif of the design is the peacock or peacock metaphor defended by decorative artists> <don't speak. Don't think. This is, of course, a familiar refrain . . . . . . It is the motif of the great dark stories of the 1930's—Geismar> Leitmotiv designates a specific melodic phrase that is associated with a particular person, mood, or situation (as in an opera) and that is repeated each time this person, mood, or situation reappears. The word has considerable extended use and is often applied to an insistent or recurrent idea that becomes the dominant theme of an author or of a work <"Fate went its way uncompromisingly to the terrible end." This is the leitmotiv of this interesting, dignified apologia of one of Austria's Elder Statesmen—S. R. L.> subject adj 1 dependent, *subordinate, secondary, tributary, collateral
Ana *subservient, servile, slavish: conditional, contingent, *dependent, relative
Ant sovereign, dominant
2 *liable, open, exposed, prone, susceptible, sensitive
Ana *apt, likely, liable
Ant exempt

Ana transcendent, transcendental, ideal, *abstract: divine, spiritual, sacred, *holy: majestic, august, noble, stately (see grand)
sublunary *earthy, terrestrial, earthy, mundane, worldly
submerge immerse, duck, *dip, sourse, dumb
Ana *soak, saturate, drench, impregnate
submission *surrender, capitulation
Ana yielding, submitting, succumbing, bowing, caving in (see yield): compliance, acquiescence, resignation (see under compliant)
Ant resistance
submissive *tame, subdued
Ana docile, tractable, amenable, biddable, *obedient: meek, lowly, *humble: subservient, servile, slavish, menial
Ant rebellious
submit *yield, capitulate, succumb, relent, defer, bow, cave
Ana surrender, abandon, resign, *relinquish: abide, endure, suffer, *bear
Ant resist, withstand
subordinate adj Subordinate, secondary, dependent, subject, tributary, collateral are comparable when they mean placed in or belonging to a class, rank, or status lower than the highest or the first in importance or power. Subordinate applies to a person or thing that is lower than another in some such essential respect as by being under his or its authority <all officers of an independent army below the rank of general are subordinate officers> <Montholon, up to that moment subordinate to the Grand Marshal, was entrusted with the management of the Emperor's household—Maurois> or by having a less important or less conspicuous place, position, or status in the scheme of a whole than some other member, part, or element <the relation of dominating to subordinate features —Binyon> <ceremony is subordinate in the scheme of life as color is in a painting—Ellis> by loss of independence and reduction to a lower or inferior position; not that time considered as a subordinate and inferior class of beings . . . . . . subjugated by the dominant race—Taney> <it does tell us . . . why a complex of beliefs is dominant at one time and subordinate at another—Howe> Secon-
dary differs from subordinate mainly in suggesting a much narrower range of difference, for it implies a position

**Ant** boggle

**subservient** 1 *auxiliary, subsidiary, contributory, ancillary, adjuvant, accessory

2 **Subservient, servile, slavish, menial, obsequious** can mean showing or characterized by extreme compliance or abject obedience. **Subservient** (see also **auxiliary**) applies directly or indirectly to those who occupy a subordinate or dependent condition or who manifest the state of mind of one in such a position; the term stresses subordination and may connote cringing or truckling editors and journalists who express opinions in print that are opposed to the interests of the rich are dismissed and replaced by **subservient** ones—**Shaw** (a certainty that she would always worship him and be nice and **subservient**—**Farrell**). **Servile** suggests a lowly status and a mean or cringing submissiveness **(servile labors)** (mean, servile compliance—**Burns** (in no country . . . did the clergy become by tradition so completely servile to the political authority—**Shirer**) (they are not loyal, they are only **servile**—**Shaw**). **Slavish** suggests the status or attitude of a slave and typically implies an abject or debased servility unbecoming to a free man **(a slavish yes-man to the party bosses—S. H. Adams)**. **Oriental literature . . . is based on a servile acceptance by the pupil of the authority of the master—**Cohen** (she also became increasingly assiduous in her servilist attentions, until . . . one would almost have thought that her duty toward him was her very life—**Wolfe**). Both **servile and slavish** are used of unduly close dependence upon an original or model **(it is the business of art to imitate nature, but not with a servile pencil—**Goldsmith**). **(a slavish devotion to tradition)**. **Menial** in its typical extended reference applies to occupations requiring no special skill or intellectual attainment or ranked low in economic or social status and stresses the humbleness and degradation of or like that of one bound to such an occupation **(niggers were inedicable and would therefore always be menial—**Mayer**). **(competing against a mass of unemployed, they accepted the most menial and worst paid jobs—**Handlin**) (encouraged to rise from the menial and mechanical operations of his craft—**Mumford**). **(most menial of stations in that aristocratic old Boston world—**Parrington**). **Obsequious** may apply to persons who are actual inferiors or to the words, actions, or manners by which they reveal their sense of inferiority in the presence of their superiors **(a duteous and knee-crooking knave . . . doting on his own obsequious bondage—**Shak.**). **(be civil, but not obsequious—**Meredith**). The word may imply a servile, often a sycophantic, attitude **(brutal and arrogant when winning, they are bootlicking and servilely obsequious when losing—**Cohn**) (on the second Saturday evening after he got his new position, the tobacconist, a rather obsequious man, called him Mr. Hall—**Anderson**) or extreme attentiveness in service or to the niceties of service **(following him out, with brutal and arrogant when winning, they are bootlicking and servilely obsequious when losing—**Cohn**). The word may imply a servile, often a sycophantic, attitude **(brutal and arrogant when winning, they are bootlicking and servilely obsequious when losing—**Cohn**) (on the second Saturday evening after he got his new position, the tobacconist, a rather obsequious man, called him Mr. Hall—**Anderson**) or extreme attentiveness in service or to the niceties of service **(following him out, with obsequious politeness—**Dickens**). **Ana** fawning, cringing, truckling, cowering (see **fawn**); *compliant, acquiescent, resigned: *mean, ignoble, abject

**Ant** domineering; overbearing

**subside** 1 *fall, drop, sink, slump

**Ana** sag, flag. *droop, wilt: shrink, *contract, constrict

2 *abate, wane, ebb

**Ana** dwindle, diminish, *decrease

---

**or a importance that is just below what may be described as primary, main, chief, or leading (what they actually believe is of secondary consequence; the main thing is what they say—**Mencken**). The valuation of an object is thus secondary to the apprehension of it—**Alexander**. Each stage of the climb from valley to intermediate shoulders and crags, to a secondary and thence to the highest point—**W. O. Douglas**. In reference to order of development or derivation secondary is opposed to original or first and carries no necessary implication of inferiority in importance **(the secondary meaning of a word)**. His primary tools, the fundamental cutting tools with which he makes his secondary tools—**R. W. Murray**. **Dependent** (see also **dependent** 1) implies subordination to someone or something, but it also connotes the position or the status of one that hangs on, leans on, or relies on the other for support or for the provision of what is lacking in itself; thus, a dependent clause in a sentence is not completely intelligible apart from the main clause; a dependent child is not old enough to support himself and therefore must rely upon his parents or guardians. In its commonest use dependent implies a loss, through subjugation or through weakness, of one’s independence; it therefore frequently stresses powerlessness or debasement more than subordination **(England, long dependent and degraded)**, was again a power of the first rank—**Mackauly**. **Maggie is not dependent on Honora—she could get a better job tomorrow—**Cheever**. **Subject** definitely implies subordination to a dominant power but never carries, as **subordinate** sometimes carries, an implication of relative importance within a scheme of the whole; it often tends to suggest loss of those powers which imply a degree of freedom, responsibility, self-discipline, and self-sufficiency. **(a subject race)** aristocracy is out of date, and **subject** populations will no longer obey even the most wise and virtuous rulers—**Russell**. **Tributary** basically applies to peoples, races, or nations that have been conquered and made subject to another people, race, or nation and that are forced to pay tribute to their conquerors, but in more general use it is often interchangeable with **subject** **(no conquering race ever lived or could live . . . among the tributary streams of the Mississippi river)**. **(the lane, receiving two tributary lanes from who should say what remote hamlets, widened out with this accession—**Mackenzie**). **Collateral** implies a being side by side, but it suggests not equivalence in value but subordination of one through or as if through an indirect relation to or a loose connection with the other; thus, a collateral cause of a war, though by implication operative at the same time as the most important or primary cause, is subordinate to the latter; a collateral issue is not the main issue; a collateral descendant is not a direct or lineal descendant but one in a different line (as of a brother or sister) **the union had engaged successfully in many collateral activities such as banking and cooperative housing—**Soule. **(the limiting of inquiry to the immediate, with total disregard of the collateral or circumstantial events—**Poe**). **Ana** *auxiliary, subsidiary, subservient, contributory, adjuvant: *accidental, incidental, fortuitous

**Ant** chief, leading; dominant

**subordinate** 1 *inferior, underling

**Ant** chief—**Con** head, master, leader (see **chief**)

substantiation  *living, livelihood, sustenance, maintenance, support, keep, bread, bread and butter
subspecies  *variety, race, breed, cultivar, strain, clone, stock

substance 1 Substance, purport, gist, burden, core, pith
can denote the inner significance or central meaning of something written or said. Substance implies the essence of what has been said or written devoid of details and elaborations; the term is used especially when such an essence is repeated for the sake of others, but it may be used also of what characterizes a discourse and gives it body as distinguished from the frills or rhetorical froth that give it finish <give the substance of a speech>
<the substance of a scientific paper is incorporated into the general stock of knowledge; but the paper itself is doomed to oblivion—Huxley> <to strip her lines of all ornament, of all effective appeal, in order to contemplate better the substance of her poem—Fits> Purport lays the stress upon purpose or intent but when used of written or spoken discourse it applies to what is intended to be conveyed or imparted and so actually refers to the central meaning. It is often interchangeable with substance but always with the implication of the speaker's or writer's purpose <the...purport of his letter was to inform them that Mr. Wickham had resolved on quitting the militia—Austen> <he has received just sufficient education to make him understand half the purport of the orders he receives—Kipling> Gist refers to the material part (as of a question, an argument, or a discourse); it is the substance there of reduced to its lowest terms <the gist of the thing grows, at each stage of the progress, terser, more pungent, more crystal clear—Montague> <within an hour the Voice of America had begun translating the gist of the decision into thirty-four languages—Beverly Smith> Burden implies the part most insisted upon or most often repeated and usually means the main topic or theme <the burden of his conversation was that there was no escape "of no kind whatever"—Kipling> <that desire to hear lost laughter which is the burden of every century's lament—Reppie> Core can apply to various things that give the effect of being whatever remains after the outer or superficial part is stripped off, in application to what is written or said it emphasizes the centrality of the meaning and the relative unimportance of the other aspects <the true center of the book is its core of irony, insight into the contrast between illusion and reality in a narrower and more expressive term <there is substance which gives a discourse its concentrated force, vigor, or vitality and is, therefore, a narrower and more expressive term <there is pith in this essay> <such counsels, rather than the systematic doctrine...contain the pith of what he has to say—J. M. Cameron>

Ana  *center, nucleus, heart, core, focus: *principle, fundamental: foundation, *base, groundwork
2 *matter, material, stuff
substantial  *massive, massy, bulky, monumental
Ant  airy, ethereal
substantiate  verify, corroborate, *confirm, authenticate, validate
Ana  *prove, demonstrate, *try, test
substitute n 1 surrogae, *resource, resort, expedient, shift, makeshift, stopgap
Ana  *device, contrivance, contraption: duplicate, copy, *reproduction
2 Substitute, supply, locum tenens, alternate, understudy, double, stand-in, pinch hitter designate a person who performs or is prepared to perform the duties of another during the latter's absence or incapacitation. Substitute is the general term interchangeable with any of the others; specifically it is often applied to a teacher not appointed to a full-time position but held in reserve for service when needed. A supply is a clergyman who substitutes for the regular preacher. A locum tenens is often a substitute for a professional man with a practice or clientele which needs to be cared for while he is away for a length of time; the term is used especially with respect to physicians and clergymen. An alternate is one appointed or elected to take the place of another (as a delegate to a convention, a holder of a fellowship, the winner of an award, or a juror) if the latter should be incapacitated or disqualified. An understudy is a reserve actor or actress prepared to take the part of a regular actor or actress on short notice. A double is a person sufficiently like another to be able to substitute for him in public and especially an anonymous actor or actress in motion pictures who substitutes in shots or scenes where the required action is considered too risky or onerous for the regular player. A stand-in in motion pictures is one whose chief duty is to substitute for a star during the preparation (as in arranging lighting) for actual shooting of scenes. A pinch hitter is a baseball player sent in to bat to replace a weak hitter when a hit is particularly needed or, by extension, a person who substitutes for another in an emergency; the term may connote competence or ability to rise to the demands of the situation but is frequently a more graphic equivalent of substitute.

subsume  *include, comprehend, embrace, involve, imply
Ant  logical, analytical
subterfuge  penetrat ing, piercing, probing (see ENTER): *deep, profound: abstruse, *recondite
Ant  dense (in mind): blunt (in speech)
subtract  *deduct
Ant  add
subvention  grant, *appropriation, subsidy
subvert  *overturn, overthrow, capsiz e, upset
Ana  *ruin, wreck: *destroy, demolish: corrupt, pervert, deprave, *debase
Ant  uphold, sustain

succeed 1 *follow, ensue, supervene
Ana  displace, supplant, *replace, supersede
Ant  precede
2 Succeed, prosper, thrive, flourish can mean to attain or to be attaining a desired end. Succeed (see also FOLLOW) implies little more than this. Both persons and things succeed when they are effective in gaining their purposes or ends, in particular or in general; the term implies an antithesis or the increase of health, of wealth, or of well-being <prosper in business> <Milenka was soon succeeding in disturbing the boy with his absurd proposal—Dahl> <the revolt against the tyranny of mathematics and physics is justified by the fact that these sciences have not succeeded in explaining the phenomena of life—Inge> Prosper carries an implication of continued or long-continuing success; it usually also suggests increasing success. Only through the context is it clear whether the success is in the continuation or the increase of health, of wealth, or of well-being <prosper in business> <Milenka was soon prospering. His coat came in soft and shining; his purr cleared, and his eyes lost the milkiness that had clouded them—

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
throttle can all mean to interrupt the normal course of breathing. Suffocate commonly refers to conditions in which breathing is impossible through lack of available oxygen or through presence of noxious or poisonous gas. Prisoners suffocated in the underground dungeon. Suffocate also refers to situations in which breathing is impossible because mouth and nose are covered. Suffocating under the mud and earth which had fallen over his head. Asphyxiate is likely to refer to situations in which death comes through poisonous gases in the air or through lack of sufficient oxygen. Asphyxiated by the chlorane gas in the cell. Stifle is appropriately used to refer to situations in which breathing is difficult or impossible through lack of adequate fresh air and, often, presence of heat. Closing a hatch to stop a fire and the destruction of a cargo was justified even if it was known that doing so would stifle a man below. Smother is likely to be used in situations in which the supply of oxygen is inadequate for life; it often suggests a deadening pall of smoke, dust, or impurity in the air. Smothered by the dust after the explosion. A smell of soot which smothered the scent of wisteria and iris. Smother also refers to situations in which the mouth and nose were covered so that one cannot breathe. To stop breathing was a convention of a cargo was justified even if it was known that doing so would stifle a man below. Strangle usually suggests external compression of the windpipe, or irritation, but it is more likely to indicate fatality or quite serious condition. Strangled with a cushion. Throttle can all mean to interrupt the normal course of breathing. Suffocate, franchise, vote, ballot mean the right, use of the vote. The citizens' means of getting the kind of government they want. Among free men there can be no successful appeal from the ballot to the bullet, and they who take such appeal are sure to lose their case and pay the cost. Suffuse – infuse, imbue, ingrain, inoculate, leaven. Introduce, interpose, interject; impregnate, penetrate, pervade (see PERMEATE) suggest – imply, hint, intimate, insinuate can all mean to convey an idea or the thought of something by indirect means. Suggest emphasizes a putting into the mind as the result of an association of ideas, an awakening of a desire, or an initiating of a train of thought. Hint, the momentary or fleeting. The hint of a word or phrase is likely to be used in situations in which the supply of oxygen is inadequate for life; it often suggests a deadening pall of smoke, dust, or impurity in the air. Suggest also refers to situations in which breathing is difficult or impossible through lack of adequate fresh air and, often, presence of heat. Suggest implies some method of secret ballot, which specifically implies some method of secret voting, is likely to be used when the emphasis is on the power to vote freely, effectively, and without coercion, on the expressed will of the majority, or on the ethical use of the vote. Suggests another when it brings to mind something that is not objectively present, immediately apparent, or directly represented. The thing

795 suggest

suggestion 796

that suggests may be an outward sign which prompts an inference (a certain well-to-do air about the man suggested that he was not poor for his degree—Hardy) It may be a symbol, which calls to mind whatever it conventionally represents (the fleur-de-lis suggests the royal power of France) It may be a fragment which evokes an image of a whole or a concrete detail that gives an inkling of something abstract or incapable of representation (the curve of the greyhound is not only the line of beauty, but a line which suggests motion—Jeffries) It may be a word or a phrase that calls up a train of associations and reveals more than it actually denotes (phrases flat and precise on the surface yet suggesting mystery below—Day Lewis) (the business of words in prose is primarily to state; in poetry, not only to state, but also (and sometimes primarily) to suggest—Lowes) One thing adumbrates another when the former faintly or darkly or sketchily suggests the latter. Adumbrate seldom takes a material object and is especially appropriate for use with one that is or is felt as beyond the present level or sometimes the reach of human comprehension or imagination (the Soviet demands, flatly presented or delicately adumbrated at Potsdam—Mosely) (this concept is adumbrated, but not yet distinctly conceived—Lowie) (both in the vastness and the richness of the visible universe the invisible God is adumbrated—Isaac Taylor) When one thing shows shadows (or shadows foreshadow) another thing, it represents that thing obscurely (as by a symbol or other indirect means). Sometimes the word comes close to prefigure or foreshadow, but as a rule precedence is not implied (to the Chinese painters this world of nature seemed a more effective way of shadowing forth the manifold moods of man than by representing human figures animated by these moods—Binyon)

sullen

suggestion *touch, suspicion, soupçon, tincture, tinge, shade, smack, spice, dash, vein, strain, streak

suit *prayer, plea, petition, appeal

Ana entreaty, importuning or importunity, imploring, supplication (see corresponding verbs at beg): asking, requesting or request, soliciting or solicitation (see corresponding verbs at ask)

2 Suit, lawsuit, action, cause, case are all used to designate legal proceedings instituted for the sake of demanding justice or enforcing a right. Though often used interchangeably in the sense of lawsuit, they may have certain differences in their connotations and their applications. Suit stresses the attempt of a complainant through litigation to gain an end (as redress for a wrong, recognition of a claim, or the enforcement of law); it therefore may be used of the proceedings from the time of formal application through the prosecution (win a suit) (withdraw a suit) (a suit in equity) Lawsuit can add to suit the implication of actual trial in court and often that of judicial decision; it may therefore refer to the entire proceedings (the lawsuit of Brown versus Jones ended in victory for the defendant) Action comes very close to suit, but it is relatively colorless and throws the emphasis on actual proceedings rather than on petition (bring an action in Circuit Court) In technical legal use, however, it is a proceeding in a court of law which is distinguished from a suit in equity and which has for its end the ascertainment of facts. If the complainant’s position is found correct in such an action, an appropriate legal remedy may then be applied. Cause emphasizes the grounds on which one institutes a suit; consequently, like suit, it implies the plaintiff’s point of view, but it suggests even more strongly his sense of the justice of his demand (the customary arts of the pleader, the appeal to the sympathies of the public . . . he rejected as unworthy of himself and of his cause—Dickinson) Case, like cause, may imply rather the grounds of action than the actual proceedings but, unlike cause, may view or present these grounds from either or both points of view (the plaintiff has a good case) (the defendant’s attorney stated his case) However case often is applied to the entire proceedings in a lawsuit including the judicial decision (one of the famous cases in legal history) (a study of historic capital cases)

suitable *fit, meet, proper, appropriate, fitting, apt, happy, felicitous

Ana *decorous, decent, seemly, proper, nice: advisable, *expedient, politic: *due, rightful, condign

suitly surly, morose, glut, *sullen, crabbed, saturnine, dour, gloomy

Ana cranky, cross, testy, touchy (see irascible): peevish, petulant, fretful, querulous, *irritable

sullen, glut, morose, surly, sulky, crabbed, saturnine, dour, gloomy can mean governed by or showing, especially in one’s aspect, a forbidding or disagreeable mood or disposition. One is sullen who is, often by disposition, gloomy, silent, and ill-humored and who refuses to be sociable, cooperative, or responsive (Sheridan was generally very dull in society, and sat sullen and silent—Scott) (he made them go back to the fields immediately after supper and work until midnight. They went in sullen silence—Anderson) (the frolicking quarrals, and always, always, the bitter sullen face of the boy brooding over his work—Dahl) One is glut who is dizzily silent either because of low spirits or depressing circumstances (we have of course good reason to look glut and little reason to laugh . . . now deprived of most of the things that make for gaiety and high spirits—Maiz) (the two of you . . . surging there as glut as a pair of saints in hell—Deasey) One is morose who is aesthetically sour or bitter and inclined to gloominess (a morose ill-conditioned, ill-natured person—South) (should there be any cold-blooded and morose mortals who really dislike this book—Boswell) One is sullen who adds chillleness or gruffness of speech and manner to sullenness or moroseness (he indulged his moods. If he were surly, he did not bother to hide it; if he were aggressive, he would swear at her—Mailer) (“Sam, put it out of your mind,” I snapped in a rather surly rebuff—Michener) (the somewhat surly goodness, the hard and unattractive pieties into which she cannot really enter—Pater) One is surly who manifests displeasure, discontent, or resentment by giving way childishly to a fit of peevish sullenness (though he had come in sulky unwillingness, he was impressed by the supper—Sinclair Lewis) (we were a precious pair: I sulky and obstinate, she changeable and hot-tempered—Shaw) One is crabbed who is actually or seemingly ill-natured, harsh, and forbidding. The term often refers to one’s aspect and manner of speaking and usually implies a sour or morose disposition or a settled crossness (divine Philosophy! Not harsh and crabbed, as dull fools suppose—Milton) (the querulous, exacting father could not help . . . exasperating the children whom, in his own crabb’d way, he yet genuinely loved—Woolf) One is saturnine who presents a heavy, forbidding, taciturn gloom (driven to saturnine and scornful silence by Gerald’s godless conversation—Wylie) (Sheridan’s humor, or rather wit, was always saturnine, and sometimes savage; he never laughed—Byron) but saturnine may come close to sardonic (which see under SARCASM) and then suggests less a depressing heaviness and gloom than . . . a kind of misanthropic skepticism that is often at least superficially attractive (novels . . . in which evil is personified by saturnine persons who
own yachts and look good in evening dress—Anthony West) (he felt worldly and saturnine like a character in a movie—Cheever) One is dour who gives a sometimes superficial effect of severity, obstinacy, and grim bitterness of disposition (though the Filipino seldom smiled, he was by no means dour. Kindliness was one of his most charming traits—Heiser) he was silent, gloomy and dour, frequently irritable, unfriendly—C. W. M. Hart) One is gloomy who is so depressed by events or conditions or so oppressed by melancholy that all signs of cheerfulness or optimism are obscured, so that he appears sullen, glum, or dour as well as low-spirited (take a gloomy view of world conditions) (when she is gloomy she makes everyone unhappy) he was constitutionally gloomy, a congenital pessimist who always saw the doleful side of any situation—White) Ana lowering, glowering, frowning, scowling (see FROWN): spiteful, malevolent, *malicious, malign: *cynical, pessimistic sully *soil, dirty, tarnish, foul, befoul, smirch, besmirch, grime, begrime Ana *spot, spatter, sprinkle: defile, pollute, taint, *con-

**sum n** Sum, amount, number, aggregate, total, whole, quantity denote a result obtained by putting or taking together all in a given group or mass. Sum denotes the result of simple addition, usually of figures, sometimes of particulars {four is the sum of two and two} Amount denotes the result reached by combining all the sums or weights or measures that form a whole {the amount of his purchases} {the amount of cotton raised in one year} Number, with its strong suggestion of enumerating, is usually applied to a countable aggregate of persons or things and is clearly distinct from amount, which ordinarily applies to things in bulk or mass; thus, one may pick a large number of apples to make a large amount of applesauce. Aggregate denotes the result reached by counting and considering together all the distinct individuals or particulars in a group or collection (though his errors are individually insignificant, their aggregate is so large as to destroy confidence in his accuracy) (it is not true that a social force or effort is the mere aggregate of individual forces and efforts—Hobson) Total and whole suggest the completeness or inclusiveness of the result; total often further implies magnitude in the result, and whole, unity in what is summed up (a grand total of ten millions) {the whole is the sum of its parts} Quantity in general use is employed chiefly of things which are measured in bulk, even though they can be counted (a quantity of apples) In technical and scientific use quantity is not limited to an aggregate or bulk but may be used of anything that is measurable in extent, duration, volume, magnitude, intensity, or value (spatial quantity) {the quantity of a vowel} {electrical quantities} {quantity of heat} {quantity of work performed by a machine) sum vb *add, total, tot, cast, figure, foot Ana compute, *calculate, estimate, reckon: *count, enumerate, number summary adj pithy, copious, *concise, terse, succinct, laconic Ana *brief, short: *quick, prompt, ready, apt: compacted or compact, concentrated (see COMPACT vb) Ant circumstantial summative *cumulative, accumulative, additive summit, peak, pinnacle, climax, apex, acme, culmination, meridian, zenith, apogee can mean the highest point attained or attainable. Summit is applied to what represents the topmost level attainable by effort or to what is the highest in its type or kind of attainable things (this scaleless monster, eight or nine feet long, sprawling in the shade by the side of the mud pools . . . was the summit of labyrin- thodont evolution—Swinton) (the Bar’s outstanding figure by acclaim . . . in the fullness of his powers and at the summit of his fame—Lustgarten) Peak usually implies a point rather than a level {the peak of enthusiasm) It is frequently applied to something that is or can be represented in a graph; used absolutely it designates the highest point reached in a course or during a stated or implied length of time {security prices reached new peaks this year) (his vocal control was at its peak when he did the recording—Paul Hume) Pinnacle is applied chiefly to what has reached a dizzy and, often, insecure height (the word theater means different things to different groups. To some its very pinnacle is South Pacific, which is despised by the aesthetes—Miller) (a pinnacle of happiness—Brooks) (never achieved the pinnacle of public life, the presidency, when lesser men did—Severad) Climax implies a scale of ascending values; it is applied to the highest point in force, in intensity, in interest, or in impressiveness in an ascending movement or series. The word often suggests an end or close (reserve your strongest argument for the climax of your speech) (the quarrel had been only the climax of a long period of increasing strain—Davis) (the Marxist version of history, according to which the seeming harmonies of our society would blow up in a catastrophic climax—Niebuhr) Apex is applied to the highest or culminating point (as in time or of accomplishment) to which everything in a career, a system of thought, or a cultural development ascends and in which everything is concentrated (if terrestrial culture were a pyramid, at the apex (where the power is) would sit a blind man, for . . . only by blinding ourselves, bit by bit, may we rise above our fellows—Theodore Sturgeon) (the British people, who looked upon the king as the apex of their national and social aspirations—Bolitho) the argument is that Wordsworth’s economic, political, religious, and “sexual” unorthodoxies dawned gradually, reaching an apex about 1793—Carlos Baker) Acme is applied to what embodies or represents the perfection or pure essence of a thing (Sir Philip Sidney was the acme of courtesy) (to say “mother” instead of “mother” seems to many the acme of romance—Wilde) (seemed to consider this the very acme of humor, for he fairly hooted at us—R. H. Davis) Culmination can denote an apex that is the outcome of a movement, a growth, a development, or a progress and that represents its natural end or attained objective (this joint effort of church and crown . . . found its culmination under Henry VIII, when the nobles were definitely conquered by the crown and the Reformation by the church—Brownell) (the recent use of the atomic bomb . . . is the culmination of years of Herculean effort—Stimson) but often culmination suggests a coming to a head or issue rather than to a high point (war is a culmination of evils, a sudden attack on the very existence of the body politic—Roosevelt) (the Reformation . . . was . . . the culmination of a long agitation for national independence in religious matters—Inge) Meridian is applied to the prime or period of fullest development or vigor in a life (as of a person, a race, or an institution); it connotes not only prior ascent but ensuing decline (I have touched the highest point of all my greatness: and, from that full meridian of my glory, I haste now to my setting—Shak.) (the past eighteen years have constituted one of the great historical meridians of the presidency—Rossiter)Zenith adds to meridian the implications of luster and distinction (he had reached the zenith of his powers) (classical studies reached their zenith in the twelfth century—H. O. Taylor) Apogee, like meridian, is applied to the highest point (as in a course, a career, or a
movement), but it seldom connotes being at the prime or height of glory (the French Revolution reached its apo
gee in the Reign of Terror) (a manly man whose deeply
burned, granular face reached an apogee of redness in
his beard—Hervey)

summon, summons, call, cite, convocate, convene, muster
mean to demand the presence of persons or, by extension,
things. Summon implies the exercise of authority or of
power; it usually suggests a mandate, an imperative order
or bidding, or urgency (the king summoned his privy
councilors to the palace) (summoned his secretary
(summon a person to appear in court) I summon your
Grace to his Majesty's parliament—Shak.) (a confiding,
playful little animal, whom one alternately trained to do
tricks and then summoned to jump snuffling upon one's
knee—Dickens) (she could summon tears and de-
lights an one summons servants—H. G. Wells) Summons,
sometimes interchangeable with summon, usually implies
the actual serving with a legal writ to appear in court.

Call is often used in place of summon, especially when less
formality is implied or the imperativeness of the bidding is
not stressed, or when actual shouting is suggested (call
men to arms) (call witnesses to court) (call a servant
(the president called congress together for an extra ses-
sion) (I can call spirits from the vasty deep—Shak.)

Often, however, there is a suggestion of an impulse of
God, of Nature, or of necessity (the young man felt that
he was called to the ministry) (America is called to great-
ness—A. E. Stevenson) (he felt called upon to speak
Cite (see also ADDUCE) may occasionally replace summon
or summons, especially in legal use (Andrew was cited
to appear and testify—W. B. Parker) (he hath cited me to
Rome, for heresy—Tennyson) Convocate implies a sum-
mons to assemble, especially for legislative or deliberative
purposes (the king convoked parliament) (the Italian
government convoked great congresses of physicists and
engineers—Darrow) (he convoked the chiefs of the three
armed services . . . and laid down the law—Shirer)

Convene is related to convocate somewhat as call is to
summon; it is weaker in its suggestions of the exercise
of authority and of imperativeness, but otherwise it is often
not distinguishable (convene the students in the school
auditorium) (the Senate was convened by the tribunes—
Froude) (the court-martial, perhaps fortunately, was
never convened—Powell) Muster implies the summoning
of an army or other body of troops or of a ship's company
(as for military action, inspection, parade, or exercise).
In extended use: a term in the assembling of a number of
things that form a collection or a group in order that they
may be exhibited, displayed, or utilized as a whole (a
daw that had a mind to be sparkish, tricked himself up with
all the gay feathers he could muster together—L'Estrange)
before the residents could muster a fighting force, the
marauders had filled their boats with plunder and were
gone—Laird) Muster is used in place of summon with
such objects as courage or strength, especially when the
context implies the previous dissipation of the quality
mentioned (at length you have mustered heart to visit the
old place—Dickens)

Ana *different, disparate, diverse, divergent: *distinct,
separate: individual, distinctive, peculiar (see character-
istic)

superadd annex, append, subjoin, *add

Ana *fasten, attach, affix

superannuated *aged, old, elderly

superb *splendid, resplendent, glorious, gorgeous,
sublime

Ana superlative, transcendent, surpassing, *supreme:
sumptuous, *luxurious, opulent: imposing, stately, ma-
jestic, magnificent, *grand

superfluous disdainful, overbearing, arrogant, haughty,
*proud, lordly, insolent

Ana vain, vainglorious (see under PRIDE): contemptu-
sious, scornful (see corresponding nouns under DESPISE
vb)

supererogatory, gratuitous, uncalled-for, wanton are
comparable when they mean given or done freely and
without compulsion or provocation or without warrant
or justification. Supererogatory basically implies a giving
above or beyond what is required or is laid down in the
laws or rules; the word then suggests a devotion or
loyalty that is not satisfied merely with the doing of
what is required and that finds expression in the perfor-
mance of additional labors, works, or services beyond
those expected or demanded (the supererogatory services
of representatives in Congress) In other usage the term
is definitely deprecative in that it implies not a giving
freely over and above what is required but a giving or
adding of what is not needed or wanted and is therefore
an embarrassment or encumbrance (for a mind like his,
education seemed supererogatory. Training would only
have destroyed his natural aptitudes—Huxley) (the vir-
ual unity of language, laws, general race-ideas would
seem to render protection of frontiers supererogatory
—Angell) Gratuitous may apply to a giving voluntarily
without expectation of recompense, reward, or compen-
sation (the gratuitous education provided by the public
schools of the United States) but it often stresses a giving
without provocation of something disagreeable, offensive,
troublesome, or painful (a gratuitous insult) (a gratuitous
. . . imposition of labor—Mann) Gratuitous often means
little more than uncalled-for, which suggests not only a
lack of provocation but a lack of need or justification
and therefore implies impertinence or absurdity, often
logical absurdity (the gratuitous assumption that the new
must surpass the old—Grandgent) (uncalled-for inter-
fERENCE) (uncalled-for advice) Wanton (see also LICEN-
tious) also implies want of provocation, but it stresses
capriciousness and the absence of a motive except reckless
sportiveness or arbitrariness or pure malice (a wanton
attack) (wanton destruction) (the wanton horrors of
her bloody play—Shelley) (believing the deed [the
burning of a haystack] to have been unprovoked and
wanton—Meredith) (tyranny consists in the wanton
and improper use of strength by the stronger—Bryce)

Ana *free, independent, autonomous: *excessive,
extraordinary, extreme, exorbitant: *superfluous, supernumerary,
extra, spare

superficial, shallow, cursory, uncritical can mean lacking in
depth, solidity, and comprehensiveness. Superficial applies
chiefly to persons, their minds, their emotions, their attai-
ments, or their utterances or writings, but it is also applica-
tible to things (as circumstances, factors, conditions, or
qualities). The term usually implies a concern with surface
aspects or obvious features or an avoidance of all but these
aspects or features (he had time for no more than a superfi-
cial examination of the report) (multiple superficial
wounds of the left and right thigh . . . Profound wounds of
right knee—Hemingway) (the tendency . . . of prose drama
superfluity

is to emphasize the ephemeral and superficial; if we want to get at the permanent and universal we tend to express ourselves in verse—T. S. Eliot

Often the term is definitely deprecative and adds implications of unpleasing qualities (as pretense, ostentation, slightness, lack of thoroughness, insignificance, or insincerity) (the lecture was very superfluous) (our political theory is hopelessly sophomoric and superfluous—Mencken) (its treatment of what is one of the important themes of our day seems generally too slick and superficial to be taken seriously—Merle Miller)

Shallow regularly implies a lack of depth (a shallow stream) (shallow breathing) and when applied to persons, their knowledge, their reasoning, or their emotions, is almost invariably derogatory and differs little from superfluous used derogatorily except in its freedom from implication of outward show or of apparent but not genuine significance (do you suppose this eternal shallow cynicism of yours has any real bearing on a nature like hers?—Shaw) (he continued to prop up this utterly muddled man, this confused and shallow "philosopher," as the intellectual mentor of the Nazi movement—Sherman)

People who are proprietors, sharers, shallow and callous egoists . . . are not capable of so noble and selfish a feeling as love—Salisbury

Cursory stresses a lack of thoroughness or of care for details rather than a concentration on the obvious; it often also suggests haste and casualness (even from a cursory reading of the book, I judge that it is a very fine piece of work) (knowing the nature of women, your cursory observations might prove to be more exacting . . . than my own—Terry Southern)

The coffeehouse must not be dismissed with a cursory mention—Macaulay (as they worked, they cursed us—not with a common cursory curse, but with long, carefully thought-out, comprehensive curses—Jerome)

Uncritical implies a superficiality or shallowness unbecoming to a critic or sound judge, whether of literature or art (I would not have you so uncritical in your reading of the book, Miss Pole) (she was at first uncritical, she believed everything—Audrey Barker)

I would not have you so uncritical as to blame the Church or its clergy for what happened—Quiller-Couch

superhuman

preternatural, miraculous, supranatural, supernatural

Ant inferior

superimpose *overlay, superpose, appliqué

superior adj *better, preferable

superfluous, surplus, supernumerary, extra, spare all

describe what is above or beyond what is needed or indispensable. Superfluous implies a superabundance or excess that requires elimination or pruning (many people . . . found themselves superfluous and, in their turn, were compelled to emigrate—Handlin) (artists . . . not tempted, as are those who work direct from nature, to transcribe superfluous detail because it happens to be before their eyes—Binyon) all sometimes the term either loses its implication of richness of supply or places no emphasis on that idea and comes to mean little more than nonessential or dispensable, if circumstances require its sacrifice (art, music, literature, and the like—in short . . . superfluous things—Sherman) (gradually the heat, the exertion had consumed all superfluous energy—Hervey) or unnecessary, useless, or needless (authority, like a good educator, ought to aim at making itself superfluous—Inge)

Surplus applies to what remains over when what is needed or required for all present purposes has been used (there will be no surplus wheat this year) (each year the surplus funds of the institution were invested) (the task of inducing those with surplus land to part with it voluntarily to the landless—Masani) (transporting its troops to Manchuria, giving it surplus airplanes—Richard Watts)

Supernumerary implies something added to a number that is normal, adequate, or prescribed; it need not necessarily suggest that there is no need or no use for what is added, though in reference to a physical condition it often implies a departure from the normal (extra ribs, as well as other supernumerary internal parts—Science News Letter) (a supernumerary member of a cast used for mob scenes) (offered the supernumerary position of inspector general—Roucek)

Extra is often used in place of supernumerary (buy a few extra Christmas presents in case someone has been forgotten) (was looking at Kitty as if she had suddenly sprouted an extra head—Rolf's) but it may also apply to an addition not in number but in amount (he was subjected to extra work as acting chairman of the House Committee—C. H. Lincoln) or in price (there is an extra charge for coffee) (Spare is often used in place of surplus but it carries a stronger suggestion of being held for future use, often a special use (a spare suit of clothes) (the spare room is the guest room) (a pouch for carrying tobacco, tinder, and spare arrow-poison—Huntingford) (carry a spare tire for an automobile) or of not having any demands on it for a particular use (he never has any spare cash) (bring along a little spare time, too, and some extra patience, to work these fast . . . streams of New England—Corey Ford) or of being easily spared (have you a spare cigarette on you?)

Ana *superoerogatory, gratuitous, uncalled-for, wanton: *profuse, lavish, prodigal, exuberant: *excessive, inordinate, extravagant, extreme

supernatural, preternatural, miraculous, superhuman

Preternatural

potent, psichical, powerful, forcible, forceful: Herculean, cyclopean, titanic, gigantic (see huge)

supernatural

*powerful, forcible, forceful: Herculean, cyclopean, titanic, gigantic (see huge)

superimpose *overlay, superpose, appliqué

superior adj *better, preferable

superlative adj *supreme, transcendent, surpassing, peerless, incomparable, preeminent

Ana *consummate, finished, accomplished: *splendid, glorious, sublime, superb

supernatural, superhuman, preternatural, miraculous

superhuman are overlapping rather than strictly synonymous terms whose meanings all involve a contrast with what is natural or, sometimes, normal or predictable. All, with the possible exception of the uncommon supernatural, are used hyperbolically to mean exceeding usual or likely human standards and then are generally equivalent to such terms as extraordinary, exceptional, or wonderful; thus, in an emergency a man may exhibit supernatural strength; one may show preternatural awareness of small sounds when alone at night; a scholar may decipher a manuscript with supernatural accuracy; a player may win against odds by a supernatural effort. Supernatural stresses deviation from the natural that is felt as above or beyond what is observable and capable of being experienced by ordinary means; in much of its use it suggests spirituality and implies a relation to God or to divine powers (a supernatural religion) (the gods in Homer do exert supernatural effects; for when Zeus nods, all Olympus shakes—Nass) (medieval theologians who did so much to establish and define the terminology of Christianity spoke of man's supernatural life, the life of the soul above the natural life of the body—M. W. Baldwin) (the belief in a supernatural power, in God, was natural to him who felt that he could plow and plant, but that only God made his work produce grain and fruit—

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
senses and in the range of their applicability. **Support** suggests the presence of a foundation or base and is applicable in diverse uses with the general meaning or suggestion of carrying from or as if from below, of maintaining or holding up the weight or pressure of, and of forestalling sinking or falling back, or sometimes, merely, of enduring the difficulties or rigors of without yielding and without undue distress (pillars supporting the balcony) (he supports the greater muscular tension involved with less evident fatigue—Brownell) (<support the Constitution>) (found the Roman winter ... too poignant for his anatomy to support without pain—Wylie) **Sustain** may center attention on the fact of constantly holding up or of maintaining undiminished (<sustain the weight of office>) (found it difficult to sustain an interest in their talk—Douglas) or it may more specifically imply an upholding by aiding or backing up (for nine years, Napoleon has been sustained by the people of France with a unanimity such as the United States never knew—Augecheek) or by supplying the physical or mental nutriments needed for strength (his intellectual interest is great enough to sustain the reader through the analytical labyrinths we must search together—Hunter Mead). **Prop** may imply a weakness, a tendency to fall, sink, or recede, or a need for strengthening or reinforcing on the part of the thing being treated (propping up the table with a packing case) (trying to prop up the decaying structures of last-century imperialism—G. L. Kirk) (<the plot, a slim tale of vengeance, is psychologically shallow and propped up by unpardonable coincidences—Anthony Boucher>) **Bolster** blends the suggestions of sustain and prop: it may suggest a supporting comparable to that afforded an invalid by pillows (bolster up the falling fortunes of the East India Company—Parrington) (bolster the diminishing lumber trade within the next 75 years—Amer. Guide Series: N. J.) (assign some extra instruments to bolster the choir's volume of sound—P. H. Lang). **Buttress** tends to suggest strengthening, reinforcing, or stabilizing, sometimes massive, at a stress point in the manner of an architectural buttress (combat business slumps and to buttress the economy so that danger of another depression will be reduced to a minimum—Newsweek) (a code of laws buttressed by divine sanctions which should be unshakable—Farrington) (<the popular success formula is buttressed by evidence from the careers of an impressive minority—R. B. Morris>). **Brace** may suggest supporting or strengthening so that the thing treated is made firm, unyielding, or rigid against pressure (brace the shelf with an angle iron) (then he braced himself against a giant oak on his front lawn and experienced a savage kind of exaltation as the elements raged around him—Cerf) (the shoring up of a tottering political system, which is precisely the problem that we face in trying to brace the western democracies—G. W. Peck). **Farrington) (<the popular success formula is buttressed by evidence from the careers of an impressive minority—R. B. Morris>) **Brace** may suggest supporting or strengthening so that the thing treated is made firm, unyielding, or rigid against pressure (brace the shelf with an angle iron) (then he braced himself against a giant oak on his front lawn and experienced a savage kind of exaltation as the elements raged around him—Cerf) (the shoring up of a tottering political system, which is precisely the problem that we face in trying to brace the western democracies—G. W. Peck). **Ant** analogous words | **Ana** analogous words | **Con** contrasted words | See also explanatory notes facing page

**suppositious**

1. **suppositious**, **suppositious** *supposed, reputed, putative, purported, conjectural, hypothetical*

---

**suppress**

1. **suppress** *crush, quell, extinguish, quench, quash*

---

**supremacy**, **ascendancy**

*denote the position of being first (as in rank, power, or influence). Supremacy implies superiority over all others (as in utility, in quality, in efficiency, in desirability, or in prestige) (in the Sahara, the automobile has begun to challenge the supremacy of the camel—Huxley) *the British concept of the supremacy of the home... was so deep and so great that not even the Crown could enter the home—Wayne Morse* (last summer American atomic supremacy gave place to something like atomic equality between "the two great colossi"—New Statesman) Ascendancy may or may not imply supremacy, but it always involves the idea of domination or of autocratic power (an idea has ascendancy over his imagination when it has the latter completely under its sway) *the whole system of oppression and cruelty by which dominant casts seek to retain their ascendancy—Russell* (a speaker can get an ascendancy over the House, if he has a strong personality and the...
ability to regain the thread of his speech—Woodrow Wyatt) (the rays of the gas lamps, feeble at first in their struggle with the dying day, had now at length gained ascendancy—Poe)

**Ana** preeminence, transcendence, superlativeness, peerlessness, incomparability (see corresponding adjectives at **supreme**): *power, authority, dominion, control, sway

**supreme** adj Supreme, superlative, transcendent, surpassing, preeminent, peerless, incomparable can all mean highest in a scale of values. All of these words may be interchangeable when used rhetorically or bombastically with the resulting loss in definiteness, but all are capable of discriminative use in which they carry distinctive implications and connotations. Supreme is applicable to what is not only the highest in rank, power, or quality but has no equals in that status, all others of the same class or kind being inferior in varying degrees (the **Supreme Court of the United States**; Shakespeare is generally regarded as the **supreme** dramatic poet) (I did not detect in his playing the fire and dash that I look for in the work of a **supreme** virtuoso—Sargeant) (he smiled again with an air of **supreme** contentment—"It's the first time I've ever done what I wanted to do"—Bromfield)

**Superlative** is applicable to whatever, by comparison with all other things of the same kind or with all other manifestations of the same quality, admits of no superior especially in commendatory qualities, for **superlative** may admit equals but it excludes superiors (the **superlative** genius of Goethe) (his **superlative** rudeness) (what makes him a great artist is a high fervor of spirit, which produces a **superlative**, instead of a comparative, clarity of vision—Galsworthy) (there is a smaller proportion than usual of superior books and a minuscule number of **superlative** ones—Kinkead) (enhanced with a **superlative** commentary . . . it is commendable in all respects—McCarten)

**Transcendent** and **surpassing** are applicable to whatever goes beyond everything else of its kind or in its quality; both can connote an exceeding even of the superlative, but **transcendent** suggests realization of the ideal, and **surpassing** suggests almost inconceivable attainment (the **transcendent** acting of Duse) (Cleopatra's reputation for **transcendent** beauty) (his **surpassing** skill in surgery) (the geometric pattern is of a **surpassing** intricacy—Rover) (his) native gifts are perhaps not of a **transcendent** kind; they have their roots in a quality of mind that ought to be as frequent as it is modest—Trilling

**Preeminent** is applicable to what goes beyond all others in achieving distinction or eminence; it implies both superlativeness and uniqueness within the limits indicated, but it seldom carries a suggestion of direct supremacy or transcendency (the **preeminent** general in that war; the **preeminent** film of the year) (the **preeminent** example of magnanimity) (although this is not the case in practice, the number of others—J. D. Adams) (another) **Peerless** and **incomparable** both imply the absence of equals but, commonly, **peerless** connotes the absence of superiors and **incomparable** connotes the impossibility of being equalized; while both normally refer to commendatory qualities, **incomparable** is also freely referable to qualities that merit condemnation (a **peerless** performance of Hamlet) (Philip Sidney, called the **peerless** one of his age—Quiller-Couch) (the **incomparable** twofold vision with which he has drawn this interior with its two youthful figures—Binyon) (nothing—simply nothing at all—transcends a cat's **incomparable** insincerity—Theodore Sturgeon) (peerless among women; perfect in beauty, perfect in courtliness—H. O. Taylor)

