**fertile, fecund, fruitful, prolific** mean having or manifesting the power to produce fruit or offspring. The same distinctions in implications and connotations are observable in their corresponding nouns fertility, fecundity, fruitfulness, prolificacy. Fertile (opposed to sterile, in fertile) applies particularly to something in which seeds take root and grow or may take root and grow because it contains the elements essential to their life and development. (fertile soil) (fertility of alluvial land) past fields where the wheat was high . . . it was a fertile country—S. V. Benét>  

Consequently the term often applies to something in which ideas take root and thrive (a fertile mind) (in the heath's barrenness to the farmer lay its fertility to the historian—Hardy) (in him were united a most logical head with a most fertile imagination—Boswell)  

Fertile is also applicable to something which has in itself the elements essential to its growth and development (a fertile egg) (fertile seed) (a fertile idea) or to a person or animal or pair that is able to produce normal living young (a fertile husband) (a fertile couple)  

Fecund (opposed to barren) applies especially to something which actually yields in abundance or with rapidity fruits, offspring or, by extension, projects, inventions, or works of art; thus, one speaks of the fecundity of a mother if one wishes to imply that she has a large family, but of her fertility if the intent is to indicate that she is not sterile; so, by extension, a fecund rather than a fertile inventive genius (a good part of these inventions came to birth—or were further nourished—in the fecund mind of Leonardo da Vinci—Mumford)  

(if you had been born a Dumas—I am speaking of fecundity . . . and of nothing else . . . and could rattle off a romance in a fortnight—Quiller-Couch)  

Fruitful may replace fecund, especially to something which actually yields in abundance or fecundity (a fruitful rain) In its extended sense it is applicable to whatever bears results, especially useful or profitable results (the time has always come, and the season is never unripe, for the announcement of the fruitful idea—John Morley)  

(John Morley)  
<the enormously fruitful discovery that pitch of sound depends upon the length of the vibrating chord—Ellis>  
<Darwinism . . . is a fruitful theory of the means by which nature works—Inge>

<the poet . . . is apt to lack the detachment which alone makes fruitful criticism possible—Lowes>

(**Prolific** is often interchangeable with *fecund*, but it often suggests even greater rapidity in reproduction and is therefore more frequently used than the latter term in disparagement or derogation especially when applied to types or kinds of things or beings (the starling is so prolific that the flocks become immense—Jeffreys) (uncultivated, defective people . . . are appallingy prolific—Shaw) (the flabby pseudoreligions in which the modern world is so prolific—Krutch)

Ana producing, bearing, yielding (see BEAR): inventing or inventive, creating or creative (see corresponding verbs at INVENT): quickening, stimulating, provoking, exciting, galvanizing (see PROVOKE)

Ant infertile, sterile —Con barren, impotent, unfruitful (see STERILE)

fertility fruitfulness, fecundity, prolificacy (see under FERTILE)

Ant infertility, sterility —Con impotence or impotency, barrenness, unfruitfulness (see corresponding adjectives at STERILE)

fervent ardent, fervid, perfervid, *impassioned, passionate*

gem or a piece of metal so cut, incised, or engraved. By virtue of this representation it is supposed to be endowed with the same occult influence as what it represents

\[\text{he had stolen from Henry ... a talisman, which rendered its wearer invulnerable—Stubb}^\text{a}\]

In extended use it may be applied to an object felt to exert a magical, extraordinary, and usually happy influence \(\text{the little circle of the schoolboy's copper coin ... had proven a talisman, fragrant with good, and deserving to be set in gold and worn next her heart—Hawthorne}\)

\[\text{the mere touch of a leaf was a talisman to bring me under the enchantment—Jefferies}\]

\[\text{there is no talisman in the word parent which can generate miracles of affection—Butler d. 1902}\]

\[\text{if their hearts had been opened, there would have been found, engraved within, the talisman Education—Brooks}\]

Charm basically applies to something believed to work a spell repelling evil spirits or malign influences or attracting favorable ones. It may be used in reference to an incanta-

tion, a word, or a form of words as well as to an object; thus, fetishes and talismans were often carried as charms

\[\text{the gallant little Abruzzi cob was decorated with ... a panoply of charms against the evil eye—Mackenzie}\]

In its extended application to a quality in persons or in things it connotes a power to attract or allure that is suggest-

give of spell working \(\text{she has great charm} \)

\[\text{you feel the charm of the painting?} \]

\[\text{(one of the great charms of Lawrence ... was that he could never be bored—Huxley}\]

Amulet is usually applied to something worn or carried on the person because of its supposed magical power to preserve one in danger or to protect one from evil and especially from disease \(\text{the French traveler Coudreau ... expressly states that collars made of jag-

uers' or bush hogs' teeth, worn round the neck by small children, are amulets intended to protect them, when they grow bigger, against the attack of ferocious beasts—Karsten}\)

In its rare extended use the word still implies protection \(\text{righteousness will give you love ... but it will not give you an invincible amulet against misfortune—Farrar}\)

Ant constant, *true —Con *faithful, loyal, staunch, steadfast

fiction, figment, fabrication, fable are comparable when meaning a story, an account, an explanation, or a concep-
tion which is an invention of the human mind. Fiction

so strongly implies the use of the imagination that it serves as the class name for all pro se poetic writings which deal with imagined characters and situations or with actual characters or situations with less concern for the his-
toricity of the details than for the telling of an interesting, coherent story. In the sense here particularly considered, a fiction is something that is made up without reference to

to and often in defiance of fact or reality or truth, typically for some such reason as to avoid telling an unpleasant or inconvenient truth \(\text{Adrian ... was at a loss what to invent to detain him, beyond the stale fiction} \text{that his father was coming tomorrow—Meredith}\) or to describe or explain someone or something about whom or which practically nothing is known \(\text{Karl Joël ... spent fifteen of the best years of his life over the Xenophontic Socrates, to discover that the figure was just as much a fiction as the Platonic Socrates—Ellis}\)

or to impose upon others an interpretation or an assumption that serves one's own ends or that satisfies the unthinking because of its accord with outward appearances \(\text{the notion that a business is clothed with a public interest and has been devoted to the public use is little more than a fiction intended to beautify what is disagreeable to the sufferers—Justice Holmes}\)

\(\text{few of the usual fictions on which society rested had ever required such defiance of facts—Henry Adams}\) or, espe-
cially in legal or scientific use, to provide a convenient assumption or method whereby one can deal with what is beyond the range of rational or objective proof \(\text{the Linnaean and similar classificatory systems} \text{are fictions ... having their value simply as pictures, as forms of representation—Ellis}\)

Fiction may apply to something which appears to be or is believed to be true or which accords with some higher form of truth (as "poetic truth," "philosophical truth," or "spiritual truth") or with the demands of reason when these come into conflict with fact or with the world as apprehended by the senses; figment and fabrication, on the other hand, carry no im-

plication of justification and typically suggest a defiance of truth of whatever kind or degree. Figment usually

suggests the operation of fancy or of unlicensed imagina-
tion and neglect of fact \(\text{the rude, unvarnished gibes with which he demolished every figment of defense—Stevenson}\)

\(\text{a sense of unreality was creeping over him. Surely this great Chamber ... did not exist at all but as a gigantic fancy of his own! And all these figures were figments of his brain—Galsworthy}\)

Fabrication applies to something that is made up with artifice and usually with the intent to deceive; consequently it is often used of a fiction that is a deliberate and complete falsehood \(\text{the common account of his disappearance is a fabrication}\)

\(\text{the legend, though some of its details are obviously fictitious, cannot be dismissed as a pure fabrication}\)

\(\text{it is evidence—fact, fabrication—Partridge}\)

\(\text{the Government story was not a complete fabrication but a careful distortion—Devlin}\)

Fable (see also ALLEGORY) 2 applies to a fictitious narrative that is obviously unconcerned with fact, usually because it deals with events or situations that are mar-

velous, impossible, preposterous, or incredible \(\text{if we may take the story of Job for a history, not a fable—Defoe}\)

\(\text{nothing but whispered suspicions, old wives' tales, fables} \text{invented by men who had nothing to do but loaf in the drugstore and make up stories—Anderson}\)

Ana narrative, *story, tale, anecdote, yarn

fictitious, fabulous, legendary, mythical, apocryphal mean

having the character of something invented or imagined as opposed to something true or genuine. Fictitious

commonly implies fabrication and, therefore, more often suggests artificiality or contrivance than intent to de-
ceive or deliberate falsification \(\text{many authors prefer to assume a fictitious name} \text{he was a novelist: his amours and his characters were fictitious—Gogarty}\)

In an

tended sense fictitious definitely connotes falseness when applied to value, worth, or significance and suggests its determination by other than the right standards \(\text{the furore created by this incident gives it a fictitious impor-
tance} \text{in booms and in panics the market value of a security is often fictitious}\)

Fabulous stresses the mar-

velousness or incredibility of what is so described; only at times, however, does the adjective imply a thing's impossibility or nonexistence \(\text{the fabulous mill which}
ground old people young—Dickens> (the company paid fabulous dividends) > [Lincoln] grows vaguer and more fabulous as year follows year—Mencken> Often it is little more than a vague intensive > [a house with a fabulous view of the mountains] > [we had a fabulous vacation trip] > **Legendary** usually suggests popular tradition and popular susceptibility to elaboration of details or distortion of historical facts as the basis for a thing's fictitious or fabulous character > [the legendary deeds of William Tell] > [the Tarquins, legendary kings of ancient Rome] > [Bradford's John Henry . . . took a famous legendary Negro for its hero—Van Doren] > **Mythical**, like legendary, usually presupposes the working of the popular imagination, but it distinctively implies a purely fanciful explanation of certain events, the creation of human beings and events especially in accounting for natural phenomena. Therefore, **mythical** in its wider use is nearly equivalent to **imaginary** and implies nonexistence > [the mythical beings called nymphs] > > [these ancestors are not creations of the mythical fancy but were once men of flesh and blood—Frazer] > **Apocryphal** typically attributes dubiety to the source of something (as a story or account) and especially suggests that the source is other than it is believed or claimed to be > (this . . . epigram, has a certain fame in its own right. It too has been attributed to Ariosto, though it is evidently apocryphal—Morby) > [the apocryphal work attributed to Chaucer in the 16th century—Philip Williams] > In such use it does not necessarily imply that the matter is in itself untrue, but it stresses the lack of a known responsible source. Sometimes, however, apocryphal loses its stress on source and then may imply dubiety or inaccuracy of the thing itself > [taking to themselves the upper rooms formerly belonging to the apocryphal invisible lodger—Dickens] > [tales, possibly apocryphal and certainly embroidered, of his feats of intelligence work in the eastern Mediterranean—Firth] > **Ana** invented, created (see INVENT): *imaginary, fanciful, fantastic: fabricated, fashioned (see MAKE) > **Ant** historical — > **Con** real, true, actual: *authentic, veritable: veracious, truthful, verisimilar (see corresponding nouns at TRUTH) > **fidelity**, allegiance, fealty, loyalty, devotion, piety denote faithfulness to something to which one is bound by a pledge or duty. **Fidelity** implies strict adherence to what is a matter of faith or of keeping faith; it presupposes an obligation, sometimes natural, sometimes imposed as a trust, and sometimes voluntarily accepted or chosen > [fidelity to one's word] > [fidelity in the performance of one's duties] > [fidelity to one's friends] > Sometimes, even when unqualified, it implies marital faithfulness > [with close fidelity and love unfeigned to keep the matrimonial bond unstained—Cowper] > Sometimes it implies faithfulness to the original > [the Russian . . . finds relief to his sensitiveness in letting his perceptions have perfectly free play, and in recording their reports with perfect fidelity—Arnold] > **Allegiance** implies adherence to something objective which one serves or follows as a vassal follows his lord and which demands unserving fidelity when conflicting obligations dispute its preeminence > [secret societies that exact the allegiance of every member] > But he [the critic] owes no allegiance to anything but to Truth; all other fidelities he must disregard when that is in question—L. P. Smith> > **Fealty**, like allegiance, implies a supreme obligation to be faithful, but unlike the latter it stresses the compelling power of one's sense of duty or of consciousness of one's pledged word > [when I do forget the least of these unspeakable duties, Romans, forget your fealty to me—Shak.] > The extent to which we are accurate in our thoughts, words, and deeds is a rough measure of our fealty to truth—Ballard> **Loyalty** may imply more emotion and closer personal attachment than either fidelity or fealty; it usually connotes steadfastness, sometimes in the face of attempts to alienate one's affections or of a temptation to ignore or renounce one's obligation > [I will follow thee, to the last gasp, with truth and loyalty—Shak.] > But in some contexts it may be taken to imply no more than absence of anything treasonable or subversive > [there are the loyalty programs . . . which undertake to exclude Communists and other disloyal persons from the government payrolls—Cushman] > **Piety** implies adherence to something objective which one serves or follows as a vassal follows his lord and which demands sacrifice; it usually also implies ardent attachment > [he set out to prove the loyalty of his nature by devotion to the Queen who had advanced him—Bello] > [there is . . . something outside of the artist to which he owes allegiance, a devotion to which he must surrender and sacrifice himself—T. S. Eliot] > **Piety** emphasizes fidelity to obligations regarded as natural or fundamental (as reverence for one's parents, one's race, one's traditions, one's country, or one's God) and observance of all the duties which such fidelity requires > [filial piety inspires respect for the wishes of parents] > [religious piety is manifest in faithful and reverent worship] > [having matured in the surroundings and under the special conditions of sea life, I have a special piety toward that form of my past . . . I have tried with an almost filial regard to render the vibration of life in the great world of waters—Conrad] > **Ana** faithfulness, constancy, staunchness, steadfastness (see corresponding adjectives at FAITHFUL) > **Ant** faithlessness: perfidy — > **Con** falseness or falsity, disloyalty, treacherousness or treachery, traitorousness, perfidiously (see corresponding adjectives at FAITHLESS) > **fidgety** restless, restive, uneasy, jumpy, jittery, impatient, nervous, unquiet > **field**, domain, province, sphere, territory, bailiwick are comparable when they denote the limits in which a person, an institution, or a department of knowledge, of art, or of human endeavor appropriately or necessarily confines his or its activity or influence and outside of which by implication he or it may not or should not go. **Field** implies restriction by choice or by necessity, but it seldom suggests permanent limitation > [a European war narrows the field of commerce for neutral American nations] > [he chose the development of industries in the South as his field of investigation] > [the philosopher and the practical man . . . each is in his own field, supreme—Buckle] > A writer whose reputation . . . has been pretty much confined to the whodunit field—Kelly> **Domain** is used chiefly in reference to departments of knowledge, of art, and of human endeavor viewed abstractly; it implies exclusive possession and control of a clearly defined field and a title to regard all outside interference or all intrusion into that field as trespass or invasion > [the domain of science] > [the domain of the spiritual] > [what is the difference between the legitimate music of verse and the music it attains by trespassing on the domain of a sister art?] > [Babbitt] > [those who believe in the reality of a world of the spirit —the poet, the artist, the mystic—are at one in believing
that there are other domains than that of physics—

**Jeans** Province is used in reference not only to the arts and sciences, each of which may be said to have its own domain, but also to a person or institution that because of his or its office, aims, or special character can be said to have jurisdiction, competence, power, or influence within clearly defined limits (it is within the province of a parent rather than of a teacher to discipline a pupil for misconduct out of school) (it is often stated that art goes beyond its province when it attempts to teach morals) (the almost imperceptibly realistic explorations into behavior which are the province of the psychiatrist—Sapir) Province is also used in the sense of function (see also FUNCTION n 1) and in the sense of a part of a larger domain (I should like the reader to accept engineering as a province of physics: so that the feats of the one may serve as credentials for the discoveries of the other—Darrow) Sphere, even more than do mothers, thrust themselves to clear circumscription of limits; it therefore suggests aparness rather than fundamental differences and carries no hint of danger of trespass or interference (the aesthetic and ethical spheres . . . were never sharply distinguished by the Greeks—Dickinson) (in the sphere of morals we must often be content to wait until our activity is completed to appreciate its beauty or its ugliness—Ellis) (in the life of a man whose circumstances and talents are not very exceptional there should be a large sphere where what is vaguely termed “herd instinct” dominates, and a small sphere into which it does not penetrate—Russell) (a long and profound process of social change . . . but this time in the economic sphere—Strachey) Territory comes very close to domain in implying a field possessed and controlled and regarded as one’s own; it does not, however, carry the implications so strong in domain of rightful ownership, of sovereignty, and of the title to inviolability; it may even suggest that the field has been usurped or taken over by the science, art, or activity in question (prose has preempted a lion’s share of the territory once held, either in sovereignty or on equal terms, by poetry—Lowes) (if passageways connect the domain of physics with the domains of life or of spirit, physics ought in time to discover these passageways, for they start from her own territory—Jeans) Bailiwick, basically the jurisdiction of a bailiff, is increasingly used in an extended and playful sense in reference to an individual and the special and limited province or domain in which he may do or exercise authority. It often also carries a connotation of petty yet despotic display of power (a politician whose influence does not extend beyond his own bailiwick) (he will not go along with others until he keeps within his own bailiwick) we may neither be angry nor gay in the presence of the moon, nor may we dare to think in her bailiwick—Stephens) (the largest problems are in the bailiwick of the social scientist—Street)

**Ana** limits, bounds, confines (see singular nouns at LIMIT): extent, area, size, magnitude

### fiendish

**devilish, diabolical, diabolic, demonic, demoniac**, demonic are comparable when they mean having or manifesting the qualities associated with infernal or hellish beings called devils, demons, and fiends. Fiendish usually implies excessive cruelty or malignity (fiendish tortures) (the fiendish joy that illumined his usually stolid countenance sent a sudden disgust and horror through me—Hudson) Devilish frequently suggests abnormal wickedness (devilish orgies) (devilish treachery) but it often also suggests superhuman or satanic ingenuity or craft or capacity for destruction (showed no compunction in planning devilish engines of military destruction—Ellis) The term is often used as an intensive that substitutes for profanity (devilish
devilish good dinner—Dickens) Diabolical often and devilish sometimes connote colder and more calculating malevolence than fiendish (diabolical cruelty) (diabolical ingenuity) (a diabolical sneer) (people suffering from the paranoia of persecution often imagine that they are the victims of a diabolical secret society—Huxley) Diabolic is often used interchangeably with diabolical, but the former term may be preferred when the reference is to devils as individuals of a given character or origin rather than to their malign qualities (the difference between the angelic and the diabolic temperament—Shaw) (the heroic age’s) heroes were doughty men to whom diabolic visitors were no more unusual than angelic ones—Krutch) Demonic and demoniac often suggest frenzy or excesses (as of one possessed) (demonic strength) (diabolic laughter) More frequently they suggest the inexplicable or superhuman element in life or, especially, in genius (in the soldest of routine and the senses, he [Goethe] showed the lurking demonic power—Emerson) (the rapt, demonic features of the Magic Muse—Hewlett) (he rode swift horses; he fought duels; he had burning love affairs; he traveled with demoniac restlessness throughout Europe—Hight)

**Ana** hellish, *infernal: malign, malefic, malefent, baleful, *sinister: malignant, malevolent, *malicious

### fierce

**Fierce, truculent, ferocious, barbarous, savage, inhuman, cruel, fell** are comparable when they mean displaying fury or malignity in looks or in actions. Fierce is applied to men or to animals that inspire terror because of their menacing aspect or their unrestrained fury in attack (the other Shape . . . black it stood as night, fierce as ten Furies, terrible as Hell, and shook a dreadful dart—Milton) (no bandit fierce, no tyrant mad with pride—Pope) Truculent, though it implies fierceness, especially of aspect, suggests the intent to inspire terror or to threaten rather than the achievement of that intention. Consequently it often implies a bullying attitude or pose. It is applied chiefly to persons, groups of persons, and nations (a group of truculent schoolboys) (he must . . . worry them toward the fold like a truculent sheep dog—J. R. Lowell) (the America that [Theodore] Roosevelt dreamed of was always a sort of swollen Prussia, truculent without and regimented within—Mencken) Ferocious not only connotes extreme fierceness but it implies actions suggestive of a wild beast on a rampage or in an attack on its prey; it therefore usually implies unrestrained violence, extreme fury, and wanton brutality (ferocious bayonet charge) (take a ferocious revenge) (a particularly ferocious dog) (two bloodthirsty men, more cruel than the most ferocious brutes—Frazer) Barbarous (see also BARBARIAN) in its extended sense applies only to civilized persons or their actions; it implies a harshness, a brutality, and, often, a ferocity thought of as unworthy of human beings in an advanced state of culture (barbarous pleasures of the chase—John Maffey) (barbarous treatment of prisoners) (barbarous methods of warfare) (you have been wantonly attacked by a ruthless and barbarous aggressor. Your capital has been bombed, your women and children brutally murdered—Sir Winston Churchill) Savage (see also BARBARIAN) implies an absence of the restraints imposed by civilization or of the inhibitions characteristic of civilized man when dealing with those whom he hates or fears or when filled with rage, lust, or other violent passion (a savage desire for revenge) (savage punishment of a disobedient child) (a savage criticism of a book) (lashed out with all the oratorical fury and savage invective at his command—Sidney Warren) (the savage wars of religion

Figure, pattern, design, motif, device are comparable when they mean a unit in a decorative composition (as in an ornamented textile or fabric) consisting of a representation of a natural, conventionalized, or geometrical shape or a combination of such representations. Figure commonly refers to a small, simple unit which is repeated or is one of those repeated over an entire surface. A figure may be one of the outlines associated with geometry (as a triangle, diamond, pentagon, or circle) or such an outline filled in with color, lines, or a representation of another kind; it may, however, be a natural or conventionalized representation of a natural form (as a leaf, flower, or animal) (an Oriental rug with geometrical figures in blue and red) (a silk print with a small figure) (the wallpaper has a well-spaced figure of a spray of rosebuds) (carved with figures strange and sweet, all made out of the carver's brain—Coleridge) Pattern may be used in place of figure (arranged in a series of simple and pleasing patterns—diamonds, quinconxes, hexagons—Huxley) but figure is not interchangeable with the more inclusive senses of pattern. The latter term is applicable not only to the simplest repeated unit, or figure, or to a larger repeated unit involving several related figures but also to the whole plan of decoration or adornment (the pattern of a lace tablecloth) (the pattern of a rug). Also, pattern may be used of other things than those which are visible, objective works of art and craftsmanship but which nevertheless can be viewed or studied as having diverse parts or elements brought together so as to present an intelligible and distinctive whole (the true pattern of the campaign revealed itself after the first week) (when he said pattern, he did not mean the pattern on a wallpaper; he meant the pattern of life—Sackville-West) (as skepticism grows, the pattern of human conduct inevitably changes—Kruisch) (the nearness of friends in those days, the familiar, unchanging streets, the convivial clubs, the constant companionship helped to knit the strands of life into a close and well-defined pattern—Reppieri) Design (see also PLAN, INTENTION) emphasizes drawing and arrangement and attention to line and the handling of figures and colors; it often specifically denotes a single unit (figure or pattern) which reveals these qualities (branches and leaves were disposed, not as combinations of color in mass, but as designs in line—Binyon) (your golden filaments in fair design across my duller fiber—Millay) Motif (see also SUBJECT 2) is frequently used in the decorative arts for a figure or a design which stands out not necessarily as the only one but as the leading one which gives the distinctive character of the whole (in lace for ecclesiastical use a sheaf of wheat is often the motif of the pattern) Device applies usually to a figure that bears no likeness to anything in nature but is the result of imagination or fancy. Unlike the other terms, it does not exclusively apply to a decorative unit, though it occurs frequently in that application (set in the close-grained wood were quaint devices; patterns in ambers, and in the clouded green of jades—Lowell)

financial

financial

monetary, pecuniary, fiscal are comparable when meaning of or relating to the possession, the making, the borrowing and lending, or the expenditure of money. Financial implies a relation to money matters in general, especially as conducted on a large scale (the financial concerns of the company are attended to by the treasurer) (the financial position of the bank is sound) (the financial interests of the country) (the city is in financial difficulties) Monetary implies a much more direct reference to money as such and therefore often connotes the coinage, distribution, and circulation of money (the monetary unit) (the monetary systems of Europe) (the monetary standard) (monetary gifts) Pecuniary suggests a reference to the practical uses of money; it is

d-

Inge) Inhuman is even stronger than savage, for it suggests not so much undue violence or lack of restraint as absence of all feeling that normally characterizes a human being: on the one hand it may suggest wanton brutality, or on the other hand it may imply absence of all capacity for love, kindness, or pity (an inhuman mother) (thy deed, inhuman and unnatural—Shak.) Cruel implies indifference to the suffering of others and even a positive pleasure in witnessing it or in inflicting it (her mouth crueler than a tiger's, colder than a snake's, and beautiful beyond a woman's—Swinburne) (as cruel as a schoolboy ere he grows to pity—Tennyson) Fell, which is chiefly rhetorical or poetical, connotes dire or baleful cruelty (unsex me here, and fill me from the crown to the toe topful of direst cruelty! . . . stop up the access and passage to remorse, that no compunctious visitings of nature shake my fell purpose—Shak.) (sinister men with . . . their own fell ends—T. I. Cook)

outline, contour, profile, silhouette: *character, symbol, sign, mark

3

Figure, pattern, design, motif, device are comparable when they mean a unit in a decorative composition (as in an ornamented textile or fabric) consisting of a representation of a natural, conventionalized, or geometrical shape or a combination of such representations. Figure commonly refers to a small, simple unit which is repeated or is one of those repeated over an entire surface. A figure may be one of the outlines associated with geometry (as a triangle, diamond, pentagon, or circle) or such an outline filled in with color, lines, or a representation of another kind; it may, however, be a natural or conventionalized representation of a natural form (as a leaf, flower, or animal) (an Oriental rug with geometrical figures in blue and red) (a silk print with a small figure) (the wallpaper has a well-spaced figure of a spray of rosebuds) (carved with figures strange and sweet, all made out of the carver's brain—Coleridge) Pattern may be used in place of figure (arranged in a series of simple and pleasing patterns—diamonds, quinconxes, hexagons—Huxley) but figure is not interchangeable with the more inclusive senses of pattern. The latter term is applicable not only

often employed in preference to financial when money matters that are personal or on a small scale are being considered (to ask for pecuniary aid) (he is always in pecuniary difficulties) (he works only for pecuniary motives) Fiscal implies reference to the financial affairs of a state, a sovereign, a corporation, or an institution whose concerns with revenue and expenditures are managed by a treasurer or treasury department (the fiscal year in the United States ends on June 30) (a fiscal officer of the crown)

fine n amercement (see under penalize)

fine vb *penalize, amerce, mulct

finicky, finicking, finical particular, fussy, fastidious, (nice, dainty, squeamish, persnickety, persnicketty)

Anna exacting, demanding (see demand vb): captious, carping, hypercritical, *critical: meticulous, punctilious, *careful: conscientious, scrupulous (see upright)

Con *slipshod, sloppy, slovenly: *slatternly, dowdy, blousy, frowzy

finish vb complete, conclude, *close, end, terminate

Anna achieve, accomplish, effect, fulfill (see perform)

finished *consummate, accomplished

Anna *perfect, entire, intact, wholer refined, cultivated, cultured (see corresponding nouns at culture): *suave, urbane, smooth: elegant, exquisite (see choice)

Ant crude —Con *rude, rough, raw, callow, green, uncouth

fire vb

Fire, conflagration, holocaust are comparable (fire)

*consummate, accomplished

fine vb (firm flesh) (firm jellies) (firm ground)

Hard (opposed to soft; see also hard 2) implies impenetrability or relatively complete resistance to pressure or tension but, unlike firm, hard rarely implies elasticity (hard as adamant) (hard as steel) (diamond is one of the hardest substances known) Solid (opposed to fluid) implies such density and coherence in the mass as enable a thing to maintain a fixed form in spite of external deforming forces (solid mineral matter) As opposed to flimsy, the term implies a structure or construction that makes a thing sound, strong, or stable (solid furniture) (a solid foundation) (the bungalow was a very solid one—Kipling) As opposed to hollow, it implies the absence of empty spaces within the structure or mass and, usually, the same or similar density and hardness of material throughout (a solid rubber tire) (a solid wall)

In extended use firm implies stability, fixedness, or resolation (a firm purpose) (a firm belief) (guide with a firm hand) (a firm and even tough diplomacy—Gaitskell) Hard implies obduracy or lack of feeling (a hard master) (she was firm, but she was not hard—Archibald Marshall) (a sort of scoutmaster to a hard gang of boys—Lovett) Solid usually implies substantiality or genuineness (a solid meal) (solid facts) (solid virtues) (solid attainments) (money, the great solvent of the solid fabric of the old society, the great generator of illusion—Trilling) but it may imply absolute reliability or seriousness of purpose (solid banks) (a solid character) (his scholarship was solid and sound—McGiffert) or unbroken continuity (as in time, group feeling, or opinion) (put in a solid week on a piece of work) (the solid vote of the members)

Anna compact, *close, dense, thick: tough, tenacious, *strong: *stiff, rigid, inflexible

Ant loose, flabby —Con flaccid, *limp, floppy, flimsy, sleazy

fiscal *financial, monetary, pecuniary

fish vb Fish, angle mean to attempt to catch fish. Fish implies the use of some apparatus and suggests nothing about the reason; angle, which is chiefly literary except in the derivative angler, implies the use of hook, bait, line, and rod and sport as the reason for the activity. Both words are used, without perceptible distinction, in the extended sense to seek to obtain or win by artifice (fish for a compliment) (modesty is the only sure bait, when you angle for praise—Chesterfield) (the first woman who fishes for him, hooks him—Thackeray) (she knew her distance and did angle for me, maddening my eagerness with her restraint—Shak)

fissure *crack, cleft, crevasse, crevice, cranny, chink

Anna *break, gap: *breach, split, rent, rupture, rift

fit n Fit, attack, access, accession, paroxysm, spasm, convulsion are comparable when they denote a sudden seizure or spell resulting from an abnormal condition of body or mind. The last three are too specific in their technical medical senses to be synonyms of the others (except of fit in its narrower significations), but in their extended senses, they are frequently closely parallel. Fit is often used narrowly: sometimes to designate a sudden seizure of a disorder (as epilepsy or apoplexy) characterized by such symptoms as violent muscular contractions or unconsciousness (fall in a fit) or sometimes to designate a period in which there is a marked increase of a physical disturbance characteristic of a disease (hysteria often reveals itself in fits of alternate laughing and weeping) In its wider application, fit still may imply suddenness and violence, but it emphasizes temporariness (a fit of the blues) (he works only by fits and starts) Occasionally it suggests nothing more than the un-
usual and passing character of the condition and is applied to things as well as to persons (enjoy a fit of laziness) 
(a fit of bad weather) Attack always implies a sudden and often violent onslaught but carries no suggestion of length of duration (frequent attacks of pain) (an attack of melancholy) (a prolonged attack of bronchitis) we have a second attack of hot weather—Whitman Access and accession, though often interchangeable with attack, distinctly imply the initiation of an attack or fit and often come close in meaning to outbreak or outburst (now and then an access of . . . sudden fury . . .) would lay hold on a man—Kipling (one of his sudden sharp accessions of impatience at the leisurely motions of the Trujillo boy—Mary Austin) Occasionally they also connote intensification (as of a mood or state of mind) to the point where control is lost or nearly lost (her evident, but inexplicable, access of misery—Meredith) In their technical medical senses paroxysm, spasm, and convulsion are sudden and usually short attacks especially characteristic of certain diseases. The distinguishing marks of a paroxysm are sudden occurrence or intensification of a symptom (as coughing) and recurrence of attacks; those of spasm are sudden involuntary muscular contraction, in some cases producing rigidity of the body or constriction of a passage and in others producing alternate contractions and relaxations of the muscles; those of convulsion are of repeated spasms of the latter kind affecting the whole or a large part of the body and producing violent contortions of the muscles and distortion of features. The implications of these technical senses are usually carried over into the extended senses. Paroxysm commonly occurs in the plural and suggests recurrent, violent attacks (the girls went into paroxysms of laughter) (throughout the night he suffered paroxysms of fear) Spasm, especially when used of emotional disturbances, often implies possession by something that for a moment grips and paralyzes (she could scarcely even look at the wall without a spasm of fear—Bennett) When used in the plural, it usually suggests the more or less rapid alternation of contrasting moods or states of mind (he worked only by spasms) Convulsion implies definite physical effects accompanying the mood or state of mind and closely resembling those symptomatic of disease (the ragged crew actually laughed at me . . . some of them literally throwing themselves down on the ground in convulsions of unholy mirth—Kipling)

fit adj Fit, suitable, meet, proper, appropriate, fitting, apt, happy, felicitous are comparable when they mean right with respect to the nature, condition, circumstances, or use of the thing qualified. Something is fit which is adapted or adaptable to the end in view, the use proposed, or the work to be done (good fit for a king) (but when to mischief mortals bend, the ill, how soon they find in instruments of ill!—Pope) (never even in the most perfect days of my development as an artist could I have found words fit to bear so august a burden—Wilde) (a wooden image, movable and fit to be carried in procession—Santayana) Sometimes, in addition, fit connotes competence or the possession of the required qualifications (men fit to command) (he is not a fit father for his children) (they do not know what the boy is fit for) Other times it suggests readiness (as in condition, state of health, mood, or inclination) (the vessel is now fit for service) (he played tennis to keep fit) Something is suitable which answers the requirements or demands of the occasion, the circumstances, or the conditions or suggests no incongruity with them (behavior suitable to his age and station in life) (will begin instinctively to arrange these institutions into suitable conventional categories—Marquand) (clothes suitable for the occasion . . . tennis outfits, hiking outfits, cycling outfits—Laver) Something is meet which is not only suitable but nicely adapted to the particular situation, need, or circumstances; the word usually suggests rightness or justness rather than an absence of incongruity; thus, a punishment of a childish offense may be suitable if it is in accord with the years and mentality of the child, but it is not meet unless it suggests due proportion between the offense and its penalty (fit is very meet, right, and our bounden duty, that we should at all times and in all places, give thanks unto thee, O Lord—Book of Common Prayer) (Sabbath was made a solemn day, meet only for preaching, praying, and Bible reading—Charles & Mary Beard)

Something is proper (see also DECOROUS) which belongs to a thing on some justifiable grounds (as by nature, by custom, or by right reason) (water is the proper element for fish) (the proper observance of Memorial Day) (the article brought only half its proper price) When, as often happens, fitness or suitability is stressed rather than natural or rightful association, proper then implies determination of fitness or suitability by logic, reasonableness, or good judgment (the proper study of mankind is man—Pope) (according to Aristotle the thing to aim at is to be angry “on the proper occasions and with the proper people in the proper manner and for the proper length of time”—Dickinson) Something is appropriate which is so eminently fit or suitable that it seems to belong peculiarly or distinctively to the person or thing with which it is associated, sometimes giving him or it a distinguishing grace or charm through its very congruity (an excitement in which we can discriminate two sorts of elements, the passions appropriate to the subject and the passion proper to the artist—Alexander) (the eighteenth-century gentleman spoke with a refined accent, quoted the classics on appropriate occasions—Russell) (we have agreed that our writing should be appropriate . . . that it should rise and fall with the subject, be grave where that is serious, where it is light not afraid of what Stevenson . . . calls “a little judicious levity”—Quiller-Couch) Something is fitting which is in harmony with the spirit, the tone, the mood, or the purpose (news fitting to the night, black, fearful, comfortless and horrible—Shak) (it is a fitting paradox that he should live today . . . chiefly by those writings which contradict everything he believed—Stewart) Something is apt (see also APT 2; QUICK 2) which is nicely fitted by its nature or construction to attain the end desired, to accomplish the purpose in view, or to achieve the results contemplated (it was recognized that while one style was suited to one set of themes, another was apt for another set—Binyon) (Fourier . . . invented a mathematical process which was not only suitable for handing his problem, but proved to be so universally apt that there is hardly a field of science or of engineering with it has not penetrated—Darrow) Something is happy (see also GLAD, LUCKY) which is singularly appropriate and apt and therefore brilliantly successful or effective considered in its relation to the situation, the conditions, or other important factors (a happy choice of words, nicely expressing the subtlety of his thought) (whether a composite language like the English is not a happier instrument of expression than a homogeneous one like the German—Coleridge) (of all writers he perhaps best combines in his style a felicitous elegance with a happy vernacular—Van Doren) Something is felicitous which is most opportune, tellingly, or gracefully happy (I do not like mottoes but where they are singularly felicitous—Lamb) (some of the most felicitous turns of thought and phrase in poetry are the result of a flash of inspiration under the happy guidance of a rhyme—Lowes) (let us inquire . . . whether the relation of the figures to

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
each other and of groups to the space they occupy is a felicitous one—Binyon

Ana adapted or adaptable, adjusted or adjustable, conformed or conformable (see corresponding verbs at adapt): qualified, capable, *able, competent

Ant unfit

fit vb *prepare, qualify, condition, ready

Ana endow, endue (see dower): furnish, *provide, supply

fitful, spasmodic, convulsive are comparable when they mean lacking steadiness or regularity in course, movement, or succession (as of acts or efforts). Fitful stresses variability and intermittency; it implies an irregular succession characterized by fits and starts *after life's fitful fever he sleeps well—Shak. (the fitful gloom and sudden l cambencies of the room by light—De Quincey) *a fitful, undecided rain—Kipling (a fitful wind swept the careless waste—Conrad) (hitherto I've been gloomy, moody, fitful—Gilbert) Spasmodic implies fitfulness, but it further suggests marked alternations (as of violent activity and inactivity or of great effort and of negligible effort or of zeal or enthusiasm and lack of interest); it therefore implies, even more than fitful, an opposition to what is sustained at a high pitch (spasmodic efforts to reform municipal government) (spasmodic energy) (a continuous discussion of international affairs, not spasmodic action at times of crisis—Attlee) (a spasmodic movement of despair—S. S. Van Dine) (spasmodic industry) Convulsive differs from the preceding terms in not implying intermittency and in stressing unsteadiness, strain or overstrain, and the lack of such regular rhythm as is the sign of control and especially of muscular, mental, or spiritual control *(convulsive rise and fall of the breast) (the convulsive movement of the earth characteristic of an earthquake) (he had a convulsive drive, a boundless and explosive fervor—Behrman) (a convulsive little hug—Turnbull)

Ana *intermittent, periodic, recurrent: desultory, hit-or-miss, *random, haphazard

Ant constant (sense 3) —Con *steady, uniform, even, equal: regular, methodical, systematic, *orderly

fitting adj appropriate, proper, meet, suitable, *fit, apt, happy, felicitous

Ana *relevant, pertinent, germane, apposite, apropos: seemly, *decorous, decent, proper: congruous, *consonant: harmonious, concordant, accordant (see corresponding nouns at harmony)

Ant unfitting

fix vb 1 *set, settle, establish

Ana *stabilize, steady: determine, *decide, rule, settle: *prescribe, define

Ant alter: abrogate (a custom, rule, law) —Con modify, *change, vary: supplant, supersede, displace, *replace

3 *adjust, regulate

Ana repair, *mend, patch, rebuild: *correct, rectify, revise, amend, emend

Con derange, disarrange, disorganize, unsettle, *disorder

fix n *predicament, plight, dilemma, quandary, scrape, jam, pickle

flabbergast amaze, astound, astonish, *surprise

Ana dumbfound, confound, bewilder, nonplus, perplex (see puzzle): disconcert, rattle, faze, discomfit (see em-brass)

flabby flaccid, floppy, *limp, flimsy, sleazy

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
flammable, incendiary, inflammatory, *com-

flagrant, glaring, gross, rank are comparable as derogatory intensives meaning conspicuously or outstandingly bad or unpleasant. Flagrant usually applies to offenses, transgressions, or errors which are so bad that they cannot escape notice or be condoned (his treatise is marked by several flagrant errors) (a flagrant abuse of the executive power) (flagrant injustice) (open and flagrant mutiny — Kipling) (in flagrant violation of all the New York proprieties) heinous, outrageous. Carrying an even stronger implication of obtrusiveness than flagrant, the term is often applied to something which is so evidently or so conspicuously wrong, improper, or faulty as to inflict such distress or pain upon the observer as might too vivid a color or too harsh a light (a glaring fault in a design) (a glaring inconsistency in his argument) (his second novel is in glaring contrast to his first novel) (this evil is so glaring, so inexcusable — Shaw) (glaring imperfections which go far beyond a mere lack of verbal felicity — Krutch) Gross (see also coarse; whole 2) is even more derogatory than flagrant or glaring because it suggests a magnitude or degree of badness that is beyond all bounds and wholly inexcusable or unpardonable. However, the term is not so often referred to evil acts or serious offenses as it is to human attitudes, qualities, or faults that merit severe condensation (gross carelessness) (gross stupidity) (gross superstition) (Elizabethan and Jacobean poetry . . . had serious defects, even gross faults — T. S. Eliot) (the hero is as gross an imposture as the heroine — Shaw) (they must read as the grossest impurity and rankest treason — Sperry) (even illness cannot excuse such unfilial behavior and such gross folly — Graves) Rank (see also rank 1) applies chiefly to nouns that are terms of reproach; it implies that the person or thing described by such a term is extremely, utterly, or violently whatever he or it is declared to be (O, my offense is the grossest and silver of the sideboard — he looked at her and in his supercilious cold smile — Carlyle) Scintillate implies the emission of sparks in a steady stream or a sparkling suggestive of such an emission; coruscate the emission of a brilliant flash or succession of flashes; both words have extended as well as literal use (a night so clear that the stars seem to scintillate) (an ornate style that coruscated with verbal epigrams — Huxley) (coruscating wit) Twinkle suggests a soft and intermittent sparkling, often wavering and lustrous (twinkle, twinkle, little star . . . like a diamond in the sky — Jane & Ann Taylor) (sunbeams . . . twinkled on the glass and silver of the sideboard — Cather) (he looked at her and his eyes twinkled — Anderson) Ana shoot, dart (see fly) (a light, fire)

flame vb* droop, wilt, sag
Anania scandalous, criminal, sinful (see corresponding nouns at offense): shameful, disgraceful (see corresponding nouns at disgrace) *flagrant, gross, glaring

flagrant, glaring, gross, rank are comparable as derogatory intensives meaning conspicuously or outstandingly bad or unpleasant. Flagrant usually applies to offenses, transgressions, or errors which are so bad that they cannot escape notice or be condoned (his treatise is marked by several flagrant errors) (a flagrant abuse of the executive power) (flagrant injustice) (open and flagrant mutiny — Kipling) (in flagrant violation of all the New York proprieties) heinous, outrageous. Carrying an even stronger implication of obtrusiveness than flagrant, the term is often applied to something which is so evidently or so conspicuously wrong, improper, or faulty as to inflict such distress or pain upon the observer as might too vivid a color or too harsh a light (a glaring fault in a design) (a glaring inconsistency in his argument) (his second novel is in glaring contrast to his first novel) (this evil is so glaring, so inexcusable — Shaw) (glaring imperfections which go far beyond a mere lack of verbal felicity — Krutch) Gross (see also coarse; whole 2) is even more derogatory than flagrant or glaring because it suggests a magnitude or degree of badness that is beyond all bounds and wholly inexcusable or unpardonable. However, the term is not so often referred to evil acts or serious offenses as it is to human attitudes, qualities, or faults that merit severe condensation (gross carelessness) (gross stupidity) (gross superstition) (Elizabethan and Jacobean poetry . . . had serious defects, even gross faults — T. Ana emerge, *appear, loom: start, *begin, commence
Flow n Flow, stream, current, flood, tide, flux are comparable when meaning something issuing or moving in a manner like or suggestive of running water. Flow may apply to the issuing or moving mass or to the kind of motion which characterizes it, but in either case it implies the type of motion characteristic of the movement of a fluid; the term may suggest either a gentle or a rapid pace and either a copious or a meager supply, but it consistently implies an unbroken continuity of the particles or parts <the flow of his ideas exceeded his capacity for setting them down in writing> <she expressed herself in a flow of words> <the hardly perceptible flow of a mountain glacier> <the thought of never ceasing life as it expresses itself in the flow of the seasons—Anderson> <she would tell you what she thought about the world and its ways in a flow of racy comment—Rose Macaulay> Stream implies a flow characteristic of a body of running water (as a river) or of water pouring forth from a source or outlet (as a fountain or a faucet). The term places emphasis more upon the volume, the duration, and the constant succession and change of particles than upon the type of motion <for weeks after the surrender a stream of refugees crossed the country’s border> <music, acting, poetry proceed in the one mighty stream: sculpture, painting, all the arts of design, in the other—Ellis> <novelists who present their characters not in action, but through the stream of consciousness of each> <let loose a stream of commentary and discussion—Southern> Current differs from stream in laying greater stress on the direction or course of the movement implied and in carrying stronger suggestions of its force or velocity <streams of people passed him in either direction, but he was finally caught by the current of those moving south> <he could not maintain his position against the current of opposition> <currents of cold air swept in from the north> <he might drift some distance with the democratic current of the age, and then, with Gladstone, grow affrighted—Kirk> <Olds might have won Ford’s success had his mind been more sealed against the currents to which it was exposed—Burlingame> Flood is often used in place of flow or stream to imply extreme copiousness in the supply or to attribute to it an overwhelming or torrential power <it is not, he then feels with a sudden flood of emotion, that America is home, but that home is America—Brownell> <this poem called forth floods of abuse—Day Lewis> Tide applies to something that flows or courses like an ocean tide and suggests either an alternation of directions <swayed by the sweeping of the tides of air—Bryant> or a power to suck one into its course by the force of its outward or inward pull <Stanley was caught in the tide of war fervor—Rose Macaulay> Flux, more specifically than stream, stresses the unceasing change in the parts, particles, or elements and, sometimes, in the direction of what flows <for this and that way swings the flux of mortal things though moving only to one far-set goal—Arnold> <how idle is it to commiserate them for their instability, when not stability but flux is their ideal!—Brownell> Flux often specifically applies to the outward aspect or appearance which is constantly changing in contrast to its real and abiding nature <to distinguish between the transient, unsatisfying flux of things, and the permanent, satisfying reality which lies behind it—Inge> 

Ana *succession, progression, series, sequence: continuity, *continuation, continuance
flower n blossom, bloom, blow (see under BLOSSOM vb)

**fly vb**

*fly, dart, float, skim, scud, shoot, sail* are comparable in their extended senses when they mean to pass, or less often to cause to pass, lightly or quickly over a surface or above a surface. *Fly* (see also ESCAPE 1) may be used to imply movement through or as if through the air that suggests swift passage, buoyancy, or lack of impediments like that of a bird or airplane *swift fly the years—Pope*; *saw the snowy whirlwind fly—Gray*; *thy loose hair in the light wind flying—Shelley*; *their Oriental robes flapping and their Oriental beards flying in the wind—Forester*; *pushed one's way through the reeds, which flew back into place and revealed nothing—Beebe* *Dart* in its extended intransitive sense implies movement that is as suddenly initiated and as straight and as swift in its course as that of an arrow or javelin *hawks regularly beat along the furze, darting on a finch now and then—Jeffreys*; *he caught her by the arm as she ran past and ... without trying to check her, simply darted in with her and up the stairs, causing no end of consternation—Conrad* ([stars] darting about our galaxy with speeds that range up to 200 miles per second—Merrill)*

**float**

*float, flooded, or scoria of iron) or on the surface of a body of water* (scum)

**Ana**

*flotant, airdrome, airfield, airstrip, landing field

**Ant**

*airport, airdrome, airfield, airstrip, landing field

**flying field**

*airport, airdrome, airfield, airstrip, landing, landing strip

**foam n**

*foam, froth, spume, scum, lather, suds, yeasts are comparable when they denote either a mass of bubbles gathering in or on the surface of a liquid or something as insubstantial as such a mass. Foam is the most comprehensive of these terms but is not interchangeable with all; it implies an aggregation of small bubbles such as rises to the top of a fermenting liquor or an effervescing or boiling liquid, or appears on the surface of the sea when agitated by high winds or covered with breaking waves; the term is also applicable to a bubbly slaver dribbling from the mouth of one in a rage or in great excitement or to the clotted sweat of an animal driven to exhaustion or suffering from intense heat *the rider from the château, and the horse in a foam, clattered away through the village—Dickens* Of all these words *foam* commonly has the most pleasant associations, usually connoting in poetry whirliness, dелиcacy, and grace (Ithalian Aphrodite beautiful, fresh as the rose—Warren)*

**Ana**

*flit, flutter, flitter, flicker, hover: soar, mount, *rise, glide, *slide, slip

**Ant**

*2 flee, *escape, decamp, abscond

**froth n**

*foam, froth* could also be *mercurial, mercury, mercury carbonate, mercuric oxide, mercuric chloride, copper salts, potassium salts*

**Ant**

*water, liquid, saltwater, seawater*

**froth**

*foam, froth, spume, scum, lather, suds, yeasts are comparable when they denote either a mass of bubbles gathering in or on the surface of a liquid or something as insubstantial as such a mass. Foam is the most comprehensive of these terms but is not interchangeable with all; it implies an aggregation of small bubbles such as rises to the top of a fermenting liquor or an effervescing or boiling liquid, or appears on the surface of the sea when agitated by high winds or covered with breaking waves; the term is also applicable to a bubbly slaver dribbling from the mouth of one in a rage or in great excitement or to the clotted sweat of an animal driven to exhaustion or suffering from intense heat *the rider from the château, and the horse in a foam, clattered away through the village—Dickens* Of all these words *foam* commonly has the most pleasant associations, usually connoting in poetry whirliness, delicacy, and grace (Ithalian Aphrodite beautiful, fresh as the foam—Tennyson)*

**Ant**

*water, liquid, saltwater, seawater*

**ana**

*analogous words

**see also explanatory notes facing page 1*
water): this notion of worthlessness or obnoxiousness is carried over into extended use especially as applied to a class or body of persons (the social scum, the passively rotting mass of people who lie at the bottom of the social scale—Geismar) Lather and suds both apply to the foam produced by agitating water impregnated with soap or detergent. Lather, however, usually suggests a less frothy condition than suds and a heavier aggregation of small soapy bubbles (hard water does not produce a good lather for shaving) Suds, on the other hand, often denotes water so covered with a soapy foam that it is usable for laundering clothes (the laundress likes the soap because it gives her plenty of suds) (soak the cloth in hot suds) Lather, rather than suds, may be preferred when the foam induced by intense sweating or emotional excitement is denoted (a hard-ridden horse working up a lather) (he was in a lather of rage) but suds is more usual when the reference is to something that suggests the appearance of suds in a laundry tub or washing machine (another [medicine man] whips up a mixture of water and meal into frothy suds symbolic of clouds—Frazer) Yeast basically applies to a froth or sediment composed of an aggregate of small fungal cells and found in saccharine liquids (as fruit juices and malt worts) in which it induces fermentation. The same substance is used as a leavening agent in bread; from this stems one line of its extended use in which it suggests a sign of activity, vitality, or agitation (seeing with the yeast of revolt—Dobie) But because yeast often appears as a froth on liquids and is accompanied by fermentation, the term has another line of extended use in which it is applied to a similar froth, foam, or spume, especially one appearing on the surface of an agitated sea (the ship . . . swallowed with yeast and froth—Shak) (they melt into thy yeast of waves—Byron)

focal * central, pivotal
Ana significant, important, momentous (see corresponding nouns at importance): salient, signal, striking, arresting, outstanding (see Noticeable)

foil vb thwart, * frustrate, circumvent, balk, baffle, outwit
Ana discomfit, * embarrass, disconcert, faze, rattle: curb, check, * restrain, inhibit
Con * advance, further, forward, promote: abet, foment, * incite, instigate
follow vb 1 Follow, succeed, ensue, supervise mean to come after someone or, more often, something. Although all of these verbs occur as transitives and intransitives, ensue and supervise are more commonly intransitive verbs. Follow is the general term and may imply a coming after in time, in sequence, in pursuit (see follow 2), in logic, or in understanding (the singing of “America” by the audience will follow the introductory prayer) (Queen Victoria followed William IV as British sovereign) (the driving force in education should be the pupil’s wish to learn, not the master’s authority; but it does not follow that education should be soft and easy and pleasant at every stage—Russell) Succeed commonly implies an order (as one determined by descent, inheritance, election, or rank) by which one person or thing comes after another (son succeeds father as head of the business for many generations) (the eldest son succeeds to the title) (the person who will succeed the late congressman will be appointed by the governor of the state) Succeed is often used when the idea of a fixed order is lost, but it still usually retains the idea of taking the place of someone or something (the link dissolves, each seeks a fresh embrace, another love succeeds, another race—Pope) (the anxieties of common life began soon to succeed to the alarms of romance—Austen) (simplicity of concept succeeds complexity of calculation—Bell) Ensue usually implies some logical connection or the operation of some principle of sequence as that of necessity (that such a consequence should ensue) (it was far the better course to do—Pope) (Austen) (each knowing the other, a conversation ensues under the hypothesis that each to the other is unknown . . . a very silly source of equivocque—Poe) Supervene suggests a following by something added or conjoined and often unforeseen or unpredictable (two worlds, two antagonistic ideals, here in evidence before him. Could a third condition supervene, to mend their discord?—Pater) (it was not acute rheumatism, but a supervening pericarditis that . . . killed her—Bennett) (it is in the philosophy that supervened upon the popular creed . . . that we shall find the highest . . . reaches of their thought—Dickinson)

2 Follow, pursue, chase, trail, tag, tail are comparable when meaning to go immediately or shortly after someone or something. Follow is the comprehensive term; it usually implies the lead or, sometimes, guidance of someone or something (the detective followed the boys to their hiding place) (hangers-on who follow the circus) (the vengeance that follows crime—Dickinson) (follow up a clue) (follow a trade) (he should not desire to steer his own course, but follow the line that the talk happens to take—Benson) (not one of the many people I know who followed the hearings thought that the television reporting was slanted or unfair—Selden) Pursue in its earliest sense implies a following as an enemy or hunter (pursue a fox) (pursuing rebels in flight) (pursue happiness) The term therefore usually suggests an attempt to overtake, to reach, or to attain, and commonly in its extended senses, even when the implications of hostility or of a desire to capture are absent, it connotes eagerness, persistence, or inflexibility of purpose in following one’s thoughts, ends, or desires (ye who . . . pursue with eagerness the phantoms of hope—Johnson) (thrice happy man! enabled to pursue what all so wish, but want the power to do!—Pope) (pursuing the game of high ambition with a masterly coolness—Buchan) (pursue the career of a diplomat) Chase implies fast pursuit in order to or as if to catch a fleeing object or to drive away or turn to flight an oncoming thing (chase the fleeing thieves) (the boys chased the intruder out of the school yard) (we were chased by two pirates, who soon overtook us—Swift) (if to dance all night, and dress all day . . . chased old age away . . . who would learn one earthly thing of use?—Pope) Trail implies a following in someone’s tracks (trail a fugitive to his hiding place) (trail a lost child to the edge of a creek) (not daring to accost him . . . she had trailed him to the railroad station—Chidsey) Tag implies a persistent,
following or accompanying (complained that his little sister was always tagging after him) (two unarmed launches tagged behind—Millard) Tail specifically implies close following and surveillance (he employed detectives to tail the suspect)

**Ana** attend, *accompany, convoy: *copy, imitate, ape: *practice, exercise

**Ant** precede (in order): forsake (a teacher or his teachings) —*Con* lead, *guide, pilot, steer: elude, evade, *escape: desert, *abandon

follower, adherent, disciple, sectary, partisian, henchman, satellite are comparable when denoting one who attaches himself to another. Follower is the inclusive term, denoting a person who attaches himself to the person or opinions of another (the followers of Jesus) (followers of Karl Marx) (they are creatures of the Devil, vowed to idolatry, and followers of Mithras—Nevil Shute) Its synonyms divide themselves into two groups, the first three designating a follower through choice or conviction and the last three a follower in whom personal devotion overshadows or eclipses the critical faculty. Adherent connotes closer and more persistent attachment than follower; it may be used without any implication of the personality of the teacher or leader (a doctrine that gained many adherents) (the candidate lost many adherents when he announced his views on reform) (adherents to the Communist party—Conant) Disciple typically presupposes a master or teacher and implies personal, often devoted, adherence to his views or doctrines (though . . . an enthusiastic student of Fourier . . . he was never a mere disciple—the individualistic stamp was too strong—Rosenzweig) but it may also imply similar adherence to a school of thought or governing principle (there is no anger, not even the most aesthetic disciple of the dry fly—Alexander MacDonald) (during the war years the disciples of the extreme Left sounded very much like the worst of the Negro-hating Southerners—Current Biog.) Sectary (see also HERETIC) usually implies the acceptance of the doctrines of a teacher or body (sectaries of Mohammed) (there dwelt, unchallenged, the spirit of the Puritans and the Friends, the stiff-necked sectaries of Cromwell's army—Brooks) (Aristotle . . . has suffered from the adherence of persons who must be regarded less as his disciples than as his sectaries—T. S. Eliot)

Partisan suggests such devotion to the person or opinions of another or to a party, a creed, or a school of thought that there is incapacity for seeing from any other point of view. It often, therefore, connotes bigotry or prejudice (Laura was always a passionate partisan of her young brother—Mary Austin) (a few partisans argued for him—Mencken) Henchman is commonly applied to a subservient follower of a political leader or boss; in extended use it connotes abject submission to the will of a dominating and, usually, unscrupulous leader or group (the cat's-paw of corrupt functionaries and the henchman of ambitious humbugs—Shaw) Satellite, more than any of the others, suggests devotion to the person of the leader and constant obsequious attendance on him (Boswell was . . . made happy by an introduction to Johnson, of whom he became the obsequious satellite—Irving)

**Ana** devotee, votary, *addict, habitué: *parasite, sycomorph, toady

**Ant** leader

following n Following, clientele, public, audience are comparable when they denote the body of persons who attach themselves to another especially as disciples, patrons, or admirers. Following is the most comprehensive term, applicable to a group that follows either as a physical train or retinue or as the adherents of a leader, the disciples of a philosopher, the customers of a salesman, the admirers of a young woman, or the fans of an actor (such a man, with a great name in the country and a strong following in Parliament—Macaulay) (he unconsciously follows a following of like-minded persons—Montague) Clientele is chiefly used of the persons, collectively, who go habitually for services to a professional man (as a lawyer or physician) or who give their patronage to a business establishment (as a hotel, a restaurant, or a shop) (Dr. Doe has among his clientele all the leading families in the town) (summer hotels usually send out circulars to their clientele in the spring)

Public basically denotes a group of people with a common interest and may come close to following in many of its applications (as to adherents, disciples, customers, and admirers); often, however, it distinctively conveys the notion of a group making active demands rather than one passively or admiringly following (a novelist's public, in fact, is people who read everything he writes even when they hate it—Carly) (a public relations program must be concerned with the policies of the institution, their interpretation and announcement to the college's various publics—Brecht) (protecting movie stars from their publics—New Yorker) (these two books on Spain are different in purpose, different in scope, and aimed at different publics—Bergin) Audience is applicable to a following that listens with attention to what a person has to say whenever he addresses them (as in a speech or a book) (still govern thou my song, Urania, and fit audience find, though few—Milton) (the stricken poet [Leopardi] . . . had no country, for an Italy in his day did not exist, he had no audience, no celebrity—Arnold) Audience, rather than spectators (see SPECTATOR), is also the usual term for designating the body of persons attending a lecture, a play, or a concert on the assumption that they are there primarily to hear, only secondarily to see (the audience at the opera packed the house)

**foment** abet, *incite, instigate

**Ana** good, spur (see corresponding nouns at MOTIVE): stimulate, quicken, excite, galvanize, *provoke: nurture, *nurse, foster, cultivate

**Ant** quell —*Con* suppress, repress: check, curb, *restrain

fond adj 1 Fond, infatuuated, besotted, insensate are comparable when they mean made blindly or stupidly foolish (as by passion or drink). Fond implies a judgment misled by credulity, undue optimism, or excessive affection (Cowper's characterization of the Biographia Britannica: "Oh, fond attempt to give a deathless lot to names ignoble, born to be forgot!") (grant I may never prove so fond, to trust man on his oath or bond—Shak) (how are we to rid ourselves of our fond prejudices and open our minds?—James Ford) Infatuated implies a weakening rather than the absence of judgment, especially under the influence of violent passion or unreasoning emotion; it is therefore correctly applied to the acts or qualities of men from whom sagacity or self-control might have been expected (what the infatuated ministry may do, I know not; but our infatuated House of Commons . . . have begun a new war in America—Burke) (your people are so shortsighted, so jealous and selfish, and so curiously infatuated with things that are not . . . good—Jefferies) Besotted adds to infatuated the implications of a stupefying or intoxicating influence that destroys the capacity to think clearly and sometimes makes its victim disgusting or repulsive (men besotted by drink) (are these so far besotted that they fail to see this fair wife-worship cloaks a secret shame?—Tennyson)

See also explanatory notes facing page 1
food 1 Food, feed, victuals, viands, provisions, comestibles, ♦ provender, ♦ fodder, ♦ forage are comparable when meaning things that are edible for human beings or animals. ♦ Food is the most general of these terms and is typically applicable to all substances which satisfy hunger and build up or repair waste in the body of men or animals ♦ conserve a nation's supply of food ♦ refrigerators that keep food fresh ♦ It is sometimes distinguished from drink ♦ there was no lack of food or drink during their sojourn on the island ♦ or applied specifically to human needs and then distinguished from feed, which normally denotes food for domestic animals ♦ he needed food for his family and feed for his livestock —Gustafson ♦ victuals and viands basically denote food for human beings, especially food that is prepared and ready for eating. ♦ victuals is a racy or pungent word used for special effect ♦ I worked hard enough to earn my passage and my victuals —Shaw ♦ when I bear in mind how elegantly we eat our victuals —L. P. Smith ♦ Viands is bookish or affected and occurs chiefly where daintiness, rarity, or an especially fine quality is to be suggested ♦ all the dainties and viands that could be wanted for a feast —Wilde ♦ he dashed the wine on the earth and scattered about the other viands —Milman ♦ provisions applies to food in general as offered for sale in a market or kept in store as supplies ♦ a country store stocked with all sorts of staples and provisions ♦ there were not enough provisions in the hotel to care for the weekend influx of guests ♦ a basket of provisions ♦ Comestibles, which stresses edibility, is now found chiefly in playful use for victorious ♦ he resolved upon having a strong reinforcement of comestibles —Hook ♦ bills are also discussed, and butchers and grocers, and the price of comestibles —Rose Macaulay ♦ The remaining three terms, provender, fodder, and forage, basically denote feed for animals, but all may occasionally be used, typically derogatorily, of human food. ♦ provender in its basic use applies to food (as hay, oats, or corn) for horses, mules, or asses ♦ they must be fed like mules and have their provender tied to their mouths —Shak. ♦ fodder applies to food for domestic cattle and especially to coarse food (as hay, silage, and straw) that is harvested and fed out, as distinguished from forage, food consumed by grazing or browsing. 2 Food, aliment, pabulum, nutriment, nourishment, sustenance, ♦ pap are comparable especially when they denote material which feeds and supports the mind or the spirit. ♦ Food is applicable to whatever is taken in and assimilated to enlarge the mind or spirit or to contribute to its vitality and growth ♦ praise was her favorite food —Phillpotts ♦ those books that provide food for the imagination —Aliment and pabulum are not always distinguishable from each other, but aliment is more often applied to what nourishes or builds one's mind and nature (mischief, love, and contradiction, are the natural aliments of a woman —Richardson ♦ the aliments nourting our nobler part, the mind, thought, dreams, passions, and aims . . . at length are made our mind itself —Lytton ♦ and pabulum to something, and often something overrefined, bland, or worthless, which serves as an article or sometimes as the substance of one's mental diet ♦ many motion pictures provide poor pabulum for the adolescent mind ♦ where every man's hand is out for pabulum, and virile creativeness has given place to the patronizing favor of swollen bureaucracy —Vannevar Bush ♦ Nutriment and nourishment are both applied to what is needed for healthy growth (as of the body, the mind, or an institution) ♦ the central sources of the ideology, the abundant larder from which the nutriment of ideology is being drawn —A. A. Cohen ♦ self-esteem, one of the properties of the ego, is first regulated by the supply of nourishment from the outside —Blum ♦ but nourishment in addition suggests, as nutriment does not, the nourishing effect produced ♦ Professor Perry's conclusion: "The chief source of spiritual nourishment for any nation, must be its own past, perpetually rediscovered and renewed" —Time ♦ lacking the nourishment which enthusiasm or imagination can give, their writing is unlikely to be either robust or vivid —Gloag ♦ sustenance stresses the supporting and maintaining function rather than the nourishing ♦ the blossoms of Beaumont and Fletcher's imagination draw no sustenance from the soil, but are cut and slightly withered flowers stuck into sand —T. S. Eliot ♦ Pap is found chiefly in contemptuous or ironical use and applies in its extended sense to nourishment that is as slight, as diluted, and as innocuous as soft bland food for an infant or invalid ♦ college courses that are mere intellectual pap ♦ a preacher whose sermons are nothing more than pap ♦ fool, idiot, imbecile, moron, simpleton, natural are often used popularly and interchangeably of one regarded as lacking sense or good judgment but each can be more precisely applied to someone mentally deficient in a given degree. ♦ Fool, the most general, can apply to anyone mentally deranged as well as mentally deficient, implying lack or loss of reason or intelligence; it may be used as an extremely offensive term of contempt ♦ fools rush in where angels fear to tread —Pope ♦ he was a fool and liable, as such, under the stress of bodily or mental disturbance, to spasmodic fits of abject fright which he mistook for religion —Norman Douglas ♦ I was a fool, if you like, and certainly I was going to do a foolish, overbold act —Stevenson ♦ act like a fool ♦ Idiot, imbecile, and moron are technical designations for one mentally deficient. ♦ An idiot is incapable of connected speech or of avoiding the common dangers of life and needs constant attendance. ♦ An imbecile is incapable of earning a living but can be educated to attend to simple wants or avoid most ordinary dangers. ♦ A moron can learn a simple trade but requires constant supervision in his work or recreation. In more general and nontechnical use idiot implies utter feeblemindedness, imbecile implies half-wittedness, and moron implies general stupidity ♦ comes like an idiot, babbling and strewing flowers —Millay ♦ actually there never is a status quo, except in the minds of political imbeciles —Henry Miller ♦ even morons get college degrees —Warfel ♦ All three, however, may imply no more than often mild derogation or disapprobation of a person or his conduct ♦ got a little high ♦ got a little high . . . and Peeps climbed up into the guard
foolhardy 349

chair, mumbled about the brains of certain morons—

Boys' Life> Simpleton, a term of indulgent contempt, implies silliness or lack of sophistication (a sweet-natured simpleton who wrote lovely songs for children—Damron)

(in spite of her experience of his lying, she had never suspected that that particular statement was a lie. What a simpleton she was!—Bennett) Natural, which persists chiefly in historical context, may designate any congenitally feebleminded person (the man is not a natural; he has a very quick sense, though very slow understanding—Steele) with the vacant grin of a natural—Charles Gibbon

foolhardy daring, daredevil, rash, reckless, *adventurous, venturesome

Ana bold, audacious (see brave): headlong, *precipitate, impetuous

Ant wary —Con *cautious, circumspect, calculating

foolish 1 simple, silly, fatuous, asinine

Ana idiotic, imbecilic, moronic (see corresponding nouns at fool.)

Con *intelligent, clever, quick-witted, bright, smart

2 Foolish, silly, absurd, preposterous, as applied to a person, his acts, behavior, and utterances, mean ridiculous because not exhibiting good sense. Something is foolish which does not commend itself to the judgment of others as wise or sensible or judicious (a foolish investment) courageous behavior is easier for a man who fails to apprehend dangers, but such courage may often be foolish—Russell) only a foolish optimist can deny the dark realities of the moment—Roosevelt) Something is silly which seems witless, pointless, or futile (a silly sacrifice) (how silly an ardent and unsuccessful wooer can be, especially if he's getting on in years—Hammett) Something is absurd which is inconsistent with accepted ideas, common sense, or sound reason; the word is applied, therefore, to ideas and projects considered impersonally as well as to persons and their acts (the absurd . . . dogma that the king can do no wrong—Shaw) (the absurd predicament of seeming to argue that virtue is highly desirable but intensely unpleasant—Lippmann) Something is preposterous which is glaringly absurd (if a man cannot see a church, it is preposterous to take his opinion about its altarpiece or painted window—T. H. Huxley) or sometimes merely highly unsuitable or ridiculously out of keeping (as with a particular character or situation) (he put on his preposterous old flowered cashmere dressing gown—Deland)

Ana ridiculous, ludicrous, *laughable

Ant sensible —Con *wise, sane, judicious, prudent, sage, sapient

foot vb figure, cast, *add, sum, total, tot

fon Fop, dandy, beau, coxcomb, exquisite, dude, buck are comparable when denoting a man who is conspicuously fashionable or elegant in dress or manners. Fop is applied to a man who is preposterously concerned with fashionableness, elegance, and refinement not only in respect to dress and manners but in respect to such matters as literary or artistic taste (his tightened waist, his stiff stock . . . denoted the military fop—Disraeli)

(f) I might have taken him for a fop, for he wore white lace at throat and wrists—Kenneth Roberts) (his love of good clothes and good living gave Bennett a reputation as a fop—Time) Dandy carries a weaker implication of affectation and overrefinement than fop and a stronger suggestion of concern for stylish or striking apparel and a spruce or dapper appearance (that he had the tastes of a dandy, we learn from a letter of the time describing his "smart white hat, kid gloves, brown frock coat, yellow cassimere waistcoat, gray duck trousers, and blue silk handkerchief carelessly secured in front by a silver pin"—Walsh) (this character, one of the most comical in Stendhal, should . . . figure very high, in the list of his dandies. He never smiles, never thinks, and belongs to the Jockey Club—Girard) Beau suggests as much attention to details of personal appearance as does fop (a beau is one who, with the nicest care, in parted locks divides his curling hair; one who with balm and cinnamon smells sweet—Elton) Coxcomb, like fop, is applicable to a beau as a term of contempt; it often stresses fatuousness and pretentiousness as much as or more than foppishness (of all the fools that pride can boast, a coxcomb claims distinction most—Gay) (the young coxcombs of the Life Guards—Emerson) Exquisite is a somewhat old-fashioned designation of a dandy who manifests the extreme delicacy and refinement of taste characteristic of a fop (the particular styles. . . he affected had their marked influence on the young exquisites of the Mayfair balls and Pall Mall club windows—Wilde) Dude applies chiefly to a man who makes himself conspicuously different in dress or manners from the ordinary man; it is therefore the rough man's term for the carefully dressed and groomed man, the quiet gentleman's term for the obvious dandy, or a Western American's term for an Easterner or a city-bred man (her father told her he would not allow her to marry a dude) (the boys jeer at every young man wearing a high hat and call him a dude) (they were all mountain-wise, range-broken men, picked . . . for diplomacy in handling dudes—Scribner's Mag.) (the dudes ogled the ladies, striking their mustaches, adjusting their ties and scooting their shoe toes up their calves to restore the shine—Berrigan) Buck applies usually to a dashing fellow, a dandy in dress, but not conversically, or necessarily, a gentleman in manners (the dashing young buck, driving his own equipage—Irving) (I remember you a buck of bucks when that coat first came out to Calcutta—Thackeray)

for conj *because, since, as, inasmuch as

forage n fodder, provender, *food, feed, provisions, comestibles, victuals, viands

forbear 1 forgo, abnegate, eschew, sacrifice

Ana restrain, curb, bridle, inhibit: avoid, *escape, evade, shun: desist, cease (see stop)

2 *refrain, abstain

Ana suffer, tolerate, endure, *bear

forbearance 1 long-suffering, *patience, longanimity, resignation

Ana & Ant see those at FORBEARANCE 2

2 tolerance, clemency, mercifulness, leniency, indulgence (see under FORBEARING)

Ana patience, long-suffering, longanimity: *mercy, lenity, grace, charity

Ant vindictiveness: anger

forbearing, tolerant, clement, merciful, lenient, indulgent mean disinclined by nature, disposition, or circumstances to be severe or rigorous. The same differences in implications and connotations are observable in their corresponding nouns forbearance, tolerance, clemency, mercifulness, leniency, indulgence and adverbs forbearingly, tolerantly, clemently, mercifully, leniently, indulgently. Forbearing, forbearance, and forbearingly imply patience under provocation and deliberate abstention from judging harshly, exacting punishment, or seeking vengeance or revenge (Madame Beck was . . . forbearing with all the world—Bronte) (he thought of old days: of his father's forbearance, his own willfulness—Meredith) (spoke forbearingly of the lack of facilities that handicapped his work) 'Tolerant, tolerance, and tolerantly imply both
a freedom from bias or bigotry and a liberal attitude to opinions, especially to religious, philosophical, and political doctrines, other than one's own that keep one from severity or rigor in judging others who hold such opinions or doctrines or from wanting to impose restrictions upon their freedom to think as they will (<i>Anatole</i> France). As usual, professed a very tolerant attitude. One must gratify whatever tastes one has and seek whatever happiness one may be able to find—Krutin)—(<i>rules</i>): (a <i>clement</i> rule), (a judge known far and wide for his clemency). (He was clement whenever he could be clement with safety, and he began to pardon the proscribed—Buchan). *Merciful, mercifulness, and mercifully* imply both compassionate and forbearing treatment, especially of those who have offended or of those who merit severity or are defenseless against it. (Good my lord, be good to me; your honor is accounted a <i>merciful</i> man—Shak.) (Like a perfect nightmare, it was <i>mercifully</i> short—W. J. Locke). *Lenient, leniency, and leniently* differ from <i>clement</i> in suggesting usually softness rather than gentleness of temper, and a relaxation of discipline or rigor (A <i>too lenient</i> parent) I would ask you, dearest, to be, . . . very <i>lenient</i> on his faults when he is not by—Dicken's). She could not show the slightest <i>leniency</i> towards the romantic impulses of her elder daughter—Bennett). (No matter how <i>leniently</i> you may try to put it, in the end we have a struggle between men—Wister). *Indulgent, indulgence, and indulgently* usually imply complacency as well as leniency; they imply, even more strongly than <i>lenient, leniency,</i> and <i>leniently</i>, concessions made out of charity or the exercise of clemency in the treatment of those who offend or who are under one's government or control (That one congenial friend . . . more <i>indulgent</i> of his shortcomings, and, in all respects, closer and kinder than a brother—Hawthorne). (Indulgently dismisses them as basically nice boys—P. D. Whitney) before her children reached school age . . . her treatment alternated spasmodically between excessive indulgence and petulant severity—Gorer).<br/>

<i>Ana</i> gentle, mild (see SOFT): patient, long-suffering, longanimous (see corresponding nouns at PATIENCE). <i>Ant</i> unrelenting—Con implacable, merciless, relentless, *grim: *impatient, nervous, restive.<br/>

Forbearingly tolerantly, clemently, mercifully, leniently, indulgently (see under FORBEARING) forbid, prohibit, enjoin, interdict, inhibit, ban are comparable when meaning to debar a person from using, doing, or entering or to order something not be used, done, or entered. <i>Forbid</i> is the more direct and familiar, <i>prohibit</i>, the more formal or official; they do not widely differ in their essential implications, for they both imply the exercise of authority or the existence of conditions which prevent with similar imperativeness. However, <i>forbid</i> carries so strong a connotation of expected obedience that it is preferred when the order is that of one in authority (as a parent, a master, an employer, or a physician) (<i>forbid</i> a child to leave the house) <i>Smoking is forbidden on these premises</i> (<i>suffer</i> the little children to come unto me, and <i>forbid</i> them not—Mark 10:14). (The whole attraction of such knowledge consists in the fact that it is <i>forbidden</i>—Russell). When circumstances absolutely debar, <i>forbid</i> is also preferred (His health forbade the use of tobacco).<br/>

<i>Prohibit</i> has been used for so long in reference to laws, statutes, and regulations that it tends to connote a less despotic exercise of authority and to suggest restraints imposed for the good of all or for the sake of orderly procedure (<i>prohibit</i> the manufacture and sale of intoxicating liquors) (The powers not delegated to the United States by the Constitution, nor <i>prohibited</i> by it to the States—U. S. Constitution) (The act was wrong in the sense that it was <i>prohibited</i> by law—Cardozo). <i>Enjoin</i> (see also <i>Command</i>) is a legal term implying a judicial order forbidding a particular action (by the decision of the Court the defendant should be <i>enjoined</i> from publishing news obtained from the Associated Press for—[a certain number of] hours after publication by the plaintiff—Justice Holmes). *Interdict implies prohibition by authority, usually civil or ecclesiastical authority, typically for a given time and for a salutary purpose (as the maintenance of neutrality or the prevention of the spread of disease) or as an exemplary punishment (<i>interdict</i> trade with belligerents) (<i>interdict</i> the administration of the sacraments in a rebellious diocese) (<i>Sunday</i> . . . until two o'clock), was a solemn interval, during which all the usual books and plays were <i>interdicted</i>—Mary Austin). *Inhibit* implies the imposition of restraints or restrictions that amount to prohibitions, not only by authority but also by the exigencies of the time or situation (A clause was . . . inserted which <i>inhibited</i> the Bank from advancing money to the Crown without authority from Parliament—Macaulay). (The peril that besets a highly gifted poetic nature, when at bad moments thought <i>inhibits</i> imagination—Lowes). In psychological use inhibit suggests the restraints imposed by inner psychological impediments and conflicts or by the interaction of human will with cultural and social factors of the environment which cause one to suppress certain thoughts or desires before they can find full expression (<i>inhibited</i> from bold speculation by his personal loyalties and interests—Parrington). (He is <i>inhibited</i>, he <i>inhibits</i> himself, even from seeking on his own account that vital experience which is the stuff of the creative life—Brooks). *Ban* carries an implication of legal or social pressure as the source of prohibition and with it a strong connotation of condemnation or disapproval (<i>ban</i> all obscene magazines) (<i>ban</i> profane language) (<i>categories</i> of persons <i>banned</i> from Federal employment—Ginzburg). More and more landlords were <i>banning</i> tenants with children—Wecter).<br/>

<i>Force</i> <i>n</i> 1 *power, energy, strength, might, puissance <i>Ana</i> *stress, strain, pressure, tension: *speed, velocity, momentum, impetus, headway. 2 *Force, violence, compulsion, coercion, duress, constraint, restraint* denote the exercise or the exertion of power in order to impose one's will on a person or to have one's will with a thing. *Force and violence* ordinarily apply to physical powers used upon either persons or things; *compulsion, coercion, duress, constraint, restraint* apply to either physical or moral power used upon personal agents except in certain figurative uses—compulsion, coercion, and <i>duress</i> usually implying exercise of such power upon others than oneself, constraint or <i>restraint</i> upon oneself or others. *Force* (see also <i>power</i> 1) applies to an exercise of physical strength or of power comparable to physical strength by means of which an agent imposes his will upon another against that person's will or causes a thing to move as desired in spite of its resistance (Rude fishermen . . .
force

by force took Dromio—Shak.> {to work in close design, by fraud or guile, what force effected not—Milton} {move a huge boulder by main force> {the skeptical criticism that "justice" is merely another name for force—Dickinson} {force used by attendants in an asylum . . . force used by the police when they control a crowd . . . force used in war—Huxley} Violence is often used in place of force, then commonly implying a greater display of power or fury and often connoting the infliction of injury or cruelty {they will by violence tear him from your palace—Shak.> {the rest of the party kept off the crowd by mingled persuasion and violence—Shaw} Violence often implies a violation of another's legal rights or property, or it may imply a corruption or abuse of someone or something entitled to respect, observance, or security {a burglar in entering a house by forcing a door enters it by violence} {do violence to no man—Lk 3:14> {all these many and varied powers had been acquired without doing violence to republican sentiment—Buchan} {the phrase “every common carrier engaged in trade or commerce” may be construed to mean “while engaged in trade or commerce” without violence to the habits of English speech—Justice Holmes} Compulsion and, still more, coercion imply the application of physical force or of moral pressure or the exercise of one’s authority in order to control the action of a voluntary agent and to make him obedient to one’s will {I would give no man a reason upon compulsion—Shak.} {coercion by threat or intimidation} {masterpieces I read under compulsion without the faintest interest—Russell} {solutions forced upon a most practical mind by the stern compulsion of facts—Buchan} {in the submissive way of one long accustomed to obey under coercion—Dickens} {some form of coercion, overt or covert, which encroaches upon the natural freedom of individuals—Dewey} Duress implies compulsion to do or forbear some act by means that are illegal (as by imprisonment or threats to imprison or by violence} {a person is not guilty of duress when he does or threatens to do something he has a legal right to do—Fisk & Snapp} It may also imply compulsion or coercion through fear of a penalty that will or may be exacted {a false declaration of love by the heroine under duress—Dyneley Hussey} {we must eliminate the condition of economic duress under which so many human beings are unjustly forced to live—Ashley Montagu} Compulsion and restraint imply the exercise of physical or moral power either by an active agent or by the force of circumstances; constraint sometimes implies an urging or driving to action but more frequently implies its forcible restriction or confinement, whereas restraint suggests its actual hindrance or curbing {the . . . lion . . . roared with sharp constraint of hunger—Shak.> }{prose is memorable speech set down without the constraint of meter—Quiller-Couch} {absolute liberty is absence of restraint; responsibility is restraint; therefore, the ideally free individual is responsible only to himself—Henry Adams} {the emotion . . . was the deeper and the sweeter for the restraint that he had put upon himself—Archibald Marshall} Ana intensity, vehemence, fierceness (see corresponding adjectives at INTENSE): *effort, exertion, pains, trouble

force vb Force, compel, coerce, constrain, oblige are comparable when meaning to make a person or thing yield to the will of a person or to the strength or power of a thing, Force, the ordinary and most general word in this group, implies the exertion of strength, typically physical strength, or the working of something (as circumstances or logical necessity) analogous in moving power or effectiveness to such strength {force slaves to labor} {force food upon a child} {he said hunger forced him to steal the food} {his conscience forced him into repaying what he had stolen} {force himself to smile} {the man could not be forced from the position he had taken} Sometimes the term takes a simple object, naming the person forced or the thing brought about by force; in such cases the verb often carries additional implications acquired from its idiomatic use in a particular phrase; thus, {force a woman is to rape her; to force a door is to break it open; to force laughter or a smile or tears is to make oneself laugh or smile or cry against one's will; to force bulbs is to hasten their development by artificial means {forced language} {a forced style} Compel differs from force chiefly in typically requiring a personal object; any other type of object such as a reaction or response is possible only in extended or poetic language when the specific connotations of compel (as the exertion of irresistible power or force or a victory over resistance) are to be carried by the verb {she always compels admiration} {an argument that compels assent} or a concrete thing {such a breeze compelled thy canvas—Tennyson} Compel commonly implies the exercise of authority, the exertion of great effort or driving force, or the impossibility for one reason or another of doing anything else {they} submit because they are compelled: but they would resist, and finally resist effectively, if they were not cowards—Shaw} {we see nothing in the Constitution that compels the Government to sit by while a food supply is cut off and the protectors of our forest and our crops are destroyed—Justice Holmes} {there is no possible method of compelling a child to feel sympathy or affection—Russell} {the westering sun at length compelled me to quit the wood—Hudson} Coerce suggests more severity in the methods employed than compel does; commonly it connotes the exertion of violence or duress or the use of threats or intimidation {there are more ways of coercing a man than by pointing a gun at his head—Inge} {Charles the First signed his own death warrant when he undertook to coerce that stubborn will [of Londoners]—Repplier} Constrain stresses more than does compel, its closest synonym, the force exerted by what pressures or binds; it usually suggests the influence of restrictions, self-imposed or placed upon one by force, by nature, by necessity, or by circumstances, that compel one to do a stated or implied thing, live a stated or implied way, or think certain thoughts {I describe everything exactly as it took place, constraining my mind not to wander from the task—Dickens} {causes which he loathed in his heart but which he was constrained to consider just—Brooks} {tied him to the wall, where he was constrained to stay till a kind passerby released him—Galsworthy} Oblige usually implies the constraint of necessity, sometimes physical necessity {a sharp pain obliged him to close his eyelids quickly—Hardy} but equally often moral or intellectual necessity {he is obliged, in conscience, to undo the harm he has done to a man's good name} {even the so-called laws of nature are only instruments to be used . . . we are not obliged to believe them—Inge} The term also is used with reference to a person or thing which is regarded as authoritative or as having the right to determine one's course or acts {the discipline of their great School . . . obliges them to bring up a weekly essay to their tutor—Quiller-Couch} {the convention which obliged a satirist to be scathing—Inge} {she is obliged to learn by heart a multitude of songs—Hearn} Ana impel, drive, *move: *command, order, enjoin: exact, *demand, require

forced, labored, strained, faretched are comparable when
they mean produced or kept up through effort and, therefore, neither natural nor easy nor spontaneous. **Forced** is the widest in range of application of any of these terms, being referred not only to what is brought about by compulsion 〈works of a kind which had normally been performed in antiquity by the **forced labor** of slaves—**Farrington**〉 or to what is accomplished by exerting force beyond the usual limit 〈a **forced march**〉 many women talk excitedly at a **forced** pitch for long periods and finish a conversation almost exhausted—*Hewitt* but also to what seems artificial because not natural, logical, or spontaneous or because constrained or affected 〈his . . . resolute rejection of **forced** and fantastic interpretation of Holy Scripture—**Foxbroke**〉 the old man was grinning. It was a little **forced** and a little painful, but it was a grin—*Irwin Shaw* 〈**Labored** carries a stronger connotation of heaviness or of ponderousness or, sometimes, of tediousness as a result of great effort 〈a **labored** style〉 suggests that the woman loves the man because he alone can give her the baby that fulfills her femininity . . . . These explanations are ingenious, *il laboré—La Barre* 〈uncomfortably aware of his men behind him; of their cushioned footsteps and **labored** breathing—**Hervey**〉 **Strained** adds to these an implication of tenseness or of a result that is unnaturally or distortedly labored 〈**strained attention**〉 〈a **strained** comparison 〉〈in the style of each there is at times evidence of **strained** composition, a lack of verbal ease or elegance—*Arnold Chapman* 〉 〈a **strained** air of reasonableness prevails with a good deal of nervous anxiety showing through on both sides—**Bendiner**〉 three patients were sitting, with **strained** expectant eyes—*Glasgow* 〈a long period of [chemical analysis] . . . . was an essential **precursor** of the present period of synthesis which has been so fruitful of good to mankind—**Morrison**〉 〈a long period of [chemical analysis] . . . . was an essential **precursor** of the present period of synthesis which has been so fruitful of good to mankind—**Morrison**〉 〈the sinister white owl . . . . the **harbinger**〉 〈the sinister white owl . . . . the **harbinger**〉 〈the sinister white owl . . . . the **harbinger**〉 〈the sinister white owl . . . . the **harbinger**〉 〈the sinister white owl . . . . the **harbinger**〉

**Farfetched** applies especially to an expression, an idea, an argument, or an explanation which has been carefully sought out so that it seems unduly strained and not quite naturally used 〈his ideas were always **farfetched**〉 〈a **farfetched** comparison〉 **straining** these methods of interpretation . . . . seem gratuitously farfetched, fantastic—*Edmund Wilson*〉 〈his ideas were always **farfetched**〉

*An* compelled, coerced, constrained (see **force**); factitious, *artificial*: fatiguing, exhausting (see **tire**)

**Con** *easy*, effortless, smooth: *spontaneous*, instinctive, impulsive: *natural*, unsophisticated, unaffected, artless

**forceful** *powerful*, potent, forcible, **puissant**

**compelling**, *potent*, forcible

**puissant** 〈see **force** vb〉: virile, manful (see **male**); cogent, telling, convincing, compelling (see **valid**); *effective*, efficient

**Ant** feeble—**Con** *weak*, infirm, decrepit, frail

**forcible** *forceful*, powerful, potent, puissant

**vehement**, *intense*, violent: energetic, strenuous, *vigorous*, aggressive, militant, assertive, self-assertive: coercing or coercive (see corresponding verb at **force**)

**forebear** forefather, progenitor, *ancestor*

**forebode** portend, presage, augur, prognosticate, *foretell*, predict, forecast, prophesy

**betoken**, **bespeak**, *indicate*: import, signify (see **mean**); fear, dread (see corresponding nouns at **fear**)

**foreboding** *misgiving*, presentiment, *aprehension*

**Ant** foretoken, presage, omen, portent, augury, prognostic: forewarning, warning (see **warn**)

**forecast** vb predict, *foretell*, prophesy, prognosticate, augur, presage, portend, forebode

**Ant** foresee, foreknow, anticipate, apprehend, divine: surmise, *conjecture*, guess: *infer*, gather, conclude

**forefather** forebear, progenitor, *ancestor*

**foregoing** adj antecedent, *preceding*, precedent, previous, prior, former, anterior

**Ant** following

**foreign** alien, extraneous, *extrinsic* 〈*inconsonant*, inconsistent, incongruous, incompatible; *repugnant*, repellent, obnoxious, distasteful; adventitious, *accidental* 〈**germane**—**Con** *relevant*, pertinent, material, apposite, apropos, applicable; akin, alike, uniform (see **like**)

**foreigner** alien, *stranger*, outlaw, outsider, immigrant, émigré

**foreknow** divine, *foresee*, anticipate, apprehend

**Ana** foretell, predict, forecast, prophesy, prognosticate: *infer*, gather, conclude

**foremost** leading, *chief*, principal, main, capital

**forensic** n debate, dispute, *argumentation*, dialectic

**forerunner**, **precursor**, **harbinger**, **herald** are comparable when they denote someone or something that comes before another person or thing and in some way indicates his or its future appearance. **Forerunner** may denote a messenger that goes before a personage (as a king, prince, or lord) to warn others of his approach 〈there is a **forerunner** come from . . . the Prince of Morocco, who brings word the prince his master will be here tonight—Shak.〉 〈there should also be one or more **forerunners** to visit the town before the company arrives, to speak . . . upon the plays—Masefield〉 but more often the term is applicable to something that serves as a sign, presage, or warning of something to follow 〈a coma is often the **forerunner** of death〉 〈a black sky and a sudden squall are the usual **forrunners** of a thunderstorm〉 〈the increase is a **forerunner** to a general rise in interest rates—New **Public**〉 **Precursor** commonly carries an implication of making ready or of paving the way for the success or accomplishments of another person or thing rather than, as **forerunner**, one of serving as an announcement or prediction of what is to come 〈the medieval sects which Dr. Rufus Jones describes as **precursors** of Quakerism—*Inge*〉 〈Kepler, more than any man, was the **precursor** of Newton—*Ellis*〉 〈a long period of [chemical analysis] . . . . was an essential **precursor** of the present period of synthesis which has been so fruitful of good to mankind—**Morrison**〉 〈his ideas were always **farfetched**〉
forethought  354  forgetful  oblivious  unkind

announce, *declare, proclaim: *reveal, divulge, disclose, discover: forewarn, *warn

forethought  foresight, providence, discretion, *prudence  Ana  premeditatedness or premeditation, deliberateness or deliberation (see corresponding verbs at DELIBERATE): wisdom, judgment, *sense, gumption

forethoughtful  foresighted, provident, discreet, prudent  (see under PRUDENCE)  Ana  *cautious, circumspect, wary, calculating: *deliberate, premeditated, considered, advised, studied

foretoken  n  Foretoken, presage, prognostic, omen, augury, portent  are comparable when meaning something (as an event, a phenomenon, or a condition) that serves as a sign of future happenings. Foretoken, the general term, is applicable to anything observable which may be the basis of a prediction or forecast (the usual foretokens of a thunderstorm, intense sultriness, a heavily overcast sky, and suddenly arising winds)  Presage is applied chiefly to indications which inspire such emotions as fear or hope, dread or longing, and confidence or despair and therefore give rise to presentiments rather than serve as a basis for prediction  three times, while crossing the ocean, he sees a lunar rainbow and each time he takes it as a presage of good fortune—Brooks  Prognostic  applies to an advance indication or symptom from which a skilled person can infer what is coming; it is used in medicine of a symptom or sign useful to a physician in predicting the course or the termination of an illness  prognostics do not always prove prophhecies, at least the wisest prophets make sure of the event first—Walpole  (prognostics) are those circumstances on which a prognosis is based—Flint  Omen  is applicable chiefly to an extraordinary event or circumstance which one feels, especially under the influence of superstition, to be a promise of something to come (may I have had some omens: I got out of bed backwards too this morning, without premeditation; pretty good that too; but then I stumbled coming downstairs, and met a weasel: bad omens those: some bad, some good, our lives are checkered—Congreve)  Consequently, an event of ill omen or of good omen is one that is felt to be a presage of ill or of good. Augury and omen are often interchangeable, but augury is applicable to ordinary as well as to phenomenal circumstances, and it usually suggests discernment rather than superstition in determining whether it presages good or evil  (achievements that he regarded as auguries of a successful career for his son)  I had felt there was a mysterious meaning in that moment, and in that flight of dim-seen birds an augury of ill-omen for my life—L. P. Smith  Portent  is applicable chiefly to prodigies or marvels (as an eclipse, a comet, or an earthquake) which are interpreted as forewarnings or supernatural intimations of an event to come (what plagues and what portents, what mutiny, what raging of the sea, shaking of earth, commotion in the winds—Shak)  the interest in eclipses began in seeing them as portents that might be avoided—Kroeker  Ana  *sign, symptom, token, mark, badge, note: *forerunner, harbinger, precursor, herald

forewarn  *warn, caution  Ana  notify, advise, apprise, *inform: admonish (see REPROVE): advise, counsel (see under ADVICE)

foreword  preface, exordium, *introduction, prologue, prelude, preamble

forge vb  fabricate, fashion, manufacture, form, shape, *make

Ana  *beat, pound; produce, turn out (see BEAR): counterfeit, simulate (see ASSUME): *copy, imitate

forget  overlook, ignore, disregard, *neglect, omit, slight  Ana  remember —Con collect, recall, bethink, mind (see REMEMBER)

forgetful, oblivious, unkind are comparable when they mean losing or letting go from one's mind something once known or learned. Forgetful usually implies a propensity not to remember or a defective memory (bear with me, good boy, I am much forgetful—Shak)  she is growing forgetful  Sometimes it implies a not keeping in mind something which should be remembered; it then connotes negligence or heedlessness rather than a poor memory  he should not be forgetful of his social obligations  be not forgetful to entertain strangers—Heb 13:2  Oblivious stresses forgetfulness, but it rarely suggests a poor memory. Rather, it suggests a failure to remember, either because one has been robbed of remembrance by conditions beyond one's control (the accident made him for a few hours oblivious of all that weighed upon his mind) or because one has deliberately put something out of one's mind (a government oblivious of the rights of the governed) or because one has considered something too slight or trivial to note and remember it (a people so long unused to aggression as to be oblivious of its dangers)  In some instances oblivious is employed without a clear connotation of forgetfulness, and in a sense close to unconscious, unaware, and insensible  walking along, oblivious of the passing crowds  those who hope to render themselves, through absorption in the mere habit and technique of writing poetry, oblivious to the harsh interruptions of reality—Day Lewis  oblivious of the laws and conditions of trespass—Meredith  Oblivious also is sometimes used attributively and without a succeeding of or to in the sense of causing oblivion  she lay in deep, oblivious slumber—Longfellow  Unmindful is a close synonym of forgetful in the sense of not keeping in mind, but it may imply a deliberate consignment to oblivion as well as inattention, heedlessness, or negligence  a mother, solicitous of the health of every member of her family but unmindful of her own  every person was willing to save himself, unmindful of others—Goldsmith  for at her silver voice came death and life, unmindful each of their accustomed strife—Shelley  totally unmindful of their mutual dependence—Amer. Guide Series: Minn.  Ana  remiss, *negligent, neglectful, lax, slack: heedless, thoughtless, *careless  Con conscious, *aware, cognizant, sensible, alive, awake: *thoughtful, considerate, attentive

forgive pardon, remit, *excuse, condone  Ana  absolve, *exculpate, acquit, exonerate, vindicate

forgo, forbear, abnegate, eschew, sacrifice are comparable when they denote to deny oneself something for the sake of an end. One forgoes for the sake of policy, expediency, or the welfare of others something already enjoyed or indulged in, or within reach (he agreed ... to forgo all remuneration until his apprenticeship was completed—Brooks)  Often the word implies surrender or abandonment (in electing this peculiar freedom of its own, vers ... in being willing to forego, clasp sometimes one's hand with this other, hold on with all might ... forgo not to hold on in awe—Lowes)  he foregoes the mere habit and technique of writing poetry, oblivious to the harsh interruptions of reality—Day Lewis  oblivious of the laws and conditions of trespass—Meredith  Oblivious also is sometimes used attributively and without a succeeding of or to in the sense of causing oblivion  she lay in deep, oblivious slumber—Longfellow  Unmindful is a close synonym of forgetful in the sense of not keeping in mind, but it may imply a deliberate consignment to oblivion as well as inattention, heedlessness, or negligence  a mother, solicitous of the health of every member of her family but unmindful of her own  every person was willing to save himself, unmindful of others—Goldsmith  for at her silver voice came death and life, unmindful each of their accustomed strife—Shelley  totally unmindful of their mutual dependence—Amer. Guide Series: Minn.  Ana  remiss, *negligent, neglectful, lax, slack: heedless, thoughtless, *careless  Con conscious, *aware, cognizant, sensible, alive, awake: *thoughtful, considerate, attentive
abnegate implies renunciation or self-effacement, but this distinction is not as commonly maintained in the verb as in the derivative noun abnegation <communities dedicated to the living of a humble and self-abnegating life—Mumford> One eschews (see also escape 2) something tempting, sometimes on moral or aesthetic grounds but more often because abstention or self-restraint is necessary for the achievement of a more significant desire or end (to work within these strict limits, eschewing all the helps to illusion that modeling and shadow give, was doubtless an exercise of incomparable service to the artist—Binyon> <some of the millionaires eschewed palatial magnificence—F. L. Allen> One sacrifices something highly desirable or in itself of great value for the sake of a person, ideal, or end dearer to one than the thing or person involved; the term typically connotes renunciation and self-denial and a religious or ethical motive comparable to that of self-immolation <sacrificed a college education for the sake of supporting his mother> <sacrificed his life in defense of his country> (I do not mean that the well-to-do should ... forgo educational opportunities which ... are not open to all. To do that would be to sacrifice civilization to justice—Russell> <sacrificed their fortune in the world for theology's sake—H. O. Taylor>

Ana waive, *relinquish, surrender, abandon: renounce, resign, *abdicate

forlorn 1 lorn, lone, desolate, lonesome, lonely, *alone, solitary
Ana separated, parted, divorced, severed, sundered (see separate vb): forsaken, deserted, abandoned (see abandon vb): wretched, *miserable: depressed, weighed down, oppressed (see depress)

2 hopeless, *despondent, despairing, desperate
Ana pessimistic, *cynical: futile, vain, fruitless
Con *elastic, resilient, buoyant, expansive, volatile: optimistic, *hopeful, roseate, rose-colored

forlornness hopelessness, despondency, despair, desperation (see under despontent)
Ana dejection, depression, gloom, melancholy, blues, dumps, *sadness

form n 1 Form, figure, shape, configuration, configuration are comparable when they denote the disposition or arrangement of content that gives a particular aspect or appearance to a thing as distinguished from the substance of which that thing is made. Form is not only the most widely applicable of these terms, but it is also the least definitely fixed in its meaning, largely because of its being assigned various denotations in philosophy and aesthetics and because of its frequent use in reference to literature, music, and thought, where more is involved than the disposition or arrangement of content as immediately perceived by the senses. In general, form more than any of the other words implies reference to internal structure and disposition of details as well as to boundary lines and suggests unity in the whole (the earth was without form, and void—Gen 1:2) <a sense of interdependence and interrelated unity that gave form to intellectual stirrings that had been previously inchoate—Dewey> (you might go in for building ... you've got a feeling for form—Mary Austin> 

Figure applies usually to the form as determined by the lines which bound or enclose a thing <flowers have all exquisite figures—Bacon> The term also may often suggest the lines or sometimes the visible form characteristic of a kind or type <Christ painted under the figure of a lamb> <because of the darkness it was hard to say whether the person had the figure of a man or of a woman> or the lines which follow a more or less conventional pattern rather than represent something actual <cut figures on the ice in skating> <decorate the border with figures of scrolls, circles, and crescents> <a rug design in geometrical figures> Shape, like figure, suggests reference to the boundary lines, but it carries a stronger implication of a mass or of a body than does figure and is therefore precisely applicable to something that is shown in its bulk rather than in its lines; thus, one draws the figure rather than the shape of a circle or a triangle, but one forms a mass of clay in the shape in preference to the figure of a ball or of a man <the color of his beard, the shape of his leg—Shak> Often, shape applies to outlines that have been given to a mass (as by molding, carving, or pressure) <Brooke is a very good fellow, but pulpy; he will run into any mold, but he won't keep shape—George Eliot> <it is the business of the sensitive artist in life to accept his own nature as it is, not to try to force it into another shape—Huxley> Form, figure, and shape are also used in reference to the bodies or forms of living creatures, especially of men and women. Form is perhaps the most shadowy of these terms; it is applied chiefly to persons or animals identified but not clearly seen or noted in detail <the reddleman watched his form as it diminished to a speck on the road—Hardy> <busy forms bent over intolerable tasks, whizzing wheels, dark gleaming machinery—Benson> Figure usually suggests closer vision than form and some perception of details but stresses lines, carriage, and posture <here and there a figure ... leaned on the rail—Conrad> <they watched her white figure drifting along the edge of the grove—Cather> Shape differs little from figure except in its clearer suggestion of flesh and body <some human shapes appearing mysteriously, as if they had sprung up from the dark ground—Conrad> <and the shade under the ash trees became deserted, save by the tall dark figure of a man, and a woman's white shape—Galsworthy> Conformation stresses the structure of something as composed or fashioned of related or carefully adjusted parts or as constituting a harmonious whole; it carries only a slight suggestion of reference to the outer lines or shape <beef steers of excellent conformation> <the conformation of the vocal organs> Configuration emphasizes the disposition or arrangement of parts and the pattern that they form especially over an extent of space or territory <the conformation of the county is represented in this relief map> <the remarkable configuration of the Atlantic seabed—T. H. Huxley> <in every province there was a network of roads following the configuration of the country—Buchan>

Ana contour, *outline, profile, silhouette: *structure, anatomy, framework, skeleton: organism, *system, economy, scheme

2 Form, formality, ceremony, ceremonial, rite, ritual, liturgy mean an established or fixed method of procedure especially as enjoined by law, the customs of social intercourse, or the church. Form is the comprehensive term applicable to a recognized way of doing things in accordance with rule or prescription <observing the forms of polite society> <nothing could be worse form ... than any display of temper in a public place—Wharton> <a transfer of property made in due form> <the occasional exercise of a beautiful form of worship—Irving> Form often implies show without substance or suggests an outward shell devoid of its life or spirit <for who would keep an ancient form if the spirit breathes no more?—Tennyson> Formality applies to some more or less perfunctory or conventional procedure required by law, custom, or etiquette <there was now and then the formalities, toed without any formalities, as usual—Bennett> The

Analogue forlorn 355 form

Ant anomalous words: Ant antonyms: Con contrasted words: See also explanatory notes facing page 1
term often implies endless detail or red tape (Outland was delayed by the formalities of securing his patent—

*Cather*). Ceremony is more specific than form and implies certain outward acts, usually of an impressive or dignified character, associated with some religious, public, or state occasion or, collectively, with a church or a court (the marriage ceremony). The ceremonies attending the coronation of a king. Ceremony also applies to the conventional usages of civility (the appurtenance of welcome is ... ceremony—*Shak*). You need not stand on ceremony (the beauty of an inherited courtesy of manners, of a thousand little ceremonies flowering out of the most ordinary relations and observances of life—Binyon).