**Ana** *chief, foremost, leading, capital: predominant, *dominant, paramount, sovereign

**sure** 1 assured, *confident, sanguine, presumptuous

**Ana** relying, trusting, depending, counting, banking (see RELY): inerrant, unerring, *infallible: *safe, secure

2 **Sure**, **certain**, **positive**, **cocksure** mean having or showing no doubt. **Sure** and **certain** are often interchangeable. But **sure** frequently emphasizes the mere subjective state of assurance; **certain** often suggests more strongly a conviction that is based on definite grounds or on indubitable evidence ("I know my hour is come." "Not so, my lord.") ("Nay, I am sure it is"—Shak.) (be out of hope, of question, of doubt; be certain—Shak.) (in the library he too seemed surer of himself—though once they were on their way home he became almost remote, strangely watchful—Malamud) (they were sure and certain, forever wrong, but always confident. They had no hesitation, they confessed no ignorance or error—Wolfe)

**Positive** often suggests overconfidence or dogmatism, but it implies conviction or full confidence in the rightness or correctness of one's statement or conclusion (an assertive **positive** man . . . had his own notion of what a young man should be—Anderson) (so much more positive than most of his customers, and he impressed his own convictions on them so determinedly, that he had his own way—Scudder) (an easy and elegant skepticism was the attitude expected of an educated adult: anything might be discussed, but it was a trifle vulgar to reach very **positive** conclusions—Russell). **Cocksure** tends to carry a strong implication of presumption or overconfidence in positiveness (certitude is not the test of certainty. We have been *cocksure* of many things that were not so—Justice Holmes) (people . . . regarded as brash to the point of arrogance, *cocksure* to the verge of folly—MacLeish)

**Ana** decisive, *decided: self-assured, assured, self-confident (see corresponding nouns at CONFIDENCE): dogmatic, doctrinaire, oracular (see DICTATORIAL)

**Ant** unsure

**surplusage** 804

**Con** *needful, necessary, requisite, indispensable, essential*

**surplusage** surplus, superfluity, overplus, excess

**Ana & Ant** see those at **surplus n**

**surprise** vb 1 Surprise, waylay, ambush are comparable when they mean to attack unawares. Surprise is in military as well as in general use. As a technical term it implies strategy in the disposition and movement of troops and equipment and secrecy in the operations; it need not suggest that the attack has been successful (an army suddenly attacked within the lines which it had reckoned upon to ward off its enemy is in a military sense surprised—Maurice) <R.A.F. bombers surprised a large invasion training exercise and inflicted heavy losses—Shirer>

In more general use one may surprise a person or something he is concealing by coming on him when he is off guard (housemaids must vanish silently if surprised at their tasks—Sackville-West) <high instincts before which our mortal nature did tremble like a guilty thing surprised—Wordsworth>

Waylay commonly suggests a lying in wait on a road or highway. Sometimes it implies concealment by the roadside and an often evil intent to disturb or interfere with (by robbery or assault) he was waylaid on his way from the bank <I am waylaid by Beauty> <Oh, savage Beauty, suffer me to pass—Millay>

Sometimes it carries no suggestion of hostility or evil intent but implies intercepting a person in his progress and detaining him (unable any longer to bear not seeing her, he waylaid her in the street. She would not speak to him, but he insisted on speaking to her—Maugham> <riding in the park . . . Carola beheld her intended galloping furiously down the Row, and left her sister Clementina’s side to waylay him—Meredith>

Ambush tends to evoke the image of would-be attackers concealed in a thicket; it is often used in reference to guerrilla warfare (his body was brought after he had been ambushed by Indians on nearby Wolf Run—Amer. Guide Series: Pa.) but it can be extended to other situations in which one is caught as if by an ambush (see ambush n) <the same kind of feeling ambushed me a few weeks ago—Jan Struther> <the woman clasped her hands together; the butterfly sleeves fluttered as though ambushed—Harriet La Barre>

**Ana** *catch, capture; *take, seize, grasp, grab

2 Surprise, astonish, astound, amaze, flabbergast can mean to impress one forcibly because unexpected or startling or unusual. Surprise can mean to come upon another suddenly and with startling effect, or, more broadly, it can apply to an unexpected or unanticipated development that tends to arouse some degree of surprise, amazement, or wonder; both senses imply a lack of preparation or a reversal of what is anticipated (her friends planned to surprise her on her birthday with a gift) <apt not only to surprise but it can be extended to other situations in which one is caught as if by an ambush>

Astonish can imply a dazing or silencing <it is the part of men to fear and tremble, when the most mighty gods by tokens send such dreadful heralds to astonish us—Shak.> or it may mean to surprise so greatly as to seem incredible (while still an undergraduate . . . he had astonished the scientific world by his acceleration of the metamorphosis of the tadpole—Mackenzie) <the former corporal showed an astonishing grasp of military strategy and tactics—Shirer>

Sometimes it implies so great a difference between what one believes possible and what one discovers to be true that one can find no precedent for it; thus, a piece of news surprises one when it is unexpected; it astonishes when one finds it hard to believe; it astounds when one cannot account for it by any previous knowledge or experience; the successful laying of the Atlantic cable astounded every body, while its later breaks astonished no one, but after it was finally in operation, many said that no future human invention could surprise them <astounded his congregation by putting up for sale a mulatto slave girl—Amer. Guide Series: N.Y. City>

Flabbergast is a picturesque and often hyperbolical synonym of astonish or amaze; it suggests vividly the physical signs of a sudden dumbfounding (a delightful letter . . . that flabbergasted me as usual with your critical knowledge—Justice Holmes) <some off-the-cuff retort that will excite the reporters but flabbergast the President’s aides—Carter>

Surrander vb abandon, resign, relinquish, yield, leave, cede, waive

*abdicate, renounce; *forgo, forbear, sacrifice, eschew: submit, capitulate, succumb (see yield): *commit, consign, confide, entrust

Surrender n Surrander, submission, capitulation denote the act of yielding up one’s person, one’s forces, or one’s possessions to another person or power. Surrander usually implies a state of war and present domination by a victor or by an admittedly stronger power; in addition it often also implies the immediate cessation of fighting (the commander replied that no terms except an unconditional and immediate surrender could be accepted) Submission often implies surrender (as of an army, its supplies, and its fortifications), but it stresses the acknowledgment of the power or authority of another and often suggests loss of independence; it is used especially of those who rebel or of those whose weak condition leaves them at the mercy of a stronger power or subject to its threats. Unlike surrender, submission often implies not a previous state of war but a threat of disastrous warfare (submission, Dauphin! ‘tis a mere French word; we English warriors wont not what it means—Shak.) <declaring my submission to your arms—Browning>

**Capitalization** also implies surrender, but it suggests a conditional one on terms agreed upon between the parties or the commanders of the forces concerned (in Greece to offer earth and water was the sign of capitulation—Newman) <after Lee’s surrender at Appomattox Buckner . . . negotiated terms of capitulation . . . for the trans-Mississippi armies—Coulter>

Surreptitious underhand, underhanded, secret, covert, stealthy, furtive, clandestine

Ana sneaking, slinking, skulking, lurking (see lurk) hidden, concealed, screened (see hide)

Surrogate substitute, shift, makeshift, expedient, resource, resource, stopgap

**Surrond** et, enircle, circle, encompass, compass, hem, gird, girdle, ring can mean to close in or as if in a ring about something. Surround is a general term without specific connotations; it implies enclosure as if by a circle or a ring (the town was once surrounded by a wall) <a crowd surrounded the victim of the accident> <the ships

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
are surrounded by a veil of smoke> whole divisions were frequently overrun or surrounded and cut to pieces when a timely withdrawal would have saved them—Shirer> Often the term denotes not a literal enclosure but something which forms the circumstances, the environment, or the border of something >surrounded by luxury> pleasant white-haired widow surrounded by many potted plants—Cheever> those mental and moral barriers with which the average Englishman surrounds himself—Bagot> Environ also implies enclosure as if by a circle or a ring, but it often differs somewhat from surround in carrying a clearer implication of the permanent or continuing existence of what surrounds; thus, “a nation environed by foes” does not clearly imply as immediate danger as “an army surrounded by foes” does, but the former does suggest a persistent or ever-present danger in a way that the latter cannot. The difference is often slight but usually perceptible the passions and motives of the savage world which underlies as well as environ civilization—Howells> persuading the doubter that our human spirits are environed by other and vaster spiritual powers—Whitey> there are old buildings still—but they are usually overshadowed by an environing swarm of new stucco—H. L. Davis> Enircle is not quite the equal of surround though very like it in meaning and often interchangeable> H. L. Davis> is not quite the equal of surround, encircle, and hem in a girdle of mist will ring the slopes, while the heights rise clear in the upper air—W. C. Smith> a septuagenarian whose few sad last grey hairs, ringing an otherwise completely bald head—The Irish Digest> in a wreath encircles the brow of Apollo> the close which encircles the venerable cathedral—Macaulay> its frame residences—many of them aged—circle a small business district—Amer. Guide Series: Texas> Also, encircle and circle may denote to proceed in a circle about something, a meaning unknown to surround> circled the house in his search> as a hungry wolf might have encircled> . . . the firelit camp of a hunter—Anderson> at this speed, 186,000 miles per second, it would take us only about one seventh of a second to circle the earth—B. J. Bok> Encumbrass suggests something that closes in or shuts off a place or person; it often also suggests a motive (as protection or survival)> Herveyy> of to surround or encircle is expressed and the idea of a strong or insuperable barrier is implied >girded thee, though thou hast not known me—Isa 45:5> like to his island, girt in with the ocean—Shak> with a girl that he cannot wish to break—Cowper> shut up as in a crumbling tomb, girt round with blackness as a solid wall—Tennyson> Girdle, on the other hand, tends to imply an encirclement suggestive of a belt or sash or constituting a zone> great coastal plain which girdles the United States—Morgan> and seldom connotes a tight or confining quality in what encircles> the whole harbor looks like Coleridge’s Xanadu, the walls and towers girdled round with radiance—Atkinson> Ring carries a vivid picture of formation in a ring, but beyond this it has no particular implication. It is frequently chosen as a picturesque word in the senses of surround, encircle, and hem in a girdle of mist will ring the slopes, while the heights rise clear in the upper air—W. C. Smith> a septuagenarian whose few sad last grey hairs, ringing an otherwise completely bald head—The Irish Digest> An endure, *continue, persist, last: withstand, *resist, fight

**suspended**

2 stay, intermit, postpone, *defer

An *arrest, check, interrupt: stop, cease, discontinue: *delay, detain, retard

3 *hang, sling, dangle

An *poise, balance, steady, *stabilize

**suspended, pendent, pendulous**

can mean hanging from or remaining in place as if hanging from a support. Suspended may imply attachment from a point or points above so that a thing swings freely or is held steady in its proper place or position >suspended from his neck was a medalion—R. H. Brown> silver chains are a set of metal tubes suspended from a frame and struck by wooden mallets—McConathy et al> a suspended ceiling> it may suggest a being poised or a being upheld (as by buoyancy) they neither float nor fly, they are suspended—Jefferies> *water free from suspended silt> Penduent usually describes something which hangs downward from a support or from one point of attachment; it seldom carries any further implication and so is applicable both to what is motionless and to what swings or moves or is in danger of falling> a trailing creeper with curving leaf and twining plant
tendril, and *pendent bud and blossom—Hudson> the-smokehouse, its sooty rafters jeweled with fat hams like eardrops and *pendent strips of cured middling meat—Cobb> *Pendulous adds to *pendent the specific implication of swaying or swinging, sometimes carrying a suggestion of actual floating in space (a *pendulous nest) (breasts . . . grown flabby and *pendulous with many children—Buck> *steep cliffs . . . hung with *pendulous vines, swinging blossoms in the south—Melville> so blend the turrets and shadows there that all seems *pendulous in air—Poe>

**suspicion**

1 mistrust, *uncertainty, doubt, dubiety, dubiosity, skepticism

Ana* misgiving, foreboding, presentiment, *apprehension: distrust, mistrust (see under DISTRUST vb)
2 *touch, suggestion, soupçon, tincture, tinge, shade, smack, spice, dash, vein, strain, streak

**sustain**

1 *support, prop, bolster, buttress, brace

Ana* continue, persist, endure, abide: uphold, back (see SUPPORT): prove, demonstrate

**subvert**

2 *experience, undergo, suffer

Ana* receive, accept, take: endure, *bear, stand, brook: *meet, encounter, face, confront

**suspending**

1 nourishment, nutriment, *food, aliment, sustenance

2 *experience, undergo, suffer

Ana* absorb, imbibe, assimilate

**swallow**

*eat, ingest, devour, consume

Ana* receive, accept, take: believe, credit (see corresponding nouns at BELIEF): *absorb, imbibe, assimilate

**swallow**

vb *eat, ingest, devour, consume

Ana* receive, accept, take: believe, credit (see corresponding nouns at BELIEF): *absorb, imbibe, assimilate

**swarm**

vb *team, abound, overflow

Ana* beat, pound, pummel, baste, belabour

**sweat**

vb *strike, hit, smite, punch, slug, slog, clout, slap, cuff, box

Ana* beat, pound, pummel, baste, belabour

**sweat**

vb *swing, oscillate, fluctuate, pendulate, vibrate, waver, undulate

Ana* shake, rock, agitate, convulse

2 influence, impress, strike, touch, *affect

Ana control, direct, manage, *conduct: rule, *govern: bias, *incline, dispose, predispose

**sway**

vb *dominion, control, command, *power, authority

Ana* supremacy, ascendency: *range, reach, scope, sweep: spread, stretch, amplitude, *expanseness

**swearing**

vb blasphemy, profanity, cursing

Ana* range, gamut, reach, radius, compass, scope, orbit, horizon, ken, purview

**sweep**

vb *expansiveness, amplitude, spread

Ana* expansiveness, amplitude, spread

**weeping**

vb *indiscriminate, wholesale

Ana promiscuous, heterogeneous, motley, *miscellaneous

**sweet**

engaging, winning, winsome, dulcet are comparable when they are applied to persons or things with respect to the sensations they evoke or the impressions they produce and mean distinctly pleasing or charming because devoid of all that irritates, annoys, or embitters. Sweet when extended beyond its primary application to one of the basic taste sensations, whether to things that produce other sensory impressions or to persons or things that induce emotional or intellectual response, is ordinarily a term of mild general approbation for what pleases, attracts, or charms without stirring deeply or arousing a profound response (what a sweet little cottage) (twilight, sweet with the smell of lilac and freshly turned earth—Corey Ford> *flower motifs and emblems, all printed in sweet colors—Rosner> has been very sweet. He wants to help, but of course there’s nothing he can do—Auchincloss> but in this as its primary application sweet may also imply an excess of what in more moderate quantity is pleasing and then comes close to surfeiting or cloying (compare SATIATE) (the flaw in her book is the sweet side, the Pollyanna note, that fatal emphasis on the happy ending—Rosemary Benét> Engaging and winning come very close to one another, both implying a power to attract favorable attention and strongly suggesting a power to please or delight; engaging, however, more often stresses the power of a thing to attract such attention, whereas winning usually emphasizes the power of a person to please or delight (an engaging story) (an engaging manner) (she has winning ways) (a winning smile) (affectionate, cheerful, happy, his sweet and engaging personality drew all men’s love—H. O. Taylor> simple as a child, with his gentle, winning voice and grave smile—Brooks> Winsome is chiefly applied to persons or to their attractions; the term is somewhat more inclusive in meaning than the others, for it usually implies an engaging quality, a cheerful disposition, pleasing though not striking looks, and often a childlike quality (tears came to his eyes as he remembered her childlike look, and winsome fanatic ways—Wildie) Dulcet suggests an appealing and soothing quality whether to the senses (as of some, especially musical, sounds) or to the feelings or emotions (the voice was . . . dulcet as the hum of heavy honeybees amid orange blossoms—Wouk> could not . . . expect such dulcet weather to last—Sackville-West> (the classic, dulcet, but difficult art of architecture—R. W. Kennedy>

Ana* pleasant, pleasing, agreeable, gratifying, grateful, welcome: delicious, delectable, luscious, *delightful: lovely, fair, *beautiful: ineffable (see UNUTTERABLE)

Ant sour: bitter

**swell**

vb *expand, amplify, distend, inflate, dilate

Ana* expand, amplify, distend, inflate, dilate

2 *contract, condense, compress, constrict

Ana* shrink —Con *contract, condense, compress, constrict

**swerve**

, veer, deviate, depart, digress, diverge mean to turn aside from a straight line or a defined course. Swerve may refer to a turning aside, usually somewhat abruptly, by a person or material thing (at that point the road swerved to the left) (the great roots of a tree swerved upward out of the design—Binyon) or it may suggest a mental, moral, or spiritual turning aside (had never swerved from what she conceived to be her duty—A. J. Kennedy> (if I be false, or swerve a hair from truth—Kennedy) <if I be false, or swerve a hair from truth—Kennedy> <our affections and passions put frequently a bias . . . so strong on our judgments as to make them swerve from the direction of right reason—Bolingbroke>

Veer is frequently used in reference to a change in the course of a wind or of a ship; often it suggests either a frequent turning this way or that or a series of turnings in the same direction, especially of the wind in a clockwise direction (the wind veered to the east) (the ship) plunged and tacked and veered—Cleridger> (the wind had veered round, and the Aurora was now able to lay up clear of the island of Martimento—Marryat>)

In extended use the term commonly implies a change or series of changes of direction or course under an external influence comparable to the wind (his thought, veering and tacking as the winds blew—Parrington>) or a turning aside for a tactical reason (as to avoid an undue influence) (the plan has worked. . . .

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
swift 807  

the state . . . has not only veered away from bankruptcy; it has also improved its services—Armbister) Deviate implies a turning aside from a customary, chosen, allotted, or prescribed course (finding it no easy matter to make my way without constantly deviating to this side or that from the course I wished to keep—Hudson) It is commonly used in reference to persons, or their minds, their morals, and their actions, with the suggestion of a swerving from a norm or standard or from a right or lawful procedure or course (when the aesthetic sense deviates from its proper ends to burden itself with moral intentions . . . it ceases to realize morality—Ellis) (had told him the story many times and . . . never deviated in the telling—Costain) (from a fundamental sincerity he could not deviate—T. S. Eliot) The next three words of this group usually imply a turning aside from a literal or figurative way (as a path, course, track, or standard) which still continues. Depart stresses the turning away from and leaving an old path, a customary course, or an accepted type or standard; it may further imply a forsaking of the antiquated, conventional, or traditional (books) which depart widely from the usual type—Grandgenet) or a deviation from what is right, true, or normal (forced by circumstance to depart from the principles of his own logic—W. P. Webb) Digress commonly implies a departure from the subject of one's discourse that may be voluntary and made with the intent to return (let me digress for a few minutes to indicate the possible results of this condition) or involuntary and the result of an inability to think coherently or to stick to the point to be developed (I shall not pursue these points further for fear of digressing too far from my main theme—Spilsbury) Diverge is sometimes used in the sense of depart (let them [professors] diverge in the slightest from what is the current official doctrine, and they are turned out of their chairs—Mencken) but more typically it suggests a separation of a main, old, or original course or path into two or more courses or paths that lead away from each other (they proceeded along the road together till . . . their paths diverged—Hardy) (two roads diverging like the branches of a Y—Bellloc) Ana *turn, divert, deflect, shear, avert: *curve, bend swift *fast, rapid, fleet, quick, speedy, hasty, expeditious Ana *easy, effortless, smooth, facile: headlong, *precipitate, sudden swimming adj *giddy, dizzy, vertiginous, dazzled Ana reeling, whirling, tottering (see reel): swaying, wavering, fluctuating (see swing) swindle vb *cheat, overreach, cozen, defraud Ana *dupe, gull, bamboozle, hoodwink, trick: *steal, pilfer, purloin, filch swing vb 1 Swing, wave, flourish, brandish, shake, thrash are comparable when they mean to wield or to handle something so that it moves alternately backward and forward or upward and downward or around and around. Swing often implies regular oscillations (impassable, swinging hands with their escorts . . . they dawdled up the hill toward the college— Faulkner) (he spun the type-writer around, and tested the action of the bell several times) swinging the carriage back and forth—Bliven b. 1916) It may also imply an essentially continuous erratic movement (swung a pail over his head) Wave distinctly implies undulating or fluttering motions without rhythmic regularity (wave a flag) (wave a handkerchief) and usually additionally implies, according to the nature of the thing waved and the way in which it is waved, a specific intent or purpose (as of signaling, ordering, displaying an emotion, or greeting) (then grave Clarissa graceful waved her fan; silence ensued—Pope) (waved my arm to warn them off—Tennyson) (you cannot wave a wand over the country and say ‘Let there be Socialism’: at least nothing will happen if you do—Shaw) Flourish implies ostentation, triumph, or bravado in waving something held in the hand (as a weapon, a stick, or a rod) (with their swords flourished as if to fight—Wordsworth) (he walked with a gay spring . . . flourishing his cane—Bennett) (Painless flourished the forceps, planted himself square in front of his patient, heaved a moment, and triumphantly held up in full view an undoubted tooth—S. E. White) Brandish stresses menace or threat as flourish seldom does; it otherwise suggests some what similar motions (I shall brandish my sword before them—Ezek 32:10) (he brandishes his pliant length of whip, resounding oft—Cowper) (the . . . speech was a curious mélange of olive branches and brandished fists—Frey) Shake (see also shake 2) can come very close to wave or flourish (with his mighty wind shall he shake his hand over the river—Isa 11:15) (shaking her fingers playfully in the direction of the vehicle—Thackeray) but like brandish it commonly suggests a menacing or threatening or warning intent (people passing by . . . shake their fists and curse—Housman) (‘Take heed, Oliver! take heed!’ said the old man, shaking his right hand before him in a warning manner—Dickens) Thrash (see also beat 1) implies a noisy vigorous swinging suggestive of the motions of a flail in threshing grain (thrashing his arms to keep warm) (thrashed his legs in swarming) (on a blanket on the nursery floor and watched him proudly while he thrashed his sturdy arms and legs—Davenport) Ana parade, flaut, display, exhibit (see show vb) 2 Swing, sway, oscillate, vibrate, fluctuate, pendulate, waver, undulate mean to move to and fro, back and forth, or up and down. Swing (see also swing 1) implies movement in an arc of something attached only at one side or at one end (as by being suspended, hinged, or pivoted); apart from the context the term conveys no definite implication of whether the movement is induced or is automatic, whether it is occasional or constant, or whether it is rhythmical and regular or intermittent and irregular (the red amaryllises . . . swung in heavy clusters—Stark Young) (the door swung open) (suddenly Gil's head swung sharply to the right—Mason) (a pendulum sways with great regularity) Sway implies a slow swinging motion, especially in a flexible or unsteady object that yields to lack of support or to pressure from one side or another (to hear the swaying of the branches of the giant pine—Binyon) (she stood up; she seemed to sway a little as she stood—Mary Austin) (caravans of camels, swaying with their padded feet across the desert—L. P. Smith) Oscillate implies a swinging motion of or as if of something suspended so that it moves through a regular arc; the term usually implies a movement from one side or place or from one condition, attitude, or position to another, with more or less regularity (hurricanes frequently move along an irregular path that oscillates about the relatively straight or smooth curved path that the storm was supposed to follow . . . before the 1940's—R. C. Gentry & R. H. Simpson) (Bohemianism has continuously oscillated between the poles of escape and revolt—Levin) (American attitudes oscillate between such poles as withdrawal and intervention, optimism and pessimism, idealism and cynicism—Bundy) Vibrate is sometimes used in the sense of oscillate (the double complex pendulum, when it vibrates in one plane—Encyc. Brit.) but it more typically implies rapid periodic oscillations usually over an arc of small amplitude and may suggest the rapid pulsations of the string of a musical instrument (as the piano or violin) when touched by a hammer or bow or
the rapid beating of some wings (as of a hawkmoth or hummingbird) you know that if you strike a note of music, all the octave notes will vibrate—Manning (ultrasonic waves vibrate so fast they can’t be heard by the human ear—Boyd Wright). In a more extended sense vibrate may imply a trembling, a quavering, or a throbbing suggestive of the movements of musical strings when an instrument is being played (on summer evenings when the air vibrated with the song of insects—Anderson) (nerve and bone of that poor man’s body vibrated to those words—Stowe). Fluctuate occasionally implies a tossing up and down restlessly like the waves of the sea or like something floating on such waves, but is chiefly used in an extended sense implying constant irregular alternations suggestive of the movement of waves (stock prices that fluctuate from day to day) (the old unquiet breast, which neither death nor rest, nor ever feels the fiery glow that whirs the spirit from itself away, but fluctuates to and fro—Arnold) (causes the respiration, pulse, and blood pressure of the test subject to fluctuate widely from the normal—Armstrong) (there are about seven hundred and fifty of them . . . but the number fluctuates rapidly with the demands of the situation—Hahn). Pendulate, a somewhat uncommon word, is a near synonym of oscillate in implying a swinging between two extremes, but it often comes close to fluctuate in its strong suggestion of constant change (the ill-starred scoundrel pendulates between Heaven and Earth—Carlyle) (he pendulated between extremes, between adding to his poetic masterpieces and to his notorious “Don Juan list”—Cournos) (saw the Colonel pendulating between Perkins’ room and Pinchot’s room. He would toddle out of one room . . . and enter another—White). Waver (see also hesitate) carries a stronger implication of unsteadiness or of uncertainty in swinging than does sway or oscillate (banners and pennons wavering with the wind—Bermers) (he needed assurance, his plump hands wavered uncertainly away from his body—Mailer) (a great misery spoke from the hold. It wavered eerily about the fringes of her consciousness (Hervey). Undulate is more often used than fluctuate when a wavelike motion is implied; especially in its extended use it seldom suggests violent changes, but rather the continuous rolling or rippling that is associated with the steady flow of waves (the ripe corn under the undulating waves—Shelley) (the . . . flame . . . made the jades undulate like green pools—Lowell) (the great serpent drew back like a flash, and turning, undulated slowly away—Beebe). Ana *turn, spin, whirl, wheel, revolve, rotate, gyrate: *shake, tremble, quiver, quav e, quake 3 wield, manipulate, *handle, ply Ana control, manage, direct, *conduct swipe vb *steal, pilfer, filch, purloin, lift, pinch, snatch, cop swirl vb circle, spin, twirl, whirl, wheel, eddy, *turn, revolve, rotate, gyrate, pirouette sybaritic *sensuous, sensual, luxurious, voluptuous, epicurean sycophant * parasite, favorite, toady, licksplitte, bootlicker, hanger-on, leech, sponge, spenger Ana blandisher, cajoler, wheedler (see corresponding verbs at coax): fawner, truckler (see corresponding verbs at fawn) syllabus * compendium, digest, pandect, survey, sketch, précis, aperçu Ana conspectus, synopsis, epitome, *abridgment, brief, abstract symbol 1 Symbol, emblem, attribute, type can all denote a perceptible thing that stands for or suggests something invisible or intangible. Symbol and emblem are often used interchangeably but they can be so used as to convey clearly distinguishable notions. Symbol is applicable to whatever serves as an outward sign of something spiritual or immaterial; thus, the cross is to Christians the symbol of salvation because of its connection with the Crucifixion; the circle, in medieval thought, was the symbol of eternity because it, like eternity, has neither beginning nor end. This close and natural connection between the symbol and what it makes visible or partly intelligible is not always so strongly implied; it may be a traditional, conventional, or even an arbitrary association of one thing with another that is suggested (a king’s crown is the symbol of his sovereignty and his scepter the symbol of his authority) (upstairs suites and private dining rooms whose symbol became a hot bird and a cold bottle served by a graying waiter in sideboards—Lucius Beebe) (a flock of sheep is not the symbol of a free people—New Republic). Emblem, as distinguished from symbol, implies representation of an abstraction or use in representation; it is applicable chiefly to a pictorial device or a representation of an object or a combination of objects (as on a shield, a banner, or a flag) intended to serve as an arbitrary or chosen symbol of the character or history of one (as a family, a nation, a royal line, or an office) that has adopted it; thus, the spread eagle, the usual emblem of the United States, is found in its coat of arms and on some of its coins and postage stamps; the emblem of Turkey, a crescent and a star, appears on its flag (the emblem of the school is a dolphin, token of the marine source of the founder’s wealth—Thorogood) (remembering this flower . . . as the feminine emblem of the big college football games—Edmund Wilson). Emblem is also applied to what is technically known in painting and sculpture as an attribute, some object that is conventionally associated with the representation either of a character (as a Greek divinity or a Christian saint) or of a personified abstraction, and is the means by which the character or abstraction is identified; thus, in fine art the balance is the emblem, or attribute, of Justice; the turning wheel, of Fortune; the club, of Hercules; and the spiked wheel, of St. Catherine of Alexandria (Saint Helena is always painted with a cross beside her, or holding one, as a reminder that it was she who found the original cross. In this instance the cross is an attribute, not a symbol—G. W. Benson). Type, especially in theological use, is applied to a person or thing that prefigures or foreshadows someone or something to come and that stands therefore as his or its type until the reality appears. In theology, biblical interpretation, and religious poetry, it usually also implies a divine dispensation whereby the spiritual or immaterial reality is prefigured by a living person, event, experience, or the like; thus, in medieval religious poetry Jerusalem is the type of heaven (the heavenly Jerusalem); in allegorical interpretation of Scriptures, the paschal lamb is the type of Christ, the victim on the Cross (spiritual wisdom . . . is unchanging and eternal; it is communicated to us in types and shadows dim—in symbols—till we grow up into the power of understanding it—Inge) (concludes that the whole of the Old Testament is one great prophecy, one great type of what was to come—Maas). Ana * sign, mark, token, badge: device, motif, design, *figure, pattern 2 *character, sign, mark Ana * device, contrivance: diagram, delineation, outline, sketch (see under sketch vb) symbolism * allegory symmetry, proportion, balance, harmony are comparable chiefly as used in the arts of design and decoration to
sympathetic

mean a quality which gives aesthetic pleasure and which depends upon the proper relating of details and parts to each other (as in magnitude, or arrangement) and to the consequent effect produced by the whole. Symmetry implies a median line or an axis on either side of which the details correspond (as in size, form, and placing). Often it implies such mathematical precision especially in arrangement of elements or parts as is observable in the corresponding halves of a perfect crystal, in a geometrically regular star, or in the conventionalized leaf or flower of decorative design (symmetry is the keynote of most formal gardens) (the symmetry of a Greek temple) (abandoned the decent gown for a short coat or jacket and displayed the symmetry of their legs—Trevelyan) but, in its stress of mechanical precision, symmetry may sometimes suggest an arid sterile quality, lacking in true artistic expression (symmetry is a condition of perfect but inert balance; it will be entirely useless in a composition—Taubes) Proportion implies a grace or beauty, independent of a thing's actual magnitude, duration, or intensity, that stems from the measured fitness of every one of its details and the consequent perfection of the whole (we care for size, but inartistically; we care nothing for proportion, which is what makes size count—Brownell) (an impressive structure of Greek design, notable for its beauty of proportion and simplicity of detail—Amer. Guide Series: Minn.) Balance is sometimes employed as an equivalent of symmetry, but it can be used distinctively to imply equality of values rather than repetition of details or parts and a massing of different things (as light and shade, sharply contrasted colors, or figures and background) so that each one tends to offset the other or to reduce the other's emphasis without loss of significance on either side. Balance implies as its aesthetic object an inducing of a pleasant satisfaction in the thing's quiet beauty or of a delight in the unified yet varied effect of the whole (it is a similar principle of unsymmetrical balance which the Taoist artists sought in design. Space therefore, empty space, becomes a positive factor, no longer something not filled and left over, but something exerting an attractive power to the eye, and balancing the attractive power of forms and masses—Binyon) (every good statue is marked by a certain air of repose; every fine picture exists in a state of stable equilibrium brought about by the balance of its masses—Krutch) (balance is a subtler quality than symmetry. Symmetry means repetition . . . Balance, which is a free, almost irregular extension of the concept of symmetry, implies, unlike symmetry, the element of risk—Charles Johnson) Harmony, when used specifically in reference to the arts of design and decoration, retains as its leading principle as its aim the same idea as is involved in its general sense (see harmony). Often it implies a certain interrelation of details and their fusion into an agreeable whole. However it often denotes specifically the aesthetic impression produced by something which manifests symmetry, proportion, or balance, or these qualities in combination (a coloring harmony obtained by the aid of a long experience in the effects of light on translucent surfaces—Henry Adams) (we hear harmonious tones; but . . . the pleasure they give us . . . [is] the pleasure of their relational form which makes us attribute to them and their physical combination a quality which we call harmony—Alexander) (choosing with care and with a good eye for harmony the shoes, socks, necktie he would wear—Wolfe)

sympathetic

sympathy

correspondent (see corresponding verbs at agree) 2 *tender, compassionate, warm, warmhearted, responsive

Ana kindly, *kind, benign, benignant: understanding, appreciating, comprehending (see understand)

Ant unsympathetic

sympathy 1 *attraction, affinity

Ana reciprocity, correspondence (see corresponding adjectives at reciprocal): *harmony, consonance, accord, concord

Ant antipathy

2 Sympathy, pity, compassion, commiseration, condolence, ruth, empathy are comparable though often not interchangeable when they mean a feeling for the suffering or distress of another. Sympathy is the most general term, ranging in meaning from friendly interest or agreement in taste or opinion to emotional identification, often accompanied by deep tenderness (sympathy with my desire to increase my . . . knowledge—Fairchild) (sympathies were . . . with the Roman Stoics—Ellis) (satire had its roots not in hatred but in sympathy—Perry) Pity has the strongest emotional connotation; the emotion may be one of tenderness, love, or respect induced by the magnitude of another's suffering or of fellowship with the sufferer (pity is the feeling which arrests the mind in the presence of whatsoever is grave and constant in human sufferings and unites it with the human sufferer—Joyce) (pity that made you cry . . . not for this person or that person who is suffering, but . . . for the very nature of things. . . . out of pity comes the balm which heals—Saroyan) Pity sometimes may suggest a tinge of contempt for one who is inferior whether because of suffering or from inherent weakness; there is also a frequent suggestion that the effect if not the purpose of pity is to keep the object in a weak or inferior state (pity for the man who could think of nothing better—T. S. Eliot) (the parents of a crippled child should give him understanding and challenge rather than pity) Compassion, which originally meant fellowship in suffering between equals, has come to denote imaginative or emotional sharing of the distress or misfortune of another or others who are considered or treated as equals; it implies tenderness and understanding as well as an urgent desire to aid and spare (one of his neighbor women cooked a chicken and brought it in to him out of pure compassion—Cather) (with understanding, with compassion (so different from pity) she shows the sordid impact . . . on the lives of the natives—Campion) (when Jesus came in his gentleness with his divine gift, for vicarious feeling, but the feeling need not be one of sorrow; thus empathy. . . . out of pure compassion—Albright) Commiseration and condolence agree in placing the emphasis on expression of a feeling for another's affliction, rather than on the feeling itself. Commiseration denotes a spontaneous and vocal expression, often one made in public or by a crowd (there was a murmur of commiseration as Charles Darnay crossed the room . . . the soft and compassionate voices of women—Dickens) Condolence denotes a formal expression of sympathy especially for the loss of a relative through death and refers strictly to an observance of etiquette without an implication as to the underlying feeling (a condolence call) (they received many condolences) Ruth denotes softening of a stern or indifferent disposition (look homeward, Angel, now, and melt with ruth—Milton)

Empathy, of all the terms here discussed, has the least emotional content; it describes a gift, often a cultivated gift, for vicarious feeling, but the feeling need not be one of sorrow; thus empathy is often used as a synonym for...
tact, equipment, apparatus, machinery, paraphernalia, silent, uncommunicative, reserved, reticent, list, catalog, schedule, register, roll, roster, table

system 1 System, scheme, network, complex, organism, economy can mean an organized integrated whole made up of diverse but interrelated and interdependent parts. System usually implies that the component units of an aggregate exist and operate in unison or concord according to a coherent plan for smooth functioning (the digestive system) {amid a system where the classic principles of capitalism still work successfully—Laski} {comprehend all experience in a closed system—Inge} {it does not form an independent system, like the universe: it exists as an element in human culture—Mumford} Scheme may replace system but tends to stress an overall design for the interrelation of components, often a design carefully calculated or planned detail (the cheerful, sanguine, courageous scheme of life, which was in part natural to her and in part slowly built up—Ellis) {four complex system, presenting the rare and difficult scheme of one general government, whose action extended over the whole—John Marshall} {the Newtonian scheme of the universe does not banish God from the universe—Times Lit. Sup.} but sometimes scheme may carry a suggestion of irony or depreciation that is absent from system (see also PLAN).

Network suggests a system with interconnection or intercrossing at salient points sometimes involved but susceptible to analysis or control (a network of abandoned narrow-gage logging roads penetrates the wooded areas—Amer. Guide Series: Mich.) {even the lowest savages live in a social world characterized by a complex network of traditionally conserved habits, usages, and attitudes—Sapir} Complex stresses an elaborate interweaving, interconnection and interrelationship of components difficult to trace {for these ancestors of ours, in one half of their thoughts and acts, were still guided by a complex of intellectual, ethical and social assumptions of which only medieval scholars can today comprehend the true purport—Trevelyan} {this complex of conditions which taxes the terms upon which human beings associate and live together is summed up in the word culture—Dewey} {modern science, with infinite effort, has discovered and announced that man is a bewildering complex of energies—Henry Adams} Organism basically applies to systems having life, but it is sometimes extended to systems felt as analogous to biological systems (as in capacity for growth and development) {not because of an interest in the individual himself as a matured and single organism of ideas but in his assumed typicality for the community as a whole—Sapir} {the Church grew, like any other organism, by responding to its environment—Inge} Economy implies a system concerned with needs and their regulation and fulfillment by individual, species, household, business, or government {the plantation economy, with its base in slavery, was not conducive to the growth of industrial enterprise—Amer. Guide Series: N. C.} {the principle may operate successfully in the close economy of a good family, or even within a small religious community—Hobson}

Ant chaos 2 *method, mode, manner, way, fashion

Ana *plan, project, scheme, design: procedure, *process, proceeding

systematic *orderly, methodical, regular

Ana systematized, organized, ordered, arranged (see ORDER vb): *logical, analytical

systematize organize, methodize, *order, arrange, marshal

Ana *adjust, regulate, fix

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
barring or upsetting situations (mental poise . . . a balance of mind and temper that neither challenged nor avoided notice, nor admitted question of superiority or inferiority—Henry Adams) (would look into his eyes, the reserve, the statuesque poise all going to pieces—Styron) Savoir faire may stress worldly or social experience and a knowledge of what is the proper thing to say or do or of how to act under all circumstances (the inexperience and want of savoir faire in high matters of diplomacy of the Emperor and his ministers—Greville) But it as often suggests a seemingly intuitive ability to act appropriately and with the utmost ease and tact rather than one based on breadth of experience (the alcoholic usually has memories of occasions when liquor seemed to sharpen his wits, polish his manners and infuse him with savoir faire—Seliger)  

*Ana diplomatism or diplomacy, politeness or policy, savoir, urbangity (see corresponding adjectives at SUAVE): *courtesy, amenity, gallantry

taint vb *contaminate, pollute, defile  

*Ana *debase, deprave, corrupt, vitiate: spoil, decompose, rot, putrefy, *decay: imbue, inoculate, *infuse  

take 1 *Take, seize, grasp, clutch, snatch, grab are comparable when they mean to get hold of by or as if by reaching out through or by hand. Take is not only the most general but also the only colorless term in this group. In ordinary use, especially with reference to physical things, it may imply nothing more than a movement of the hand to get hold of something (take the lamp from the table) (take meat from a platter) or it may imply, with reference not only to physical but to immaterial or intangible things, numerous and often difficult operations by means of which one gets possession of or control over something (take a city) Between these two extremes take may imply, in innumerable idiomatic applications, a very wide range of methods of getting hold of something or possessing it in some way; thus, one takes a prize by winning it in a competition; one takes a cottage by renting it; one takes the temperature of a room by observing the thermometer (take a bath) (take the air) (take a rest)  

take vb 2 *follow, pursue, chase, trail, tail  

Seize usually suggests a sudden and forcible getting or taking or getting hold of, and it therefore is interchangeable with take only when emphasis is placed upon these qualities (the hungry children seized the food that was offered them) (the policeman seized the thief in the act of escaping) (the fort was seized before its defenders had time to repel the assault) (seizing between his teeth the cartilaginous of the trainer's ear—Shaw) In extended use, especially when the thing seized or the thing seizing is something immaterial or intangible, the term usually suggests a catching of something fleeting or elusive (seize an opportunity) (seize the attention of the crowd) or the capture of something by force and, usually, surprise (seize the throne) (the Breton seized more than he could hold; the Norman took less than he would have liked—Henry Adams) or the ready understanding of something difficult to apprehend or analyze (the character of Louis XIII is difficult to seize, for it comprised qualities hardly ever combined in one man—Bellocco) Grasp basically implies a laying hold of with the hands, teeth, or claws so as to hold firmly (thy hand is made to grasp a palmer's staff—Shak.) In extended use the term implies a comparable ability to comprehend fully or adequately something difficult to comprehend either inherently or by reason of circumstances (understood the words I heard, but couldn't seem to grasp their meaning—Kenneth Roberts) (the evil of the corruption and falsification of law, religion, education, and public opinion is so enormous that the minds of ordinary people are unable to grasp it—Shaw) Clutch in its basic use implies more haste, more avidity, more urgency, and often less success in getting hold of the thing desired than grasp (I . . . clutched desperately at the twigs as I fell—Hudson) Only when success is clearly indicated is a tight hold or a clenching suggested (I gave him all the money in my possession . . . Gunga Dass clutched the coins, and hid them at once in his ragged loincloth—Kipling) (he clutched Father Joseph's hand with a grip surprisingly strong—Cather) In extended use the term usually suggests a mental or emotional grasping at or seizing that is comparable to a physical clutching (they clutched childishly at straws of optimism—Wouk) (can you never like things without clutching them as if you wanted to pull the heart out of them?—D. H. Lawrence) Snatch carries the strongest implication of a sudden, hurried movement, but it seldom carries as strong a suggestion of the use of force as does its closest synonym, seize; rather, it often implies stealth (snatch a purse) (snatch a kiss) or promptness in rescuing (snatch a child from the flames) (snatched from the jaws of death) or rudeness or roughness (snatched the book from her hand) Consequently in extended use one snatches only what one can get by chance, surreptitiously, or by prompt action (snatch a free moment for writing a letter) (youngsters snatching at fun while they chased the dream of a happy marriage—Wouk) Grab commonly implies more rudeness or roughness than snatch, and it also usually implies as much force or violence as seize; distinctively it often suggests vulgarity and indifference to the rights of others or to the standards of the community, or a more or less open unscrupulousness in getting what one wants for oneself (grab all the meat from the platter) (grabbed his hat and ran) (grab power) (Hitler had been helpless to prevent the Russians from grabbing the Baltic States—Shirer)  

*Ana *have, hold, own, possess: *catch, capture: confiscate, appropriate, preempt (see ARROGATE)

talk n *speech, address, oration, harangue, lecture, sermon, homily  

talkative, loquacious, garrulous, voluble, glib are comparable chiefly as applied to persons and their moods and as meaning given to talk or talking. The same distinctions in implications and connotations are also seen in their corresponding nouns talkativeness, loquacity or loquaciousness, garrulity or garrulness, volubility or volubleness, and glibness. Talkative and talkativeness, the least explicit of these terms, may imply nothing more than a readiness to engage in talk, or they may suggest fluency and ease in talking or a disposition to enjoy conversation (a talkative boy learns French sooner in France than a silent
boy—Sydney Smith} <he was talkative, he had a natural curiosity—Styron> {among them they noticed a beautiful, slim, talkative old man, with bright black eyes and snow-white hair—L. P. Smith}> Tame, subdued, submissive are comparable when tame tally loquacity, garrulity, volubility, glibness (see *high, lofty A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.AsyncResultSubmit
thump of many feet} <the thumping of a big drum} <the thump of a boat against the pier} <everybody's heart was thumping as hard as possible—Thackeray} Thud places more emphasis upon the sound made than upon the action which produces it and carries a less strong suggestion of repetition; also, it more often suggests the sound made by something falling and striking than by something being struck; otherwise it differs only by suggesting a flatter or hollower and less resonant sound than thump <the dull thud of a heavy body striking the floor} <a bullet thudded into the wall above me—Hubert Wales

**Tardy adj**

Tardy, late, behindhand, overdue can all designate persons or things that do not arrive or take place at the time set, the time due, or the expected and usual time. Tardy implies a lack of promptness or punctuality or a coming or happening or doing after the proper or appointed moment; it need not imply slowness in movement but may suggest rather a being delayed in starting or beginning <ten years is a long time for a courtship, and she summons courage to spur her tardy swain—Seamus Kelly} <the tardier indicators of business activity have finally begun to turn down—Fortune} Late implies an opposition to early and usually connotes a failure to come or take place at the time due because of procrastination, slowness of movement or growth, or the interference of obstacles; it is applied especially to persons or to things that are governed by a schedule <be late for work} <you are too late to get your dinner} <the train is very late today} <spring is very late this year} Behindhand usually applies either directly or indirectly to persons who are in arrears (as in the payment of debts or in the fulfillment of obligations) or who are slower than normal (as in mental progress, in the acceptance of fashions, or in taking action) <behindhand in the payment of his rent} <a whole class who were behindhand with their lessons—Hawthorne} <Spain, usually so behindhand in matters of art, displayed expressionists . . . even nonobjectivists—Gómez Sició

**Overdue** is applied to things that are affected by a person's being, or less often to a person that is, markedly late or behindhand; thus, a person is behindhand in the payment of his rent, but the rent is overdue when such a situation occurs; a ship is overdue when it is seriously or conspicuously behind its scheduled time of arrival <her gallant was now more than an hour overdue—Barclay} <a peremptory demand} . . . for the settlement of an account long overdue—Norris} Overdue also may refer to something that might logically or suitably have appeared or occurred a long time before <colonies that are overdue for liberation—Landman} <the valuable work . . . received long overdue recognition—Kuney

**Taste n**

1 Taste, flavor, savor, tang, relish, smack can all mean the property of a substance which makes it perceptible to the gustatory sense. Taste not only is the most inclusive of these terms but it gives no suggestion of a specific character or quality <dislike the taste of olives} <the fundamental tastes are acid, sweet, bitter, and salt} Flavor applies to the property of a thing which is recognized by the cooperation of the olfactory and gustatory and to some extent tactile senses. The term therefore usually denotes the combination of tastes and smells perceived when eating or drinking a thing. Usually, also, it suggests the blend of tastes and odors and textures that give a substance a distinctive or peculiar character <this peach has a particularly fine flavor} <the flavor of a fine tea has been described as "a bouquet which can be tasted"} Savor stresses sensitiveness of palate or of nose and may refer to the odor of something cooking as well as to the flavor of something eaten <caught the rich savor of roasting meat as they passed the window} <sipping slowly to enjoy the full savor of the wine} Tang applies chiefly to a sharp penetrating savor <tang of a salt breeze} or odor; it usually implies a live, pungent quality <prefer apples with a tang} <the tang of dry champagne} <the tang of a salt breeze} Relish and smack are comparatively rare in this sense; relish (see also TASTE 2) comes close to savor and usually suggests enjoyment of the taste <I have no notion of the relish of wine—Hume} <my first endeavor must be to distinguish the true taste of fruits, refine my palate, and establish a just relish in the kind—Shaftesbury} Smack comes close to flavor but applies usually to one that is added to or is different from the typical flavor of a substance {ale with a burnt musty smack} <a good smack of pepper in this stew