After the death of a king, a solemn ceremony of purification was performed by a princess (Frazer). Ceremonial (compare ceremonial adj) is occasionally used in place of ceremony in its concrete applications; more often it is a collective noun applied to an entire system of ceremonies prescribed by a court or a church (the gorgeous ceremonial of the Burgundian court—Prescott).

The last three terms of this group refer primarily to religious ceremonies and only secondarily to the ceremonies or forms of civil life. A rite is the form prescribed by a church or other organization for conducting one of its ceremonies; in the case of a church, for administering one of its sacraments, giving not only the words to be uttered but the acts to be performed (the marriage rite of the Church of England). The rite for the ordination of priests.

Ritual is, in effect, a collective noun applied either to all the rites that make up an elaborate religious service or to all the rites or all the ceremonies of a particular church, religion, or organization; it is, however, applicable to a rite when that represents the one form in use in the specific religion or body (the ritual of the Roman Catholic Church is traditionally in Latin). Sacrifices, dances, mimetic games, processions, plays, ordeals, and feasting may enter into the ritual of primitive religions (the ritual of a lodge). Consequently, in extended use, rite and ritual both refer to the customary or established order of procedure for conducting not only a ceremony or a series of ceremonial acts, but all kinds of formalities or forms (Archer ... went conscientiously through all the rites appertaining to a weekend at Highbank—Wharton). He knew well enough how it would be at the Hondo; the black-shawled woman sitting against the wall, the ritual of bereavement, impressive in its poverty—Mary Austin. Liturgy applies primarily to the Eucharistic service, especially that of the Orthodox and the Unitarian churches (specifically called “Divine Liturgy” in many of these) and of the Roman Catholic Church (specifically called the “Mass” in the Latin Church). In the Anglican Communion liturgy applies to the Book of Common Prayer, the service book of that church. It is applied also to a strictly religious rite or ritual, but this is confusing because the term ritual stresses the form to be followed and liturgy the complete service as followed in a particular church; thus, the Roman Catholic Church is now generally followed in the liturgy of that branch of the Roman Catholic Church called the Latin Church (he insisted on … the maintenance of full ritual in the liturgy—Bellow).

3 Form, usage, convention, convenience are comparable when they mean a fixed or accepted way of doing or sometimes of expressing something. Form can apply to a prescribed or approved way of behaving, method of procedure, or technique in any sphere of activity where correctness or uniformity of method or manner is thought essential (the forms of good conduct) (the forms of worship) (good form in swimming) (a form of address).

Usage implies the sanction of precedent or tradition and often designates a form preserved out of respect for a class, profession, or religion (descriptions of usages presuppose descriptions of uses, that is, ways or techniques of doing the thing, the more or less widely prevailing practice of doing which constitutes the usage—Ryle). Convention often replaces form especially in application to social behavior, where it stresses general agreement and therefore applies to some set way of doing or saying something that is sanctioned or believed to be sanctioned by general unquestioning acceptance (this music followed conventions perfectly understood by the contemporaries—P. H. Lang). Certain parliamentary conventions which exist to supplement the rules of procedure—May (this genius who was too wild and elemental ever to conform to any aesthetic convention—Ledig-Roholt). Formality is a somewhat literary word applied to social conventions especially regarded as essential to propriety or decorum (disregarding the social conventions, continued to chatter on—Richard Hull).

Formless, unformed, shapeless are comparable when they mean having no definite or recognizable form.

Something is formless which is so fluid or so shifting in its outlines, structure, or character that it does not assume, or is incapable of assuming, a fixed or determinate form (the rising world of waters ... won from the void and formless infinite—Milton) (sprang from the billows of the formless flood—Shelley) (a formless fear) (the formless welter of his prose works—Sainsbury). Something is unformed which has existence but has not yet attained the form or character proper to it when it has reached the height of its possible growth or development (an unformed girl of twelve) (an unformed mind) (an unformed genius). Often it suggests crudeness or callousness (very clever in some ways—and very unformed—childish almost—in others—Ward) (this unformed government is the “legitimate” one—Gorrell).

Formless which has existence but has not yet attained the form or character proper to it when it has reached the height of its possible growth or development.

Something is unformed which has existence but has not yet attained the form or character proper to it when it has reached the height of its possible growth or development (an unformed girl of twelve) (an unformed mind) (an unformed genius). Often it suggests crudeness or callousness (very clever in some ways—and very unformed—childish almost—in others—Ward) (this unformed government is the “legitimate” one—Gorrell).

Something is shapeless which lacks or has lost the clear cut outline or contour that is regarded as proper to a thing or essential to its beauty (a shapeless old woman) (beat a silver dish into a shapeless mass) (conversation, which before had a beginning and an end, now grew shapeless and interminable—Richard Hughes).

fort, fortress, citadel, stronghold, fastness denote in common a structure or place offering resistance to a hostile force. A fort is an enclosed, fortified structure occupied by troops. A fortress is a large fort of strong construction intended for long-term occupancy (as on the border of a hostile country). A citadel is a fortification, usually on an eminence, that protects a city or keeps it in subjection. A stronghold is a strongly fortified place whose resistance to attack or siege affords protection to its occupants (here ... a famous robber had his stronghold—Richie) A fastness is a place whose inaccessibility or remoteness makes for security. It may or may not be fortified (a strong and almost impenetrable fastness—H. H. Wilson)

These terms often have extended use. In such use a fort is something that by its very nature resists attack (oft breaking down the pales and forts of reason—Shak) and a fortress is something that gives a feeling of security (my rock and fortress is the Lord—John Wesley) Citadel and stronghold are very similar in their extended uses, both being applied to a place where or, sometimes, to a class or group in which something prevails or persists in spite of attacks or encroachment (the very headquarters, the very citadel of smuggling, the Isle of Man—Burke) (the scientific world has been the very citadel of stupidity and cruelty—Shaw) (the South of Somersetshire, one of the strongholds ... of the Anglo-Saxon dialect—Jennings) Fastness characteristically suggests impenetrability or inaccessibility (in the impregnable fastness of his great rich nature he [the Roman] defies us—J. R. Lowell)

forth forward, * onward
forthright adj I also adv Forthright, downright are comparable because they agree in their basic sense of moving or in the habit of moving straight to the mark. Forthright (see also straightforward) applies to whatever gets its effect by a straight thrust as if of a sword driven by the arm of one person into the breast of another; it therefore usually connotes dexterity, directness, straightforwardness, or a deadly effectiveness (reach the good man your hand, my girl: forthright from the shoulder, like a brave boxer—Meredith) (the home thrust of a forthright word—J. R. Lowell) (the practical, forthright, nonargumentative turn of his mind—Farrar)

Downright, on the other hand, suggests a falling down or descending with the straightforwardness and swiftness of one who leaps from a cliff or of a weapon that delivers a crushing blow. The word, therefore, usually implies crude force rather than dexterity, and concern for the effect produced rather than the point reached; often, in addition, when applied to persons or things it connotes plainness, bluntness, flat-footedness, or an out-and-out quality (he ... shot to the black abyss, and plunged downright—Pope) (sculling against a swift current is work—downright work—Jeffries) (you seem a pretty ... downright sort of a young woman—Shaw) (a baby. What a coarse, downright word for the little creature—Rose Macaulay) (this admirably downright, if not highly sophisticated, ukase has been cited in almost every trade-secrets case ... since—John Brooks)

2 Found, establish, institute, organize are comparable when meaning to set going or to bring into existence something (as a business, a colony, or an institution).

Found implies nothing more than a taking of the first steps or measures to bring into existence something that requires building up. Just what these steps and measures are vary in usage; thus, a person who provides the funds for a new educational institution may be said to have found it, and those who first devised the project and won his support may also be said to have founded it, as may also those who took the next steps (such as the choice of a site, the erection of buildings on that site, and the selection of the staff) <found a parish in a new section of a city> <the Pilgrims in 1620 founded Plymouth Colony in what is now the state of Massachusetts> <a school of philosophy founded by Plato> Establish (see also SET) is often employed in the sense of found; however, it may imply not only the laying of the foundations but also a bringing into enduring existence; thus, Brook Farm was founded (not established, because its existence was short) by George Ripley and others as an experiment in communistic living; Vassar College was not established until some years after the date of its founding <the . . . Sisters of Loretto, who came to found the Academy of Our Lady of Light. The school was now well established —Cather> Institute stresses an origination or an introduction; like found, it implies the taking of the first steps and like establish, the actual bringing into existence, but it differs from both words in its far wider range of application and in being referable to things (as a method, a study, or an investigation) which do not have a continuous life or a permanent existence <institute a new society> <institute a new method of accountancy> <institute an inquiry into an official’s conduct of his office> Organize (see also ORDER vb 1) may imply founding, but it usually implies the taking of the steps whereby an organization (as a business, an institution, or a government) is set up so that it functions properly, with its departments clearly distinguished and governed by a responsible head and with a supervisory staff responsible for the working of the whole <Smith College was founded by Sophia Smith but was organized by its first president and board of trustees> <the company sent him to Germany to organize its new branch there>

frangible 1 Fragile, frangible, brittle, crisp, short, friable

mean easily broken. They are, however, not often interchangeable. Fragile (see also WEAK) is applicable to whatever must be handled or treated carefully lest it be broken <a fragile antique chair> <a fragile dish> <a fragile flower> <I found the skeleton, or, at all events, the larger bones, rendered so fragile by the fierce heat they had been subjected to, that they fell to pieces when handled —Hudson> <this nation, molded in the heat of battle against tyranny . . . is not a fragile thing—W. O. Douglas>

Frangible stresses susceptibility to being broken rather than positive weakness or delicacy of material or construction <frangible stone> <avoid using frangible materials in ship construction> <using the butresses of intellect and imagination to shore up the trembling pillars of our frangible era—Fadiman> brittle implies hardness plus frangibility because of the inflexibility of, or lack of elasticity in, the substance of which a thing is made; it also suggests susceptibility to quick snapping or fracture when subjected to pressure or strain <glass is especially brittle> <as a person ages, his bones grow more brittle> <brittle sticks of candy> The term is often extended to things that are dangerously lacking in elasticity or flexibility <he would take no risks with a thing so brittle as the Roman polity, on which depended the fate of forty-four

A colon (;) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
millions of men—Buchan> Crisp usually suggests a good quality which makes a thing firm and brittle yet delicate and easily broken or crushed, especially between the teeth <crisp toast> <crisp lettuce> In extended use it implies freshness, briskness, cleanliness of cut, incisiveness, or other qualities that suggest the opposite of limpness, languor, or slacking <a crisp morning> <a crisp style> <a crisp answer> <a languorous work . . . with occasional interludes of crisp brilliance—Anthony West> Short implies a tendency to crumble or break readily and is applicable to several kinds of substance <a short biscuit is rich in butter or other fat and is crisp and crumbly when eaten> <short mortar is difficult to spread because of oversanding> <short timber is desiccated wood> <short (or hot-short) steel is brittle when heated beyond a certain point because of an excess of sulfur> Friable is applicable to substances that are easily crumbled or pulverized <friable soil> <friable sandstone> <friable blackboard chalk> <particles of shale, mica, or other friable and unsound minerals—Bateman> Ant tough —Con *elastic, resilient, flexible: *strong, stout, sturdy, tenacious 2 frail, *weak, feeble, decrepit, infrim Ana impotent, *powerless: delicate, dainty (see choice): evanescent, ephemeral, *transient, transitory Ant durable fragment fraction, piece, *part, portion, section, segment, sector, division, detail, member, parcel Ana remnant, *remainder fragrance, perfume, incense, redolence, bouquet are comparable when denoting a sweet or pleasant odor. Fragrance usually suggests the odor diffused by flowers or other growing things, though it is applicable to odors that merely suggest the presence of flowers <fragrance after showers—Milton> <flowers laugh before thee on their beds and fragrance in the footling treads—Wordsworth> <through the open doors . . . the soft wind . . . brought in the garden fragrance—Stark Young> <a fragrance such as never clings to aught save happy living things—Millay> Perfume originally applied either to the pleasantly odorous smoke emitted by some burning things (as various spices, gums, or leaves) <three April perfumes in three hot Junes burned since first I saw you—Shak> or to some natural or prepared substance which emits a pleasant odor. The latter sense predominates in current use, especially in reference to a preparation in liquid form, also called a scent (for full treatment of this term see SMELL), that contains the essence of fragrant flowers or is a synthetic concoction <rose like a steam of rich distilled perfumes—Milton> <a perfume redolent of the odor of violets> When applied to an odor rather than to a preparation, perfume differs little from fragrance except that it usually, when unqualified, suggests a heavier and more redolent odor, or at least a less delicate one <the perfume of lilies had overcome the scent of books—Galsworthy> <a gigantic rose tree which clambered over the house . . . filling the air with the perfume of its sweetness—L. P. Smith> Incense is usually used in place of perfume for the agreeably odorous smoke emitted by burning spices and gums <the church was filled with the odor of incense> The term, from association with the use of incense in religious ceremony, tends to apply to odors or things comparable to odors that are not only pleasant but grateful to the senses or that for some cause uplift or are mentally or spiritually exalting <the breezy call of incense-breathing Morn—Gray> <grateful the incense from the lime-tree flower—Keats> <love wraps his wings on either side the heart . . . absorbing all the incense of sweet thoughts so that they pass not to the shrine of sound—Tennyson> <this is that incense of the heart, whose fragrance smells to heaven—Cotton> Redolence usually implies a mixture of fragrance, often pungently agreeable, odors <redolence of a forest after a rain> <the fascinating redolence and toughness of New Orleans' red-lighted Storyville, where jazz was born—Time> <the redolence of a garden in spring> Bouquet applies especially to the distinctive fragrance of a good wine, which is perceptible when one inhales the delicate and agreeable odor <lifting his glass to his lips, [he] voluptuously inhaled its bouquet—Lytton> but it may be extended to other delicate and distinctive odors (as of cooking food) that suggest the excellent savoury character of the source of the odor <the grateful smell of cooking pork gave every moment more perfect in bouquet—Ethel Anderson> Ana *smell, scent, odor, aroma Ant stench, stink
ness, and freedom from affectation more than fairness of mind *(I am no orator, as Brutus is; but, as you know me all, a plain blunt man—Shak)* *(the difference between ordinary phraseology that makes its meaning plain and legal phraseology that makes its meaning certain—Gowers)*

**Anguished**, naïve, unsophisticated, simple, *natural:*
  *forthright, downright: straight-forward, above-board*

**Fray** n affray, fight, conflict, combat, *contest*

**Anony** fracas, broil, *brawl, melee: altercation, wrangle, quarrel: contention, strife, dissension, *discord*

**Freak** n caprice, fancy, whim, whimsy, conceit, vagary, crotchety, capricious, *capricious*

**Fur** makes us *fancy, fancy, dream, dreamy, variegated, parti-colored, motley, checkered, pied, piebald, skewbald, dappled*

**Facet** spotted, flecked, speckled, splattered, sprinkled (see under SPOT vb)

**Free** adj Free, independent, sovereign, autonomous, autarchic, autarkic are comparable when they mean not subject to the rule or control of another. The same differences in implications and connotations are found in their corresponding nouns: *freedom, independence, sovereignty, autonomy, autarchy, autarky* when they denote the state or condition of not being subject to external rule or control.

**Free and freedom** *(see also FREEDOM 2)* stress the absence of external compulsion or determination and not the absence of restraint. For *free* as applied to a state, a people, a person, or the will implies self-government and therefore the right to determine one's own acts, one's own laws, and one's own restraints or to accept or reject those that are proposed from without *(for liberty is to be free from restraint and violence from others, which cannot be where there is no law—Locke)* *(freedom makes man to choose what he likes; that is, makes him free—Quiller-Couch)*

**Independent and independence** have for their fundamental implication lack of relatedness to anyone or anything else; therefore *independent* implies that the person or thing so described stands alone *(words have a meaning independent of the pattern in which they are arranged—Huxley)*

When applied to a state or government, it implies not complete detachment from other states or governments and a refusal to have allies or dominions, but a lack of connection with a state or government that has the power to interfere with one's liberty of action *(the Thirteen Colonies sacrificed their independence, but not their freedom, when they joined the federation that became the United States of America)*

When applied to a person or his acts and opinions, it implies either a disposition to stand alone and apart from others, or refusal to accept another's judgments, or self-reliance amounting almost to a fault; thus, a person who is *independent* in politics is attached to no political party; one might wish that a person he is trying vainly to help were less *independent* *(an economist should form an independent judgment on currency questions, but an ordinary mortal had better follow authority—Russell)*

**Sovereign** (see also DOMINANT) and sovereignty stress the absence of a superior power and imply the supremacy within its own domain or sphere of what is so described or so designated. As applied to a state or government, these words usually involve the ideas both of political independence and of the possession of original and underived power *(for many years before the Civil War it was debated whether the federal government was sovereign)* *(the powers of the general government, it has been said, are delegated by the States, who alone are truly sovereign . . . . It would be difficult to sustain this proposition—John Marshall)* *(although it [the government of the United States] is sovereign and supreme in its appropriate sphere of action, yet it does not possess all the powers which usually belong to the sovereignty of a nation—Tanner)*

When used in reference to a thing, both words impute to that thing unquestioned supremacy and imply that everything within its sphere of influence is subject to it *(the noble and most sovereign reason—Shak)* *(the sovereignty of man lieth hid in knowledge: wherein many things are reserved that kings with their treasure cannot buy, nor with their force command—Bacon)*

**Autonomous and autonomy** may imply independence combined with freedom. The terms are much used in philosophy to describe or designate a theoretical or ideal freedom in which the individual is absolutely self-governing and acknowledges no claim of another to interfere or control *(the question is often asked whether an autonomous state and an autonomous church can exist side by side)* *(if this preeminence and autonomy of the spiritual be not granted to another, can God at all—Inge)*

In political use the words seldom imply such absolute independence and freedom, for they are employed largely in reference to states which belong to an empire, a federation, or a commonwealth of nations. In reference to such states autonomy and autonomous commonly imply independence from the central power only in matters pertaining to self-government but recognition of the central governmental sovereignty in matters (as foreign policy) affecting the empire, federation, or commonwealth of nations as a whole. When a state is granted autonomy or become autonomous, the terms of such a grant are usually precisely stated *(the Imperial Conference of 1926 defined the Dominions as "autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations"—Statesman's Year-Book)*

**Autarchic and autarchy** historically implied absolute sovereignty or absolute or autocratic rule, but they have become interchangeable with *autarkic and autarky,* and both pairs of words imply economic and especially national economic self-sufficiency; the words are used in reference to states or governments that favor isolation through a policy of rigidly and arbitrarily planned economic self-sufficiency as a means of maintaining their independence *(the totalitarian countries . . . . have created a self-encirclement by their abnormal economic policy, their costly and unnatural autarky—Manchester Guardian)* *(each community in Old China was cell-like, largely autonomous and autarkic—Lehberger)* *(the issue today is, therefore, whether a policy aimed at economic nationalism—self-sufficiency—autarchy—creates an environment favorable to the recon-
struction of a peaceful, tranquil, confident world—Lewis Douglas\(\langle a\ network\ of\ more\ or\ less\ closed,\ autarchic\ economies,\ each\ trying\ to\ the\ best\ of\ its\ ability\ to\ exist\ on\ a\ self-sufficient\ basis—Dean\)

**Ana** liberated, emancipated, delivered, freed, released, enfranchised (see **FREE** vb)

**Ant** bond —Con compelled, coerced, forced, constrained, obliged (see **FORCE** vb)

**free** vb Free, release, liberate, emancipate, manumit, deliver, discharge, enfranchise are comparable when meaning to set loose from whatever ties or bonds or to make clear of whatever encumbers or holds back. Free is the ordinary general term interchangeable with many of the succeeding terms; it may be used not only in reference to persons that are in bondage or in a state of dependence or oppression or under restraint or constraint (**free** one's slaves) (**free** an oppressed people) (**free** a person from prison or from a charge) (**free** one from the necessity of speaking against a proposal) but also in reference to things that are confined, entangled, or encumbered and may therefore be unfastened, unloosed, disentangled, or disengaged (**free** a squirrel from a trap) (**free** her hair from a net) (flower scents, that only nighttime **frees**—Lowell)

**Release** carries a stronger implication of loosing or of setting loose from confinement, restraint, or obligation (**release** a prisoner) (**release** a person from a promise) (**release** me from my bands with the help of your good hands—Shak.) (activities that **released** his stored-up energy) (death has **released** him from his sufferings) (only by inducing a deep impulse towards sermonizing could he **release** those other impulses which made him the great writer he was—Sykes) **Liberate**, a very close synonym of the preceding words, differs from them chiefly in carrying a stronger suggestion of resulting liberty. The term may therefore connote, as do the others, emergence from some more or less disagreeable bondage or restraint (**liberate** all slaves by a proclamation) or it may merely suggest a cutting of a tie, relationship, or connection without regard to the power of another thing or things to restrain or restrict, thereby approaching separation, disengage, or detach in meaning (**oxygen is liberated when potassium chlorate is heated**) (**an electric current will decompose water, liberating hydrogen** (**the poet draws life . . . from the community . . .: to cut himself off from this source of life is much more likely to cripple than to liberate him—Day Lewis**) (**liberate a certain group of individuals . . . from shackles inherited from feudalism—Dewey**)

**Emancipate** basically means to free one person from subjection to another (as a child from subjection to his parent or a slave from subjection to his master) (**little more hope than had the son of an Athenian slave to be emancipated—Quiller-Couch**) but the term is more frequently found in an extended sense, implying a liberation of someone or something from what controls or dominates; it usually also suggests a freedom by which one's own judgment or conscience or intelligence decrees the course to be taken or the principles to be followed (**if we can imagine the various County Councils of England emancipated from the control of Parliament and set free to make their own laws—Dickinson**) (**all the philanthropic and humanitarian movements to which the Quakers, now emancipated from the notion that all initiative in such matters is an attempt to force the hand of the Almighty, devoted themselves in the nineteenth century—Inge**)

**Manumit** differs from **emancipate** in its historical sense in always implying liberation from slavery or servitude; it is therefore sometimes preferred as the more definite term (**Darnall . . . was the son of a white man by one of his slaves, and his father executed certain instruments to manumit him—Taney**)

**Deliver** is comparatively rare as a close synonym of **free**. But in all of its many extended senses the idea of freeing is the basic, though not the strongest, implication. It is specifically a synonym of **rescue** (see **RESCUE**) when it implies release from peril, danger, or other evil (**and lead us not into temptation, but deliver us from evil—Mt 6:13**) It comes close to **transfer** or **convey** when it implies a disburdening of oneself of something which belongs to another or is intended for him (**deliver a letter to the addressee**) (**deliver a package to the purchaser**) or to **utter** or **pronounce** when it implies a relieving oneself of something one must say or is charged by oneself or another with saying (**deliver a message over the telephone**) (**deliver a speech**) The term may denote the disburdening of a woman of offspring at the time of its birth (**the queen was safely **delivered** of a son and heir**) or the freeing of all prisoners confined in a prison (**deliver a jail**) **Discharge** (see also **DISMIS** 1; **PERFORM**) implies the release of someone or something that is held in confinement or under restraint or within the bounds of a thing; it may suggest liberation (**discharge a prisoner**) (**discharge a hospital patient**) but often it implies an ejection (**discharge a shot**) (**discharge an arrow**) or an emission (**discharge passengers from a train**) (**discharge a cargo**) or a pouring forth through an outlet or vent (**the smoke is discharged through a very large chimney**) (**the stream discharges its waters into the Hudson (Bay)** or a payment or settlement (as of an obligation) (**discharged his debts**). Often **discharge** differs from **release** in carrying a stronger connotation of force or violence (**many creative writers have a critical activity which is not all discharged into their work—T. S. Eliot**) (**all his accumulated nervous agitation was discharged on Maud like a thunderbolt—Bennett**)

**Enfranchise** basically implies a freeing from subjection (**the nobles desired . . . to enfranchise themselves . . . from the power of the king—Bello** but in its commonest sense it specifically implies the removal of political disabilities and admission to full political rights as a freeman or as a citizen (**slaves were emancipated by the proclamation of President Lincoln on January 1, 1863, but were not enfranchised until the fifteenth amendment went into effect in 1870**)

**Con** *hamper, fetter, manacle, shackles, shackle, trammel, hog-tie:* **imprison, incarcerate, jail, immerse, intern:** **confine, circumscribe, restrict, limit:** **restrain, curb, inhibit**

**freebooter** *pirate, buccaneer, privateer, corsair*

**freedom** 1 independence, autonomy, sovereignty, autarchy, autarky (see under **FREE adj**)

**Ana** liberation, emancipation, release, delivery, enfranchisement, manumission (see corresponding verbs at **FREE**): liberty, license (see **FREEDOM**)

**Ant** bondage —Con *servitude, slavery* 2 **Freedom**, liberty, license are comparable when meaning the state or condition of one who can think, believe, or act as he wishes. **Freedom** (see also under **FREE adj**) is the term of widest application; in philosophy, for example, it often implies a state or condition in which there is not only total absence of restraint but release even from the compulsion of necessity; at the other extreme, in ordinary casual use, **freedom** merely implies the absence of any awareness of being restrained, repressed, or hampered; between these two extremes the term may imply the absence of a definite restraint or of compulsion from a particular power or agency (**me this unchartered freedom tires—Wordsworth**) (**the freedom of the press**) (**he was not affected by her reserve, and talked to her with the same freedom as to anybody else—Archibald Marshall**) (**who would not say, with Huxley, “Let me be wound up every day like a watch, to go right fatally, and I ask no**

*Ana* analogous words  *Ant* antonyms  *Con* contrasted words  See also explanatory notes facing page 1
better freedom’’—James}  Liberty is often used interchangeably with freedom, but it often carries one of two implications which are not so marked in the use of freedom. The first of these implications is the power to choose what one wishes to do, say, believe, or support as distinguished from the state of being uninhibited in doing or thinking (had the liberty to come and go as he pleased) {in totalitarian states there is no liberty of expression for writers and no liberty of choice for their readers—Huxley}  {in freedom in thought, the liberty to try and err, the right to be his own man—Menciken}  The second of these implications is deliverance or release from restraint or compulsion {set a slave at liberty} {the prisoners were willing to fight for their liberty} {from bondage freed, at liberty to serve as you loved best—Baring}  License often implies the liberty to disobey the rules or regulations imposed on the many, but not necessarily governing all, when a great advantage is to be gained by disobedience {poetic license} {sometimes, with truly medieval license, singing to the sacred music . . . songs from the street—Pater} {a general must be allowed considerable license in the field} {has little truck with those who have taken literary license—Horner}  More often, however, the term implies an abuse of liberty in the sense of the power to do exactly what one pleases {license they mean when they cry Liberty—Milton} {many persons think that freedom of the press and liberty of free speech often degenerate into license} {Caesar’s legions . . . were enjoying their victory in the license which is miscalled liberty—Froude}

friend, acquaintance, intimate, confidant are comparable when they designate a person, especially not related by blood, with whom one is on good and, usually, familiar terms. **Friend**, in its application, ranges from a person who is not hostile or is a well-wisher to a person whose society one seeks or accepts with pleasure because of liking, respect, or affection. **Acquaintance** is applied to a person with whom one is on speaking terms. However, when these words are used in contrast, both imply a degree of familiarity, **friend** distinctively connoting close bonds of love and affection and **acquaintance**, comparative infrequency of contact and less close personal interest {you understand that I am not their friend. I am only a holiday acquaintance —Conrad}  {a companion loves some agreeable qualities which a man may possess, but a friend loves the man himself—Boswell}  This distinction is not invariably observed, especially when **acquaintance** is used as a collective plural {he has a wide circle of friends; he has a large acquaintance—Austen}  {he never speaks much, unless among his intimate acquaintance—Austen}  **Intimate** adds to friend the implications of a close affection and a closeness of association that tend to preclude reserve {only his intimates were aware of his plans}  **Confidant** usually designates that intimate who actually is entrusted with one’s secrets or is admitted to confidential discussions.

**Ana** comrade, companion, crony, *associate: ally, colleague, *partner

**Ant** foe — **Con** *enemy: antagonist, *opponent, adversary: rival, competitor (see corresponding verbs at RIVAL)

friendly *amicable, neighborly

amicable, neighborly

friend *familiar, intimate, close: *loving, affectionate, devoted: loyal, true, steadfast, *faithful

**Ant** unfriendly: belligerent — **Con** hostile, antagonistic, antipathetic (see corresponding nouns at **ENMITY**)

friendship, amity, comity, goodwill are comparable when they denote the relation (or, in the first three instances, the alliance) existing between persons, communities, states, or peoples that are in accord and in sympathy with each other. **Friendship** is the strongest of these terms in its implications of sentiment in the relation and of closeness of attachment {the friendship between me and you I will not compare to a chain; for that the rains might rust, or the falling tree might break—Penn}  Sometimes it suggests an alliance; at other times it excludes that suggestion {peace, commerce, and honest friendship with all nations—entangling alliances with none—Jefferson}  {friendship, that exquisite sense of a mutual sympathy of heart and mind which occasionally arises between independent individuals—Cecil}  **Amity** implies the absence of enmity or discord. Positively, it may imply nothing more than amicable relations {the colonists and the Indians seldom lived together in amity} or it may suggest reciprocal friendliness {on his arrival he found amity instead of enmity awaiting him. Father Vaillant had already endeared himself to the people—Cather}  Often the term suggests benevolent understanding and mutual tolerance of potentially antagonistic aims or views {the amity that wisdom knits not, folly may easily untie—Shak}  {the less we have to do with the amities or enmities of Europe, the better—Jefferson}  **Comity** has come to imply comradeish based either upon an interchange of courtesies or upon a similarity of interests and aims. The word often denotes a group bound together by friendship or by common interests but without implying loss of independence by members of the group or transference of sovereignty from the members to the group {outside the comity of the empire, beyond the border provinces and client-kings, lay the unknown lands and the
strange peoples—Buchan> (a Europe which pretends to have founded its comity upon brotherhood—La Barre> 
Goodwill derives its chief implication of a benevolent attitude or of reciprocal good feeling largely from the Authorized Version's translation of the Angelic Hymn > (glory to God in the highest, and on earth peace, goodwill toward men—Lk 2:14) The term is often used in international diplomacy to designate a reciprocal friendliness which constitutes an informal bond between nations and works to the advantage of all concerned > (goodwill is the mightiest practical force in the universe—Dole>) (to promote the exchange of intellectual ideas and goodwill between Belgium and America—School and Society>) be assured that none of us have anything but goodwill toward you personally—Ellison>

fright vb 

n alarm, consternation, panic, *fear, dread, dismay, terror, horror, trepidation 
frightening In informal and conversational use Gray>) 
you have death perpetually before your eyes, by the revelation that startled Rose Macaulay> 
their constant depredations and that the depredations of Conrad)> expression in the woman's face—Ana see those at FRIGHTEN 
work not to start, however much one may be startled—Ana startle implies surprise and a sudden shock that causes one to jump or flinch; occasional-ly its suggestion of fright is very weak > one learns in parish service not to strike for wages—Emerson>

frighten, fright, scare, alarm, terrify, terrorize, startle, affray, affright

Ana those at FRIGHTEN

frighten, fright, scare, alarm, terrify, terrorize, startle, affray, affright 
mean to strike or to fill with fear or dread.

Frighten is the perhaps the most frequent in use; it is the most inclusive, for it may range in implication from a momentary reaction to a stimulus to a state of mind in which fear or dread prevails. Typically, however, it implies a more or less paralyzing fear affecting either the body or the will 
the silence of the house . ..frightened Clara—Anderson> (in the world too frightened to be honest—T. S. Eliot>)

Fright is an older and chiefly literary or dialect form of frighten > you have death perpetually before your eyes, only so far removed as to compose the mind without frightening it—Gray>)

In informal and conversational use scare is often equivalent to frighten; in more formal use itusually implies fear that causes one to run, shy, or tremble 
scented, to disperse, *scatter: dispense, ^distribute: disburse, *spend, expend

frown, scowl, glower, lower, gloom

frown, scowl, glower, lower, gloom are com-pared when they mean to put on a dark or malignant countenance or aspect. Frown commonly implies a stern face and contracted brows that express displeasure, disapprobation, anger, or contempt > (that Stonehenge circle of elderly disapproving faces—faces of the uncles, and schoolmasters and the tutors who frowned on my youth—L. P. Smith>) Scowl carries an implication of wrinkled drawn-down brows that express ill humor, sullenness, or discontent > a spinner that would not rebel, nor mutter, nor scowl, nor strike for wages—Emerson> Glower implies a more direct stare or gaze than frown or scowl and carries a stronger connotation of anger, contempt, or defiance > (the stewart ... glowered at Powell, that newcomer, that ignoramus, that stranger without right or privileges—Conrad>) he ... stood glowering from a distance at her, as she sat bowed over the child—D. H. Lawrence>

Lower implies a menacing darkness and sullenness of face or of aspect; the term is used in reference not only to persons but to skies that give promise of a storm > (wandering from chamber to chamber . . . all distinguishable by the same lowering
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
fulsome, oily, unctuous, oleaginous, slick, soapy are comparable when they mean too obviously extravagant or ingratiating to be accepted as genuine or sincere. Fulsome stresses a surfeit of something which in proper measure is not displeasing but which in abundance is cloyingly extravagant and offensive. Typically the term is applied to praise, flattery, and compliments, with the intent to suggest that they exceed the bounds of good taste and are lacking in truth and sincerity. "fulsome flattery" (Brooks) (the fulsome strains of courtly adulation—Edgeworth) (he could never be made ridiculous, for he was always ready to laugh at himself and to prick the bladder of fulsome praise—Buchanan) Oil and unctuous both suggest the smoothness and blandness of oil. Oily, as applied to persons and their utterances and acts, carries a strong implication of an offensively ingratiating quality and sometimes suggests a surliness, a benevolence, or a kindliness that is assumed as a mask for evil or dubious ends (an oily scoundrel) (oily manners) (oily smugness) (only oily and commonplace evasion—Stevenson) (an oily, sycophantic press agent—Rogow) Unctuous, on the other hand, suggests the assumption, often in hypocrisy, of the tone or manner of one who is grave, devout, or spiritual (the unctuous grandiloquence of Dickens's Chadband) (the look was, perhaps, unctuous, rather than spiritual, and had, so to speak, a kind of fleshy effulgence.... He... smiled with more unctuous benignity than ever—Hawthorne) (Mark Twain writes those words with an almost unctuous gravity of conviction—Brooks) (the devastating portrait of the unctuous literary opportunist—Cordell) Oleaginous is sometimes used in place of oily or unctuous when pomposity is connoted or a mocking note is desired (the lank party who snuffles the responses with such oleaginous sanctimony—Farren) Slick may suggest the assumption of smooth, ingratiating manner, but it usually stresses the speciousness of that appearance and often imputes slyly trickiness to the person who assumes it (this slick type of younger anticipates exactly how adults will react to him and plays on their sensibilities—Meyers) (a pair of slick operators had given the district a bad name by salting a barren claim—Oscar Lewis) Soapy comes close to unctuous in its extended sense, but it carries almost no suggestion of hypocrisy: rather it connotes an unduly soft, bland, or ingratiating manner (soap supplications for unity—New Republic) Ana lavish, *profuse, exuberant: *excessive, extravagant: cloying, satiating, satiating (see SATIATE): bombastic, grandiloquent, magniloquent (see RHETORICAL) fumble vb *botch, bungle, muffer, cobble Ana blunder, flounder, *stumble fumigate disinfect, sanitize, *sterilize fun, jest, sport, game, play are comparable when they denote something (as an activity, an utterance, or a form of expression) that provides diversion or amusement or is intended to arouse laughter. Fun implies amusement or an engagement in what interests as an end in itself, or it may apply to what provides this amusement or interest and then often additionally implies a propensity for laughing or for finding a usually genial cause for laughter or amusement (had such a zest for everything and thought it all such fun—Rölaag) (make living more fun, life more complete—Printers' Ink) (a man full of jollity) Jest (see also joke) is comparable to fun chiefly in fixed phrases (as in jest) or when applied to activity or utterance not to be taken seriously. In such uses, however, jest commonly carries a stronger implication of ridicule or hoaxing (a man given to making his most significant remarks in jest) (make jest of very serious problems) Sport (see also under PLAY vb 1) is often interchangeably with fun (there is a good deal of sport in many serious activities) or jest (play a trick on a friend for the sport of it) But its most common use is in certain idiomatic phrases (as make sport and in sport) in which it suggests an intent to induce amusement or provoke laughter by putting someone or something up to gentle or malicious ridicule (make sport of a suggestion) (make a good deal of sport out of his friend's misfortune) (teasing begun in sport ended in an ugly brawl) Game as a close synonym of fun survives chiefly in the phrase to make game of where, like sport in the corresponding idiom, it usually carries a suggestion of mischief or malice and implies a certain ridicule (make game of an unfortunate rival) In more general related use game (see also games under ATHLETICS) may apply to an activity carried on in a spirit of fun (there have been few poets more successful... in having fun with poetry. To Mr. Frost it is a pleasant game—Leary) Play, which stresses in all senses an opposition to earnest, may replace fun or sport or jest when a thoroughly innoxious implication of lack of earnestness or seriousness is desired (pretend to spank a child in play) Ana amusement, diversion, recreation, entertainment (see under AMUSE) (enjoyment); merriment, jocundity, blitheness, joviality (see corresponding adjectives at MERRY): *mirth, glee, hilarity, jollity function n 1 Function, office, duty, province are comparable when they mean the act, acts, activities, or operations expected of a person or thing by virtue of his or its nature, structure, status, or position. Function is the most comprehensive of these terms, capable of referring not only to a living thing or to a part or member of a living thing but to anything in nature (as the sun, the stars, or the earth) or in art (as poetry, painting, music, or an example of one of these) or to anything constructed that serves a definite end or purpose or is intended to perform a particular kind of work (fulfill one's function as a mother) (the function of the stomach is to digest food sufficiently to enable it to pass into the intestine)
function

function of language is twofold: to communicate emotion and to give information—Huxley (the function of the leaves of a plant) (the function of criticism) what after all . . . is the true function of religion?—Dickinson Office applies usually to the function of or the work to be performed by a person as a result of his trade, profession, employment, or position with relation to others; in this sense it refers to a service that is expected of one or to a charge that is laid upon one (O, pardon me for bringing these ill news, since you did leave it for my office, sir—Shak.) (to suppose she would shrink . . . from the office of a friend—Austen) (they exercise the offices of the judge, the priest, the counsellor—Gladstone) Duty (see also task) applies not only to the tasks expected or required to be performed in the course of occupation or employment (the duties of a cook) (the duties of a hotel porter) but to the offices associated with status, rank, or calling and generally regarded as inherent in that status, rank, or calling and as imposing an obligation upon the person so stationed (a man and wife fulfill their biological function when they produce children, but they now still perform their duties as parents in rearing, protecting, and educating those children) (the governor regarded it as his duty to warn the citizens of the dangers ahead) (it is not only the right, but it is the judicial duty of the court, to examine the whole case as presented by the record—Tuney) (it is in large part because of our failure to discharge our peacetime responsibilities as citizens that we must do our grim duty in war or perish—Lodge) Province (see also field) denotes a function, office, or duty which comes within one's range of jurisdiction, powers, competence, or customary practice (nursing does not belong to a man; it is not his province—Austen) (it is emphatically the province and duty of the judicial department to say what the law is—John Marshall)

Ana end, goal, object, objective, purpose (see intention): business, concern, *affair: *task, job

function vb operate, work, *act, behave, react fundamental adj 1 Fundamental, basic, basal, underlying, radical are comparable when they mean forming or affecting the groundwork, roots, or lowest part of something. Fundamental is used chiefly in reference to immaterial things or to abstractions, whether they are thought of as built up on a foundation or as having their origins in roots (the fundamental rules of poetry) (a fundamental change in his attitude to life) (the fundamental rock in a geological formation) (the fundamental absurdity of the plot . . . remains—FitzGerald) (fatigue nor worry nor professordom could extinguish his fundamental gaiety—J. M. Brown) Basic is often used interchangeably with fundamental when the latter implies reference to a substructure (the fundamental or basic argument) But basic is preferred to fundamental when the reference is to a definite or concrete groundwork, bottom, or starting point (the basic stone of a pillar) (a basic wage in the electrical industry) (the distinction between basic scientific research and applied research—News Front) Basal differs from basic chiefly in not being used as often in reference to immaterial things and is more often implying reference to the bottom or to the lowest point or regions of a thing (geologizing the basal parts of the Andes—Darwin) (the basal plane of a crystal) (basal leaves on a stem) Underlying may be used to suggest nothing more than extension beneath something else (underlying rock strata) (the underlying layer of tissue) However, especially when the reference is to something immaterial, the term frequently comes close to fundamental, differing from it chiefly in suggesting a depth that removes the thing from one's range of vision or a remoteness that demands study or research on the part of one who would detect it (the underlying motive for his act) (the underlying causes of World War I) (underlying differences between Communism and socialism) (the social transformation now demanded of us by our underlying technical, economic and social development—Strachey) Radical (see also liberal 2) implies reference to the root or origin or ultimate source of a thing; thus, a radical change is one that is so thoroughgoing that it affects the fundamental character of the thing involved; a radical error touches the very center and source of a thing's life (actual differences distinguishing the different races of mankind—diffences that may be ascribed to radical peculiarities of mind—Bridges)

Ana *primary, primal, primordial, prime: *elementary, elemental 2 *essential, vital, cardinal Ana requisite, *needful, necessary, indispensable: paramount, *dominant; principal, capital, foremost. *chief Con *superficial: *subordinate, secondary fundamental n *principle, axiomatic, law, theorem Ana *element, constituent, component, factor: ground, basis, foundation, *base, groundwork funny *laughable, risible, ludicrous, ridiculous, comic, comical, farcical, droll Ana humorous, *witty, jocose, jocular, facetious: amusing, diverting, entertaining (see amused) grotesque, bizarre, *fantastic, antic Con *serious, solemn, grave, sober: melancholy, plaintive, doleful, dolorous, lugubrious furious, frantic, frenzied, wild, frenetic, delirious, rabid are comparable when they mean possessed with uncontrollable excitement especially under the stress of a powerful emotion. Furious implies strong excitement or violence that characterizes the movements or activities of one aroused by a powerful emotion; it may be applied to the activities or to the emotion (he was in a furious rage) (she worked with furious zeal while the mood lasted) (she was now entering into that stage of furious activity which represented the exalted phase of the mental circular state—Ellis) Furious may also mean nothing more than intensely angry with or without an outward display of excitement (beneath her calm she was furious against her favorite—Bennett) Frantic implies actions or words that indicate temporary mental disturbance under the stress of a powerful emotion (as grief, worry, anxiety, fear, or rage); it usually suggests, especially when applied to actions or behavior, a situation from which it is almost impossible to escape (his frantic efforts to free himself resulted only in his becoming worse entangled) (there was a full moon at the time, and . . . every dog near my tent was baying it. The brutes . . . drove me frantic—Kipling) (a frantic beating of wings—Cather) (my father, frantic with anxiety over my safety—Heiser) Frenzied suggests uncontrollable excitement under the sway of an emotion, often one not explicitly designated, but it differs from frantic in carrying no clear suggestion of a desperate situation (a frenzied welcome by the populace) (why do we let these abstractions and implausible dogmatisms take possession of us . . . and fight their futile, frenzied conflicts in our persons?—L. P. Smith) (could hear the prosecutor's frenzied denunciations of the accused—H. W. Carter) (ignoring the frenzied nervous attempts of an unprepared city to make some semblance of defense—Gardner)
Wild comes close to \textit{frantic} in its meaning but stresses a distracted rather than a nearly deranged state of mind; it therefore may be used with reference not only to the effect of a violent emotion but to the effect produced by any undue strain on the nerves or the mind (\textit{she is wild with grief}) \textit{wild screams of anguish} (\textit{the news of the death of her father}) \textit{these are but wild and whirling words, my lord—Shak.}). \textit{wild with hatred and insane with baffled desire—Thackeray}) \textit{Frenetic} suggests a loss of balance, especially a tendency to be affected by extreme excitement under the stress of religious or partisan emotions (some of the more \textit{frenetic} of the franc-tireurs of liberalism—\textit{Pall Mall Gazette}) \textit{when inspired, their [the sacred writers']} individuality was intact. They were never \ldots \textit{frenetic—J. P. Newman}) \textit{Delirious}, like \textit{frenzied}, implies uncontrollable excitement, but it more specifically suggests symptoms (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}) \textit{Delirious, like} \textit{frenzied}, \textit{implies uncontrollable excitement, but it more specifically suggests symptoms} (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}) \textit{Delirious, like} \textit{frenzied}, \textit{implies uncontrollable excitement, but it more specifically suggests symptoms} (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}) \textit{Delirious, like} \textit{frenzied}, \textit{implies uncontrollable excitement, but it more specifically suggests symptoms} (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}) \textit{Delirious, like} \textit{frenzied}, \textit{implies uncontrollable excitement, but it more specifically suggests symptoms} (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}) \textit{Delirious, like} \textit{frenzied}, \textit{implies uncontrollable excitement, but it more specifically suggests symptoms} (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}) \textit{Delirious, like} \textit{frenzied}, \textit{implies uncontrollable excitement, but it more specifically suggests symptoms} (as lightheadedness, incoherence, and wandering) typically associated with delirium (\textit{the children were delirious}) \textit{excitement, but it more specifically suggests symptoms} (\textit{as lightheadedness, incoherence, and wandering} typi-\textit{cal in a riding dress—Dickens}).
may be applied to something contemplated but not yet tried, vain more often suggests a judgment based on previous experience and futile, one based on reasoning from self-evident principles (but it is vain to talk of form and symmetry to the pure expansionist—Babbit) (it is futile to ask which [Shakespeare or Dante] undertook the more difficult job—T. S. Eliot) Fruitless is often interchangeable with vain. But its basic meaning makes it especially applicable to undertakings that entail long, patient, arduous effort and severe disappointment (whom he had long time sought with fruitless suit—Spenser) (he nursed a grievance and, with Scotch persistence, kept up for years his fruitless efforts at reinstatement—Ashley) Bootless, chiefly poetic, is especially applied to petitions or efforts to obtain relief (they would not

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
garrulity, garrulousness talkativeness, loquacity, volubility, glibness (see under TALKATIVE)

gastronome *epicure, gourmet, gourmand, bon vivant, glutton

gate *door, portal, gateway, postern, doorway

 gateway gate, portal, *door, postern, doorway

gather vb 1 Gather, collect, assemble, congregate mean to come or to bring together so as to form a group, a mass, or a unit. The same distinctions in applications and in implications characterize their derivative nouns gathering, collection, assemblage (which see) or assembly, congregation. Gather is the most widely applicable of these words; it may be used in reference not only to persons and objects but to intangible things (a crowd gathers wherever there is excitement) (gathering the boys and girls of the neighborhood for a picnic) (leaves gather in heaps on windy days) (gathering the leaves for burning) (beads of moisture gathered on his brow) (gathering his ideas together before planning his speech.) In certain phrases *gather acquires additional specific connotations; thus, gathering flowers or crops implies plucking and culling as well as bringing together; gathering a ruffle implies a drawing together or into folds on a thread; gathering one's wits connotes an effort at concentration or at mustering or rallying mental forces. Collect is often used in place of gather with no intended difference in meaning (collect leaves) (leaves collect) (beads of moisture collected on his brow) But collect may convey, as gather does not, the ideas of careful selection or a principle of selection, of orderly arrangement, or of a definitely understood though not always expressed end in view; thus, to collect butterflies implies a selection of specimens and, usually, their cataloguing; to collect books (as in book collector) implies a choice of books with regard to some such principle as rarity, beauty of binding, or authorship. There is a subtle difference between to gather one's thoughts, which often merely implies previous scattering, and to collect one's thoughts, which implies their organization; there is also a difference between to gather money, which may mean merely to accumulate it, and to collect money, which usually suggests either raising a fund by gifts, subscriptions, and contributions or taking action to obtain possession of money due. Collect and collection are often preferred to gather and gathering when various things are brought together; thus, a jumble or an omnium-gatherum is a miscellaneous collection rather than a gathering; collect rather than gather enough chairs for all the guests to sit down. Assemble stresses more emphatically than either gather or collect a close union of individuals and a conscious or a definite end in their coming or in their being brought together. It is used chiefly in reference to persons who gather together, either of their own will or at the call of another, so as to form a group or body that will unite in action or join in counsel or discussion (the democratic rights of free speech and free assembly) (the most renowned experts on the history, geography, economics, and politics of all the nations of the world . . . assembled under one roof—Allop & Braden) (after even a new crew had . . . been assembled, I had qualms about setting forth over the treacherous waters of the China Sea—Heiser) In reference to things assemble implies an agent who collects them in order to unite them into a single body or structure or into a distinct and isolated group; thus, the assembly department of an automobile plant is the department in which the workmen build the cars by assembling the component parts made in other departments or in other factories (it took twenty years to assemble this collection of musical instruments) Congregate implies a flocking together into a crowd, a huddle, or a mass (cattle congregate during a storm) (pass laws forbidding persons to congregate on the streets) (congregations of atoms excited and lucent, mingled with free electricity—Darrow) Congregation is specifically applied to an assembly meeting for religious worship, but it usually retains the suggestion of a crowd that has flocked together. Ana *accumulate, amass, hoard: *heap, pile, stack, mass

 2 *reap, glean, garner, harvest

 Ana see those at GATHER 1

 3 *infer, deduce, conclude, judge

 gathering collection, assemblage, assembly, congregation (see under GATHER vb)

 Ana *crowd, throng, press, horde, mob, root, crush: accumulation (see corresponding verb ACCUMULATE)

gauche maladroit, *awkward, clumsy, inept

gaudy, tawdry, garish, flashy, meretricious are comparable when meaning vulgar or cheap in its showiness. Something is gaudy which uses gay colors and conspicuous ornamentation lavishly, ostentatiously, and tastelessly (gaudy floral prints) (false eloquence, like the prismatic glass, its gaudy colors spreads on ev'ry place—Pope) (another attendant, gaudy with jingling chains and brass buttons, led us along a corridor—Kenneth Roberts) Something is tawdry which is not only gaudy but cheap and sleazy (beneath the lamp her tawdry ribbons gleare—Gay) (a fancy . . . fruitful, yet not wanton, and gay without being tawdry—Cowper) (he saw nothing else; the tawdry scenery, the soiled cotton velvet and flimsy crumpled satin, the reek of vulgarity, never touched his innocent mind—Deland) Something is garish which is distressingly or offensively bright (hide me from day's garish eye—Milton) (for this week he would produce a bunch of [flowers] as garish as a gypsy, all blue and purple and orange, but next week a bunch discreet as a pastel, all rose and gray with a dash of yellow—Sackville-West) Something is flashy which dazzles for a moment but then reveals itself as shallow or vulgar display (Tom Paine was considered for the time as a Tom Fool to him, Paley an old woman, Edmund Burke a flashy sophist—Hazlitt) (the flashy rich boy in public school, buying toadyism —La Farge) (what the public wants" is being translated into the flashy, the gadgety, the spectacular—Loewy) Something is meretricious which allures by false or deceitful show (as of worth, value, or brilliancy) (the jewels in the crisped hair, the diadem on the polished brow, are thought meretricious, theatrical, vulgar—Hazlitt) (the false taste, the showy and meretricious element . . . invading the social life of the period and supplanting the severe elegance, the instinctive grace of the eighteenth century—Binyon) (if a writer's attitude toward his characters and his scene is as vulgar as a showman's, as mercenary as an auctioneer's, vulgar and meretricious will his product for ever remain—Cather)

 Ana *showy, pretentious, ostentatious: vulgar, *coarse, gross: resplendent, gorgeous (see SPLENDID)

 Ant quiet (in taste or style) — Con modest, *chaste, decent, pure

gauge n *standard, criterion, yardstick, touchstone

generate, engender, breed, beget, sire, get, procreate, propagate, reproduce are comparable when they mean to give life or origin to or to bring into existence by or as if by natural processes. Generate, which means no more than this, is used rarely in reference to human beings, seldom in reference to animals or plants (mushrooms are not generated from seeds) but is the technical term in reference to electricity (generated an electric current) and is used commonly in reference to ideas, emotions, passions, moods, or conditions that have a traceable cause or source (a habit of thought . . . only to be generated by intimate knowledge of good literature—Russell) (I do not think religious feeling is ever aroused, except by ideas of objective truth and value; but these ideas are certainly not generated by feeling—Inge) (the mood generated in me by the intellectual convictions current in my time—Krutch) Engender, like generate, is chiefly found in extended use, where it more often suggests an originating or a sudden or immediate birth than a gradual bringing into fullness of life or being (to hunger for the hope and happiness which . . . the dance seemed to engender within them—Hardy) (a sudden spontaneous illumination . . . engendered in the course of writing a poem—Day Lewis) (the strike, during which three men had been killed and ill-feeling engendered in hundreds of silent workers—Anderson) Breed basically means to produce offspring by mating or gestation (yet every mother breeds not sons alike—Shak.) Often the term carries a less specific meaning and suggests merely the production of offspring (mankind will in every country breed up to a certain point—Paley) sometimes by parental action but more often by the activity of those who determine the parentage, the time of mating, and the number of offspring (specialists who breed horses for racing) (cattle bred for milk production) (the notion of a Govern-Lowt department trying to make out what cows or trans-domestic breeds were necessary, and how many persons of each type, and proceeding to breed them by appropriate marriages, is amusing but not practicable—Shaw) Sometimes breed adds the implication of nurturing or rearing to that of producing offspring and may so stress this that there is no reference to the life processes involved in generation (he was bred in a manner befitting the son of a king) (he was born and bred in your house—Jowett) In its extended sense breed usually implies a gradual or continuous process of coming into being; it may specifically suggest a period of latency or quiescence before breaking out (an iniquitous government breeds despair in men’s souls—John Morley) (the yoke a man creates for himself by wrongdoing will breed hate in the kindliest nature—George Eliot) (incensant recurrence without variety breeds tedium—Loves) Beget, get, and sire imply the procreating act of the male parent; usually beget is preferred in reference to men and get and sire in reference to animals (he that begetteth a fool doeth it to his sorrow—Prov 17:21) (a bull may be unable to get calves—Diseases of Cattle) (a Thoroughbred sire by a famous stallion) Only beget and sire have extended use derived from their basic meaning. In such use there is very little difference between beget, sire, and engender, the terms often being employed interchangeably without loss (motion picture industry, sired and nourished by private enterprise—Hays) though beget sometimes stresses a calling into being on the spur of the moment or without any previous preparation or expectation (beauty that begets wonder and admiration) (stories . . . spring from the fillip of some suggestion, and one begets another—Lowes) Procreate, a word now seldom used, is close in meaning to breed in the sense of to produce offspring. Though sometimes used as a synonym of beget, it more...
often refers to sexual acts involved in a mating and their results in the production of children (the time-honored presumption that a child born to a married woman during copu-ter was procreated by her husband—JAMA)

Unlike the foregoing terms, *propagate* carries no inherent implication of sexual activity but rather stresses the preserving and increasing of a kind of living being, be it plant, animal, or human, whether by generating, by breeding, or by growing (as from seeds, grafts, cuttings, or bulbs) (the rabbit propagates itself with great rapidity) (from cuttings . . . he propagated what he first named the Tokay but later the Catawba grape—Jenkins) In its extended use *propagate* implies not only giving rise to something or bringing it into existence but often also a continuation of that existence or the widespread dissemination of the thing that is brought into existence (Oh! does patience beget patience?) said Adrian. I was not aware it was a propagating virtue—Meredith) (the Rights of Man, rights which the French Revolution had propagated—Barr)

*Reproduce*, like *propagate*, may be used in reference to any living thing capable of bringing into existence one or more of its kind and is applicable whether the means is sexual or asexual (the tribe was dying out: infant mortality was heavy, and the young couples did not reproduce freely—the life-force seemed low—Cather) (the residents of the urban places probably did not reproduce themselves—Oscar Handlin)

**Anna** *bear, produce, yield: teem, abound gener-ic* general, universal, common **Anna** typical, regular, normal: specific (see SPECIAL) **Con** individual, peculiar, distinctive, *characteristic: particular, individual, *special

**Ant** rough, harsh —**Con** vehement, *intense, fierce, violent: powerful, forcible, forceful: stimulating, exciting, provocating or provocative (see corresponding verbs at PROVOKE)

**gentleman** patrician, aristocrat are comparable when they denote a person of good or noble birth. **Gentleman** basically implies descent from good family, the right to bear a coat of arms, and social rank just below that of the noble and above that of the yeoman. The term has been widely extended in its application and has acquired connotations which have little or nothing to do directly with lineage or heraldic rights but suggest only such outward marks of good birth as elegance of person and of manners and a life of leisure (a gentleman . . . I'll be sworn thou art; thy tongue, thy face, thy limbs, actions and spirit, do give thee five-fold blazon—Shak) (somebody has said that a king may make a nobleman, but he cannot make a gentleman—Burke) (the gentleman may be a drunkard, a gambler, a debauche . . . he may be a man of spotless life, able and honest; but he must on no account be a man with broad palms, a workman amongst workmen—Tom Collins) **Patrick** derives its implications from its historical applications but chiefly from its earliest reference to a Roman citizen who belonged to one of the original families of ancient Rome which, after the growth of the plebeian order, kept power and authority in their own hands. In reference to present-day persons the word suggests a distinguished ancestry, superior culture, and aloofness from what is common or vulgar; it is applied chiefly to descendants of established and influential families when they constitute a social caste, especially one marked by exclusive vested pride in birth (the merchant/patricians [of Boston]), like the nobles of Flanders and Flanders in times gone by, wished to perpetuate their names and glorify their capital not only in the elegance of their mansions but also in churches, parks and public buildings—Brooks) **Aristocrat** carries fewer suggestions of inbred physical characteristics than gentleman or patrician, but it suggests a sympathy with the point of view common to them. In historical use it commonly implies an opposition to democrat and is applicable to a person who believes in government by superior persons or by the class which includes such persons; in more general use it is commonly applied to a person who by reason of birth, breeding, title, wealth, or outlook is accorded recognition as a member of the highest caste and especially to one who holds himself somewhat aloof from the ordinary forms and observances of social life (two kinds of aristocrats: one that assumes the right to govern without the consent of the people; the other that assumes the privilege of an exclusive private life—Charles Beard) (a genuine aristocrat, he was at home in all walks of life—Smelser & Kirwin)

**genre** class, category, species, denomination, genre **Anna** *type, kind, sort, nature, description
germ, microbe, bacterium, bacillus, virus, though not strict synonyms, are comparable because all denote organisms invisible to the naked eye, including organisms that are the causative agents of various diseases. Germ and microbe are the ordinary nonscientific names for such an organism and especially for one that causes disease. Bacteria, the plural of bacterium and the form commonly in general use, is often employed as the equivalent of germs and microbes. Technically, it is the scientific designation of a large group of prokaryotic microbes which are found widely distributed in water, air, soil, living things, and dead organic matter, which have structural and biological characteristics distinguishing them from other unicellular microorganisms (as protozoans), and

Germicide bactericide, antisepic, disinfectant

only some of which are instrumental in producing disease in man, animals, and plants. In addition to the pathogenic or disease-causing bacteria there are the saprophytic bacteria which live upon dead or decaying organic matter and which, for the most part, are beneficial in their effects which include many natural chemical processes (as fermentation, oxidation, and nitrification). Bacillus is often employed as though it designated any of the pathogenic bacteria. In technical scientific usage it designates any of a genus of bacteria which originally included all or most rod-shaped forms and is now restricted to a group of mostly soil-inhabiting, aerobic, and saprophytic forms that produce endospores. However, it is often used of rod-shaped bacteria in general, especially as distinguished from those which are globe-shaped (the cocccus form, of which the streptococcus is an example) and those which are spiral (the spirillum form, of which the vibrio which causes Asiatic cholera is an example, and the spirochete form, exemplified by the treponema of syphilis). It is common, especially in medical usage, to speak of the bacilli of such diseases as typhoid, diphtheria, and tetanus, though many of these true bacilli in the restricted taxonomic sense. Virus, in earlier use, was an imperceptible infectious principle of unknown nature occurring in the body of a diseased individual and held to be involved in the transfer of infectious diseases. In this sense it has been applied to most germs or microbes while their specific nature remained unknown, as well as to bodily fluids and discharges containing such infective agents by [virus] is understood a principle, unknown in its nature and inappricable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the variolic, vaccine, and syphilitic viruses—Dunglison A vestige of this meaning persists in immunological usage with respect to materials (as vaccine lymph) that are antigenic but not usually infective when the doctors inoculate you... they give you an infinitesimally attenuated dose. If they gave you the virus at full strength it would overcome your resistance and produce its direct effect—Shaw In general modern usage virus is equivalent to filterable virus and is restricted to a variety of parasitic and infective agents which are able in nature to multiply only in living tissues, are so small that they pass through the pores of bacteriological filters, and are generally invisible with the ordinary light microscope. They include noncellular microbes (as herpesviruses, po- liovirus, and tobacco mosaic virus) that lie on the border between the living and nonliving, may consist of a single macromolecule of DNA or RNA in a protein case, and are capable on the one hand of existing in the crystalline state and on the other, when introduced into suitable cells, of multiplying like a true organism if it appears that energy for virus synthesis is provided by enzyme systems already present in the normal host cell. ... Investigations carried out thus far have not detected any biochemical activity by the virus. However, if the assumption is made that the virus simply stimulates its own production by the host cell, it would appear that it is a very inefficient parasite—Weiss

gesticulation *gesture

get 1 Get, obtain, procure, secure, acquire, gain, win are comparable and often interchangeable when they mean to come into possession of. Get is very general in its meaning and simple and familiar in its use. Thus, one may get something by fetching get a book from the table), by extracting get gold from ore), by receiving (get a present), or as a return get interest on a loan) Obtain is likewise rather general. It may suggest that the thing sought has been long desired or that it has come into possession only after the expenditure of considerable effort or the lapse of considerable time (the satisfaction obtained by the sentiment of communion with others, of the breaking down of barriers—Dewey) (in western New York, where her early education was obtained—Knott) Procure is likely to suggest planning and contriving over a period of time and the use of unspecified or sometimes questionable means (the Duma laid claim to full power...and on March 15 procured the abdication of the frightened and despondent Nicholas II—Ogg & Zink) some gifted spirit on our side procured (probably by larceny) a length of mine fuse—H. G. Wells) Secure may suggest safe lasting possession or control (the large income and fortune which a prospering business secures for him is of his own making—Hobson) or it may suggest the gaining of what is hard to come by (as by reason of rarity or competition for possession); thus, one secures, rather than gets or acquires, a rare stamp by offering a higher price than other interested persons will pay (almost absolute safety against infection could be secured by the simple precaution of using safe, potable water—Heiser) Acquire may suggest devious acquisition (the destruction of that ship by a Confederate cruiser, although it had acquired a British registry in order to avoid capture—Knott) It may also indicate continued, sustained, or cumulative acquisition (the habit of any virtue, moral or intellectual, cannot be assumed at once, but must be acquired by practice—Grandgent) Gain often implies competition in acquiring something of value (if a London merchant, however, can buy at Canton for half an ounce of silver, a commodity which he can afterwards sell at London for an ounce, he gains a hundred percent—Smith) (few men are placed in such fortunate circumstances as...
to be able to gain office—Oliver> Win, though often interchangeable with gain, may suggest, as gain does not, favorable qualities leading naturally to the acquisition of something desired despite competition or obstacles (the errors of his time were connected with his labors to remedy them, and win a firmer knowledge than dialectic could supply—H. O. Taylor> Mrs. Woolf’s fiction is too negligent of the requirements of the common reader to win a wide following—Millet>r> Ana fetch, *bring: extract, elicit, extort, *educe, evoke; *receive, accept: seize, *take, grasp, grab, clutch; effect, accomplish, achieve (see PERFORM): *incur, contract, catch
Con *fargo, eschew, abnegate, sacrifice, forbear 2 beget, procreate, sire, *generate, engender, breed, propa-
gate, reproduce
Ana see those at BEGET 3 *induce, persuade, prevail
Ana *move, actuate, drive, impel: *incite, instigate, abet ghastly, grisly, gruesome, macabre, grim, lurid are com-
parable when they mean horrifying and repellent in appear-
ance or aspect. Ghastly suggests the terrifying aspects of
death or bloodshed (the dying man’s ghastly pallor)
death grinned horrible a ghastly smile—Milton (the im-
ages of a hideous—of a ghastly thing—of the gallowy—
Poey). The term also is used as a strong, intensive equivalent
hideous or horrifying (the growing conviction that the
defeat was the result of a ghastly and unnecessary boun-
der) is heaped upon ghastly detail with a kind of
stolid objectivity until the cumulative picture is one of
madness and chaos—Edmund Fuller> Grisly and grue-
some imply an appearance that inspires shuddering or un-
canny horror (so spake the grisly Terror—Milton)
look down, and see a grisly sight; a vault where the bodies
are buried upright—Wordsworth> the thick 566-page
literary work is literally horrible. It is filled with gruesome
details of murder and torture—Blinen b. 1916> many readers
find Keats’s Isabella too gruesome for enjoyment) Mac-
cabre may imply marked or excessive preoccupation with
the horrors especially of death (a macabre tale) weirdly
masked, macabre figures that in time became . . . the
hallmark of his painting—Coates> or it may come close to
ghastly in its implication of a hideous or horrifying
quality (in a macabre climax, a substantial portion of
Berlin was blown up by the Germans themselves—Wechs-
berg) Grim suggests a fierce and forbidding aspect
(should a murderer look, so dead, so grim—Shak.) (with
countenance grim glared on him passing—Milton> an
unused, airless attic, a place the reader soon begins to
think of as no less grim than a chamber of horrors—Stern>r>
the grim hows and not the difficult whys of battle—Mc-
Caren> Lurid comes into comparison with ghastly as
resembling to light or color; it suggests either a ghastly
talor or coloring reminiscent of death (death . . . pale as
yonder wan and horned moon, with lips of lurid blue—
Shelley> or more frequently a sinister and murky glow (he
colored the color of what was passing about him but mixed
with the lurid and portentous hue—Hawthorne)> no lurid
fire of hell or human passion illumines their scenes—
Eliot> Sometimes lurid differs little from gruesome except,
possibly, in its stronger suggestion of sensationalism
reporters who like to give all the lurid details of a catas-
trophe) the detective story may be described as lurid
rather than as mysterious

**giant adj** *huge, vast, immense, enormous, elephantine, mammoth, gigantic, gigantean, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian
**gibber vb** prate, chatter, *chat, gab, patter, prattle, babble, gabble, jabber
**gibberish, mummary, hocus-pocus, abracadabra** are com-
parable as terms of contempt applied to something which
is in itself unintelligible or meaningless to the person con-
cerned. They are often used interchangeably but are not
true synonyms. Gibberish suggests language; it is applied
especially to inarticulate but expressive sounds or attempts
at speech (a baby’s gibberish) When applied to articulate
but unintelligible utterance it may imply a low-grade or
disordered intelligence in the speaker, or it may suggest
jargon. One or more of these implications is carried over
when the word is used to express contempt (I have often
warned you not to talk the court gibberish to me—
Fielding) (I’ve endured just about enough gibberish
about the modern woman, how she complicates her life,
has sacrificed her femininity and competes in a man’s world
—Mckuliffe> Mummery suggests not language but
actions uninterpreted by words (as in the old dumb
shows). As a term of derogation, however, it is applied
crassly to rites, proceedings, and performances which,
whether or not accompanied by words, appear theatrical
and ridiculous as well as meaningless to the observer (it
was hardly worthwhile for a Protestant to have stripped
off the mummeries of Rome in order to fall a victim to an
agile young man in a ten-foot mask—Graves> the mum-
meries and ceremonial of modern life—W. P. Webb) Hocus-
pocus suggests jugglery and incantations. Sometimes,
in its extended use, the stress is placed upon tricks intended
to mystify or confuse, sometimes upon empty but impres-
sive-sounding words (the potency of movies depends
upon the quality of their dramatic articulation, not upon
the working of hocus-pocus on the eyes—Crowther>
denounced dialectics—that curious heritage from Hegeli-
an philosophy which Marx adopted and adapted for his
own thought— as meaningless hocus-pocus—A. G. Meyer>
Abrasadabra basically applies to a magical formula or a
mystical figure and in extended use is applied chiefly to
discourse and implies not only its unintelligibility and
formulism but its complete unfitness for the ends it pro-
poses to achieve (psychology is either true knowledge
concerning the spiritual nature of man or it is moonshine
and abracadabra—Murry>
gibe vb *scoff, jeer, sneer, flout, gibe, gibe
Ana *ridicule, deride, mock, taunt, twit, rally
giddy, dizzy, vertiginous, swimming, dazzled are compara-
ble when meaning affected by or producing a sensation
of being whirled about or around and consequently con-
fused. Giddy and dizzy are often used interchangeably
with one another but giddy is sometimes preferred for
stressing the mental confusion which results and dizzy
for emphasizing the physical quality of the sensation (I
am giddy; expectation whirs me round. The imaginary
relish is so sweet that it enchants my sense—Shak.) (this
universe of astronomical whirligigs makes me a little
giddy—L. P. Smith> how fearful and dizzy ‘tis to cast
one’s eyes so low! The crows and thowgs that wing
the midway air show scarce so gross as beetles—Shak.) (with
my heart beating and my head quite dizzy—J. W. Car-
by) Both giddy and dizzy are also used in an extended
sense implying a lack of balance in persons or in things and,
usually, an undue lack of steadiness or seriousness
(giddy girls) (I got a bifocal slant on this world which
was now making me giddy with names, dates, legends—
Henry Miller> prices rising at a dizzy rate) (the dizzy
multitude—Milton> Vertiginous retains in its extended
uses much of the connotation implicit in its basic relation to vertigo; it may come close to dizzy in its suggestion of lack of steadiness and constancy (inconstant they are in all their actions), vertiginous, restless, unapt to resolve of any business—Burton (his vertiginous, and apparently unconscious, changes of subject make heavy going after a few pages—Corke) or may attract a dizzying effect to the thing qualified (events occur at vertiginous speed, whole civilizations are summed up in a few words, and long processes are reduced to a paragraph if not to a sentence—Krutch) (the delicious vertiginous sense of human destinies hanging by slender threads—R. W. Brown) or it may stress a confusing effect like that of vertigo (that vertiginous bewilderment which comes to creatures of mere routine when they face the unfamiliar—Cohen) (the reader . . . is inspired with the conviction that of these writers only Austin Dobson, James Russell Lowell, and Miss Godden were really sane, that the rest of them were either actually mendacious or possibly vertiginous—Yale Review)

Swimming is applied especially to the head—brain, or eyes of a person suffering from dizziness; when so used, it suggests the physical sensations of swift, unimpeded, yet uncontrollable movement (my head is swimming) (and slowly by his swimming eyes was seen a lovely female face—Byron) (she yielded, and was borne with swimming brain and airy joy, along the mountainside—Bridges) Dazzled applies to the physical, mental, or spiritual vision when overpowered and confused by or as if by a blinding light; it connotes, therefore, an effect suggestive of dizziness but without the sensation of being about to fall (the sun's rays tapered into a luminous cone . . . a hypnotizing focal point for dazzled eyes—Beebe) (one knew that the sun-dazzled summer world would soon open about one again—Edmund Wilson) (the solicitations of the dazzled swains of Cambria for the honor of the two first dances—Peacock) (dazzled by the prospect of a brilliant future)

Ana whirling, reeling (see reel): confusing, adding, fuddling, muddling (see confuse): bewildering, distracting, confounding, addling, vertiginous, dizzy (see vertigo vb): bewildering, distract—swimming . . . dizzy (see dizzy vb): dizzy, dizziness (see dizziness), dizzy (see vertigo vb)

gift n 1 Gift, present, gratuity, favor, boon, largess are comparable when they denote something, often of value but not necessarily material, given freely to another for his benefit or pleasure. Gift is the most inclusive term, but it is not interchangeable with some of the others, for apart from the context the term carries no hint of remuneration for something done or received and excludes all suggestion of return (a birthday gift) (a gift to a museum) (gifts to the poor) (I fear the Greeks bearing gifts) (every good gift and every perfect gift is from above—Jas 1:17)

Present is ordinarily applied to something tangible which is offered as a compliment or expression of goodwill (she used to define a present, "That it was a gift to a friend of something he wanted or was fond of, and which could not be easily gotten for money"—Swift) (flowers and fruits are always fit presents—Emerson) (little odd presents of game, fruits, perhaps wine—Lamb) Gratuity implies voluntary compensation, usually in money, for some service for which there is no fixed charge or for special attention or service over and beyond what is normally included in a charge (he distributed gratuities so generously that he received more attention than any other guest of the hotel) (pays five or six dollars for his dinner in a smart Mayfair club and then distributes another dollar or so in gratuities—Joseph) Favor applies to something given or granted to another as a token of one's affection, regard, or partiality or as an indulgence or concession. The term is often intentionally vague, especially when what is given is not a concrete thing (he said he did not deserve so many favors from his party) (queen's favors might be fatal gifts, but they were much more fatal to reject than to accept—Henry Adams) Concretely the term applies to various small things (as a ribbon, a cockade, or a lady's glove) given to a lover or admirer as a token or to some knockknack or other trifle given to guests (as at a wedding, a dance, or a party). Favor, rather than gift, is used in requests for something that can be had only from the person addressed (ask the favor of a prompt reply) (begging the favor of a copy of his beautiful book—Meredith) boon applies to any gift or favor either as petitioned for or prayed for as something much desired or needed yet not necessarily regarded as a right (high emperor, upon my feeble knee I beg this boon, with tears not lightly shed—Shak.) (if you mean to please any people, you must give them the boon which they ask—Burke) (I ask justice from you, and no boon—Sheridan) or as given gratuitously and bringing with it such benefits or advantages that it is regarded as a blessing or cause for gratitude (our forefathers have given us the boon of freedom) (the boon of free and unbought justice was a boon for all—J. R. Green) (Corinth was given certain boons, since it was a Julian colony, but Athens . . . was left to academic decay—Buchan) Largess is a somewhat pompous term for a bountiful gift (as of money or of food and drink) or a liberal gratuity; it usually suggests an ostentatious bestowal (the newly consecrated king bestowed largesses on all the heralds and minstrels) (contrasting his [Anthony's] meager bounty with the largess of Octavius—Buchan) dependent for her livelihood on the largess of a moody Danish lover—Jean Stafford)

Ana *donation, benefaction, contribution, alms

2 Gift, faculty, aptitude, genius, talent, knack, bent, turn are comparable when they mean a special ability or a capacity for a definite kind of activity or achievement. Gift applies not only to an ability but also to a quality; it suggests an origin not easily explainable by natural laws and often implies that the recipient is favored by God, by nature, or by fortune. It is, therefore, precisely applied to an innate ability, capacity, or quality, especially to one not commonly found and not possible of acquirement (a gift of humor) (she has a real gift for arranging flowers—Wharton) (men have always reverenced prodigious inborn gifts, and always will—Eliot) (an artist is the sort of artist he is, because he happens to possess certain gifts—Huxley) Faculty (see also power 2) applies to either an innate or acquired ability or capacity; it does not apart from the context impute an extraordinary value or rarity to that power, but it does usually imply distinction or distinctiveness in its quality and skill or facility in its exercise (he had not that faculty of extracting the essence from a heap of statements—Dickens) (she seemed to have lost her faculty of discrimination; her power of easily and graciously keeping everyone in his proper place—Cather) Aptitude usually implies a natural liking and taste for a particular activity or pursuit as well as a native capacity for it and the ability to master its details or technique (there are all sorts of people today who write from all sorts of motives other than a genuine aptitude for writing—Ellis) (at fourteen education should begin to be more or less specialized, according to the tastes and aptitudes of the pupil—Russell) Genius, when it applies to ability or capacity rather than to a person who possesses that ability or capacity, suggests an inborn gift of impressive character or a combination of such gifts. Further than this the implications of the term are various and shifting, for the word is tied up in use with psychological, aesthetic, and critical explanations of the nature of genius; however, the
word often retains its original implication of a controlling spirit and may denote an inner driving energy which compels utterance or performance, often of a lofty or transcendent quality (the claim to possess a style must be conceded to many writers—Carlyle is one—who take no care to put listeners at their ease, but rely rather on native force of genius to shock and astonish—Quiller-Couch) (in the contemporary novel genius is hard to find, talent is abundant—Brit. Book News) The word is often employed in current English in the sense of gift, usually with a connotation of transcendence or of uniqueness (she made her drawing room a sort of meeting place; she had a genius for it—Woolf) (Mr. G. K. Chesterton has a genius for saying new and surprising things about old subjects—Huxley) In ironic use the connotation of transcendence is especially strong, but that of supreme unawareness is also usually evident (he has a genius for ineptness of remark) (the genius for illogicality of the English people—Inge)

Talent comes very close in its meaning to gift when the latter term denotes a native capacity or an innate ability. Talent, however, often carries the implication, derived from the Scriptural parable of the servants’ use of the talents (pieces of money) entrusted them by their master, that the gift is a trust and that its possessor has an obligation to develop it and put it to profitable use (it is quite probable that many . . . who would make the best doctors are too poor to take the course. This involves a deplorable waste of talent—Russell) (was he to leave such talents lying idle (and that after chafing for eight years to employ them)?—Bellow) This basic implication in talent has led inevitably to another implication: that the gift is under the control of its possessor because its proper exercise depends on industry and the acquirement of necessary knowledge and skill.

Talent is sometimes opposed to genius in the most exalted sense of that word as a lesser kind of power, capable of development through study and industry, completely under the control of the will, and tending to facilitate, agreeable, and effective, rather than exalted, performance or utterance (while talent gives the notion of power in a man’s performance, genius gives rather the notion of felicity and perfection in it—Arnold) (to achieve conspicuous mundane success in literature, a certain degree of good fortune is almost more important than genius, or even than talent—Benson) Knack stresses ease and dexterity in performance, though it usually implies an aptitude (she has, certainly, something of a knack at characters—Bunyan) (an uncommon knack in Latin verse—Eliot) (improvisation was his knack and forte; he wrote rapidly and much—sometimes an entire novel in a month—Van Doren)

Bent usually implies a natural inclination or taste; it often carries the same implications as aptitude and is sometimes preferred in general use because of technical use of aptitude in educational psychology (it doesn’t seem to me that you’ve shown any great bent towards a scholastic life—Archibald Marshall) (the bent thus revealed for precise observation and classification—Babbitt) Turn not only implies a bent but its actual proof in performance and often suggests skill or proficiency (he had a turn for mechanics; had invented a plow in his district, had ordered wheelbarrows from England—Woolf) (must possess . . . artistic sensibility and a turn for clear thinking—Clive Bell)

spontaneous flow of good spirits either as a result of feeling glad or happy or as a result of an equable disposition or of a naturally sanguine temperament (suicidal thoughts... could not enter the cheerful, sanguine, courageous scheme of life, which was in part natural to her and in part slowly built up—Ellis) (time went by as we drank and talked in a world that was rosy, cheerful, and full of fellowship and peace on earth—Hammett) Lighthearted stresses freedom from care, worry, and discontent. Since it also implies high spirits, vivacity, or gaiety, it commonly suggests in addition youth or an easygoing and somewhat volatile temperament (he whistles as he goes, lighthearted, wretched, cold and yet cheerful—Cowper) (why, man, I was lighthearted in my prime, I am lighthearted now; what would you have?—Browning) Joyful and joyous imply keen gladness or happiness with resulting elation; they are often used as though they were equivalent terms. However, joyful usually suggests a mood or an emotional reaction to an event or situation, and it implies rejoicing (in the day of prosperity be joyful—Eccles 7:14) (and joyful nations join in leagues of peace—Pope) (a joyful countenance) (a bright and happy Christian, a romping optimist who laughed away sin and doubt, a joyful puritan—Sinclair Lewis) Joyous, on the other hand, applies more to something which by its nature or character is filled with joy or is a cause of joy (all that ever was joyous, and clear, and fresh, thy music doth surpass—Shelley) (the happy and joyous temper, which characterizes a fresh and confident spirit—Inge) (that joyous serenity we think belongs to something which by its nature is filled with a better world than this—Sir Winston Churchill)

gourmet *epicure, bon vivant, gastronome, gourmand, glutton
govern, rule are comparable when they mean to exercise power or authority in controlling or directing another or others, often specifically those persons who comprise a state or nation. Govern may imply power, whether despotic or constitutional, or authority, whether assumed by force, acquired by inheritance or through election, or granted by due processes of law, but it usually connotes as its end the keeping of the one or ones directed or controlled in a straight course or in smooth operation, where perils are avoided and the good of the individual or of the whole is achieved {parents who cannot govern their children} <govern one's emotions> <every prince should govern as he would desire to be governed if he were a subject—Temple> {the [Roman] Senate was more than a modern constitutional monarch, reigning and not governing; it had a substantial amount of governing to its share—Buchan} <formulating the principles which should govern the creation of proletarian literature—Glicksberg> {as Matthew Arnold pointed out . . . educated mankind is governed by two passions—one the passion for pure knowledge, the other the passion for being of service or doing good—Eliot> {Rule is not always clearly distinguished from govern} <the territory is ruled by a high commissioner—Americana Annual> {Often it implies the power to lay down laws which shall determine the action of others or to issue commands which must be obeyed; it therefore commonly suggests the exercise of arbitrary power and is not ordinarily used of one that exercises authority over the people as an elected official {resolved to ruin or to rule the state—Dryden} <the country is ruled but not governed; there is little administration and much lawlessness—Pucke} <it's damnable to have to hurt the people we love—but, after all, we can't let our parents rule our lives—Rose Macaulay>

Ana kindnessliness, kindness, benignity, benevollency (see corresponding adjectives at kind): tenderness, compassionateness, responsiveness (see corresponding adjectives at tender): indulgence, forbearance, leniency (see under forbearing)

2 *elegance, dignity
Ana lovely, beautifulness or beauty, fairness, comeliness (see corresponding adjectives at beautiful), suppleness, liteness, lisomeness, lissomeness (see corresponding adjectives at supple): attractiveness, alluringness or allurement, charminess or charm (see corresponding adjectives under attrac)

Gracious, cordial, affable, genial, sociable are used to describe persons or their words or acts who or which are markedly pleasant and easy in social intercourse. Gracious implies kindliness and courtesy especially to inferiors. When it carries the latter implication, it more often suggests kindly consideration than condescension {gracious to everyone, but known to a very few—Cather} <heartened by her gracious reception of a nervous bow—Shaw> {cordial stresses warmth and heartiness} <a cordial welcome> <a cordial handshake> <be on cordial terms> <they gave us a cordial reception, and a hearty supper—Melville> {affable implies approachiability and readiness to talk in the person conversed with or addressed; when applied to a social superior, it sometimes connotes condescending familiarity but more often a gracious willingness to be friendly {I don't find . . . that his wealth has made him arrogant and inaccessible; on the contrary, he takes great pains to appear affable and gracious—Smollett} <his father was an excellent man . . . his son will be just like him—just as affable to the poor—Austen} <easy of approach and affable in conversation. They seldom put on airs—Maugham> {Genial} sometimes emphasizes cheerfulness and even joviality. Often, however, it stresses qualities that make for good cheer among companions (as warm human sympathy and a fine sense of humor) {a genial host} <he was neither fanatic and nor ascetic. He was genial, social, even convivial—Goldwin Smith> {sociable implies a genuine liking for the companionship of others and readiness to engage in social intercourse even with strangers or inferiors} {was genial and sociable, approachable at all times and fond of social intercourse—Reeves} {ana obligeing, complaisant, *amiable: benignant, benign, kindly, *kind: courteous, courtly, chivalrous (see civil) {ant ungracious—Con churlish, boorish (see under boor): brusque, curt, crusty, blunt, gruff (see bluff): surly, crabbed, *sullen

Gratitude n 1 class, grade, rank, rate, graduate

Gradation, shade, nuance are comparable when they mean the difference or variation between two things that are nearly alike. Gradation in the singular implies a small difference or variation of this kind, but the term is used more frequently in the plural, so that it usually implies the successive steps by which a thing passes from one type or kind into something else of a different type or kind; thus, if we take the primary colors of the spectrum as blue, yellow, and red, the gradations between these are not the colors green, orange, purple, which are clearly seen, but all of the intermediate colors by which blue gradually passes into green, and green into yellow, and yellow into orange, and so on; therefore the word is often modified by some adjective (as sensible, apparent, perceptible, or imperceptible) {the gradations between prose and verse are fine but perceptible} <by insensible gradations shae becomes slate> <by imperceptible gradations her love was transformed into pity> {shade} implies a minute or barely perceptible degree of difference (as in thought, belief, meaning, or position) {every shade of religious and political opinion—Macaulay} <discover fine shades of meaning in synonyms> Shade is also often used adverbially in this sense with comparatives of adjectives or adverbs to imply a degree of difference that is barely noticeable {he drew his chair a shade nearer} <his second attempt was a shade better than his first> {nuance}, though often interchangeable with shade, tends to stress even more the slightness or delicacy of the difference (as between musical tones, tints of color, or feelings) {I . . . think that there is a shade, a nuance of expression . . . which does imply this; but, I confess, the only person who can really settle such a question is M.
A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
concession ought to be—Burke> (as an instrument of mind-training, and even of liberal education, it [science] seems to me to have a far higher value than is usually conceded to it by humanists—Inge> (even his harshest critics concede him a rocklike integrity—Time>) One vouchsafes something prayed for, begged for, or expected as a courtesy, when one grants it to a person inferior in dignity or station. The word is often found in supplications where it implies humility in the suppliant <vouchsafe, O Lord: to keep us this day without sin—Book of Common Prayer>) Often it is ironical and then usually suggests absurd condescension <he vouchsafed no reply to our question> (the occasional answers that Stalin used to vouchsafe to inquiries from American correspondents—Davis>) One accords to something another admittedly his due or in keeping with his character or status <he treated bishops with the superficial deference that a sergeant major accords to a junior subaltern—Mackenzie>) <children . . . will readily accord to others what others accord to them—Russell>) One awards something that is deserved or merited; the word usually implies determination by legal adjudication or by judges in a contest or competition <the plaintiff was awarded heavy damages> (awards a prize for the best story—this victory was duly acclaimed by Senate and People; he was given the title of Imperator and awarded a triumph—Buchan>)

2 Grant, concede, allow are comparable when they are used to admit something in question, especially a point or contention of one's opponent in an argument. Grant usually implies voluntary acceptance in advance of proof in order to clarify the issues or to center attention on what are regarded as the main issues <I grant there is no obvious motive> (let us take his goodwill for granted>) (the consistency of arithmetic being granted, that of projective geometry follows—Sawyer>) Concede implies reluctant acceptance either before or after proofs have been advanced; it usually suggests the strength of the opponent's contention <he was unwilling to concede the supremacy of any group> (still less does he concede that the British have any claim to the gratitude of the inhabitants—Michael Clark>) Allow implies acceptance, but usually a somewhat qualified acceptance; it often suggests admission on the ground of apparent truth, logical validity, or reasonableness <even Wickham had allowed him merit as a brother—Austen>) (if one allows that it is impossible to define God in intelligible terms, then one is allowing that it is impossible for a sentence both to be significant and to be about God—Ayer>) (allowing that Harding was her first lover—S. H. Adams>)

Ana see those at graph n

graphic, vivid, picturesque, pictorial are comparable when they mean having or manifesting a quality or character that produces a strong, clear impression, especially a visual impression. All of these words apply particularly but not exclusively to works of art and especially of literature. Something graphic has the power to evoke a strikingly clear-cut, lifelike picture; the term categorizes such arts as painting, drawing, engraving, and etching (the graphic arts), the object of each of which is to present a picture, but it is also meaningfully applied to a representation of things in words (a graphic description of the face of a young Hindu at the sight of castor oil—Darwin>) (it is also one of the best-written works on the subject, enlivened by a keen sense of humor and a witty and graphic style—Ullmann>) Something vivid is so vigorously alive that it is felt, seen, heard, or otherwise apprehended with a sense of its intense reality. The term may apply to what actually exists and impresses itself with such sharp force on the imagination that the memory retains the sight, sound, or other impression (a vivid sensation of fear) (figures so vivid that they seem to breathe and speak before us—L. P. Smith>) (how sights fix themselves upon the mind! For example, the vivid green moss—Wood>) The term may also apply to a mental state or process of which one is oneself intensely aware (Ripon awoke . . . to the vivid consciousness of hunger—Meredith>) (my sense of right or wrong—of individual responsibility—was more vivid than at any other period of my life—Hudson>) (those for whom the belief in immortality is most vivid—Krutch>) or which defines its content clearly and sharply (a man of wide and vivid interests—Russell>) (a vivid realization of approaching danger) (all three had kept a vivid . . . conception . . . of what they believed to be the future—Harton>) Frequently the term applies to whatever represents itself or one's imaginative conceptions (as a picture, or a play, or a story) or to matters (as style, colors, language, or situations) which are involved in such a representation; then the implication is of a power, either in the representation itself or in the means of representation, to evoke clearly defined pictures and to give a strong sense of their distinct quality and of their living force (moving pictures are only less vivid than reflections from a mirror—Justice Holmes>) (in his odes, with their thunder of place-names, he [Horace] makes vivid the territorial immensity of the empire—Buchan>) Something picturesque has, in general, the qualities or the character which one believes essential to a striking or effective picture. The term is applicable to a place, a person, or a building or other construction (a picturesque costume—Scott's Meg Merrilies is a picturesque character) (a picturesque ruin) as well as to a work of graphic, literary, or plastic art (a picturesque landscape) (picturesque details) and to a style or manner (as in writing or painting) (the picturesque force of his style—Hawthorne>) and it carries in every use an implication that the thing has been observed and judged with regard for its form, color, atmosphere, striking or unfamiliar detail, or sharp contrasts rather than for qualities which are not perceptible to the eye or that do not draw the eye because they are lacking in distinctness and charm. Sometimes picturesque specifically implies a kind of wild, rugged beauty associated with untouched or undiscovered nature or with things being reclaimed by nature (wide prospects of startling beauty, rugged mountains, steep gorges, great falls of water—all the things that are sup- posed to be picturesque—Benson>) (a venerable family mansion, in a highly picturesque state of semidegradation—Peacock>) In still other contexts the term implies a charm arising rather from remoteness, strangeness, quaintness, informality, or diversity (though the upper part of Durnover was mainly composed of a curious congeries of barns and farmsteads, there was a less picturesque side to the parish—Hardy>) (the Square is rather picturesque, but it's such a poor, poor little thing!—Bennett>) (the most picturesque Mediterranean craft, with colored sails and lazy evolutions—Brownell>) Sometimes pictorial presents or aims to present a vivid picture; thus, the pictorial arts are the same as the graphic arts, but the emphasis is upon the objective rather than upon the medium; a pictorial style of poetry uses words as though they were

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
colors or pigments by which a vivid representation is produced (she has evidently been very anxious to maintain the tradition of picturesqueness in biography that Strachey founded, and in many places is more than picturesque, is in fact pictorial—Times Lit. Sup.) <he made pictorial drama out of the most commonplace intimacies of French bourgeois home life—Soby>

**greed** *cupidity, rapacity, avarice

**Ana greediness, covetousness, avariciousness, acquisitiveness (see corresponding adjectives at COVETOUS): voraciousness, ravenousness, rapaciousness, gluttonousness or gluttony (see corresponding adjectives at VORACIOUS)

**Con prodigality, lavishness, exuberance (see corresponding adjectives at PROFUSE): bountifulness, bounteousness, openhandedness, munificence, generousness or generosity, liberality (see corresponding adjectives at LIBERAL)

**greedy** *covetous, acquisitive, grasping, avaricious

**Ana rapacious, ravening, ravenous, *voracious, gluttonous: *stingy, parsimonious, miserly, close, closefisted

**Con bountiful, bounteous, openhanded, generous, *liberal, munificent: prodigal, lavish, exuberant, *profuse

**green** adj callow, raw, crude, *rude, rough, uncouth

**Ant experienced: seasoned—Con grown-up, ripe, matured, *mature: trained, instructed, educated (see TEACH): *proficient, skilled, skillful

**greet** salute, hail, *address, accost

**greeting, salutation, salute** denote the ceremonial words or acts of one who meets, welcomes, or formally addresses another. Greeting is the ordinary term which carries no suggestion of formality and no implication of inferiority in the one who greets or of superiority in the one who is greeted. On the contrary, the term usually suggests friendliness or goodwill or lack of concern for social or official inequalities (O, to what purpose dost thou hoard thy words, that thou return'st no greeting to thy friends?—Shak.) <why we meet on the bridge of Time to change one greeting and to part?—R. F. Burton> Salutation applies to a more or less formal phrase, gesture, or ceremonial act whereby one greets another; specifically it applies to such phrases as the conventional "How do you do" or the familiar "Hello," or to the words of a letter with which the writer first directly addresses his correspondent, or to such acts as a kiss, an embrace, or a bow. Salute is the only one of these words that applies only to gestures determined by convention or to ceremonial acts: though it seldom applies to a speech, it may be used when to the gesture or act a word or two is added (waved a salute to the friends awaiting his arrival) <the presidential salute of twenty-one guns> <the officer returned his subordinate's salute> <Sir Austin bent forward, and put his lips to her forehead. Carola received the salute with the stolidity of a naughty doll—Meredith>

**gregarious** *social, cooperative, convivial, companionable, hospitable

**grief** *sorrow, anguish, woe, heartache, heartbreak,
grim 1 Grim, implacable, relentless, unrelenting, merciless

mourn, sorrow mean to feel or express one's grief, grievance

Ana rejoice

Ant lenient

one to relent and to restrain through compassion the fury or violence of one's rage, hatred, hostility, or vengeance<br>

Merciless differs from relentless and unrelenting mainly in stressing an innate capacity for inflicting cruelty without qualms or an unparalleled fierceness or savagery; otherwise it carries much the same implications (a merciless whipping)<br>

lament, lamentation, bewailing, bemoaning, deploring<br>

(See corresponding verbs at DEPLORE)<br>

Con comforting or comfort, solacing or solace, consolation<br>

(See corresponding verbs at COMFORT)<br>

grievance wrong, *injustice, injury

Ana hardship, rigor (see DIFFICULTY): *trial, tribulation, affliction, cross<br>

Ant analogous words

See also explanatory notes facing page 1
comical, comic, droll (see laughable)

**ground n** 1 *base, basis, foundation, groundwork
*Ana* *background, backdrop
2 *reason, argument, proof
*Ana* *evidence, testimony: determinant, *cause, antecedent, demonstration, proof, trial, test (see under **prove**)
3 In plural form **grounds** *deposit, precipitate, sediment, dregs, lees

**ground vb** *base, found, bottom, stay, rest
*Ana* establish, fix, settle, *set: *implant: sustain, *support, buttress

**groundless** *baseless, unfounded, unwarranted
*Ana* unsupported, unsustained (see corresponding affirmative verbs at **support**)