In extended use these words usually call up one or more suggestions from their basic senses. Taste usually denotes a strong impression or a heightened sense of the quality of

something (the book leaves a bad taste in the mouth) (the first taste of sudden death and destruction from the skies—Shirer) Flavor implies a predominant or distinctive and pervasive quality (imparted an un wonted lachrymose flavor to his tone—Purdy) (the passing hour's supporting joys have lost the keen-edged flavor—Meredith) Flavor, in fine, is the spirit of the dramatist projected into his work—Galsworthy) Savor differs from flavor largely in suggesting a stimulating or enlivening character or quality that, like salt, spice, or other seasoning, gives life or pungency to a thing (an odd blend of bitter naturalism and quiet humor...). gives it a savor quite its own—Anthony Boucher) (no one treats me like a child now, and the savor has gone out of my life—Ellis) Tang, relish, and smack come still closer to their basic senses (the language has a tang of Shakespeare—Gray) (Yankeeisms... which a salt sea flavor has its own peculiar tang in it—J. R. Lowell) (the full flavor, the whole relish of delight—Beecher) (your lordship... hath yet some smack of age in you, some relish of the saltiness of time—Shak.) (the Saxon names of places, with the pleasant, wholesome smack of the soil in them—Arnold)

2. Taste, palate, relish, gusto, zest are comparable when they mean a liking for or an enjoyment of something because of qualities that give the sense of taste a pleasurable sensation or that produce comparable pleasant mental or aesthetic impressions. Taste (see also TASTE 1) may imply a liking that is either natural or acquired; the term is often used to designate a deep-seated or ingrained longing for something that lies behind one's predilection for it, one's bent to it, one's aptitude for it, or a predisposition to enjoy one thing more than another (cultivate a taste for olives; he had no taste for the study of law; she had a taste for melancholy—for the smell of orange rinds and woodsmoke—that was extraordinary—Cheever) More often taste refers to a liking that is based upon an understanding of peculiar excellences, especially aesthetic excellences, and that gives one a more or less discerning appreciation of a thing's beauty or perfection (as of form, design, and color) or grace and dignity and consequently greater enjoyment of it (a connoisseur, possessing above all things an exquisite taste—Dahl) (all tastes are legitimate, and it is not necessary to account for them—Virgil Thomson) (without any technical knowledge she had acquired a good taste in music—Ellis) In this sense taste is often so close to another sense of taste, namely, the power of discriminating aesthetic judgment, that the two meanings tend to overlap. In the first case, however, taste is not an abstraction but a concrete thing referable to an individual or a group of individuals (we have our tastes in painting as in confectionery. Some of us prefer Tinto retto to Rembrandt, as we do chocolate to coconut—Brownell) In the latter sense taste is an abstraction used commonly without reference to individuals. In general it implies a capacity for discerning true excellence and the setting up of standards whereby all may be taught to appreciate the excellence they discern; sometimes it denotes the body of standards so set up (you do have talent, but you're pitifully ignorant of the first principles of taste—Wouk) Palate may imply either the literal physical sensation or sense of taste (a wine taster must have a discriminating palate) (people who considered cider was just like champagne. It was a matter of palate—Hilton) or a corresponding intellectual reaction and then suggest pleasure afforded the mind (in the midst of such beauty... one's body is all one tingling palate—Muir) had no philosophy, but things distressed his palate, and two of those things were International propaganda and the Organized State—Yeats) Relish often suggests a more distinct or a more exciting flavor in the thing that evokes enjoyment or liking; but especially it tends to imply a keener or more personal gratification than taste (a man of... a quick relish for pleasure—Macaulay) (seemed to speak all his words with an immense wet-licked relish, as though they tasted good on the tongue—Dahl) (the artist's brain] can go further and build up, always with a passionate relish for what it is producing—Montague)

Gusto can imply either the hearty relish with which one sometimes may attack a meal, execute a piece of work, or go about the performance of an act (as a task or duty), or a quality in the thing which is executed or in the act which is performed that indicates vital or enthusiastic interest, keen delight, and intense imaginative or emotional energy (the doing of it of ambitious politicians... succumbing with glee and gusto to the temptations of power—Huxley) (this dramatic sense... gives Rostand's characters Cyran at least—a gusto which is uncommon on the modern stage—T. S. Eliot) Zest, like gusto, applies either to the spirit in which one approaches something one likes to do, make, or encounter or the quality imparted to the thing done, made, or envisioned as a result of this spirit. In contrast with gusto it suggests eagerness, avidity, or a perception of a thing's piquancy or peculiar flavor rather than a hearty appetite indicative of abounding energy (the Elizabethan theater had its cause in an ardent zest for life and living—Arnold) (his robustiousness, his zest for malicious humor—Hervey)

A *predilection, prepossession, partiality: appreciation, understanding, comprehension (see corresponding verbs at UNDERSTAND): inclination, disposition, predisposition (see corresponding verbs at INCLINE): *discernment, discrimination, penetration, insight, acumen

tax vb *burden, encumber, cumber, weigh, weight, load, lade, charge, saddle

teach, instruct, educate, train, discipline, school are comparable when they mean to cause to acquire knowledge or skill. Teach implies a direct showing to another with the intent that he will learn; it usually suggests the imparting of information, but in addition it often also connotes the giving of help that will assist the learner in mastering such difficulties as are involved in putting the new knowledge to use or in making it a part of his mental or physical equipment (teaching the young to read) (teach arithmetic) taught the boys how to swim) (that same prayer does teach us all to render the deeds of mercy—Shak) Instruct stresses the furnishing, especially the methodical furnishing, of necessary knowledge or skill to someone else (schoolmasters will I keep within my house, fit to instruct) her youth—Shak) (he is wise who can instruct us and assist us in the business of daily virtuous living—Carlyle) Educate, although it implies or presupposes teaching or instruction as the means, stresses the intention
or the result, the bringing out or development of qualities or capacities latent in the individual or regarded as essential to his position in life (schools that educate boys for the ministry) (in my eyes the question is not what to teach, but how to educate—Kingsley) *educate* the masses into becoming fit for self-government—*Huxley* *Train*, even when it is used as a close synonym of educate, almost invariably suggests a distinct end or aim which guides teachers and instructors; it implies, therefore, such subjection of the pupil as will form him or fit him for the state in view (universities exist . . . on the one hand, to *train* men and women for certain professions—*Russell* *Train* is especially employed in reference to the instruction of persons or sometimes animals who must be physically in excellent condition, mentally proficient, or quickly responsive to orders for a given occupation or kind of work (*train* a dog to point game) (*troops . . . equipped and trained* to fight in the bitter cold and the deep snow—*Shirer*) *Discipline*, even more than *train*, implies subordination to a master or subjection to control, often self-control (*he consciously seeks to *discipline* himself in fine thinking and right living—*Ellis*) *feeling . . . the rush of old years to *split* his head, he thought long since *disciplined* from him—*Buck*) *School* is sometimes interchangeable with *educate* (*some of them have been schooled* at Eton and Harrow—*Shaw*) or with teach or instruct (*schooled by* my guide, it was not difficult to realize the scene—*S. C. Hall*) but it is more often used in the sense of *train* or *discipline*, frequently with the added implication of learning to endure what is hard to bear (*that I can bear. I can *school* myself to worse than that—*Wilde*) *Discipline* from old jealousy he had thought long since been full of work, he bowed greetings—*Wolfe*) *teach,* *instruct* implies sub-*train,* *discipline,* *inculcate,* *implant*. *teach,* even *educate—Kingsley* (*educate* or to be rich having been *teach* to *discipline* men and women for certain professions—*Russell*). *Train* implies greater violence than *rend* (*the black volume of clouds . . . Joel* *garments—*) *interpret* the implication of a lacerating effect or adds that of impart, *communicate:* *practice,* drill, exercise: *Ana* *G.* *and vanity had been asunder by flashes of lightning—*Irving* your heart, and not your *rend* (*in power, he bowed greetings—*Wolfe*) *analogous words* *Ant* *contrasted words* *See also explanatory notes facing page 1

**torn** vb *Tear* *rip*, *rend*, *split*, *cleave*, *rive* can all mean to separate forcibly one part of a continuous material or substance from another, or one object from another with which it is closely and firmly associated. *Tear* implies pulling apart or away by or as if by main force; it often suggests jagged rough edges or laceration (*tore* his coat on a nail) (*tore* a piece of paper lengthwise) (*he took hold of it with his powerful hands and tore it out by the roots—*Anderson*) *flood tore a . . . gorge through the township—*Amer. Guide Series: Vt.*) (*grief tears her heart*—*Rip* usually implies a forcible pulling or breaking apart typically along a line or juncture (as a seam, a joint, or a connection) (*Macduff was from his mother’s womb untimely ripped—*Shak.*) *rip* the shingles from a roof)—*Rend* implies greater violence than *torn* and either heightens the implication of a lacerating effect or adds that of severing or snipping (*rend* your heart, and not your garments—*Joel 2:13*) (*the black volume of clouds . . . rent asunder by flashes of lightning—*Irving*) (*his pride and vanity had been rent* by her ultimate rejection—*H. G. Wells*) *Split* implies a cutting or breaking apart in a continuous, straight, and usually lengthwise direction or in the direction of grain or layers (*split a log with a wedge*) (*great rocks split by an earthquake*) In extended use the term implies force or intensity sufficient to split something (*split* their sides with laughter) (*pain that seemed about to *split* his head; I felt sorrow *split* my heart, if ever I did hate thee—*Shak.*) (*ear-splitting outcries*—*Cleave*, a somewhat rhetorical word, may come close to *split*, but more often it conveys the notion of laying open by or as by a stroke of an edged weapon (*struck the final blow, *cleaving* the Archbishop’s skull—*Lucas*) (*his acumen *cleave* clean to the heart of a piece of writing—*Mandelbaum*) *Rive* is elevated for *split* (*blunt wedges *rive* hard knots—*Shak.*) (*all thoughts to *rive* the heart are here, and all are vain—*Housman*) *Ana* *slit*, *slash*, *cut*: *pull*, *drag*, damage, *injure, impair* *2* *rush*, dash, shoot, charge *Ana* *speed*, hasten, hurry: dart, *fly*, scud *tease* *tantalize*, pester, plague, harass, harry, *worry, annoy* *Ana* *bait*, badger, sector, chivy: importune, adjure, *beg: fret, chafe, gall* (see ABRADE) *tedious* *irksome, tiresome, wearisome, boring* *Ana* burdensome, *onerous, oppressive: fatiguing, exhausting, fagging, jading (see *Tire vb*): *slow, dilatory, deliberate* *Ant* *exciting* *tedium*, *boredom*, *ennui*, *doldrums* are comparable when they denote a state of dissatisfaction and weariness. *Tedium* suggests a repression of energy for lack of a proper or adequate outlet, and dullness or lowness of spirits resulting from irksome inactivity or from the irksome monotony of one’s pursuits or surroundings (*incessant recurrence without variety breeds tedium—*Lowes*) (*able boys and girls will go through endless tedium . . . to acquire some coveted knowledge or skill—*Russell*) *work* adds to tedium suggestions of listlessness, dreaminess, and unrest resulting either from a lack of interest in one’s pursuits or surroundings or from the fact that they pall or fail to excite interest (*I suppose I shall go on “existing” till the *boredom* of it becomes too great—*J. R. Green*) (*wealthy indolent women . . . who got up at noon and spent the rest of the day trying to relieve their *boredom—*Dahl*) *Ennui* stresses profound dissatisfaction, discontent, or weariness of spirit; usually it suggests physical depression, languor, or lassitude as well as boredom (*that ennui, that terrible taedium vitae, that comes on those to whom life denies nothing—*Wilde*) (*the inexhaustible power and activity of his mind leave him no leisure for *ennui—*Arnold*) *Doldrums* applies to a phase or period of depression that in persons may be marked by listlessness, despondency, and flagging energy (*Lotharioism* is simple monogamy’s *doldrums* multiplied, and with thrice monogamy’s duties—*Nathan*) or in more general applications (as to economic activity) may be marked by inactivity and dullness. *Ana* *irksomeness, tediousness, tiresomeness, wearisomeness* (see corresponding adjectives at *irksome*): melancholy, dumps, blues, gloom (see *sadness*) *teem, abound, swarm, overflow* can all mean to be plentifully supplied (with) or to be rich (in). Though they are often interchangeable, each of these words may carry distinctive implications. *Teem* implies productivity or fecundity (*the rivers teem with fish*) (*his mind teems with strange forms of life—*Shirer) sometimes it suggests glutting (*the market overflows with goods*) *overflow* in its extended sense adds to *abound* an implication of exceeding capacity (*he overflows with good nature*) Sometimes it suggests glutting (*the market overflows with goods*) *Ana* *bear*, produce, yield, turn out: *generate, engender*, breed, propagate; multiply, augment, *increase* *teeny* tiny, little, diminutive, *small, petite, wee, weeny,*
temper vb *shake, tremble, quaver, shiver, shudder, quaver, wobble, shimmerv, dither

tell vb 1 *count, enumerate, number 2 *say, utter, state

divulge, discover, *reveal, disclose, betray

Ana impart, *communicate: *relate, rehearse, recite, recount: *inform, acquaint, apprise

 telling compelling, convincing, cogent, sound, *valid

Ana forceful, forcible, *powerful, potent: *effective, effectual, efficacious: *conclusive, decisive, determinative, definitive

temperosity, audacity, hardihood, effrontery, nerve, cheek, gall are comparable when they mean conspicuous or flagrant boldness (as in speech, behavior, or action). Temerity usually implies contempt of danger and consequent rashness: often it suggests, especially when a proposal or project is under discussion, a failure to estimate one's chances of success (impetuously brushed aside the legalistic twaddle of the lawyers . . . and they frowned on such temerity—Bowers) 

*tenth-rate critics and compiler, for whom the violent shock to the public taste would be a temerity not to be risked—Arnold

Audacity implies either a bold and open disregard of the restraints imposed by prudence, convention, decorum, or authority or undue presumption in making advances (he had committed the supreme audacity of looking into her soul—Sackville-West) 

*the moral audacity, the sense of spiritual freedom, that one gets from certain scenes in the Gospels—Edmund Wilson

Hardihood stresses firmness of purpose and often additionally implies considered defiance (as of conventions or decorum). It may be used without deprecatory intent, but it is frequently employed as a term of contempt almost equivalent to insolence or impudence (no historian or astronomer will have the hardihood to maintain that he commands this God's-eye view—Toynbee) 

*the reviewers . . . were staggered by my hardihood in offering a woman of forty as a subject of serious interest to the public—Bennett

Effrontery is definitely derogatory; it is used in place of any of the corresponding adjectives at PRECIPITATE: impertinence, offensiveness (see corresponding adjectives at SPARING): restraining, curbing, checking (see RESTRAIN)

temperate 1 *moderate

Ana mild, gentle, lenient, *soft: *steady, even, equable, constant: restrained, curbed, checked (see RESTRAIN)

Ant intemperate: inordinate

2 *sober, continent, unimpassioned

Ana *sparing, frugal, economical: abstaining, refinishing, forbearance (see REFRAIN): dispassionate, just, equable, *fair

temporal *profane, secular, lay

Ana *material, objective, physical, corporeal

Ant spiritual

temporary, provisional, ad interim, acting, supply can all be applied to a person holding a post for a limited time, to the post held by that person, or to his appointment. Temporariness or, at least, it suggests self-restraint in sexual indulgence. Sometimes it implies chastity or complete abstinence; often, when referred to husband and wife, it implies avoidance of undue indulgence (chastity is either abstinence or continence. Abstinence is that of virgins or widows; continence, of married persons—Taylor)

Ana forgoing, forbearing or forbearance, sacrificing or sacrifice, eschewal (see corresponding verbs at FORGO): frugality, sparingness, thriftiness (see corresponding adjectives at SPARING): restraining, curbing, checking (see RESTRAIN)

temperate 1 *moderate

Ant intensify

temper n 1 *mood, humor, vein

Ana mettle, spirit (see COURAGE): emotion, *feeling, affection, passion: attitude, *position, stand

2 *disposition, temperment, complexion, character, personality, individuality

Ana *state, condition, posture, situation: *quality, property, attribute

temperament *disposition, temper, complexion, character, personality, individuality

Ana *mind, soul: nature, kind, *type

temperance, sobriety, abstinence, abstemiousness, continence can all mean self-restraint in the gratification of appetites or passions. In its more general sense temperance implies simple habitual moderation and the exercise of judgment (temperance in eating and drinking) (exaggeration, exaltation, the fanatic spirit, are extremely rare. Temperance is the almost universal rule in speech, demeanor, taste, and habits—Brownell) But temperance may be used specifically in reference to the use of intoxicating beverages and then tends to imply not merely moderation but abstinence; thus, a temperance hotel is one where no intoxicating liquors are sold or served. Sobriety, like temperance, suggests avoidance of excess not only in drinking (what would be sobriety for a billiard marker would be ruinous drunkenness for a . . . billiard player—Shaw) but also in thought or action. Often it connotes the idea of seriousness or of avoidance of ostentation (sobriety in dress) (admired him for his cleanliness, sobriety and industry—Cheever).

Abstinence implies voluntary deprivation (the Cynic preached abstinence from all common ambitions, rank, possessions, power, the things which clog man's feet—Buchan) (the man who had made a virtue of abstinence secretly regrets, when he grows old, the discretions of his youth—Abel)

Abstemiousness and its much commoner adjective abstemious suggest habitual self-restraint, moderation, or frugality especially in eating or drinking (the most abstemious of men . . . he held old-fashioned and rather puritanical views—Woolf) Continence emphasizes self-restraint in regard to one's impulses or desires (he knew what to say, so he knows also when to leave off, a continence which is practiced by few writers—Dryden)

In its specific sense it stresses self-restraint in sexual indulgence. Sometimes it implies chastity or complete abstinence; often, when referred to husband and wife, it implies avoidance of undue indulgence (chastity is either abstinence or continence. Abstinence is that of virgins or widows; continence, of married persons—Taylor)

Ana forgoing, forbearing or forbearance, sacrificing or sacrifice, eschewal (see corresponding verbs at FORGO): frugality, sparingness, thriftiness (see corresponding adjectives at SPARING): restraining, curbing, checking (see RESTRAIN)

temperate 1 *moderate

Ana mild, gentle, lenient, *soft: *steady, even, equable, constant: restrained, curbed, checked (see RESTRAIN)

Ant intemperate: inordinate

2 *sober, continent, unimpassioned

Ana *sparing, frugal, economical: abstaining, refinishing, forbearance (see REFRAIN): dispassionate, just, equable, *fair

temporal *profane, secular, lay

Ana *material, objective, physical, corporeal

Ant spiritual

temporary, provisional, ad interim, acting, supply can all be applied to a person holding a post for a limited time, to the post held by that person, or to his appointment. Temporariness merely implies that the post is not held on tenure but may be terminated at the will of those having the appointive power. It is interchangeable with many of the other words but is not so explicit (a temporary position)
tempt 817
tendancy

Analogous words: Ana: analogous words

Antonyms: Ana: *defend, protect, shield, guard, safeguard: *nurse, nurture, foster, cherish, cultivate

tendency, trend, drift, tenor can mean a movement or course having a particular direction and character or the direction and character which such a movement or course takes. Tendency usually implies an inherent or acquired inclination in a person or thing that causes him or it to move in a definite direction so long as no one or nothing interferes. Often, when used in reference to persons, the word means little more than leaning, propensity, or disposition (a growing tendency to disastrously underestimate the potential strength of the United States—Shirer) (he worked to destroy the tendency to dreams in himself—Anderson) More often, especially when used in reference to groups or communities or their activities or the course or direction they take with or without consciousness or intent, the term implies a driving force behind the direction or course taken and an insusceptibility to its being controlled or changed (gave the King a policy at once plausible and insidious, temporizing and yet thick with tendency—Hackett) (the whole tendency of evolution is towards a diminishing birthrate—Ellis) (the tendencies which Lycurgus had endeavored to repress by external regulation reasserted themselves—Dickinson) Trend is used primarily in reference to something that follows an irregular or winding course and denotes the general direction maintained in spite of these irregularities (jagged ranges of mountains with a north and south trend) In its extended use trend may differ from tendency in implying a direction subject to change through the interposition of a sufficiently strong force or agency, in implying a course taken at a given time by something subject to change and fluctuation, or in implying the general direction followed by a changing or fluctuating thing throughout its entire course or within given limits of space or of time (the current trends toward intolerance and the garrison state—Mower) (Aristotle, the most balanced of all the Greek thinkers and the best exponent of the normal trend of their ideas—Dickinson) Drift may apply to a tendency whose direction or course is determined by such external influences as a wind or the movement of flowing water or a fashion or a state of feeling (the drift of public opinion went steadily against him—Parrington) ( stoutly opposed the drift toward national prohibition and equal suffrage—Sam Acheson) but it may apply also to the direction or course taken by something (as speech, writing, or teaching) that has a meaning, a purpose, or an objective which is not definitely stated or made clear but which is inferable; in this sense the word is scarcely distinguishable from intention, purport, or import (for the drift of the Maker is dark, an Isis hid by a veil—Tennyson) (write it down . . . and then maybe I can get the drift of it—Stafford) (I see the whole drift of your argument—Goldsmith) Tenor is a very close synonym of drift in this latter sense but it more often refers to utterances or documents and carries a much stronger implication of clearness of meaning or purport (the general tenor . . . of the talks—Bernard Smith) Both in this sense and in its more common sense of a course or movement having a particular clearly observable direction tenor carries a strong implication of continuity in that course and of absence of fluctuation in its direction; therefore it frequently suggests unaltered, often unalterable, procedure (along the cool sequestered vale of life they kept the noiseless tenor of their way—Gray) (the village . . . was away from the main road and the tenor of its simple agricultural economy had not been disturbed—Gogarty) (even a foible is forgiven so long as it ruffles not the calm tenor of respectability—Gogarty)

Contrasted words: Con (as speech, writing, or teaching) that has a meaning, a purpose, or an objective which is not definitely stated or made clear but which is inferable; in this sense the word is scarcely distinguishable from intention, purport, or import (for the drift of the Maker is dark, an Isis hid by a veil—Tennyson) (write it down . . . and then maybe I can get the drift of it—Stafford) (I see the whole drift of your argument—Goldsmith) Tenor is a very close synonym of drift in this latter sense but it more often refers to utterances or documents and carries a much stronger implication of clearness of meaning or purport (the general tenor . . . of the talks—Bernard Smith) Both in this sense and in its more common sense of a course or movement having a particular clearly observable direction tenor carries a strong implication of continuity in that course and of absence of fluctuation in its direction; therefore it frequently suggests unaltered, often unalterable, procedure (along the cool sequestered vale of life they kept the noiseless tenor of their way—Gray) (the village . . . was away from the main road and the tenor of its simple agricultural economy had not been disturbed—Gogarty) (even a foible is forgiven so long as it ruffles not the calm tenor of respectability—Gogarty)

tender

*leaning, propensity, penchant, proclivity: inclination, disposition, predisposition (see corresponding verbs at INcline): bent, turn, genius, aptitude (see GIFT)

Tender, compassionate, sympathetic, warm, warmhearted, responsive are comparable when they mean expressing or expressive of feeling that reveals affectionate interest in another especially in his joys, sorrows, or welfare. Tender implies a sensitiveness to influences that awaken gentle emotions (as love, affection, pity, or kindness) and often a capacity for expressing such emotions with a delicacy and gentleness that are especially grateful to the person concerned. His mother was very tender with him... she saw the effort it was costing—D. H. Lawrence. The inflections of their voices, when they were talking to each other very privately, were often tender, and these sudden surprising tendernesses secretly thrilled both of them—Bennett. Compassionate implies a temperament or a disposition that is either easily moved by the sufferings or hardships of another or is quick to show pity with tenderness or mercy. Not cold and blaming... but an older and wiser brother—very compassionate—Sinclair Lewis. To wax compassionate over a bird, and remain hard as flint, is possible only to humanity—Reppplier. Sympathetic is a more comprehensive term than compassionate; it implies a temperament or a disposition that enables one to enter into the life of another and share his sorrows, his joys, his interests, his antipathies, and his ways of thinking and feeling and to give that other the impression that he is not alone or that he is being fairly and justly understood. Thus a tête-à-tête with a man of similar tastes, who is just and yet sympathetic, critical yet appreciative... is a high intellectual pleasure—Benson. Though some considered her arrogant and forbidding, I found her personality sympathetic—Edmund Wilson. Sympathetic is also applicable to attitudes or treatments that reveal a capacity for appraising or treating men and their experiences with great fairness and understanding. A penetrating and profoundly sympathetic portrayal of the shifting, fluctuating impulses of a woman yielding both against and with her will—Lowes. Warm implies a capacity for feeling and expressing love, affection, or interest with depth, ardor, or fervency; it suggests less softness of feeling or compassion than tender, but more heartiness, cordiality, or force. A perfect gentleman, unaffected, warm, and obliging—Austen. We common people are all one way or the other—warm or cold, passionate or frigid—Hardy. A wave of genial friendliness flowed from the warm silly hearts of Britons towards the conquered foe—Rose Macaulay. Warmhearted differs little from warm in meaning, but it usually carries a stronger implication of generosity, unselshness, and, often, compassionativeness. She is warmhearted, impulsive, kind, and independent—Kaplan. His portrait of the metropolis is warmhearted and accurate—Bracker. Responsive differs from the preceding terms in usually suggesting sensitiveness to another's display of tenderliness, compassion, sympathy, or warmth and a capacity for responding to that emotion; it stresses impressionableness and suggests a reaction, rather than a taking of the initiative. Rushed to Moscow as the new British ambassador in the hope of striking a more responsive chord among the Bolsheviks—Shirer. She took up life, and became alert to the world again, responsive, like a ship in full sail, to every wind that blew—Rose Macaulay. Ana gentle, lenient, mild, *soft: humane, benevolent, *charitable, altruistic: *pitiful, piteous

Ant: callous, severe

An offer, proffer, present, prefer

Ana propose, purpose, design (see INTEND): *suggest, intimate

Ant *compliment, commendation (see corresponding verb at CONDA-MEND): approval, endorsement (see corresponding verbs at APPROVE)
testimony *evidence, deposition, affidavit
Ant trial, test, proof, demonstration (see under PROVE): witnessing or witness, attesting or attestation, certifying or certification, vouching for (see corresponding verbs at CERTIFY)
testy *irascible, choleric, splenetic, touchy, cranky, cross
Ant *irritable, peevish, snappish, waspish: hasty, sudden, impetuous (see PRECIPITATE): captious, carping, caviling, faultfinding (see CRITICAL)
text topic, argument, theme, *subject, matter, subject matter, motive, motif, leitmotiv
thalsassic *aquatic, marine, oceanic, neritic, pelagic, abyssal
thankful *grateful
Ant appreciating or appreciative, valuing, prizing, cherishing, treating (see corresponding verbs at APPRECIATE): satisfied, content (see under SATISFY)
Ant thankless
thaumaturgy *magic, sorcery, witchcraft, witchery, wizardry, alchemy
thaw vb melt, *liquefy, deliquesce, fuse
Ant freeze
theatrical adj *dramatic, dramaturgic, melodramatic, histrionic
Ant *artificial, factitious: formal, conventional, *ceremonial, ceremonious: affecting, pretending, assuming, simulating, feigning (see ASSUME): *showy, pretentious, ostentatious
theft, larceny, robbery, burglary mean the act or crime of stealing, though they have differences in legal application. The same differences in implications and applications are observable in the agent nouns thief, larcener or larcenist, robber, burglar, denoting one who steals. Theft and theft are the most general and the least technical of these terms; they imply the taking and removing of another's property usually by stealth or without his knowledge and always without his consent. The terms are often so broad that they may include reference to any taking of another's property without his consent (as by pilfering, purloining, swindling, embezzling, or plagiarizing) (the theft of a purse) (the theft of the city's money by grafters) (a thief removed his watch from his pocket) Larceny and the less common agent nouns larcener and larcenist are legal terms implying direct theft but excluding such specialized forms as swindling, embezzlement, and plagiarizing. The terms connote an unlawful or felonious act, a removal of another's property from the place where it belongs, and complete possession, even for a moment, by the thief (the shoplifter was not apprehended until she had left the store, so that there would be proof of larceny) (the maid was found guilty of larceny) Grand larceny and petty larceny are common in ordinary use as indicating respectively a theft of an appreciable amount and a theft of a negligible amount.

Robbery and robber in their precise legal use imply the taking of another's property from his person or in his presence by means of violence or intimidation (highway robbery) (the paymaster was attacked and the payroll money was seized by armed robbers) Burglary and burglar in legal use imply a breaking and entering with an intent to commit a felony, usually that of larceny or robbery. In the laws of different states and nations the detailed specifications of the crime, for example, the time of occurrence (nighttime often being stipulated) or the actual commission of the felony, may or may not be considered material to the charge (the burglary of their home was committed during their absence for the evening) (she lived in constant fear of burglars)

theme 1 text, topic, argument, *subject, matter, subject matter, motive, motif, leitmotiv
2 composition, paper, *essay, article
then *therefore, hence, consequently, accordingly, so

theorem *principle, axiom, fundamental, law

theoretical, speculative, academic can be applied to minds, types of reasoning or philosophizing, or branches of learning as meaning concerned principally with abstractions and theories, sometimes at the expense of practical basis or application. Theoretical in its most usual and nonderogatory sense applies to branches of learning (as sciences) which deal with the inferences drawn from observed facts and from the results of experiments and with the laws or theories that explain them (the distinguishing feature of theoretical science is the anticipation of facts from experience—George von Wright)

In this sense the term is often opposed to applied, which describes branches of learning which have to do with the putting of such laws and theories into use (as in mechanics, in industry, or in social reform) (theoretical versus applied chemistry) (theoretical ethics) (a purely theoretical definition would be that a person is emotionally sensitive when many stimuli produce emotions in him—Russell) But theoretical often implies a divorce from actuality or reality that makes one unable to see things as they are and usually makes him see them only in the terms of preexistent ideas or theories. In this sense it is opposed to practical (seems compelled to establish that . . . the book does have great practical importance in spite of its predominantly theoretical character—M.G. Whitey) (things that had seemed drearily theoretical, dry, axiomatic, platitudinal, showed themselves to be great generalizations from a torrent of human effort and mortal endeavor—Benson) Speculative (see also THOUGHTFUL 1) may go further than theoretical in suggesting a deep interest in theorizing or in forming theories or hypotheses and often additionally implies a daring use of the imagination (the rights of man . . . were theories or hypotheses and often additionally implies a daring use of the imagination—George von Wright)

In this sense it is opposed to practical (seems compelled to establish that . . . the book does have great practical importance in spite of its predominantly theoretical character—M.G. theory 820

thin

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

general referable not only to measure in width or amount but also to quantity or quality and agree in meaning not broad, not thick, not abundant, nor dense. Thin basically implies comparatively little extension between two surfaces of a thing (a thin layer of cement) (a thin stratum of rock) (a thin coin) or the comparatively small diameter of a cylindrical or nearly cylindrical thing in proportion to its height or length (a thin body) (the thin trunk of a tree) (thin wire) In its extended senses the term usually implies the lack of the flesh or substance that fills out a thing to its normal or usual extent and gives it fullness, richness, substantiality, compactness, or density (a thin face) (thin wine) (a thin argument) (a thin forest) (thin hair) (thin, pebbly earth, which was merely the rock pulverized by weather—Cather) (like the air of a mountaintop—thin, but pure and bracing—Inge) (would make a sound as thin and sweet as trees in country lanes—Millay) Slender, as applied to the bodies of men and of animals, implies leanness or sparseness without any suggestion of gauntness or lankiness and usually carries a distinct connotation of gracefulness and of good proportions (a slender girl) (a slender dog) (slender white hands—Anderson) Slender is preferred to thin in describing things of narrow extension when the thinness is an element of beauty and gracefulness of line (a slender vase) (the slender legs of a Sheraton chair) (the pure slender lines of water falling from the abrupt wooden crag—Binyon) In its extended use slender is often employed with little distinction from thin, but it is often preferred when quantity or amount rather than quality is stressed (a few attempts had been made . . . with slender success—Maccoulay) (packed up her slender belongings—Kipling) (with slender forces he had to face the formidable Sextus—Buchan) (such a vision [of life] as might come as the result of few or slender experiences—T. S. Eliot) Slim differs little from slender when applied to the figures of persons or animals; it may sometimes suggest fragility or gauntness rather than grace, and lack of flesh rather than excellent proportions. In its extended senses, however, slim usually carries a clearer implication of meagerness or scantiness than slender, which, though it suggests smallness in amount or quantity, implies less commonly than slim a falling short of adequacy or sufficiency; thus, slim resources are by suggestion more meager than slender resources (he has a slim chance of recovery) (this hopes for success are slim) (there was a slim attendance at the meeting) Slight through most of its variations in meaning carries a more obvious implication of smallness than of thinness; when applied to persons, it seldom suggests height or length, as slender usually does or slim sometimes does (a slight, middle-aged man) When applied to things, it is often derogatory and usually implies a failure to come up to a level of what is commensurate, adequate, or significant (a slight and transient fancy—Arnold) (a slight difference) (his success was slight) (there is . . . ground to recognize a slight intellectual superiority in the upper social class—Ellis) he liked the folksong, because it was a slight thing, born of immediate impulse—Huxley) Tenuous basically implies extreme thinness or even absence of perceptible thickness; the term is literally applicable to things (as lines, cords, or wires) of great length or height and of minute diameter (the most tenuous of threads) (as tenuous as the filament of a spider's web) or to fabrics and textiles which are exceedingly sheer or gauzy (tenuous fabrics such as tulle and chiffon) In its extended senses tenuous often describes something which covers an expanse but lacks density, compactness, or solidity (some [stars] are extremely dense and compact, others extremely
thin vb Thin, attenuate, extenuate, dilute, rarefy. Thin is analogous words (see also INFREQUENT, CHOICE) is applied chiefly to gases and especially to air (he was high... nearly slump ing in the rare air—Coombs) In its uncommon extended use it suggests tenacity or sometimes extreme exaltation or elevation (reared in the rarest air of German intellectualism—Time) (if we try to express almost any poems of his in prose, we find it impossible; its rare spirit evaporates in the process—Day Lewis) Ana *lean, spare, lank, lanky, gaunt; *meager, exiguous, scanty; cadaverous, pinched, wasted, *haggard: attenuated, extenuated, diluted (see thin vb) Ant thick

think 1 matter, concern, business; *affair 2 Thing, object, article are comprehensive terms applicable to whatever is apprehended as having actual, distinct, and demonstrable existence. They vary, however, in their range of application. Thing is the term of widest reference. In its most inclusive sense it need not imply direct knowledge through the senses but is equally applicable to something so known and to something the existence of which is inferred from its signs or its effects; thus, one thinks of the state, the church, literature, and the law as things rather than as ideas or abstractions; a friend's affection is as real a thing as his house or his hand; one distinguishes a word from the thing it names (name the things that are on this table) (wanted to do the right thing) (a blind person recognizes things through such qualities as shape, texture, smell, taste, and sound) In somewhat more restricted use thing can denote specifically an entity having existence in space or time and distinguished from one consisting only in thought (virtue is not a thing but an attribute of a thing) or in still more restricted use an inanimate entity and especially a material possession as distinguished from living beings and especially persons (more interested in things than in human beings) Often the word is used idiomatically to mention without specifically identifying an item that cannot or need not be further identified or whose nature is implicit in the context; thus, in "be sure to wear warm things," clothing is implied; in "bring in the tea things," the necessary collection of dishes, implements, and foods is implied (what's that thing in your hand?) Occasionally thing may be used in reference to persons when contempt is expressed or derogation intended (do you call that thing a man?) Object has for its primary implications externality to the mind or existence outside the observer. In philosophic and scientific use it is applied to something that is put before one as an entity capable of being seen, observed, or contemplated (a thinker may make an abstraction, such as love, art, or justice, an object of thought) (modern physicists are concentrating on the atom as an object of study) This basic implication of object is its chief distinction from thing when either word is used to denote something that can be perceived by one or more of the senses. For object in this, its ordinary sense, is applied chiefly to what has body and usually substance and shape (he groped his way in the darkness with hands outstretched to detect any objects in his path) (in the glare of the torch they saw moving objects in the distance) Article is the most limited in its range of application, being used chiefly of objects that are thought of as members of a group, kind, or class (meat is an important article of food) (articles of furniture) (a chair is an article of furniture) (articles of apparel) Ana *item, detail, particular

thin 821 think
stress on the process than upon the results of thinking; it is often used to suggest the appearance or the atmosphere of profound but not necessarily productive thinking (still cogitating and looking for an explanation in the fire—Dickens) Mrs. Berry had not cogitated long ere she pronounced distinctly and without a shadow of dubiosity: “My opinion is . . .”—Meredith Reflect usually implies a turning of one’s thoughts back upon or back to something that exists, has occurred, or needs reexamining; it implies quiet, unhurried, and serious consideration or study (stood reflecting on the circumstances of the preceding hours—Hardy) all the most important things in his life, [he] sometimes reflected, had been determined by chance—Cather began to . . . study its organization, reflect on its psychology and political techniques and ponder the results—Shirer Reason implies consecutive logical thought, beginning with a postulate, a premise, or definite data or evidence and proceeding through inferences drawn from these to a conclusion or judgment (since, where all is uncertain, we must reason from what is probable of human nature—Quiller-Couch) no man as near death as I was feeling, could, I reasoned, be absorbed by such trifles—Lucas Speculate implies the processes of reasoning but stresses either the uncertainty of the premises or the incompleteness of the data and therefore usually imputes a hypothetical or theoretical character to the conclusions reached (the two women speculated with deep anxiety whether or not little Pamela had died of exposure—Cheever) it is interesting to speculate whether it is not a misfortune that two of the greatest masters of diction in our language, Milton and Dryden, triumph with a dazzling disregard of the soul—T. S. Eliot Deliberate suggests slow and careful thought or reasoning and fair consideration of various aspects in an attempt to reach a conclusion often on a matter of public interest (lawmakers . . . can—and do—spend huge amounts of time deliberating matters of absolute insignificance—Armbister) please you, deliberate a day or two—Shak. the future relations of the two countries could now be deliberated on with a hope of settlement—Froude Ana ponder, meditate, muse, ruminate: infer, deduce, conclude, judge

thirst vb hunger, pine, yearn, *long, hanker
Ana covet, crave, *desire, wish, want

though, although, albeit introduce subordinate clauses stating something that is or may be true in spite of what is asserted in the main clause. Though, the most widely used of these words, can introduce a clause that states an established fact or one that offers only a supposition, either a hypothesis or an admission of possibility or probability (though philosophy was Bede’s chief interest and concern, he by no means stopped there—Malone) remembered a great deal of classical literature, badly taught though it was—Higher (let us not defer our trip, though it rain tomorrow) Although, which is freely interchangeable with though, is often preferred when it introduces an assertion of fact and when the subordinate clause precedes the main clause (although they worked hard . . . their movements seemed painfully slow—Forester) (although the war was still on, the diamond trade began to show signs of recovery—Hahn) Albeit is especially appropriate when the idea of admitting something that seems a contradiction is stressed (a worthy fellow, albeit he comes on angry purpose now—Shak.) (passages of moving, albeit restrained, eloquence—N. Y. Herald Tribune Book Rev.)

thought *idea, concept, conception, notion, impression
Ana opinion, view, sentiment, belief, conviction, persuasion
thoughtful

1 Thoughtful, reflective, speculative, contemplative, meditative, pensive can be applied to persons or their moods, attitudes, expressions, and utterances as meaning characterized by or showing the power to engage in thought, especially in concentrated thinking. Thoughtful may imply either the act of thinking concentratedly or the disposition to apply oneself to the careful and serious consideration of problems or questions at issue (he has a shrewd rather than a thoughtful face) (Marlowe—not excepting Shakespeare or Chapman, the most thoughtful and philosophical mind, though immature, among the Elizabethan dramatists—T. S. Eliot) (a thoughtful book on a serious subject—Selzer) Reflective differs from thoughtful in its stronger implication of orderly processes of thought, such as analysis and logical reasoning, and in its suggestion of a definite aim, such as the understanding of a thing's nature or of its relation to other things or the reaching of a definite conclusion (men of reflective and analytical habit, eager to rationalize its [plutocracy's] instincts and to bring it into some sort of relationship to the main streams of human thought—Mencken) Speculative implies a tendency or inclination to think about things of which direct knowledge is either impossible or so limited that any conclusions are bound to be uncertain (economics is regarded by many persons as a speculative science) (speculative writing about the state—Frankfurter) Hence the term often implies theorizing or conjecturing without consideration of the evidence or with little attention to the evidence (about a thousand practical and positive topics the Frenchman, who speaks from experience and examination, finds our views speculative and immature—Browning) (the philosophical background of Chinese culture has always tended to create reflective rather than speculative thinkers—Hart) Contemplative carries a stronger implication than the other words of an attention fixed on the object of one's thoughts; it may imply as its object something perceivable by the senses or something abstract yet comprehensible by the mind, or it may suggest a habit of mind (a contemplative thinker, withdrawn from active life—Theodore Spencer) (practical curiosity becomes contemplative and examines things for their own sake when . . . man . . . having arrived at the stage of ideas and thought, applies them to the data presented by sensible experience—Alexander) (the contemplative life which is concerned with human feeling and thought and beauty—Ruskin) Meditative, except in religious use, where it comes very close to contemplative, usually implies a tendency to ponder or muse over something without necessarily implying any such intellectual purpose as understanding a thing or reaching a conclusion regarding it. The term therefore often comes close to thoughtful, though it usually implies some consecutive reasoning and sometimes suggests pleasure rather than seriousness in the exercise of thought (indulge in many a meditative walk) (a meditative temperament) (sympathies . . . that steal upon the meditative mind, and grow with thought—Wordsworth) Pensive is not always clearly distinguishable from meditative, though at times it carries a stronger suggestion of dreaminess, of wistfulness, or of melancholy (for oft, when on my couch I lie in vacant or in pensive mood—Wordsworth) (silent and pensive, idle, restless, slow—Byron) Ana *serious, earnest, grave, sober: engrossed, absorbed, intent: *abstracted, preoccupied

2 Thoughtful, considerate, attentive are applied to persons and their acts in the sense of being mindful of the comfort or happiness of others. Thoughtful usually implies unselfish concern for others or the capacity for anticipating another's needs (in his thoughtful wish of escorting them through the streets of the rough, riotous town—Gaskell) Considerate stresses concern for the feelings of others or thoughtfulness in preventing or in relieving pain, suffering, or distress (the French poor people are very considerate where they see suffering—Meredith) (too courteous and considerate to make stubborn subordinates bend properly to his will—Nevins & Commager) Attentive emphasizes continuous thoughtfulness or implies repeated acts of kindness or courtesy (Emmy had always been good and attentive to him. It was she who ministered to his comforts—Thackeray) (I was never more surprised than by his behavior to us. It was more than civil; it was really attentive—Austen) Ana solicitious, concerned, careful, anxious (see under CARE): courteous, polite, gallant, chivalrous (see CIVIL)

Ant thoughtless*careless, heedless, inadvertent

Ana rash, reckless, foolhardy (see ADVENTUROUS): *indifferent, unconcerned, incurious, aloof: lax, remiss, *negligent

Ant thoughtful

thoughtless

1. *beat, pound, pummel, buffet, baste, belabor

2. 2 flourish, brandish, shake, *swing, wave

Ana wield, manipulate, swing, ply, *handle

threadbare

1. *shabby, dilapidated, dingy, faded, seedy

Ana damaged, injured, impaired (see INJURE): worn (see HAGGARD)

2. shopworn, *trite, hackneyed, stereotyped

Ana antiquated, obsolete, archaic (see OLD): exhausted, depleted, drained, impoverished (see DEPLETE)

threaten, menace both mean to announce or forecast (as by word or look) an impending or probable infliction (as an evil or an injury). Threaten basically implies an attempt to dissuade or influence by promising punishment or the infliction of reprisals upon those who disobey an injunction or perform acts objectionable to the speaker (the magistrates . . . solicited, commanded, threatened, urged—Milton) (another form of lying, which is extremely bad for the young, is to threaten punishments you do not mean to inflict—Russell) However the term has been so extended in its meaning that it is often used with reference to things (as events, conditions, or symptoms) which presage or otherwise indicate something, and typically something dire or disturbing, to be about to or likely to happen (overcasts skies that threaten rain) (lived on the margin of survival, constantly threatened by famine and disease—Geddes) (without invoking the rule of strict construction I think that "so near as to obstruct" means to near as actually to obstruct—and not merely near enough to threaten a possible obstruction—Justice Holmes) Menace is a somewhat more literary term than threaten, and it carries a much weaker implication of an attempt to dissuade or influence and a much stronger suggestion of an alarming or a definitely hostile character or aspect (conditions that menace our liberty) (is it not experience which renders a dog apprehensive of pain, when you menace him?—Locke) (the devastating weapons which are at present being developed may menace every part of the world—Attlee) Ana *intimidate, bulldoze, cow, browbeat, portend, presage, augur (see FORETELL): *warn, forewarn, caution

thrift* economical, *sparing, frugal

Ana provident, prudent, foresighted (see under PRUDENT): saving, preserving, conserving (see SAVE)

Ant wasteful

thrill vb Thrill, electrify, enthuse are comparable when they mean to fill with emotions that stir or excite physically...
thrive

and mentally or to be stirred by such emotions. Thrill suggests pervasion by emotions that set one atingle or aquiver (as with pleasure, horror, or excitement); commonly it implies an agreeable sensation even when the exciting cause is potentially distressing or painful (a thrilling detective story) by carefully copying what other people did, she would manage to get through . . . this thrilled sense of a storm or a flower . . . ?—Montague

Electrify differs from thrill in suggesting effects comparable to those produced by an electric current that shocks rather than stuns; it implies a sudden, startling, and violent stimulation by a power that for the time being holds one obedient to its will or under its sway (the blue-eyed girl whose silverly tones and immense vitality had electrified audiences—Tomkins) she was not eating anything, she was using up all her vitality to electrify these heavy loads into speech—Cather

Enthuse can be used effectively in respect to an arousing of enthusiasm in someone or an experiencing of enthusiasm about something (Lubicov, enthused by the music of his native land, beat his baton with more and more zest—Brambrick) as a dogmatic theologian, the Bishop did not enthuse himself and he did not understand other people's enthusiasms—Frank O'Connor

the War Dance [among Indians] was a ceremony to arouse the community and enthuse the warriors—Wissler