**groundwork** foundation, basis, ground, *base
*Ant* superstructure

**group n** Group, cluster, bunch, parcel, lot mean a collection or assemblage of persons or of things. Group implies some unifying relationship, however tenuous (as a similarity of activity, of purpose, or of nature), and ordinarily a degree of physical closeness (*a group waiting for the bus*) (*the group of workers unloading the cargo*) (*a group of partisans*) (*a group of soldiers in the picture*) (*can man only make progress in cooperative groups—Bagehot*) (*a group of statues in the museum*) (*a group of islands*) (*an ethnic group*)

Cluster basically refers to a group of things (as fruits or flowers) growing closely together (*a cluster of grapes*) (*climbing roses producing clusters of flowers*)

In extended use the term may be applied to persons or things that form distinguishable groups and especially smaller groups within larger masses (*the people at the reception gathered in clusters*) (*clusters of small yachts in the harbor*) (*cATALOGING THE CLUSTERS OF STARS*) (*Clem Henry's house was in a cluster of Negro cabins below Arch's big house—Caldwell*) (*Bunch* (see also **bundle**) often replaces **cluster** in referring to natural groups of certain edible fruits (as grapes or bananas). In its extended use it implies a natural or homogeneous association of like persons or things and carries a weaker implication of a common origin or point of growth than **cluster** usually does (*Clark is by far the best swimmer of the bunch*) (*a bunch of keys*) (*girls with bunches of streamers which they flicked in your face as you passed—Bennett*) (*a piece about a bunch of hillbillies in the South, each one almost precisely as crazy and lovable as the next—Gibbs*)

**Parcel** and **lot** refer to a separate or detached collection of persons or things. **Parcel** in this sense (see also **part, bundle**) usually carries some implication of disapproval of the thing so grouped (*a parcel of lies*) (*became merely a . . . parcel of tricks—Binyon*) (*lessons to a parcel of young girls thumping out scales with their thick fingers—Galsworthy*)

**Lot** applies to persons or things that are associated or should for one reason or another be thought of or treated as a whole (*the auctioneer sold the books in lots*) (*the men in this battalion are an interesting lot*) (*the future generation of scientists will be a sorry lot if the best teachers leave the academic circles—Rabi*) (*till you have read a good lot of the Fathers—Keble*) (*I could ignore the fuzzy doings on the screen, knowing that if you have slept through one you've slept through the lot—Malcolm*)

When the plural is used, the idea of grouping is lost or obscured and the implication of numbers or quantity increases (*I have lots of time for that*) (*there were lots and lots of children there*)

*Ana* *company, party, band, troop, troupe: set, circle, coterie, clique: *crowd, mob, horde

**grovel** *wallow, welter
*Ana* *fawn, cringe, cower, toady, trucule: crawl, *creep;

**growl** *bark, bay, howl, snarl, yelp, yap
*Ana* *threaten, menace: *irritate

**grown-up** adult, *mature, matured, ripe, mellow
*Ant* childish: callow

**grub** *dig, delve, spade, excavate

**grudge vb** begrudge, envy, *covet
*Ana* *deny: refuse (see **decline**

**grudge n** *malice, ill will, malevolence, spite, despite, malignity, malignancy, spleen
*Ana* disanimus, antipathy, animosity, rancor (see **enmity**): *hate, hatred: grievance, *injustice, injury

**gruesome** macabre, *ghastly, grisly, grim, lurid

**Ana** daunting, appalling, horrifying (see **dismay vb**): horrendous, horrific, *horrible: baseball, *sinister

**gruff** crusty, brusque, blunt, curt, *bluff
*Ana* surly, morose, *sullen, saturnine, crabbed, dour: churlish, boorish (see under **boor**): truculent, *fierce
*Con* *suave, urbane, bland, smooth: unctuous, oily, slick, soap, *fusible

**guarantee n** Guarantee, guaranty, surety, security, bond, bail are comparable when they mean either something that is given or pledged as assurance of one's responsibility (as for the payment of a debt, the fulfillment of a promise or obligation, or the performance of a duty) or the person who accepts such responsibility and gives or pledges something by way of assurance. **Guarantee** and **guaranty** generally imply acceptance and especially contractual acceptance of this responsibility for another in case of his default; they may, however, imply an agreement to ensure for another the possession or enjoyment of a right, privilege, or prerogative. The words may be used interchangeably not only of something given as a pledge or guarantee of the person making the pledge but also of the contract or promise accepting the responsibility or obligation. In idiomatic use, however, they are often distinguished, **guarantee** being more often applied to the person and **guaranty** the preferred term for the contract or promise; either word is acceptable as a designation for what is given or pledged (*stand guarantee*) (*the small nations begged for guarantees against invasion*) (*his parents gave a guarantee for his good behavior*) (*he even threatened the King of England with interdict, if, as guarantee of the treaty, he should enforce its forfeiture—Milman*)

Many laws which it would be vain to ask the Court to overthrow could be shown, easily enough, to transgress a scholastic interpretation of one or another of the great guarantees in the Bill of Rights—Justice Holmes) **Surety** and security stress provision for the protection of a person who is in a position to lose by the default of another. Both words are employable as designating either the person who accepts the responsibility or the money or property turned over to be forfeited in case of default. However, **surety** is the usual term for the person or corporation that serves as guarantee or guarantor for another, and security for the money, property, or certificates of ownership turned over to a creditor, beneficiary, or obligee or hypothecated for a loan and forfeitable in the case of one's own or another's default (*every employee handling money is obliged to find a surety*) (*a contractor provides a surety (as an insurance corporation) for his performance of a job according to the terms of the contract, but he gives security to the bank that loans him money to begin the job*) (*unsureg debts are those for which no security has been given to the creditors*) Though **guarantee** and **surety** usually imply a legal status and documentary proof of that status, they are also subject to more general use in which no such proof is implied, and they come close to **certainty** or **assurance** in
meaning <devoted exclusively to clocks, watches, and the
telling of time . . . a museum has a virtual guarantee of
popularity—Kirby> <modern men have the additional
surety of Christ the mediator—Bush> Bond implies docu-
mentary proof of one's acceptance of an obligation and a
legally binding promise to repay the holder of that docu-
ment a sum of money due him on one's own account or in
case of the default of another for whom one serves as
surety. Bond, therefore, is used either of the document
which is given as a pledge <government bonds> <give a
bond as proof of one's suretyship> <his word is as good
as his bond> or for the person or corporation that serves
as a legally bound surety <go bond for another> <the King
of England shall be bond for him—Pepys> Bail implies
responsibility for the sure reappearance, at the time pre-
scribed by the court, of a prisoner who has been released
from jail pending his trial. The term is applicable to the
security given and forfeitable if the prisoner does not return
<the court asked $5000 as bail> <the prisoner was not
released because the bail was not forthcoming> or to the
person serving as surety and providing the security
<sirrah, call in my sons to be my bail—Shak.> <his bail
produced him in court at the appointed time> or to the
state of being out of prison and in the custody of a surety
<admit to bail> <be out on bail>
Ana *pledge, earnest, token: guarantor, surety (see
SPONSOR)
guarantor surety, *sponsor, patron, backer, angel
Ana *guarantee
guaranty *guarantee, surety, security, bond, bail
Ana *pledge, earnest, token: *contract, bargain
guard vb shield, protect, safeguard, *defend
Ana watch, attend, *tend, mind: convoy, escort, chaper-
on, conduct, *accompany
guerdon reward, meed, bounty, award, prize, *premium,
bonus
guess vb *conjecture, surmise
Ana speculate, *think, reason: imagine, fancy (see
THINK): gather, *infer, deduce: estimate, reckon (see
CALCULATE)
guess n conjecture, surmise (see under CONJECTURE vb)
Ana *hypothesis, theory: belief, *opinion, view
Ant certainty
guest *visitor, caller, visitant
guide vb Guide, lead, steer, pilot, engineer are comparable
when meaning to direct a person or thing in his or its
course or to show the way which he or it should follow.
Guide usually implies assistance either by means of a
person with intimate knowledge of the course or way and
of all its difficulties and dangers <some heavenly power
guide us out of this fearful country—Shak.> <how shall I
tread . . . the dark descent, and who shall guide the way?—
Pope> <men who guide the plough—Crabbe> <the
teacher, the parent, or the friend can often do much . . . to
guide the pupil into an enjoyment of thinking—Eliot> or
by means of something (as a light, the stars, a principle, or
a device on a machine) which prevents a person or thing
from getting off course or going astray <the fine taste
which has guided the vast expenditure—Disraeli> <a
vehement gloomy being, who had quitted the ways of vul-
gar men, without light to guide him on a better way—
Hardy> Lead stresses the idea of going in advance to
show the way and, often, to keep those that follow in order
or under control <a band led each division of the proces-
sion> <the flagship led the fleet> <he longed . . . to lead
his men on to victory—Maryaty> <this influence should
rather lead than drive—Eliot> Often, especially in idiom-
atic phrases, lead implies the taking of the initiative, the
giving of example, or the assumption of the role of leader,
director, or guide <he . . . allured to brighter worlds, and
led the way—Goldsmith> <lead people astray by giving
them a bad example> <led the van in solving problems
"susceptible of certain knowledge"—Sellery> Steer stresses
the guidance by one able to control the mechanism
which determines the course or direction (as of a boat,
an automobile, an airplane); it carries a stronger impli-
cation of governing or maneuvering than any of the preceding
terms <steer a ship safely through a narrow channel>
<fortune brings in some boats that are not steered—Shak.>
<I eagerly desire to steer clear of metaphysics—Lowes>
<secure in the faith that his reasoned intelligence will
steer him correctly at all times—H. N. Maclean> Pilot
implies the assistance of a person competent to steer a
vessel safely through unknown or difficult waters (as into
or out of a port) <pilot a vessel through Ambrose Channel
into New York harbor> In its extended use it implies
guidance over a course where one may easily lose one's
way because of its intricacy or may run afoot of various
obstacles or dangers <their room steward piloted them to
the ship's dining room> <we know not where we go, or
what sweet dream may pilot us through caverns strange
and fair of and pathless passion—Shelley> <piloting
important bills through the Senate—Current Biog.>
Engineer means to lay out and manage the construction of
some project (as a tunnel under a river, a highway,
or a bridge <a firm of experts was called upon to engineer
the irrigation project> but in its more common extended
sense it means to serve as a manager in carrying through
something which requires contrivance and maneuvering
<engineer a resolution through the House of Repre-
sentatives> <engineer an elaborate fraud> <the corner
in grain engineered by parties in Chicago—Gould> <the
coup d'état was engineered by high-ranking army officers>
Ana conduct, convoy, escort, chaperon, *accompany:
direct, manage, control, *conduct
Ant misguide —Con distract, bewilder, perplex, mys-
tify, *puzzle: mislead, delude, beguile, *deceive
guile n duplicity, dissimulation, cunning, *deceit
Ana trickery, double-dealing, chicanery, chicane, *de-
cession; craft, artifice (see ART)
Ant ingenuousness: candor
guileful *sly, cunning, crafty, tricky, foxy, insidious, wily,
artful
guilt *blame, culpability, fault
Ana sin, crime, *offense: responsibility, answerability,
liability (see corresponding adjectives at RESPONSIBLE)
Ant innocence: guiltlessness
guilty *blameworthy, culpable
Ana *responsible, answerable, accountable: indicted,
impeached, incriminated (see ACCUSE)
Ant innocent
gulf, chasm, abyss, abyss basically denote a hollow place
of vast width and depth in the earth. Gulf and chasm sug-
gest a depth which, though vast, is still measurable;
abyss and abyss suggest immeasurable depth. Gulf is the
most general term and may properly be used of any wide
and deep hollow place <slippery cliffs arise close to deep
gulfs—Bryant> In its extended use gulf suggests separa-
tion by a great, often unbridgeable distance <the broad and
wide water because of its intricacy or may run afoul of various
obstacles or dangers <their room steward piloted them to
the ship's dining room> <we know not where we go, or
what sweet dream may pilot us through caverns strange
and fair of and pathless passion—Shelley> <piloting
important bills through the Senate—Current Biog.>
Engineer means to lay out and manage the construction of
some project (as a tunnel under a river, a highway,
or a bridge <a firm of experts was called upon to engineer
the irrigation project> but in its more common extended
sense it means to serve as a manager in carrying through
something which requires contrivance and maneuvering
<engineer a resolution through the House of Repre-
sentatives> <engineer an elaborate fraud> <the corner

Ant innocent
gulf, chasm, abyss, abyss basically denote a hollow place
of vast width and depth in the earth. Gulf and chasm sug-
gest a depth which, though vast, is still measurable;
abyss and abyss suggest immeasurable depth. Gulf is the
most general term and may properly be used of any wide
and deep hollow place <slippery cliffs arise close to deep
gulfs—Bryant> In its extended use gulf suggests separa-
tion by a great, often unbridgeable distance <the broad and
deep gulf which . . . divides the living from the dead—
Inge> (a mere physical gulf they could bridge . . . but the
gulf of dislike is impassable and eternal—Shaw> Chasm
adds the implication of a deep and sometimes wide breach
in a formerly solid surface <the chasm of the Grand Can-
yon, worn by the Colorado river> <the brink of a precipice,
of a chasm in the earth over two hundred feet deep, the
sides sheer cliffs—Cather> In extended use chasm still
stresses a sharp break in continuity <those chasms of
momentary indifference and boredom which gape from time to time between even the most ardent lovers—Huxley> Abysm and abyssy may designate the bottomless gulf or cavity of ancient cosmogonies and both have been applied to hell when thought of as a bottomless pit; in other applications they usually connote not only fathomlessness but also darkness and horror. Abyss is somewhat old-fashioned (when my good stars . . . have emptied their orbs, and shot their fires into the abyss of hell—Shak.) what seest thou else in the dark backward and abyss of time?—Shak.> Abyss is commoner in modern usage (the abyss of Tartarus, fast secured with iron gates—Thirlwall) and, like abyss, it carries over into its extended uses the notion of vast, immeasurable void (the respectability and prosperity of the propertied and middle classes who grew rich on sweat labor covered an abyss of horror—Shaw)
gull vb *dupe, befool, trick, hoax, hoodwink, bamboozle Ana delude, beguile, deceive, mislead, double-cross, betray gullibility credulity (see under CREDULOUS) Ant astuteness gullible *credulous

habit

1 Habit, habitude, practice, usage, custom, use, wont are comparable when they mean a way of behaving, doing, or proceeding that has become fixed by constant repetition. These words may be used also as collective or abstract nouns denoting habits, usages, or customs, considered as a directing or compelling force. Habit refers more often to the way of an individual than to the way of a community or another group; the term applies to a way of behaving (as in acting or thinking) which has become so natural to one through repetition that it is done unconsciously or without premeditation <he has formed the habit of fingering a coat button when he speaks in public> <break a bad habit> <habits acquired very early feel, in later life, just like instincts; they have the same profound grip—Russell> it was her habit to write chatty letters to a number of politicians . . . discussing with them the maneuvers of politics—R. P. Randall> we have two opinions: one private . . . and another one—the one we use—which we force ourselves to wear to please Mrs. Grundy, until habit makes us comfortable in it—Mark Twain>

Habitude more often suggests an habitual or usual state of mind or attitude than an habitual response to a given stimulus <I think, Pericles, you who are so sincere with me are never quite sincere with others. You have contracted this bad habitude from your custom of addressing the people—Landor> the sense of fitness and proportion that comes with years of habitude in the practice of an art—Cardozo>

Practice (see also practice n under PRACTICE vb) applies to a habit which is by its nature an act or a method which is followed regularly and often by choice it is his practice to rise early each morning and take a walk before breakfast it is the practice of this surgeon to give local anesthetics wherever possible the team made a practice of leaving their scenarios unfinished until actual production—Current Biog.>

Usage (see also FORM 3) applies mainly to a practice that has been so long continued and has been adopted so generally that it serves to guide or determine the action or choice of others it is the usage in certain European countries to breakfast on a roll and a cup of coffee the . . . inveterate usages of our country, growing out of the prejudice of ages—Burke makes it difficult . . . to earn a living in a business community without yielding to its usages—W. H. Hamilton>

Specifically, in reference to the meanings of words, grammatical constructions, and idiomatic forms where there is a difference of opinion, usage implies the long-continued and established practice of the best writers and speakers as the determining factor <all senses of all words are founded upon usage, and nothing else—Paley> Custom applies to a habit, practice, or usage that has come to be associated with an individual or a group by reason of its long continuance, its uniformity of character, and, sometimes, its compulsory nature it is his custom to smoke each evening after dinner in contemporary society it is not a fashion that men wear trousers; it is the custom—Sapir> is it the custom in your church for the minister to greet each member of his congregation? it is not the custom to speak from the floor before being recognized by the presiding officer> Often custom denotes an established practice or usage or the body of established practices and usages of a community or of a people that has the force of unwritten law; thus, the English common law is based upon custom rather than upon legislation the answer, “It is the custom,” is final for the savage, as for the lady of fashion. There is no other reason why they behave in a certain way—Inge> Consequently, custom when used as a collective or abstract noun commonly implies a force as strong, as binding, and as difficult to escape as that exerted by those who enforce the law of the land and custom lie upon thee with a weight, heavy as frost, and deep almost as life—Wordsworth>

Use (see also use n 1) commonly denotes an action, manner, rite, or practice that is customary to an individual or a particular group and distinguishes him or it from others <more haste than is his use—Shak.> it had been a family use . . . to make a point of saving for him anything which he might possibly eat—Mary
habitation, *analogous words

*Austen* <change and turmoil . . . are surface phenomena, while, underneath, life is an affair of use and wont and persists substantially unchanged—*Moebly*>

Wont usually applies to a habitual manner, method, or practice distinguishing an individual or group; it not only differs little from use except in its narrower range of application but is often coupled with use as a term of equivalent content <the painter followed the religious use and wont of his time—*Oliphant*>

sad beyond his wont—*Tennyson*>

Renan . . . begins after the romantic wont by an outburst of sympathy and comprehension for the Parthenon and the Athenians and Pallas Athene—*Babbitt*>

Ana instinc{t (see under INSTINCTIVE): convention, convenience, usage, *form

2 *physique, build, constitution

Ana *body, carcase: *structure, anatomy, framework: figure, *form, shape: *outline, contour

habitat, biotype, range, station are comparable in their technical biological senses in which they agree in denoting the place in which a particular kind of organism lives or grows. Habitat refers especially to the kind of environment (as desert, seacoast, grassland, marsh, or forest) in which an animal naturally grows or lives and throughout which it is distributed. Bio- types are in the pastoral region, and the habita tions are in the agricultural and is natural that for a single family or individual, often as opposed to a place (as farm, village, or a nation) where one lives and in such use carries specific legal implications (as of being the seat of one’s principal and permanent home and therefore the place where one has a settled connection for such important legal purposes as determination of civil status and jurisdiction to impose personal judgments and taxes) in which it is often specifically contrasted with residence <the term “domicile” has been defined by the courts of one state as follows: “The domicile of a person is where he has his permanent home and principal establishment, to which, whenever he is absent, he intends to return—*Ackerman*>

Domicile in reference to a building carries no special connotations <grandfather’s domicile was considered an architectural curiosity; it was an oversized log cabin with a second story reached by an outside staircase—*Burkley*>

In wider reference to a place it may be quite neutral (with the advance of astronomy, the domicile of the Deity had been transposed to the unknown center of the universe—*S. F. Mason*) or it may have very definite legal implications (as of being the seat of one’s principal and permanent home and therefore the place where one has a settled connection for such important legal purposes as determination of civil status and jurisdiction to impose personal judgments and taxes) in which it is often specifically contrasted with residence <the term “domicile” has been defined by the courts of one state as follows: “The domicile of a person is where he has his permanent home and principal establishment, to which, whenever he is absent, he intends to return—*Ackerman*> domicile is not to be confused with residence. It is of a far more permanent nature, as where a man establishes a home in a jurisdiction with the intention of remaining there more or less permanently. The six weeks’ residence in Reno, with which we are all familiar, does not establish legal domicile if the residence is solely for the purpose of obtaining a divorce—*Payton*>

Home, like the foregoing terms, is used either of a structure or a place of residence or sometimes of origin <had lived in New York for years but still thought of Georgia as his home> <built a home in the new section of town> but of all these terms home distinctively conveys the notion of one’s dwelling as the seat and center of family life and the focus of domestic affections <without hearts there is no home—*Byron*>

some women can make a truer home of a shanty than others can of a mansion> Unlike the other terms house is not used of a place as distinct from a structure; basically it applies to a building used or intended for use as a dwelling place and, especially as compared with home, is a very general and neutral term; thus, a landlord’s house may become the home of a tenant <a speculative builder of houses>

habitual *usual, customary, wonted, accustomed

Ana habituated, addicted (see HABITUATE): practiced, drilled (see PRACTICE vb): confirmed, *invertebrate, chronic, deep-seated, deep-rooted

Ant occasional —Con *infrequent, sporadic, rare, uncommon

habituate, accustom, addict, inure mean to make something. Habituate distinctively implies the formation of habit through repetition <by constant practice she habituated herself to accurate observation> to habituate ourselves, therefore, to approve . . . things that are really excellent, is of the highest importance—*Arnold*>

Language blunter than the protected executive ears were habituated to—*S. H. Adams*>

A generation habituated to regard properly inscribed paper as the principal, if not the only, symbol of wealth—*G. W. Johnson*>

Accustom implies adjustment to something by frequent or protracted experience or by constant exposure <accustom oneself to cold>

A generation habituated to regard properly inscribed paper as the principal, if not the only, symbol of wealth—*G. W. Johnson*>

Accustom implies adjustment to something by frequent or protracted experience or by constant exposure <accustom oneself to cold>

Accustom students to severe criticism <this opportunity to accustom the girl to sea life by a comparatively short trip—*Conrad*>

To accustom oneself to nagging is to become inured to nagging by another person; to habituate oneself to nagging is to form the habit of nagging others. Sometimes accustom also connotes reconciliation by
overcoming one's resistance or distaste (gradually accustomed his ears to the din of the factory) Addict, which is used chiefly in a reflexive construction or in the passive, adds to habituate the implication of overindulgence or surrender to inclination (the Japanese as a nation are addicted to sight-seeing—Faubion Bowers) (addicted to study) he has always . . . been addicted to prefacing his poems with quotations and echoing passages from other poets—Edmund Wilson (and frequently refers to bad habits addicted to gambling (a man gross . . . and addicted to low company—Macaulay) Hugh tried to protest and to explain that he was not addicted to the habit of drinking—Anderson and specifically to compulsive use of habit-forming drugs. Inure is a somewhat formal word that is a close synonym of accustomed (a man inured to hard physical labor—G. W. Johnson) but distinctively it may suggest a becoming callous or indifferent as a result of repeated exposure (for men's minds have been inured to situations of measurable and surmountable danger—Romulo) A afraid that reality could not be endured unless the mind had been gradually inured to it—Krugch Ana train, discipline, school (see teach): *harden, season, acclimatize, acclimate: *practice, exercise, drill habituate *habit, practice, usage, custom, use, wont Ana attitude, stand, *position: *state, condition, situation Con *mood, humor, temper: *caprice, whim, freak, vagary habitué *addict, votary, devotee hack adj hireling, *mercenary, venal Ana toiling, drudging, grinding, laboring (see corresponding nouns at work): hired, employed (see hire vb): *mean, abject, sordid hackneyed *trite, stereotyped, threadbare, shopworn Ana antiquated, archaic, obsolete, antediluvian, *old: worn, wasted (see HAGGARD): attenuated, diluted (see thin vb) Con fresh, novel, original, *new Hadean chthonian, *infernal, Tartarean, stygian, hellish haggard, worn, careworn, pinched, wasted, cadaverous are comparable when they mean thin and drawn by or as if by worry, fatigue, hunger, or illness. Haggard may imply a wild frightening appearance (as of a person driven distraught by fear, anxiety, privation, or suffering) whose haggard eyes flash desperation—Cowper (the strong face to which that haggard expression was returning—Conrad) she stood at the door, haggard with rage—Joyce but it usually also implies an extreme thinness or wasted or pinched wasted body of a consequence of privation or of a wasting disease (pinched faces of poorly nourished children) (the wasted body of a consumption) thought he looked pinched and cold—Carter Cadaverous is often used in place of pinched or wasted when there is the intent to suggest the appearance of a corpse; it usually implies a deathly paleness and an extreme emaciation so that the skeleton is apparent though not visible he has a cadaverous countenance, full of cavities and projections—Irving (for a queer second I did see us all in that . . . mirror . . . cadaverous, palsied—L. P. Smith) Ana gaunt, scrawny, skinny, *lean: fatigued, exhausted, wearied, flagged, jaded (see tire vb): wan, pallid, ashen, *pale Con *vigorous, lusty, energetic, strenuous hail vb salute, greet, *address, accost halcyon *calm, serene, placid, tranquil, peaceful hale adj robust, *healthy, sound, wholesome, well Ana lusty, *vigorous: sturdily, stalwart, *strong, stout: spry, *agile Ant infirm —Con feeble, frail, fragile, decrepit, *weak hale vb haul, *pull, draw, drag, tug, tow hall, hallway *passage, passageway, corridor, gallery, arcade, cloister, aisle, ambulatory hallow vb consecrate, dedicate, *devote Con see those at consecrate hallucination *delusion, mirage, illusion Ana *apparition, phantasm, phantom, wraith: fantasy, *fancy, vision, dream, nightmare hamper vb Hamper, trammel, clog, fetter, shake, manacle, hog-tie are comparable when meaning to hinder or impede one so that one cannot move, progress, or act freely. To hamper is to encumber or embarrass by or as if by an impediment or restraining influence (the long dress hampered her freedom of movement) (the view is vigorously urged today that rhyme and meter hamper the poet's free expression—Lowes) (never . . . had she so desired to be spontaneous and unrestrained; never . . . had she so felt hampered by her timidity, her self-criticism, her deeply ingrained habit of never letting herself go—H. G. Wells) To trammel is more specifically to entangle or confine as if enmeshed in a net (people whose speech and behavior were trammeled . . . by the usages of polite society—Gibbs) (their life was at once dangerously trammeled and dangerously free—Buchan) To clog is to hamper the movement, often the ascent, of someone or something by something extraneous, encumbering, or useless (the wings of birds were clogged with ice and snow—Dryden) man is ever clogged with his mortality—Bromfield (the Cynic preached abstinence from all common ambitions, rank, possessions, power, the things which clog man's feet—Buchan) To fetter is to confine or restrain so that one's freedom or power to progress is lost I refused to visit Shelley that I might have my own unfettered scope —Keats (we reverence tradition, but we will not be fettered by it—Inge) watched a world prepare for war while he was fettered by the nation's propensity for isolationism—Kefauver To shake and to manacle differ little in their extended use, both implying such interference with one's freedom that one feels that movement, progress, or action is impossible if the bonds are not broken (he would not be shackled in his reasoning by the rules of logic) (grief too can shackle and to manacle differ (fettered while he was) was soon as the senator can get us hog-tied by restrictions on imports of raw materials) (as soon as the senator can get us hog-tied to that extent, he will not be able to see those at Congress—Congressional Record) Ana hinder, impede, obstruct, block, bar: *embarrass, discomfit: baffle, balk, thwart, foil, *frustrate Ant assist (persons): expedite (work, projects) hand n operative, workman, workingman, laborer, crafts-
handicap

1. handle, manipulate, wield, swing, ply are comparable when they mean to deal with or manage with or as if with the hands typically in an easy, skillful, or dexterous manner. **Handle** implies the acquirement of skill sufficient to accomplish one’s ends (a child can be taught early to handle a spoon, but it takes longer to teach him to handle a knife and fork) (*tools to be handled with care—T. S. Eliot*) (he knows how to handle men so as to get what he wants out of them) (Richelieu sent Charnacé out to handle that situation—Bellloc) **Manipulate** implies dexterity and adroitness in handling. Especially in its basic sense the term suggests mechanical or technical skill (able to manipulate the most delicate scientific apparatus) (the kind of courage required for mountain-climbing, for manipulating an airplane, or for managing a small ship in a gale—Russell) In its extended sense the term often specifically implies crafting or artful and sometimes fraudulent handling for the attainment of one’s own ends (a small group of doctors by manipulating the convention were able to procure the nomination of their candidate) (agencies by which some human beings manipulate other human beings for their own advantage—Dewey) **Wield** in its most common sense implies mastery and vigor in the handling of an implement (as a tool or weapon) (he knows how to wield an axe) (wield a sword) (navvies wielding their hammers in the streets—Ellis) Wield also may be employed with reference to such an instrument as a writer's pen, an artist's brush, or a king's scepter to imply not the vigorous movement of the implement itself but its effectiveness as a tool in producing a desired result or as a symbol of power; thus, to wield a scepter means to exercise sovereign power or to hold sway (of Wu Tao-tzu it is said that as if a god possessed him and wielded the brush in his hand—Binyon) The term may also take for its object such words as authority, influence, or power when their masterful exercise is implied (a great editorial writer wields a tremendous influence over the minds of men) (her newborn power was wielded . . . by unprincipled and ambitious men—De Quincey) **Swing** may be used in place of wield when a flourishing with a sweep is also suggested (he swings his golf club with great effectiveness) In extended and often informal use it may mean to handle successfully, often in spite of great difficulties (can swing 20,000 workers behind the Party line—Arke) (the corporation was able to swing its bond issue) (he could not swing the deal) Ply may be used in place of handle or wield when great diligence or industry are also suggested (go ply thy needle; meddle not—Shak.) (plying patiently the chisel and mallet—Montague) (plied his oars) The term may also be used when constant and dillgent employment (as of a power or faculty or at a trade) is also suggested (the housewife plied her own peculiar work—Wordsworth) (plying his trade as a bookseller)

harbor n Harbor, haven, port are comparable because they have at one time or another meant a place where ships may ride secure from storms. Harbor applies to a portion of a large body of water (as the sea) that is partially or almost wholly enclosed so that ships or boats may enter it for safety from storms or may be anchored or moored there in security (two promontories whose points come near together enclose the harbor) (the great natural harbor at Sydney, Australia). In extended uses harbor carries over the notion of quiet and safety inherent in its basic use (the beauty and the harbor of a snug house—Le Sueur). Haven is chiefly literary or occurs in names of towns and cities where a natural harbor (as a bay, an inlet, or a river mouth) exists and where boats may go for safety during a storm (Mildford Haven in south Wales) (a blessed haven into which convoy could slip from the submarine-infested Atlantic—Stewart Beach). More than the other words here considered, it connotes a refuge or place of quiet in the midst of storms (my... only haven... is in the arms of death—Carlyle). (The Colony acquired an unsavory reputation for providing a friendly haven for pirates—Amer. Guide Series: R.I.). Port denotes both a place of security for ships and one suitable for landing men or goods (to set me safe ashore in the first port where we arrived—Swift). Consequently, in extended use, it suggests a destination or goal (me... always from port withheld, always distressed—Cowper). In commercial use port applies to a place, sometimes a harbor, sometimes, especially in place-names, a city or town and its harbor, but still more often in the case of the great ports of transatlantic and transpacific shipping all the approaches, all the inlets, all the facilities (as docks, wharves, and offices) involved in the business of loading and unloading ships or of embarking and disembarking passengers (the ports of New York, Cherbourg, and Southampton).

harbor vb Harbor, shelter, entertain, lodge, house, board are comparable when they mean to provide a place (as in one's home, quarters, or confines) where someone or something may stay or be kept for a time. Harbor usually implies provision of a place of refuge especially for a person or an animal that is evil or hunted or noxious (harbor thieves) (cellars that harbor rats and cockroaches) (deportation... is simply a refusal by the Government to harbor persons whom it does not want—Justice Holmes) (what good is he? Who else will harbor him at his age for the little he can do?—Frost). In its extended sense the term suggests the receiving into and cherishing in one's shelter, more often than in Craven's Haven's harbor, than the other words here considered, it connotes a refuge or place of quiet in the midst of storms (my... only haven... is in the arms of death—Carlyle). (The Colony acquired an unsavory reputation for providing a friendly haven for pirates—Amer. Guide Series: R.I.). Port denotes both a place of security for ships and one suitable for landing men or goods (to set me safe ashore in the first port where we arrived—Swift). Consequently, in extended use, it suggests a destination or goal (me... always from port withheld, always distressed—Cowper). harden 1 Harden, solidify, indurate, petrify, cake are comparable when they mean to make or to become physically hard or solid. Harden usually expresses an opposition to soften and therefore may be as often used of the process as of the effect. The term suggests a change in degree with an approach toward a state of firm consistency or texture, though it need not imply imperceptibility or resistance to efforts to break, cut, pierce, or bend (Java as it cools hardens into rock) [<harden candy by chilling it>]

Solidify, although differing little from harden, usually expresses an opposition to liquefy and places more stress upon the effect produced than upon the process involved; the term, therefore, suggests a change in quality rather than in degree and is more often applied to a mass subject to compacting or consolidation (Java becomes rock when it is solidified) [<water solidifies into ice>

Indurate, which means to make very hard or very compact, implies usually the making of something that is firm in texture still harder [<heat indurates clay>]

surgeons . . . spend raptures upon perfect specimens of indurated veins, distorted joints—E. B. Browning

Petrify implies a making or becoming stone or stonelike in hardness; the word is used of organic bodies that by a process (called petrification) of infiltration by water containing mineral deposits (as silica, calcium carbonate) and the replacement, particle by particle, of the organic matter by the introduced mineral become replaced by stony mineral while the original form is more or less perfectly retained. Cake implies the formation into a firm, hard, or solid mass (as by baking, fusing, or congealing) [<a barrel of gunpowder] had taken water, and the powder was caked as hard as a stone—Defoe

(the salt had caked in the shakers and did not flow)

Ana *compact, consolidate, concentrate: compress, condense, *contract

Ant soften —Con *liquefy, melt

2 Harden, season, acclimatize, acclimate denote to make (as a person) proof against hardship, strain, or exposure. All imply a becoming accustomed or adapted by time or experience. Harden implies habituation that toughens one and makes one insensible of one’s own pain or discomfort or callous and insensitive to others' misery [<harden to the rigors of arctic exploration>]

I could . . . hear faint echoes of their grief. It was an experience to which I never became hardened—Heiser

its influence did not harden him; he has always risen above cynicism—Triebel

Season implies a gradual bringing into mature, sound, efficient condition; it does not, when referred to persons, necessarily imply what is to be undergone is uncongenial [<a seasoned marathon runner>]

a seasoned actor

with much less compass of muscle than his toe, that which he had was more seasoned—iron and compact—Lytton

Acclimatize and acclimate imply adaptation to a new and adverse climate or, by extension, to new and strange surroundings in general. Some writers have distinguished acclimatize from acclimate by restricting the first to adaptation by human agency, but this distinction is not commonly observed [<a race . . . well seated in a region, fixed to the soil by agriculture, acclimated by natural selection—Ripley>

I have not been long enough at this table to get well acclimated—Holmes

Ana *habitude, accustom, inure: *adapt, adjust, accommodate

Ant soften —Con enervate, emasculate (see UNNERVE):

*weaken, debilitate, enfeeble, sap, undermine

hardened, indurated, callous mean grown or become hard. These terms are comparable in both literal (compare HARDEN 1) and extended use. Hardened is the most inclusive because it is applicable to any substance, whether originally fluid or solid, or loose or firm in texture, or elastic or inelastic, that has become solider and firmer and increasingly resistant to efforts to cut, pierce, or bend [<harden soap>]

<harden lava> [harden steel]

Consequently, in extended use hardened usually implies a fixing or setting with loss of qualities (as flexibility, elasticity, pliancy, susceptibility, and impressionableness) indicative of a capacity for change [<harden beliefs>]

<harden distrust> [a hardened criminal] [a hardened heart]

[a hardened little prostrate—Thackeray]

Indurated is common in geological and in medical use with the implication of an increase of hardness or compactness usually in something already firm or hard and sometimes to the point of abnormality [<indurated clay>] [<indurated sandstone>]

[an indurated abscess] In its extended use it usually stresses abnormal or excessive hardness or stoniness that repels all efforts to penetrate or to soften [<Indurated stocic as 1 am—Adams>]

(her husband's indurated conscience—Henry James]

Callous, in its earliest and still common sense, implies a hardening and thickening of the skin by constant pressure or friction and a consequent loss of sensitivity in the part affected [<a callous spot on the sole of his foot>]

[a callous fingertip] In extended use it usually also implies a loss of sensitivity or an insensitiveness that results from constant experience [he has grown callous to such appeals] [now callous to criticism]

(the tiresome and callous repetition of old motives which marked the decadence of the classic tradition—Binyon]

(pity . . . is made callous and inactive by kneeling too much—Landor] but sometimes callous means simply means poorly unfelling and carries little implication of the process of hardening [<a callous answer>]

Ana consolidated, compacted, concentrated (see COMPACT vb)

Ant softened —Con liquefied, melted, thawed, fused (see LIQUEFY): weakened, enfeebled, debilitated (see WEAKEN)

haste

Haste, hurry, speed, expedition, dispatch are commonplace synonyms for quickness or swiftness in performance, action, or behavior. Haste implies an urgent or hurried movement, often with a sense of impatience or frustration. It is often used in business situations, where efficiency and timeliness are essential. In contrast, speed is a measure of velocity, often used in contexts where performance is timed or measured. Expediency, on the other hand, suggests a sense of necessity or urgency, often in the context of decision-making or action. Dispatch implies a rapid and efficient manner of proceeding, often with a focus on getting things done quickly and effectively.

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
used without reference to particular individuals \{love you cannot help, and hate you cannot help; but contempt is—for you—the sovereign idiocy—Galsworthy\} \{it takes a very remarkable poet, like Pope . . . to elevate malice into hate—Day Lewis\} In concrete use hate is seldom found outside of poetry except when contrasted with love, also in concrete use; it then denotes the object of one's hate \{the scum of men, the hate and scourge of God—Marlowe\} \{a generation whose finest hate had been big business—Paxson\} Hate is the preferable term when the emotion referred to is actually experienced and is therefore personal and individual in character; hate is definable because men are in agreement concerning its distinguishing marks, but hatred escapes exact definition because its implications, other than that of intense dislike, can be gathered only from the context or reference to its object. Usually it implies in addition one or more such emotions as antipathy, aversion, rancor, vindictiveness, resentment, or fear \{he had a deep-seated hatred of aristocrats\} \{a violent hatred of restrictions on his freedom\} \{a healthy hatred of scoundrels—Carlyle\} \{his special type of satire had its roots not in hatred but in sympathy. His wrath was an inverted love—Perry\} 

hate vb Hate, detest, abhor, abominate, loothe. Hate, the general term, implies extreme aversion especially as coupled with enamel or malice \{she did not hate him; she rather despised him, and just suffered him—Thackeray\} \{whom we fear more than love, we are not far from hating—Richardson\} \{the hates Lucy Wales. I don't mean dislike, or find distasteful, or have an aversion for; I mean hate—Basso\} Detest connotes violent or intense antipathy or dislike but usually lacks the active hostility and malevolence associated with hate \{the mob is a monster I never could abide . . . I detest the whole of it, as a mass of ignorance, presumption, malice, and brutality—Smollett\} \{I mortally detest cards—Fielding\} Abhor suggests profound, shuddering repugnance \{swelling from tears and supplications to a scene, of all things abhorred by him the most—Meredith\} \{Rome had made him abhorred throughout the world by the violence and avarice of her generals—Froude\} Abominate suggests strong detestation \{one of something ill-omened or shameful\} \{the Egyptians . . . lived only on the fruits of the earth, and abominate flesh eaters—Newton\} Loothe implies utter disgust or intolerance \{except when I am listening to their music I loathe the whole race; great stupid, brutal, immoral, sentimental savages—Rose Macaulay\} The same distinctions in implications and connotations are evident in the derivative nouns hate, hatred (for a distinction between these terms see HATE n 2), detestation, abhorrence, abomination, loathing. Ana *despite, contemn, scorn, disdain: *disapprove, *deprecate Ant love —Con *like, enjoy, relish, fancy, dote: respect, esteem, admire (see under REGARD n) hatefull, odious, abhorrent, detestable, abominable are sometimes used with little distinction. But hateful more frequently applies to something which excites actual hatred; odious, to something which is excessively disagreeable or which gives offense or arouses repugnance \{why shouldn't we hate what is hateful in people, and scorn what is mean?—Thackeray\} \{between these two natures, so antipathetic, so hateful to each other, there was depending an unpardonable affront—Stevenson\} Our blind poet, who in his later day stood almost single, uttering odious truth—Wordsworth \{it was an odious face—crafty, vicious, malignant, with shifty, light gray eyes—Doyle\} Something is abhorrent which outrage one's sense of what is just, right, honorable, or decent \{she [his wife] was his property . . . To me it is a view that has always been abhorrent—Galsworthy\} Something is abominable which is so abhorrent as to deserve execration \{on board ship ready to sail away from this abominable world of treacheries, and scorns and envies and lies—Conrad\} \{all the living conditions were abominable—Cather\} Ana *antipathetic, unsympathetic, averse: repellant, *repugnant, obnoxious, distasteful Ant lovable: sympathetic —Con congenial, compatible, *consonant: attractive, alluring, charming (see under ATTRACT)
or legal right to hold as one's property and under one's full control (own a house) (own several horses) (when a child is old enough, he should . . . be allowed to own books—Russell) (some parents treat their children as if they owned them) Possess is preferred in law to own as implying one's having full title and right to a particular property to the exclusion of everyone else; thus, a husband and wife might say that they own a piece of land when legally only the husband possesses it. In general use possess differs from own in being referable to other things than property (as a characteristic, a quality, a power, or a faculty) possess contentment (the States possessed the power to exclude or admit them [slaves]—John Marshall) (that astonishingly retentive memory which we possessed as little boys—Inge) (the great medicinal value possessed by this water—Heiser) Enjoy (see also LIKE) implies the having of something as one's own or for one's use with all its benefits and advantages; in this sense there is no necessary connotation of pleasure or delight in having or using, but, except in law, the word often does carry a hint if not a definite suggestion of it (during his lifetime he enjoyed a distinguished reputation for the excellence of his sermons—T. S. Eliot) (while man enjoyed . . . an unlimited freedom to be wicked—Henry Adams) (classes that enjoy certain rights and privileges)

Con secure, *safe

haze n Haze, mist, fog, smog denote an atmospheric condition which deprives the air near the earth of its transparen-cy. Haze applies to such a condition as is caused by the diffusion of smoke, dust, or a light vapor through the air in such a way as to impede but not obstruct the vision and to convey little or no impression of dampness (the early morning haze on a warm day in autumn) (there is haze today because the wind carries the smoke from the railroad yards) Mist applies to a condition where water is held in suspension in fine particles in the air, floating or slowly falling in minute drops. A fog differs from a mist only in its greater density and its greater power to cut off the vision and differs from a cloud in being near to the ground (not the thin glassy mist of twenty minutes ago, but a thick, dense, blinding fog that hemmed in like walls of wadding on every side—Hugh Walpole) Smog applies to a fog made heavier and darker by the smoke of an industrial area (a Los Angeles smog)

In extended use haze suggests vagueness or lack of clear definition of thought or feeling (looking back through the haze of years—Allen Johnson) Mist applies to what can be only dimly apprehended because of its remoteness (its origins are lost in the mists of antiquity—Coulton) or to something which prevents exact knowledge or clear understanding (times . . . half shrouded in the mist of legend—Freeman) Fog implies an obscuring of the mental or spiritual vision or of whatever can be detected only by such vision (the fog of ignorance in which so many live) (life and its few years—a wisp of fog betwixt us and the sun—Reese) (the subject is wrapped in fogs of vague thinking—Overstreet)

Ana advance, progress (see under ADVANCE vb): *motion, movement

heal *cure, remedy

healthful, healthy, wholesome, salubrious, salutary, hygien-ic, sanitary are comparable when they mean conducive or beneficial to the health or soundness of body or mind. Healthful is more common than healthy as the term carrying this sense (see also HEALTHY 2), but the two are often interchangeable (a healthy climate) (one of the healthiest climates in England—Bennett) (healthy recreation) (the French boy gets healthy recreation—Grandgent) (sound sleep is healthy) (all mothers wish their children to sleep, because it is . . . healthy—Russell) (the second fruit of friendship is healthful and sovereign for the under-standing—Bacon) Wholesome (see also HEALTHY 2) is a more homely word than healthful that is typically perfectly interchangeable with the latter (provide wholesome, well-balanced meals) (books that are wholesome reading) (mathematics . . . is a wholesome discipline because it requires a high degree of concentration and because it shows so inexorably the difference between right and wrong—Grandgent) but wholesome is the one of these words that may also be used in a much weakened sense to mean not detrimental to health or well-being (some sau-ages may contain wholesome filler as well as meat and seasonings) (reexamining our idea of a wholesome food, particularly from the point of view of its freedom from chemical additives which may be harmful to the consumer—JAMA) Salubrious applies chiefly to climate or air that is pleasantly invigorating yet devoid of harshness or extremes (the salubrious mountain air and water—C. B. Davis) Salutary implies a tonic, corrective, or similarly beneficial effectiveness; often it is applied to something that is in itself unpleasant (salutary advice) (idle ladies and gentlemen are treated with salutary contempt—Shaw) (the use of force in education should be very rare. But for the conquest of fear it is, I think, sometimes salutary—Russell) Hygienic suggests reference to the means and the rules of promoting physical or mental health, especially of the public. The term therefore commonly implies use of approved means or obedience to approved rules because they are conducive to health (instruct children in the hygienic care of mouth and teeth) (stuffy schoolrooms are not hygienic) (provision is made . . . for safe and hygienic working conditions—Amer. Guide Series: Mich.) Sanitary implies reference to measures taken or that can be taken to guard against infections or conditions that pro-mote disease. The term therefore usually implies the promotion of health, especially public health, through interference with causes that bring about disease or epide-mics (sanitary plumbing) (sanitary regulations) (the
heap

parable as verbs when they mean to bring together into a more or less compact group or collection a number of things and as nouns when they denote the group or collection so assembled. Heap is the least definite in its implications; it usually implies a moundlike shape and more or less careless or fortuitous arrangement; it may or may not imply a personal agent, an assemblage of like things, close packing, or a large quantity (throw all the discarded clothes into a heap) (heap the sand in this corner of the lot) (the miser gloated over his heaps of coins) (the wind heaps the leaves under the garden wall) (stacks of firewood were heaped all about the stove—Mason) Pile distinctively implies the laying of one thing or one layer on top of another in a more or less orderly formation; it usually implies a personal agent and an assemblage of like things or things of approximately the same size or shape (pile magazines according to their sizes) (a pile of letters on a desk) (pile logs) (a pile of bricks) Stack more strongly implies orderly and compact arrangement and the assembling of like things; it almost invariably suggests personal agency and a particular shape or form, and it has a distinctly restricted range of idiomatic reference. Thus, one stacks hay, straw, or grain in the sheaf into a cone or a four-sided, round-cornered formation designed to shed rain; one stacks firewood by arranging the pieces neatly into a rectangular pile; one stacks arms when one sets up rifles so that they form a pyramid; one stacks lumber by so arranging it in a pile that air may circulate and warping be minimized (hay curing in the stack) (a stack of lumber) So strongly does stack suggest care in arrangement that it carries specific connotations in some of its applications; thus, to stack cards is to arrange them secretly for cheating; a stack is in Great Britain a measure of stacked coal or firewood equal to four cubic yards. Shock and cock are the narrowest of these terms. Shock is used primarily of sheaves of grain (as wheat, rye, or oats) or of stalks of Indian corn which are stacked upright with butt ends resting on the ground (when the frost is on the punkin and the fodder's in the shock—Riley) Occasionally it, like cock, is used with reference to hay stacked in a conical pile (cock up the hay from the windrow) Mass (see also mass n under bulk) usually suggests amorphousness; it also implies either a capacity in the things which are brought together for cohering with or adhering to each other so as to form a blended or fused whole or a highly compact or dense agglomerate, or an external process which forces them to cohere or adhere; thus, a pasty substance used in making up pills and troches is called a mass by pharmacists; some flowers (as violets) tend to grow in masses or to mass themselves in growing; to massing in muscularity, fresh color, a strong voice, and an active life—Dickens) Healthy, sound, wholesome, robust, hale, well are comparable when meaning having or manifesting health of mind or body or indicative of such health. Healthy may imply the possession of full vigor and strength of body or mind or it may merely imply freedom from signs of disease or abnormality (a healthy body) (a healthy boy) (during a healthy and active life—Eliot) Often the term applies not to one having health but to what manifests one's health or vigor or serves as a sign of it (he had a healthy color in his cheeks—Dickens) (she has a healthy appetite) (healthy craving for the sap and savor of a more personal, national art—Binyon) (in healthy reaction to the romantic fustian of the...nineteenth century—Christopher Fry) Sound even more strongly implies the possession of perfect health or the absence of all defects and therefore suggests not even the slightest sign of disease or of physical weakness or defect (a sound mind in a sound body) (that child is...much too emotional to be ever really sound—Conrad) (his tastes were healthy, his wits sound—Rose Macaulay) Wholesome (see also healthy) implies a healthiness that impresses others favorably, especially as indicative of a person's physical, mental, and moral soundness or often more specifically of a person's balance or equilibrium (thankful...that he had his mother, so sane and wholesome—D. H. Lawrence) (such studies...promote...a wholesome dislike of sophrisy and rhetoric—Inge) (her eyes shining, her face aglow, looking oddly wholesome in a smeared white painter's smock—Wouk) Robust implies the antithesis of all that is delicate; it usually connotes manifest vigor of health as shown in muscularity, fresh color, a strong voice, and an ability to work long and hard (exercise tends to develop robust boys and girls) (a hearty, robust man in his middle sixties—Mann) (he is in robust health) (speak in a robust voice) HALE, which is a close synonym of sound, is applied chiefly to elderly or aged persons who not only show no signs of infirmity or senility but manifest qualities of men in their prime (he is Hale and hearty at 85) (Pete Gurney was a lusty cock turned sixty-three, but bright and hale—Masefield) Well, which is commoner as an attributive adjective, is a rather noncommittal term; it implies freedom from disease or illness but does not necessarily suggest soundness or robustness (is your father well?) (he is always well) (she has never been a well person) (however ill one has been, he (usually) get better, and keep getting better—he can get well—Menninger) Ana *vigorous, lusty, energetic: *strong, sturdy, stalwart, tough, tenacious Ant unhealthy —Con infirm, frail, feebie, *weak heap n pile, stack, shock, cock, mass, bank (see under heap vb) Ana *aggregate, aggregation, conglomerate, conglomeramation: collection, assemblage (see under gather) heap vb Heap, pile, stack, shock, cock, mass, bank are comparable as verbs when they mean to bring together into a more or less compact group or collection a number of things and as nouns when they denote the group or collection so assembled. Heap is the least definite in its implications; it usually implies a moundlike shape and more or less careless or fortuitous arrangement; it may or may not imply a personal agent, an assemblage of like things, close packing, or a large quantity (throw all the discarded clothes into a heap) (heap the sand in this corner of the lot) (the miser gloated over his heaps of coins) (the wind heaps the leaves under the garden wall) (stacks of firewood were heaped all about the stove—Mason) Pile distinctively implies the laying of one thing or one layer on top of another in a more or less orderly formation; it usually implies a personal agent and an assemblage of like things or things of approximately the same size or shape (pile magazines according to their sizes) (a pile of letters on a desk) (pile logs) (a pile of bricks) Stack more strongly implies orderly and compact arrangement and the assembling of like things; it almost invariably suggests personal agency and a particular shape or form, and it has a distinctly restricted range of idiomatic reference. Thus, one stacks hay, straw, or grain in the sheaf into a cone or a four-sided, round-cornered formation designed to shed rain; one stacks firewood by arranging the pieces neatly into a rectangular pile; one stacks arms when one sets up rifles so that they form a pyramid; one stacks lumber by so arranging it in a pile that air may circulate and warping be minimized (hay curing in the stack) (a stack of lumber) So strongly does stack suggest care in arrangement that it carries specific connotations in some of its applications; thus, to stack cards is to arrange them secretly for cheating; a stack is in Great Britain a measure of stacked coal or firewood equal to four cubic yards. Shock and cock are the narrowest of these terms. Shock is used primarily of sheaves of grain (as wheat, rye, or oats) or of stalks of Indian corn which are stacked upright with butt ends resting on the ground (when the frost is on the punkin and the fodder’s in the shock—Riley) Occasionally it, like cock, is used with reference to hay stacked in a conical pile (cock up the hay from the windrow) Mass (see also mass n under bulk) usually suggests amorphousness; it also implies either a capacity in the things which are brought together for cohering with or adhering to each other so as to form a blended or fused whole or a highly compact or dense agglomerate, or an external process which forces them to cohere or adhere; thus, a pasty substance used in making up pills and troches is called a mass by pharmacists; some flowers (as violets) tend to grow in masses or to mass themselves in growing; to mass colors in a painting or in stained-glass windows is to combine the various colors used in any one significant portion of the whole so that they seem to flow into each other and give a unitary effect when the painting or window is viewed in perspective. Mass, therefore, usually implies integration, but it may be a physical, a spiritual, an emotional, an intellectual, or a purely aesthetic integration (massed his arguments) (compounding the American people into one common mass—John Marshall) (dense masses of smoke hung amid the darting snakes of fire—Meredith) (a vine, remarkable for its tendency, not to spread and ramble, but to mass and mount—Cather) Bank (the verb is often followed by up) is used chiefly in reference to substances which when affected by moisture, freezing, or pressure form, or seem to form, into compact masses (bank up the snow on each side of the path) (bank up a sandpile) (build a snowbank) (cloud banks) (the wiser heads in Rome, seeing the clouds banking in the North, had clamped for the employment of the ablest of Roman comm...

heavy, weighty, ponderous, cumbrous, cumbersome, hefty

Something is heavy which is denser and more compact in substance or larger in size or amount than the average of its kind or class and so weighs more in proportion (lead is a heavy metal) (a heavy stone) (a heavy child for his age) (a heavy silk) (a heavy bread) In extended use what is heavy weighs down the senses or the spirits or is of such nature that the mind or the body finds difficult to bear or endure (there came through the open door the heavy scent of the lilac—Wilde) (there was the crushing sense . . . of having been put down as a tiresome and heavy young man—Benson) (when a great writer . . . creates a speech of his own which is too clumsy to be flexible and too heavy to be intimate—Ellis) Often, also, heavy is applied to the heart, the mind, or the body to imply a being weighed down (as with grief, worry, weariness, or overwork) (the old minister's heart was often heavy in his breast—Deland) (when he was not too heavy with fatigue—Mary Austin) At other times the term merely implies a lack of some quality (as lightness, vivacity, or grace) which enlivens and stimulates (compared with her, other women were heavy and dull . . . they had not that something in their glance that made one's blood tingle—Cather) Something is weighty which is actually and not merely relatively heavy (the larger trucks will carry the weighty packages) (as weighty bodies to the center tend—Pope) In extended use what is weighty is highly important or momentous (weighty matters of state) (weighty questions for consideration) (a work whose weighty theme should give it unity enough—Tmes Lit. Sapr.) or produces a powerful effect or exerts an impressive influence (weighty arguments) (a weighty speech) (there were also weighty reasons of statecraft to influence him—Buchan) Something is ponderous which is exceedingly heavy because of its size or its massiveness and cannot move or be moved quickly (a ponderous shield) (a ponderous machine) (the sepulcher . . . hath oped his ponderous and marble jaws—Shak.) In extended use what is ponderous is unduly intricate, involved, complicated, or labored (his ponderous work on the fairy mythology of Europe—Meredith) (ponderous jests) (I have heard mathematicians groaning over the demonstrations of Kelvin. Ponderous and clumsy, they bludgeon the mind into a reluctant assent—Huxley) Something is cumbrous or cumbersome which is so heavy and so bulky that it is difficult to deal with (as in moving or carrying) (the only currency in circulation was of iron, so cumbrous that it was impossible to accumulate or conceal it—Dickinson) (its space was pretty well occupied with the two beds, and the cumbrous furniture that had been bought for a larger house—Archibald Marshall) (the cumbrous old table with twisted legs—Dickens) In extended use both words are applicable to what is both ponderous and unwieldy (he is the Philistine who upholds and aids the heavy, cumbrous, blind, mechanical forces of society—Wilde) (he also uses a cumbrous and high-sounding terminology which has a mystifying effect—Weldon) Something is hefty which one estimates as heavy or weighty (as by holding in one's hands or by measuring with one's eyes) (a hefty fellow, in the habit of standing no nonsense—Maugham) (a hefty chair) (she has grown hefty since I saw her last) In extended use the word may imply a generous amount or portion (a hefty boost in wages) (a good, hefty slice of pie)

*heavy, weighty, ponderous, cumbrous, cumbersome

height, altitude, elevation mean the distance a thing rises above the level on which it stands, or the vertical distance between a given level taken as a base and a thing that is above it. Height may be used with reference to whatever can be so measured, whether high or low by a standard of comparison (letters not more than one-twentieth of an inch in height) (the tree rises to a height of one hundred feet) It may be used interchangeably with any of the other words, but it is not so explicit. While altitude and elevation are often interchangeable, altitude may be preferred in referring to vertical distance above the surface of the earth or above sea level or to the vertical distance above the horizon in angular measurement (an airplane flying at an altitude of 12,000 feet) (the altitude of a cloud) (the altitude of a star) Elevation is used especially in reference to vertical height above sea level on the surface of the earth; thus, one would speak of the altitude rather than the elevation of a balloon; a village situated at an elevation, preferable to altitude, of 2000 feet (atmospheric pressure depends on elevation) (Pike’s Peak has an elevation of 14,110 feet).

heighten enhance, *intensify, aggravate

help, aid, assistance (see under HELP n)

Heredic n Heretic, schismatic, sectarian, sectary, dissenter, nonconformist are comparable when denoting a person who from the point of view of a particular church or religious faith is not orthodox in his beliefs. Heretic applies to one who teaches and maintains doctrines that are contrary to those which are actually taught by the church or faith to which he belongs or has belonged (the precursors of Luther were for the most part regarded as heretics) (he drew a circle that shut me out—heretic, rebel, a thing to flout—Markham) (to delete from history its heretics and its radicals would be to deprive it of that rare quality known as independence of mind—Neff) Schismatic applies to one who separates from or provokes division in a church or communion usually by differing on a minor point or points of doctrine; thus, from the point of view of the Roman Catholic Church, those Eastern Christians who seceded to form the Orthodox Church are schismatics, whereas Luther, Calvin, Cranmer, and other leaders of the Reformation are heretics; to the Church of England, the early Puritans and Quakers were schismatics (it was difficult to get any bishop to run the risk of ordaining men whom Rome regarded as schismatics—Moss) Sectarian may be applied to a member of a religious denomination or sect, often neutrally but sometimes with the implication of a rigorous and bigoted adherence. Sectary, which is chiefly historical, more than sectarian, implies membership in a sect that is relatively small and composed of ardent and often by connotation narrow-minded and bigoted partisans (the passing of the bill by Parliament was advocated both by churchmen and by sectarian) (collectivist movements within Christianity have proceeded almost entirely from the Anabaptists and other sectaries—Inge) Dissenter, which basically means one who dissent, in the present connection, applies to a person who separates himself from and worships in a communion other than an established church (as the Church of England); nonconformist is ordinarily synonymous with dissenter, but the term has been specifically applied in England to persons who refused to accept certain religious doctrines or to follow certain religious practices imposed by the established church; thus, many of the 2000 clergymen who refused to subscribe to the Act of Uniformity in 1662 were regarded as nonconformists; Roman Catholics in England (as dissenters) have been held to be nonconformists rather than dissenters, since they did not accept the Church of England at any time. Nevertheless the terms are often used interchangeably (Wesley was not a schismatic, or even, in the doctrinal sense, a dissenter. He desired, not to secede from the Established Church, but to fill it with new life—Atlantic) (the English and Scotch Nonconformists have a great horror of establishments
heretical, heterodox

heritage, inheritance, patrimony, birthright denote something which one receives or is entitled to receive by succession (as from a parent or predecessor). Heritage is the most widely applicable of these words, for it may apply to anything (as a tradition, a right, a trade, or the effect of a cause) that is passed on not only to one's heir or heirs but to the generation or generations that succeed. [Livy] made the average Roman realize the grandeur of the past and the magnitude of his heritage—Buchan

our neglect of the magnificent spiritual heritage which we possess in our own history and literature—Inge

but the war had left its heritage of poverty . . . of disease, of misery, of discontent—Rose Macaulay

a . . . party whose heritage is vision and boldness—Straight

Inheritance applies to what passes from parent to children, whether it be money, property, or traits of character.

(my father's blessing, and this little coin is my inheritance—Beaumont & Fletcher) but the term may be used in place of heritage when such descent is implied. [a good man leaveth an inheritance to his children's children—Prov. 13:22] Inheritance, but not heritage, may also apply to the fact of inheriting or to the means by which something passes into one's possession (come into possession of a property by inheritance) (the power of regulating the devolution of property by inheritance or will upon the death of the owner—Justice Holmes)

Patrimony applies basically to the money or property inherited from one's father, but is also used in the more general sense of ancestral inheritance (to reave the orphan of his patrimony—Shak.) content . . . to leave his patrimony not worse but something better than he found it—Quiller-Couch

a most important part of the intellectual patrimony of Italy—R. A. Hull

Birthright is now more often used in its extended sense (see Right) than in its original sense of the property, goods, privileges, or rank which belong to one by reason of one's birth. But in this sense birthright is often more specific than inheritance, because it usually applies only to what belongs to the firstborn son by the law of primogeniture (and Jacob said, Sell me this day thy birthright. And Esau said, Behold, I am at the point to die: and what profit shall this birthright do to me? . . . and he sold his birthright unto Jacob—Gen 25:31-33) a race which . . . has taught its children to struggle on though despair be their birthright—Gerald Beaumont

hermaphroditic, hermaphrodite

*bisexual, androgynous, epicene

hermit eremite, anchorite, *recluse, cenobite

Con *religious, monk, friar, nun: *ascetic, mystic

heroes, valor, prowess, gallantry are comparable when they mean conspicuous courage or bravery in conduct or behavior especially during conflict. Heroism, the strongest term, distinctively implies superlative, often transcendent, courage or bravery not only as exhibited by daring deeds in the presence of danger (as in a battle, a fire, or a wreck at sea) but in carrying through without submitting or yielding an eminently arduous but exalted enterprise (as an exploration) or in the same spirit fulfilling a superhumanly high purpose (as the conquest of self or the institution of a great moral reform) where the odds are against one (acts of heroism are in the very essence of them but rare: for if they were common they would not be acts of heroism—Bentham) the characteristic of genuine heroism is its persistency. All men have wandering impulses, fits and starts of generosity . . . . The

heroic cannot be the common, nor the common the heroic—Emerson

Valor has been applied to the quality of mind of one ready to meet dangers or hazards with courage and gallantry (my valor is certainly going . . . I feel it oozing out—Sheridan) but far more often it implies both the possession of a high degree of sometimes moral, sometimes physical courage and the exhibition of that quality under stress (as in battle) (awarded a medal for valor in action) In contrast with heroism, valor implies illustrious rather than superlative courage or bravery; it carries a far weaker implication of a persistent struggle against odds but a stronger one of fearlessness and audacity in conflict with a powerful enemy (real valor consists not in being insensible to danger, but in being prompt to confront and disarm it—Scott) the stupid valor of the Englishman never knows when it is beaten; and, sometimes, . . . succeeds in not being beaten after all—Kingsley

must men conscientiously risk their careers only for principles which hindsight declares to be correct, in order for posterity to honor them for their valor—Kennedy

Prowess has become essentially a literary term in its original sense, in which it differs from valor chiefly in its greater emphasis upon brilliant achievements or exploits in arms (how insignificant a thing . . . does personal prowess appear compared with the fortitude of patience and heroic martyrdom—Wordsworth) warfare was a means of demonstrating tribal prowess and superiority to other tribes—Fauthauer

Often prowess loses its basic implication of distinguished skill and bravery in arms and means little more than success in competition typically as based on the possession of many skills (as in athletics or hunting) (among male animals, the human male is . . . (at least for constancy if not for prowess) without doubt the best mammal in the business—La Barre) (power derived from . . . technical prowess—Aron)

Gallantry more than valor, its close synonym, stresses mettle and spirit as well as courage and an almost gay indifference to danger or hardship (few augured the possibility that the encounter could terminate well for . . . the Disinherited Knight, yet his courage and gallantry secured the general good wishes of the spectators—Scott) the desperate gallantry of our naval task forces—Marshall

Ana bravery, intrepidity, dauntlessness, doughiness (see corresponding adjectives at Brave)* courage, tenacity, resolution, mettle, spirit: *fortitude, pluck, grit, guts, sand

hesitancy *hesitation

Ana reluctance, averseness, indisposedness or disposition (see corresponding adjectives at Disinclined): failing, wavering, vacillation (see corresponding verbs at Hesitate)

Con resolution, tenacity, spirit, *courage: backbone, pluck, grit, guts, sand, *fortitude

hesitant reluctant, loath, averse, indisposed, *disinclined

Con *eager, avid, keen: resolute, steadfast, staunch (see Faithful)

hesitate, waver, vacillate, falter all mean to show irresolution or uncertainty. Hesitate, the general term, usually implies a pause or other sign of indecision before one makes up one's mind what to do, say, or choose (I have for many months hesitated about the propriety of allowing . . . any part of my narrative to come before the public eye—De Quincey) (when delivering a speech to pour out in a copious stream, without pausing to take breath or hesitating over a word—Hudson)

Waver (see also Swing 2) implies hesitation after a decision has been
hesitation

resisted and so usually connotes weakness or treat (let us hold fast . . . without wavering—Heb 10:23)

the front line which had been advancing rapidly wavered under the heavy fire

you waver in your convictions—Jeffries

Vaccinate implies prolonged hesitation resulting from one's inability to reach a fixed or final decision; the term connotes alternate decision and indecision or a shifting (as in opinions, choices, or loyalties) (he may pause, but he must not hesitate—and tremble, but he must not vaccinate—Ruskin) (he had vaccinates between various substitutes for Oswald up to the very moment when he named the four upon whom he decided finally—H. G. Wells)

I have vaccinates when I should have insisted; temporized when I should have taken definite action—Marsh

Falter suggests a waver in purpose or action that is evident or is made evident in such signs of fear or nervousness as trembling or the breaking of the voice (with voice that did not falter though the heart was moved—Wordsworth) (neither to change, nor falter, nor repent—Shelley)

his eyes did not flinch and his tongue did not falter—Conrad

Con resolution, spirit, mettle, *courage, tenacity: *confidence, assurance, self-possession, aplomb

heterodox, heretical are comparable when they mean not in conformity with orthodox beliefs or teachings.

What is heterodox is at variance with accepted doctrines, especially of religion or science, or interpretations (as of the Bible or the Constitution), or with views regarded as authorized by reason, revelation, tradition, or convention (Milton's heterodox opinions on divorce and the episcopacy) (Darwin's contemporaries were slow in accepting his heterodox theory of the origin of species: What is heretical is not only heterodox but is regarded as not merely erroneous but destructive of truth a great Christian society defending itself against heretical anarchy from within—Bello) (heretical books) (the propagation of heretical doctrines) (Galileo's writings championing the heterodox Copernican theory of the solar system were condemned by the Inquisition as heretical)

hide vb

Hide, conceal, screen, secrete, cache, bury, en- sconce are comparable when meaning to withdraw or to withhold from sight or observation. Hide, the general term, and conceal are often interchangeable. But hide may or may not suggest intent (let me go, that I may hide myself in the field—I Sam 20:5) (the snow hides all the ground) or a putting into a place out of the range of others' sight (hide the money under a mattress) (he hid somewhere in his grimy little soul a genuine love for music—Kipling)

Conceal, on the other hand, more often implies intention (hidden things that had never been concealed, that had merely been dropped into forgotten corners and out-of-the-way places, to be found a long while afterward—Roberts) or effective hiding (Sophia had held that telegram concealed in her hand and its information concealed in her heart—Bennett) or a refusal to divulge (I am glad to be constrained to utter which torments me to conceal—Shak)

Elizabeth was forced to conceal her lover from her father—Woolf

Screen implies a hiding or concealment of someone or something in danger of being seen or known by interposing between him or it and others something (as a screen or curtain) which shelters and prevents discovery (Wilde screened himself under a bush and waited—Hardy)

(the mere idea of a woman's appealing to her family to screen her husband's business dishonor—Wharton)

Secrete implies a depositing, often by stealth, in a place screened from view or unknown to others (secrete smuggled goods in a cave) (squirrels secrete their winter supply of nuts) (and in mere sound secretes his inmost sense—de la Mare)

Cache implies an even more carefully chosen hiding place than secrete, for it usually implies protection from thieves or from the elements; sometimes the notion of secure storage more or less completely obliterates that of concealment (the explorers took only enough food and ammunition for the three days' trip, the rest they cached in pits dug for that purpose) Bury implies a covering with or a submerging in something that hides or conceals or serves as a hiding place (buries his face in his hands) (his intention had been to bury the incident in his bosom—Wharton)

Enconce in the relevant sense implies concealment especially in a raised or enclosed place (bounded into the vehicle and sat on the stool, ensconced from view—Hardy) (ensconced the boy in a cubbyhole—Peggy Bacon)

Ant fair —Con* beautiful, lovely, comely, pretty, beauteous, handsome

high, tall, lofty mean above the average in height. High, the general term (opposed to low), implies marked extension upward and is applied chiefly to things which rise from a base or foundation (a high hill) (a high building) or are placed at a conspicuous height above a lower level (as a floor or the ground) (a high ceiling) (a high-arched bridge) Tall (often opposed to short) applies to what rises
or grows high as compared with others of its kind, especially when its breadth or diameter is small in proportion to its height; thus, in idiomatic use one would ordinarily refer to a high hill but a tall man a tall tree. Lofty is often poetically high, but it usually implies even greater and more imposing altitude (a lofty mountain peak) a lofty perch. The loftiest star of unascended heaven—Shelley High alone of these words is used to express degree or intensity high speed (high power) (high color) (high seasoning) (a high wind) (a high fever).

In extended use high connotes distinction, elevation, and sometimes pride or arrogance heaven's high king—Milton here . . . thought him cold, high, self-contained, and passionless—Tennyson nobody else could utter those two words as he did, with such gravity and high courtesy—Cather Lofty suggests moral grandeur or dignity (exultation . . . solemn, serene and lofty—Shelley) that lofty musing on the ultimate nature of things which constitutes, for Pascal, the whole dignity and business of man—Huxley The term may also imply haughtiness or superciliousness (she is greatly disliked because of her lofty airs) (looked down upon him with the loftiest contempt—Dickens) Tall in extended use is usually slangy or informal and often implies exaggeration or departure from the strict truth indulging in tall talk about the vast mysteries of life—White (he is given to tall stories) Ana elevated, lifted, raised, reared (see lift vb) *deep, profound, abysmal: heightened, enhanced, intensified (see intensify vb) increased, augmented (see increase vb) low

high-spirited *spirited, merrymaker, spunky,ify, pep- pery, gingery anal merriment, blitheness, jocundity (see corresponding adjectives at merry): cheerfulness, gladness, joyfulness, joyousness, lightheartedness (see corresponding adjectives at glad) *fun, play, sport, jest, game hind adj hinder, rear, *posterior, after, back Ana fore, front hinder vb Hinder, impede, obstruct, block, bar, dam all mean to put obstacles in the way of a person or thing or of his action. To hinder is to check or hold back someone or something in action or about to act, move, or start; the term usually stresses harmful or annoying delay or interference with progress from your affairs hinder you too long—Shak. [the artist's] education is . . . hindered rather than helped by the ordinary processes of society which constitute education for the ordinary man—T. S. Eliot) Sometimes, however, hinder definitely implies prevention the rain hindered their going (machines are sometimes hindered by speed from delivering their best performance—Diehl) To impede is to impose upon a person or thing that is moving or in action or in progress something that slows him or it up (as by clogging, hampering, or fettering); the term seldom suggests the stopping of movement or progress, but it commonly implies difficulties so great that movement or action are painfully slow or seriously impaired around their tattooed limbs they often wore coiled brass rings or bands, which in time became so tight that they impeded the circulation—Heiser the teaching of mathematics is . . . impeded by the use of Roman symbols—Grangenoit he . . . placed his hand on hers, impeding the rapidity of her embroidery needle—Rose Macaulay To obstruct is to hinder free or easy passage; the word implies interference with something in motion or in progress or obstacles in the path or channel (highways obstructed by fallen trees after a storm) (the tall building obstructed the light from the west) (the view was obstructed by billboards) (the restriction of the power of the House of Lords to obstruct legislation—Plummer) To block (often with up) is to obstruct so effectively as to close all means of egress or ingress and to prevent all passage shifting sand blocked the entrance to the channel his nose was blocked up by a cold in these wild places . . . a snowstorm . . . does not block the King's highways and paralyze traffic as [in] London—Jefferies To bar is to block or to prohibit passage, ingress, or egress (a long freight train . . . barred the passage along the road—Anderson) (that route is barred to steemers—Kipling) Sometimes the implication of prohibition is so strong that there is no hint of blocking (the law of arms doth bar the use of venomed shot in war—Butler d. 1680) To dam (often with up) is to obstruct with obstacles that prevent a continued flow (as of water, speech, or emotion) and so provide no outlet or exit fallen trees dammed up the brook the strait pass was dammed with dead men—Shak. (trembling with dammed-up emotion) Ana arrest, check, interrupt: *hamper, fetter, clog, trammel, shackles, manacle, hog-tie: *restrain, inhibit, curb, check: baffile, balk, *frustrate Ana further—Con *advance, forward, promote: *speed, accelerate, quicken hinder adj hind, rear, *posterior, after, back Ana front, fore hinge vb *depend, hang, turn Ana *swing, fluctuate, undulate hint vb intimate, insinuate, imply, *suggest Ana allude, advert, *refer Con voice, utter, *express, vent: declare, *assert, affirm, aver, profess hire n *wage or wages, pay, salary, stipend, fee, emolument hire vb Hire, let, lease, rent, charter are comparable when they mean to take or engage something or grant the use of something for a stipulated price or rate. Because some of these words are referable only to the act of the owner and some only to the act of the one who engages, and because they vary in their applications, they are not always true synonyms. In their narrowest use hire and let are complementary terms, hire meaning to engage the use or occupancy of something at a price or rate, and let meaning to grant its use or occupancy for a stipulated return we hired a house for the summer after having some difficulty in persuading the owner to let it. Nevertheless hire, especially when used of persons or, by implication, their services, may be employed in either sense hire a servant (hire oneself often with out) as a servant hire workers by the day men willing to hire themselves out at any wage In distinctive use lease means to let on a contract by which the owner conveys to another for a set term, and usually at a fixed rate, land, buildings, or similar property (the lands in America [in Colonial days] . . . are in general not tenanted nor leased out to farmers—Smith) But lease may also be employed in the sense of to hire on a lease (they have leased the house where they live for three years) Rent implies payment in money (or in kind) for the use of land and the buildings thereon. As long as this idea is stressed, the verb may denote either to hire or to let a property rent their house from the college the college rents these houses only to professors rent (in the sense of either hire or let) is also employed in reference to various commodities other than real property (rent books from a circulating library) rent an automobile for the summer Charter means to hire by a contract (charter party) similar to a lease whereby the use of a ship is given for a certain time and the safe delivery of its cargo
is promised (it was impossible to charter a ship for the purpose—Irving) The word is often extended to other means of transportation (as buses or airplanes) and then usually implies to reserve by hiring or leasing the exclusive use of a vehicle that is normally available to the general public 

<chart a bus for a club picnic>

Anna secure, obtain, *get, procure: engage, contract, *promise

hiringling adj *mercenary, venal, hack

Anna servile, menial, *subserviient: *mean, abject, sordid

historic, historical are sometimes distinguished in meaning. Historic is used when the idea of association with history in the sense of being celebrated, well-known, or deserving to be well-known is stressed (we shall visit many historic spots on our trip) this is historic ground on which we are standing (the incident became historic in the Square—Bennett) the historic conference in 1948, when Lyseko announced his formal endorsement by the Communist Government—Martin Gardner Historical, on the other hand, implies use of or dependence on or relation to history, especially of facts or events; thus, an historic event is one that is important or famous, while an historical event is one that is supported by the evidence of history (he is conducting an historical investigation of the Pelagian heresy) an historical novel (we doubt the historical truth of his conclusions) a historical phenomenon as deeply rooted as English snobbery is not to be swept away in a night—Brogan (the author examines his own background and the historical accident which caused him to reverse the emigration of his ancestors from England to America—R. B. West)

Anna famed, *famous, celebrated, renowned

history, chronicle, annals mean a written record of events important in the life or career of a race, a nation, an institution, or a region. A history is more than a mere recital of what has occurred; in the modern conception, at least, it requires order and purpose in narration, but not necessarily a strictly chronological order nor a common definitely defined purpose. Usually, also, it is thought of as an interpretation of events especially in their causal relationships. It may exhibit fullness and completeness or, on the other hand, selection of details, especially when a single aspect is considered or a thesis is to be proved. A chronicle is a recital of events in chronological order without interpretation (the Anglo-Saxon Chronicle) the Holinshed's Chronicles of England, Scotland, and Ireland) Annals is not always clearly distinguishable from chronicle except in its emphasis upon the progress or succession of events from year to year. The term need not imply a discursive treatment or a continued narrative, for some of the ancient annals are merely records of important events in each year of the time covered. However, in the selection of titles for modern historical works these distinctions are not always observed, for chronicle and annals are sometimes chosen as less formal or pretentious than history or because chronicle stresses narrative quality and annals the selection of noteworthy events (in the earlier Middle Ages, history was written chiefly in the form of annals, that is, the enumeration of the notable events of each year, or of chronicles, in which happenings were recorded in somewhat more continuous, but still strictly chronological and unanalytical form—R. A. Hall)

In their extended senses only history and annals are closely comparable. Both of these words designate more or less shifting abstractions. History usually signifies the sum total of events, with their dates, that have become fixed in the mind because of the momentousness, often tragic momentousness, of those events (the short and simple annals of the poor—Gray) (happy the people whose annals are blank—Carlyle) Chronicle, on the other hand, is often applied to something concrete (as a person or thing) that records, relates, or manifests events as they happen (pitch upon the veriest camp follower of the New Poetry as the abstract and brief chronicle of its procedure—Lowes) (the neighborhood . . . was one of those highly favored places which abound with chronicle and great men—Irving)

histrionic adj *dramatic, theatrical, dramaturgic, melodramatic

Anna acting, playing, impersonating (see act vb)

hit vb *strike, smite, punch, slug, slog, swat, clout, slap, cuff, box

See also explanatory notes facing page 1
empty space, especially one of marked extent or of conspicuous duration, whether in a thing that is normally continuous (the air-filled voids of the soil—A. M. Bateman) or between things that are normally separate (the American planner will have... to give up his opaque passion for the transparent wall and go back to the alternation of solid and void that is characteristic of the Japanese house—Mumford) (the immense void between the earth and the nearest of the planets) (we suffer when we have time to spare and no printed matter with which to plug the void—Huxley) Vacuum basically and especially in technical use applies to space entirely devoid of matter; more often, however, it is applied to the space within an enclosed vessel in which by mechanical means the air has been practically, though seldom completely, exhausted. In its extended use the term applies to a condition or situation which resembles a true vacuum in its emptiness of all that normally should fill it or exert influence on anyone or anything that remains in it (you are not asked, as you are by so many novelists, to concern yourself with the fortunes of two or three people who live in a vacuum... but with the fortunes of all the sorts and conditions of men who make up the world in which we all live—Maughan) (he felt a sort of emptiness, almost like a vacuum in his soul—D. H. Lawrence)

Ana *aperture, orifice, interstice: perforation, puncture, bore, prick (see corresponding verbs at perforate): slit, slash, cut (see cut vb)

holiness, sanctity are often used without distinction to mean either the state or the character of one who is spiritually perfect or of something which is sacred or hallowed. Holiness more often implies spiritual perfection, whether intrinsic and essential (the holiness of the Lord) or acquired by effort (the holiness of a saint) than it does sacredness, although the latter implication is not uncommon (and an highway shall be there, and a way, and it shall be called the way of holiness; the unclean shall not pass over it—Isa 35:8) Sanctity may be used either as denoting saintliness or the holiness attained by a saint (die in the odor of sanctity) (men of eminent sanctity—Burke) or the quality of being sacred or by law and especially by natural or divine law immune from violation (the sense of the dignity of human nature is an even more civilized feeling than the sense of the sanctity of human life—Brownell) (there is no greater sanctity in the right to combine than in the right to make other contracts—Justice Holmes)

Ana sacredness, divinens or divinity, spirituality, blessedness, religiousness (see corresponding adjectives at holy): devoutness or devotion, piousness or piety (see corresponding adjectives at devout): *goodness, virtue, rectitude

holocaust *fire, conflagration

holy, sacred, divine, spiritual, religious, blessed are comparable chiefly as epithets applied to persons or things associated with religion or worship and therefore either regarded with special reverence or veneration or thought of as having a character apart from what is material or...
secular. Their choice is often a matter of idiom rather than of meaning inherent in the term. Holy (compare HOLINESS) usually implies some quality or some attribute in the thing itself which makes it either suitable for use in worship or an object of veneration. As the strongest of these terms in its suggestion of a claim upon one's reverence, it is the only one directly applied to the Supreme Being in praise or laudation. It also forms a part of some titles of the godhead or of a person of the Trinity. It is also applied to some persons or group of persons as a mark of highest reverence or esteem; thus, the Holy Family consists of Mary, Joseph, and Jesus; the Holy Father is a frequent designation of the Pope; the Holy Synod is the governing body in some Orthodox churches. The term is comparably applied to particular things with a similar implication of reverence and esteem; thus, the central Eucharistic service of Christian churches is often called Holy Communion; Palestine is known as the Holy Land; water blessed for use in religious services is holy water; Holy Week is a week set apart for especially pious observances. In more general use holy is often the word chosen when one wishes to impute to what is so described some inherent character that dissociates it from what is mundane, material, or transitory. (so holy and so perfect is my love—Shak.) All is holy where devotion kneels—Holmes (some words are considered so holy they must never be spoken aloud, such as the ancient Hebrew word for God—Chase) Sacred (see also SACRED) differs from holy chiefly in implying a character given to a thing by blessing, dedication, consecration to religion or worship or to the uses of religion or worship, or by its being devoted wholly to such ends or uses; the term therefore usually suggests an opposition to what is profane or exists for profane uses; thus, the vessels used in a Eucharistic service are preferably called sacred vessels; sacred as opposed to profane history is biblical history or history dealing with biblical characters or biblical events; sacred as opposed to profane literature may denote any or all of the books of the Bible or sometimes any or all writings (as the Bible, the Talmud, and the Koran) which are regarded by various religions as sources of revealed truth. Sacred Writ (see its appointed compartment in the synagogue rested the sacred Torah—Time) In more general use sacred applies chiefly to what one treasures as a thing apart, not to be violated or contaminated by being put to vulgar or low uses or associated with vulgar or low ends (when they saw all that was sacred to them laid waste, the Navajos lost heart. They did not surrender; they simply ceased to fight—Cather) Nothing is at last sacred but the integrity of our own mind—Emerson) Divine in its oldest and most definite sense implies either the character of deity or an origin from or an association with deity; thus, “divine being” implies both a difference from “human being” and from “angelic being” and the possession of some nature or essence of deity. (The belief that Christ is both human and divine) (A divine right is one that comes from God) Divine service is a service having for its end the worship of God) In its weaker senses divine may suggest a supernatural or a superhuman character or origin or, in hyperbolic use, a perfection that is above that which is found on earth. (The great mysteries declare that their experiences have some kind of cosmic and divine significance—Jour. of Religion) (that mighty orb of song, the divine Milton—Wordsworth) (the strains ... of divinest music—Farrar) (by what magic was it that this divine sweet creature could be allied with that old churl!—Meredith) Spiritual implies an opposition in character or in quality to what is bodily, material, earthy, or mundane; it may suggest incorporeal existence (angels are conceived of as spiritual beings) or independence from the merely physical or sensible (a spiritual marriage) (the leaders of Islam saw its spiritual foundations endangered by the subtle infidelities of pure rationalism—Gibb) or a definite relation to the soul or spirit in its aspiration toward or dependence on a higher power or in its perception of eternal values (the responsibility of human nature, not merely on the moral side, but equally on the spiritual side—Mackenzie) The spiritual richness, the subtle emotional qualities, which illuminated the great styles of the past—Belluschi) (our Declaration of Independence was written by men whose minds reached the spiritual level of eternal principles—McGranery) Spiritual in some chiefly technical legal and theological uses is more or less equivalent to ecclesiastical and then usually implies an opposition to temporal or civil (a spiritual lord, or lord spiritual, is a bishop or archbishop of the Church of England who has a right to sit in the House of Lords; the boundary between lay and spiritual authority was never defined in pre-Conquest England—Stenton) Religious (for the application of this term to persons, see DEVOUT) implies an opposition to secular and a relation of some kind to religion; thus, religious history is the history of a religion or religions; religious literature is not the same as sacred literature but has a character that is determined by religion or by religious belief or feeling; religious music, unlike sacred music, is not necessarily suitable for use in services or prayer, for, although it includes sacred music, the term may also apply to music not composed for church use but animated by feeling or prompted by themes associated with religion (he stated that his discourses to people were to be sometimes secular, and sometimes religious, but never dogmatic—Hardy) (except for the nominal subjects of the legends, one sees nothing religious about them; the medallions, when studied ... turn out to be less religious than decorative—Henry Adams) Blessed basically means consecrated (the Blessed Sacrament) and usually also suggests a supremely sacred character (our Blessed Lord) (the Blessed Virgin) In its derived senses blessed means beatified and supremely happy because enjoying the sight of God in heaven (the blessed spirits in heaven) In general use blessed may mean no more than enjoyable, pleasant, or satisfying (that extra blessed quarter hour in bed—Spectorisky) (we have no green vegetables here in winter, and no one seems ever to have heard of that blessed plant, the lettuce—Cather) Ana hallowed, consecrated, dedicated (see DEVOTE) adored, worshiped, venerated, revered (see REVERE): devout, pious, religious Ant unholy —Con *profane, secular: *impious, blasphemous, sacrilegious, profane homage reverence, deference, obeisance, *honor worship, adoration, veneration, reverence (see under REVERE): fealty, *fidelity, devotion, loyalty, allegiance: tribute, panegyric, eulogy, *encomium home house, *habitation, dwelling, abode, residence, domicile homely *plain, simple, unpretentious Ana *familiar, intimate, close: *usual, wonted, customary, habitual: ill-favored, *ugly Ant comely, bonny homily sermon, talk, *speech, address, oration, harangue, lecture homunculus manikin, midget, *dwarf, pygmy, runt honest *upright, just, conscientious, scrupulous, honorable Ana truthful, veracious (see corresponding nouns at
honesty, honor, integrity, probity are comparable when meaning uprightness as evidenced in character and actions. Honest implies refusal to lie, steal, defraud, or deceive (you can rely on his honesty) (he is a man of scrupulous honesty) (this crisis will be surmounted if the Church has the faith and courage, and, above all, the common honesty, to face it candidly—Inge) (was not greatly pleased with Lincoln, though admitting his honesty and fair-mindedness—W. C. Ford) Honor (see also fame) adds to honesty the implication of high-mindedness or a nice sense of allegiance to the standards of one's profession, calling, or position (business honor is the foundation of trade) (I could not love thee, dear, so much, loved I not honor more—Lovelace) (the fourth generation of Ralstons had nothing left in the way of convictions save an acute sense of honor in private and business matters—Wharton) (a national administration of such integrity ... that its honor at home will ensure respect abroad—Eisenhower) Integrity implies such rectitude that one is incapable of being false to a trust or a responsibility or to one's own standards (his unimpeachable integrity as treasurer of a widows' and orphans' fund—Howthorne) (the poet's sense of responsibility to nothing but his own inner voice, is perhaps his only way of preserving poetic integrity against the influences of a perverse generation—Day Lewis) Probity stresses tried or proved honesty or integrity (that sort of probity which such men as Bailey possesses—Keats) (probity in domestic policy and wise judgment in foreign policy—A. E. Stevenson)

Ana veracity, *truth, verity: uprightness, justness, conscientiousness, scrupulousness (see corresponding adjectives at upright): candidness or candor, openness, plainness, frankness (see corresponding adjectives at frank): reliability, trustworthiness, dependability (see corresponding adjectives at reliable): rectitude, virtue, *goodness

Ant dishonesty —Con untruthfulness, deceitfulness, mendacity, or mendacity or mendacity (see corresponding adjectives at dishonest): guile, duplicity, *deceit

honor n 1 glory, renown, *fame, celebrity, éclat, reputation, repute, notoriety

Ana esteem, respect, *regard, admiration: reverence, veneration, worship, adoration (see under reverence): prestige, credit, authority, *influence, weight

Ant dishonor —Con *disgrace, disrepute, shame, ignominy, infamy

2 Honor, homage, reverence, deference, obeisance all mean respect or esteem shown another as his due or claimed by him as a right. Honor may apply to the recognition of one's title to great respect or esteem or to an expression or manifestation of such respect and esteem (hold every good and conscientious man in high honor) (he declined the honor that was offered him) (they feel deeply the honor of belonging to the Senate, and the necessity of protecting the Senate against dishonorable men—New Republic). Homage adds to honor implications of accompanying praise or tributes of esteem especially from those who owe allegiance or service (all these are ... thy gentle ministers, who come to pay thee homage, and acknowledge thee their Lord—Milton). In its extended use the term carries a stronger implication of a worshipful attitude than honor carries (to the poetry of Byron the world has ardently paid homage—Arnold) ("They say I'm hand-some." "You're lovely, Bella!" she drank in his homage—Meredith) Reverence (see also reverence) implies profound respect mingled with love or devotion (in general those parents have the most reverence who desire it—Johnson) (it behooves those of us who cherish the past to study Alfred's life and works with a special reverence—Malone) Deference implies such respect for the person or his position or such reverence for his personality or such honor for his years or achievements that one courteously yields or submits one's own judgment, opinion, or preference to his (the arrangements for the flower show were altered out of deference to the wishes of the duchess—a certain deference, not to say servility, to the heads of colleges is perhaps necessary to a physician that means to establish himself here—Gray) (looked like a great man ... deriving dignity from a carriage which, while it indicated deference to the court, indicated also habitual self-possession and self-respect—Macaulay) (an attitude of hostility to aristocracy because it was aristocracy, was as incomprehensible to him as an attitude of deference—Galsworthy) Obeisance implies a show of honor or reverence by some act or gesture (as bowing or kneeling) that indicates submission, humility, or acknowledgment of defeat (the Spanish prince was welcomed ... by a goodly company of English lords, assembled to pay him their obeisance—Prescott). Sometimes the term is used in place of one of the other words in this group to suggest abject humiliation on the part of the one who pays honor or reverence (a throne to which conquered nations yielded obeisance—Steel) (continually making humble obeisance to supercilious superiors—Wier)

Ana recognition, acknowledgment (see corresponding verbs at acknowledge): adulation, *compliment: tribute, panegyric, eulogy, *encomium

Con contempt, disdain, scorn, despite (see under despise)

3 *honesty, integrity, probity

Ana uprightness, justness, honorableness, scrupulousness, conscientiousness (see corresponding adjectives at upright): *truth, veracity: straightforwardness, forthrightness (see corresponding adjectives at straightforward): rectitude, virtue (see goodness)

honor vb *dignify, ennoble, glorify

Ana *exalt, magnify, aggrandize: extol, laud, acclaim (see praise): reverence, *revere, venerate

honorable 1 Honorable, honorary are sometimes not clearly distinguished. Honorable commonly applies to something which is worthy of honor (as in being noble, high-minded, or highly commendable) (an honorable calling) (an honor service). It is also used as a prefix to the names of some persons of distinction (as members of Congress or of Parliament, mayors, and certain scions of the nobility) and as a merely courteous appellation in speaking of an opponent in a debate or controversy (my honorable colleague says ...). > Honorary regularly and honorably occasionally apply to what is conferred, awarded, or given as an honor (an honorary degree) (an honorary mention) (an honorary title) Honorary, but not honorable, is also used before a title of an office which is held without emolument or without responsibility for services (the honorary president of a society) (an honorary pallbearer)

Ana respected, esteemed, admired (see corresponding verbs under regard n): illustrious, eminent (see famous)

2 *upright, just, scrupulous, conscientious, honest

Ana trustworthy, *reliable, dependable: noble, virtuous, righteous, *moral, ethical

Ant dishonorable

honorary *honorable

hoodwink vb hoax, trick, *dupe, gull, befoul, bamboozle

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
hop vb *skip, bound, curvet, lope, lollipops, ricochet

hope vb *expect, look, await

hopeless desponding, *despondent, desperate, forlorn

despair, despondency, desperation, forlorn—hopelessness

hopeful, optimistic, roseate, rose-colored are comparable when they mean having or showing confidence that the end or outcome will be favorable or for the best. Hopeful, which is often used in distinction from sanguine (see CONFIDENT), usually implies some ground, and often reasonably good grounds, for one's having hope; it therefore typically suggests confidence in which there is little or no self-deception or which may be the result of a realistic consideration of the possibilities (the air of youth, hopeful and cheerful—Milton) (I am hopeful of purification [in politics], but not sanguine—J. R. Lowell) (the vitamins of idealistic romance have been important in the expansive, the hopeful view of life—Candy) Optimistic usually implies a temperamental confidence that all will turn out for the best; unlike hopeful, it often suggests a failure to consider things closely and realistically or, even, a willingness to be guided by illusions rather than by facts (the optimistic or sentimental hypothesis that wickedness always fares ill in the world—John Morley) (the barren optimistic sophistries of comfortable moles—Arnold) Sometimes, however, the term carries a suggestion not of weakness but of a fundamental faith in the triumph of good or right (there is a species of discontent which is more fervently optimistic than all the cheerfulness the world can boast—Repliner) Roseate and rose-colored in their relevant extended senses imply the optimism of an abnormally cheerful temperament which enables one to see persons, events, or situations in their most attractive and alluring aspects. The terms definitely imply illusion or delusion and therefore connote an element of falsity, though not necessarily intentional falsity (a persuasive person who could depict the merits of his scheme with roseate but delusive eloquence—Goldwin Smith) (a rose-colored view of the world's future) (delivers a final ... talk, capping the rose-colored impression of life in this particular branch of the services—Christian Science Monitor)

Ana expecting, hoping, awaiting (see EXPECT): anticipating, foreseeing, divining (see FORESEE): sanguine, sure, *confident, assured

Ant hopeless, desparing —Con *despondent, desperate, forlorn: pessimistic, *cynical

hopeless desparing, *despondent, desperate, forlorn

Ana deserted, depressed, melancholy, sad (see corresponding nouns at SADNESS): gloomy, glum, morose (see SULLEN): acquiescent (see COMPLIANT)

Ant hopeful —Con optimistic, roseate, rose-colored (see HOPEFUL): *confident, assured, sanguine, sure

hopelessness despair, despondency, desperation, forlorness (see under DESPONDENT)

Ana dejection, depression, melancholy, gloom (see SADNESS)

Ant hopelessness —Con optimism (see corresponding adjective at HOPEFUL): *confidence, assurance, aplomb: *courage, spirit, tenacity, resolution

horque m nub, throng, *crowd, crush, press, rout

horizon *range, gamut, reach, radius, compass, sweep, scope, orbit, ken, purview

Ana *limit, bound, confine, term, end: spread, stretch, amplitude, *expanse

horrendous horrific, *horrible, horrid

horrible 1 Horrible, horrendous, horrid, horrific, horrendous mean inspiring horror or abhorrence. Horrible (see also FEARFUL 2) is the general term for what inspires horror (some ... horrible form, which might deprive your sovereignty of reason—Shak.) (wrongs and shames, horrible, hateful, monstrous, not to be told—Tennyson) (coconuts in the horrible likeness of a head shrunk by headhunters—Sinclair Lewis) Horrid, often practically synonymous with horrible, sometimes carries a stronger implication of inherent or innate offensiveness or repulsiveness (<this emperor ... from Rome retired to Capreae ... with purpose there his horrid lusts in private to enjoy—Milton) (<some horrid beliefs from which ... human nature revolts—Bagel). In modern colloquial usage the word is often weakened to a general term of aversion (<horrid weather) (<horrid little boys) (gave her a loud ... smack on the back, with horrid familiarity—O'Flaherty) Horrific (see also FEARFUL 2), a somewhat bookish term, stresses the power to horrify (she was a brave narrator ... her voice sinking into a whisper over the supernatutral or the horrific—Stevenson) (horrific black headlines in our daily papers—Charles Jackson) Horrendous is used chiefly in producing a literary effect (as the suggestion of extreme frightfulness, an apt rhyme for tremendous or stupendous, or an onomatopoetic rhythm) (damnings most dreadful ... execrations horrendous, blasphemies stupendous—Edward Hooker)

Ana abhorrent, abominable, detestable, *hateful: *repugnant, repellent, obnoxious: *offensive, repulsive, revolting, loathsome

Ana

*petulance, huffiness, irritability, fractiousness (see corresponding adjectives at IRRITABLE): *anger, indignation, rage, wrath

huffy

petulant, pettish, *irritable, fractious, peeved, snappish, waspish, fretful, querulous

Ana

*angry, mad, indignant, irate

huge

*large
vast, immense, enormous, elephantine, mammoth, mammothian, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian are comparable when meaning exceedingly or excessively large. Huge is a rather general term indicating extreme largeness, usually in size, bulk, or capacity an enormous volume of heavy, inky vapor, coiling and pouring upward in a huge and ebony cumulus cloud—H. G. Wells

The Texan question and Mexican War made huge annexations of Southwestern territory certain—Nevis & Commager

Vast
denotes extreme largeness or broadness, especially of extent or range (the Great Valley of California, a vast elliptical bowl averaging 50 miles in width and more than 400 miles long—Amer. Guide Series: Calif.)

Consider the vast varieties of religions ancient and modern—Cohen

Immense
suggests size far in excess of ordinary measurements or accustomed concepts an immense quill, plucked from a distended albatross' wing—Melville

found the balcony at an immense height indeed, and the earth's convexity had now become strikingly manifest—Poe

the immense waste of war—Brogan

Enormous also indicates a size or degree exceeding accustomed bounds or norms (heavy wagons, enormous loads, scarcely any less than three tons—Amer. Guide Series: Calif.)

Ant

The princes of the Renaissance lavished upon private luxury and display enormous amounts of money—Mumford

Elephantine suggests the cumbersome or ponderous largeness of the elephant

similar elephantine bones were being displayed... as relics of the "giants" mentioned in the Bible—R. W. Murray

Elephantine grain elevators—Amer. Guide Series: N. Y.