An

excite, stimulate, galvanize, quicken (see PROVOKE): 
stir, arouse, rouse, rally: penetrate, probe, (see PROBE): quiver, tremble, shiver (see SHAKE)

through

*by, with

throw, cast, fling, hurl, pitch, toss, sling can all mean to cause to move swiftly forward, sideways, upward, or downward by a propulsive movement (as of the arm) or by means of a propelling instrument or agency. Throw, the general word, is often interchangeable with the others; basically it implies a distinctive propelling motion of the bent arm and wrist, but in practice it is applicable in respect to almost any propulsive action (people who live in glass houses should not throw stones) (the fire engine throws a long stream of water) (this gun throws a huge shell) (throw off his coat) (the skeptic cannot throw an object if his own feet are in the air—Inge) Cast is sometimes interchangeable with throw, but it typically is used when what is thrown is light (cast a net) (cast dice) and is either directly aimed (cast his line in angling) or scattered more or less carefully (cast seed) or is thrown only in a figurative sense (cast a black look) Fling implies more violence and less control in propulsion than either of the preceding words; it often implies a force gained from strong emotion (as anger, contempt, or enthusiasm) (then he loathed his own beauty, and, flinging the mirror on the floor, crushed it into silver splinters beneath his heel)—Wilde (the opening pages irritated him . . . in the end, in exasperation, he flung them aside—Malamud) hurl stresses driving and im

petuous force that makes for speed and distance in throwing (him the Almighty Power hurled headlong flaming from the ethereal sky—Milton) Pitch sometimes means no more than to throw lightly or carelessly (could take up a sack of grain and with ease pitch it over a packsaddle—Zane Grey) (when you get your new outfit, pitch out that dress—Ethel Wilson) but distinctively it means no more than any of the preceding words stresses a sense of direction and a definite target in throwing (pitch horseshoes) (pitching hay onto the high load) (pitching matchbooks at a crack . . . was the favorite sport—James Jones) possible . . . to run up to their enemy's lines and roll, bowl, or pitch their grenades among the legs of their opponents—Wintringham) Toss implies light, careless, or more or less aimless throwing (he . . . tossed me some pieces of money—Dickens) (she rested on a log and tossed the fresh chips—Frost) (toss a coin to decide who should go) The term often also suggests a throwing to and fro or up and down (an hour's play in tossing a ball) (they . . . discussed a doubt and tossed it to and fro—Tennyson)

Sling suggests propelling with a sweeping or swinging motion, usually with force and suddenness (grabbed the boy's collar and slung him against the wall)

2 *draw, stalemate, deadlock, standoff

An

equality, equivalence (see corresponding adjectives at SAME)

tie

vb

Tie, bind both mean to make fast or secure. They are often used interchangeably without marked loss, but since in both their primary and extended senses they carry fundamentally distinct connotations, greater precision in their use is often possible. Tie basically implies the use of a cord or rope to attach one thing that may wander or move to another that is stable (I'll tie them [our horses] in the wood—Shak.) Bind, on the other hand, implies the use of a band or bond (see BOND n) to attach two or more things so that they are held firmly together or brought into union (gather ye together first the tares, and bind them in bundles—Mt: 13:30) (bind a sprained

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
ankle) <a fillet binds her hair—Poole> <bind a person hand and foot> In extended use, especially when what is tied or bound is a person, both terms imply a deprivation of liberty and an imposed restraint. Tie, however, specifically suggests a being held down by something stronger than oneself and an inability to get away or free oneself <tied to a job> <tied to an unsympathetic wife> Bind, on the other hand, either suggests a being held together in a close union, for the sake of strength or mutual support <the common danger bound all classes together> <and vows of faith each to the other bind—Shelley> or a being held down by such a bond, as a pledge, a compact, a duty, or an obligation, or by a bond of blood, marriage, or friendship <and vows, that bind the will, in silence made—Wordsworth> <"Are you engaged?" . . . "There's someone . . . We don't want to spoil things by having anything definite and binding"—Gibbons>

**Ana** *fasten, attach: *secure, rivet, anchor, moor: *join, connect, link
**Ant** *unite

**tier** *line, row, rank, file, echelon

**tiff** *spat, bicker, quarrel, squabble, wrangle, altercate

vb **tiff**

n *fasten, attach: *secure, rivet, anchor, moor: *join, connect, link

**Ant** *unite

**tight** 1 Tight, taut, tense are comparable chiefly in their tightness or tautness that involves severe physical or, more rarely, psychological strain, tense may be preferred <a cat crouched for a spring, with muscles tense> <help him to unbend his too tense thought—Arnold> <just as a bicycle chain may be too tight, so may one's carefulness and conscientiousness be so tense as to hinder the running of one's mind—James> <the rat was crouching, very tense, sensing extreme danger, but not yet frightened—Dahl>

**Ana** strict, stringent (see RIGID): *close, compact: contracted, compressed, condensed, shrunken (see CONTRACT vb): snug, shipshape (see NEAT)

**Ant** loose 2 also tightfisted *stingy, close, closefisted, niggardly, parsimonious, penurious, miserly, cheese-picking, penny-pinning

**tired** *mean, ignoble, sordid, abject

3 tipsy, intoxicated, *drunk, drunken, inebriated

**tightfisted** *stingy, close, closefisted, niggardly, parsimonious, penurious, miserly, cheese-picking, penny-pinning

**Ant** *loose

**time** n *opportunity, occasion, chance, break

**Ant** indefinitely

**timely** well-timed, opportune, *seasonable, pat

**Ana** appropriate, fitting, meet, proper, suitable (see FIT): fortunate, *lucky, happy, providential

**Ant** indefinitely

**timetable** *program, schedule, agenda

**timid, timorous** both mean so fearful and apprehensive as to hesitate or hold back. Timid stresses lack of courage and dashing and usually implies extreme cautiousness and fearfulness of change or of venturing into the unknown or uncertain <a timid investor> (timid as a deer) *timid about making decisions* <a timid person would rather remain miserable than do anything unusual—Russell> Timorous stresses domination by fears and apprehensions; it implies a temporary or habitual frame of mind which causes one to shrink from an action or activity which requires independence, decision, or self-assertiveness and suggests terror rather than extreme caution <Murray, the most timorous, as Byron called him, of all God's book-sellers—Scott> (in another moment she seemed to have descended from her womanly eminence to helpless and timorous girlhood—Wharton) *timorous and fearful of challenge—Mencken*

**Ana** *fearful, apprehensive, afraid: *cautious, circumspect, calculating, wary, chary

**Con** *brave, courageous, unafraid, fearless, intrepid, valiant, bold, audacious

**timorous** *timid

**Ana** *fearful, apprehensive, afraid: *cautious, circumspect, calculating, wary, chary

**Ant** indefinitely

**tincture** n *touch, suggestion, tinge, suspicion, soupçon, shade, smack, spice, dash, vein, strain, streak

**tinct** n 1 tint, shade, hue, *color, tone

2 tinture, *touch, suggestion, shade, suspicion, soupçon, smack, spice, dash, vein, strain, streak

**Ant** assured

**tire** *stingy, close, closefisted, niggardly, parsimonious, penurious, miserly, cheese-picking, penny-pinning

**tips** intoxicated, inebriated, *drunk, drunken, tight

**tirade** *tirade, diatribe, jeremiad, philippic* can all mean a violent, often long-winded, and usually denunciatory speech or writing. Tirade implies a swift emission of heated language, sometimes critical, sometimes abusive, but usually long-continued and directed against persons or things that the speaker or writer believes worthy of castigation <screaming a tirade of protest and rage—Davenport> The King . . . had . . . to impose silence on the tirades which were delivered from the University pulpit—J. R. Green> **Diatribe** carries a stronger implica-
tion of bitterness and, often, of long-windedness than tire (a rambling, bitter diatribe on the wrongs and sufferings of the laborers—Kingsley) (a diatribe in some . . . paper which neglected to mention what I had said, it merely indicated that it had been awful—Mailer) Jeremiad stresses the implication of dolefuless or lugubriousness, but it usually applies to a diatribe in that strain (a jeremiad against a civilization that values knowledge above wisdom—Durrell) Philippic applies to an oration or harangue, oration, *speech: invective, vituperation, *abuse: denunciation, censure, condemnation (see corresponding verbs at CRITICIZE).

Ant eulogy
tire vb Tire, weary, fatigued, exhaust, jade, fag, tucker can all mean to make or in some cases to become disequilibrated or unable to continue because of loss of strength or endurance. Tire is the general and ordinary word and usually implies the draining of one's strength or patience; it may suggest such causes as overexertion, long continuance at a task, boredom, or a sense of futility and usually it requires textual amplification to indicate the cause and the degree of the effect (it tiring me to death to read how many ways the warrior is like the moon, or the sun, or a rock, or a lion, or the ocean—Walpole) (music that gentilier on the spirit lies, than tired eyelids upon tired eyes—Tennyson)

* spoke exclusively from the larynx, as if he were altogether too tired to put any diaphragm breath into his words—Salinger)

(we shall not fail or falter; we shall not weaken or tire—Sir Winston Churchill!) Weary as often suggests an incapacity for enduring more of the same thing or an unwillingness to continue one's effort or one's interest as a depletion of that strength or that interest (the others would never raise their eyes while this happened, as men too well aware of the futility of their fellows' attempts and wearied with their useless repetition—Kipling) (cak, I am worn out—I am wearied out—it is too much—I am but flesh and blood, and I must sleep—Milly) (I have only one prayer—that I weary of you before you tire of me—Mailer) (wearied of her husband's infidelities, and could not bear them any more—Rose Masefield)

Fatigue is stronger than tire and implies great lassitude brought on by overstrain or undue effort. It usually implies an incapacity for further strain or effort without damaging effects (I rested . . . in a shrubbery, in my enfeebled condition, too fatigued to push on—H. G. Wells) (she flung herself upon a sofa, protesting . . . that she was fatigued to death—Burney)

Exhaust (see also DEPLETE) heightens fatigue's implications of drained strength or a worn-out condition of mind or of body (she is too exhausted to sleep) (exhausted and addled by the frustration of their failures—Mailer) Jade implies weariness or fatigue that makes one lose all freshness, spirit, animation, or interest and become dull and languid. The term seldom carries as a clear suggestion of physical or mental overexertion as fatigue and often implies satey even more clearly than weary: it is especially useful when the implication of overindulgence in something or the overworking of a particular sense or faculty is to be conveyed (to minds jaded with debauches of overemphasis it does contrive to give a thrill—Montague) (to the jaded . . . eye it is all dead and common . . . flatness and disgust—James) Fag implies work until one droops with weariness or fatigue (I worked . . . at correcting manuscript, which fags me excessively—Scott) (with a gap for breath said, "Lord, what a run. I'm fagged to death"—Masefield) Tucker closely approaches fatigue or exhaust in meaning but sometimes carries the additional suggestion of loss of breath (too tuckered to finish a job—Leavitt) (seemed tuckered out from listening to long speeches—Dorothy Canfield)

Ana irk, vex, *anno, bother: *deplete, drain, exhaust, impoverish, bankrupt

tireless *indefatigable, wearless, untriring, unwearying, unwearied, unflagging

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
Authoritarian

Theoretically the mouthpiece of the people. Practically an authoritarian state is so organized that the final determining authority is its head. Practically, it implies toleration of but one political party, the Fascists to power in 1922, became an authoritarian state; Germany, with the election of Hitler as Chancellor in 1933, became a totalitarian state.

Authoritarian

state.

Totalitarian

implies a type of governmental organization in which the government may be distributed for practical purposes, theoretically the mouthpiece of the people. Practically an authoritarian state is so organized that the final determining authority is its head. Practically, it implies toleration of but one political party, the Fascists to power in 1922, became an authoritarian state; Germany, with the election of Hitler as Chancellor in 1933, became a totalitarian state.

Totalitarian

often extends its control over the economic and cultural life of the people; thus, Italy, with the rise of Mussolini in democratic countries) in the people or in a representative body. No matter how the various powers vested in the government may be distributed for practical purposes, an authoritarian state is so organized that the final and determining authority is its head. Practically an authoritarian government, though professing political power, all political power is ultimately concentrated in the hands of an individual head (as a sovereign, a leader, or a dictator) and not (as in democratic countries) in the people or in a representative body. No matter how the various powers vested in the government may be distributed for practical purposes, an authoritarian state is so organized that the final and determining authority is its head. Practically an authoritarian government, though professing political power, often extends its control over the economic and cultural life of the people; thus, Italy, with the rise of Mussolini and the Fascists to power in 1922, became an authoritarian state; Germany, with the election of Hitler as Chancellor in 1933, became a totalitarian state.

Touch

vb 1 Touch, feel, palpate, handle, paw can all mean to lay the hand or fingers or an equally sensitive part of the body upon so as to get or produce a sensation often in examination or exploration. Touch usually stresses the act which leads to or produces the sensation or the resulting knowledge, but it does not invariably imply the act of placing a bodily part in contact with the object considered for it may suggest the use of an instrument which induces a specific sensation or produces another sensation (as of sounds heard) if you touch the baby he will awaken) or it may suggest an immaterial contact (it is essential that the College be strengthened in its enduring task of touching creatively the lives of those many who will study here—N. M. Pusey) Feel stresses the sensation induced or produced; usually it suggests a sensation on the part of the person touching but may connote a sensation on the part of the one touched (come near ... that I may feel thee, my son—Gen 27:21) the natural philosopher concerned himself with almost anything that he could see or hear or feel—Darrow) that all the saints and mystics say about the irradiation of the whole personality by the felt presence of the Holy Spirit—Inge Although touch and feel often connote examination or exploration, they do not throw the emphasis on that end; on the other hand, palpate (as well as the noun palpation), especially in medical use, stresses the feeling of the surface of a body, usually a human body, as a means of discovering the condition of organs that cannot be seen the doctor palpated the swollen mass and said no bone was broken) examine the condition of the abdominal organs by palpation having probed and prodded and palpated that tortured flesh until it was as familiar as his own—Styron Handle (see also handle, treat) implies a laying of the hands or fingers upon so as to get the feel of a thing, or a taking up into the hands so as to determine its qualities (as of weight, condition, or finish) by the sense of touch she insists upon handling cloth before she buys it handle this fur and feel its term is often used when the action is clumsy or offensive the inspectors pawing through his papers, consulting dusty books of regulations—W. S. Burroughs kept trying to kiss and hug and paw her Wouky

Ana

examine, inspect, scrutinize: investigate (see corresponding noun at inquiry) *affect, influence, impress, strike, sway

Ana

Ana

arouse, *stir: excite, stimulate, quicken (see provoke): *injure, harm, damage, hurt, impair

3 approach, rival, *match, equal

Touch

vb 2 *touch, tremble, quake, quaver, quiver, shiver, shudder, wobble, teeter, shimmy, dither

Ana

rock, agitate, *shake, convulse: sway, *swing, fluctuate, oscillate, waver

2 *reel, stagger, whirl

Ana

*stumble, lurch, blunder, flounder, trip
contact with another, but in general it implies little more than an appreciable trace (in the air was a touch of frost—Galsworthy) (he was a very active lad, fair-haired, with a touch of the Dane or Norwegian about him—D. H. Lawrence) (occasionally the wrinkled serenity of her face became a touch grim—Styron) 

Suggestion implies an outward sign that is just enough to give one a hint or an inkling of the presence or existence of something he voice conveyed a suggestion of fear) (the taste of the fowl delicately dominant over the tart suggestion of Burgundy—Wouk) 

Suspicion and soupçon differ little from suggestion, but they tend to imply a fainter trace requiring more delicate perception or evoking less certainty (tea with a suspicion of brandy) (add a soupçon of red pepper) (just a suspicion . . . of saturnine or sarcastic humor—A. W. Ward) (a soupçon of army rank had slipped . . . insistently into his voice—Salinger) 

Tincture, tinge, and shade are terms used primarily in describing color. Tincture and tinge usually imply an admixture with something that gives the thing affected a faint cast or an appearance suggestive of a lightly suffused coloring (what he said had plausibility and perhaps a tincture of sincerity—Hackett) (both young men were Whigs of a radical tincture—Current History) (a subjective tinge entered into the nineteenth-century description of nature—Jeans) (eyes that . . . had some tinge of the oriental—Edmund Wilson) 

Shade implies enough of a trace to suggest the smallest possible degree of some quality; it usually derives its implications from the meaning of shade as a gradation in the darkening of a color (he smiled; in that smile there was a shade of patronage—Galsworthy) (eyes that were too small and a shade too close together—Dahl) (the distinction between French plums and stewed prunes is . . . not to be overlooked by those sensitive to these nice shades—Sackville-West) 

Smack, spice, and dash are used primarily in relation to the stimulation of the sense of taste. Smack suggests a trace which is pronounced enough or decided enough for one to savor it (the Saxon names of places, with the pleasant, wholesome smack of the soil in them—Arnold) 

Spice and dash suggest a slight admixture or infusion, especially such as gives zest, relish, or pungency (there was a spice of obstinacy about Miss Dale—Trollope) (a king of England should have a spice of the devil in his composition—Smollett) (he is a man with a dash of genius in him—Arnold) (his ancestry was chiefly English, with some Scotch and a dash of both French and Dutch—Kellogg) 

Vein, strain, and streak all suggest linearity and imply continuity though not necessarily evident continuity to the thing, usually a quality or condition, so designated. Vein applies to a trace that runs through a personality, a work, or a movement in the manner of a vein so that it lies below or within the substance or character of the thing as a whole and occasionally shows on the surface or crops out (in Swift he discovered an inimitable vein of irony—Johnson) (he had always had a vein of childish obstinacy—M. E. Freeman) 

Strain and streak can both denote a distinctive characteristic that runs through and modifies the whole of which it is a part (throughout the speech . . . ran a curious strain, as though he himself were dazed at the fix he had got himself into—Shirer) (They are used especially of a personal characteristic that is clearly distinguishable from or even contrasts sharply with the rest of one's qualities (a strain of eccentricity, amounting in some cases almost to insanity—L. P. Smith) (the streak of extreme stubbornness . . . was both his strength and his misfortune—Galbraith) (a streak of Indian blood in him—Long) 

Adj *trace, vestige: contamination, pollution, defilement, tainting (see corresponding verbs at CONTAMINATE): *impression, impress, imprint, stamp, print 

Touching affecting, *moving, impressive, poignant, pathetic 

Ana *tender, responsive, sympathetic, compassionate: *pitiful, piteous, pitiable

Ana test, proof, trial, demonstration (see under PROVE) 

Touchy *irascible, choleric, splenetic, testy, cranky, cross 

Ana *irritable, fractious, snappish, waspish, peevish: captious, caviling, faultfinding, carping (see CRITICAL) 

Ant imperturbable 

Tough tenacious, stout, sturdy, *strong, stalwart 

Ana resisting or resistant, withstand, opposing (see corresponding verbs at RESIST): *firm, hard: intractable, refractory, recalci- 

trant, headstrong (see UNRULY): dogged, pertinacious, *obstinate, stubborn 

Ant fragile 

tour n 1 shift, trick, turn, *spell, stint, bout, go 2 *journey, voyage, trip, cruise, expedition, jaunt, excursions, pilgrimage 

tow vb tug, haul, hale, *pull, draw, drag 

tower vb mount, ascend, soar, rocket, *rise, arise, levitate, surge 

toxic *poisonous, venomous, virulent, mephitic, pestilential, mesiasmic, mesiasmatic, miasmal 

Toxin *poison, venom, virus, bile 

toy vb *trifle, dally, flirt, coquet 

Ana *play, sport, disport, frolic: fondle, *caress, pet, cosset, cuddle, dandle 

Trace n Trace, vestige, track can all mean a visible or otherwise sensible sign left by something that has passed or has taken place. Trace basically applies to a line (as of footprints) or a rut made by someone or something that has passed (follow the traces of a deer through the snow) (the clear trace of a sleigh) (when the hounds of spring are on winter's traces—Swinburne) (The term is often extended to suggest a mark, whether material or immaterial, that is evidence of something that has happened or has influenced a person or thing (the child carefully removed the traces of jam from his mouth) (would tell him they had detected in the book some slight traces of a talent which . . . could be schooled to produce, in time, a publishable book—Wolfe) (the stimulation of violent emotions may leave permanent traces on the mind—Inge) 

Vestige may be preferred to trace when the reference is to something that remains or still exists to give evidence of or testimony to the existence of something in the past; it often applies to remains (as a fragment, a remnant, or a relic) that constitutes a tangible or sensible reminder of what has gone before (of this ancient custom no vestige remained—Gibbon) (the vestiges of some knowledge of Latin still appear . . . in his sentences—The Nation) (some embryonic organs neither disappear nor take on permanent function, but rather persist throughout life as vestiges—Arey) (a remote outpost, with only a vestige of its former commerce in livestock—P. E. James) 

Track has come to be used more often than trace in the sense of a line of perceptible marks, especially in hunting, where it also may mean the scent followed by the hounds, and in geology, where it usually means a line of fossilized footprints (the hounds are on the track of the fox) (the track of a dinosaur) (he could just discern the marks made by the little feet on the virgin snow, and he followed their track to the furze bushes—George Eliot) 

Ana *sign, mark, token 

Trace vb *sketch, outline, diagram, delineate, draft, plot, blueprint 

Ana copy, duplicate, reproduce (see corresponding nouns at reproduction): map, chart, graph (see under chart n)
track n *trace, vestige

trade n 1 Trade, craft, handicraft, art, profession are general terms which designate a pursuit followed as an occupation or means of livelihood and requiring technical knowledge and skill. Trade is applied chiefly to pursuits involving skilled manual or mechanical labor and the management of machinery or tools (the trade of a carpenter) a blacksmith's trade. He is a plumber by trade. Craft is not always clearly distinguished from trade, but it tends to be used of those pursuits that involve not only manual or mechanical labor but allow more or less freedom for the exercise of taste, skill, and ingenuity; many of the crafts were once or are still carried on independently in the small shop or home; thus, weaving, tailoring, and goldsmithing are often spoken of as crafts; the village shoemaker practised a craft, but the laster in a modern shoe factory follows a trade. Handicraft implies handwork and usually suggests dexterity in manipulation of instruments or of materials; in comparison with craft it tends to imply more definite independence from machinery and it more often applies to an activity carried on for other than purely economic reasons; thus, basket-making, embroidery, lacemaking, and bookbinding are handicrafts when carried out with the use of simple hand tools whether the products are primarily a source of livelihood or not. Art as applied to an occupation (compare art 1) implies the use of knowledge and skill by the practitioner and often comes very close to craft in such phrases as the manual arts, industrial arts, household arts, practical arts. But art, when unqualified, usually designates one of the creative pursuits (as painting or sculpture) that, whether practised as an occupation or an avocation, involve an elaborate technique, great skill, definite ends to be achieved, and the possession and exercise of highly personal creative judgment and taste. Further, art is so freely applicable to the general principles or underlying system of rules, methods, and procedures on which a trade or craft, or a creative pursuit, or a branch of learning or doing, or an aspect of human affairs is based, that it is often difficult, apart from the context, to determine whether the word denotes a pursuit or a technique (the art of navigation) the art of interior decorating (dancing as an art, a profession, an amusement—Ellis) the art of self-defense—Shaw. Literature is an art and therefore not to be pondered over, but practiced—Quiller-Couch. Profession is, in general, applied only to a pursuit that requires prolonged study and training before one is ready to follow it as a means of livelihood; the term also often implies that one has undergone tests of one's fitness and has won a degree or has given proof of one's qualifications and has been licensed to practice; it often also implies devotion to an end other than that of personal profit or the earning of a livelihood (law, medicine, architecture, and teaching are profession).
transfiguration transformation, metamorphosis, transmutation, conversion, transmogrification (see under TRANSFORM)

**transfiguration**

**transform, metamorphose, transmute, convert, transmogrify**

An *exalt, magnify: heighten, enhance, "intensify* transfiguration transformation, metamorphosis, transmutation, conversion, transmogrification (see under TRANSFORM)

**transfiguration**

**transform, metamorphose, transmute, convert, transmogrify** can all mean to turn or change one thing into another or a different thing or from one form into another and different form. In general, the same differences in implications and connotations are observable in the corresponding nouns transformation, metamorphosis, transmutation, conversion, transmogrification, transfiguration. Transform may imply a mere changing of outward form or appearance (a Hunter senior *transformed* into a bride floating in a white brilliant mist, on the arm of an awkward trapped-looking young man—Wouk) (the placid sunshine... seems to have been transformed in a moment into impenetrable angry fire—Pater) or it may imply a basic changing of character, nature, or function (electrical energy into light) (to Samarcand... we owe the task of transforming linen into paper—Newman) (the task of transforming a heterogeneous selection of mankind into a homogeneous nation—Russell) (too much organization transforms men and women into automatas—Huxley). Metamorphose may add implications not often present in transform such as that of a supernaturally or magically induced change (men were by the force of that herb *metamorphosed* into swine—Steele) or of a fundamental change in structure and habits that characterizes the development of some forms of animal life (the caterpillar is a larva which finally *metamorphoses* into a butterfly or moth) or of a transformation specifically induced by chemical or physical agencies (rocks *metamorphosed* by heat). In more general use the term carries a much stronger implication than transform of an abrupt, startling, or violent change (the little song... later *metamorphosed* into one of the noblest chorales—P. L. Miller) (a convention of maidenly modesty has *metamorphosed* many a fine woman into an embittered, disillusioned old maid—Kyne) (if you deny man his intelligence, you *metamorphose* him into a machine). Transmute usually suggests a fundamental change, especially one involving a metamorphosis of a lower element or thing into a higher one (a simple romantic narrative transmuted by sheer glor or beauty into a prose poem—Galsworthy) (Shakespeare, too, was occupied with the struggle—which alone constitutes life for a poet—to *transmute* his personal and private agones into something rich and strange, something universal and impersonal—T. S. Eliot) (in order to transmogrify can all mean to turn or change one thing into another or a different thing or from one form into another and different form. In general, the same differences in implications and connotations are observable in the corresponding nouns transformation, metamorphosis, transmutation, conversion, transmogrification, transfiguration. Transform may imply a mere changing of outward form or appearance (a Hunter senior *transformed* into a bride floating in a white brilliant mist, on the arm of an awkward trapped-looking young man—Wouk) (the placid sunshine... seems to have been transformed in a moment into impenetrable angry fire—Pater) or it may imply a basic changing of character, nature, or function (electrical energy into light) (to Samarcand... we owe the task of transforming linen into paper—Newman) (the task of transforming a heterogeneous selection of mankind into a homogeneous nation—Russell) (too much organization transforms men and women into automatas—Huxley). Metamorphose may add implications not often present in transform such as that of a supernaturally or magically induced change (men were by the force of that herb *metamorphosed* into swine—Steele) or of a fundamental change in structure and habits that characterizes the development of some forms of animal life (the caterpillar is a larva which finally *metamorphoses* into a butterfly or moth) or of a transformation specifically induced by chemical or physical agencies (rocks *metamorphosed* by heat). In more general use the term carries a much stronger implication than transform of an abrupt, startling, or violent change (the little song... later *metamorphosed* into one of the noblest chorales—P. L. Miller) (a convention of maidenly modesty has *metamorphosed* many a fine woman into an embittered, disillusioned old maid—Kyne) (if you deny man his intelligence, you *metamorphose* him into a machine). Transmute usually suggests a fundamental change, especially one involving a metamorphosis of a lower element or thing into a higher one (a simple romantic narrative transmuted by sheer glor or beauty into a prose poem—Galsworthy) (Shakespeare, too, was occupied with the struggle—which alone constitutes life for a poet—to *transmute* his personal and private agones into something rich and strange, something universal and impersonal—T. S. Eliot) (in order to transmute energy to higher and more subtle levels one must first conserve it—Henry Miller) (Convert carries a slighter suggestion of change in kind, nature, or structure than the preceding terms but a stronger one of such changes in details or properties as fit something for a given use or function or for a new use or function (*convert iron into steel*) (nature *converts* the fallen trunks of trees into coal) (having conducted their lame guest to a room in the Georgian corridor hastily *converted* to a bedroom—Galsworthy) (every possible industry was *converted* to produce war goods—Morris Sayre) (that a new seam of richest material has been opened up and that poets are learning how to *convert* that raw material to their own uses—Day Lewis) Transmogrify implies a thorough-going metamorphosis that is often grotesque, bewildering, or even preposterous (see Social life and Glee sit down, all joyous and unthinking, till, quite transmogrified, they're grown Debauchery and Drinking—Burns) (wondering how the caricatured capitalism of his forebears can be transmogrified into a harmonious... way of life—Current Biol.) (the classical heroes and heroines were transmogrified by medieval knights and ladies—Lowes) Transfigure is often interchangeable with transform or metamorphose (her face was transfigured by uncontrollable passion—Bennett) but more typically it suggests an exaltation or glorification of the outward appearance (Jesus... was transfigured before them: and his face did shine as the sun—Mt 17:1-2) (if she be guilty, 'twill transform her to manifest deformity... if innocent, she will become transfigured into an angel—Shelley) (the moment when good verse... is transfigured into a thing that takes the breath away—Day Lewis) *Ana* *change, alter, modify, vary* transformation metamorphosis, transmutation, conversion, transmogrification, transfiguration (see under TRANSFORM)

**transfiguration**

**transient**

*change, alteration, modification, variation (see under CHANGE vb): evolution, *development* transgression trespass, violation, infraction, *breach, infringement, contravention

**transfiguration**

**transient adj** Transient, transitory, passing, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived are comparable when they mean lasting or staying only for a short time. Transient and transitory are often used as if they were interchangeable; but transient more frequently applies to what is actually short in its duration or stay (the summer hotel does not take transient guests) (transient sorrows—Wordsworth) (an ancient folk tradition whose transient resting-place was the Bronx—Geismar) and transitory, like its close synonym passing, to what is by its nature or essence bound to change, pass, or come to an end sooner or later (objects of sense... are transitory and ephemeral—Thilly) (wise men will apply their remedies to... the causes of evil which are permanent, not to... the transitory modes in which they appear—Burke) (a passing fancy) (the confounding of the Passing with the Permanent—Austin) Ephemeral may imply existence for only a day (ephemeral insects) (ephemeral flowers) In extended use, it implies marked shortness of life or of duration (as of influence or appeal) (jazz is perishable, ephemeral, elusive—Ballett) Momentary implies duration for a moment or a similar very short time (a momentary irritation—Hardy) Fugitive and fleeting apply to what passes swiftly, and is gone; but fugitive carries a stronger implication of the difficulty of catching or fixing (oh joy!... that nature yet remembers what was so fleeting—Austin)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
transitory 831 trap

gitive!—Wordsworth) \(\textit{both crucifix and river . . . offered contentment and poignant, fugitive hints of another world—Styron}\) and fleeting, of the impossibility of holding back or restraining from flight \(\textit{a calm and studious expression, but touched with a curious, fleeting light of triumph—Styron}\) \(\textit{a fleeting wisdom told her that . . . one does not love another for his good character—Hervey}\) Evansean
t implies momentariness, but it stresses quick and complete vanishing, and it usually connotes a delicate, fragile, or airy quality \(\textit{Evanescent visitsations of thought and feeling . . . arising unforeseen and departing unbidden—Shelley}\) \(\text{all was unstable; quivering as leaves, evanescent as lightning—Hardy}\) \(\text{it is poetry of the most evanescent type, so tenuous in thought and feeling that only the most \textit{exquisite\} dict can justify its perpetuation in cold print—Grant
dge}\) Short-lived implies extreme brevity of life or existence often of what might be expected to last or live longer \(\textit{Short-lived fame}\) \(\textit{their satisfaction was short-lived}\) \(\textit{trade unions have pressed their demands regardless of the fact that sellers’ market conditions would be short-lived—The Scotsman}\) \(\text{Ant} \textit{perpetual — Con} \textit{*lasting, permanent, perdurable, stable, durable}\)

transitory \*transient, passing, ephemeral, momentary, fugitive, fleeting, evanescent, short-lived \(\text{Ant} \textit{everlasting}; \textit{perpetual}\)

translation, version, paraphrase, metaphor can all denote a restating in intelligible language of the meaning or sense of a passage or work or the passage or work that is the product of such a restatement. Translation implies a turning from one language into another \(\text{English translations of the Bible}\) \(\text{a literal translation}\) \(\text{translation is an art that involves the re-creation of a work in another language, for readers with a different background—Malcolm Cowley} \textit{Version} (see also ACCOUNT 2) may be used in place of \textit{translation} especially to imply a rendering that adheres rather to the spirit than to a literal translating of the original \(\text{the year 1632 saw a complete version of the Aeneid by Vicars—Conington} \textit{but often it is used to denote one of the translations of a given work, and especially of the Bible (the Authorized or King James Version) (the Douay Version} is used by English-speaking Roman Catholics) \textit{Paraphrase} may apply to a very free translation the purpose of which is to present the meaning rather than the phrasing of a passage or work \textit{a translation must be a paraphrase} to be readable—FitzGerald\)

It may apply also to an imitation with enough changes to obscure its indebtedness to an original in another tongue \(\text{[Latin] plays which were not paraphrases from the Greek—Buchan}\) Commonly, however, the term denotes a free, amplified, and often, interpretable rendering of the sense of a difficult passage in the same language \(\text{write a paraphrase of Milton’s Lycidas}\) \(\text{paraphrases of the Psalms in the Authorized Version}\) \textit{Metaphrase} is occasionally used by learned writers to denote a translation that is almost slavishly faithful to the original \(\text{is often called a \textit{literal translation}}\) to distinguish it from a \textit{paraphrase}\) or free translation \(\text{the way I have taken [in a translation of the Aeneid] is not so straight as \textit{metaphrase}, nor so loose as \textit{paraphrase—Dryden}\}

translucent lucid, pellucid, diaphanous, limpid, \*clear, transparent \(\text{Ana} \textit{luminous, radiant, brilliant, effulgent, \*bright: iridescent, opalescent, \*prismatic}\)

she calls their privacy—Basso—

Ana *intrude, obtrude, interlope, butt in: interfere, intervene, interpose

**trial** 1 test, proof, demonstration (see under PROVE)

Ana inspection, examination, scanning, scrutiny (see under SCRUTINIZE): *process, proceeding, procedure

2 **Trial, tribulation, affliction, visitation, cross** are comparable when they denote suffering, misery, or unhappiness regarded as an infliction which cannot be escaped or avoided. **Trial** implies a trying (as of one's endurance, patience, self-control, courage, or power to resist temptation). The word is applicable not only to distressing situations or conditions but to persons or things that cause distress or annoyance (the trials and tribulations of traveling over desert—T. D. Clark) he has always been a trial to his parents (hotels are a trial of both spirit and flesh—Peffer) **Tribulation**, when not completely interchangeable with trial, heightens the emphasis on the suffering or anguish involved in trial (out of this time of trial and tribulation will be born a new freedom and glory for all mankind—Sir Winston Churchill) and often connotes divinely permitted suffering as a test of virtue (the just shall . . . after all their tribulations long, see golden days—Milton) **Affliction** stresses the implication of imposed suffering that challenges one's powers of endurance; the term need not suggest a relation between suffering and deserts (if severe afflictions borne with patience merit the reward of peace, peace ye deserve—Wordsworth) the dark and senseless afflictions of a night—in—Kenneth Roberts) **Visitation** heightens the implications of affliction by stressing the severity of suffering and by suggesting an ordeal; distinctively it often connotes retribution or retributive justice (many people regarded the disastrous flood as a visitation) woe unto them! for their day is come, the time of their visitation—Jer 1:27) **Cross** in its applications closely parallels trial and tribulation but it may differ from them in its implications of suffering accepted and borne for the sake of a larger, unselfish good rather than as a test of character (leaving her . . . solemnly elate at the recognition of the cross on which she must agonize for the happiness of some other soul—Deland) the word often directly alludes to the words of Jesus to the rich young man: “Come, take up the cross, and follow me” as recorded in the Gospel according to Mark, or to his own carrying of the cross to the place of his crucifixion.

Ana *distress, suffering, misery, agony: *sorrow, grief, anguish, woe, heartbreak: *misfortune, adversity: *difficulty, hardship, vicissitude, rigor

**tribulation** **trial, affliction, visitation, cross**

Ana oppression, persecution, wrongdoing or wrong (see corresponding verbs at wrong): *sorrow, grief, anguish, woe: *distress, suffering, misery, agony

Ant consolatory

**tributary** adj *subordinate, secondary, dependent, subject, inferior, collateral

Ana conquered, vanquished, subjugated, subdued (see conqueror): *auxiliary, subsidiary, ancillary, adjuvant, contributory

**tribute** n *encomium, eulogy, panegyric, citation

**trick** n 1 Trick, ruse, stratagem, maneuver, gambit, ploy, artifice, wile, feint are comparable when they mean an act or an expedient whereby one seeks to gain one’s ends by indirectness and ingenuity and often by cunning. **Trick** implies cheating or deceiving and often evil intention (tricks and devices to conceal evasions and violations of ethical principles—Wagner) she could not be entirely sure that . . . he was not after all merely using a trick to get rid of her—Bennett) The word may, however, imply nothing more than roguishness or playfulness and be used to designate an antic, a prank, a practical joke, or a harmless hoax (the brothers often pull one another’s legs on their sisters) the tricks of the clowns in a circus

It may also be applied to a dexterous device or contrivance that pleases, persuades, deludes, or evokes surprise or wonder (an auctioneer who knows all the tricks of his trade) the illusion in the theater is often accomplished by tricks of lighting (that idle trick of making words jingle which men of Nuflo’s class in my country so greatly admire—Hudson) **Ruse** implies an attempt to give a false impression (as by diverting others’ attention from one’s real purposes or by making what is untrue seem true) her “falling” through the glass skyscraper . . . must be construed by him as a form of reckless intrepidity, the hardened ruse of a dyed-in-the-wool newspaper woman—Purdy) a favorite ruse of the opium smugglers was to insert a hypodermic needle into an egg, withdraw carefully all the albumen and then refill the cavity with opium—Heiser) **Stratagem**, though commonly applied to a ruse by which an advantage is gained over an enemy (as by outwitting or surprising him), is not restricted to military operations; in extended use it implies a clear objective such as entrapping or circumventing and a more or less elaborate plan for achieving one’s end (on our guard against the stratagems of evil rhetoric—R. M. Weaver) some women . . . are driven to every possible trick and stratagem to entrap some man into marriage—Shaw) M. Weaver usually suggests tactics or handling and employing of troops or ships for the accomplishment of definite ends. In extended use it commonly implies adroit or dexterous manipulation of persons or things (the Longbourn party were the last of all the company to depart, and, by a maneuver of Mrs. Bennet, had to wait for their carriage a quarter of an hour after everybody else was gone—Austen) It may, however, be applied to a single strategic move comparable to one in a game of chess (unless indeed, all her talk of flight had been a blind, and her departure no more than a maneuver—Wharton) **Gambit** in chess denotes an opening that risks a pawn or minor piece to gain an advantage in position; in extended use it can apply to a device that is intended or serves to launch a conversation (opened, safely as I thought, with the gambit of inquiring whether present conditions were satisfactory—Jeremy Potter) he could not, if he had pondered conversational gambits for an hour, have hit on a more successful one—Day Lewis) always carried turtle eggs in his pockets and bounced them on bars as a conversational gambit—Bergen Evans) Perhaps more often the advantage-gaining aspect of the basic meaning of gambit is stressed, and the term is applied to a trick or tactic designed to gain its user a competitive advantage often by harassing or embarrassing an opponent (from the Russian point of view it is no mere diplomatic gambit to keep Germany weak and disunited: it is a doctrine of defense—Harold Nicolson) if a stranger just ahead drops a rose, don’t take it, unless opening gambit of the oldest trick in the world—Aldor) to avoid the multitude of taxes and assessments, the standard gambit of the peasant was to “dress poor” and “talk poor”—Idzerda) nobody could be sure whether his anti-market talk was real, or simply a Gaullist gambit designed to enhance the French bargaining position—Scheingold) **Ploy** carries a suggestion of finesse and often of roguishness and can come very close to the last-mentioned value of gambit (this summer’s ploy in the game of oneupmanship, is to holiday in Europe without doing the great museums. . . little out-of-the-way museums and provincial churches are admissible. But to
score special points one must visit really distinguished colle-
ctions in private houses—Genauer (perhaps the most
collected in modern money at annual meetings is im-
portant ideas on how the business should be run—Wall
Street Jour. or it can be used of an individual maneu-
ver in the development of a gambit (subplots or in-
dividual maneuvers of a gambit are usually referred to as
plays—Stephan Potter) However in their common con-
joined use gambit and play are seldom distinguishable
(demonstrates his Gamesmanship technique for inducing
embarrassment and discomfort, and offers plays and
gambits for use against such rivals as fishing companions,
wine experts, and fellow club members—New Yorker)
among the plays and gambits the President may have used
in the process were the White House breakfast... the
fireside chat... the press conference... the dangled
patronage—Rossiter) Artifice suggests the employment
of devices or contrivances; it usually connotes ingenuity,
but it need not connot an intent to deceive or overreach
(by the artifices by which friends endeavor to spare one
another’s feelings—Shaw) (he was witnessing a remark-
able performance? No! show of artifice... but a genuine
creative effort—Hervey) Wile usually suggests an attempt
to entrap or ensnare by allurements or by false and
deceptive appearances; it may connote slyness and im-
posture, but it often suggests coquetry or an attempt to
calm (the Devil was helping him and made him sly and
foxier than the fox with all the wiles, and the cunning,
and the craftiness—Fareley) (he was no longer a mild old man
to be worked on by the wiles of engaging youth, but a
stern-spoken person in high authority—Archibald Mar-
shall) Feint basically applies to a thrust (as of a rapier or a fist) seemingly directed at one part of an opponent’s
body but actually designed to divert his attention and his
guards away from the part at which it is really aimed. In
extended use the term commonly implies the employment
of a stratagem or maneuver which distracts attention from
one’s actual intention until it is accomplished (I love to
think the leaving us was just a feint—Browning) (smiled
a little embarrassedly at his colleague who, whether in
feint or truth, was too occupied to take a part—Terry
Southern) (believed the dropping of parachutists was
merely an Allied feint to cover their main landings—Shirer)
Ana *imposture, deceit, deception, counterfeit, humbug, fake, cheat, fraud; *fun, jest, sport, game, play

*misleading, delusory: deceitful, dishonest
tried *reliable, dependable, trustworthy, trusty
Ana staunch, steadfast, constant, *faithful: proved, demonstrated, tested (see PROVE)
trifle, toy, daily, flirt, coquet can all mean to deal with a
person or thing without seriousness, earnestness, close
attention, or purpose. Trifle, the most comprehensive
term of the group, may be used interchangeably with any
of the others, implying any of such varied attitudes as
playfulness, unconcern, indulgent contempt, or light
amorosity (dabbled in poetry, delivered ironical orton-
does... trifled with some of the radical doctrines then
current—Lerner) (knows when to be serious and when to
trifle, and he has a sure tact which enables him to
trifle with gracefulness and to be serious with effect—Newman)
she began to trifle with plans of retirement, of playing
in Paris, of taking a theatre in London, and other whims
—Shaw) Toy implies a dealing with a person or thing
in a way that keeps one pleasantly occupied but does not
engage one’s full attention or evoke serious intention
(since Plutarch, innumerable hands have toyed with his
historical biography, but not until our time has it become
perfected as an art form—Mandel) (he lapsed into be-
om observer of life, toying on the margin of women
and politics—Lowenthal) (there is evidence that Au-
gustus, like Julius, toyed with the idea of giving the
Assemblies greater power and making them representa-
tive of the whole body of citizens in Italy—Buchan)
Daily stresses indulgence in something (as thoughts or
plans) as a pastime or amusement rather than as leading
to something definite or serious; it usually retains some
hint of deliberate dawdling, the notion predominant in anoth-
er’s senses (dallied with him, and liked him well enough,
but there was a certain glittering catch on her horizon—
Kathleen Fitzpatrick) Poetry... is not a mere exercise in
fancy, not a dallying with pretty little nothings—
Kilby (for so, to interpose a little ease, let our frail
thoughts dally with false surmise—Milton) Flirt, which
in several of its senses implies quick Jerky movement,
in this extended use stresses vagrancy and superficiality
of interest, attention, or liking and often a tendency to
pass heedlessly from one person or concern to another
(German leaders were flirting with the idea of a deal
with Russia—Time) (the bright young people flirting
with new isms—O’Hearon) (afraid to have either war or
peace with the enemy, we flirt with both prospects—
Ascoli) Coquet primarily refers to a trifling in love,
such as is characteristic of a flirtatious woman (she
coquettied with the solid husbands of her friends, and
with the two or three bachelors of the town—Dorothy
Parker) but it is also used in reference to things which catch one’s
interest but with which one will not come fairly to terms
(there were none of those external indications of Christ-
mas which are so frequent at “good” Jewish houses...Mrs. Henry Goldenst did not countenance these coquet-
tings with Christianity—Zangwill)
Ana palter, fib, equivocate, prevaricate, *lie: waver,

cease-fire permanent—*U. N. Bulletin*) but more often it implies a cessation of hostilities for an indefinite period of time with the warring parties, typically in a state of military readiness, remaining in the positions they held at the time hostilities ceased or withdrawing a short distance to create a demilitarized zone and without the implication of a permanent peaceful settlement (the fighting should be stopped by an armistice agreement. A cease-fire leaving opposing forces where they now are would be unsatisfactory—*Tillman Durdin*) (press for a reduction in the military strength of the parties holding the cease-fire line—*U. N. Background Papers*) Cease-fire may additionally suggest the intercession of a neutral party in securing the cessation of hostilities (had two weeks in which to persuade Nationalists and Communists to quit shooting at each other before sitting down together; he arranged a cease-fire just 30 minutes before the conference began—*Time*) (cease-fire arrangements by the United Nations—*Landis*) and in supervising its observance (contribute contingents to the United Nations for...the supervision of agreed cease-fires—*Munro*) Armistice (in full, general armistice) basically applies to a formal agreement at the highest level for the laying down of arms and a suspension of military operations; though it does not ordinarily suggest a permanent state, it does commonly imply one that persists either indefinitely or until termination of hostilities by a peace treaty (can armistice is a written agreement, usually between the highest authorities of the warring powers, which suspends military operations for a definite or indefinite period of time....A General Armistice is broader in scope, embodying both military and political principles and usually precedes peace negotiations—*Coast Artillery Jour.*) (no treaty followed the armistice, which was never more than an imperfect cease-fire—*Liebling*) But sometimes armistice (in full, local armistice) applies to a merely local or temporary suspension and is then indistinguishable from truce in a similar sense (an armistice is an agreement for the general cessation of active hostilities between two or more belligerents. Distinguished from general armistices are arrangements for a short-term or partial suspension of arms called local armistice or truce which may be made between commanders in the field, for a variety of purposes such as burying the dead. General armistices are made by commanders in chief, usually pursuant to political decision of the governments concerned. An armistice does not put an end to the state of war—*Gross*) In its occasional extended use armistice usually stresses the temporariness and uncertainty of the state (he had learned to live in the land and had established an uneasy armistice between himself and the hostility of rocks and elements—*Mowat*) Peace (compare peaceable and peaceful under Pacific) can denote a state of mutual concord between governments or more specifically the state resulting from the termination of hostilities (if ever there is to be a peace which is not an armistice, men must learn to live at least as well as they now know how to die—*J. M. Brown*) (today there is a truce in Korea. After 3 years of hostilities, we are now in the first year of an armed peace—*Eisenhower*) or it can apply to an agreement by which such a state is attained (the purpose of some overtures, it could be foreseen, would be to test out Allied solidarity by offering a tempting separate peace to one or the other—*Feis*) (the severely punitive peace...which the Allies attempted to impose upon Turkey—*Kennan*) Unlike the other terms to truce imputes permanence or an intention of permanence to the state of or the agreement for suspension of hostilities (Adler says flatterly that there can be no peace between sovereign states; at best there can be nothing more than an uneasy "truce," a period of jockeying and diplomatic cheating preliminary to the next outbreak of armed conflict—*Time*)