Mammoth is similar to elephantine (her parties were... mammoth—she rarely invited fewer than 100 people—Time

a mammoth cyclotron—Whicher

Giant
Indicates unusual size or scope loaded with a typical unit of giant industrial equipment, the new car weighs more than a million pounds—Pa. Railroad Annual Report (1952)

his giant intellect—Gigantic and the uncommon gigantean are close synonyms of gigantic perhaps more likely to be used in metaphorical extensions gigantic jewels that a hundred Negroes could not carry—Chesterton

a justice of the Supreme Court... however gigantic his learning and his juridic rectitude—Mencken

Colossal
may suggest vast proportion three sets of colossal figures of men and animals... the largest man is 167 feet long—Amer. Guide Series: Calif.

the sun blasted down... the heat was colossal—Forester

Gargantuan
suggests the hugeness of Rabelais' Gargantuas and is often used in reference to appetites and similar physical matters (gargantuan breakfasts... pigs' knuckles and sauerkraut, liver and bacon, ham and eggs, beef stew—Ferber)

Herculean
suggests the superhuman power of the Greek hero Hercules or the superhuman difficulties of his famous labors a Herculean task confronted them. Some 1700 miles of track had to be laid through a wilderness—Nevis & Commager

Cyclopean
suggests the superhuman size and strength of the Cyclops of Greek mythology (of cyclopean masonry, consisting of very large blocks of stone—Scientific American)

Titanic
suggests colossal size and, often, primitive earth-shaking strength (titanic water fronts speedily choked both those rivers—H. G. Wells)

it was his titanic energy that broke the fetters of the imagination—Cohen

Brobdingnagian
suggests the hugeness of the inhabitants of the Brobdingnag of Gulliver's Travels (a brand-new Brobdingnag hotel—Disraeli)

Ana
stupendous, tremendous, prodigious, monumental, monstrous: big, great, large

hullabaloo
*din, uproar, pandemonium, babel, hubbub, clamor, racket

humane
humanitarian, *charitable, benevolent, philanthropic, eleemosynary, altruistic

Ana

Ant
barbarous, inhuman: atrocious—Con
savage, cruel, fell (see FIERCE): merciless, relentless, implacable (see GRIM)

humanitarian
humane, benevolent, philanthropic, eleemosynary, *charitable, altruistic

humble adj
Humble, meek, modest, lowly are comparable when they mean lacking all signs of pride, aggressiveness, or self-assertiveness either in spirit or in outward show.

All are applicable to persons and their attitudes and manners, and all but meek may also be applied to homes, occupations, interests, and ways of life. Humble may suggest a virtue that consists in the absence of pride in oneself or in one's achievements and, in religious use, a consciousness of one's weakness and a disposition to ascribe to the Supreme Being all credit for whatever one is or does that is meritorious God resists the proud, but giveth grace to the humble—las 4:6

Knowledge is proud that he knows no more—Cowper

Often humble connotes undue self-deprecation or humiliation sometimes verging on abjectness (she is humble to abjection—De Quincey). As applied to a person's circumstances, humble suggests low social rank, poverty, or insignificance (a man of humble
humble adj imitation, personation, masquerade, disguise, show of knowledge, show of virtue, pretense, sham, pretension, imposture, impostor, sham, fraud, cheat, deceit, sham, sham, sham

hume v humor, amuse, gratify, delight, please, rejoice, gladden, tickle, satisfy

hurricane n wind, breeze, gale, zephyr, hurricane, whirlwind, cyclone, typhoon, tornado, waterspout, twister

hurt v injure, harm, damage, impair, mar, spoil

hurry v speed, quicken, precipitate, hasten, hurry, hasten, expeditious, expeditiously

husky adj muscular, brawny, sinewy, athletic, burly

hymm n hymn, song, chant, sing, troll, carol, descant, warble, trill, chant, intone

hymeneal adj nuptial, marital, connubial, conjugal, matrimonial

hymn vb sing, roll, carol, descant, warble, trill, chant, intone

hygienic adj sanitary, healthful, healthy, wholesome, salubrious, salutary

hydrangea n hydrangea

hygiene n health, cleanliness, sanitation, purity, cleanliness, hygiene, health, health, cleanliness, sanitation

hydric adj aquatic, aquiferous, hydrophilic, hydrophobic, hydroscopic, hydrophilic

hydropathy n water therapy, hydrotherapy

hydronephrosis n hydronephrosis

hydronephrotic adj hydronephrotic

hydronephrosis n hydronephrosis

hydronephrotic adj hydronephrotic

icy glacial, arctic, gelid, *cold, frigid, freezing, frosty
cool, chilly

**Ant** fiery

idea, concept, conception, thought, notion, impression mean what exists in the mind as a representation of something that it apprehends or comprehends or as a formulation of an opinion, a plan, or a design. **Idea** is the most comprehensive and widely applicable of these terms: it may be used of an image of something at one time or another actually perceived through the senses, or of something never perceived but visualized from bits of information (described his idea of a penthouse) (his idea of heaven does not correspond to that of most persons) (our ideas of a good time aren't the same, and never will be—Rose Macaulay) or of something that is the clearly or vaguely defined product of fancy, imagination, or inventive power (he . . . invented a new kind of buoy which was found by the authorities to be excellent in idea, but impracticable—Ellis) (the idea of holiness has its history, like other religious ideas, and the history is not edifying—Inge) (one of those accepted ideas, which are always wrong, that China is and was a country of immovable and unchanging traditions—Binny). It may denote a mere supposition (I had no idea that the law had been so great a slavery—Austen) or a good or practical solution or suggestion (a very clever point that . . .). You are really full of ideas—Show or a ridiculous or preposterous suggestion (Mr. Elton in love with me! What an idea!—Austen)

**Concept** applies in logic to the idea of a thing which the mind conceives after knowing many instances of the category to which it belongs and which is devoid of all details except those that are typical or generic (the concept of “horse,” “table,” “mountain”) (the author of Mein Kampf has abolished the whole concept of the citizen as we have known it from the days of Pericles—Dorothy Thompson). In more general use the term applies to a formulated and widely accepted idea of what a thing should be (we find among the Greeks germinal concepts which are a vital part of modern thought—Buchan) (thus the popular concept of what news was came more and more to be formed upon what news was printed—Mott). **Conception** is often used in place of concept in this latter sense; in fact it is sometimes preferred by those who wish to keep concept as a technical term of logic. However conception so strongly suggests the activity of the mental power of bringing into existence an idea of something not yet realized or not yet given outward form that it often implies not only the exercise of the reflective powers but of the imagination as colored by feeling; the term therefore more often applies to a peculiar or an individual idea than to one held by men as a whole or by an entire class, profession, or group (compare Poe’s conception of poetry as “the rhythmical creation of beauty” with the Aristotelian conception of it as the imitation of human actions “according to probability and necessity”) (what I needed was . . . some clear conception of the meaning of existence—L. P. Smith). **Conception** is also, especially in literary and art criticism, the usual term for the idea or design conceived by the writer or artist in advance of or in company with his giving it expression or form (Dante’s boldness of conception) (the dramatist’s power to express his conception with frankness and daring) (the conception comes through the actual execution—Alexander). **Thought** applies either to an expressed or to an unexpressed idea, especially one that comes into the mind as a result of meditation, reasoning, or contemplation (a child’s thoughts about God) (he had not a thought of disaster) (have to wait for the occasional genius, or the occasional lucky thought—Whitehead) (his mind ran over the great cities . . .). Of them all, only New York was as it had always been, and he was angered at the thought—Buck). **Notion** often adds to idea’s implication of vagueness the suggestion of caprice or whim or of half-formed or tentative purpose or intention (her notion of a delta was a lot of channels and islands—Forester) (one never does form a just idea of anybody beforehand. One takes up a notion, and runs away with it—Austen) (modest, sober, cured of all her notions hyperbolical—Cowper) but notion may also come close to concept in suggesting a general or universal concept (arriving at the notion of law—Babbitt) or to conception in denoting the meaning content assigned by the mind to a term (have no adequate notion of what we mean by causation—Sapir). **Impression** (see also IMPRESSION I) usually suggests an idea which comes into the mind as the result of an external stimulus (I should like to know your first impressions of this book) (poetry. . . aims at the transmission . . . of impressions, not facts—Lowes) (looking out over the steep hills, the first impression is of an immense void like the sea—Jefferies)

**Ana** *opinion, view, belief, conviction, sentiment: *hypothesis, theory, law

**ideal adj** *abstract, transcendent, transcendental

**Ana** utopian (see AMBITIOUS): surpassing, peerless, *supreme

**Ant** actual

**ideal n** pattern, exemplar, *model, example, standard, beau ideal, mirror

**Ana** *truth, verity: perfection, *excellence

**identical 1** also identical selfsame, *same, very, equivalent, equal, tantamount

**Ana** corresponding, correlatable, convertible (see RECIPROCAL)

**Ant** diverse —Con *different, disparate, divergent: *distinct, separate, several

2 *like, alike, similar, analogous, comparable, akin, parallel, uniform

**Ana** matching, equaling (see MATCH): agreeing, squaring, tallying, jibing, corresponding (see AGREE)

**Ant** different

**identification** *recognition, apperception, assimilation

**Ana** perception, *discernment, discrimination: image, percept, sense-datum, sensum, *sensation

**identify, incorporate, embody, assimilate** are comparable when they mean to bring (one or more things) into union with another thing. **Identify** involves the idea of a union of things that are or are thought of as identical, or the same; it may imply the actual making of a thing or things the same as another (every precaution is taken to identify the interests of the people and of the rulers—Ramsay) (it is the writer’s business to identify words with things, emotion with thought—Muller) or it may refer to the mental apprehension of a real or imagined identity between things (Min was identified with Horus the son of Isis—Mercer) (should make us wary toward those who . . . have identified Americanism with a partisan policy in behalf of concealed economic aims—Dewey). This latter use may
connotation in thought or self-deception (it is easy to identify cynicism with honesty and hence with truthfulness—Hamburger) Incorporate implies a union of one or more things with another, or of different things, so that when blended, fused, or otherwise united they constitute a uniform substance, a single body, or an integral whole (fertilizers should, in general, be incorporated with the soil) (what is learned is of no value until it is incorporated into one's stock of knowledge) (what he does is to incorporate verbatim a good many of Leonardo's notes into a narrative that is entirely his own—William Murray) Embody (see also realize 1) is more restricted in its range of application than incorporate because it can be used only when one or more things are made part of another thing that is ordered as a whole (as an organized structure, a group, or a system) (yet so much of these treaties has been embodied in the general law of Europe—Mackintosh) (a recognized scholar, whose discussion... embodies the finest fruits of contemporary opinion and research—E. H. Swift) Assimilate (see also absorb 1) fails short of identify because it does not always imply the actual fusion or blending or, when self-deception is connoted, the actual confusion, of two things. Like identify, however, assimilate implies the making of two or more things exactly alike, either actually or in thought; thus, to assimilate one's beliefs to those of another is to change them so that they become the same as his; to identify one's beliefs with those of another is to make them one and indistinguishable as well as the same; the d of the Latin prefix ad- is often assimilated to a following consonant as in affectus (our manufacturing class was assimilated in no time to the conservative classes—H.G. Wells) Ana fuse, blend, merge (see mix): *mistake, confuse, confound idiom 1 dialect, *language, speech, tongue Ana jargon, patois, cant, argot (see dialect) 2 expression, location, *phrase idiosyncrasy *eccentricity Ana peculiarity, individuality, distinctiveness or distinction, characteristic or characteristic (see corresponding adjectives at characteristic): manner, way, *method, mode: mannerism, affectation, *pose idiot imbecile, moron, *fool, simpleton, natural adj 1 vain, nugatory, otiose, empty, hollow Ana fruitless, bootless, *futile, vain: *ineffectual, inefficacious, trivial, paltry, *petty, trifling Con significant, pregnant, meaningful (see expressive): profitable, *beneficial, advantageous 2 *inactive, inert, passive, supine Ana indolent, faineant, *lazy, slothful: dawdling, lagging, procrastinating (see delay) Ant busy —Con industrious, diligent, assiduous, sedulous (see busy) idle vb Idle, loaf, lounge, loll, laze mean to spend time not in work but in idleness. Idle may be used with reference to persons or to things that move lazily or without purpose; it may also be employed to connote either strong censure or a pleasant or justifiable action (why do you idle away all your days?) (it is impossible to enjoin idling thoroughly unless one has plenty of work to do—Jerome) (the brook idles through the pasture) (her fingers idled over the keys) (it is pleasant to saunter out in the morning sun and idle along the summer streets with no purpose—L.P. Smith) Loaf suggests either a resting or a wandering about as though there were nothing to do; it does not necessarily imply contempt, although its agent noun loafer when used seriously nearly always carries that implication and has often affected the meaning of the verb (Tennyson does the greater part of his literary work... between breakfast and lunch, and loafs the rest of the day—Boston Journal) (I loaf and invite my soul, I lean and loaf at my ease observing a spear of summer grass—Whitman) (the idea of the university as a place of leisure where rich young men loaf for three or four years is dying—Russell) (men who came into the shop to loaf during winter afternoons—Anderson) Lounge, though occasionally used as equal to idle or to loaf, typically conveys an additional implication of lazily resting or reclining against a support or of physical comfort and ease in relaxation (he stood... lounging with his elbow against the bar—Dickens) (against the sunny sides of the houses, men lounged, or played at dusk on a rock—Mary Austin) The agent noun loungier is, however, usually derogatory, though slightly less so than loafer (he is not a loafer, but he is a loungier on street corners during his free hours) (the loungers at the bar were beginning to show signs of leaving—MacFall) Loll also carries an implication of a posture similar to that of lounge, but it places greater stress upon an indolent or relaxed attitude (there were not yet any jaded people in street supine in carriages—Sheron) (on Sunday afternoons... when a crowd was there to loll on the front porch and swap stories—Caldwell) Laze usually implies the relaxation of a busy person enjoying a vacation or his moments of leisure (I had a very pleasant time, sailing, fishing, and lazing about—J. R. Lowell) (it was nice lazing this way. About time she had a holiday—Christie) Ana rest, relax, repose (see corresponding nouns at rest): *saunter, stroll, amble idolize *adore, worship Ana dote, love, *like: venerate, *revere, reverence Con *despise, contempt, scorn, disdain: *hate, abhor, detest, loathe, abominate if, provided are both used to introduce conditional clauses. When merely a possibility which may or may not be true is expressed, if is the usual conjunction (if this counsel... be of men, it will come to naught—Acts 6:38) When the clause which follows names a stipulation or proviso, provided (or sometimes providing) is the usual form (it is not hard to know God, provided one will not force oneself to define him—Arnold) (providing they pay you the fixed rent—Ruskin) ignite kindle, *light, fire Ant stifle: extinguish ignoble *mean, sordid, abject Ana base, low, vile: churlish, boorish, loutish (see under boor) Con *petty, puny, paltry, measly, trivial: abased, degraded (see base) Ant noble: magnanimous —Con lofty, *high: sublime, glorious, *splendid: illustrious, eminent (see famous) ignominy infamy, shame, *disgrace, opprobrium, dishonor, disrepute, obloquy, odium Ana humiliation, degradation, abandonment (see corresponding verbs at abandon): contempt, scorn, disdain, despite (see under despise): mortification, chagrin (see corresponding adjectives at ashamed) Con honor, glory (see fame): respect, esteem, admiration, *regard ignorant, illiterate, unlettered, uneducated, untaught, untaught, unlearned mean not having knowledge. One is ignorant who is without knowledge, whether in general or of some particular thing (a very superficial, ignorant, unweighing fellow.—Shak.) (the disputants on both sides were ignorant of the matter they were disputing about—Ellis) One is illiterate who is without the necessary rudiments of education; the term may imply a failure to attain a standard set for the educated or cultivated man (you might read all the books in the British Museum (if you...
ill-fated, ill-starred, disastrous, unlucky, unfortunate,
adj
illiberal, narrow-minded, narrow, intolerant, 
bigoted, hidebound implies an inability to read or write (illiterate in the sense that they could not read or write, or . . . functionally illiterate in the sense that they were unable to understand what they read—Kandel) illiterate voters
When applied to words or alterations of words or grammatical constructions, it implies violation of the usage of educated men or a status below that of the standard English of the day; thus, most teachers would stigmatize the expression “I seen it” as illiterate. The word, however, is often used merely as a contemptuous description of one (as a person, an utterance, or a letter) that shows little evidence of education or cultivation (his speech is positively illiterate) or shows inability to read and understand (it is common knowledge that our professional students and candidates for the Ph.D. are illiterate. One thing you learn very quickly in teaching students at the loftiest levels of education is that they cannot read—Hutchison) One is uneducated who is without the learning that is to be gained through the knowledge of books. Often it implies being able to read and write, but with no facility in either reading or writing (unlettered peasants) but sometimes it implies general ignorance or illiteracy (his addiction was to courses vain, his companies [companions] unlettered, rude and shallow—Shak.) One is uneducated, untaught, untutored, or unlearned who either has had no training in the schools or under teachers or whose ignorance or crudeness, or general lack of intelligence suggests such a lack: none of the words, however, is used with great precision or in a strict sense (beliefs common among uneducated men) (lo, the poor Indian! whose untutored mind sees God in clouds, or hears him in the wind—Pope) (experiences of an unlearned man in the search for truth and understanding—Brit. Book News) (taught so many flat lies that their false knowledge is more dangerous than the untutored natural wit of savages—Shaw)

Ana *rude, crude, raw, callow, green, uncouth: simple, ingenuous, unsophisticated, naïve (see natural)
Ant cognizant (of something): conversant: informed —
Con *learned, erudite, scholarly: conscious, *aware

Ana *ominous, portentous, fateful: malefic, malign, baleful—sinister
ill-favored *ugly, hideous, unsightly
Ana *plain, homely
Ant well-favored: fair —Con handsome, comely, *beautiful, lovely, beautuous, pretty
illiberal adj Illiberal, narrow-minded, narrow, intolerant, bigoted, hidebound mean so lacking in breadth of mind or experience as to be unwilling or unable to understand the point of view of others. Illiberal implies a lack of freedom of spirit, mind, or thought that prevents one from entering into sympathy with the aims, beliefs, policies, or attitudes of others; it usually suggests an ungenerous or grudging mind (the illiberal or fanatically intolerant spirit which war psychology always engenders—Cohen) Narrow-minded and narrow stress an ingrained temperament that is incompatible with breadth of mind; they usually suggest an inability to see and understand others' beliefs or aims owing to such determining circumstances as birth, breeding, or environment (the American Puritans are frequently described as narrow-minded) (there was nothing narrow or illiberal in his early training—J. R. Green) (he shows to the full their narrow-minded hatred of the preceding century—Stephen) Intolerant may imply illiberality or narrow-mindedness or it may imply an avoidance of weak permissiveness, but it emphasizes unwillingness to tolerate ideas contrary to one's own or to those accepted either generally or in accord with some standard (intolerant refusal to listen to an opponent . . . has no business in such a representative nineteenth-century drawing room—Shaw) (what force, what fury drove us into saying the stupid, intolerant, denunciatory things we said—L. P. Smith) (always intolerant of loose thinking and of verbosity, he compressed into the masterly introductory essays . . . his entire theory—Bidwell) Bigoted implies complete satisfaction with one's religious or social creed and unwillingness to admit truth in others; it usually suggests unreasonableness, obstinacy, and narrow-mindedness (“The heart has its reasons which the intellect knows not of.” How often have these words of Pascal been abused to justify a temper too indolent to inquire, too bigoted to doubt—Inge) (in spite of his wide outlook and interests, he could be narrow and bigoted in theoretical views and general prejudices—Malinowski) Hidebound implies the strong restraint of custom, tradition, or habit and aversion to change. There is less suggestion in this word of antagonism to those who hold other opinions, but a strong suggestion of unwillingness to be moved (small-town persons, hidebound in their beliefs and conventions) (a nature sometimes hidebound and selfish and narrow to the last degree—Coulton)

Ant liberal —Con progressive, advanced, radical (see liberal)
illicit *unlawful, illegal, illegitimate
Ana licit —Con *lawful, legal, legitimate: sanctioned, endorsed, approved (see approve): permitted, allowed (see let)
ilimitable boundless, *infinite, uncircumscribed, eternal, sempiternal
Ana endless, *everlasting, intermediate
illiterate adj unlettered, uneducated, untaught, *ignorant, untutored, unlearned
Ant literate —Con taught, instructed, educated, schooled (see teach)
ilmannered *rude, uncivil, ungracious, impolite, discourteous
Ana boorish, loutish, churlish (see under boor)
Ant well-bred
ill-starred ill-fated, disastrous, *unlucky, unfortunate, calamitous, luckless, hapless
Ana malefic, malign, baleful—sinister: *ominous, portentous, fateful
ill-treat maltreat, mistreat, *abuse, misuse, outrage
Ana *wrong, oppress, persecute, aggrieve: *injure, harm, hurt
illuminate, illumine, light, lighten, enlighten, illustrate are comparable when meaning to fill with light or to throw light upon. Illuminate implies the use of a bright light or of something comparable to it in such a way that what

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
illustrate 1 enlighten, *illuminate, illumine, light, lighten

*apparent, seeming, ostensible illusion

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
imaginal *imaginative, imaginable, imaginary

imaginary adj 1 Imaginary, fanciful, visionary, fantastic, chimerical, quixotic are comparable when they are applied to conceptions or to the persons who form the conceptions and mean unreal or unbelievable and out of keeping with things as they are or conceiving such unreal or unbelievable things. Something is *imaginai which is fictitious and purely the product of an active or an excited imagination (imaginary ills and fancied tortures—Addison) those nervous persons who may be terrified by imaginary dangers are often courageous in the face of real danger—Ellis) Something is or, less often, one is fanciful which or who indicates a giving rein to the power of conceiving or producing things that have no real counterpart in nature or in fact (in Wales he found a cottage perfectly roofed with fern . . . Had a painter put this in a picture, many would have exclaimed: "How fanciful!"—Jeffreys) Rousseau’s fanciful image of primitive man, uncontaminated by science or art, undepraved by thought—Grandgent) Something is visionary which, although it seems real and practical to the one who conceives it, is usually the product of a dream or vision or is characterized by an unrestrained imagination and is incapable of realization (visionary schemes for world conquest—Goldsmith had long a visionary project, that . . . he would go to Aleppo, in order to acquire a knowledge . . . of any arts peculiar to the East, and introduce them into Britain—Boswell) (this was a visionary scheme . . . a project far above his skill—Swift) One is visionary who is given to such dreams, visions, and fancies and inspired by the hopes they arouse (if a man happens not to succeed in such an enquiry, he will be thought weak and visionary—Burke) (planning, as his visionary father might have done, to go to Brazil to pick up a fortune—Van Doren) Something is fantastic (see also FANTASTIC 2) which is or, more often, seems extravagantly fanciful or queer and hence incapable of belief or, sometimes, approval (in words, as fashions, the same rule will hold; alike fantastic, if too new, or old—Pope) (his strange coming, his strange story, his devotion, his early death and posthumous fame—it was all fantastic—Cather) (a fantastic world inhabited by monsters of iron and steel—Bromfield) Something is chimerical which is wildly or fantastically visionary or unreal (an universal institutional church is as chimerical an idea as an universal empire—Inge) (the defeat was more complete, more humiliating . . . the hopes of revival more chimerical—Times Lit. Sup.) Something is or one is quixotic which or who is motivated by extravagantly chivalrous devotion to visionary ideals (quixotic as a restoration of medieval knighthood—Cohen) (to insist upon clemency in the circumstances would . . . have required quixotic courage—Buchan) (the economic notion that our present population . . . can live on this island and produce by their work a real income that will give them a rising standard of comfort and leisure, is utterly quixotic—Hobson) Ana fictitious, fabulous, mythical, legendary, apocryphal: transcendent, transcendental, *abstract: utopian (see AMBITIOUS): delusory, delusive (see MISLEADING): illusory, seeming, *apparent Ant real, actual 2 *imaginative, imaginal, imaginable

imagination, fancy, fantasy are comparable when denoting either the power or the function of the mind by which mental images of things are formed or the exercise of that power especially as manifested in poetry or other works of art. The meanings of all of these terms have been greatly influenced by changing psychological and aesthetic theories, with the result that in the past they have often carried implications or connotations and sometimes denotations not observable in modern use. Imagination is not only the most inclusive of these terms but the freest from derogatory connotations. As an inclusive term it may apply either to the power of forming images of things once known but now absent (our simple apprehension of corporeal objects, if present, is sense; if absent, is imagination—Glansvill) or to the power of forming images of things not seen, or actually nonexistent, or incapable of actual existence (one feels that a livelier melodic imagination would serve the needs of classical opera better—Evett) In the first instance the term suggests the use of memory as well as of the image-making power (recall the past in one’s imagination) (her face haunted his imagination) In the second it usually suggests either a new combination of elements found in one’s experience or an ability to conceive of something, seen only fragmentarily or superficially, as a complete, perfected, and integral whole (a man of no imagination is less likely to feel physical fear) (with imagination enough to see the possible consequences) and *imaginai, imaginative, imagined, imagination, bodied forth the forms of things unknown, the poet’s pen turns them to shapes and gives to airy nothing a local habitation and a name—Shak) (it is only through imagination that men become aware of what the world might be—Russell) (facts . . . give us wherewithal to think straight and they stimulate the imagination; for imagination, like reason, cannot run without the gasoline of knowledge—Grandgent) Fancy (see also FANCY 3) usually means the power to conceive and give expression to images that are far removed from reality or that represent purely imaginary things (she saw, with the creative eye of fancy, the streets of that gay bathing place covered with officers—Austen) (the world which any consciousness inhabits is a world made up in part of experience and in part of fancy—Krutich) In aesthetic use there is a tendency to make imagination and fancy antithetical. Imagination is often used to designate the power of representing the real or what gives an illusion of reality in its entirety and organic unity and, usually, in its ideal or universal character; fancy, the power of inventing the novel and unreal by recombining the elements found in reality. So interpreted, imagination represents men not only in their outward but in their inward life, and produces a Hamlet; fancy presents them in alien surroundings, or essentially changed in their natural physical and mental constitution, and produces centaurs and Brobdingnagians (the imagination, or shaping or modifying power; the fancy, or the aggregative and associative power—Coleridge) (Martians, the little green men of popular fancy) (Mendelssohn’s fancy gives additional soaring power to the poet’s—Kolodin) Fantasy often takes the place of fancy in naming the power of unrestrained and often extravagant or delusive fancy or its exhibition in art (readers . . . live a composite, fanciful life of fantasy between the lines of print—Huxley) (this mechanical man or robot idea has been decidedly overdone in the writings of fantasy—Furnas) Ana invention, creation (see corresponding verbs at INVENT): conceiving or conception, realizing or realization (see corresponding verbs at THINK) imaginative, imaginal, imaginable, imaginary, though not synonymous, are sometimes confused because of their verbal likeness. Imaginative applies to something which is the product of the imagination or has a character indicating the exercise or the power of the imagination; thus, imaginative writings are often distinguished from such factual writings as historical, expository, and argumentative; an imaginative poet is one whose imagination
heightens his perception of people and things (it is a common fallacy that a writer... can achieve this poignant quality by improving upon his subject matter, by using his "imagination" upon it and twisting it to suit his purpose. The truth is that by such a process (which is not imaginative at all!) he can at best produce only a brilliant sham —Cather} [workaday scientists]... are prone to identify the poetical with the impractical, the imaginative with the imaginary, the fictional with the false—Muller} Imaximal, meaning of the imagination or within the conceptive powers of the imagination, has been used, especially by psychologists, to fill the need for an adjective which refers to the imagination only as a function of the mind rather than as a creative power or to images as the mental representations which follow a sensation; thus, a person belongs to one imaginative type rather than to another because of his tendency to have sensory images of a particular kind (as visual, tactile, or auditory) (perhaps they owe their imaginative coloration to some childhood experience—Cutsforth} Imaginable often means little more than conceivable, but more precisely it may imply that the thing so qualified can be seen or apprehended in a clear mental image. St. Thomas was perhaps of all the apostles the one most easily imaginable in the present—Mackenzie} Imaginary (for fuller treatment see imaginary 1) implies existence only in the imagination. Imaginative, wondrous (Imaginary Conversations, a book by Walter Savage Landor giving imaginary dialogues and imaginary letters between famous persons of long ago) (the vague unrest of a husband whose infidelities... letters between famous persons of long ago). Ana imagining, fancying, realizing, conceiving (see think): creative, inventive (see corresponding verbs at invent)

Con *prosatic, prosy, matter-of-fact imagine conceive, fancy, realize, envisage, envision, *think
Ana *invent, create: fabricate, form, fashion, shape, *make: *conjecture, surmise, guess
Imbecile idiot, moron, *fool, simpleton, natural
Imbibe *absorb, assimilate
Ana *receive, take, admit, accept: *soak, saturate, steep, impregnate: *permeate, pervade, penetrate, impenetrable: acquire, obtain, *get
Ant ooze, exude
Imbue inoculate, leaven, Ingram, *infuse, suffuse
Ana *inform, inspire, fire, animate: impregnate, saturate, *permeate, pervade
Imitate *copy, mimic, ape, mock
Ana impersonate (see act vb): simulate, feign, counterfeit (see assume): caricature, burlesque, parody, travesty (see under caricature n)

Immaterial, spiritual, incorporeal are comparable when meaning not composed of matter. Immaterial is the most comprehensive of these terms because it makes the line of cleavage between itself and its opposite, material, not only clear and sharp but not open to confusion. If, therefore, one wishes a word to carry no other possible implication immaterial is the appropriate term; it may then apply to things believed to have real but not actual (compare real) or phenomenal existence or to things that are purely mental or intellectual constructions (immaterial beings) you feel like a disembodied spirit, immaterial —Maugham} immaterial forces (immaterial objects of thought) (in making mind purely immaterial... the body ceases to be living—DeWey} Spiritual (see also holy) may imply the absence of the material or tangible (millions of spiritual creatures walk the earth unseen —Milton) The term, however, so often applies to some-

thing which has another side or nature variously spoken of as material, animal, physical, or bodily that the word is frequently used, not to describe the character of a whole (a man, all creatures, a belief, or the world), but to distinguish the part which has the nature of a spirit or soul from the part which has not. In distinction from immaterial it frequently, therefore, connotes a supernatural, an intellectual, or a moral character (it is the spiritual always which determines the material—Carlyle} (great men are they who see that spiritual is stronger than any material force, that thoughts rule the world—Emerson)} Incorporeal basically denies the possession or presence of a body or material form; in general use it usually suggests invisibility (incorporeal intelligences) (the supposed activities and transactions of putative incorporeal beings—Flew) but, especially in legal use, it may imply intangibility or impalpability (the second group of intangibles... are incorporeal rights which do not diminish the rights of others in material things. Such rights as patents, royalties, trademarks, goodwill, and franchises fall into this category—W. H. Anderson} A

Ant material —Con physical, corporeal, sensible, objective (see material)

Immaterial, unmatured, unripe, unmellow mean not fully developed. Except for this denial of full development, the terms agree in implications and connotations with the affirmative adjectives matured, ripe, mellow discriminated at mature.

Ant crude, callow, green, *rude: *premature, precocious, untimely; childish, *childlike
Ant mature —Con matured, ripe, mellow, adult, grown-up (see mature adj)

Immediate *direct
Ana *nearest, next: intuitive, *instinctive
Ant mediate (knowledge, relation, operation): distant (relatives)

Immense *huge, vast, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian
Ana tremendous, prodigious, stupendous, *monstrous: *large, big, great
Immerse *dip, submerge, duck, souse, dunk
Ana drench, *soak, saturate, sop, impregnate: *infuse, imbue, ingraining: engross, absorb (see monopolize)
Immigrant n 1 *stranger, alien, foreigner, outsider, outsider, émigré
2 *emigrant
Immigrate emigrate (see under emigrant)
Immigration emigration (see under emigrant)

Imminent *impending
Ana threatening, menacing (see threaten): likely, *probable, possible: *inevitable, ineluctable, inescapable, unescapable, unavoidable: expected, awaited (see expect)

Con *distant, remote, far-off: *doubtful, dubious, questionable, problematic
Immobile *immovable, immotive
Ant mobile

Immoderate inordinate, *excessive, exorbitant, extreme, extravagant
Ana *profuse, lavish, prodigal, exuberant: teeming, over-flowing (see teem)
Ant moderate —Con temperate (see moderate adj): restrained, curbed, checked, inhibited (see restrain): reasonable, *rational

Immoral, immoral, nonmoral, amoral are all briefly definable as not moral, yet they are not often interchangeable and are frequently confused, largely because the implications and connotations of the second element are not the

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
same in each compound. **Immoral**, which implies an active opposition to what is **moral**, may designate whatever is discordant with accepted ethical principles or the dictates of conscience <morality cannot be legislated but . . . legislation can be immoral—Gallagher> (in the way in which he conceded the smaller points in order to win the important objectives and mastered the political game without yielding his own integrity, Roosevelt symbolized the moral man confronted by the dilemmas that an immoral society creates—Link> and then indicates that what is so designated is fundamentally wrong, unjustifiable, or sinful. But, like moral, immoral may often base its values not on principle but on custom and then may imply no more than discordance with accepted social custom or the general practice <refusal to acknowledge the boundaries set by convention is the source of frequent denunciations of objects of art as immoral—Dewey> (for a farm settler to start out with a decent home, efficiently produced, still seems immoral in many quarters—New Republic) In its frequent specific application to sexual and, especially, irregular sexual matters immoral tends to fluctuate between the two extremes of its usage range according to the concurrent rigidity of the social outlook. It may in the former case come close to licentious or lewd in pejorative quality and in the second lose most of its pejorative force and mean little more than improper or immodest <lead an immoral life> <immoral people> Unmoral, nonmoral, and amoral all, in contrast to immoral, imply in one way or another a passive negation of what is moral especially as indicated by absence of or freedom from a code that ought to prevail and the evasion of which constitutes wrongdoing. In its most typical use **unmoral** implies a lack of moral perception and ethical awareness and is appropriately applied to persons or to their behavior when these exhibit such a lack: thus, an infant or an idiot may be described as **unmoral** because in neither case is there a capacity to distinguish right from wrong <a man so purely unaware of or freedom from a code that ought to prevail and the evasion of which constitutes wrongdoing>.