Turn vb 1 Turn, revolve, rotate, gyrate, circle, spin, twirl, whirl, wheel, eddy, swirl, pirouette can all mean to go or move or cause to go or move in a circle. Turn is a general rather colorless word implying movement in circle after circle or in a single full circle or through an arc of a circle. It is interchangeable with most of the other terms in their less specific uses (a wheel turning on its axle) (turned to speak to his friend) Revolve may suggest regular circular motion on an orbit around something exterior to the item in question (the earth revolves around the sun) It may refer to the dependence of the less important, the secondary, on something cardinal or pivotal which resolves or determines (though local questions, such as the State Bank and state aid to railroads, gave rise to sharp contests, politics usually revolved around national questions—A. B. Moore) (everything in that house revolved upon Aunt Mary—Deland) Rotate is likely to suggest a circular motion on an interior axis within the thing under consideration which may be not moving otherwise (the earth rotates on its axis while it revolves in its orbit) Gyrate may suggest the regularity of revolve, but it is more likely to be used to indicate a fluctuating or swinging back and forth which describes circular or spiral patterns (stocks gyrated dizzyly on uncertainty over the foreign situation—Wall Street Jour.) (a low cloud of dust raised by the dog gyrating madly about—Conrad) Circle basically applies to a movement around in a more or less circular pattern, but it can also be used with reference to a lack of straight directness in a winding course (a flock of black ibises circled high overhead wheeling endlessly on the ascending air currents—Dillon Ripley) (the essayist's license to circle and meander—Wood) or, specifically, to a curved or arched course followed in avoiding something (the soldiers were circling homewards in high spirits at a safe distance from the war area—Walm) Spin implies rapid sustained rotation on an inner axis or fast circling around an exterior point (he who but ventures into the outer circle of the whirlpool is spinning, ere he has time for thought, in its dizzy vortex—Bayard Taylor) Twirl can add to the ideas of spin those of dexterity, lightness, or easy grace (this book...I toss in the air, and catch again, and twirl about—Browning) Whirl stresses force, power, speed, and impetus of rotary or circular motion (and collections of opaque particles whirled to shore by the eddies—Bartram) (the withered leaves had gathered violence in pursuit, and were whirling after her like a bevy of witches—Glasgow) Wheel may suggest either going in a circular or twisted course or turning on an arc or curve to a new course (a familiar sight is the turkey vulture wheeling against the skies to the north—Amer. Guide Series: Ariz.) (she had crossed the threshold to the porch, when, wheeling abruptly, she went back into the hall—Glasgow) Eddy suggests the circular movement, sometimes fast, sometimes slow, of an eddy; it may be used in situations involving direction, futility, or collision from main currents (as the smoke slowly eddied away—Crane) (the dead leaves which edded slowly down through the windless calm—West) (waves of friends and reporters eddied through the... . . . apartment—Time) Swirl suggests more rapidity, flow, or graceful attractiveness than eddy (further than ever comet flared or vagrant star dust swirled—Kipling) (the black water was running like a millrace and raising a turbulent coil as it swirled and tossed over the ugly heads of jutting rocks—Costain) (her dark hair swirled about her face—Helen Howe) Pirouette suggests the light graceful turning of a ballet dancer (ashes pirouetted down, coquetting with young beeches—Tennyson)

Ana *swing, oscillate, vibrate, fluctuate, pendulate, undulate

2 Turn, divert, deflect, avert, shear are comparable when they mean to change or cause to change course or direction. Turn is the most comprehensive of these words and the widest in its range of application. It may be used in reference to any change in course or direction of something movable, no matter how small or how large an arc is traversed, but it usually requires qualification (here the river turns slightly to the north) (the turn of the car just in time to avoid a collision) (the force of the impact turned the boat completely around) It may also be used in reference to something (as things that show a drift, a bent, or a tendency or persons or things that can respond to an influence) which follows a figurative course or proceeds in a definite direction (turn the conversation to livelier topics) (turn public opinion against a person) (turn an enemy into a friend) (even the younger men had turned against me—Yeats) (in his need his thoughts turned to the sea which had given him so much...congenial solitude—Conrad) Divert may be preferred to turn when there is an implication of an imposed change in an existent or a natural course or direction (divert a river by providing a new channel) (the unfounded belief that a lightning rod is capable of diverting lightning from a building it is about to strike) (the machinery of our economic life has been diverted from peace to war—Attlee) When used in reference to a person's concerns (as thoughts, interests, attention, or intentions) it often presupposes mental concentration, fixity of attention, or resoluteness of purpose; therefore, when an attempt to alter the situation (as by distracting, dissuading, or sidetracking) is to be suggested, divert is the appropriate word (hard to divert his attention when he is engrossed in study) (had I spoke with her, I could have well diverted her interests—Shak) (could France or Rome divert our brave designs, with all their brandies or with all their wines?—Pope) Deflect, in contrast to divert, implies a turning (as by bouncing, refracting, or ricocheting) from a straight course or a fixed direction (deflect a ray of light by passing it through a prism) (deflect a magnetic needle) In its more usual usage it is a reference to thoughts, purposes, or interests that pursue a rigid or clearly defined course or direction; consequently the word sometimes connotes deviation or aberration (he underwent all those things— but none of them deflected his purpose—Bellow) (after
type n 1 *symbol, emblem, attribute
Ana *sign, mark, token: intimation, suggestion (see corresponding verbs at SUGGEST 1): adumbration, shadowing (see corresponding verbs at SUGGEST 2)
Ant antitype
2 Type, kind, sort, stripe, kidney, ilk, description, nature, character are comparable when they denote a number of individuals thought of as a group or class because of one or more shared and distinctive characteristics. Type may suggest strong, clearly marked, or obvious similarities throughout the items included so that the distinctiveness of the group that they form cannot be overlooked (the landforms are related to these rock types—Trueman) (that most dangerous type of critic: the critic with a mind which is naturally of the creative order—T. S. Eliot)
Kind in most uses is likely to be very indefinite and involve any criterion of classification whatever (each kind of mental or bodily activity—Spencer) (their soil yields treasures of every kind—Buck) (the kind of fear here treated of is purely spiritual—Lamb) but it may suggest criteria of grouping dependent natural, intrinsic characteristics (Sinic philosophers conceived yin and yang as two different kinds of matter . . . yin symbolized water and yang fire—Tsaybee) Sort is often a close synonym of kind (the sort of culture I am trying to define—Powys) and may be used in situations having a suggestion of disparagement (the sort of journals put out by the learned societies—New Republic) (Victorianism of a meaner and baser sort—Millett) (what sort of idiots have you got around here?—Long) Type, kind, and sort are usually interchangeable and are used most of the time without attention to special connotations. Stripe and kidney are used mostly of people rather than things; the first may suggest political attitude or affiliation, the second persuasion, disposition, or social level (all Fascists are not of one mind, one stripe—Helmans) (economic dogmatists of whatever stripe—Atlantic) (the crown representative and comptroller, were political appointees; and like many men of that kidney had never done a fair share of the work—Morison) Ilk may suggest grouping on the basis of status, attitude, or temperament (no matter if . . . your ancestors spoke only to Cabots and their ilk—Walker) (one great composer is worth twenty of your ilk—Bella & Samuel Spewack) Description, nature, and character are close synonyms of type and kind mostly in phrases beginning with of. Description may suggest a grouping in which all salient details of description or definition are involved; nature may suggest inherent, essential characteristics rather than superficial, ostensibly, or tentative ones; and character may stress distinctive or individualizing criteria rather than not of this description. They are sometimes resorted to . . . with a single view to commerce—John Marshall) (the few hitherto known phenomena of a similar nature—Amer. Jour. of Science) (until the invention of printing advertising was necessarily of this primitive character—Presbrey)

ubiquitous  *omnipresent
ugly, hideous, ill-favored, unsightly are comparable when they mean contrary to what is beautiful or pleasing especially to the sight. Ugly is the comprehensive term which may apply not only to what is distasteful to the sight but also to the hearing or occasionally to another sense or to whatever gives rise to repulsion, repugnance, dread, or extreme moral distaste in the mind (acres of ugly wooden tenement houses line the drab streets—Amer. Guide Series: Mass.)  *these evenings . . . ended up in a welter of ugly words, tears, misunderstandings—Styron  *it is essential to sweep away in art all that is . . . fundamentally ugly, whether by being, at the one end, distastefully pretty, or, at the other, hopelessly crude—Ellis  *how eager we are to reveal all sorts of . . . ugly secrets about ourselves—Mailer  *life in the moment . . . seemed ugly and brutal—Anderson  *hideous carries an even stronger implication of the personal impression produced by something ugly by stressing the suggestions of induced horror or loathing; it may on occasion be applied to something which, without regard to any surface ugliness, arouses intense personal distaste <an altogether hideous room—expense but cheesy—Salinger  *the papers of the students dismayed me as a hideous revelation of the abysses of noneducation that are possible in the United States—Edmund Wilson  *ill-favored applies especially to the features or to the general aspect or appearance of a person or sometimes an animal that may be described as ugly; the word emphasizes the unpleasing or disagreeable character, so far as the eyes are concerned, but seldom suggests marked distaste, repugnance, or dread <an ill-favored thing, sir, but mine own—Shak.  *a scrappy, ill-favored little girl, always untidily dressed—Mead  *unsightly usually refers to things, especially material things, upon which the eye dwells with no pleasure; it often is used in place of ugly when a connotation of distaste is not strongly marked <their unsightly hovels were not visible from his melancholy old house on the hill—Deland  *an unsightly swamp and dump grounds—Amer. Guide Series: Minn.  *A  *plain, homely: grotesque, bizarre (see FANTASTIC)  Ant beautiful —Con fair, lovely, handsome, pretty, comely, good-looking (see BEAUTIFUL)

ultimate  *1 last, latest, final, terminal, concluding, eventual  *2 Ultimate, absolute, categorical, despite great differences in implications, mean in common so fundamental as to represent the extreme limit of actual or possible knowledge. Something ultimate represents the utmost limit attained or attainable either by analysis or by synthesis <that lofty musing on the ultimate nature of things—Huxley  *the fugue was considered the ultimate vehicle for profound musical expression—Wier  *something absolute (see also PURE 1; ABSOLUTE 2) has the character of being above all imperfection because it is not derived but original, not partial but complete, not subject to qualification because unlimited, and not dependent on anything else because self-sufficient. What is absolute has, as a rule, ideal existence and implies an opposite in actuality lacking the marks of absoluteness <absolute reality as opposed to reality as known—(absolute, as opposed to human, justice) <truth . . . is no absolute thing, but always relative—Galsworthy  *Luther . . . was led to set up the text of the Bible as a sort of visible absolute, a true and perfect touchstone in matters religious—(absolute, as opposed to opinions)—Babbitt>

Babbit> Something categorical (see also explicit) is so fundamental that human reason cannot go beyond it in a search for generality or universality and has therefore an affirmative, undeniable character; thus, the categorical concepts or the categories as they are often called, are the few concepts (as quantity, quality, and relation) to which all human knowledge can be reduced, inasmuch as no more general conceptions can be found to include them.

ululate  *roar, bellow, blast, bluster, bawl, vociferate, clamor, howl  Ant wail, keen, weep, *cry: bewail, lament (see DEPLORE)

ululation  *see under ululate at ROAR vb

Ana persevering, persisting or persistent (see corresponding verbs at PERSEVERE): *steady, constant
Con indolent, faineant, slothful, *lazy
unflappable *cool, composed, collected, unruffled, *unperturbable, nonchalance
unfold 1 Unfold, evolve, develop, elaborate, perfect can all mean to cause something to emerge from a state where its potentialities are not apparent or not realized into a state where they are apparent or fully realized. Unfold suggests usually a natural process by which is unveiled or disclosed the true character, the real beauty or ugliness, or the significance or insignificance of someone or something (the bud unfolds itself into the flower) (I see thy beauty gradually unfold, daily and hourly, more and more—Tennyson) they were theater people, and the unfolding of a new creative work was a solemnity—Wouk) Evolve implies an unfolding or unrolling itself gradually and in orderly process; the term is particularly applicable when the slowness of the process and the complications involved in it are to be suggested (the Protozoa . . . evolved the types that were transitional to higher animals—Miner) (societies are evolved in structure and function as in growth—Spencer) (life has evolved according to a Creator's plan—Marquand) However evolve is often used with weakened emphasis on the implications of slowness and complexity to imply specifically the production of a result (as an idea, a theory, or an aesthetic effect) from within or as if from within (twilight combined with the scenery of Egdon Heath to evolve a thing majestic without severity, impressive without showiness—Hardy) (this novel and intensely exacting technique, evolved . . . by the critical genius of a few . . . Frenchmen and of Henry James—Montague) Develop (see also mature) implies a passing through several stages and stresses the coming out or unfolding of latent possibilities in a thing, whether by a natural process or through human means (compare development) (there were different ideas of how the paper should develop. They wanted it to be successful; I wanted it to be outrageous—Mailer) (shorter than his wife—a jolly pink-faced man with a quietness that might have been developed to complements his noise—Cheever) (he first conceives, then perfects his design, as a mere instrument in hands divine—Cowper) (a new determination to complete and perfect his plant-setting machine had taken possession of him—Anderson) Ana *show, manifest, evidence, evince, demonstrate: exhibit, display, expose (see show) 2 *solve, resolve, unravel, decipher
unformed *formless, shapeless
Ant formed —Con *definite, definitive: developed, matured (see mature): fashioned, fabricated, manufactured, made (see make)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
menical applies to situations involving people throughout the whole world or all people in groups or divisions as indicated, often in religious contexts (the incorporation of all the broken fragments of the former Iranian and Arabic societies into the wholly different structure of a Western World which has grown into an ecumenical “Great Society” —Toynbee) Catholic may stress an attitude involved, as well as a fact, in the including, comprehending, or appreciating of all or many peoples, places, or periods (he was a catholic nature lover. The tropics, the desert, the tundra, the glaciers and the prairies all found a place in his heart —Peattie) Cosmopolitan may imply an understanding and appreciation of other lands, sections, nations, or cities coming about through personal experience in traveling or living elsewhere; it often contrasts with provincial (one of the most entertaining and most cosmopolitan of novelists. Born in Tuscany, he was educated in New England, England, Germany, and Italy, became interested in Sanskrit, edited a newspaper in India—Van Doren)

Ana *earthly, terrestrial, worldly, mundane: *whole, entire, all, total

2 Universal, general, generic, common are comparable when they mean characteristic of, belonging or relating to, comprehending, or affecting all or the whole. Universal as used chiefly in logic and philosophy implies reference to each one of a whole (as a class, a category, or a genus) without exception; thus, “all men are animals” is a universal affirmative proposition, and “no man is omniscient” is a universal negative proposition; color is a universal attribute of visible objects, but chroma is not a universal attribute of visible objects, but chroma is not a characteristic of, belonging or relating to, or appreciating of all or many peoples, places, or periods (he was a catholic nature lover. The tropics, the desert, the tundra, the glaciers and the prairies all found a place in his heart —Peattie)

General can imply reference to all, either of a precisely definable group (as a class, type, or species) (ladies, a general welcome from his grace salutes ye all—Shak) (these first assemblies were general, with all freemen bound to attend—Amer. Guide Series: Md.) or of a more or less loosely or casually combined or associated number of items. In contrast to universal, general tends to be used with less precise boundaries and often implies no more than reference to nearly all or to most of the group (ethylene has come into general but not yet universal favor with surgeons—Morrison) (the ideal of general cultivation has been one of the standards in education — Eliot) But when used with respect to words, language, ideas, or notions, general tends to suggest lack of precision in use or signification (some rather weak cases must fall within any law which is couched in general words—Justice Holmes) Generic is often used in place of general when a term implying reference to every member of a genus or often of a clearly defined scientific or logical category and the exclusion of all other individuals is needed; thus, a general likeness between two insects may be a likeness that is merely observable, whereas a generic likeness is one that offers proof that they belong to the same genus or that enables a student to assign a hitherto unknown insect to its proper category; the use of words is a general characteristic of writing but the use of meter is a generic characteristic of poetry (there is no such thing as a generic “Asian mind” —R. A. Smith) (the notion has always had a generic habit of reaching out to the extremes of literary expression—Schorer) (absolute generic unity would obtain if there were one sumnum genus under which all things without exception could be eventually subsumed—James) Common (see also common 3; reciprocal 1) differs from general in implying participation, use, or a sharing by all members of the class, group, or community of persons or, less often, of things under consideration (a thing . . . practiced for two hundred years by common consent—Justice Holmes) (crowds . . . swept along by a common animating impulse —Binyon) (our common tongue —Lowes)

Ant particular

universe cosmos, macrocosm, *earth, world
unkeempt slovenly, sloppy, *slipshod, disheveled
unlawful, illegal, illegitimate, illicit are comparable when they mean contrary to, prohibited by, or not in accordance with law or the law. Otherwise than this negation in character, the words in general carry the same differences in implications and connotations as the affirmative adjectives discriminated at lawful. But there are a few recognizable differences. Illegitimate tends to be more narrowly used than legitimate; its most common application is to children born out of wedlock or to a relation which leads to such a result (the illegitimate son of the Duke) (their union was illegitimate) but it is occasionally referred to something that is not proper according to the rules (as of logic) or to the authorities or to precedent (your inference is illegitimate) (it is illegitimate to suppose a chasm between the brute facts of physical nature . . . and the most abstract principles—Alexander) (I am far from thinking, with some modern theoretic purists, that it is illegitimate in painting to play on the power of association—Binyon) Illicit is used much more widely than illegitimate; it may imply a lack of conformity to the provisions of a law intended to regulate the performance, the carrying on, or the execution of something that comes under the law of state or of church (illicit liquor traffic) (an illicit marriage according to the Church may still be a legal marriage from the point of view of the State) but it is also applied to something that is obtained, done, or maintained unlawfully, illegally, or illegitimately (most persons . . . have long believed that happiness, being as they suspect somehow illicit at best, must have its locus beyond ourselves, beyond this world—Edman) (the tradition that illicit love affairs are at once vicious and delightful—Shaw) (the . . . monk who loved Virgil had to study him with an illicit candle—Quiller-Couch)

Ant iniquitous, nefarious, flagitious (see vicious)
Ant lawful —Con *due, rightful, condign

Ant crude, *rude, rough, raw, callow, green, uncouth
unlettered illiterate, *ignorant, uneducated, untaught, untutored, unlearned
unlikeliness *dissimilarity, difference, divergence, divergency, distinction
Ant diversity, *variety: disparity, variosity (see corresponding adjectives at different): discrepancy, discordance, incongruousness, incompatibility, inconsistency, inconsonance (see corresponding adjectives at inconsonant)
Ant likeness

unlucky, disastrous, ill-starred, ill-fated, unfortunate, calamitous, luckless, hapless can all mean having, meeting, or promising an outcome that is distinctly unfavorable (as hopes, plans, or well-being). Unlucky implies that in spite of efforts or merits one meets with bad luck, often chronically, or that a specific occasion or action will be or has proved to be unfavorable especially in its outcome or consequences (the child who is born on an unlucky day—Kardiner) (the loss of over $200,000 in an
unman 846 unnerve

**unlucky** coffee speculation—H. G. Pearson *it was the unluckiest step we ever made to admit him into the bosom of our family—Lyttelton* Disastrous and ill-starred both carry the astrological implication that the stars are adverse to the person or thing in question and both suggest a more or less dire fate for him or it *(the intrepid but ill-starred General . . . met with an airplane accident . . . and was burned to death—Peers)* Though disastrous and ill-starred often imply a calamitous result as inevitable *(in his fury made sudden decisions which would prove utterly disastrous to the fortunes of the Third Reich—Shirer)* *(the period and the region that produced Burr's ill-starred conspiracy—H. E. Davis)* disastrous is not infrequently used in a much weakened sense without a hint of inevitability or, often, an implication of consequences more serious than that of a turning of the tables upon one or the other of the participants or contenders *(a . . . denial of poetic possibilities . . . is liable to disastrous refutation by a triumphant instance of the "poetizing" . . . of that very word—Lowes)* Ill-starred, on the other hand, is close to ill-fated in meaning in that both imply an evil and unavoidable destiny awaiting a person or an action *(the holiday was ill-starred from the outset, and a series of minor catastrophes culminated in a blowout on a lonely road—Cerf)* *(the ill-fated attempt to collect the old war debts—Soule)* *(served as a wagoner with General Bradock's ill-fated army—J. M. Brown)* Unfortunate, though often interchangeable with unlucky, carries a much weaker implication of the intervention of chance *(had an unfortunate day at the races)* and a much stronger suggestion of misfortune, misery, unhappiness, or desolation, often to the extent of eliminating all suggestions of luck or of chance; occasionally it means nothing much more than regrettable or disastrous in its weakened sense *(a most unfortunate family)* *(an unfortunate choice of words)* *(expecting some unfortunate woman to instruct simultaneously a crowd of fiftyurchins of all degrees of ignorance—Grandgent)* Calamitous, which is used of events rather than persons, resembles unfortunate in its frequent elimination of all suggestion of luck or chance and in sometimes meaning little more than regrettable or upsetting *(mother was afraid to leave the house in case something calamitous would happen, so we had a little extra time for dressing—Molly Weir)* but it, like the noun calamity *(which see under disaster)* often suggests dire misery or the utmost of woeful distress typically stemming from some grave and extraordinary event *(in that calamitous year over 1532 a total of 277,952 foreclosures forced people out of their homes—O'Brien)* *(men naturally admire Hannibal though the success of his cause might have been calamitous to the progress of civilization—Cohen)* *(there was more news than ever before, practically all of it calamitous—Catton)* Luckless and helpless are more or less rhetorical terms implying that the person or thing so described has or reveals less than average good luck or good fortune (as in his undertakings or in their outcome); usually these words mean nothing more than unhappier, miserable, or wretched *(she had disobeyed—and at the wrong time. Ah, the horrible, chancy, luckless wrong time—Styron)* *(helpless beings caught in the grip of forces we can do little about—Whyte)* *(the other victims . . . met an even more helpless fate—E. S. Bates)* Ana *inexpert, awkward: distressing, troubling (see trouble):* *(sinister, malign, baleful)* Ant *lucky—Con auspicious, propitious, favorable, benign: fortunate, happy, providential (see lucky)* unman *unnerve, emasculate, enervate* Ana *sap, undermine, weaken, enfeeble, debilitate: abase, degrade: deplete, drain, exhaust, impoverish, bankrupt Unmarried, single, celibate, virgin, maiden are comparable as adjectives when they mean not united in bonds of marriage. Unmarried merely states the fact; it is usually applied to those who have not yet married, and in law, it is applicable to a person who has been divorced and has not remarried and, sometimes, to one who has been widowed *(an unmarried woman)* *(he said he would remain unmarried)* *(the question of being both unchaste and unmarried apparently never arises—Marcuse)* Single is applied to those who are not yet married but is commonly used of those who remain unmarried through life *(housing problems of single men and women)* *(has to take anything she can get in the way of a husband rather than face penury as a single woman—Shaw)* Celibate may be applied to the state of one having no expectation of marrying and it is especially applicable to that of one who is bound by a solemn vow to abstain from taking a mate. It is used chiefly of priests, monks, and nuns, of others who have dedicated their lives to religion, or of men or women who have accepted a way of life incompatible with having a spouse, or of children *(the masses of [Orthodox]]* believers preferred to confess to the celibate holy men . . . in the distant monastery—Burks) *(the dandy must be celibate, cloisteral; is, indeed, but a monk with a mirror for beads and breviary—an anchorite, mortifying his soul that his body may be perfect—Beerbohm)* Virgin tends to stress a pure unsullied state of chastity. It usually applies to the unmarried but it may also be referred to the married when the marital relation has not been consummated, usually on grounds of choice *(Saint Ursula and her virgin companions)* *(the young chief could not be told . . . for he was married, and the secret could be given only to a virgin youth—Corlett)* Maiden holds much the same implications as virgin, but it often differs in its heightened implication of not having married and in its subdued suggestion of purity and freedom from sexual intercourse *(he has two maiden sisters)* *(his mind partly on a slit-skirted maiden cyclist—Birney)* Unmatured *immature, unripe, unmellow* Ant *matured—Con* *mature, adult, grown-up* Unmellow *immature, unripe, unmellow* Ant *mellow, mellowed—Con* *developed, ripened, matured (see mature vb)* Unmindful *forgetful, oblivious* Ant *heedless, thoughtless, careless, inadvertent: negligent, neglectful, remiss* Ant *mindful: solicitous—Con* *careful, concerned, anxious, worried (see under care): thoughtful, considerate, attentive* Unmitigated *outright, out-and-out, aarrant* Ant *moral, immoral, amoral, nonmoral* Unnatural *abnormal, aberrant, atypical: monstrous, prodigious: fantastic, grotesque, bizarre* Ant *natural* Unnerve, enervate, unman, emasculate can all mean to deprive of strength or vigor and of the capacity for endurance, overcoming difficulties, or making progress. Unnerve implies marked loss of courage, steadiness, and self-control or of power to act or fight usually as a result of some calamity or sudden shock *(government was unnerved, confounded, and in a manner suspended—Burke)* *(that beloved name Arnold)—Converted—Hesitantly, unnerved and bewildered—Styron)* *(the narcotic and unnerving property of these stimulants has been thoroughly established—Day Lewis)* Enervate implies a more gradual physical or moral weakening or dissipation of one's strength until one is too feeble
to make effort; usually the term implies a weakening of moral fiber under the influence of such debilitating factors as luxury, indolence, or effeminacy. Those unhappy people whose tender minds a long course of felicity has enervated—Bolingbroke. Plato asserts that a life of drudgery disfigures the body and... enervates the soul—Dickinson. Unman implies loss of manly fortitude or spirit; it often suggests a shameful reduction to tears, tremors, extreme timidity, or other state regarded as womanish. What, quite unmaned in folly?... Fie, for shame!—Shak. The strangeness of the night... the dead man they had left in the field had unsettled them all and had unmaned at least one of them—Cheever. Emasculate (see also sterilize 1) implies a loss of essential or effective power especially by the removal of something (as a factor or a condition) which has made for strength (as of a person, a group, or a law). (Hellenism... was not destroyed, though it was emasculated, by the loss of political freedom—Inge. Many states emasculate such civil rights statutes as exist—Swindler.

Unoffending

* Harmless, innocuous, innocent, inoffensive

Unpremeditated

* Extemporaneous, extemore, unpremeditated

Unravel

* Solve, resolve, unfold, decipher

Unreasonable

Unreligious

* Irreligious, ungodly, godless, nonreligious

Unremitting

* Constant, incessant, continual, continuous, perpetual, perennial

Unripe

* Immature, unseasoned, unwholesome

Unruffled

* Calm, placid, peaceful, serene, tranquil: poised, balanced (see stabilize)

Unruled

* Ungovernable, intractable, refractory, recalcitrant, willful, headstrong are comparable when they mean not submissive to government or control. Unruled stresses a lack of discipline or an incapacity for discipline; in addition it often connotes such qualities as turbulence, disorderliness, waywardness, or obstreperousness. Whatever my unruly tongue may say—J. R. Green. The unruly passions—T. S. Eliot. She cleared the land, dug ditches and dammed unruly streams—Amer. Guide Series: Ariz. Ungovernable implies either an incapacity for or an escape from guidance or control. When applied directly or indirectly to persons, it usually suggests either no previous submission to restrictions or a state of having thrown off previous restrictions. The fiercest and most ungovernable part of the... population—Macaulay or the loss of all power to control oneself or to be controlled by others. He fell into an ungovernable rage. When used in reference to things, it usually suggests their incapacity for human direction or control. That... ungovernable wonder the wind—Hawthorne. Genius was as valuable and as unpredictable, perhaps as ungovernable, as the waves of the sea—Buck. Intractable and refractory both imply resistance to all attempts to bring under one's control, management, or direction. When applied to persons, intractable suggests a disposition to resist guidance or control. An intractable child... a flux absolutely necessary in dealing with moral elements—Stevenson. Recalcitrant carries an even stronger implication of active and violent resistance or of obstinate refusal to things than refractory..., and... recalcitrant feelings—Burney. There is no use in making the refractory child feel guilty; it is much more to the purpose to make him feel that he is missing pleasures which the others are enjoying—Russell or, when the reference is to an inanimate thing, a degree of intractability that offers especially great resistance or presents... resistance indicated by manifest disobedience, open protest, or rebelliousness. It becomes my duty to struggle against my refractory feelings—Burney. There is no use in making the refractory child feel guilty; it is much more to the purpose to make him feel that he is missing pleasures which the others are enjoying—Russell or, when the reference is to an inanimate thing, a degree of intractability that offers especially great resistance or presents... resistance indicated by manifest disobedience, open protest, or rebelliousness. It becomes my duty to struggle against my refractory feelings—Burney. eighteenth century supposed—Huxley—Conscientious and scrupulous both imply an active moral sense which governs all one's actions. Conscientious stresses painstaking efforts to follow that guide at all costs, especially in one's observance of the moral law or in the performance of one's duty (his whole character ... was far too sternly conscientious to allow of any suspicion being cast upon his rectitude—A. W. Ward) <conscientious and incorruptible and right-minded, a young man born to worry—Styron> Scrupulous (see also CAREFUL 2), on the other hand, implies either anxiety in obeying strictly the dictates of conscience or meticulous attention to the morality of the details of conduct as well as to the morality of one's ends (Sebastian was scrupulous, and certain accepted conventions had forced him to satisfy his conscience—Sackville-West) Honorable (see also HONORABLE 1) implies the guidance of a high sense of honor or of a sense of what one should do in obedience not only to the dictates of conscience but to the demands made by social position or office, by the code of his profession, or by the esteem in which he is held (Leopold's defenders ... believed that he had done the right and honorable thing in sharing the fate of his soldiers and of the Belgian people—Shirer) <did this vile world show many such as thee, thou perfect, just, and honorable man—Shelley>

Ana *moral, ethical, virtuous, righteous: *fair, equitable, impartial: *straightforward, aboveboard

uprising *rebellion, revolution, revolt, insurrection, mutiny, putsch, coup

Ana fight, combat, conflict, fray (see CONTEST): strife, contention, dissension (see DISCORD): aggression, *attack

uproar *din, pandemonium, hullabaloo, babel, hubbub, clamor, racket

uproot eradicate, deracinate, extirpate, *exterminate, wipe

Ana *abolish, extinguish, annihilate, abate: supplant, displace, *replace, supersede: subvert, overthrow, *over-turn: *destroy, demolish

Ant establish: inseminate

upset vb 1 *overturn, capsize, overthrow, subvert

Ana invert, *reverse: bend (see CURVE vb)

2 agitate, perturb, disturb, disquiet, *discompose, fluster, flurry

Ana wilder, distract, confound (see PUZZLE vb): discomfit, rattle, faze, *embarrass: *unnerve, unman

upshot outcome, issue, result, consequence, *effect, after-effect, aftermath, event, sequel

Ana *end, termination, ending: climax, culmination (see SUMMIT): concluding or conclusion, finishing or finish, completion (see corresponding verbs at CLOSE)

urbane *suave, smooth, diplomatic, bland, politic

Ana courteous, polite, courtly, *civil: poised, balanced (see STABILIZE): cultured, cultivated, refined (see corresponding nouns at CULTURE)

Ant rude: clownish, bucolic

urge vb Urge, egg, exhort, goad, spur, prod, prick, sic me to press or impel to action, effort, or speed. Urge implies the exertion of influence or pressure either from something or someone external or from something within (as the conscience or the heart); specifically it suggests an inciting or stimulating to or toward a definite end (as greater speed or a prescribed course or objective) often against the inclinations or habits of the one urged (the crowd urged on their favorites with shouts of encouragement) <his conscience urged him to battle for the cause> <with remarkable speed the four guests ... saddled their mules and urged them across the plain—Cather> <his new young life, so strong and imperious, was urged towards something else—D. H. Lawrence> Egg usually presupposes a hesitant, inert, or lagging will and usually suggests an encouraging or even an abetting (schemers and flatterers would egg him on—Thackeray) <she egged me to borrow the money—Kipling> Exhort may suggest the arts of a preacher or orator inciting men to good or better lives or actions and usually implies a fervor or zeal characteristic of a preacher in stimulating through admonition, encouragement, or pleading (William exhorted his friend to confess, and not to hide his sin any longer—George Elliot) <he may probably be exhorted to "do well in his examination"—Inge> Goad basically denotes the use of a pointed rod in driving cattle and carries in its extended use a strong implication of something that irritates or inflames and drives one on in spite of inclinations or habit of yielding to other desires or motives <many of them ... had been goaded by petty persecution into a temper fit for desperate enterprise—Macaulay> <man's inquisitive nature has goaded him on to look deeply into these matters—Morrison> Spur basically applies to a spiked device attached to the heels of a rider and used to urge on a lagging horse; it is likely to suggest in its extended use a superior impulse that makes up for the weakness or reluctance of one's nature or will <love will not be spurred to what it loathes—Shak> <he is ... spurred on by yearnings after an unsearchable delight—Symonds> <reproaches too, whose power may spur me on ... to honorable toil—Wordsworth> Prod implies a being driven or forced into action as if by means of a stick or goad and may suggest a thrust or a push and an compelling against one's will <the excitement of trying ... to prod them into action—J. R. Green> <Indians grew hungry and hatred of the white man prodded them into open hostilities—Julian Dana> Prick comes close to spur in implying an influence from something sharp-pointed or irritating that serves to urge or drive (rely on their animal instinct and developed reflexes to prick them into awareness when danger threatened—Majdalany) <pricked on by knightly spur of female eyes—J. R. Lowell> Sic basically means to urge on a dog to chase or attack someone; with persons it often implies exhorting or goading to attack or worry <a civilized nation siced on the Barbary whelps to tear the peaceful passersby—Spear>

Ana impel, drive, actuate, *move: stimulate, excite, quicken, *provoke

urge n *desire, lust, passion, appetite

Ana *motive, spring, spur, goad, incentive: longing, yearning, pining (see LONG): craving, coveting, desiring (see DESIRE vb)

urgent *pressing, imperative, crying, importunate, insistent, exigent, instant

Ana compelling, driving (see MOVE): constraining, compelling, obliging (see FORCE vb)

usage 1 practice, custom, use, *habit, habitude, wont

Ana *method, mode, manner, way, fashion: procedure, proceeding, *process: guiding or leading, lead (see corresponding verbs at GUIDE): *choice, preference

2 *form, convention, convenance

Ana formality, ceremony, *form

use n 1 Use, service, advantage, profit, account, avail can all mean a useful or valuable end, result, or purpose. Use stresses either employment for some purpose or end of practical value <turn every scrap of material to use> or the practical value of the end promoted or attained <the findings in the investigation were of little use> <sweet are the uses of adversity—Shak> Servile, though often
interchangeable with *use*, is especially appropriate when the reference is to persons or animals or their work or actions (the horse was unfit for *service*—Scott) (render a *service* to a friend) *Service* often implies that the result of one's act or works is beneficial (I have done the state some *service*, and they know't—Shak.) *Advantage* adds to *use* the implication of improvement or enhancement (as in value or position) (he uses every penny to *advantage*) (her beauty proved to be of great *advantage* to her in her stage career) (Constance had never before seen him to such heroic *advantage*—Bennett) (true Wit is Nature to *advantage* dressed—Pope) *Profit* distinctively implies reward or the rewarding character of what is attained, and often implies pecuniary gain (the student worked hard but to no *profit*) (he found moral *profit* also in this self-study; for how, he asked, can we correct our vices if we do not know them—L. P. Smith) (coal and steel interests were merging with mutual *profit*—Amer. Guide Series: Pa.) *Account* is used chiefly in fixed phrases (turn his musical talent to *account*) (of little *account*) It is sometimes interchangeable with *use*, *advantage*, or *profit*, but distinctively it suggests calculable value (a book that turns to *account* the conclusions of other recent German theorists—Babbitt) Sometimes it is nearly equivalent to *importance* (our family . . . whose honor is of so much *account* to both of us—Dickens) *Avail* so strongly suggests effectualness or effectiveness in the end attained that the negative idiomatic phrases in which it is often found are equivalent to *ineffectual* or *ineffectually* (<the search was of no *avail*) (he labored unceasingly without *avail* to move the rock) (he studied hard but to no *avail*)

**Ana benefit, profit (see corresponding verbs at BENEFIT):**

value. *worth:* *function*, office, duty: *purpose*, *intention*, object

2 Use, *usefulness*, *utility* are comparable when they mean the character or the quality of serving or of being able to serve an end or purpose. Use (see also USE 1; *HABIT*) is the most general or least explicit of these terms; it usually implies little more than suitability for employment for some purpose stated or implied (our gymnasium . . . is of excellent *use*, and all my girls exercise in it—Meredith) (she said she would have saved the pieces had they been of any *use*) *Usefulness*, on the other hand, is employed chiefly with reference to definite concrete things that serve or are capable of serving a practical purpose (demonstrated the *usefulness* of his device) (her [the cat's] sacred character was in no wise impaired by her *usefulness*—Repliplier) (libraries have moved into that wider area of *usefulness* which today makes them one of the most effective instruments for ensuring a democratic way of life—Collier's Yr. Bk.) *Utility*, which comes very close to *usefulness*, may be preferred in technical, economic, and philosophical speech or writing, where it is often regarded as a property that can be measured or altered (as in quantity or quality) or that can be viewed as an abstraction (the extent to which the price of motorcars per unit of *utility* has fallen—Schumpeter) (in economics production is simply the creation of *utility* . . . adding some kind of *utility* to raw material then this will satisfy consumers' *wants*—Goodman & Moore) (universities exist for two purposes; on the one hand, to train men and women for certain professions; on the other hand, to pursue learning and research without regard to immediate *utility*—Russell)

**Ana applicability, relevance, pertinence (see corresponding adjectives at RELEVANT):** suitability, fitness, appropriateness (see corresponding adjectives at FIT) 3 wont, practice, usage, custom, *habit*, *habituate*

**Ana *form*, usage: rite, ceremony, formality (see FORM n)**

**use vb** Use, employ, utilize, apply, avail can all mean to deal with something so as to give it a practical value or to make it serviceable to oneself or others. One uses a thing, or a person when regarded as a passive object, as a means or instrument to the accomplishment of a purpose or as an aid to the attainment of an end; the thing may be concrete (use a hoe in cultivating) (use a dictionary to build up his vocabulary) (use a person as a tool) or it may be abstract (use patience in dealing with children) (use discretion in investing money) (the way to learn to use words is to read some good literature often and carefully—Russell) (his sense of being used rose suddenly above the treacherous sympathy he had begun to feel for her—Tarkington) One employs a person or thing that is idle, inactive, or not in use, when he puts him or it to work or finds a profitable use for him or it (she had . . . employed her leisure in reading every book that came in her way—Shaw) (the student crammed full of knowledge which he cannot employ—Grandgent) (craftsmen were finding in the new land raw materials on which they could employ all their artistry—Amer. Guide Series: Pa.) Although *use* and *employ* are often interchanged, there can be a perceptible difference in meaning: wherever the idea of serving as the means or instrument is uppermost, *use* is likely to be preferred; wherever the idea of engaging or selecting, of keeping occupied or busy, or of turning to account is uppermost, *employ* is the desirable and often the necessary choice; thus, a writer uses words effectively who knows what ones he should employ in a given context; a teacher often uses his pupils as monitors when he should keep them employed in study. One utilizes something when he finds a profitable use for it or discovers how to employ it for a practical purpose (he even tried to figure out a way to utilize the small limbs cut from the tops of the trees—Anderson) (charged against him that he utilized his military office for private gain—R. G. Adams) One applies something when he brings it into contact or into relation with something else where it will prove its useful-ness or acquire practical value. This suggestion of making a connection or bringing into contact is strong in all senses of *apply* (see also DIRECT, RESORT); in the present sense it can not only affect the construction but can even obscure the implication of usefulness; thus, one uses a mustard plaster to relieve a chest pain, but one applies a mustard plaster to the chest. The same implication distinguishes *apply* from the other words when the idea of usefulness is stressed; thus, one who knows how to *employ* words reveals his ability to select those words that express his exact meaning, no more and no less, but one who knows how to *apply* words reveals his ability to use them relevantly, that is, in reference to the things or ideas with which they are idiomatically associated (<foreigners learning English find difficulty in applying certain words and phrases (as evening dress and nightdress, tool and instrument, or bad and naughty) our own word *virtue* is *applied* only to moral qualities; but the Greek word which we so translate should properly be rendered "excellence," and includes a reference to the body as well as to the soul—Dickinson) The implication of a useful or definite end is strongest in *apply* when the word carries the further suggestion of relating what is general or theoretical to what is particular or concrete, for some such practical purpose as identification (we can discover if this fabric is woven by applying specific tests) or clarification of a problem (before forming an opinion, the judges must know what laws *apply* to the particular case) or invention (<most modern inventions and discoveries are the result of a fresh outlook in applying the laws of physics and chemistry>) (the law does all that
usefulness

is needed when it does all that it can, indicates a policy, applies it to all within the lines, and seeks to bring within the lines all similarly situated—Justice Holmes

<It is a test which we may apply to all figure painters—a test which will often discover the secret of unsatisfactory design—if we ask whether the figures are really occupied by what they are doing—Binyon>

One avails (oneself of) something or someone that is at hand or is offered by using it or him to one's own benefit or advantage <far from resenting such tutelage I am only too glad to avail myself of it—Shaw>

(takes us . . . into the consciousness of his characters, and in order to do so, he has availed himself of methods of which Flaubert never dreamed—Edmund Wilson>

Vagabond

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
he moves about in search of work, especially seasonal work, or whether he lives by begging and thievery (whoever, not being under seventeen, a blind person or a person asking charity within his own town, roves about from place to place begging, or living without labor or visible means of support, shall be deemed a tramp—General Laws of the Commonwealth of Mass.) (a distinct class of these gentlemen tramps, young men no longer young, who wouldn't settle down, who disliked society and the genteel conventions—Santayana) Bum basically applies to a lazy, idle, and often drunken, good-for-nothing, who will not work but habitually sponges on others (dwells in a black-and-white world where a guy is either your pal or probably a bum—Hal Boyle) (the local ne'er-do-well, the traditional village bum) But bum, especially when qualified, may denote one who wanders in pursuit of a particular occupation or activity (fruit bums who follow the harvests north) (a ski bum) Hobo is often distinguished from tramp, sometimes in terms of willingness to work, sometimes in terms of methods of travel, the tramp being then taken as one who typically tramps the roads, the hobo as one who typically rides surreptitiously on freight trains. A common application of hobo is to the migratory worker who roves about following such seasonal occupations as harvesting and crop picking. Hoboes are traveling workers, tramps are traveling shirkers and bums are stationary shirkers—Cleveland Plain Dealer (in Western parlance a hobo is not a tramp. A hobo is a migratory laborer, who carries his blankets on his back, looking for work—World's Work) Ana wanderer, roamer, rover (see corresponding verbs at WANDER) vagary *caprice, freak, fancy, whim, whimsy, conceit, vain 1 Vain, nugatory is trifling, puny, petty, paltry: delusive, delusory, mis-leading 3 Proud, vainglorious (see under PRIDE n) Ana self-satisfied, self-complacent, complacent, prig-gish, smug: conceited, egoistic, egotistic (see corre-sponding nouns at CONCEIT) Con *humble, meek, modest: diffident, *shy, hashful vainglorious proud, vain (see under PRIDE n) Ana arrogant, haughty, supercilious, disdainful, insolent, *proud: boasting or boastful, bragging, vaunting, gas-conading (see corresponding verbs at BOAST) vainglory *pride, vanity Ana pomp, *display, parade: flaunting, parading, ex-hibition (see corresponding verbs at SHOW): rhapsody, rodomontade, rant, *bombast valiant *brave, courageous, unafraid, fearless, intrepid, valorous, dauntless, undaunted, daunted, bold, audacious Ana stout, *sturdy, tenacious, stalwart (see STRONG): indomitable, unconquerable, *invincible Ant timid: dastardly valid, sound, cogent, convincing, compelling, telling can all be applied directly or indirectly to arguments, reasons, principles, or processes of thought or to their presentation and mean having or manifesting the power to impress themselves on others as right and well-grounded. Valid and sound both imply that the power is inherent in the rationality or logicality of the thought apart from its presentation. Something is valid against which no objections can be maintained, because it conforms strictly to the law or regulations (as of the state or the church) or bold a valid title to a piece of property (a valid ordina-tion) or because it is supported or justified by facts and correct reasoning (a valid argument) <valid evidence> (universally valid principles—Inge) or, less often, because it is fully in accordance with claims
validate

or promises made for it and is entirely effectual or efficacious\(^1\) (a valid method of testing intelligence) \(\langle\text{these folkways remain valid for anybody who gets soluble from them—Wouk}\rangle\) A person or a thing is sound that is free from error or fault in its or its processes of thought and that avoids fallacies, insufficient evidence, hasty conclusions, or superficiality. The term not only suggests flawlessness in reasoning but solidity in the grounds upon which this reasoning is based \(\langle\text{a sound thinker}\rangle\) \(\langle\text{his assurance that he had never used an argument which he did not believe to be sound—Inge}\rangle\) (to admit . . . that reason cannot extend into the religious sphere is absolutely sound so long as we realize that reason has a coordinate right to lay down the rules in its own sphere of intelligence—Ellis) Something cogent or convincing or compelling commands mental assent. But cogent tends to stress a power or force resident in the argument or reasoning that makes it conclusive, convincing suggests a power to overcome doubt, opposition, or reluctance to accept, and compelling calls particular attention to the substantial nature of the objective evidence \(\langle\text{the remarks of Gibson on universities and their degrees are still . . . cogent—Aldington}\rangle\) \(\langle\text{there are other ways of making a thing . . . convincing . . . besides merely appealing to one's logic and sense of fact—Babbitt}\rangle\) \(\langle\text{so expressed, the argument does not sound strongly convincing: but it is really cogent, and the conclusion is sound—Darrow}\rangle\) \(\langle\text{though his logic is often unconvincing, his documentation is always compelling—Mueller}\rangle\) Something telling produces at once the desired effect; frequently the term implies the compelling of assent but it seldom directly suggests soundness or cogency though, in general, it does not deny the existence of these qualities \(\langle\text{the first speaker for the affirmative used far more telling arguments than the second speaker}\rangle\) \(\langle\text{every point made by the prosecuting attorney was telling}\rangle\) The term is often applied to words, phrases, tones of expression, or rhetorical methods which convince, persuade, or win admiration and support because of their pertinency, their suitability, or their forcibleness \(\langle\text{a telling illustration of what Darwin unintentionally did to the minds of his disciples—Shaw}\rangle\) \(\langle\text{such telling effects of contrast as the Japanese [artists] produced by an empty space—Binyon}\rangle\) \(\text{Ana}\) *conclusive, determinative, definitive, decisive: *effective, effectual: legal, *lawful, licit: *logical, analytical, subtle \(\text{Ant}\) fallacious, sophistical

valid*ate* \*confirm, authenticate, substantiate, verify, corroborate \(\text{Ana}\) *certify, attest, witness, vouch \(\text{Ant}\) invalidate

valo*r \*heroism, prowess, gallantry \(\text{Ana}\) *courage, mettle, tenacity, spirit, resolution: indomitableness, unconquerableness, invincibility (see corresponding adjectives at invincible): *fortitude, guts, sand, backbone

valu*rous \*brave, courageous, unafraid, fearless, intrepid, valiant, dauntless, undaunted, doughty, bold, audacious \(\text{Ana}\) venturesome, daring (see ADVENTUROUS): stout, sturdy, tenacious, stalwart, tough, *strong

valu*a*ble \*precious, invaluable, priceless, *costly, expensive, dear \(\text{Ana}\) estimated, appraised, evaluated (see ESTIMATE): valued, appreciated, prized, treasured (see APPRECIATE): esteemed, admired, respected (see corresponding verbs under REGARD \(n\))

valu*e \*price, charge, cost, expense: *importance, consequence, significance, weight: *use, usefulness, utility

\(\text{value vb}\) 1 *estimate, appraise, evaluate, rate, assess, assay \(\text{Ana}\) *calculate, compute, reckon: *judge, adjudge, adjudicate

2 prize, treasure, *appreciate, cherish

\(\text{Ana}\) esteem, respect, admire (see under REGARD \(n\)): love, enjoy (see LIKE): *revere, reverence, venerate

vanish, evanesce, evaporate, disappear, fade can all mean to pass from view or out of existence. Vanish implies a complete, often mysterious, and usually sudden passing; it commonly suggests absence of all trace or of any clue that would permit following until found \(\langle\text{no facts on the mother's disappearance. Died in childbirth, ran off with someone, committed suicide: some way of vanishing painful enough to keep Sidney from ever referring to it—Pynchon}\rangle\) \(\langle\text{all those emotions of fear and abhorrence . . . vanished instantly from my mind—Hudson}\rangle\) \(\text{Addison complained that in his time the very appearances of Christianity had vanished—Huxley}\) Evanesce differs from vanish in its greater stress on the process (as effacement or dissipation) by which a thing passes from visibility or thought; sometimes the term distinctly suggests a gradual process \(\langle\text{1 touch a scarf and it falls into air and light and seems to evanesce—Goyen}\rangle\) \(\langle\text{the sun-streaming clarity of cheekered beach parasols, of friendly boys digging castles in the sand, faded in outline, evanesced from the bright precision of reality to vagueness of storm and sand—Joseph Bennett}\rangle\) Evaporate suggests a vanishing as silently and inconspicuously as water does into vapor \(\langle\text{because of future expenses already mandated by the legislature, that surplus will evaporate soon—Armbrister}\rangle\) The term is often used in respect to tenuous qualities, but it may be employed to describe stealthy or prudent or sudden departures or withdrawals of persons \(\langle\text{people whose faith, so tenuous anyway, had evaporated upon the threatening winds of a “cosmic cataclysm”—Styron}\rangle\) \(\langle\text{looking at the high gray-green grass. A man could evaporate in that stuff in a second—R. O. Bowen}\rangle\) \(\langle\text{if we try to express almost any poem of his in prose, we find it impossible; its rare spirit evaporates in the process—Day Lewis}\rangle\) Disappear stresses only the passing from sight or thought; the passing implied may be sudden or gradual, permanent or temporary, but such suggestions are mostly contextual and not in the word \(\langle\text{the traditional view, that the world was made up of a vertical scale of creatures, gradually disappeared—S. F. Mason}\rangle\) \(\langle\text{some say, let us go back to Palestine, else Judaism will disappear—Cohen}\rangle\) \(\langle\text{seldom have other writers been able to disappear from their narrative as completely as Faulkner does—Robert Humphrey}\rangle\) \(\text{Fade},\) often with out or away, implies a gradual diminution in clearness and distinctness until the thing becomes invisible \(\langle\text{the ship gradually faded from sight}\rangle\) \(\langle\text{all other certainties had faded or eroded away in growing up—Wouk}\rangle\) \(\langle\text{this story seems to have faded out of the popular mind—Norman Douglas}\rangle\) \(\text{Ana}\) *escape, flee, fly: dispel, disperse, dissipate, *scatter \(\text{Ant}\) appear: loom

vani*ty \*pride, vainglory \(\text{Ana}\) self-esteem, self-love, *conceit, egotism, egoism, amour propre: complacency, self-complacency, self-satisfaction, smugness, priggishness (see corresponding adjectives at COMPLACENT): show, ostentation, pretense (see corresponding adjectives at showy)

vanquish \*conquer, defeat, beat, lick, subdue, subjugate, reduce, overcome, surmount, overthrow, rout \(\text{Ana}\) *frustrate, foil, outwit, circumvent: *overturn, subvert \(\text{Con}\) surrender, submit, capitulate (see corresponding nouns at SURRENDER): *yield, succumb

vanqu*isher \*victor, conqueror, winner, champion

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
vapid | variety
---|---
*insipid, flat, jejune, banal, wishy-washy, inane* | 
*soft, bland, gentle, mild: *tame, subdued, submissive: mawkish, maudlin, soppy, slushy, mushy, *sentimental* *

**Con** racy, spicy, *pungent, piquant: trenchant, crisp, *incisive: *expressive, significant, pregnant, meaningful *

**variable** adj *changeable, protean, changeful, mutable*

*fitful, spasmodic: fickle, mercurial, unstable, *inconstant, capricious: mobile, *movable*

**Ant** constant: equable

**variance** *discord, contention, dissension, difference, strife, conflict*

**Ant** difference, diversity, divergency, disparateness (see corresponding adjectives at DIFFERENT): separation, division, severing, sundering (see corresponding verbs at SEPARATE): incongruousness, uncongeniality, incompatibility, discordance, discrepancy (see corresponding adjectives at INCONSONANT)

**variation** change, alteration, modification (see under CHANGE vb)

*Ant* variety, diversity: difference, divergence, divergency, *dissimilarity: deviation, deflection, aberration*

**vargiagated, parti-colored, motley, checkered, checked, pied, piebald, skewbald, dappled, freaked** car all mean having a pattern involving different colors or shades of color. *Vargiagated* implies variation in the color (as of a single piece, object, or specimen) without indication of what colors or what forms—spots, streaks, blotches—are involved (disliked the *vargiagated* hues of the buildings—they reminded him of the garish brilliance in the lower town—Norman Douglas) *Particolored* implies the presence of two or more colors but stresses not so much the presence of different colors as their clear demarcation and distinct presentation. *Motley* in most uses is likely to suggest presence of colors of very noticeable diversity in a chance, haphazard, or very capricious arrangement (birds of *motley* colors and varied cries—Chesterston) (the *motley* dress of a court jester)

**Checkered** indicates a regular alternation of rectangular shapes different in color or shade like a checkboarder, especially an alternation between black and white or dark and light (the *checkered* fabric of Constable's pictures, their deep undertones overlaid with variegated passages of crumbling impasto and strewn with particles of white light—Ironsid) *Checked* indicates much the same thing but is admissible in situations where figures are less certainly rectangular; it is common in reference to fabrics (a gambler's *checked* vest) *Pied* suggests patches, blotches, or spots of color on a contrasting background and especially the white on black of a magpie's plumage. *Piebald* suggests similar coloration, especially in reference to the markings of a horse or dog, and *skewbald* implies an arrangement of spots and background involving white and some color other than black (piebald strictly means spotted white and black and skewbald white and any color but black—Simpson) *Dappled* describes a marking with small spots, patches, or specks of color or shade differing from that of the background (it lay dappled with sun and shade, still, clear, and irresistible—Ertz) *Freaked* may suggest bold streaks of contrasting color (tall bare fells, capped and freaked with snow—Brophy) (the woods were freaked and pied with fresh transparent leaves and flowers—Wylie)

*Ant* flecked, stippled, marbled, mottled, spattered, spotted (see under SPOT vb)

**variety** 1 Variety, diversity are comparable when they are used in reference to a group, class, or complex whole and denote the state or quality of being composed of different parts, elements, or individuals. *Variety* may imply that the things which differ, whether they are fundamentally similar or completely dissimilar, are related because they contribute to the same end or play a part in the formation of the same whole (his *variety* is to be praised . . . what is distressing . . . is his style—Mailer) (most workers would prefer some *variety* in their work, but they cannot get it—Hobson) *Diversity*, though often used interchangeably with *variety*, distinctively stresses the marked difference or divergence of the individuals, parts, or elements, and seldom suggests even a class or categorical likeness (the practical reduction of human *diversity* to subhuman uniformity, of freedom to servitude—Huxley) (the moral and intellectual explosion needed . . . to reestablish tolerance of qualitative *diversity* and intellectual freedom as the true basis of democracy—Julian Huxley) (the great *diversity* among human beings)

*Ant* *dissimilarity, unlikeness, difference, divergence, divergency: multifariousness, variousness (see corresponding adjectives at MANY): miscellaneousness or miscellany, heterogeneousness or heterogeneity, assort edness or assortment (see corresponding adjectives at MISCELLANEOUS)

2 Variety, subspecies, race, breed, cultivar, strain, clone, stock are comparable when they mean a group of related plants or animals narrower in scope than a species. These terms tend to be variable in application and subject to confusing overlap in use, but all can carry distinctive implications. Variety stresses deviation from a type; historically, it denotes an infraspecific category differing from the typical form of the species in characters that are too trivial or too inconsistent to justify its separation as a distinct species. In modern use it is appropriately selected when it is desirable to call attention to such deviation without making any specific taxonomic suggestion or it may be used specifically of any such divergent group developed under human control (as by selective breeding, hybridization, and cultivation) (an early *variety* of peach) (developing new *varieties* to meet special conditions)

**Subspecies**, which stresses subordinate status, is primarily a taxonomic term applicable to a morphologically distinguishable subdivision of a species that is geographically isolated but physiologically capable of interbreeding with other comparable subdivisions of the same species. *Race* stresses common ancestry and differentiation based on readily discernible hereditary characters (a *race* of albino mice) As applied to the human species (*Homo sapiens*), *race* is a highly controversial term that basically denotes any of the primary subdivisions of recent man historically native to distinct parts of the world and distinguished by relatively fixed characters in physical type (as skin color, hair form, and skull shape) (the Caucasoid *race* (the Mongoloid *race* (in more general use *race* may apply to either large or small groups within a species. Though often used as if interchangeable *race* and *variety* are not exactly correspondent; while they sometimes agree, they more often overlap in their reference, for *race* emphasizes a common descent, while *variety* stresses divergence from a type. *Breed* can refer to a group within a species of animals or occasionally of plants the members of which presumably share a common ancestry and are visibly similar in most characters. More specifically *breed* refers to such a group (as Jersey cattle or beagle dogs) that has been developed under human control chiefly through selective breeding and the fixing of desired qualities. *Cultivar* applies specifically to a race or breed of plants originated (as by selection or hybridization) under cultivation. *Strain*, like *variety*, stresses difference, but it is more likely to be used of subdivisions of subdivisions (as subspecies, or especially breeds or varieties) than, as *variety* typically is, of
primary subdivisions of the species. It is especially applicable when the distinguishing character is a physiological quality (as vigor, or yield, or virulence); the term may imply human control as a means of gaining this result (as through crossing or inbreeding) or it may imply chance variation (the appearance of virulent and antibiotic-resistant bacterial strains) or controlled conditions (an improved strain of Golden Bantam corn) (superior milking strains have been developed in most dual-purpose breeds of cattle). Clone is the most precisely delimited term of this set; it denotes all the individuals that constitute the asexually produced progeny of a single parent and are therefore genetically identical. Though applicable to organisms (as bacteria and protozoans) that reproduce asexually in nature, it is used typically of economic plants that are propagated by such means as dividing, budding, or grafting and in such use may come close to variety, race, or strain; thus, one can speak of the Baldwin variety of apple or the Baldwin clone. Stock places emphasis upon community of origin and genetically close relationship in the group but its range of reference is not clearly defined. Often also it carries over from other senses of the word the notion of being a source or original (culled out a vigorous stock from which he selected several clones) (the several stocks developed by inbreeding were crossed to gain hybrid vigor).

various 1 different, diverse, divergent, disparate

Ana *distinct, separate: distinctive, peculiar, individual (see characteristic): varying, changing (see change vb)

Ant uniform: cognate

2 many, several, sundry, divers, numerous, multifarious

Ana *miscellaneous, heterogeneous, assorted

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
for the cause of freedom—\textit{you have deeply ventured; but all must do so who would greatly win}—\textbf{Byron}\textbf{.} But \textit{venture} is often used in a weakened sense to mean little more than \textit{dare} or, sometimes, \textit{attempt} (\textit{imagine the fate of a university don of 1860, or 1870, or 1880, or even 1890 who had ventured to commend Leaves of Grass to the young gentlemen—Mencken}) (\textit{this class fellows were all rather gnomily polite to him, and one or two ventured awkward words of condolence—Archibald Marshall})

\textbf{Hazard} usually implies the putting of something to the chance of losing it; the term suggests more uncertainty or precariousness than \textit{venture} and less hope of a favorable outcome and is often used in place of \textit{venture} because of this implication (\textit{men that hazard all do it in hope of fair advantages—Shak.}) (\textit{his own possessions, safety, life, he would have hazarded for Lucie and her child, without a moment's demur—Dickens}) (Like \textit{venture}, \textit{hazard} is also often used in a much weaker sense but it comes closer to \textit{dare} than to \textit{attempt} (\textit{sometimes as he hunted he got a glimpse of the giraffe moving through the bush, but was never near enough to hazard a shot—Cloete}) (\textit{no Elizabethan dramatist offers greater temptation: to the scholar, to hazard conjecture of fact; and to the critic, to hazard conjecture of significance—T. S. Eliot})

\textit{Risk} carries a still stronger implication of exposure to real dangers and of taking actual chances (\textit{Captain Cook had sailed straight through the middle of the group, not risking a landing because of the fierce aspect of the natives—Heiser}) (\textbf{Chance} may suggest a trusting to luck and a sometimes irresponsible disregarding of the risks involved in an action or procedure (\textit{decided to withdraw from Kentucky rather than chance defeat in enemy territory—Hay}) (\textit{I'll chance it, if it kills me—Jeopardize} carries further the implication of exposure to dangers; it implies not only that they are a constant threat but that the odds in one's favor are equally or even unfavorably balanced with those against one (\textit{found it difficult to steer a course that should not jeopardize either his loyalty or his honesty—Sidney Lee}) (\textit{no traveler from abroad, however fair-minded, could tell the truth about us without jeopardizing his life, liberty, and reputation—Brooks})

\textbf{Endanger} and \textbf{imperil} both stress exposure to dangers or perils, and do not in themselves throw emphasis upon a taking of chances. \textbf{Imperil} may imply more certainty or more imminence to the predicted risk than \textbf{endanger} but the two words are often used interchangeably without significant loss (\textit{not so great a wind as to endanger us—Defoe}) (\textit{condemned the abolitionists as agitators who actually endangered the cause of freedom—Cole}) (\textit{a jungle of aggressive power politics which impairs internal reconstruction, the healing of the wounds of war, and the creation of the political apparatus necessary for one world—Mark Starr}) (\textit{new technical processes and devices litter the countryside with waste and refuse, contaminate water and air, imperil wildlife and man and endanger the balance of nature itself—Kennedy})

\textbf{venturesome} *adventurous, daring, daredevil, rash, reckless, foolhardy

\textbf{Ana} bold, audacious, intrepid, *brave: stout, sturdy, stalwart (see STRONG)

\textbf{Con} *timid, timorous: *fearful, apprehensive, afraid

\textbf{veracity} *truth, verity, verisimilitude

\textbf{Ana} integrity, probity, *honesty, honor

\textbf{verb} *oral

\textbf{verbiage, redundancy, tautology, pleonasm, circumlocution, periphrasis} are comparable when they denote a fault of style or a form or mode of expression involving the use of too many words. \textbf{Verbiage} may imply delight in words for their own sake (as for their sound, their color, or their suggestions) and overindulgence in their use for these reasons; the term, however, often suggests a pointless or habitual wordiness that tends to make what is written dull, meaningless, obscure, or unduly heavy reading (\textit{his concise and well-informed speeches were welcomed amid the common verbiage of debate—Buchan}) (\textit{the almost luscious richness of Aunt Phoebe's imagination, her florid verbiage, her note of sensuous defiance—H. G. Wells})

\textbf{Redundancy} does not in general carry the implications of expansiveness, floridity, or heaviness so often apparent in \textit{verbiage}; but the term sometimes implies the use of more words than are required by idiom or syntax and so suggests a fault of style (\textit{redundancies result ... when the writer fails to perceive the scope of a word—Wesley}) (\textit{the . . . florid redundancy of Italian prose—Ellis}) (\textbf{Tautology} is needless or useless repetition of the same idea in different words (\textit{he cautioned his students to beware of such tautologies as "visible to the eye" and "audible to the ear"}) (\textbf{Pleonasm} implies the use of syntactically unnecessary words as in "the man he said." Sometimes pleonastic expressions are acceptable means of emphasis and are thought of as figures of speech (\textit{it is a pleonasm, a figure usual in Scripture, by a multiplicity of expressions to signify one notable thing—South})

\textbf{Circumlocution} and \textbf{periphrasis} denote a roundabout or indirect way of saying a thing (\textit{the gift of the pamphleteer, who cuts through academic circumlocution—Dean}) (\textit{this was not however a question to be asked point-blank, and I could not think of any effective circumlocution—Conrad}) (\textit{one of those anomalous practitioners in lower departments of the law who . . . deny themselves all indulgence in the luxury of too delicate a conscience (a periphrasis which might be abridged considerably)—De Quincey}) (\textit{"The answer is in the negative" is a periphrasis for "no"—Time})

\textbf{Ana} wordiness, verboseness, proximity, diffuseness (see corresponding adjectives at \textbf{WORDY})

\textbf{verbal} *wordy, prolix, diffuse, redundant

\textbf{Ana} grandiloquent, magnoquilous, flowery, bombastic (see \textbf{Rhetorical}: loquacious, voluble, glib, garrulous, *talkative

\textbf{Ant} laconic —\textbf{Con} *concise, terse, succinct: compact, *close

\textbf{verge} \textit{n edge, rim, brim, brink, *border, margin

\textbf{Ana} bound, *limit, end, confine: *circumference, perimeter, compass

\textbf{verify} corroborate, substantiate, *confirm, authenticate, validate

\textbf{Ana} *prove, test, try, demonstrate: *certify, attest, witness, vouch: establish, settle (see \textit{set vb})

\textbf{verisimilitude} *truth, veracity, verity

\textbf{Ana} agreement, accordance, harmonizing or harmony, correspondence (see corresponding verbs at \textit{agree}); *like-\textit{ness, similitude, resemblance

\textbf{veritable} *authentic, genuine, bona fide

\textbf{Ana} actual, *real, true

\textbf{Ant} factitious

\textbf{verity} *truth, veracity, verisimilitude

\textbf{verисучк} *dial ect, patois, lingua, jargon, cant, argot, slang

\textbf{versatile, many-sided, all-around} can all mean marked by or showing skill or ability or capacity or usefulness of many different kinds. When applied to persons, \textbf{versatile} stresses aptitude and facility in many different activities requiring skill or ability, especially the ability to turn with no diminution in skill from one activity to another without a hitch; applied to things, it stresses their multiple and diverse qualities, uses, or possibilities (\textit{a versatile student}) (\textit{the most versatile soprano now active—Kolodin}) (\textit{versatile interests}) (\textit{a versatile combat weapon}) (\textit{a versatile building material})

\textbf{Many-sided} applied to persons stresses
breadth or diversity of interests or accomplishments; applied to things, their diversity of aspects, attributes, or uses

A *many-sided* scholar and citizen

A *many-sided* and truly civilized life—Trevelyan

A *many-sided* personality

A *many-sided* agreement—Manchester Guardian

All-around implies completeness or symmetry in development, either general or within a single activity with many phases; the term need not imply special or great attainments but rather a general ability to do oneself credit; when applied to things, it implies an analogous general usefulness

Many observers have called him the best all-around reporter in the country—Walker

The all-around adaptability and quality of our men—Vosseller

An accomplished, finished, *consume* ready, apt, *quick* prompt

**verse 1**

Verse both mean a unit of metrical writing. Verse is both wider and more varied in its popular usage since it can denote a single line of such writing, such writing as a class, or, along with stanza, a group of lines forming a division of a poem and typically following a fixed metrical and sometimes rhythmical pattern. Verse may also specifically denote the part of a song preceding the refrain or chorus or a comparable part of an anthem or hymn. But in technical use and in discussion of prosody verse is restricted to the single line of metrical writing and stanza is regularly employed for the group of lines that forms a division of a poem.

2 *paragraph, article, clause, plunk, count

versed *conversant

A *learned, erudite: informed, acquainted* (see information): intimate, *familiar

versifier *poet, rhymer, poetaster, bard, minstrel, troubadour

**version 1**

A *transliteration, paraphrase, metaphrase

2 *account, report, story, chronicle

vertebrae *spine, backbone, back, chine

vertex *apex

vertical, perpendicular, plumb can mean situated at right angles to the plane of the horizon or extending from that plane at such an angle. Vertical suggests a relation to the vertex or topmost point (see apex 1); it is used most often when the thing so described actually extends upward from the plane of the horizon or from its base or support in such a direction that if its direction line were produced, it would reach the zenith (vertical threads in a tapestry) (a vertical piston) (walls not quite vertical) Vertical is, of these terms, the most frequently applied to abstractions and the most common in extended use (the vertical organization of society) Perpendicular differs from vertical in being normally applied to things that extend upward or downward from the horizontal or both upward and downward; thus, one looks up or down the perpendicular face of a cliff (a perpendicular fall of water) Consequently, perpendicular is used more often than vertical to suggest little more than precipituousness or extreme steepness or stiffness and straightness of line (a perpendicular descent) (a stiff perpendicular old maid—Milford) Plumb is largely a builder's term used particularly in judging the exact verticality or perpendicularity of something by its conformity to the direction of a plumb line (the wall was plumb)

Ant horizontal

vertiginous *giddy, dizzy, swimming, dazzled

Annoy, fret, gall (see ABRADE): irritate, exasperate, nettle, provoke

Ant please, regale

A *capricious, appease, mollify, propitiate

Vivacity, animation, liveliness (see corresponding adjectives at lively): buoyancy, resiliency, elasticity (see corresponding adjectives at elastic)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
means extremely or flagrantly wicked (the nefarious neglect of their aged parents) (race prejudice is most nefarious on its polluter levels—Clurman) Flagitious and infamous both imply shameful and scandalous badness or wickedness, but the former is somewhat less rhetorical and more closely descriptive than the latter (in the beginning, the common law applied only to acts that all men, everywhere, admitted were flagitious—G. W. Johnson) (forced and flagitious bombast—T. S. Eliot) (else, perhaps, I might have been entangled among deeds, which, now, as infamous, I should abhor—Wordsworth) (Alice ... would have scoured at infamous any suggestion that her parent was more selfish than saintly—Shaw) Corrupt (see also DEBASE 1) may be applied to persons in an official capacity or to their acts, then implying a loss or lack of moral integrity or probity that makes one accessible to bribes or other inducements to go contrary to sworn duties or obligations (control of municipal government in ... many ... American cities had fallen into the clutches of corrupt political machines—Armbrister) (bent only on turning each to his own personal advantage the now corrupt machinery of administration and law—Dickinson) or the term may be more generally applied, and then suggests degradation or depravity (those moral wilderesses of civilized life which the Square automatically condemns as delinquent or evil or immature or morbid or self-destructive or corrupt—Mailer) (humanity they knew to be corrupt and incompetent—Henry Adams) Degenerate stresses a descent and deterioration from a presumed original or earlier high type or condition to one that is very low in the scale morally, intellectually, physically, or artistically. However it additionally carries so strong an implication of corruption, and so often suggests extreme viciousness that it is generally used to describe what is especially reprehensible and offensive from the historical point of view or in comparison to other members of its class or other instances of the type (preferred to prop up an effete and degenerate dynasty rather than face a vigorous reformed China—G. F. Hudson) (what he has to say is inspired by revolt against the degenerate practice of his times—Binyon) (we are solemnly warned that in the hands of modern writers language has fallen into a morbid state. It has become degenerate—Ellis) Ana debased, depraved, debauched, perverted (see under DEBASE): dissolute, profligate, *abandoned, reprobate: lewd, lascivious, wanton, lecherous, libidinous (see LICENTIOUS)

Ant virtuous

vicissitude 1 *change, alteration, mutation, permutation Ana turning, rotation, revolving or revolution (see corresponding verbs at TURN); reversal, transposition (see corresponding verbs at REVERSE): *succession, progression, sequence, series: *variety, diversity

2 *difficulty, hardship, rigor Ana *misfortune, mischance, adversity: *trial, tribulation, affliction

victim, prey, quarry denote a person or animal killed or injured for the ends of the one who kills or injures. Victim primarily applies to a living creature, usually an animal, sometimes a person, that is killed and offered as a sacrifice to a divinity; in more general use it applies to one who has been destroyed, ruined, seriously injured, or badly treated by some ruthless person or impersonal power before which he has been helpless (the victims of a pestilence) (spent much time in the back of the grocery, complaining of his poverty as if it were a new invention and he its first victim—Hudson) (was the girl born to be a victim; to be always disliked and crushed as if she were too fine for the world?—Conrad) (all are victims of circumstances; all have had characters warped in infancy and intelligence stunted at school—Russell) Prey applies to animals hunted and killed for food by more powerful carnivorous animals (the hungry family flew like vultures on their prey—Johnson) In extended sense prey applies to a victim of something that seizes or captures or falls in a manner suggestive of the action of a predatory animal (Hitler, having taken his plunge, and with such reckless bravado, now suddenly was prey to doubts—Shirer) (people who make solemn talk about art and are the natural prey of the artists of Punch—Montague) Quarry is predominantly a hunting term referable to a victim of the chase, especially one taken with hounds or hawks; it may be applied to the animal as pursued as well as the animal as taken after pursuit (the startled quarry bounds again, as fast the gallant greyhounds strain—Scott) In extended use quarry usually applies to a person or thing determined upon as a victim and vigorously and relentlessly pursued (you think you are the pursuer and she the pursued. ... Fool: it is you who are the pursued, the marked-down quarry, the destined prey—Shaw) (sometimes a man has to stalk his quarry with great caution, waiting patiently for the right moment to reveal himself—Dahl)

victor, winner, conqueror, champion, vanquisher can all denote one who gains the mastery in a contest, conflict, or competition. Victor, the more literary term, and winner, the ordinary term, usually stress the fact of defeating one's opponents; additionally victor can connote a triumph or a glorious proof of one's powers. The terms are applicable when the test is one of strength, strategy, skill, or endurance (the winner in the oratorical contest) (he who battles on her [Justice's] side, God, though he were ten times slain, crowns him victor glorified, victor over death and pain—Emerson) (life is a contest between people in which the victor generally recuperates quickly and the loser takes long to mend—Mailer) (he undoubtedly was going to be a very rich man. So her boss said. And her boss picked winners—Donn Byrne) Conqueror stresses the defeat and subjugation of an enemy or opposing force; the term is seldom used appropriately in respect to friendly games or competitions where winner is the regular term, for it usually presupposes a warlike struggle or an attempt to crush by getting the upper hand (England never did, nor never shall, lie at the proud foot of a conqueror—Shak.) (there was also in it ... a note of the triumphant conqueror, the defier of the world—Shirer) Champion applies to the one who gains the acknowledged supremacy through a contest or in a field of competition (as in an athletic contest or in a given sport). The term does not apply to a winner of any test, but only of a test in which one meets all of those of highest rank in the field or meets the one who holds the title of champion or one who challenges one's own right to hold that title (the heavyweight champion of the world) (he could end up being champion for a while. But I doubt if he could hold the title in a strong field—Mailer) Vanquisher is often used in place of conqueror and, often ironically or somewhat hyperbolically, in place of victor or winner, when there is an intent to imply an overpowering or an overwhelming or crushing defeat (but I shall rise victorious, and subdue my vanquisher—Milton) (realized that gold is not always the vanquisher of every obstacle—Cable)

victory, conquest, triumph can mean the result achieved by one who gains the mastery in a contest or struggle. Victory and conquest in their basic use carry the same implications and suggestions as the corresponding agent nouns (see VICTOR) (“Victory,” said Nelson, “is not a name strong enough for such a scene”; he called it a conquest—Southey) In their common extended use, victory
vigor, vim, spirit, dash, esprit, verve, vigilant

rival, compete, emulate

point of view, standpoint, angle, slant

Ana * disprove, refute, confute: * defend, protect, shield, guard

Ant calumniate

vindictive, revengeful, vengeful are close synonyms often used interchangeably to mean showing or motivated by a desire for vengeance. Distinctively vindictive tends to stress this reaction as inherent in the nature of the individual and, therefore, is especially applicable when no specific motivating grievance exists (there was nothing vindictive in his nature; but, if revenge came his way, it might as well be good—Stevenson) The term can imply a persistent emotion or a tendency to seek revenge for real or fancied wrongs or slights, sometimes with implacable malevolence, sometimes with spiteful malice (a vindictive man will look for occasions of resentment—James Martinque) (this zeal ... was mingled with a vindictive hatred of the Puritans, which did him little honor either as a statesman or as a Christian—Macaulay) (it is not true that suffering ennobles the character; happiness does that sometimes, but suffering, for the most part, makes men petty and vindictive—Maughan) but occasionally it implies no more than a punitive or retributive intent (a vindictive purpose, a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. Retributive punishment is the essential of medieval justice—Cohen) Revengeful and vengeful are more likely to suggest the state of one specifically provoked to action and truculently ready to seek revenge (no creature is so revengeful as a proud man who has humbled himself in vain—Macaulay) (such a close farmer, as to grudge almost the seed to the ground, whereupon revengeful Nature grudged him the crops which she granted to more liberal husbandmen—Thackeray) (knowing that by one word—Yes or Forgive or Love—she might have ... released all of the false and vindictive purpose,—a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. Retributive punishment is the essential of medieval justice—Cohen) Revengeful and vengeful are more likely to suggest the state of one specifically provoked to action and truculently ready to seek revenge (no creature is so revengeful as a proud man who has humbled himself in vain—Macaulay) (such a close farmer, as to grudge almost the seed to the ground, whereupon revengeful Nature grudged him the crops which she granted to more liberal husbandmen—Thackeray) (knowing that by one word—Yes or Forgive or Love—she might have ... released all of the false and vindictive purpose,—a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. Retributive punishment is the essential of medieval justice—Cohen) Revengeful and vengeful are more likely to suggest the state of one specifically provoked to action and truculently ready to seek revenge (no creature is so revengeful as a proud man who has humbled himself in vain—Macaulay) (such a close farmer, as to grudge almost the seed to the ground, whereupon revengeful Nature grudged him the crops which she granted to more liberal husbandmen—Thackeray) (knowing that by one word—Yes or Forgive or Love—she might have ... released all of the false and vindictive purpose,—a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. Retributive punishment is the essential of medieval justice—Cohen) Revengeful and vengeful are more likely to suggest the state of one specifically provoked to action and truculently ready to seek revenge (no creature is so revengeful as a proud man who has humbled himself in vain—Macaulay) (such a close farmer, as to grudge almost the seed to the ground, whereupon revengeful Nature grudged him the crops which she granted to more liberal husbandmen—Thackeray) (knowing that by one word—Yes or Forgive or Love—she might have ... released all of the false and vindictive purpose,—a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. Retributive punishment is the essential of medieval justice—Cohen) Revengeful and vengeful are more likely to suggest the state of one specifically provoked to action and truculently ready to seek revenge (no creature is so revengeful as a proud man who has humbled himself in vain—Macaulay) (such a close farmer, as to grudge almost the seed to the ground, whereupon revengeful Nature grudged him the crops which she granted to more liberal husbandmen—Thackeray) (knowing that by one word—Yes or Forgive or Love—she might have ... released all of the false and vindictive purpose,—a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. Retributive punishment is the essential of medieval justice—Cohen) Revengeful and vengeful are more likely to suggest the state of one specifically provoked to action and truculently ready to seek revenge (no creature is so revengeful as a proud man who has humbled himself in vain—Macaulay) (such a close farmer, as to grudge almost the seed to the ground, whereupon revengeful Nature grudged him the crops which she granted to more liberal husbandmen—Thackeray) (knowing that by one word—Yes or Forgive or Love—she might have ... released all of the false and vindictive purpose,—a purpose to punish you for your suspicion—Cowper) (the prison sentence handed down by a court that was more puzzled than vindictive was mild—Purdy) (the punishments in Dante's Inferno, though seldom devoid of a certain horrible appropriateness, are essentially vindictive in their nature. violence

*intense, vehement, fierce, exquisite

Virago, amazon, termagant, scold, shrew, vixen can all mean a woman of pugnacious temperament. Virago and amazon are often interchangeable; both tend to suggest physical vigor and size and often a masculine quality of mind or interests (viragoes with red faces, thick necks, and tousled lint-colored hair screamed at all present to come and have a shy at the wooden figures—Lynd) (*an amazon of a woman appeared suddenly in the doorway. She was well over six feet and well over two hundred pounds—Nancy Rutledge) (*a few daring amazons of the horsey set—Dos Passos) and both may apply to a woman engaged in typically masculine pursuits and especially fighting (*their leader was a fiery little Mexican virago scarcely out of her teens—Green Peyton) (*Charles XII of Sweden had a bearded female grenadier in his army, a reputedly beautiful amazon—Joseph Mitchell) (*the warrior maiden Marfisa, a true virago and amazon—R. A. Hall) (*Distinctively virago can imply fierceness of temper and a domineering nature (*sometimes she abjures her femininity, she hesitates between chastity, homosexuality, and an aggressive virago attitude—Parshley) (*certain viragoes, who made life a burden to the brothers—G. W. Johnson) while amazon is more likely to suggest physical strength and size and often a masculine quality of mind or interests (amazons with red faces, thick necks, and tousled lint-colored hair) (*the prime minister is virtually the ruler of his country) (*their father’s request is virtually a command) (*the British contended that the American colonies were virtually represented) Practically implies a difference between what is enough for practical purposes or from the point of view of use, value, or effectiveness and what satisfies the requirements formally or absolutely (baldly spotted fruit is practically worthless) (*a road is practically finished when traffic can pass over it freely and without interruptions) Morally implies a difference between what satisfies one’s judgment and what is required for proof by law or by logic (*the jurors were morally certain of the defendant’s guilt, but owing to a lack of evidence, they were compelled to render a verdict of “not guilty” (*When morally qualifies words such as “impossible,” it occurs in a statement of a conviction and is slightly less positive than “absolutely” (*it is morally impossible to accomplish more under the circumstances) Virtue (*goodness, morality, rectitude

Ana honor, *honesty, integrity, probity: *fidelity, piety, fealty, loyalty: righteousness, nobility, virtuousness (see corresponding adjectives at moral)

Ant vice

2 *excellence, merit, perfection

Ana *worth, value: effectiveness, efficacy, effectualness (see corresponding adjectives at effective): strength, might, *power, force

Virtuoso *expert, adept, artist, artiste, wizard

Virtuous *moral, ethical, righteous, noble

Ana pure, *chaste, modest, decent: *upright, just, honorable

Ant vicious

Virulent *poisonous, venomous, toxic, mephitic, pestilential, pestilential, miasmatic, miasmatical

Ana *deadly, mortal, fatal, lethal: *narcissistic, noxious, baneful, deleterious, malignant, malign (see malicious)

Virus 1 *poison, venom, toxin, bane

2 *germ, microbe, bacterium, bacillus

Visage *face, countenance, physiognomy, mug, puss

Vision 1 *revelation, prophecy, apocalypse

2 *fancy, fantasy, phantasy, phantasm, dream, dreamland, nightmare

Anna illusion, *delusion, hallucination, mirage: *imagination, fancy, fantasy

Visionary adj *imaginative, fanciful, fantastic, chimerical, quixotic

Visit n Visit, visitation, call are comparable when they mean a coming to stay with another, usually for a brief time, as a courtesy, an act of friendship, or a business or professional duty. Visit applies not only to such a stay with
another (pay a visit to a friend) (a physician's bill for visits) (a welfare worker's visit) but also, to a more protracted stay as a house guest or in a place where one goes for rest, entertainment, or sightseeing (a week's visit in a friend's summer home) (off for a visit to Washington) (plan a visit to Europe) Visit (see also TRIAL 2) is chiefly employed in reference to a formal or official visit (as to a church, a college, or a ship) made by one in authority (as an ecclesiastical superior, a school superintendent, or a medical inspector) (parochial visitations of a bishop) (a visitation and search of a merchant ship can be made only by an authorized official) The term may also be used of something that visits one, often by or as if by the will of a superior power (the gentle visitations of calm thought—Shelley) or that is visited upon one and that is usually regarded as an affliction (an illness, a maiming accident or some other visitation of blind fate—Conrad) Call applies only to a brief visit, such as one makes upon a person who is not a friend, but with whom one has social or official relations (a society woman must give a portion of her time to formal calls) or by a person in quest of business or of a business order (the morning call of the grocer's boy) The term, however, may be used in place of visit for a short social visit. 

Visitant *visitor, guest, caller

Visitation 1 *visit, call
2 *trial, tribulation, affliction, cross
Ana *misfortune, mischance, adversity: calamity, catastrophe, *disaster: hardship, vicissitude (see DIFFICULTY)

Visitor, visitant, guest, caller mean one who visits another

Visitant is chiefly employed in reference to a formal or official visit (as to a church, a college, or a ship) made by one in authority (as an ecclesiastical superior, a school superintendent, or a medical inspector) (parochial visitations of a bishop) (a visitation and search of a merchant ship can be made only by an authorized official) The term may also be used of something that visits one, often by or as if by the will of a superior power (the gentle visitations of calm thought—Shelley) or that is visited upon one and that is usually regarded as an affliction (an illness, a maiming accident or some other visitation of blind fate—Conrad) Call applies only to a brief visit, such as one makes upon a person who is not a friend, but with whom one has social or official relations (a society woman must give a portion of her time to formal calls) or by a person in quest of business or of a business order (the morning call of the grocer's boy) The term, however, may be used in place of visit for a short social visit.

vixen shrew, scold, termagnant, *virago, amazon
vocabulary *language, phraseology, diction, phrasing,
*word, term
vocal 1 Vocal, articulate, oral can all mean uttered by the
voice or having to do with utterance. Vocal implies the use
of voice, but not necessarily of speech or language; thus,
vocal sounds are sounds produced by a creature that has
vocal organs; vocal music is contrasted with instrumental
music because the musical tones are produced by the voice
rather than by a musical instrument. Articulate implies
the use of distinct intelligible language; thus, speech is the
uttering of articulate sounds; articulate cries are those
that are expressed in meaningful words rather than in
meaningless sounds <Constance nodded her head in
thorough agreement. She did not trouble to go into articu-
late apologies—Bennett> Oral implies the use of the
voice rather than the hand (as in writing or typing) in
communicating (as thoughts, wishes, orders, questions, or
answers) <an oral examination> <an oral command> <the
oral transmission of tradition>
2 Vocal, articulate, fluent, eloquent, voluble, glib can mean
being able to express oneself clearly or easily, or showing
such ability. Vocal usually implies ready responsiveness
to an occasion for expression or free and usually forceful,
insistent, or emphatic voicing of one's ideas or feelings
<earth's millions daily fed, a world employed in gathering
plenty yet to be enjoyed, till gratitude grew vocal in the
praise of God—Cowper> <this instantaneous indignation
of the most impulsive and vocal of men was diligently
concealed for at least six weeks, with reporters camped
upon his doorstep day and night—Mencken> Articulate
is as often applied to thoughts and emotions with reference
to their capacity for expression as to persons or their
utterances. It implies the use of language which exactly
and distinctly reveals or conveys what seeks expression
<the deepest intuitions of a race are deposited in its art;
no criticism can make these wholly articulate—Binyon>
<the primitive poet ... was used by the community to
make its spiritual needs articulate—Day Lewis> <how can
you write about a literary subject ... when you yourself
are hardly articulate, can scarcely express the most
commonplace thoughts—Edmund Wilson> Fluent stresses
facility in speaking or writing and copiousness in the flow
of words; unlike vocal and articulate, it refers chiefly
to the manner of the expression rather than to the matter
seeking expression <it was his gift to be fluent on any-
things or nothing—Stevenson> The word can carry a de-
nite suggestion of depreciation or contempt <politically
at the mercy of every bumpious adventurer and fluent
character—Shaw> but also it is the only one of these
words capable of implying facility and ease in the use
of a foreign language <had a fluent command of idiomatic
French> Eloquent usually implies fluency but it suggests
also the stimulus of powerful emotion and its expression
in fervent and moving language; it is applicable not only
to speakers but to writers and can be extended to things
that convey similar suggestions <see also EXPRESSIVE>
<presented his arm reassuringly, and the gesture was more
eloquent than any words could be—Wolfe> <Tully was
not so eloquent as thou, thou nameless column with the
buried base—Byron> <the wording of the Weimar Con-
stitution was sweet and eloquent to the ear of any demo-
cratically minded man—Shirer> Voluble and glib both
imply loquacity and are usually derogatory. Voluble sug-
gests a flow of language that is not easily stemmed <indulge
in voluble explanations> <a voluble person, but at last the
flow of words stopped—Glasgow> Glib implies such facil-
ity in utterance as to suggest superficiality or emptiness in
what is said or slipperiness or untrustworthiness in the
speaker <a glib reply> <he has a glib tongue> <their
only virtue, a glib conversance with such topics as came
up for discussion—Sackville-West>
Anna expressing, voicing, venting (see EXPRESS vb):
*expressive, sentientious, eloquent
vociferate *roar, bellow, bluster, bawl, clamor, howl, hu-
late
Anna *shout, yell, shriek, scream, screech, holler
vociferation see under vociferate at ROAR vb
vociferous, clamorous, blatant, strident, boisterous, ob-
streperous are comparable when they mean so loud and
noisy, especially vocally, as to compel attention, often
unwillingly. Vociferous implies both loud and vehem-
ent cries or shouts; it often suggests also a deafening
quality <watermen, fishwomen, oysterwomen, and ... all
the vociferous inhabitants of both shores—Fielding>
<voicerous vociferations of their innocence—Irving>
<voicerous protests> Clamorous can imply insistency
as well as vociferousness in demanding or protesting (it
was impossible to yield to her clamorous demands—
Reppier) but as often it stresses the notion of sustained
din or confused turbulence (the district had been clamor-
ous with trucks arriving, backing in and out ... the drivers
bawling and cursing—Peggy Bacon> Blatant implies a
tendency to bellow or be conspicuously, offensively,
or vulgarly noisy or clamorous <they were heretics of the
blatant sort, loudmouthed and shallow-minded—Exposi-
tor> <building against our blatant, restless time an unseen,
skillful, medieval wall—Lindsay> Strident basically
implies a harsh and discordant quality characteristic
of some noises that are peculiarly distressing to the ear; it
is applied not only to loud, harsh sounds but also to things
which, like these, irresistibly and against one's will force
themselves upon the attention <the colors are too striden
<the strident yellow note of the cockerel shot up into the
sunshine—Gibbons> <there was no strident old voice to
bid him do this or that; no orders to obey, no fierce and
insane faultfinding—Deland> Boisterous has usually
an implication of rowdy high spirits and shouting of customary
order and is applied to persons or things that are extremely
noisy and turbulent, as though let loose from all restraint
<from the distant halls the boisterous revelry floated in
broken bursts of faint-heard din and tumult—Jerome>
<boisterous spring winds—Cather> Obstreperous sug-
gests unruly and aggressive noisiness, typically occurring
in resistance to or defiance of authority or restraining
influences <the most careless and obstreperous merriment—
Johnson> <disrespectful of Parliamentary decorum, they
are so obstreperous that sitting sometimes have to be
suspended to stop their hubbub—Flanner> Anna
noisy, sounding (see corresponding nouns at SOUND):
bewildering, distracting (see PUZZLE vb)
voice vb *express, utter, vent, broach, air, ventilate
Anna *reveal, disclose, tell, discover, divulge: *com-
municate, impart: *speak, talk
void adj 1 *empty, vacant, blank, vacuous
Anna exhausted, depleted, drained (see DEPLET)
*bare, barren: hollow, empty, nugatory, *vain
2 *devout, destitute
void n vacuum, *hole, hollow, cavity, pocket
Anna emptiness, vacancy, vacuity (see corresponding
adjectives at EMPTY): abyss, *gulf, abyss
void

void vb vacate, *annul, abrogate, quash
volatile effervescent, buoyant, expansive, resilient, *elastic

Ana unstable, mercurial, *inconstant, fickle, capricious:
light-minded, frivolous, flippant, flighty (see corresponding
nouns at LIGHTNESS): variable, *changeable, protein
volatility *lightness, light-mindedness, levity, frivolity, flippancy, flightiness
Ana vivaciousness or vivacity, gaiety, liveliness, animation, sprightliness (see corresponding adjectives at LIVELY): unstableness or instability, mercurialness, inconstancy (see corresponding adjectives at INCONSTANT): variability, changeableness (see corresponding adjectives at CHANGEABLE)

volcano *mountain, mount, peak, alp, mesa
volition *will, conation
Ana *choice, election, option
Con *force, coercion, compulsion, duress
volubility glibness, garrulity, loquacity, talkativeness (see under TALKATIVE)
Ana fluency, glibness, eloquence, articulateness (see corresponding adjectives at VOCAL)

voluble 1 fluent, glib, eloquent, *vocal, articulate
Ana copious, abundant, *plentiful: *easy, facile, effortless, smooth
Ant stuttering, stammering
2 glib, garrulous, loquacious, *talkative
Ant curt
volume 1 magnitude, *size, extent, dimensions, area
2 *bulk, mass

voluntary, intentional, deliberate, willful, willing can mean constituting or proceeding from an exercise of free will. Voluntary, the most widely applicable of these terms, often implies not only freedom from constraint but freedom from the control of an influence that might suggest, prompt, or incite action; it does not necessarily imply that these influences have not been operative, but it usually suggests that the decision is the result of one’s free choice (a voluntary renunciation of his inheritance) (a voluntary confession) (a voluntary system ... which possessed a certain pleasant dignity denied to the systems of a more compulsory sort—Sackville-West). Often the term carries another, sometimes a different, implication, such as that of spontaneity (voluntary contributions) (our voluntary service he requires not—Milton) or, especially when the opposition is to involuntary, that of subjection to or regulation by the will (voluntary movements of the eyes) (voluntary muscles) or that of prior consideration and clear choice (voluntary manslaughter) or that of absence of any legal obligation or compulsion (as to do or make) (voluntary bankruptcy) or of any valuable consideration in return for doing or making (voluntary conveyance of property) Intentional applies chiefly to acts or processes entered into in order to achieve a desired end or purpose or to the end or purpose so willed or effected; the use of the word eliminates all suggestion of the possibility of accident or inadvertence (an intentional insult) (not one in a thousand) perpetrates any intentional damage to fish, food, or flowers—Jeffries. Deliberate (see also DELIBERATE 2, SLOW) adds the implication of full knowledge or full consciousness of the nature of one’s intended act and a decision to go ahead in spite of such knowledge or consciousness (a deliberate falsehood) (deliberate murder) (an organized and deliberate attack—carefully planned and calculated—N.Y. Times). Willful (see also UNRULY) adds to deliberate the implications of a refusal to be taught, counseled, or commanded, and of an obstinate determination to follow one’s own will or choice in full consciousness of the influences or arguments opposed to the attitude adopted or the action or deed contemplated (willful murder) (willful ignorance) (his willful abuse of his children) (willful blindness to ascertained truth—Inge). Willing carries, in contrast, an implication of characteristics (as agreeableness, openness of mind, or absence of reluctance) that makes one ready or eager, without suggestion or without coercion, to accede to the wishes or instructions of others or to do something or effect some end pleasing to them (how curious is that instinct which makes each sex, in different ways, the willing slave of the other!—Jeffries) (willing service) (where ears are willing, talk tends to be loud and long—Huxley). Ana chosen, elected, opted (see CHOOSE): *free, independent, autonomous
Ant involuntary: instinctive (sense 2) —Con compelled, coerced, forced (see FORCE vb)

voluptuous luxurious, sybaritic, epicurean, *sensual, sensual
Ana indulging or indulgent, pampering (see corresponding verbs at INDULGE): *luxurious, opulent, sumptuous
Ant ascetic

vomit *belch, burp, disgorge, regurgitate, spew, throw up
Ana *vomit, expel, oust

voracious, glutinous, ravenous, ravishing, rapacious can all mean excessively greedy and can all apply to persons, their appetites and reactions, or their behavior. Voracious implies habitual gorging with food or drink, or with whatever satisfies an excessive appetite (a voracious eater) (a voracious reader) (voracious birds, that hotly bill and breed, and largely drink—Dryden). Gluttonous differs from voracious chiefly in its common suggestions of covetous delight (as in food) and of acquiring or eating past need or to the point of satiety (he was gluttonous for jewels—Guinther) (though a Norman was not gluttonous, he was epicurean—Lyton) (his gluttonous appetite for food, praise, pleasure—Guérard). Ravenous implies excessive hunger and suggests violent or brutal methods of dealing with food or with whatever satisfies an appetite (he contracted a habit of eating with ravenous greediness. . . . The sight of food affected him as it affects wild beasts and birds of prey—Macaulay) (he had mad hungers that grew more ravenous as he fed them—Wilde). Ravening is sometimes employed in place of ravenous (the hordes of ravening ants—Beeby) but more often it comes close to rapacious in suggesting a violent tendency to seize or appropriate to oneself in the manner of a bird of prey or a predatory animal (beare of false prophets, which come to you in sheep’s clothing, but inwardly they are ravening wolves—Mt 7:15). Rapacious may imply the seizure of food (rapacious animals we hate: kites, hawks, and wolves, deserve their fate—Gay) or more often it suggests excessive and utterly selfish acquisitiveness or cupidity (the Indians, who, though often rapacious, are devoid of avarice—Parker) (the European nations, arrogant, domineering, and rapacious, have done little to recommend the name of Christianity in Asia and Africa—Inge).

Ana greedy, grasping, acquisitive, *covetous: satiating, satisfying, surfeiting, gorging (see SATIATE)

vortex *eddy, whirlpool, maelstrom

voteary *enthusiast, fanatic, zealot, bigot

vote n *suffrage, franchise, ballot
vouch *certify, attest, witness
Ana *support, uphold: *confirm, substantiate, verify, corroborate
vouchsafe *grant, accord, concede, award
Ana *give, bestow, confer, present: descend, deign, *stoop: *oblige, accommodate, favor

Ana analogous words
Ant antonyms
Con contrasted words
See also explanatory notes facing page 1
wage or wages, salary, stipend, fee, pay, hire, emolument
can all mean the same thing paid to a person for his labor or services. Wage or wages applies chiefly to an amount paid on a daily, hourly, or piecework basis and typically at weekly intervals for labor, especially labor that involves more physical than mental effort (a gardener's wages) (a steelworker's daily wage) Salary and stipend both usually apply to compensation at a fixed, often annual, rate that is paid in regular (as weekly or monthly) installments but stipend is more likely to apply to the compensation of a teacher, a clergyman, or a magistrate, or it may denote money received from a scholarship or a pension (many a person has brought up a family on a stipend of seventy pounds a year—Shaw) Fee applies to the price usually in the form of a fixed charge, asked or paid for the service of a professional (as a physician, lawyer, musician, or artist) when such service is requested or required (pay the surgeon's fee for a major operation) (a lawyer's retaining fee) (a pianist's fee for a concert) Pay can replace wages, salary, or stipend (fired and told to draw his pay) (a teacher's pay) (even a preacher needs adequate pay) and is the one of these four terms freely used in combination and attributively (waiting for pay day) (paycheck) (crumpled empty pay envelope) Hire, which basically denotes payment made for the temporary use of something (as the property or money of another), is occasionally and especially in legal use applied to compensation for labor or services and is then equivalent to wages or salary (the laborer is worthy of his hire—Lk 10:7) (lends his pen for small hires—Meredith) Emolument, usually in the plural, often means the financial reward of one's work or office (the emoluments of a profession—Gibbon) (a worthier successor wears his dignity and pockets his emoluments—Hawthorne) or more specifically rewards and perquisites other than wages or salary (emoluments of value, like pension and insurance benefits, which may accrue to employees—Boyce) (salary £550 with no emoluments—Farmer and Stock-Breeder) Ana remuneration, recompensing or recompense (see corresponding verbs at PAY)
wager *bet, stake, pot, ante
waggish *sportive, frolicsome, *playful, impish, mischievous, roguish
Ana facetious, jocose, jocular, humorous, *witty: jovial, jolly (see MERRY): comical, comic, *laughable, droll, ludicrous, funny

wait *stay, remain, abide, tarry, linger
Ana *delay, loiter
Con depart, leave, *go, withdraw, retire
waive cede, yield, resign, abandon, surrender, *relinquish, leave
Ana *forgo, forbear, sacrifice: concede, *grant, allow

W

wander

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
from point to point. Most of these verbs may imply walking, but most are not restricted in their reference to human beings or to any particular means of locomotion. **Wander** implies the absence of a fixed course or more or less indifference to a course that has been fixed or otherwise indicated; the term may imply the movement of a walker whether human or animal or of any traveler, but it may be used of anything capable of direction or control that is permitted to move aimlessly (**wandering** thoughtful in the silent wood—**Pope**) (**his eyes wandered over the landscape**) (**his mind wandered and he was unsure of himself—**Shirer**) (**she wandered frequently from her subject**) **Stray** carries a stronger suggestion of deviation from a fixed, true, or proper course, and often connotes a being lost or a danger of being lost (**fallows grey, where the nibbling flocks do stray—**Milton**) (**we have erred, and strayed from thy ways like lost sheep—**Book of Common Prayer**) (**though we stumbled and we strayed, we were led by evil counsellors—**Kipling**) **Roam** carries a stronger suggestion of freedom and of scope than **wander**; it usually carries no implication of a definite object or goal, but it seldom suggests futility or fruitlessness and often connotes delight or enjoyment (**like us, the Libyan wind delights to roam at large—**Arnold**) (**let the winged Fancy roam—**Keats**) (**type of the wise who soar, but never roam—**Wordsworth**) (**the charm of a quiet watch on deck when one may let one's thoughts roam in space and time—**Conrad**) **Ramble**, in contrast, suggests carelessness in wandering and more or less indifference to one's path or goal (**to ramble through the country and to talk about books—**Marquand) It often, especially in its extended uses, implies a straying beyond bounds, an inattention to details that ought to serve as guides, or an inability to proceed directly or under proper restrictions (**a vine, remarkable for its tendency, not to spread and ramble, but to mass and mount—**Cather) (**great temptation . . . to ramble on interminably in praise of the delights of sailing—**Schoettle) **Rove** comes close to **roam** in its implication of wandering over extensive territory, but it usually carries a suggestion of zest in the activity, and does not preclude the possibility of a definite end or purpose (**invaders roved through the country burning and pillaging homes in their pathway**) (**ravenous beasts freely roving up and down the country—**Fuller d. 1661) (**to seek thee did I often rove through woods and on the green—**Wordsworth) **Range** is often used in place of **rove** without loss; it may be preferred when literal wandering is not implied or when the statesmen is the sweep of territory covered rather than on the form of locomotion involved (**earth ships had ranged the cosmos far and wide—**Theodore Sturgeon) (**her imperious and hoarse voice ranged over a complete octave of requited social ambitions—**Cheever) (**his thoughts always ranged far afield—**Mencken) **Prowl** implies a stealthy or furtive roving, especially in search of prey or booty. It is not used only of animals (**even a tomcat who cannot get the tabby he wants will prowl around her prison for days—**Edmund Wilson) but often also of human beings intent on marauding (**now goes the nightly thief prowling abroad—**Cowper) but it is also applied with little or no connotation of an evil intention to persons, especially those of a restless or vagabond temperament, who rove, often singly, through the streets or the fields in a quiet and leisurely manner (**if I should prowl about the streets a long time, don't be uneasy—**Dickens) **Gad** and **gallivant** imply a wandering or roving especially by those who ought to be under restrictions (as servants, children, husbands or wives, and persons who have not much strength or enough money) **Gad**, usually with **about**, may suggest a bustling from place to place idly or for the most trivial ends and often to the detriment of one's actual duties (**her upper housemaid and laundry maid, instead of being in their business, are gallivanting about the village all day long—**Austen) (**he disapproved of her gadding about by herself—**Galsworthy) **Gallivant** adds to **gad** the implication of a search for pleasure or amusement or the use of an opportunity to display one's finery (**her father refused to allow her to go gallivanting around with any of her suitors**) (**young girls dressed in their Sunday best gallivanting along the highways**) **Traipse**, which commonly suggests more vigor in movement and less aimlessness in intent than the remaining terms, may come close to **come, go, or travel** in meaning (**in her late sixties she traipsed over Europe with a crony of equal years—**Leavitt) (**how old . . . does he think a man should be before he is barred from traipsing around making political speeches—**N. Y. Times) (**there traipsed into town a little thing from away off down in the country—**Weltly) Even when used with reference to an erratic course **traipse** ordinarily implies a positive purpose (**they lacked the time and energy to traipse around looking for the sort of thing they had in mind—**Kahn) or stresses a bustling activity (**other crowds like this: the yellow-faced swarm that pours out of shipyards, say, at five o'clock, the swarm that traipses Oxford Street, the mad swarms at the greyhound tracks—**Pritchett) or a wearying expenditure of energy (**she traipsed around the provinces playing small parts in second-rate companies at a miserable salary—**Maugham) (**kings . . . traipsed here and there with frenetic energy—**J. E. M. White) Sometimes the term loses most of its reference to a course and then stresses a dashing or flunting manner of going (**people . . . who traipsed about in trite monotonous flippery—**Peggy Bennett) (**I got a job . . . as a model. I'd traipse around stepping through lace hems and gabbing to the customers—**New Yorker) **Meander** may be used in reference to persons and animals but more characteristically in reference to things (as streams, paths, or roads) that follow a winding or intricate course in such a way as to suggest aimless or listless wandering (**rivers that . . . meandered across the vast plains—**Haggard) (**across the ceiling meandered a long crack—**Galsworthy) (**the gray gelding meandered along through the hills—**Anderson) **wane** *abate, subside, ebb* **Ana** *decrease, dwindle, lessen, diminish* **Con** *increase, augment: mount, soar,* tower, surge.*rise*** **want** vb 1 *lack, need, require* **Ana** *demand, claim, exact* **Con** *have, hold, own, possess, enjoy* 2 *desire, wish, crave, covet* **Ana** *long, yearn, hanker, pine, hunger, thirst: aspire, pant, *aim** **Con** refuse, *decline, reject, repudiate, spurn** **want** n 1 *lack, dearth, absence, defect, privation* **Ana** *need, necessity, exigency: deficiency (see corresponding adjective at DEFICIENT)* **Con** plentifulness or plenty, abundance, copiousness (see corresponding adjectives at PLENTIFUL) 2 destitution, *poverty, indigence, privation, penury* **Ana** pinch, strain, pass, exigency (see JUNCTURE): meagerness, scantiness, exiguosity (see corresponding adjectives at MEAGER) **Con** affluence, opulence, riches, wealth (see corresponding adjectives at RICH) **wanton** 1 *licentious, libertine, lewd, lustful, lascivious, licidinous, lecherous* **Ana** *immoral, unmoral, amoral: *abandoned, profligate,
dissolute, probate

Ant chaste — Con pure, modest, decent (see CHASTE): virtuous, * moral

2 * supererogatory, uncalled-for, gratuitous

Ana * malicious, malevolent, spiteful: wayward, * contrary, perverse

war vb battle, * contend, fight

Ana * resist, withstand, combat, oppose, fight: strive, struggle, endeavor, essay, * attempt

warble vb * sing, troll, carol, descant, trill, hymn, chant, intone

ward avert, * prevent, preclude, obviate

Ana block, bar, obstruct, impede, * hinder: forestall, anticipate (see PREVENT): * frustrate, balk, thwart, foil

Ant conduct to

wariness carelessness, caution, circumspection, calculation (see under CAUTIONOUS)

Ana alertness, watchfulness (see corresponding adjectives at WATCHFUL): prudence, discretion, foresight, forethought, providence

Ant foolhardiness: brashness (of persons) — Con careless, heedless, thoughtless, inadvertence (see corresponding adjectives at CARELESS): recklessness, rashness (see corresponding adjectives at ADVENTUROUS)

warlike * martial, military

Ana bellicose, * belligerent, pugnacious, combative, contentious: fighting, warring, contending, battling (see CONTEND)

Con * pacific, peaceable, peaceful

warm adj warmhearted, sympathetic, * tender, compassionate, responsive

Ana * loving, affectionate: cordial, * gracious, affable: ardent, fervent, passionate (see IMPASSIONED): * sincere, heartfelt, hearty, wholehearted

Ant cool: austere

warmhearted warm, sympathetic, * tender, compassionate, responsive

Ana * loving, affectionate: * kind, kindly, benign, benignant: heartfelt, hearty, wholehearted, * sincere

Ant coldhearted — Con austere, * severe, stern: * cold, cool, frosty, frigid

warn, warn vb, warning vb, warn vb, warn vb, caution can mean to let one know of approaching or possible danger or risk. Warn is the most comprehensive of these terms; in most of its senses it stresses a timely notification that makes possible the avoidance of a dangerous or inconvenient situation <warn ships of an approaching hurricane> <five minutes before the end of the class period, a bell rings to warn the students to get their books and start their tests> Additionally, the word may carry an implication of admonition <warned him of the consequences of his folly> or of exhortation <the priestly brotherhood... prompt to persuade, exhort, and warn> or of threats of punishment, reprisal, or personal violence <I shall not take him at his word about fishing, as he might change his mind another day, and warn me off his grounds—Austen> Forewarn carries a stronger implication of advance notification than warn and may also suggest impending though not imminent danger or peril <I will arm me, being thus forewarned—Shak> <he knew not one forewarning pain—Wordsworth> Caution commonly emphasizes advice that puts one on one's guard or that suggests precautions <cautioned him against unwarranted expectations> <the doctor cautioned him against overindulgence in strenuous exercise>

Ana apprise, * inform, advise, notify: admonish (see REPROVE): advise, counsel (see under ADVISE)

warp vb distort, contort, * deform

to squander their lives on the gratuitous work that great art
demands—Edmund Wilson> (the most brilliant journalist of my generation ... often squanders his genius for invective—T. S. Eliot> Dissipate, in the specific sense here considered (see also SCATTER), implies loss by extra-
gance, as if what is expended had been scattered to the four winds; it goes further than waste or squander, which
do not, as does dissipate, in themselves imply exhaustion or near exhaustion of the store or stock (its endowment
dissipated in worthless securities, the institution was closed—Amer. Guide Series: N.C.) (the face of one
whose essential innocence could not be dissociated by maturity, even tragedy—Hervey> Fritter, usually with
away, implies expenditure on trifles or by bits; it usually suggests a gradual disappearance (as of money, of property,
or of something of value) (the friend had lost $300,000, and Lasher had frittered away almost as much—Cerf>
(if we fritter and fumble away our opportunity in needless, senseless quarrels—L. B. Johnson> Consume basically
stresses a devouring or destroying (the house was con-
sumed by fire) (see also EAT, MONOPOLIZE), but it can mean
to waste or squander entirely as if by devouring. In
this use it is decreasingly frequent with regard to money or
property (having then consumed all his estate he grew
very melancholy—Anthony Wood> but in reference to time or energy spent unprofitably, it is not uncommon (the
day was consumed attending to a multitude of little things)
(the heat, the exertion had consumed all superfluous
energy—Hervey>
Ana> *spend, expend, disburse: *distribute, dispense;
*scatter, disperse, dispel: *deplete, drain, exhaust, impoverish
Ant> save: conserve
wasted> pinched, cadaverous, *haggard, worn, careworn
Ana> gaunt, scrawny, skinny, angular, rawboned (see
LEAN adj)
Con> sturdy, *strong, stout, stalwart: robust, *healthy
waster> *spendthrift, profligate, prodigal, wastrel
Ana idler, loafer, loung (see corresponding verbs at
IDLE): squanderer, dissipater, fritter (see corresponding
verbs at WASTE)
wastrel> *spendthrift, profligate, prodigal, waster
Ana> reprobate, *outrage: loafer, idler, loung (see corre-
sponding verbs at IDLE): scoundrel, rascal, rogue, scamp
(see VILLAIN)
watch> vb 1) tend, mind, attend
Ana guard, protect, shield, safeguard (see DEFEND)
2 look, *see
Ana* gaze, gape, stare, glare: *scrutinize, scan, inspect,
examine
watchful, vigilant, wide-awake, alert are comparable when they
mean on the lookout especially for danger or for opportunities. Watchful is the general word (the five
watchful senses—Milton> (became almost remote, strangely watchful, looking back from time to time as
though they were being followed—Malamud> Vigilant implies keen, courageous, often wary, watchfulness (be
sober, be vigilant) because your adversary the devil, as
a roaring lion, walketh about, seeking whom he may
devour—1 Pet 5:8) (we should be eternally vigilant against attempts to check the expression of opinions that
we loathe—Justice Holmes> Wide-awake stresses keen awareness, more often of opportunities and relevant
developments than of dangers (merchants who ... were ... wide-awake and full of energy—van Loon) Alert
stresses readiness or promptness in apprehending and
meeting a danger, an opportunity, or an emergency (not
only watchful in the night, but alert in the drowsy after-
noon—Pater> (our wits are much more alert when en-
gaged in wrongdoing ... than in a righteous occupation
—Conrad>
Ana* cautious, wary, chary, circumspect: *quick, ready, prompt
Con> *careless, heedless, thoughtless, inadvertent
waterlog> *soak, drench, saturate, steep, impregnate, sop
waterspout> *whirlwind, cyclone, typhoon, hurricane, tornado, twister
wave> vb *swing, flourish, brandish, shake, thrash
Ana> wield, swing, manipulate, *handle, ply: undulate, sway,
*swing, fluctuate: *shake, quiver, quaver
waver> vb 1 fluctuate, oscillate,pendulate, vibrate,*swing, sway, undulate
Ana> flicker, flutter, hover, *flicker, flicker, quiver, quaver,
tremble, *shake
2 falter, *hesitate, vacillate
Ana> balk, boggle, stickle, scruple, *demur, shy: fluctuate,
oscillate (see SWING)
way n 1 Way, route, course, passage, pass, artery mean,
in common, a track or path traversed in going from one
place to another. Way is general and inclusive of any track
or path; it can specifically signify a thoroughfare especi-
ally in combinations and in fixed phrases (highway)
(live across the way) (the city accepted the new street
and public way) (long inclined ways, paved with cobble-
stones, leading down between great warehouses to the
water's edge—Santayana) or a direction or track that is,
or can or should be, followed (lost his way) (the short
way to town) (the only other village was one day's mule
trip farther into the interior, but the way was so steep
and slippery in places that we walked almost as much as
we rode—Hitchcock> (the water continues its way down
the valley for 5 kilometers—Heiden) The term also can
be extended to what leads in a specified or implied non-
spatial direction or toward a specified or implied end
(clear the way for a more purely rational interpreta-
tion of the world—Ashley Montagu> (the way was now
open for the final act—W. C. Ford> Route signifies a
way, often circuitous, followed with regularity by a person
or animal or laid out to be followed (as by a tourist or
army) (a paper route) (a milk truck following a morning
delivery route) (the dog team trails and canoe routes
of trader, trapper and missionary in the bush country—
Granberg> (a much traveled main route from Boston to
Albany> Course may be interchangeable with route but
more often implies a path followed by or as if by a stream,
star, or other moving natural object impelled by or in a
path determined by natural forces (the course of a river)
(a meteor's course) (a ship's course) (the course of the
seasons) or a predetermined or more or less compulsory
way or route followed in human activities or enterprises
(a course of study for an academic degree) (a golf course
(a racecourse> Passage stresses a crossing over or a pass-
ing through, often designating the thing passed through,
usually something narrow where transit might be restricted
(a rough passage to America by boat) (a narrow passage
from kitchen to basement) (restrict the passage into the
stomach) Pass usually designates a passage through or
over something that presents an obstacle (as a mountain or
river) (a narrow pass over the Alps) (a shallow ford
constituted the only pass across the river> Artery is
applied to one of the great continuous traffic channels (as
a central rail route, river, or highway) from which branch
off smaller or shorter channels (the Congo river would
remain the main traffic artery—Weigend) (the main
artery between Buffalo and Niagara Falls—Retailing
Daily> (the need for improvement of main arteries inter-
connecting cities and for express highways in cities—

*Britannica Bk. of the Yr.*

2 *method, mode, manner, fashion, system*  

**Ana** procedure, *process, proceeding: plan, design, scheme: practice, *habit, habitude, custom, use, usage, wont

**waylay** *surprise, ambush*  

**Ana** *attack, assault, assail: prevent, forestall

**wayward** perverse, froward, restive, *contrary, balky

**Ana** insubordinate, contumacious, rebellious: refractory, recalcitrant, intractable, headstrong, *unruly: capricious, *inconstant, fickle, unstable

**Con** amenable, tractable, *obedient: compliant, acquiescent

**weak, feeble, frail, fragile, infirm, decrepit** can mean not strong enough to bear, resist, or endure strain or pressure or to withstand difficulty, effort, or use. **Weak** is by far the widest in its range of application, being not only inter-changeable with all of the succeeding words but also capable of being applied where they are not. Fundamentally it implies deficiency or inferiority in strength; it may apply to the body, the will, the mind, or the spirit (a character too weak to resist temptation) (she wasn't a weak and silly creature . . . . She didn't swoon and give way to feelings and emotions—Farrell) (though strong in love, art all too weak in reason—Wordsworth) Often it implies a lack of power, skill, efficiency or ability to control (a weak government) (a weak team) (a weak influence) It may also suggest a sign of impairment of a thing's strength (as a defect, a fault, or a dilution) (a weak tread in a stairway) (weak tea) (a weak argument) (weak facetious echoes of a style . . . . ten years outmoded—Woolf) **Feeble** not only is more restricted than weak in its range of application but also carries a stronger implication of lamentableness or pitiableness in that weakness. It is chiefly applied to human beings and their acts and utterances, then usually implying a manifest lack or impairment of physical, mental, or moral strength (a feeble, tottering old man) (a feeble attempt to resist the enemy's advance) (rigid principles often do for feeble minds what stays do for feeble bodies—Macaulay) As applied to things, feeble implies faintness, indistinctness, impotency, or inadequacy (a feeble light) (a feeble sound) (a sense of feeble lust, of desire that mumbled incoherently as in a restless dream—Hervey) **Frail** When it implies physical weakness, suggests not so much the impairment of strength as natural delicacy of constitution or slightness of build (a small, frail man, all heart and will—Masefield) (it was marvelous that . . . the energy of her spirit could carry through so triumphantly her frail nervous system and her delicate constitution—Ellis) As applied to things the term usually implies liability to failure or destruction if the thing has physical existence (shoot the rabbits in a frail canoe) (I would lie . . . and listen to Yuriko's voice as it floated . . . through the frail partitions—Mailer) or, if immaterial, an incapacity for dealing with forces or powers opposed to it, or tending to destroy it (beauty, frail flow'r that ev'ry season fears—Pope) **Frail** is applied to the will, the conscience, the moral nature of man, it carries an even stronger implication of lack of power to resist than weak (if he prove unhonk, (as who can say but being man, and therefore frail, he may)—Cowper) (Frail fragile (see also FRAGILE 1)) is frequently used in place of frail, but it usually carries even a stronger suggestion of delicacy and of likelihood of destruction (physically frail, she was spiritually tough—Sackville-West) (passionately realizing the moment, its fleeting exquisiteness, its still, frail, fragile beauty—Rose Macaulay) **Infirm** usually implies a loss of strength, especially of physical strength, with consequent instability, unsoundness, or insecurity (elevators in loft buildings . . . that, infirm and dolorous to hear, seem to touch on our concepts of damnation—Cheever) As referred to human beings, it implies illness or more often old age (a poor, infirm, weak, and despised old man—Shak) As referred, however, to the temper, the designs, or the intentions of men, it often implies wavering or serious vacillation (infirm of purpose! Give me the daggers—Shak) **Decrepit** is as applicable to things as to persons that are worn out or broken down by use or age (such is its misery and wretchedness, that it resembles a man in the last decrepit stages of life—Fielding) (the bus is decrepit and the seats and several of the windows are held together with friction tape—Cheever)  

**Ana** debilitated, weakened, enfeebled (see WEAKEN): powerless, impotent  

**Ant** strong —Con stout, sturdy, tough, stalwart, tenacious (see STRONG)

Weak, enfeebled, debilitate, undermine, sap, cripple, disable can mean to lose or cause to lose, strength, vigor, or energy. **Weak** is the most general term of this group, most frequently implies loss of the physical strength or functional efficiency characteristic of a healthy living thing or of any of its parts or loss of the soundness or stability characteristic of a strong material structure (overexercise has weakened his heart) (unfertilized plants weaken and die) (the illness has weakened him considerably) (decay has weakened the wooden supports of the bridge) but it may imply a loss in quality, intensity, or effective power in something material or immaterial (as by a natural or forced reduction in resources, numbers, means of support, or strengthening principle) (wearing down the weakening defenders in battles of attrition—Shirer) (the growing power of Parliament weakened the authority of the sovereign) (weaken tea with water) (the spirit of adventure is not stimulated but weakened by poverty—Cohen) **Enfeeble** implies a more obvious and a more pitiable condition than weaken; it suggests the state of a person greatly weakened by old age, by severe or prolonged illness, or by a state comparable to it and usually implies helplessness or powerlessness more strongly than weaken does (so enfeebled by illness that he will probably never walk again) (a country crushed and enfeebled by war) **Debilitate** may be used in place of enfeeble but it tends to suggest somewhat less marked and often more gradually developed impairment of strength or vitality (her frail nervous system and her delicate constitution, still further debilitated by the slow progress of disease—Ellis) (a debilitating climate) **Undermine and sap** imply a weakening by something or someone working surreptitiously or insidiously and may further suggest a draining of strength or a caving in or breaking down (her health has been undermined by lack of rest and proper food) (some of the new philosophies undermine the authority of science, as some of the older systems undermined the authority of religion—Inge) (but sloth had sapped the prophet's strength—Newman) (his moral energy is sapped by a kind of skepticism—Dowden) **Cripple** basically means to deprive of the use of a limb; in extended use it suggests a deprivation of something causing a loss of strength or effectiveness comparable to that resulting from the loss of a limb (crippled diseases) (crippled by arthritis) (the obstacles which smite and cripple the men—Inge) (the war economy which carries full production to a necessarily crippled market—Mailer) (a writer possessing a sense of style only partially crippled by his reckless fecundity—A. C. Ward) **Disable** implies an intervention (as an event, an injury, or an influence) that deprives of strength or competence (these consoling yet nonetheless disabling illusions—Straight) (disabled soldiers) (do
wealthy

not let your mind be disabled by excessive sympathy—Shaw

strengthen —Con energize, *vitalize, activate: *improve, better

wealthy *rich, affluent, opulent

wean *strange, alienate, disaffect

Ana *separate, part, divide, sunder, sever, divorce

Ant *addict

wearless unwearying, unwearied, tireless, *indefatigable, uniting, unflagging

Ana dogged, pertinacious (see OBSTINATE): assiduous, sedulous, diligent (see BUSY)

Con lagging, dwindling, procrastinating (see DELAY): indolent, fainthearted, slothful, *lazy

diminutive, tiny, teeny, weeny, *small, little, minute, wedlock

weep *cry, wail, mourn, *sigh, groan

Ana *worry, annoy, harass, harry; torment, torture, *afflict, try, rack

Con lighten, *relieve, alleviate, assuage, mitigate, allay

weight n 1 significance, *importance, moment, consequence, import

Ana *worth, value: magnitude, *size, extent: seriousness, gravity (see corresponding adjectives at serious)

2 *influence, authority, prestige, credit

Ana effectiveness, efficacy (see corresponding adjectives at EFFECTIVE): *emphasis, stress: powerfulness, potency, forcefulness, forbiddiness (see corresponding adjectives at POWERFUL)

weight vb 1 load, *adulterate, sophisticate, doctor

2 *burden, encumber, cumber, weigh, load, lade, tax, charge, saddle

Ana see those at weigh 2

wealthy *heavy, ponderous, cumbersome, cumbrous, hefty

Ana *onerous, burdensome, oppressive, exacting

weird, eerie, uncanny can all mean fearfully and mysteriously strange or fantastic. Weird may be used in the sense of unearthly or preternaturally mysterious (when night makes a weird sound of its own stillness—Shelley) (a weird mixture of . . . a weird mixture of the irresponsible, megalomaniacal ideas which erupted from German thinkers during the nineteenth century—Shirer)

Eerie does not connote ordinary justifiable or explainable fear but rather a vague consciousness that unearthly or mysterious and often malign powers or influences are at work; the term is used chiefly to create atmosphere rather than to define the character of the thing so described (found awe creeping over her as her brother’s voice filled the vault of the temple, chanting words thousands of years old, in an eerie melody from a dim lost time—Wouk)

Uncanny has in general use an implication of uncomfortable strangeness or of unpleasant mysteriousness that makes it applicable not only to persons or concrete things but to abstractions (as sensations, feelings, or thoughts) (the alien elements of the Soviet Union affect him as disquieting, uncanny, because they turn up in fusion with pretenses at Western discipline, Western logic—Edmund Wilson)

Ana *mysterious, inscrutable: *fearful, awful, dreadful, horrific: *strange, odd, queer, curious, peculiar

welcome adj *pleasant, pleasing, agreeable, grateful, gratifying

Ana satisfying, contenting (see Satisfy): congenial, sympathetic (see CONSONANT)

Ant *unwelcome —Con distasteful, *repugnant, repulsive

well-nigh nearly, almost, approximately

well-timed timely, *seasonable, opportune, pat

Ana apt, happy, felicitous, appropriate, fitting (see FIT adj)

Con *premature, untimely: late, *tardy, behindhand

welter *swallow, grovel

Ana struggle, strive (see ATTEMPT vb)

wet, damp, dank, moist, humid are comparable when they mean covered or more or less soaked with liquid. Wet may be used with no further implications or it may specifically imply saturation (the rain lies in puddles on the wet ground) (the rain lies in puddles on the wet ground) (the rain lies in puddles on the wet ground) (the rain lies in puddles on the wet ground)

Often, however, the term refers to a surface covered with liquid (wet pavements) (wet pavement) (wet hands) (cheeks wet with tears) But wet often means
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

*wharf*, dock, pier, quay, slip, berth, jetty, levee signify a structure used by boats and ships for taking on or landing cargo or passengers. Wharf applies to a structure projecting from the shore that permits the entrance of a vessel for loading or unloading, but can be restricted to signify an enclosed basin which permits the entrance of a vessel for loading or unloading or which, with floodgates and a method of exhausting water, can be used for building or repairing ships. A summer lake cottage with a short dock for canoes and rowboats. A dock on Occoquan Creek—Amer. Guide Series: Va.—(the New York docks) (bring a ship into dock for repairs) Pier is interchangeable with dock or wharf especially as applied to a large or long structure shooting out quite a distance into a body of water. A sloping earthen pier for the launching of boats—G. S. Perry (a fishing dragger unloading its catch at a pier—Don Smith) (pulled the canoes up on the pier to empty it). (the New York harbor piers) Quay usually refers to an artificial embankment lying along or projecting from a shore and mainly used for loading or unloading; the term normally applies to wharves or piers characteristic of small places. A dock on the quay, and got ashore—Black (a quay is a docking facility at which vessels lie parallel to the shoreline—N.Y. Times) Slip can apply to a sloping ramp usually constructed or used where the shore is high and shore water shallow. On the slip a thick water hose was connected from a hydrant to the ship—Pizer (rolling barrels down a slip into the ship’s hold) but it, like berth, can denote the space between two piers or wharves which gives room for a ship when anchored or not in use, and is more common for such a space intended or used for ferryboat landings or boardings. About to sail from her berth at the foot of Fifth Street—Ships and the Sea (a deep-chested liner rears through the thin haze, easing her way to a Hudson river berth—Amer. Guide Series: N.Y. City) Transatlantic liners in adjoining slips down at the docks. A series of steamship piers and ferry slips. Jetty although commonly applied to a structure serving as a breakwater for a harbor applies also to a small and usually not very substantial pier of timbers (the harbor, from 30 to 60 feet deep, is protected by white marble jetties—Amer. Guide Series: Fla.) (fishermen . . . take their accustomed places on the wharves and jetties for the summer sport of gawking—Anable) (a jetty is usually built so that it lies parallel with the direction of the tidal stream, and at such jetties ships should always berth against the stream—Manual of Seamanship) Levee primarily applies to an embankment for confining or restricting floodwaters but in the South and West, where a levee is often used for landing, the term is often the equivalent of quay (build emergency levees to control a dangerously rising river) (down by the river’s borders the new levees proclaim the grands’ plans for a resurrected river traffic—Amer. Guide Series: Minn.)

*wheel* blith, cajole, *coax
*Ana* entice, inveigle, *lure, seduce, decoy
*Con* bully, browbeat, bulldoze, cow, *intimidate
*wheel* vb *turn, revolve, rotate, gyrate, circle, spin, whirl, swirl, pirouette, eddy
*while*, wile, beguile, fleet mean to pass time, especially leisure time, without being bored. One *whiles or wiles away* a space of time by causing it to be filled by something pleasant, diverting, or amusing (they *can while away* an hour very agreeably at a card table—Lamb (attempt to wile away the long days . . . telling a story to his sister—Woof!). One *beguiles* a space of leisure time or its seduction or irksomeness by occupying that time with some agreeable and not necessarily time-wasting employment (and, skilled in legendary lore, the lingering hours *beguiled—Goldsmith*) (others . . . beguiled the little tedium of the way with penny papers—Hawthorne) (to beguile his enforced leisure, I tried to teach him sundry little tricks—Grandgent) One *fleets* the time by causing it to pass quickly or imperceptibly; the term may or may not imply an effort to while time away (many young gentlemen . . . fleet the time carelessly—Shak.) (fleeting the quiet hour in observation of his pets—Lewes)

*Ana* divert, *amuse, entertain
*whim* freak, fancy, *caprice, whimsy, conceit, vagary, crotchet
*Ana* inclination, disposition (see corresponding verbs at INCLINE): *fancy, fantasy, vision, dream: notion, *idea
*whimper* vb weep, *cry, blubber, wail, keen
*whimsy* caprice, freak, fancy, whim, conceit, vagary, crotchet
*Ana* see those at WHIM
*whirl* vb 1 swirl, spin, wheel, whirl, *turn, revolve, rotate, gyrate, circle, pirouette, eddy
2 *reel, stagger, totter
*whirlpool* eddy, maelstrom, vortex
*whirlwind*, cyclone, typhoon, hurricane, tornado, water-spout, twister share the basic notion of a rotary motion of the wind. Whirlwind is applied to a small windstorm which begins with an inward and upward spiral motion of the lower air and is followed by an outward and upward spiral motion until, usually, there is a progressive motion at all levels. Cyclone, in technical use, is applicable to a system of winds that rotate, counterclockwise in the northern hemisphere, about a center of low atmospheric pressure; such a system of winds originating in the tropics (a tropical cyclone) may rotate at the rate of 75 miles per hour or more, sometimes exceeding 200 miles per hour. Typhoon is used of a severe tropical cyclone in the region of the western Pacific Ocean. A tropical cyclone in the tropical north Atlantic and tropical western Pacific, with winds rarely exceeding 150 miles an hour, occasionally moving into temperate latitudes, is called a hurricane. In popular
use, especially in the midwestern U.S., cyclone may take the place of tornado, the usual technical term, for an extremely violent whirling wind which is accompanied by a funnel-shaped cloud and which moves with great speed in a narrow path over a stretch of territory, often causing great destruction. A waterspout is a tornado that occurs over water. Twister is a familiar term often applied to a whirlwind, tornado, or waterspout.

**Whit**

mite, jot, iota, bit, *particle, smidgen, tittle, atom

**Wholly**

entire—Milton

**Why**

See explanatory notes facing page 1
will broke down from time to time, as Richelieu's never did; and, after all, the government of self is the supreme test of will—Bellcro— willful but it may be used when frustration or impossibility of action is suggested <spirits disillusioned, who still pathetically preserve the will to conquer, even when life no longer presents them with anything worth winning—Binyon> Further will may designate a subjective power, act, or process <luxurious feeling and pathetic imagination, which make no severe call upon . . . the will —Inge> or an objective force which must be encountered, challenged, or obeyed <submit oneself to the will of God> <this method of consulting the popular will—Bryce> Volition, in contrast to will, is a comparatively simple term. In its ordinary and most sharply distinguished sense, it designates merely the act of making a choice or decision; it usually carries an implication of deliberation, but it rarely suggests struggle or determination to put one's decision or choice into effect. Therefore it may be preferred when no other implications are desirable or important <surrendered his authority of his own volition> <our children do not seek school of their own volition—Grandgent> <the primal necessity for the faithful is that by an act of the will,—not necessarily an emotional act, but an act of pure and definite volition,—they should associate themselves with the true and perfect sacrificer—Benson> Conation usually implies a striving to get or achieve what is desired or willed. The term need not imply a conscious goal; it may suggest clearly directed striving or it may connotate the restless aimless strivings which the mind cannot interpret or explain, but it stresses effort rather than choice <Religion or the desire for the salvation of our souls, Art or the desire for beautification, Science or the search for the reasons of things—these conations of the mind . . . are really three aspects of the same profound impulse—Ellis> 

Ana *intention, intent, purpose, design: *choice, election, preference: character, *disposition, temper, temperament 

will vb Will, bequeath, devise, leave, legate all mean to give a part or the whole of one's possessions to another by one's last will and testament. Will implies the provision or the existence of a legal instrument (a will) disposing of one's property after one's death <he has willed that his property be divided among his wife and children> <he willed his money to various charities> Bequeath is much used in wills by the testator <I bequeath all my property to my wife> and is frequent in legal, historical, and literary use; it may imply nothing more than a proved intention (as by a will or a definite oral or written statement) <William had bequeathed Normandy to his eldest son, Robert—J. R. Green> In legal use bequeath is commonly distinguished from devise, the one implying a gift of personally, the other a gift of reality <every article she possessed . . . , every pot and pan, every garment, is separately bequeathed as an affectionate remembrance—Ellis> <I had never imagined rings as things one bought for oneself . . . They were things given, or bequeathed by grandaunts—Replplier> <was the son of a white man by one of his slaves, and his father executed certain instruments to manumit him, and devised to him some landed property—Taney> Leave is the common and ordinary unspecific term for any of the preceding terms <he left a legacy to his nephew> <he left his land, money, books, pictures to Harvard University> Legate is not manifestly different from bequeath except that it invariably implies a formal will <the oval inlaid table I legate to——Law Reports, House of Lords> 

willful 1 deliberate, intentional. *voluntary, willing Ana determined, decided, resolved (see DECIDE): intended, pursued (see INTEND): obstinate, stubborn, dogged, pertinacious 

Con acquiescent, *compliant: submissive, *tame 2 headstrong, intractable, refractory, recalcitrant, *unruly, ungonvernable 

Ana rebellious, contumacious, factious, *insubordinate: *obstinate, mulish, bullheaded, pigheaded 

Ant biddable —Con tractable, docile, amenable, *obedient 

willing *voluntary, intentional, deliberate, willful Ana prone, open (see LIABLE): inclined, predisposed, disposed (see INCLINE vb) 

Ant unwilling —Con reluctant, loath, *disinclined, indisposed, averse 

will *droop, flag, sag Ana slump, sink, drop, *fall: languish (see corresponding adjective at Languid) 

wily *sly, cunning, crafty, tricky, foxy, insidious, guileful, artful Ana astute, sagacious, *shrewd: deceitful, cunning (see corresponding nouns at DECEIT) 

win gain, acquire, *get, obtain, procure, secure 

Ana achieve, accomplish, effect (see PERFORM): attain, *reach, compass: *induce, persuade, prevail, get 

Ant lose 

wince *recoil, flinch, shrink, blench, quail 

Ana cringe, cower (see FAWN): balk, shy, stick, stickle (see DEMUR): squirm, *writhe 

wind, breeze, gale, hurricane, zephyr are comparable rather than synonymous terms that can all basically mean air in motion. Wind is the general term referable to any sort of natural motion whatever its degree of velocity or of force <a strong wind> <there is no wind tonight> Breeze in general use is applied to relatively light but fresh wind, usually a pleasant or welcome one <the fair breeze blew, the white foam flew, the furrow followed free—Coleridge> In technical meteorological use the term specifically denotes a wind with a velocity of from 4 to 31 miles an hour. Breezes are sometimes further described as light (4–7 miles an hour), gentle (8–12), moderate (13–18), fresh (19–24), strong (25–31). Gale in ordinary use is applied to a high, destructive wind of considerable velocity and force; technically the term is applied specifically to a wind between 32 and 63 miles an hour; a whole gale is one having a velocity between 55 and 63 miles an hour. Hurricane is sometimes applied popularly to an exceedingly violent or devastating windstorm but technically the term denotes a rotating windstorm with winds of particular velocities (see also WHIRLWIND). Zephyr is a poetical term for a very light gentle breeze that delicately touches objects <fair laughs the morns, and soft the zephyr blows—Gray> 

Ana *whirlwind, cyclone, typhoon, tornado, twister 

wind vb Wind, coil, curl, twist, twine, wreath, entwine mean to follow a circular, spiral, or whirling course or to make or form a corresponding figure. Wind fundamentally implies an axis or something suggestive of an axis around which another thing is turned so as to encircle, enclose, or enfold <wind thread on a spool> <wind a bandage around his arm> Often the word is extended in meaning to imply a result accomplished (as tightening, tensing, or lifting) by or as if by waving <wind a watch> <wind the strings of a mandolin> <her nerves are all wound up> <wind up his affairs> At other times the word implies movement or direction in a curving, sinuous, or deviant manner (compare WINDING) (the road . . . wound on between low, quick-set hedges or wooden palings—Mackenzie> <a wagon . . . light enough and narrow enough to wind through the mountain gorges beyond Pueblo—Cather> Coil implies a curving so as to take the form of a spiral, often a flat
spiral; it is used chiefly in reference to something (as a rope, a wire, a hose, or a snake) which is wound or winds itself in such a manner <ropes coiled on the deck and everything shipshape> <coil the hose before putting it away> <the snake coiled itself to strike> Curl basically implies the formation of the hair into large or small ringlets either by nature or by art; in extended use it is applied to something that forms itself or is formed into a curl or coil <curled his lip in disgust> <tree leaves curled by drought> <the smoke curled up from the chimney> <the dog curled itself up on the sofa> <shavings curled by the plane> <huge waves with crests curling over as they broke on the beach> Twist and twine can both refer to a step in the process of spinning or throwing in which two or more filaments are turned about each other to form yarn or thread. Twist retains this or a similar sense in more general use <form a cable by twisting several rods of wire together> Often in its extended senses twist implies a turning this way and that, a sudden turning around, a contorting, or a distorting <twisted his ankle when he fell> <caught the ball, twisted to avoid a tacker, then ran ten yards to a touchdown> <a sluggish stream twisting and turning through the meadowland> <twist the testimony of the witness so as to give it a new significance> Twine has nearly lost its implication of a mechanical process and usually emphasizes a winding around something by another thing which is flexible <let me twine mine arms about that body—Shak> <let wreaths of triumph now my temples twine—Pope> <the bucket and rope had been encircled by twining tendrils of convolvulus—Binyon> Wreath may come close to coil, twist, or wind <about his head) Entwine usually implies a twisting together (as two or more similar things) and it can both refer to a step in the process of spinning or throwing in which two or more filaments are turned about each other to form yarn or thread and usually implies connivance, and. . . Mahbub Ali. . . came very near. . . mischievously or teasingly or as a hint or a com- mand <Asiatics do not wink when they have outmaneuvered the enemy, but. . . Mahbub Ali. . . came very near it—Kipling> To blink is to wink involuntarily and with eyes nearly shut as if dazzled, partly blind, half asleep, or as a hint or a command <Asiatics do not wink when they have outmaneuvered the enemy, but. . . Mahbub Ali. . . came very near it—Kipling> To blink is to wink involuntarily and with eyes nearly shut as if dazzled, partly blind, half asleep, or suddenly startled <blink when roused from a sound sleep> <blink at the report of a gun> <he was. . . hauled up. . . blinded and tottering. . . into the blessed sun—Stevenson> In extended use wink implies connivance, and blink suggests evasion or shirking <wink at neglect of duty> <blink the issue> winner *victor, conqueror, champion, vanquisher

Ant loser

wisdom

wink vb Wink, blink both mean to move one's eyelids. Wink usually means to close and open the eyelids rapidly and usually involuntarily <houses so white that it makes one wink to look at them—Dickens> or to close one eye part way mischievously or teasingly or as a hint or a command <Asiatics do not wink when they have outmaneuvered the enemy, but. . . Mahbub Ali. . . came very near it—Kipling> To blink is to wink involuntarily and with eyes nearly shut as if dazzled, partly blind, half asleep, or suddenly startled <blink when roused from a sound sleep> <blink at the report of a gun> <he was. . . hauled up. . . blinking and tottering. . . into the blessed sun—Stevenson> In extended use wink implies connivance, and blink suggests evasion or shirking <wink at neglect of duty> <blink the issue> winner *victor, conqueror, champion, vanquisher

Ant loser

winking adj *sweet, engaging, winsome, dulcet

Ana charming, alluring, captivating, enchanting, bewitching, attractive (see under ATTRACT vb)

winsome *sweet, engaging, winning, dulcet

Ana see those at WINNING

wipe *extemperate, extirpate, eradicate, uproot, deracinate

Ana obliterate, erase, efface, expunge, blot out: *abolish, extinguish, annihilate: *destroy, demolish

wisdom judgment, *sense, gumption

Ana discretion, *prudence, foresight; judiciousness, sagacity, saneness, sapience (see corresponding adjectives at
wise: sagacity, perspicacity, shrewdness (see corresponding adjectives at SHREWED)

Ant folly: injudiciousness

wise, sage, sapient, judicious, prudent, sensible, sane are comparable when they mean having or manifesting the power to recognize the best ends and the best means to attain those ends. Wise applies to one or the acts or views of one who is so discerning in his understanding of persons, conditions, or situations that he knows how to deal with them, how to correct what is wrong in them, how to get the best out of them considering their limitations or difficulties, or how to estimate them fairly and accurately; often also the term implies a wide range of experience or of knowledge or learning (prudent and conservative, Edward was wise enough to know that these two qualities . . . were not enough—Buck) (knowing himself wise in a mad world—Meredith) (it is wise to be cautious in condemning views and systems which are now out of fashion—Inge) Sage characterizes one who is eminently wise and typically philosophical by temperament and experience. The term can suggest a habit of profound reflection upon men and events and an ability to reach conclusions of universal as well as immediate value, and has been applied chiefly to persons and utterances that are venerated for their wisdom and good counsel (what the sage poets, taught by the heavenly Muse, storied of old in high immortal verse—Milton) (for 1, who hold sage Homer's rule the best—Pope) (the natural crown that sage Experience wears—Wordsworth) In somewhat lighter use sage often suggests the affectation or the appearance of great wisdom or knowledge, whether the matters concerned be of significance or not (the older women seemed to have a kind of secret among themselves, a reason for sage smiles and glances—Sackville-West) Sapient describes one exhibiting the utmost sagacity (contain valuable insights and sapient advice to educators—Larrabee) (the sapient leader who shall bring order out of the wild misrule—Parrington) but often the term is used ironically to imply a mere hollow sham of such sagacity (the generals . . . turned attractive profiles in their [photographers'] direction and put on expressions of sapient authority—linklater) (a sapient, instructed, shrewdly ascertaining ignorance—Pater) Judicious applies to one who is capable of arriving at wise decisions or just conclusions; the term usually suggests the ability to distinguish fact from falsehood and to eliminate all bias so that one's judgments are fair, well-balanced, and level-headed as well as sound (I am perfectly indifferent to the judgment of all, except the few who are indeed judicious—Cowper) (I really think that, for wise men, this is not judicious—Burke) (the love of knowledge is not perhaps as insatiable as with us, but it is infinitely more judicious—Brownell) Prudent (see also under PRUDENCE; PRUDENT 3) applies to one who is so rich in practical wisdom that he is able to keep himself, his passions, and his actions under control and obedient to what he knows as right and necessary. In this sense prudent implies the use of one's reason in the attainment of the moral virtue that leads to right living, as distinguished from its use in the attainment of knowledge of things which transcend experience (the prudent man looketh well to his going—Prov 14:15) Sensible (see also AWARE, PERCEPTIBLE, MATERIAL) describes one who in speech or action does not exceed the bounds of common sense or of good sense; the term suggests a display of intelligence rather than of wisdom and of natural reasonableness rather than the exercise of the reason (to discuss the ultimate career of a child nine years old would not be the act of a sensible parent—Bennett) (whatever he took up he did in the same matter-of-fact sensible way; without a touch of imagination, without a spark of brilliancy—Woolf) Sapient characterizes one who shows healthy-mindedness and level-headedness in prudent, judicious, or sensible acts and words (sane . . . persons who are so well balanced that they can adjust themselves to the conditions of every civilization—Ellis) (thankful in his heart and soul that he had his mother, so sane and wholesome—D. H. Lawrence) Ana discreet, prudent, foresighted (see under PRUDENCE): *cautious, circumspect, calculating: sagacious, perspicacious, *shrewd, astute: knowing, *intelligent, alert, bright, smart Ant simple

wisecrack n crack, gag, *joke, jest, jape, quip, witticism

wish vb *desire, want, crave, covet

Con spurn, refuse, *decline, reject, repudiate: scorn, *despise, disdain

witty adj *insipid, vapid, flat, jejune, banal, inane

Ana spiritless, enervated, * languid, listless: *weak, feeble: diluted, attenuated, thinned (see THIN vb)

Con *spirited, high-spirited, merrymaking, spunky, fiery, peppery, gingery: stimulating, exciting, piquing, provoking (see PROVOKE)

wit n 1 intelligence, brain, *mind, intellect, soul, psyche

Ana *reason, understanding, intuition: comprehension, apprehension (see under APPREHEND): sagaciousness or sagacity, perspicaciousness or perspicacity (see corresponding adjectives at SHREWED)

2 Wit, humor, irony, sarcasm, satire, repartee are comparable when they denote a mode of expression which has for its aim the arousing of sudden sharp interest that is accompanied by amusement or laughter or a quality of mind which leads or predisposes to such expression. Wit which can denote reasoning power or mental capacity more typically implies intellectual brilliance and quickness in perception combined with the talent for expressing one's ideas in a sparkling effective manner; in this sense wit need not imply the evocation of laughter, but it suggests a delighting and entertaining (they never meet but there's a skirmish of wit between them—Shak.) (true wit is nature to advantage dressed, what oft was thought, but ne'er so well expressed—Pope) Sometimes the implication of a power to evoke laughter or smiles becomes prominent and the term without any loss of its earlier suggestions of mental acuteness and swift perception, especially of the incongruous, adds notions of verbal felicity, especially as shown in the expression's unexpectedness of turn and aptness of application (if thou hast wit, and fun, and fire, and ne'er good wine did fear—Burns) Humor is often contrasted with wit, especially as one of two similar yet strikingly different modes of expression in literature. Humor may designate the peculiar disposition that leads one to perceive the ludicrous, the comical, or the ridiculous, and to express one's perceptions so as to make others see or feel the same thing (she was always saved by her crisp sense of humor, her shrewd and mischievous wit—Ellis) or it may imply more human sympathy, more tolerance, more kindness than wit, a deeper sense of the inherent incongruities in human nature and human life, and a feeling for the not readily perceived pathos as well as for the not readily perceived absurdness of characters, of situations, or of consequences (writers distinguish the humor of Chaucer and Shakespeare from the wit of Dryden and Pope; the wit of Molière's comedies from the humor of Don Quixote) (you expect wit from every man of any eminence in the eighteenth century. But of that sympathetic enjoyment of all the manifold contrasts
and incongruities of life which we call humor, I think
Wesley had very little—Winchester Irony applies chiefly
to a way of speaking or writing in which the meaning
intended is contrary to that seemingly expressed (Of
course Constance is always right,) observed Sophia, with
. . . irony—Bennett) (she was assisted by an impetuous
girl called Caroline . . . who by the irony of language
"waited" at table—Mackenzie) In a deeper sense irony
applies both to the quality of mind of a person (as a poet,
dramatist, or philosopher) who perceives discrepancies in
life and in character (as between the appearance and the
reality, or between what is promised and what is fulfilled,
or between what is attempted and what is accomplished)
and to the form of humor or wit which has for its aim
the revelation of the mockery implicit in these contradictions
(there must be some meaning beneath all this terrible
irony—Shaw) A kind of understatement which recalls to
us at once the grim and conscious irony of those who knew
that "their feet had come to the end of the world"—Day
Lewis) Sarcasm applies chiefly to a savage, bitter form
of humor intended to cut or wound. Sarcasm need not
imply the use of verbal irony, sometimes suggesting no
more than plain speaking, but it regularly implies as its aim
the intent to make the victim an object of ridicule (in
the intercourse of familiar life, he indulged his disposition
to petulance and sarcasm—Johnson) (the arrows of sarcasm
are barbed with contempt—Gladden) Satire primarily
designates writing intended to hold up vices or follies (as
of a people or an age) for ridicule and repudiation (Jon-
son's drama is only incidentally satire, because it is only
incidentally a criticism upon the actual world . . . that is,
it does not find its source in any precise emotional attitude
or precise intellectual criticism of the actual world—T. S.
Elliot) Repartee applies chiefly to the power or art of
answering quickly, pointedly, skillfully, and with wit or
humor or, less often, irony or sarcasm (as for repartee in
particular, as it is the very soul of conversation, so is it the
greatest grace of comedy—Dryden) (I hadn't known Jane
spoke so well. She has a clever, coherent way of making
her points, and is concise in reply if questioned, quick at
repartee if heckled—Rose Macaulay) Ana quick-wittedness,
alertness, brightness, brilliancy, cleverness, smartness, intelligence (see corresponding
adjectives at INTELLIGENT): raillery, *badinage, persiflage:
vh certify, attest, vouch
witness withhold detain, keep back, keep out, retain, hold, hold back, reserve,*keep
Ana *restrain, curb, check, bridge, inhibit: refuse,*decline
Con accord, *grant, concede, award, vouchsafe
withstand *resist, contest, oppose, fight, combat, conflict, antagonize
Ana *bear, endure, stand, tolerate, suffer: thwart, baffle, balk, foil,*frustrate: assail, *attack, assault
Con submit, *yield, capitulate
witness n *spectator, observer, beholder, looker-on, onlooker, eyewitness, bystander, kibitzer
witness vb *certify, attest, vouch
wit, humor, sarcasm, satire, irony, repartee
Ana subscribe (see ASSENT)
wit, humor, facetious, jocular, jocose are comparable
when they apply to persons and their utterances and
provoking or intended to provoke laughter or smiles.
Witty (compare wit) suggests a high degree of cleverness
and quickness in discerning amusing incongruities or
incongruities; it may connote sparkling pleasantry, especially
in repartee, but it often suggests sarcasm or causticity (her
tongue was as sharp and witty as ever—Sackville-West)
(there's no possibility of being witty without a little ill-
nature; the malice of a good thing is the barb that makes it
stick—Sheridan) Humorous is a generic term applied to
whoever or whatever provokes laughter (a humorous
account of a picnic) (a humorous lecture) (the humorous
characters of Shakespeare's plays) As opposed to witty,
humorous often suggests sensibility rather than intellect,
sympathy rather than aloofness in criticism, and some-
times, whimsicality rather than direct insight; thus, Pope is
often described as a witty, Burns as a humorous, poet
(whose humorous vein, strong sense, and simple style
may teach the gayest, make the gravest smile—Cowper)
(he is the genius of the Italians is acute . . . but not subtle;
ence, what they think to be humorous is merely witty—
Coleridge) jocular also implies a fondness for jesting and joking but suggests as its motive
the desire to make others laugh or to keep them amused.
Jocose suggests waggishness or sportiveness in jesting and joking; it often
comes close to facetious in suggesting clumsy inappropriate
jesting (sundry jocose proposals that the ladies
should sit in the gentlemen's laps—Dickens)
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

**Anachronistic:** amusing, diverting, entertaining (see AMUSE); sparkling, scintillating (see FLASH vb): *caustic, mordant, acrid, scathing: penetrating, piercing, probing (see ENTER)*

**Witchcraft:** wizard 
*expert, adept, artist, artiste, virtuoso*

**Wizards:** witchcraft, witchery, sorcery, *magic, alchemy, thaumaturgy*

**Womanly:** womanly, womanlike, ladylike, feminine, *female, effeminate*

**Ant** manliness — *Con* manlike, virile, masculine, *male*

**Womanlike:** womanly, womanish, ladylike, feminine, *female, effeminate*

**Con** feminine, womananish, ladylike, feminine, *female, effeminate*

**Womanly:** womanlike, ladylike, womanish, feminine, *female, effeminate*

**Ana** *mature, matured, grown-up, adult*

**Ant** unwomanly, manly — *Con* manliness (see MALE):
*Youthful, juvenile, virgin, virginal, maiden*

**Wonder**

1. **Wonder** marvel, prodigy, miracle, phenomenon can all mean something that causes astonishment or admiration. **Wonder** applies specifically to whatever excites surprise, astonishment, or amazement (as by its perfection, its greatness, or its inexplicableness) *the hotels were wonders of comfort—White* (the real wonder of jujitsu is . . . in the uniquely Oriental idea which the whole art expresses—Hearn) *Chinese painters are not . . . absorbed in expressing their sensuous delight in the wonder and glory of the world—Binyon* **Marvel** applies to something that excites surprise or astonishment especially by its extraordinariness, its strangeness, or its curiousness *All I ask from them is discreetness.* "Ay," said Adrian, whose discreetness was a marvel—Meredith *had never believed that such marvels of the cooking art really existed—Wouk* *(for the Roman army was still strong, and was to remain for centuries one of the marvels of the world—Buchan)* **Prodigy** may name some extraordinary or abnormal fact or circumstance in nature seen as an omen or portent <were not comets formerly dreaded, as awful prodigies intended to alarm the world?—Jeremiah Joyce> or apply to something that makes one marvel because of its oddness or unusualness especially in degree of some quality (as skill, endurance, size, or achievement) <wondering whether her husband, a despotic and pitiless pedant, would have tried to turn their boy into a prodigy—Edmund Wilson> <women performing prodigies of endurance, bravery, and hope—Newsweek>* **Miracle** applies to something that is accomplished or occurs which seems to those who are witnesses or have undergone the experience to exceed human powers and to require a supernatural or superhuman explanation *wonders ye have done; miracles ye cannot—Tennyson>* In its nonreligious sense **miracle** retains its implication of wonder in its insistence on the fact that the person or thing so designated is beyond ordinary human comprehension or capacity to do or produce; only occasionally does it suggest a supernatural or superhuman agent or agency <clung to their candles with an instinctive feeling that these primitive instruments were . . . more to be trusted than the miracles of science—Wolfe> *(the miracle which we call genius—Lowers)* *(it was a miracle that the two men survived so many days' exposure in an open boat) it was a miracle of rare device, a sunny pleasure dome with caves of ice!—Coleridge>* **Phenomenon** in its more popular sense, which is somewhat contrary in meaning to **phenomenon** as used by scientists and philosophers (compare *phenomenal* under MATERIAL), implies something exceptional or extraordinary; it applies to a person, animal, or thing that is regarded as a prodigy or marvel or occasionally merely as an oddity *(the captain—a phenomenon during prohibition because he was honest—Dinneen)* *(Beat . . . the first phenomenon in years to come out of the Great Unwashed which Madison Avenue hadn’t rigged, manipulated or foreseen—Mailer)*

2. **Wonder, wonderment, amazement, admiration** can denote the complex emotion aroused by something that is inexplicable or incomprehensible and, often, awe-inspiring. **Wonder** and **wonderment** commonly suggest novelty or strangeness in what excites the emotion and astonishment or perplexity in the person affected *(still the wonder grew that one small head could carry all he knew—Goldsmith)* *(showed no great zest . . . a quiet wonderment rather, faintly tinged with pleasure—Cather)* In its richest use **wonder** often implies rapturous awe *(nor any power above or under ever made us mute with wonder—Sheri)* **Amazement** stresses bewilderment or loss of power to collect one’s thoughts; it rarely gives an indication of like or dislike for the object exciting the emotion *(reports . . . which constantly express amazement* at the extent and severity of Russian attacks . . . and despair at the German setbacks—Shirer)* **Admiration**, which in its most general sense implies an often enthusiastic recognition of superiority (see REGARD) can add an implication of absorbed or ecstatic attention (as to the rare, the beautiful, or the sublime) that approaches awe in its elevation and intensity *(respect which in the lay mind may well mount to admiration and even to awe—More)* *(considered the emotion of reverence to be very complex. Into it enters awe which itself is a blend of fear and admiration. Admiration, in turn, represents a fusion of negative self-feeling and wonder—G. W. Allport)* *(a Kyoto painter . . . who burnt a hole in his roof to admire a moonlight effect, and in his rapt admiration omitted to notice that he had set a whole quarter of the city on fire—Binyon)* *(Ana* awe, *reverence, fear; astonishment, amazement (see corresponding verbs at SURPRISE): perplexity, puzzle-
ment, bewilderment (see corresponding verbs at PUZZLE)*

**Wondert** wonder, amazement, admiration

**Wont** habit, custom, practice, usage, custom, use

**Ana** way, manner, fashion (see METHOD)

**Wonted** accustomed, customary, habitual, *usual

**Ana** familiar, *common, ordinary: natural, regular, normal, typical*

**Woo** vb court, solicit, *invite, bid

**Wooden** *stiff, rigid, inflexible, tense, stark

**Ana** firm, hard, solid: *heavy, weighty, ponderous: clumsy, *awkward

**Con** plant, pliable, *plastic: *supple, limber

**Word, vocable, term** can mean a letter or combination of letters or a sound or combination of sounds capable of being pronounced and expressing an idea that is by tradition or common consent associated with the letters or the sounds. **Word** applies to a letter or combination of
letters or a sound or a combination of sounds that forms an indivisible whole constituting one of the ultimate units of a language. **Vocabulary** throws emphasis upon a word as pronounced or spelled rather than as a unit of meaning (a flat denial of poetic possibilities, in the case of any **vocabulary**, is liable to disastrous refutation—**Lowes**). **Accustomed to songs in which the words are often merely convenient **vocables** with the melody usually more important than the text—**Scholl**). **Term** applies both to words and to phrases that express a whole idea and form one of the units of expression in a language, applying especially to units with a more or less precise technical use or meaning (the **term** communism is used today to describe both a political philosophy and its translation into reality—**Gatzke**). "The most important woman in Finland" is a **term** which has been applied—**Current Biol**. (all professions are likely to develop innumerable terms that constitute an almost private jargon)

**Ana** expression, idiom, *phrase, locution** wordy, verbose, prolix, diffuse, redundant can all mean using or marked by the use of more words than are necessary to express the thought. **Wordy** often carries no further implications, though it may suggest garrulousness or loquacity when the reference is to speech (went into considerable detail about the Fuehrer's thoughts and policies on almost every conceivable subject, being more wordy than any previous letter... to his Italian partner—**Shirer**). (a wordy, prolegomenous babble—**Stevenson**). **Verbose** suggests overabundance of words as a literary fault characteristic especially of a writer or public speaker or of a work or speech; it often implies resulting dullness or obscurity of expression or a lack of incisiveness, confusion of ideas, or grandiloquence (a **verbose** style) (a dull **verbose** narrative) (his letters are full of interesting details but they are never **verbose**). **Prolix** implies such attention to minute details as to extend what is written or told beyond due bounds; the term carries a stronger implication of tediousness or wearisomeness than **verbose** (the belief, so prevalent abroad, that it is typical of Russian literature to be formless, **prolix** and hysterical—**Edmund Wilson**). (this, then, was Nufo's story, told not in Nufo's manner, which was infinitely **prolix**—**Hudson**). **Diffuse** usually implies verbosity, but it throws the emphasis upon the lack of organization and of the compactness and condensation needed for pointedness and for strength of style; it often attributes flabbiness, looseness, or desultoriness to what is written (the one can be profuse on occasion; the other is **diffuse** whether he will or no—**J. R. Lowell**). (though Seneca is long-winded, he is not **diffuse**; he is capable of great concision—**T. S. Eliot**). **Redundant** can apply to whatever is superfluous (elder... occupations are becoming **redundant** and obsolete—**Barkin**) but in its specific application to words and phrases the term implies a superfluity that results from being repetitious or unnecessary for clarity and accuracy of expression (revision of technical prose requires word by word revision and elimination of whatever is **redundant**). In its corresponding application to writers, speakers, or utterances **redundant** implies the use of redundancies (see **redundancy under Verbiage**). (the naturally copious and flowing style of the author is generally **redundant**—**Mackintosh**). (she had been, like nearly all very young writers, superfluous of phrase, **redundant**—**Rose Macaulay**) (in sharp comment... quite demolished the emptiness and the pretentiousness of this **redundant** plan—**Michener**).

**Ana** *inflated, turgid, tumid, flatulent; bombastic, *rhetorical: loquacious, garrulous, voluble, glib, *talkingative **Con** laconic, *concrete, terse, succinct, summary, pitiful, compendious

**work** *n 1 Work, labor, travail, toll, drudgery, grind are comparable when they mean effort or exertion directed to the accomplishment of an end, or an employment or activity which involves such expenditure of effort or exertion. **Work** is the most comprehensive of these terms, for it may imply activity of body, mind, or machine or, in its largest sense, of a natural force. It is applicable not only to the exertion and to the employment which involves such exertion (six days shalt thou labor, and do all thy **work**—**Exod 20:9**) but also to what is accomplished or produced by such exertion (this statue is the **work** of a gifted but unknown sculptor) (you have done a day's **work** in three hours) and to the material upon which one is employed (put your **work** away). **Labor** differs from **work** not so much in its specific denotations as in its implications, as a rule it implies human work and therefore suggests physical or intellectual exertion only, but it may suggest work of strenuous, onerous, or fatiguing kind (**labor** is doing what we must; leisure is doing what we like—**Shaw**). (the larger part of the **labor** of an author in composing his work is critical **labor**; the **labor** of sifting, combining, constructing, expunging, correcting, testing—**T. S. Eliot**). (Sir William Meredith, anticipating the **labor**s of Romilly, protested against the barbarity and the inefficacy of a criminal code—**G. O. Trevelyan**). **Travail** carries a stronger implication of painful effort or exertion than does **labor**; that connotation is often so strong that the term tends to denote suffering rather than labor (the sentimentalist escapes the stern **travail** of thought—**Lowes**) (it breaks his heart... that all his hours of **travail** here for men seem yet in vain—**Lindsay**). **Toil** suggests labor that is prolonged and highly fatiguing but not necessarily physical (for years he led a life of unremitting physical **toil**—**Buchan**). **Drudgery** implies dull, irksome, and distasteful labor (thereafter, through... all the days she served in the store, the job was nothing but exasperating **drudgery**—**Wouk**). (labor of the hands... pursued to the verge of **drudgery**—**Thoreau**). **Grind** applies to labor that one finds tiresome and trying or exhausting to mind or body (the long **grind** of teaching the promiscuous and occupied young—**Henry James**).

**Ana** exertion, *effort, pains, trouble: *task, duty, chore **Ant** play

2 **Work**, employment, occupation, calling, pursuing, business can all denote the specific kind of labor or activity in which a person engages seriously especially as a means of earning a livelihood. **Work** is the most general of these terms; it applies to any kind of labor, whether physical or intellectual, whether carried on by the hour, day, week, month, or longer period, and whether done for pay or not and, if the former, whether compensated for by an employer or out of fees for services or the profits of a business (be out of **work**; his **work** is that of a railroad engineer) (he is at **work** on his book). **Employment** implies work for which one has been engaged and is being paid by an employer (he is unable to find **employment**; his **employment** is that of a bookbinder) (1... went from town to town, working when I could get **employment**—**Goldsmith**). **Occupation**, though often used interchangeably with **employment**, can be more inclusive, for it does not necessarily connote service under an employer and may be referred to the work of a kind in which one engages habitually or for which one has been trained; thus, one seeks **employment** but follows a particular occupation (unable to find **employment** in his old **occupation**, he turned to common labor (he is by **occupation** a teacher) (these are the chief questions which a man would ask... whom circumstances allowed to choose his **occupation**—**Inge**). **Calling** is...
sometimes used in place of occupation but is typically used of occupations which can be described as vocations or professions and to which one is likely to have been called by one's nature or special tastes (his calling is that of a preacher) (the learned callings) (Miss Jekyll had received that luckiest of fairy gifts, a calling ... something that she loved to do—L. P. Smith) Pursuit, too, may be used in place of occupation but more specifically in the sense of a trade, craft, profession, business, or art that is followed often as a means of earning one's living (they never have to learn to adjust themselves to people whose tastes and pursuits are different from their own—Russell) (though it was supposed to be proper for them to have an occupation, the crude fact of moneymaking was still regarded as derogatory, and the law, being a profession, was accounted a more gentlemanly pursuit than business—Wharton) Business is often used in the sense of work or sometimes of occupation (the business of keeping a lunatic asylum—Denman) (I hated, and still hate, the awful business of research—Bennett)

Ana *trade, craft, handicraft, art, profession

3 Work, product, production, opus, artifact can all denote a concrete thing that is made or brought into being by the exertion of effort and the exercise of skill. Work is applied to what comes under this general definition (as something that is manufactured or that is constructed or built) only when used without reference to a particular thing (the work reveals the workman) or when used with a possessive (the cabinetmaker is proud of his work) (every church that is known as Christopher Wren's work) or in certain combinations (fireworks) (waxworks) Otherwise it is applied to a thing that results from mental labor, especially one involving composition and artistry in execution and specifically called a work of art (the works of Keats include his poems and usually his prefaces) (the works of Beethoven are all his musical compositions) (The Thinker is one of Rodin's works) (the new history of literature promises to be a monumental work) Product (see also product 2) is applied chiefly to articles of manufacture whether they are made by hand or with the aid of machinery (the factory seeks a market for its products) (she was unwilling to part with the embroideries and laces that were the products of her handiwork) (synthetic materials impart their special properties to perfumes and flavors and when properly used, increase rather than diminish the value of the product—Morrison) When product rather than work is used of a poem, novel, statue, or painting, it is often either deprecative in its connotations or definitely noncommittal (this dull product of a scoffer's pen—Wordsworth) (shall a literary product reveal the spirit of its age and be silent as to the spirit of its author—Mattheson) Production is sometimes used where work would be the commoner and more idiomatic term, but it has a formal or slightly bombastic effect except when qualified by a superlative (the noblest productions of literary genius) (the finest productions of Michelangelo) (so one [Pygmalion] whose story serves at least to show men loved their own productions long ago, wooed an unfeeling statue [Galatea] for his wife—Cowper) The term is also specifically applied to a theatrical or similar performance viewed as the work of a producer or director who is responsible for all the details (the recent Shakespearean productions) Opus is applied chiefly to a musical composition or group of compositions and in this use it is commonly followed by a number designating the order of publication or, sometimes, execution (Beethoven's opus 27) The term also has some specific application (as to work in mosaic or embroidery) and is used in light criticism of a work of art or literature often with a suggestion of facetious pomposity (British books on statistics are ever so much sprightlier and clearer than American opera on the subject—Forbes) (an instance of misplaced creativity, perhaps the first but not the last in Wright's prodigious opus—Mumford) Artifact basically denotes an artificial as distinguished from a natural product; it usually implies human workmanship, largely as a general designation for primitive weapons and implements as well as works of art (flints, arrowheads, and other artifacts of stone).

Ana article, object, *thing: accomplishment, achievement, performance (see corresponding verbs at perform)

work vb operate, function, *act, behave, react

worker, workman, workingman, laborer, craftsman, handicraftsman, mechanic, artisan, hand, operative, roustabout can all mean one who earns his living by labor, especially by manual labor. Worker, the most comprehensive and least specific of these terms, applies to someone who earns his living by work of hand or brain (office workers) (factory workers) Workman does not imply a specific kind of work, but in all but its extended senses it commonly implies manual labor. It may be applied to one engaged to do a specified piece of work or to help in the construction of something requiring many workers; it may also be applied to a skilled or to an unskilled worker. Usually it implies opposition to employer, or manager, or foreman (there were 50 workmen on the job) In extended use the term is applicable to a worker whether he works with his hands or with his mind provided he makes, constructs, invents, or creates something (high-minded and purifying workmen, they have spared no pains to produce a poetry finer than that of any other country in our time—Lowell) Workingman is more restricted in its range of application than workman, and is, in spite of varying legal definitions, applied commonly to a wage earner who at an hourly, daily, or weekly rate pursues a trade (as carpentry, masonry, or plumbing) or is similarly employed in a mercantile, manufacturing, or industrial establishment as distinguished especially from an industrialist, a merchant, and a professional man. Laborer commonly designates one whose work demands more strength and physical exertion than skill (as on a construction or excavation job) (day laborers) (farm laborers) Craftsman and handicraftsman basically apply to one who is a skilled workman in a craft or handicraft (see craft, handicraft under trade 1). Unlike the foregoing terms these two are common in general use and may apply as freely with reference to an avocation as to an employment. But the former may apply distinctively to a worker who is a competent technician or who is versed in the technique of his art, profession, or trade. It is especially used of artists, writers, playwrights, or skilled artificers (Pope ... one of the most consummate craftsmen who ever dealt in words—Lowes) (the good craftsman constructs his product as perfectly as he can ... He becomes a artist in so far as he treats his materials also for themselves—Alexander) Mechanic applies specifically to a workman skilled in the repair or adjustment of machines (an automobile mechanic) (an aviation mechanic) Artisan is more often opposed to artist (for this sense see under artist 1) than employed as a designation of a particular type of workman. When applied to workmen as such and without thought of opposition to artist, the term comes very close to craftsman and is commonly applied to one who is skilled in a trade (as carpentry, weaving, or shoemaking) that involves learned skills and their appropriate application as well as physical labor (we pass from the weavers of cloth to a different class of artisans—Macaulay) Hand is applied to one of a crew, a force, or a gang of workmen or some-
times to an owner’s or proprietor’s helper or assistant
(a deckhand) (a farmhand) (mill hands) (my son has
lately lost his principal hand by death—Franklin) Oper-
ative, a general term suggestive of modern industrial
conditions, applies to a workman employed in a mill, a
manufactury, or an industry utilizing machines (the steel-
works employ as many as 2000 operatives) Roustabout
usually adds to laborer distinguishing implications of
muscular fitness for exceedingly heavy work, roughness,
and, often, migratory habits (longshoremen and other
roustabouts)

worry vb Worry, annoy, harass, harry, plague, pester,
tease, tantalize can all mean to torment so as to destroy
one’s peace of mind or to disturb one acutely. Worry
stresses incessant attacking or goading and an intention
or sometimes an effect of driving the victim to desperation
or defeat (pursue a policy of worrying the enemy) (worry
him out till he gives his consent—Swift) (brother should
not war with brother, and worry and devour each other—
Cowper) Annoy (see also annoy 1) implies continued
molesting, interfering with, intruding on, or bedevil-
ing until the victim is angry or upset (will thou then serve
the Philistines with that gift which was expressly given thee to
annoy them?—Milton) (clouds of flies . . . annoyed our
horses—Borrow) (my movements are all along a regular
beat, which enables me to avoid things that bore or annoy
me—Edmund Wilson) Harass usually implies persecution,
especially continued petty persecutions, or burdensome
demands or exactions that drive one to distraction or
exhaust one’s nervous or mental power (it is good for
boys and girls to know that their father can be harassed
by worn and their mother worn out by a multiplicity of
details—Russell) (securing air and naval bases from
which he could harass and blockade the British Isles—
Shirer) Harry, though often used interchangeably with
harass, more vividly suggests maltreatment and oppres-
sion (Button and Miss Wace had been harried and chivied
. . . the latter getting visibly flustered, for tears came into
her eyes—Sackville-West) (how on earth can you rack
and harry and post a man for his losses, when you . . . live
in the same station with him?—Kipling) Plague basically
implies an affliction or infliction comparable to that of a
devastating epidemic disease and even with greatly
weakened implications tends to suggest a tormentor and
an agonized or suffering victim (the gods are just, and of
our pleasant vices make instruments to plague us—Shak.)
(kind of unhappy phrase that could plague a candidate
right down to the wire—Michener) (misfortune plagued
the plotters at every turn—Shirer) Pester implies the
power to annoy past endurance (as by numbers or by
repetition of attacks suggestive of the discomforts of an
infestation of vermin) (pester the authorities with com-
plaints) (Adrian . . . would accept him entirely as he
seemed, and not pester him . . . by trying to unlock his
heart—Meredith) Tease may imply repeated attempts to
break down resistance by successive appeals or impor-
tunities (the children were teasing to be taken to the
circus) (I have not been to the Rooms this age . . . except
. . . last night with the Hodges’s . . . they teased me into it—
Austen) or it may imply an attempt to provoke or
upset by railillery or tormenting (gets me mad when my ana-
yst friends ask me some teasing question . . . Implying
they know a hell of a lot more about me than I do—Wouk)
(not soon provoked, however stung and teased, and, if
perhaps made angry, soon appeased—Cowper) Tanta-
lize stresses the repeated awakening of expectation and
then its frustration (because they are so fabulous and
beautiful, they create an atmosphere of suspense . . . some-
thing tantalizing, breathtaking—Dahl) (merciful love that
tantalizes not, one-thoughted, never-wandering, guileless
love—Keats)

worth n Worth, value are close synonyms in more than one
of their senses, often differentiated by demands of idiom
rather than differences of meaning or connotation. Both
worth and value denote the equivalent in money or some-
times in goods or services given or asked in exchange for
another thing: thus, the value or worth of these coins to
collectors is much greater than their monetary worth or
value (the current exchange value of the dollar) (he
always gets his money’s worth) (gets full value for his
money) When, however, worth and value mean the
quality of being useful, important, excellent in its kind, or
highly desirable or meritorious, they do not always come
so closely together. In such use worth more often than
value applies to what is excellent intrinsically (as by being
superior morally, spiritually, intellectually, or aestheti-
cally) (of ancient race by birth, but nobler yet in his own
worth—Dryden) (Archer’s . . . coherent thinking, his
sense of the worth of order and workmanship—Montague)
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
urgent demands or threats) that suggests a physical wringing (wring a confession from a suspect) more farm output, both of foodstuffs and raw materials, must be wrung from the hard-pressed peasants—Lieberman (wringing more blackmail from this unwarlike nation—Forester) Ana twist, bend (see CURVE): *force, compel, coerce, constrain: strain, sprain (see under STRAIN n) wretch vb *wrench, wring Ana twist, bend (see CURVE): usurp, *arrogate, confiscate: evert, extract, elicit (see EDEUCE): distort, contort (see DEFORM) wrestle, tussle, grapple, scuffle mean to struggle with an opponent at close quarters. Wrestle basically implies a struggle for mastery by gripping with hands, arms, and legs, often in ways governed by fixed rules; the term connotes the exercise of skill and ingenuity as well as strength. In its extended use wrestle also implies a struggle for mastery, but it may suggest either a striving for superiority or for a particular advantage or a laborious effort (as in understanding, in seeking, or in overcoming) compelled to wrestle with the increasing difficulties of his office the perfectionist's instinct for wrestling with a problem until he had shaped it to his mental image Kolodin (the man who has never wrestled with his early faith has missed not only a moral but an intellectual discipline Ellis) Tussle also suggests a struggle for mastery, but it implies determination rather than skill or ingenuity and willingness to accept the rough-and-tumble conditions of such a struggle (the boys tussled long and hard) tussle with a problem in mathematics (a strong man who could tussle with evil and conquer Caspary) Grapple stresses the action of taking hold of or coming to grips with; the term carries a stronger implication of being in a position to gain the mastery and, usually, of a successful struggle grappled with his assailant, pinning one of his arms behind him the architect has grappled with more problems than one need hope to see solved in any single church—Henry Adams it has been mainly the academicians who have attempted to grapple with the intricacies of Joyce's mysticism of the flesh—Mailer Scuffle may imply brief, confused, usually not very serious fighting involving much scrambling and noise (boys scuffled with each other in the schoolyard) it may suggest hurry or superficiality in overcoming difficulties you go to school and scuffle on the best way you can—Runciman Ana *contend, fight, battle, war: *resist, withstand, combat, oppose: strive, endeavor, essay (see ATTEMPT): labor, toil, travel (see corresponding nouns at work) wretched *miserable Ana *despondent, forlorn, hopeless, despairing: doleful, dolorous, *melancholy: abject, sordid, *mean: pitiable, piteous, *pitiful wrench vb *wrench, wrest Ana *press, squeeze: *crush, mash, smash, bruise: extract, extort, elicit (see EDEUCE): distort, contort (see DEFORM): wizel, bend (see CURVE) writer, author, composer can all denote a person who gives expression to his ideas or feelings, but they are not as a rule synonyms. Writer is a comprehensive term applied to someone whose occupation or chief employment is that of expressing something in words, especially for others to read. As an occupational designation, it implies that one's profession is writing for publication, and it covers such persons as novelists, essayists, dramatists, editors, and journalists (a free-lance writer) (news writers) (the writers' club) Author in its comprehensive sense (see under MAKER) is applicable to a producer or source (as of a work of art) the author of my being but it can be applied specifically to a person who has written for publication. It differs from writer in placing less stress upon the profession and more upon the fact of having written and published something (as a book or an article under one's own name or a pen name) decide to become a writer the authors of some well-known books were not writers by profession Author in this sense, too, implies an originator or source and is distinguished from reviser, adapter, editor, or dramatizer. Composer, like author, may be used generally and specifically. But because it emphasizes the bringing together of a number of things so as to form a whole (a composition), it is applied most frequently to those expressions of ideas or feelings achieved by bringing together musical tones, words, colors, or shapes so as to form an artistic pattern. It is the specific term for the author of a musical composition (the composer of the Peer Gynt suite) but, although this is its commonest application, it is also applicable to poets, painters, designers, and others when composition rather than creation or representation is the end Shakespeare was not only a dramatist but a composer of lyrics and sonnets writhed, agonize, squirm are comparable when they mean to twist or turn in physical or mental distress. Write regularly carries vivid suggestions of convulsive contortions (as of one in the throes of death, in a paroxysm, in an instrument of torture, or in a trap) and of fruitless struggling to escape. When used in reference to physical distress, it commonly implies also great pain childhood and age writhing in savage pains—Shelley When extended to refer to mental distress, it usually implies a torturing sense of shame, of bafflement, or of frustration thus, at every march, the hidden enemy became bolder and the regiment writhed under attacks it could not avenge—Kipling (corrupt men in the machines write in the presence of his obvious integrity—Helen Fuller) Agonize sometimes evokes the image of one in the pangs of death, struggling and in anguish; sometimes it evokes the picture of one wrestling or straining arduously to achieve a difficult victory bled, groaned, and agonized, and died in vain Cowper pages which cost a week of unremitting labor—Huxley Squirm evokes images of a less dignified or a more familiar character; it usually does not imply profound distress, but great unease (as in aversion to restraint or discipline) or a shrinking or wincing (as under sarcasm or criticism) sleek-haired subalterns who squirmed painfully in their chairs when they came to call—Kipling a grueling cross-examination in which he is going to make me squirm in front of the grand jury Gardner Ana twist, bend (see CURVE vb): distort, contort (see DEFORM): wince, blench, flinch, *recoil wrong n *injustice, injury, grievance Ana damage, *injury, harm, mischief: violation, infraction, *breach, trespass, transgression: hardship, *difficulty wrong adj 1 *false Ana fallacious, sophistical (see under FALLACY): *misleading, deceptive, delusive, delusory Ant right —Con *correct, exact, accurate, precise 2 bad, poor Ana improper, *unfit, inappropriate, unfitting, undesirable, inapt, unhappy, infected: *awry, askew: *amiss, astray: *awry, askew: *fit, appropriate, suitable, fitting: good, *right wrong vb Wrong, oppress, persecute, aggrieve can mean to inflict injury upon a person without just cause or in an outrageous manner. One wrongs another who injures him by unjustifiably depriving him of his property or his good name or by violating something he holds sacred receive analogous words Ana antonyms Con contrasted words See also explanatory notes facing page 1
us; we have wronged no man, we have corrupted no man, we have defrauded no man—2 Cor 7:2) (such an air of wronged nobility—Cheever) One oppresses another who inhumanely lays upon him burdens too heavy to be endured or exacts of him more than he can possibly perform. How reviving to the spirits of just men long oppressed, when God into the hands of their deliverer puts invincible might—Milton (may have missed the tender love of her parents . . . or been oppressed by her elderly uncle—Cheever) One persecutes another who relentlessly or unremittingly subjects him to annoyance or suffering (if a boy has abnormal mental powers in some direction, combined with poor physique and great nervousness, he . . . may be so persecuted [by normal boys] as to be driven mad—Russell) One aggrieves another or, more often, causes him to be or to feel aggrieved who by wrongdoing, oppressing, or persecuting him gives him ground for protest (several nations were aggrieved by the terms of the Treaty of Versailles) (so the bargain stood: they broke it, and he felt himself aggrieved—Browning) * Anger * abuse, mistreat, maltreat, ill-treat, outrage: * injure, harm, hurt

wroth

yardstick * standard, criterion, gauge, touchstone

yarn tale, * story, narrative, anecdote

yearn * long, pine, hanker, hunger, thirst

yell * shout, shriek, scream, screech, squeal, holler, whoop

yeast * foam, froth, spume, scum, lather, suds

yeo * long, pine, hanker, hunger, thirst

yet * until, but, however, but, nevertheless

yield vb * produce, turn out, * bear

yielding * of respect or reverence for another or in recognition of another's authority or superior knowledge: everybody must defer . . . a nation must wait upon her decision, a defer to the inevitable (bow to the inevitable) (bow to established authority) (he admired the tribal discipline which made May . . . a nation must wait upon her decision, a defer to the inevitable)

yielded * of respect or reverence for another or in recognition of another's authority or superior knowledge: everybody must defer . . . a nation must wait upon her decision, a defer to the inevitable (bow to the inevitable) (bow to established authority) (he admired the tribal discipline which made May . . . a nation must wait upon her decision, a defer to the inevitable)

yielded to persuasion (yield to persuasion) (yield to temptation) (he never yields except when the matter under discussion is of no significance to him) (the great principle in a contest with a child is: do not yield but do not punish—Russell) but when the reference is to a thing, the word implies elasticity, or lack of firmness, strength, or endurance in the thing that gives way (the door suddenly yielded to her hand—Austen) (the house they went to was . . . a human burrow or dwelling place) (the house they went to was . . . a human burrow or dwelling place)

yielded to age—Stevenson) (a long diatribe against Pitt for having tamely submitted to the rebuffs of the French Directory—Quiller-Couch) (submitted to their joking with the best grace she could—Wouk) Capitulate can mean to surrender on terms definitely agreed upon, but in its common extended use, it more often centers attention on a definite submission to a force or power that one has not the strength, the skill, or the will to overcome (always tips for special services rendered but I will not capitulate before sheer impertinence—Weichsberg) (the universities would capitulate to a young, vigorous and revolutionary creed—Moherly) Succumb carries a stronger implication than any of the preceding terms of weakness or helplessness in the person or thing that gives way or of strength or irresistibility in the person or more often the thing that causes the giving way. The suggestion of sinking under that force or power is usually so strong in succumb that the word frequently implies a disastrous outcome (as death, destruction, or subjugation) (succumb to pneumonia) (the best of constitutions will not prevent ambitious politicians from succumbing . . . to the temptations of power—Huxley) (true passion . . . must be crushed before it will succumb—Meredith)

All of the preceding terms usually imply a giving way on the part of a person or sometimes a thing that has not or cannot maintain the upper hand; they therefore often imply a weakening of the one that gives way. Relent, by contrast, implies a yielding on the part of the one who has the upper hand and who has been severe or harsh in his attitude to another person or fixed in his determination (as to punish, to interfere, or to frustrate). The term therefore implies a softening or mollifying that turns him from his previous course (can you hear a good man groan, and not relent?—Shak) (when a second appeal, couched in more urgent terms, was dispatched to him, he relented—Cerf) Defer implies a yielding or submitting to because of respect or reverence for another or in recognition of another's authority or superior knowledge (everybody must defer . . . a nation must wait upon her decision, a defer to the inevitable) (bow to the inevitable) (bow to established authority) (he admired the tribal discipline which made May bow to this decision—Wharton) Cave, usually with in, can be a close synonym of succumb, but it often suggests resistance to pressure to the point of exhaustion and sudden collapse (in the end government caved in, and unconditionally agreed to inquiry—Punch)

Ana surrender, cede, waive (see relinquishe): concede, accord, award, * grant

Yield, submit, capitulate, succumb, relent, defer, bow, cave can all mean to give way to someone or something that one cannot further resist. Yield (see also relinquishe; bear 2), when the reference is to a person implies being overcome (as by force, argument, or entreaty) (yield to persuasion) (yield to temptation) (he never yields except when the matter under discussion is of no significance to him) (the great principle in a contest with a child is: do not yield but do not punish—Russell) but when the reference is to a thing, the word implies elasticity, or lack of firmness, strength, or endurance in the thing that gives way (the door suddenly yielded to her hand—Austen) (the house they went to was . . . a human burrow or dwelling place) (the house they went to was . . . a human burrow or dwelling place)

yielded to age—Stevenson) (a long diatribe against Pitt for having tamely submitted to the rebuffs of the French Directory—Quiller-Couch) (submitted to their joking with the best grace she could—Wouk) Capitulate can mean to surrender on terms definitely agreed upon, but in its common extended use, it more often centers attention on a definite submission to a force or power that one has not the strength, the skill, or the will to overcome (always tips for special services rendered but I will not capitulate before sheer impertinence—Weichsberg) (the universities would capitulate to a young, vigorous and revolutionary creed—Moherly) Succumb carries a stronger implication than any of the preceding terms of weakness or helplessness in the person or thing that gives way or of strength or irresistibility in the person or more often the thing that causes the giving way. young n *offspring, progeny, issue, descendant, posterity
youth, adolescence, puberty, pubescence are sometimes used interchangeably to denote the period in life when one passes from childhood to maturity. Youth is the most general of these terms, being applied sometimes to the whole early part of life from childhood or infancy to maturity (youth, maturity, senility). More often, however, youth is applied to the period between the maturing of the sexual organs and the attaining of full maturity. Youth often connotes the freshness, vigor, inexperience, or impetuosity characteristic of the young. Adolescence designates the same period as youth in the restricted sense, but it carries a stronger connotation of immaturity. Adolescence suggests the awkwardness resulting from the rapid growth during this period and also the mental and emotional instability resulting from the physiological changes. In legal use adolescence designates the period extending from puberty to the attainment of full legal age or majority. Basically puberty designates the age at which the signs of the maturing of the sexual organs appear (as the beard and changed voice in boys and the development of the breasts in girls); in law this age is commonly fixed at fourteen for boys and twelve for girls. In broader use puberty often designates the period covering the earlier years of adolescence during which the secondary sex characteristics are unfolding. Pubescence is sometimes used as equivalent to puberty, but often it applies distinctively to the condition of attaining the characteristics (as genital hair) of developing sexuality.

Ant age (sense 1)

youthful, juvenile, puerile, boyish, virgin, virginal, maiden are comparable when they mean relating to or characteristic of one who is between childhood and adulthood; although their basic meaning is the same, they are seldom interchangeable because of widely differing implications and applications. Youthful suggests the possession or the appearance of youth, or of qualities appropriate to youth; it can be employed laudatorily or in extenuation (youthful aspirations) <youthful indiscretions> Juvenile often suggests immaturity of mind or body or lack of experience; it is applied especially to what is suited to or designed for boys and girls in their early teens (juvenile dances) <juvenile fiction> Puerile is applied especially to acts and utterances which, though excusable in a boy or girl or characteristic of immaturity, would be unpardonable or out of character in an adult; the word finds its commonest use in depreciatory reference to acts or utterances of the mature (what seemed sapient discourse in 1940 is rather puerile chatter now—G. W. Johnson) <time and again the suspicion wounds us that we are puerile people, fetal minds, illegible tapestries—Peggy Bennett> Boyish (compare mannish under male), though referred commonly to boys, is sometimes used in reference to girls or their clothes, appearance, or qualities. The term often suggests some of the engaging qualities or the physical attractiveness of normal, vigorous boys (a boyish smile) (boyish charm) (boyish enthusiasm) Virgin and virginal, though referable usually to girls, in the extended use in which they suggest the freshness, innocence, purity, and inexperience that are associated with youthful virginity are applicable also to boys (that beautiful mixture of manly courage and virginal modesty—Farrar) (he smiled like a girl, or like clear winter skies, a virginal light making stars of his eyes—Lindsay) Maiden in its extended sense carries an even stronger suggestion than virgin or virginal of youthful lack of experience; it also implies that one's qualities (as virtue, worth, competence, or strength) have not been tried or tested (a maiden speech) (his maiden effort at authorship)

Ana *immature, unma tured
Ant aged —Con *mature, matured, grown-up

zeal enthusiasm, fervor, ardor, *passion
Ana energy, force (see power): zest, gusto (see taste); earnestness, seriousness (see corresponding adjectives at serious); intensity, vehemence, fierceness (see corresponding adjectives at intense)
Ant apathy —Con impassivity, phlegm, stolidity (see under impassive)
zealot *enthusiast, fanatic, bigot

LIST OF AUTHORS QUOTED

The entries in italic type in the left-hand column are the actual forms used in citations in the Vocabulary of this Dictionary. These entries are arranged in the alphabetical order of surnames or titles. The right-hand column supplies an identification for each author or source cited. Only readily understood abbreviations (such as Amer. for American and Eng. for English) are used in this column.

As the names of books of the Bible are given wherever cited in the Vocabulary, these names are omitted from the list below. Unless otherwise stated at the citation itself in the Vocabulary, for Douay Version (or Douay Bible). Quotations from other versions are indicated by the addition of the abbreviations R. V. for Revised Version (of 1885), D. V. for Douay Version (or Douay Bible).

Abbott . . . George Francis Abbott (1889- ) Amer. playwright
J. S. C. Abbott (1805-1877) Amer. historian