**Impact**, impingement, collision, clash, shock, concussion, percussion, jar, jolt mean a forcible or enforced contact between two or more things, especially a contact so violent as to affect seriously one or the other or all of the persons or things involved. **Impact**, though it often means this and no more, may be used more generally to imply contact between two things, one of which at least is driven or impelled in the direction of the other and produces a definite effect on it, though not necessarily a physical effect or one that results in injury <the impact of a hammer upon a nail> <a target constructed to resist the impact of a bullet> <live in an age where every mind feels the impact of new ideas> <it is not electricity which we see, it is the air rendered incandescent by the vibration of the impacts of the electrons against its molecules>.
Darrow} {the impact of world war on the lives of count-
less millions—R. H. Jackson} Impact impingement often means little more than impact, but distinctively it may imply a sharper or more forcible contact than impact (each little ling of sound struck on her consciousness—
Langley} or may carry, as impact does not, a suggestion of encroachment {the impingement of scientific theories upon religious beliefs} Collision implies the coming together of two or sometimes more things with such force that both or all are more or less damaged or their progress is seriously impeded {a collision has occurred when any part of the automobile comes in contact with another object, whether moving or stationary—Gee} {his uneasiness grew by the recollection of the forty tons of dynamite in the body of the Ferndale; not the sort of cargo one thinks of with equanimity in connection with a threatened collision—Conrad} Collision may be used when the things which come together so as to seriously affect one another are immaterial rather than physical entities {discrepancies between ideas and collisions between beliefs had to be reconciled and mediated—De Kiewiet} {the collision of contrary false principles—Warburton} Clash primarily applies to the sharp discordant sounds produced by an impact or series of impacts between two or more bodies, especially metallic bodies; it is often used in preference to collision when two or more things come into contact with one another in such a manner that noises of crashing and jangling are more apparent than the destruction or ruin wrought {the clash of swords in battle} {the clash of cymbals, and the rolling of drums—Maccay} Clash, also, is used more often of immaterial things (as beliefs, theories, and ideas) which are irreconcilable or incompatible and lead to violent conflict or controversy {a clash of creeds} {in Le Misanthrope} the silent clash between the high-strung demands of Alceste and the un-
ending reasonableness of the social standard—Alexander} {an appeal to the workers and employers to be good boys and not paralyze the industry of the nation by the clash of their quite irreconcilable interests—Shaw} Shock denotes the effect (as shaking, rocking, agitating, or stunning) produced by an impact or collision. It may imply a physical, mental, or emotional effect, but in every case it carries a strong suggestion of something that strikes or hits with force and often with violence {he stood the shock of a whole host of foes—Addison} {the shock of cataract seas that snap the three-decker's oaken spine—Tennyson} {the soft shock of wizened apples falling ... upon the hilly rock—Milley} {for strong emotion, how-
ever, the shock of sudden external stimulus is necessary 
—Ellis} Concussion, found more often than shock in learn-
ed and technical use, may mean a blow or collision but more often suggests the shattering or disrupting effects of a collision or explosion or the stunning weakening effects of a heavy blow {the air seemed rent apart by a concussion like the firing of a great cannon—Chippendale} {was so careful lest his descent should shake the earth and made him accustom to ideas—Colum} {Professor Murray has ... interposed between Euripides and our-
selves a barrier more impenetrable than the Greek language—T. S. Eliot} Often, however, impenetrable is preferred to impassable when implying an exceedingly dense growth that prevents passage {an impenetrable fog} {impenetrable darkness} this gentleman was impenetrable to ideas—Colum}来讲,教授认为，Target（目标）应该更加注重......

```
with the preserve "good form" that we are impervious to the claims and clamor of that ill-bred creature—life!—

Galsworthy). Impervious implies impenetrability, whether natural or artificially acquired, by a liquid or a gas and incapacity for becoming soaked or permeated; the term applies chiefly to substances (as some clays) which do not absorb water, to cloths treated so as to be rainproof, or to materials which do not admit the passage of air, light, gas, or water (cosmo-regulation in the eel is achieved by an impermeable outer covering of slime—Dowdeswell) (impermeable rocks) (gas pipes should be made of an impermeable metal) (impermeable roofing) (he was not drunk, since the resilient composition of which his nerves were made was almost impermeable to alcohol—West)

Ant: passable

Impassible insensitive, *insensitive, anesthetic

impassioned, passionate, ardent, fervent, fervid, perfervid mean actuated by or showing intense feeling. Impassioned, though applicable to persons, is more often found in reference to utterance or artistic expression or to the mood or mental state which evokes such utterance or expression. The word usually implies intensity without violence and feeling of such depth, sincerity, and potency that it passes naturally and inevitably from the person into his expression (poetry is the breath and finer spirit of all knowledge; it is the impassioned expression which is in the countenance of all science—Wordsworth) (the letters... are written by this master of impassioned recollection in a style so musical, so magical and moving, that the experiences he recounts become our own—L. P. Smith) (as his impassioned language did its work the multitude rose into fury—Froude) Passionate, on the other hand, implies vehemence and, often, violence of emotion; when the latter idea is suggested, the word also may connote loss of rational guidance or wasteful diffusion or misdirection of emotional power (a passionate denunciation) (a passionate reformer) (passionate partisanship) (passionate feeling is desirable, provided it is not destructive—Russell) (to match more good, sound reasons, against the passionate conclusions of love is a waste of intellect bordering on the absurd—Con) (the passionate and unreasonably ruthless war spirit, common to Communists and Fascists—Cohen) Ardent differs from passionate largely in its freedom from derogatory implications and in its connotations of qualities suggestive of flame or fire. It is especially appropriate when vehemence is implied and the intense feeling expresses itself in eagerness, zeal, enthusiasm, or acts of devotion (an ardent desire for the truth) (an ardent supporter of liberal ideas) (an ardent lover) (heredity in man is hardly the simple thing that many of the ardent eugenists would have us believe—Furnas) (gave constant proofs of his ardent longing for an education—Merriman) Fervent also implies a quality of fire, but it suggests a fire that glows rather than one that bursts into flame. Hence, though it implies strength and depth of feeling, it more often suggests steadiness than vehemence and inward quiet rather than outward activity. It is applicable especially to wishes, prayers, or hopes that are heartfelt or devout, but it is also applied to an emotion, or to a person feeling such an emotion, that is free from turbulence (fervent thanks) (fervent good wishes) (a fervent Christian) (fervent prayers) (Jane's feelings, though fervent, were little displayed—Austen) (the gods approve the depth, and not the tumult, of the soul; a fervent, not ungodly, love—Wordsworth) Fervid, like impassioned, is applied more to moods and expressions than to persons; in contrast to impassioned, however, it sometimes suggests more obvious, more warmly expressed, and, often, more spontaneous emotion (who could help liking her? her generous nature, her gift for appreciation, her wholehearted, fervid enthusiasm?—L. P. Smith) Frequently it carries a strong suggestion of feverishness which distinguishes it sharply from fervent; thus, fervent thanks suggest the depth and sincerity of the emotion which prompts them; fervid thanks suggest profuseness or an overwrought state of mind (his fervid manner of love-making offended her—Bennett) Perfervid carries an implication of too great emotional excitement or of overwrought feelings; more than fervid, it casts doubt upon the sincerity of the emotion that is displayed with vehemence (to court their own discomfiture by love is a common instinct with certain perfervid women—Hardy) (in his perfervid flag-waving moments—S. H. Adams) Ana: vehement, *intense, fierce, violent: *deep, profound: *sentimental, romantic, maudlin

Ant: impassioned—Con: dispassionate, uncolored, objective (see Fair adj)

Impassive, stoic, phlegmatic, apathetic, stolid are comparable when they mean slightly if at all responsive to something that might be expected to excite emotion or interest or to produce a sensation. The distinctions to be drawn between these adjectives hold true also of their corresponding nouns, impassivity or impassiveness, stoicism, phlegm, apathy, stolidity. One is impassive who feels or shows no emotion or sensation, without necessary implication of insusceptibility (his majestic impassivity contrasting with the overt astonishment with which a row of savagely ugly attendant chiefs grinned and gaped—Shaw) (under their impassive exterior they preserve... emotions of burning intensity—Lathrop) One is stoic who is indifferent to pleasure or pain; the word frequently suggests unfinching fortitude (not only the cataclysm of a world, but also the stoic and incomparable temper that endures it—Lowes) (a stoic atmosphere of fortitude in adversity—Orville Prescott) Phlegmatic implies a temperament or constitution in which emotion is hard to arouse or, when aroused, is moderate or restrained (cold and phlegmatic must he be who is not warmed into admiration by the surrounding scenery—Waterston) (a lofty phlegm, a detachment in the midst of action, a capacity for watching in silence—Edmund Wilson) Apathetic usually implies either a remiss and culpable indifference or such a preoccupation with a particular depressing emotion (as care, grief, or despair) or bodily pain as makes one insensitive to other emotion or pain and deficient in or devoid of the usual human interests (there is only one alarming aspect of our national debt... the apathy and ignorance of the American public with regard to it. The common attitude is...: why should an ordinary citizen add the national debt to his other workaday worries—Scherman) (the row of stolid, dull, vacant plowboys, ungainly in build, uncomely in face, lifeless, apathetic—Butler d. 1902) (an uncomplaining apathy displaced this anguish; and, indifferent to delight, to aim and purpose, he consumed his days, to private interest dead, and public care—Wordsworth) Stolid implies heavy, dull, obtuse impassivity or apathy or utter blankness of countenance mirroring or suggesting such quality; often, specifically, it suggests impassive, mechanical, plodding, unquestioning, unresourceful adherence to routine (stolid Saxon rustics, in whom the temperature of religious zeal was little... above absolute zero—Huxley) (the stolidest mask ever given to man—Meredith) Ana: *cool, composed, collected, imperturbable; reserved, taciturn, *silent, reticent: callous, *hardened, indurated: *insensible, insensitive

Ant: responsive—Con: *tender, compassionate, sympathetic, warm, warmhearted

Impassivity, impassiveness apathy, stolidity, phlegm,
impatient, nervous, unquiet, restless, restive, uneasy, fidgety, jump, jittery are comparable when they mean manifesting signs of unrest or an inability to keep still or quiet. Impatient implies an inability to bear some trial (as delay, opposition, discomfort, or stupidity) with composure; it therefore connotes, as a rule, not physical but mental or emotional unrest and may suggest uncontrolled reactions (as of eagerness, irascibility, busyness, testiness, or intolerance) (so tedious is this day as is the night before some festival to an impatient child that hath new robes—Shak.) (cease your contention, which has been too long; I grow impatient—Pope) (when we pursue the ultimate significance of the colors into yet wider regions . . . I fear the august common sense of the Occident becomes af-fron-ded and impatient—Binyon) (the temper of the youth of his country is violent, impatient, and revolutionary—Fischer)

Nervous implies unsteadiness of nerves and a proneness to excitability (a nervous, fretful woman) (you and I, whose ordinary daily talk maintains its slow or hurried, nervous or phlegmatic . . . but always pedestrian gait—Lowes) (becoming more nervous as the gloom increased—Hudson)

Unquiet, though basically meaning no more than not quiet, is usually used with a strong implication of prolonged or conspicuous agitation or of troubling or disturbing distractions that hinder one’s peace of mind or spirit or prevent concentration; the word is applicable both to the person and to the thing which troubles him (these unquiet times) (unquiet meals make ill digestions—Shak.) (they have not the restless unquiet tempera-ment associated with the Anglo-Saxon race—Alfred Buchanon)

Restless usually implies constant and more or less aimless motion or activity; often, specifically, it connotes mental agitation (our heart is restless, until it repose in Thee—Pusey) (indubitably not happy . . . restless and disquieted, his disquietude sometimes amounting to agony—Arnold) or eagerness to change (he was restless and dissatisfied with his life—Anderson) or continuous or unceasing movements to and fro or back and forth (the restless sea) (a restless crowd) (he was as restless as a hyena—De Quincey) Restive (see also CONTRARY 2), which once meant unwilling to move, has gradually become a synonym of restless. In this sense it implies impatience under attempts to restrain, to control, or, especially, to keep attentive and suggests either inability to keep still or to persist in what one is doing (they were all becoming restive under the monotonous persistence of the missionary—Cather) (as restive and dissatisfied as a party of 7 bridge players—Eddington)

Uneasy usually implies restlessness born of anxiety, doubt, uncertainty, or insecurity (he is uneasy over business conditions) (an uneasy conscience) (an uneasy sense that all was not well with his family) (uneasy lies the head that wears a crown—Shak.) (so we come down, uneasy, to look, uneasily pacing the beach. These are the dikes our fathers made: we have never known a breach—Kipling) (the first uneasy stir of the sleeper—Mumford)

Fidgety implies restless movements resulting from nervousness, boredom, or uneasiness of mind; it usually suggests an inability to keep one’s hands, feet, or body still or to settle down to a task or occupation (toward the end of the day the pupils become fidgety) (he declared if I was fidgety he should have no occasion to make) (he perhaps did not realize . . . that the persons who felt fidgety or disquieted about the matter were not likely to write in about it, lest they appear ir-reverent—E. B. White) Jumpy and jittery imply extreme nervousness that exhibits itself in tremulous, uncertain movements. Jumpy, however, usually suggests a fearful or apprehensive mood and lack of control over one’s temper as well as over one’s muscles (if you didn’t drink so much, you wouldn’t be so jumpy—Barnaby Conrad) Jittery sug-gests domination not only by fears but by recollections that destroy one’s nervous control and impair one’s mental stability (soldiers still jittery from their experiences under heavy fire) (the chief factor in making children jittery is jittery parents—Time)

Ana frettful, querulous, *irritable, snappish, waspish: *eager, anxious, avid, keen: impetuous, *precipitate, headlong, hasty, sudden, abrupt

Ant patient —Con composed, imperturbable, unfappable, unfruffled, *cool: *calm, serene, tranquil, placid

Impeach indictment, incriminate, *accuse, charge, arraign

Con *exculpate, vindicate, exonerate, acquit, absolve

Impeccable, faultless, flawless, errorless are comparable when they mean absolutely correct and beyond criticism. Impeccable usually applies to something with which no fault can be found or which is irreprouachably correct (the only impeccable writers are those that never wrote—Haz-litt) (her logical process is impeccable—Grandgent) (an impeccable figure in trim dinner jacket and starched shirt—Capote) Faultless is often used in place of impec-cable without loss, but it is sometimes preferred when the emphasis is upon the absence of defect or blemish rather than upon technical correctness (whoever thinks a faultless piece to see, thinks what ne’er was, is nor, nor e’er shall be—Pope) (in faultless English and with merciless logic, lashed all the miners’ socialist theories—Collins)

Its distinctive implication, however, is often that of insipidity or tediousness (faultily faultless, icily regular, splendidly null, death perfection, no more—Tennyson)

Flawless applies especially to natural products in which no cracks, blemishes, or imperfections can be detected (a flawless diamond) or to character or reputation which is admirably excellent (destroyed his flawless reputation by a single act) or to a work of art or its execution when comparatively fine (a flawless lyric) (the flawless technique of the pianist) (a flawless story published in 1895 . . . some-what forecasts James’s final type—Van Doren) Errorless usually implies absence of all mistakes, especially of such mistakes as are technically regarded as errors; thus, an errorless baseball game may not involve flawless playing. Ana inerrant, unerring, *infallible: *correct, accurate, precise, right, nice: *perfect, entire, whole, intact

Con *deficient, defective: *superficial, shallow, uncriti-cal, cursory: culpable, *blameworthy

Impecunious *poor, indigent, needy, destitute, penniless, poverty-stricken, necessitous

Ant flush —Con *rich, wealthy, affluent, opulent

Impede *hinder, obstruct, block, bar, dam

Ana clog, *hamper, fetter, tramnel, shackle, manacle, *rich, wealthy, affluent, opulent

Ant curb, check, inhibit (see RESTRAIN)

Impending, imminent are comparable when they mean very likely to occur soon or without further warning. Both retain in this sense some feeling of now rare or disused
impenetrable

senses in which they essentially denote being physically elevated and hanging over or projecting as if about to fall and, as a result, tend to convey an ominous or portentous note (impending doom) (imminent disaster) Occasionally this feeling may be lacking and the words imply no more than the near futurity of the thing qualified (the look of anticipation, of sweet, impending triumph—Weston) (the mounting heat of June warned us . . . that our departure was imminent—Repplier) Distinctively impending suggests that the thing likely to occur is foreshadowed far enough ahead to allow one time for worry and suspense or for aversive action (at the sound of thunder we hurried in to avoid the impending storm) (worrying over his position in the impending reorganization of the company) (the country must swiftly prepare to defend itself against this impending economic rape—Walinsky) Imminent usually implies greater immediacy and may suggest that the thing is on the point of happening (thrown into sweats of suspicion that discovery was imminent—Meredith) (we were in imminent danger of being swamped by the white-caps—London) but imminent, unlike impending, may lose much or all of its suggestion of futurity and then attributes nearness in some other than temporal relation to the thing qualified (they could hear the city, evocative and strange, imminent and remote; threat and promise both—Faulkner) (in matters where the national importance is imminent and direct even where Congress has been silent, the States may not act at all—Justice Holmes) (all that we had ever thought or felt for home was real again, made imminent and present by the arrival of the Fortresses—Skidmore) Ana *close, near, nigh: approaching, nearing (see approach vb): likely, *probable: threatening, menacing (see threaten)

impenetrate interpenetrate, penetrate, *permeate, per-vade, impregnate, saturate Ana *enter, probe, penetrate: invade, entrench (see trespass): drench, *soak

imperative 1 peremptory, imperious, *masterful, domineering Ana commanding, ordering, bidding (see command vb): magisterial, *dictatorial, dogmatic, oracular: arbitrary, autocratic, despotic (see absolute) Con supplicating or supplicatory, entreating, imploring, beseeching, begging (see corresponding verbs at beg): mild, gentle, lenient, *soft 2 *pressing, urgent, crying, importunate, insistent, exigent, instant Ana compelling, constraining (see force vb): critical, crucial, *acute

imperceptible, insensible, impalpable, intangible, inappreciable, imponderable all mean incapable of being apprehended by the senses or intellect (as in form, nature, extent, or degree) even though known to be real or existential. Except for this denial of apprehensibility, these terms carry the same implications and connotations as the affirmative adjectives discriminated at perceptible (the imperceptible movement of the hour hand) (he grew into the scheme of things by insensible gradations—H. G. Wells) (the almost imperceptible beauties of style and expression—Prescott) (we shall consider that more subtle and intangible thing, the soul which he sought to build up in his people—Buchan) (that inappreciable particle of an ele-
moment called an atom) (the imponderable factors, such as temperament and mental stability, which make or mar a promising career)

Ant perceptible

imperfection, deficiency, shortcoming, fault mean a failure in persons or in things to reach a standard of excellence or perfection. Imperfection is the most general of these words; it usually does not imply a great departure from perfection and is usually replaceable by a more specific term (as flaw, blemish, defect, failing, frailty, or foible) which emphasizes its slightness rather than its enormity (the statue has one imperfection) (the early Christians followed the Stoics: property was a result of man's imperfection. It should be accepted regrettfully, and society should take care that too much did not collect in too few hands—Agar) (coffee is graded by the number of imperfections in the sample—Ukers) Deficiency carries a clear implication of lack or of inadequacy, whether moral or mental, physical or spiritual; it applies particularly to persons, but it may refer also to an inadequacy in things which affects the persons involved. Unlike imperfection, it often implies a great departure from a standard of perfection or sufficiency (Mr. Collins was not a sensible man, and the deficiency of nature had been but little assisted by education or society—Austen) (the disastrous want and weakness of Shelley . . .—his utter deficiency in humor—Arnold) (another food deficiency was responsible for one of the most debilitating and crippling diseases of the Orient—Heiser) Shortcoming implies deficiency but is seldom used in quite the same sense. Often it implies a standard of perfection or of excellence which is hard to reach and then suggests not so much the degree of imperfection or deficiency as (the doer's) sense of failure to reach the standard or (the critic's or judge's) unwillingness to use a harsher or more direct term (the shortcomings of representative government) (my book has many shortcomings. I fear) (do not let them, as poor people, make everyone else suffer for their shortcomings—Shaw) (let him only preach well, and all his shortcomings as a curate would be forgiven—Mackenzie) (management shortcomings in one form or another cause most business failures—Nation's Business) Fault (see also fault) is more direct and clear-cut in statement than any of the others; it usually implies personal culpability for the failing in a person or direct blameworthiness for the shortcomings or defect in a thing; often, also, it permits description of the failing or defect (he has . . . the fault of defective mantelpiece clocks, of suddenly stopping in the very fullness of the tick—Conrad) (Sophia observed a fault in the daily conduct of the house—Bennett) Ana *failure, neglect, dereliction: *fault, failing, frailty, foible: *blemish, flaw, defect: weakness, infirmity (see corresponding adjectives at weak)

Ant perfection

imperial *kingly, regal, royal, queenly, princely Ana majestic, august, stately, noble, *grand: sovereign, *dominant

imperl *venture, hazard, risk, chance, jeopardize, endanger Ana dare, brave (see face): encounter, confront, *meet, face; *threaten, menace

imperious domineering, *masterful, peremptory, imperative Ana *dictatorial, authoritarian, magisterial: despotic, tyrannical, arbitrary, autocratic (see absolute): lordly, overbearing (see proud) Ant absent —Con obsequious, servile, menial, *subservient, slavish: *compliant, acquiescent

impermeable impervious, impermeable, *impassable Ana solid, hard, *firm: *tight

See also explanatory notes facing page 1
Con absorbing or absorbent, imbibing, assimilating or assimilative (see corresponding verbs at ABSORB)

impersonate play, *act

Ana imitate, mimic, ape, *copy: simulate, counterfeit, feign (see ASSUME): caricature, burlesque (see UNDER CARICATURE n)

impersonator *actor, player, mummer, mime, mimic, performer, thespian, trouper

impertinent, officious, meddlesome, intrusive, obtrusive are applied to persons and their acts and utterances and mean exceeding or tending to exceed the bounds of propriety regarding the interposition of oneself in another person’s affairs. Impertinent (see also RELEVANT) implies a concerning oneself more or less offensively with things which are another’s business or, at least, not in any sense one’s own business (I should have liked to ask the girl for a word which would give my imagination its line. But how was one to venture so far? I can be rough sometimes but I am not naturally impertinent—Conrad) (approach complete strangers, ask them a battery of impertinent questions—S. L. Payne) (when he became hot and vulgar, she turned grande dame, so that he felt like an impertinent servant—Sinclair Lewis) Officious implies the offering, often well-meant, of services, attentions, or assistance that are not needed or that are unwelcome or offensive (twas but the officious zeal of a well-meaning creature for my honor—Sterne) (I cannot walk home from office, but some officious friend offers his unwelcome courtesies to accompany me—Lamb) (the foremen grew more officious in manner and shouted their orders—Bromfield) Meddlesome carries a stronger implication of annoying interference in other people’s affairs than the preceding terms; it may imply the qualities of character suggested by any of the other words, but it usually also connotes a prying or inquisitive nature (a meddlesome old man) (the people found the government unduly meddlesome (it was in no way from any desire to interfere in other people’s affairs... he had none of my own meddlesome quality—Hugh Walpole) Intrusive applies largely to persons, actions, or words that reveal a disposition to thrust oneself into other people’s affairs or society or to be unduly curious about what is not one’s own concern (Navajo hospital is not intrusive. Eusabio made the Bishop understand that he was glad). Meddlesome quality—Hugh Walpole) Impertinent, officious, meddlesome, intrusive, obtrusive

impetus 1 momentum, *speed, velocity, pace

Ana energy, force, *power: impelling or impulse, driving, moving (see corresponding verbs at MOVE)

2 *stimulus, excitant, incitement, stimulant

Ana incentive, impulse, spur, goad, * motive, spring

impingement *impact, collision, clash, shock, concussion, percussion, jar, jolt

Ana hitting or hit, striking or stroke, smiting (see corresponding verbs at STRIKE): encroachment, entrenchment (see corresponding verbs at TREAPSHOT): impression, impress, imprint, stamp, print

impious, profane, blasphemous, sacrilegious mean showing marked irreverence for what is sacred or divine. Impious usually implies extreme disrespect for God or the laws of God or for those endowed with God-given authority particularly as shown positively in thought or in actions (against the throne and monarchy of God, raised impious war in Heaven—Milton) (when vice prevails, and impious men bear sway, the post of honor is a private station—Addison) (who is there more impious than a backsliding priest—Steinbeck) Profane (see PROFANE 1) applies to men and to words and acts that manifest not only impurity but defilement or desecration, sometimes thoughtless and sometimes intentional, of what is worthy of highest reverence or respect (shall I... add a greater sin by prostituting holy things to idols... what act more execrably unclean, profane?—Milton) (then speech profane, and manners profligate, were rarely found—Cowper) Blasphemous (compare BLASPHEMY) adds to profane the implication of indignity, either deliberate or inadvertent, offered directly or indirectly to the Supreme Being (it is blasphemous because it attributes to God purposes which we would not respect even in an earthly parent—Pike) (we have heard him speak blasphemous words against Moses, and against God—Acts 6:11) Sacrilegious basically implies the commission of a sacrilege (see PROFANATION), but in its more usual extended sense it implies the defilement of what is holy or sacred (as by acts of depredation, disrespect, or contempt) sacrilegious despoilers of ancient churches) (a most sacrilegious breach of trust—Bolingbroke) (she saw that it was a terrible, a sacrilegious thing to interfere with another’s destiny, to lay the tenderest touch upon any human being’s right to love and suffer after his own fashion—Wharton)

Ana nefarious, iniquitous, flagitious (see VICIOUS): *irreligious, ungodly, godless

Ant pious: reverent —Con *holy, sacred, blessed, religious, spiritual, divine

impish roguish, waggish, mischievous, *playful, frolicsome, sporting

Ana *saucy, pert, arch: naughty, *bad: *sly, cunning, tricky

implacable relentless, unrelenting, merciless, *grim

Ana *inflexible, inexorable, obdurate, adamant: pitiless, ruthless, compassionless (see corresponding nouns at SYMPATHY)

Con yielding, submitting, capitulating (see YIELD): merciful, lenient, clement, *forbearing, indulgent, tolerant

implant, inculcate, instill are comparable when they mean to implant, instill, or assimilative (see corresponding verbs at ABSORB)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
implement, tool, instrument, appliance, utensil

Implement, tool, instrument, appliance, utensil mean a relatively simple device for performing a mechanical or manual operation. Nearly all of these words (the distinct exception is appliance) are interchangeable in their general senses, but custom and usage have greatly restricted them in their specific and most common applications. An implement, in general, is anything that is requisite to the effecting of an end one has in view or to performing that work or a part of the work. The implements of modern warfare consist of all the weapons necessary to a well-equipped army, navy, and air force. Mathematics is still the necessary implement for the manipulation of nature.

In specific use implement is the usual term when the reference is to a contrivance for tilling the soil (as a spade, a plow, a harrow, or a cultivator) or for doing work that may be accomplished more slowly by manual labor and tools are called machine tools (as the lathe). An instrument (see also mean n 2, paper 1) is in general a delicately constructed device by means of which work (not exclusively a mechanical operation) may be accomplished with precision. Many instruments are by definition tools, but instrument is the preferred term among persons (as surgeons, dentists, draftsmen, surveyors, and artists) whose technique requires delicate tools and expertness and finesse in their manipulation. Some instruments, however, are not tools, but implements in the larger sense, for they are requisite to the achieving of definite purposes but do not necessarily facilitate any manual operations (a thermometer and a barometer are recording instruments essential to the meteorologist) (a telescope is an astronomical instrument) (a piano, a violin, a cello are musical instruments by means of which a performer evokes musical sounds) (language is the essential instrument for the acquirement and communication of ideas).

An appliance may be a device that adapts a tool or machine to a special purpose usually under the guidance of a hand; thus, a dentist’s drill may be called an appliance when it is attached to a dental engine; in industry an appliance is often distinguished from a tool, though they may both do the same kind of work, in that a tool is manipulated by hand and an appliance is moved and regulated by machinery. Additionally, an appliance may be a device or apparatus designed for a particular use and especially one (as a mechanical refrigerator or a vacuum cleaner) that utilizes an external power supply, especially an electric current. A utensil is in general anything that is useful in accomplishing work (as cooking and cleaning) associated with the household; it may be applied to tools (as egg-beaters, graters, rolling pins, brooms, and mops) used in cookery and other household work, but it is most commonly applied to containers (as pots, pans, pails, and jars), especially those which form part of the kitchen, dairy, or bedroom equipment. Consequently utensil, in other than household use, often means a vessel.

implicate *involve

implication, inference are often interchangeable, but they may be distinguished when they specifically refer to something that is hinted at but not explicitly stated. Implication applies to what is hinted, whether the writer or speaker is aware of it or not or whether the reader or hearer recognizes it or not (speak of their own language with at least an implication of disparagement). When, however, the reader or hearer recognizes what is implied and gathers from it its full significance or makes an explicit statement of it, he has drawn or made an inference. He said no more, waiting for someone to draw the desired inference from this utterance. Implication is implied (as by the words, acts, appearance, character, or methods of the person or thing concerned) but is not definitely stated or expressed.

implicit, virtual, constructive mean being such by correct or justifiable inference rather than by direct statement or proof. Something is implicit (as opposed to explicit) which is implied (as by the words, acts, appearance, character, or methods of the person or thing concerned) but is not definitely stated or expressed. A good present behavior is an implicit repentance for any miscarriage in what is past.
**Spectator** (the distinction between poetry and drama, which Mr. Archer makes explicit, is *implicit* in the view of Swinburne—T. S. Eliot) Something is *virtual* (as opposed to *actual*) which exists in essence or effect but is not actually designated or recognized or put forward or regarded as such (his statement is a *virtual* confession) (the virtual abdication of parents from their role as educators—Barclay) (the dictator's constant associate and his virtual chief of staff—Buchan) Something is *constructive* (as opposed to *manifest*) which is inferred from a text, from known acts, or known conditions and which rests therefore on an interpretation of this text, these acts, or these conditions rather than upon direct statement or direct evidence (if the law explicitly gives a governor the right of removal of certain officials, he may claim the right to control and direct their official acts as a constructive power) (a mere failure to obey the orders of the court may be interpreted by the judge as constructive contempt) (an employer who confronts a foreman with an option of demotion or withdrawal from a foreman's union is guilty of a constructive discharge—B. F. Tucker)

**Ana** implied, suggested, intimated, hinted (see suggest): inferred, deduced, gathered (see infer) Imply—Con express, definite, specific (see explicit): expressed, voiced, uttered (see express vb) stated, recited, recounted, described (see relate)

**Implore** entreat, beseech, supplicate, *beg, importune, adjure**

**Ana** pray, plead, sue, appeal, petition (see under prayer): *ask, request, solicit

**Imply** 1 involve, comprehend, *include, embrace, subsume**

**Ana** import, *mean, signify, denote: *contain, hold: convey, *carry, bear

2 *suggest, hint, intimate, insinuate**

**Ana** connote, *denote: *presuppose, presume, assume, postulate: betoken, bespeak, *indicate, attest, argue, prove

**Ant** express—Con state, *relate: utter, voice, broach (see express vb): declare, predicate, affirm, *assert, aver, profess

**Impolite** uncivil, discourteous, *rude, ill-mannered, impertinent*

**Ana** churlish, boorish, loutish (see under boor): curt, gruff, brusque, blunt (see bluff)

**Ant** polite—Con *civil, courteous, chivalrous, gallant: *suave, urbane, diplomatic, politic: *thoughtful, considerate, attentive

**Imponderable** impalpable, *imperceptible, inappreciable, insensible, intangible**

**Ant** ponderable, appreciable—Con *weighty, consequential, important, significant, momentous (see corresponding nouns at IMPORTANCE)**

**Import** vb *mean, denote, signify**

**Ana** *denote, connote: involve, imply, *include, comprehend; *suggest, imply, intimate, hint: mean, *intend

**Import n 1 significance, *meaning, sense, acceptance, signification**

**Ana** denotation, connotation (see under denote 2): interpreting or interpretation, construing or construction (see corresponding verbs at explain): drift, tenor (see tendency): implication

2 significance, *importance, consequence, moment, weight**

**Ana** *worth, value: purpose, intent, design, object, objective (see intention): *emphasis, stress

**Importance, consequence, moment, weight, significance, import** are comparable when they denote the quality or the character or the state of someone or something that impresses others as of great or sometimes eminent worth, value, or influence. Importance, probably the most inclusive of these terms, implies a judgment of the mind by which superior value or influence is ascribed to a person or thing (there are no cities of importance in this state) (he always attaches importance to what seems to others trivial events) (tradition gives importance to the study of the classics) (hence flowers come to assume [in Oriental art] ... an importance equal to that of figure painting with us—Binyon) (issues which, whilst not of major significance, have some importance—Current History)

**Consequence (see also effect)** is often used interchangeably with importance especially in implying superior social rank or distinction (men of consequence) but it usually implies importance because of the thing's possible or probable outcome, effects, or results (he ... was eager to have the Cathedral begun; but whether it was Midi Romanesque or Ohio German in style, seemed to him of little consequence—Cather) (to marry one of the right people ... is of the greatest consequence for a happy life—Rose Macaulay) (to cultivate the love of truth, it is of the utmost consequence that children should study things as well as words, external nature as well as books—Eliot) (I cannot think of a single poet of consequence whose work does not ... condemn modern civilization—Auden) Moment implies consequent or self-evident consequence (enterprises of great pith and moment—Shak) (a mistake of no very great moment —in fine, a mere slip—Barham) Weight implies a judgment of the relatively great importance or of the particular moment of the thing under consideration (the judge gave great weight to the testimony of the accused man) (in such a point of weight, so near mine honor—Shak) (I looked for you at dinner time; I forget now what; but then 'twas a matter of more weight than laying siege to a city—Millay) Significance and import are often used as though they were indistinguishable in meaning from importance or consequence, but they typically imply a quality or character in a person or thing which ought to mark it as of importance or consequence but which may or may not be recognized; thus, one may miss the significance of an occurrence; one may recognize the import of a piece of testimony (a widespread recognition of the significance of that achievement—Ellis) (the book was invested with a significance ... which its intrinsic literary and philosophical merits could not justify—Huxley) (a fear that the spectator might lose, in the shock of crude sensation, the spiritual import of the catastrophe—Binyon)

**Ana** prominence, conspicuousness, saliency (see corresponding adjectives at noticeable): eminence, illustriousness (see corresponding adjectives at famous): seriousness, gravity (see corresponding adjectives at serious): magnitude, *size, extent

**Ant** unimportance—Con *pettiness, triviality, paltriness* (see corresponding adjectives at petty)

**Importunate** *pressing, urgent, imperative, crying, insistent, exigent, instant

**Ana** demanding, claiming, requiring (see demand): persistent, persevering (see corresponding verbs at persevere): pertinacious, dogged (see obstinate)

**Importune** *beg, entreat, beseech, implore, supplicate, adjure

**Ana** implore—Con *tease, pester, plague, harry, *worry: hound, hector, bolster (see bait): plead, appeal, sue (see under prayer)

**Impose** *dictate, prescribe, ordain, decree

**Ana** order, enjoin, *command, charge: exact, *demand, require: constrain, oblige, compel (see force)

**Imposing** stately, majestic, august, noble, magnificent, *grand, grandiose

**Ana** *showy, pretentious, ostentatious: impressive, *moving: regal, imperial (see kingly): monumental, asterisk (*) indicates place of treatment of each group.
impersonator, faker, quack, mountebank, charlatan denote a person who makes pretensions to being someone or something that he is not or of being able to do something he cannot really do. Impostor applies especially to one who passes himself off for someone else (there is an impostor abroad, who takes upon him the name of this young gentleman, and would willingly pass for him—Addison). However the word often serves as a general term for anyone who assumes a title, character, or profession that is not his own (charged that Kim II Sung was an impostor trading on the name of a legendary Korean resistance leader—Time). Faker applies to one who gives himself the appearance of being what, in character or in profession, he is not (the accused man is not insane, he is merely a clever faker—a hypocrite is a moral or religious faker). He is essentially a faker with a large contempt for the ignorance and gullibility of the American voter—Current History. Quack is the popular and contemptuous term for an ignorant, untrained, or unscrupulous practitioner of medicine or law or seller of remedies or treatments, and usually carries a strong implication of fraud or self-delusion (dishonesty is the raw material of quacks only, but also, in great part, of dupes—Carlyle). One of the most notorious cancer-cure quacks of the day—JAMA. Mountebank sometimes suggests quackery, but it regularly suggests cheap and undified efforts to win attention (political mountebanks). Our Sabbaths, closed with mummeries and buffoons; preaching and pranks will share the motley scene . . . God’s worship and the mountebank between—Cowper. Charlatan applies to a writer, speaker, preacher, professor, or expert who covers his ignorance or lack of skill by pretentious, flashy, or magniloquent display (insolent, pretentious, and given to that reckless innovation for the sake of noise and show which was the essence of the charlatans—George Eliot) (replaced by the charlatans and the rogues—by those without learning, without scruples, or both—Asher Moore).

Cheating, fraud, fake, humbug (see imposture): deceiver, beguiler, miserader (see corresponding verbs at deceive)

Imposition, cheat, fraud, sham, fake, humbug, deceit, deception, counterfeit all mean something which pretends to be one thing in its nature, character, or quality but is really another. Imposture applies not only to an object but to an act or practice which is passed off to another as genuine, authentic, or bona fide (several of the gallery’s paintings reputed to be the work of Rubens and Rembrandt were impostures). (The hero is as gross an imposture as the heroine—Shaw) (its values . . . are an imposture: pretending to honor and distinction, it accepts all that is vulgar and base—Edmund Wilson).

Cheating applies chiefly to something or sometimes to someone that wins one’s belief in its or his genuineness, either because one is deliberately misled or imposed upon by another or is the victim of illusion or delusion (when I consider life, it’s all a cheat. Yet fooled with hope, men favor the deceit—Dryden). (What a man . . . shall prove (what argument could never yet) the Bible an imposture and a cheat?—Cowper). (Hence, pageant history! hence, gilded cheat!—Keats). (If I passed myself off on Miss Carew as a gentlewoman, I should deserve to be exposed as a cheat—Shaw). Fraud applies to a deliberate, often criminal, perversion of the truth (many persons persisted in believing that his supposed suicide was but another fraud—M’Carthv) (we may take it as undisputed that Swinburne . . . did something that had not been done before, and that what he did will not turn out to be a fraud—T. S. Eliot). Applied to a person it may be less condemnatory and suggest pretense and hypocrisy (the pious fraud who freely indulges in the sins against which he eloquently preaches—La Farge). Sham applies to a close copy of a thing, especially to one that is more or less obviously a fraudulent imitation (a strong living soul in him, and sincerity there; a reality, not an artificiality, not a sham!—Carlyle). (He smiled, in his worldliest manner. But the smile was a sham—Bennett). 

Fake applies either to a person that represents himself as someone he is not or, more often, to a worthless thing that is represented as being something that it is not; fake differs from fraud in not necessarily implying dishonesty in these representations, for a fake may be a joke or a theatrical device, or it may be a clear fraud (this testimonial is clearly a fake). (One of the great fakes of all time was the Cardift Giant). (Actors using fakes instead of real swords on the stage). (He pretends everything is what it is not, he is a fake—K. A. Porter). 

Humbug applies to a person or sometimes a thing that pretends or is pretended to be other and usually more important than he or it is, not necessarily because of a desire on the part of the person involved to deceive others but often because he is self-deceived (you will take to politics, where you will become . . . the henchman of ambitious humbugs—Shaw) (what humbugs we are, who pretend to live for beauty, and never see the dawn!—L. P. Smith). Deceit and deception both apply to something that misleads one or deludes one into taking it for what it is not. Deceit, however, usually suggests the work of a deceiver or of one that misleads or leads astray (the deceits of the world, the flesh, and the devil—Book of Common Prayer). (They [Indians] held that the basest trickery or deceit was not dishonorable if directed against a foe—Amer. Guide Series: R.I.) Deception, on the other hand, often suggests a quality or character in the thing which causes one to mistake it or frankly to take it as other than it really is (the rising and the setting of the sun are pure deceptions). Counterfeit applies to a close imitation or copy of a thing (as a coin, a banknote, or a bond) that depends upon pictorial devices or engraved designs for assurance of its genuineness; the term usually also implies the passing or circulation of such an imitation as if it were genuine (the city is being flooded with counterfeits of five-dollar bills). The term is also applicable to a thing or, less often, to a person that passes for something other than it actually or truly is (his newly purchased painting by Raphael was proved to be a clever counterfeit). (She had the illusion that she was not really a married woman and a housemistress, but only a kind of counterfeit—Bennett). 

Cheating, fraud, fake, humbug (see imposture): deceiver, beguiler, miserader (see corresponding verbs at deceive)

Impotence 1 *powerless

Ama *ineffectual, ineffectual, inefficacious, inefficient: *incapable, incompetent: disabled, crippled, debilitated, enfeebled (see weaken). Ant potent—Con *powerful, puissant, forceful, forcible: *vigorous, energetic, strenuous: *effective, effectual, efficacious, efficient: *able, capable

2 *sterile, barren, unfruitful, infertile

Ant virile

Impoverish bankrupt, exhaust, *deplete, drain

Ant enrich—Con enhance, heighten, *intensify: augment, *increase

Imprecation curse, malediction, anathema

Ant execration, damning, objurgation (see corresponding verbs at execrate): *blasphemy, profanity, swearing

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
**impress**

**Ant** prayer

**Impregnable** inepugnable, unassailable, invulnerable, *invincible, unconquerable, indomitable*

**Ana** secure, *safe: protected, shielded, guarded, safe-guarded, defended (see **DEFEND**)

**Con** exposed, open, *liable, susceptible, subject

**Impregnable** 1 saturate, *permeate, pervade, penetrate, impenetrate, interpenetrate

**Ana** imbue, inculcate, ingrain, *infuse, suffuse, leaven: *enter, pierce, probe, penetrate

2 *soak, saturate, drench, steep, sop, waterlog

**Ana** immerse, submerge, *dip, sojourn

**Impress** vb touch, strike, *affect, influence, sway

**Sentient, sensitive, impressionable, responsive, susceptible**

**Ana** subject, exposed, open, *liable, prone: predisposed, predisposed, disposed, inclined (see **INCLINE**)

**Impressible** *sentient, sensitive, impressionable, responsive, susceptible*

**Ana** subject, exposed, open, *liable, prone: predisposed, predisposed, inclined (see **INCLINE**)

**Impression** 1 Impression, impress, imprint, print, stamp are comparable when denoting the perceptible trace or traces left by pressure. **Impression** is the most widely applicable of these terms. It may be used with reference to a mark or trace or a series or combination of marks or traces which are produced by the physical pressure of one thing on another (as of a seal upon wax, of a foot upon mud, or of inked type or an etched plate upon paper) *In general, the first impressions made from an etcher's plate are the most valuable.* The detectives found a clear impression of fingertips on the handle of the door *The dentist must get a plaster of paris impression of the jaw before he can make a denture.* But **impression** may also be used of a definite or distinct trace or traces left on the mind, spirit, character, or memory by the impact of sensation or experience *The shock has left its impression on her nerves.* *His first impression of Paris still remains clear in his memory.* *The incident made no impression on his mind.* **Impress** is often used in place of **impression** especially when the reference is to a clear trace left on the character or the personality by some influence *His father's uprightness has left a lasting impress on his character.* *He reveals the impress of Keats's influence in every poem he writes.* The dusting of the white paper ... is a symbol of the sweeping clear from the mind of all accumulated prejudice that it may receive the impression of beauty in all its freshness and power—Binyon **Imprint** carries a strong implication of sharpness, clearness, or permanence in outline. It may be used in reference to an impression left on a plastic substance *The imprint of a heel in the soil.* *The children left imprints of their feet on the fresh cement of the walk.* The term specifically applies to the printed name of the publisher or, sometimes, of the printer and place and date of publication at the foot of a book's title page *This book bears the imprint of the G. & C. Merriam Company.* **Print** is often interchangeable with **imprint** in the general sense of that word but is more likely to be used when the trace is considered with reference to its retention of every line or characteristic detail of the original *The clear print of a fingertip.* It is the preferred term in combinations *Footprints in the sand.* *Footprints.* **Stamp** applies to an impression produced by or as if by a tool or machine which strikes so hard that it leaves a distinct imprint, often one that serves to authenticate or to approve what is so imprinted, to indicate its origin, or to authorize its passage through the mails. Hence, in extended use, **stamp** designates a marked or conspicuous impress which wins almost immediate recognition *We do wish as many sons of this university as may be to carry forth that lifelong stamp from her precincts—Quiller-Couch* *These works have the "classic" stamp upon them, and have been to the artists of the Far East what Greek marbles have been to us—Binyon* **Ana** *trace, vestige, track: mark, token, sign: stigma, brand, blot, stain* 2 notion, thought, *idea, concept, conception** Ana* image, percept, sense-datum, sensum, sensation: sentiment, opinion, view** Con** explanation, interpretation, elucidation (see corresponding verbs at **EXPLAIN**) 3 *edition, reprint, printing, reissue

**Impressionable** *sentient, sensitive, impressionable, responsive, susceptible*

**Ana** affectable, influenceable (see corresponding verbs at affect): open, *liable, subject, exposed, prone: predisposed, disposed, inclined (see **INCLINE**)

**Impressive** *moving, affecting, poigniant, touching, pathetic*

**Ana** imposing, majestic, august, noble, magnificent, grandiose, *grand: sublime, superb, glorious, splendid: striking, arresting, remarkable, noticeable*

**Ana** unimpressive—Con *ineffective, ineffectual, inefficacious: vain, nugatory, empty, hollow, idle, otiose

**Imprint** n print, *impression, impress, stamp**

**Imprison, incarcerate, jail, immure, intern** mean to confine closely so that escape is impossible or unlikely. The first three words **imprison, incarcerate, jail** imply a shutting up in or as if in a prison, **imprison** being the general term, **incarcerate** the bookish or journalistic term, and **jail** the common word. Distinctively, **imprison** implies seizure and detention in custody and is applicable even when the one confined is not in a prison or jail or suffering a penalty *Deftly and with one arm only, he imprisoned her—Ertz* *The tremendous forces imprisoned in minute particles of matter—Inge* **Incarcerate** implies a shutting up in or as if in a prison cell *He easily obtained bail and will, in all probability, not be incarcerated before his trial.* *We got the bride and bridegroom quietly away... having incarcerated all the newspaper reporters in the little drawing room—Sayers* **Jail** may be preferred to **incarcerate** as a simpler and more generally intelligible term *Risked being jailed for life* Often, however, jail, the verb, following jail, the noun, in its accepted sense connotes imprisonment in a building in which persons are held for short periods, either paying the penalty for minor offenses or for the purpose of awaiting legal proceedings. **Immure** is a literary rather than technical term. When it implies punishment for a crime, it may connote burial alive within a wall; usually, however, the term suggests restriction to closely confined quarters typically as a captive or a devotee to duty or to religion *Constance was now immured with her father, it being her "turn" to nurse—Bennett* *A convent of nuns vowed to contemplation, who were immured there for life, and never went outside the convent walls—L. P. Smith* **Intern** is used chiefly of military or wartime conditions; it seldom implies incarceration and usually suggests a keeping within prescribed limits (as in a guarded camp) and under severe restraints *Intern all enemy aliens for the duration of a war* *Intern all the war refugees entering a neutral country* *The plane was landed safely and the crew was interned—Lawson* **Ana** confine, circumscribe, restrict, *limit: restrain, curb, check**

**Impromptu** unpremeditated, offhand, improvised, *extemporaneous, extemporaneity, extemporary*

**Ana** *spontaneous, impulsive: ready, prompt, quick, apt
improper

Con considered, premeditated, *deliberate, studied, designed, advised: finished, *consummate

improper 1 inappropriate, unfitting, unsuitable, *unfit, inapt, unhappy, infelicitous

Ana wrong, *bad, poor: *amiss, astray: incongruous, *inconsonant

Ant proper — Con right, *good: *regular, natural, normal, typical: *due, rightful, condign: legitimate, licit, *lawful, legal

2 *indecorous, indecent, unseemly, unbecoming, indelicate

Ana unconventional, unceremonious, informal (see affirmative adjectives at CEREMONIAL): *shameless, brazen, impudent, brash, barefaced: obscene, ribald, *coarse, vulgar, gross

Ant proper — Con right, *correct: *decorous, decent, seemly, nice

improve 1 Improve, better, help, ameliorate are comparable when denoting to mend or correct in part or in some degree. Improve, the general term, and better, more vigorous and homely, apply both to objects and to states or conditions that are not of necessity bad. The faculties of the mind are improved by exercise—Locke. (striving to better, oft we mar what's well—Shak.) With a reflexive pronoun improve implies a change for the better within oneself, better a change for the better in one's social or financial status. Had from her youth improved herself by reading—Fordyce. Girls marry merely to "better themselves," to borrow a significant vulgar phrase—Wollstonecraft. To help is to improve while still leaving something to be desired. A coat of paint would help that house.

Ameliorate is used chiefly in reference to conditions that are hard to bear or that cause suffering and implies partial relief or changes that make them tolerable. There is no hope whatever of ameliorating his condition—Peacock. Abolish feudalism or amend, *correct, rectify, reform—Martin Gardner. Gain simply means to make progress especially, but not always, in health. The term is used typically in periodic reports of condition and like improve carries no implication of whether or not progress will continue or result in permanent recovery. (the doctor thinks he is gaining) (he gains very slowly)

Improvised unprepared, impromptu, offhand, *ad hoc, *ad hoc, extemporaneous, extempore, extemporary

Ana & Con see those at IMPROMPTU

impudent *shameless, brazen, barefaced, brash

Ana *impertinent, intrusive, obtrusive, officious, meddlesome: rude, impolite, discourteous, uncivil, ungracious

Ant respectful — Con *shy, modest, diffident, bashful

impugn gainsay, contradict, negative, traverse, *deny, contravene

Ana *attack, assault: refute, rebut, confute, controvert, *disprove

Ant authenticate: advocate — Con *confirm, corroborate, substantiate: *support, uphold, back

Ana impetuous, *stimulus, incitement, stimulant, exciting: urge, passion, lust, *desire, appetite: moving or movement, driving or drive, impelling or impulsion, actuation (see corresponding verbs at MOVE)

impulsive *spontaneous, instinctive, automatic, mechanical

Ana impetuous, *precipitate, headlong, abrupt, sudden, hasty

Ant deliberate (sense 1) — Con *voluntary, intentional: premeditated, considered, *deliberate, designed: *cautious, circumspect, calculating

impure attribute, *ascribe, assign, refer, credit, accredit, charge

Ana attach, *fasten, affix: *accuse, charge, indict: allege, advance, *adduce: intimate, insinuate, hint (see SUGGEST in prep 1) *at, on

2 *at, on

inability, disability are sometimes confused because of their verbal likeness. Although both denote a lack of ability to perform a given act or to follow a given trade or profession, they are otherwise clearly distinguished. Inability implies lack of power to perform; it may suggest mental deficiency or temperamental unfitness, but more often it suggests a limiting factor (as lack of means, lack of health, or lack of training) an inability to laugh—Lucas an inability to see—Huxley the inability of the economic system to effect a cure—Hobson. Disability implies the loss or the deprivation of such power (as by accident, illness, or disqualification); the term is applicable not only to the resulting inability but to whatever it is that makes one unable to do a certain thing or hold a certain office or position

inactive, idle, inert, passive, supine mean not engaged in work or activity. Inactive is applicable to anyone or to anything that for any reason is not currently in action, in operation, in use, or at work. Inactive machines express the idea that children are usually inactive. An inactive charge account expresses the idea that children are usually inactive. In winter, when . . . mosquitoes, exceptionally large, numerous, and aggressive in this section, are inactive—Amer. Guide Series: La.) Idle (see also VAIN 1) applies chiefly to persons who are without occupation or not busy at the moment, but it is also applicable to their powers or to the implements they use. Why stand ye here all the day idle? They say unto him, Because no man hath hired us—Mt 20:6-7) Though his pen was now idle, his tongue was active—Macaulay) Is a field idle when it is fallow?—Shaw) Every idle miner directly and individually is obstructing our war effort—Roosevelt) Inert as applied to a thing (as matter, a substance, or a drug) implies inherent lack of power to set itself in motion or by itself to produce a given or understood effect (comets) were now shown to be mere chunks of inert matter, driven to describe paths round the sun by exactly the same forces as prescribed the orderly motions of the planets—Jeans) Commercial fertilizers consist of three to five hundred pounds of available plant food . . . extended with harmless inert materials to make a ton of product—Morrison) As applied to persons or their activities, inert suggests inherent or habitual indisposition to activity or extreme difficulty in stimulating or setting in motion (inert citizens are not easily aroused to action by evidence of graft or waste) (many students are too inert to derive much stimulation from the books they read) (the inert were roused, and lively nature naps away!—Wordsworth) Passive implies immobility or a lack of a positive reaction when subjected to external driving or compelling forces or to provocation (the mind is wholly passive in the reception of all its simple ideas—Locke) (to sit as a passive bucket and be pumped into . . . can in the long run be exhilarating to no creature—Carlyle) (depreciate . . . the passive reception of everything that comes from a foreign press—Warfel) In an extended sense passive often implies submissiveness without such positive responsiveness as would help the person or side that attacks or seeks to impose its will (passive obedience) but it still more often implies a failure to be provoked to action or resistance (to be passive in calamity is the province of no woman—Meredith) Supine implies abject or supine but it still more often implies a failure to be provoked to action or resistance (to be passive in calamity is the province of no woman—Meredith) Supine implies abject or supine but it still more often implies a failure to be provoked to action or resistance (to be passive in calamity is the province of no woman—Meredith) Supine implies abject or supine but it still more often implies a failure to be provoked to action or resistance (to be passive in calamity is the province of no woman—Meredith) Supine implies abject or supine but it still more often implies a failure to be provoked to action or resistance (to be passive in calamity is the province of no woman—Meredith) Supine implies abject or supine but it still more often implies a failure to be provoked to action or resistance (to be passive in calamity is the province of no woman—Meredith)

Ant intermittent —Con periodic, recurrent (see IN-TERMITTENT)

incessant *adultery, fornication
Ana *impotence, impotency

inciting *continual, perennial
Ana perpetual, *incessant, *adultery, fornication

incisive, trenchant, clear-cut, cutting, biting, crisp are
Incisive usually implies not only qualities in the thing so cut through but also the production of such an effect upon the person perceived; thus, an incisive voice or tone of voice is one that is not only sharply clear and edged but one that affects the nerves of the ear as though it were cutting into them; an incisive command is so sharply imperative and direct that it can neither be misunderstood nor disobeyed —Bismarck's will had not that incisive,rapier quality, that quality of highly tempered steel—lessened or memory; it therefore often suggests a caustic or mordant quality —her biting words—domineering and censorious of any that stood in his way, with a biting wit—T. D. Bacon

Crisp (see also FRAGILE) suggests not only incisiveness but either vigorous terse ness of expression or a braving or invigorating quality —the brittle, crisp sentence, decisive as a child's expression of its needs—Pater (it is a relief to come to a diction that is frequently crisp, and incisive, and terse—Lowes)

A languorous work . . . with occasional interludes of crisp brilliance—Anthony West

incentive, trenchant, clear-cut, cutting, biting, crisp are
Ana *subordinate, secondary, collateral: associated, related, linked, connected (see JOIN)

Ant essential (sense 2) —Con fundamental, cardinal, vital (see ESSENTIAL)

incise engrave, etch, chisel, *carve, sculpture, sculpt, scalp
Ana imprint, print, stamp, impress (see corresponding nouns at IMPRESSION): depict, delineate, limn (see REPRESENT)

Incisive, trenchant, clear-cut, cutting, biting, crisp are
Ana *subordinate, secondary, collateral: associated, related, linked, connected (see JOIN)

Ant essential (sense 2) —Con fundamental, cardinal, vital (see ESSENTIAL)

incise engrave, etch, chisel, *carve, sculpture, sculpt, scalp
Ana imprint, print, stamp, impress (see corresponding nouns at IMPRESSION): depict, delineate, limn (see REPRESENT)

incite, instigate, abet, foment are comparable when they mean to spur on to action or to excite into activity. Incite stresses stirring up and urging on; frequently it implies active prompting —the riot was incited by paid agitators—it was just like Lady Pinkerton . . . to have gone round to Hobart inciting him to drag Jane from my office—Rose Macaulay

Instigate, in contrast with incite, unequivocally implies prompting and responsibility for the initiation of the action; it also commonly connotes underhand edness and evil intention; thus, one may be incited but not instigated to the performance of a good act; one may be incited or instigated to the commission of a crime —the early persecutions were . . . instigated . . . by the government as a safety valve for popular discontent—Inge

His peculiar tastes had instigated him to boldness in some directions—Edmund Wilson

Abet tends to lose its original implication of baiting or hounding on and to emphasize its acquired implications of seconding, supporting, and encouraging —unthinkingly, I have laid myself open to the charge of aiding and abetting the seal cutter in obtaining money under false pretenses—Kipling

(Mr. Howells . . . seconded him as often as not in these innocuous, infantile ventures, abetting him in the production of . . . plays of an abysmal foolishness—Brooks

Foment stresses persistence in goading; thus, one who incites rebellion may provide only the initial stimulus; one who foments rebellion keeps the rebellious spirit alive by supplying fresh incitements —the apparent moral certainties of the mid-thirties—such as the notion that wars are fomented by munitions makers—F. L. Allen

Ana stimulate, excite, *provoke, pique, galvanize: arouse, rouse,*stir

Ant restrain —Con curb, check, inhibit (see RESTRAIN): *frustrate, thwart, foil, circumvent, baffle, balk, outwit
incitement *stimulus, stimulant, excitant, impetus

Ana spur, goad, incentive, inducement, impulse, *motive, spring: provoking or provocation, excitement, stimulation, piqing (see corresponding verbs at PROVOKE): motivation, activation, actuation (see corresponding verbs at ACTIVATE)

Ant restraint: inhibition

incite vb 1 lean, *slant, slope

Ana bend, *curve: *swerve, veer, deviate: deflect, *turn

2 Incite, bias, dispose, predispose mean to influence one to take a stated or implied attitude to something or to someone or to have such an attitude as a result of prior influences. Incite (see also SLANT) implies that the mind or the feelings have been so affected that one is already leaning toward one of two or more possible conclusions, projects, decisions, or objects (as of affection). The word suggests no more than the tipping of the balance toward one and therefore connotes merely a tendency to favor one more than the other or others (such considerations are not supposed to be entertained by judges, except as excluding them to one of two interpretations—Justice Holmes) <the vast majority of people do not incline to be drunkards—Fishbein> <Mr. Owen inclines to cover up Lloyd George's odious treatment of King George V—Sykes> (on this visit I found Australia generally inclined to be inimical—Heiser) Bias implies a stronger and more settled leaning than incline; it usually connotes a prejudice for or against (it would be mortifying to . . . many ladies could they . . . understand how little the heart of man is affected by what is costly or new in their attire; how little it is biased by the texture of their muslin—Austen> (she was unfairly biased towards the Liberal party in the state, and too apt to approve of the measures they passed—Rose Macaulay) Dispose differs from incline in stressing the implication of putting one into a frame of mind that is proper or necessary for the end in view or that makes one ready or willing to do something or to take some stand; therefore it often connotes the sway of one's disposition, mood, temper, or attitude (his open face disposes one to believe him innocent) (the depression disposed many persons to become more thrifty) (a thinker so little disposed to treat the names of these religious philosophers with respect—Inge) (those disposed to violate or evade the decrees of the sovereign—Cohen) Predispose differs from dispose in implying the existence of the frame of mind or of the proper disposition in advance of the opportunity to manifest itself in action (circumstances are predisposing men to accept principles which they attacked a few years ago) (if she is flattered and indulged, she will be predisposed to be favorable to him) (we are much influenced in youth by sleepless nights; they disarm, they predispose us to submit to soft occasion—Meredith) Predispose is also used of a physical tendency or condition which makes one susceptible to a given infection or disease (predisposed to tuberculosis) (the coldness and dampness . . . predispose the miner to rheumatism—Pose) (Ant predisposed to tuberculosis) (the geniuness of one's disposition, mood, temper, or attitude—Austen)

incidence

Ana include, *comprehend, embrace, involve, imply, subsume are comparable when meaning basically to contain something within as a part or portion of a whole. Include suggests that the thing included forms a constituent, component, or subordinate part (the genus Viola includes the pansy as well as various violets) (the collection will not include any examples of the artist's earlier paintings) (an edition of the Bible which includes the Apocrypha) (it would not be argued today that the power to regulate does not include the power to prohibit—Justice Holmes) (few of the great men of our early national history extended their humanitarianism to include the Indian tribes—Hyman) Comprehend suggests that within the scope or range of the whole under consideration (as the content of a term, a concept, a conception, or a view) the thing comprehended is held or enclosed even though it may or may not be clearly distinguished or actually distinguishable (it was not tolerance; it was something greater that comprehended tolerance but went far beyond it—G. W. Johnson) (for philosophy's scope comprehends the truth of everything which man may understand—H. O. Taylor) Embrace (see also ADOPT) suggests a reaching out to gather the thing embraced within the whole (as the content of a mind or of a course of study or a construction or interpretation of a law) (the scene before the reddleman's eyes . . . embraced hillocks, pits, ridges, acclivities, one behind the other—Hardy) (by Baudelaire's time it was no longer necessary for a man to embrace such varied interests in order to have the sense of the age—T. S. Eliot) (whatever disagreement there may be as to the scope of the phrase "due process of law," there can be no doubt that it embraces the fundamental conception of a fair trial—Justice Holmes) Involve suggests inclusion by virtue of the nature of the whole, whether by its natural or inevitable consequence (surrender involves submission) (it is quite probable that many of those who would make the best doctors are too poor to take the course. This involves a deplorable waste of talent—Russell) or one of the antecedent conditions (clerkship did not necessarily involve even minor orders—Quiller-Couch) (I should . . . supply the humanistic elements of education in ways not involving a great apparatus of learning—Russell) or one of the parts or elements which comprise it by necessity or definition (that fusion of public and private life which was involved in the ideal of the Greek citizen—Dickinson) Imply is very close to involve in meaning but stresses a thing's inclusion not, as involve does, by the nature or constitution of the whole but as something which can be inferred because hinted at (see also SUGGEST 1) (the tone of the book was implied by shrewd advertisements featuring the author's open, smiling face—J. D. Hart) or because normally or customarily part of its content especially by definition (embrace implies a reaching out to gather to oneself or within one's grasp) (emergency and crisis imply conflict—Langfield) or because invariably associated with the thing under consideration as its cause or its effect or as its maker or its product (a watch implies a watchmaker) For this reason imply may, in comparison with involve, suggest a degree of uncertainty; thus, silence is often said to imply consent, but it would be rash to say that it involves consent. Subsume, a technical term in logic, philosophy, and the classificatory sciences, implies inclusion within a class or category (as an individual in a species or a species in a genus) or a being comprehended by a general principle or proposition (absolutely generic unity would obtain if there were one sumnum genus under which all things without exception could be eventually subsumed—James)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
incompatible

**Ana** unrivaled, unmatched, unapproached, unequalled (see affirmative verbs at MATCH)

**Con** ordinary, *common: fair, mediocre, *medium, second-rate, average

**incompatible** incongruous, *inconsonant, inconsistent, discordant, discrepant, uncongenial, unsympathetic

**Ana** antagonistic, counter, *adverse: *antipathetic, adverse: contrary, contradictory, antithetical, antipodal, antipodean, *opposite: irreconcilable, unconformable, unadaptable (see corresponding affirmative verbs at ADAPT)

**Ant** compatible —**Con** congruous, *consonant, consistent, congenial: harmonizing or harmonious, corresponding or correspondent, agreeing (see corresponding verbs at AGREE)

**incompetent** unqualified, *incapable

**Ana** inefficient, *ineffective

**Ant** competent —**Con** *able, capable, qualified: skilled, *proficient, expert, masterly

**incongruous** *inconsonant, uncongenial, incompatible, inconsistent, discordant, discrepant, unsympathetic

**Ana** alien, foreign, extraneous (see EXTRINSIC): grotesque, bizarre, *fantastic

**Ant** congruous —**Con** fitting, suitable, appropriate, meet, *fit: *consonant, compatible, congenial, consistent

**inconsistent** *inconsonant, incompatible, incongruous, uncongenial, unsympathetic, discordant, discrepant

**Ana** divergent, disparate, diverse, *different: irreconcilable (see corresponding affirmative verb at ADAPT)

**Ant** consistent —**Con** *consonant, compatible, congruous: according or accordant, agreeing, tallying, jibing, corresponding or correspondent (see corresponding verbs at AGREE)

**inconsonant, inconsistent, incompatible, incongruous, uncongenial, unsympathetic, discordant, discrepant** mean not in agreement with one another or not agreeable one to the other. Except for this denial of reciprocal agreement or agreeableness, the first six words correspond to the affirmative adjectives as discriminated at CONSONANT especially in regard to their specific implications. Discordant is more common than inconsonant when applied, in the sense of devoid of harmony, to things coming into contact or comparison with each other (discordant voices) (the discordant views of cabinet officers) Discrepant is often preferred to inconsistent in attributive use especially when a wide variance between details of two things that should be alike or consistent is to be suggested; thus, “two discrepant accounts of an accident” suggests more obvious differences in details than “their accounts are inconsistent.” Inconsistent is more frequent in predicative use.

**Ant consonant** —**Con** congruous, compatible, consistent, congenial (see CONSONANT): harmonized or harmonious, attuned (see corresponding verbs at HARMONIZE)

**inconstant** fickle, capricious, mercurial, unstable mean lacking or showing lack of firmness or steadiness in purpose, attachment, or devotion. Inconstant, usually applied to persons though sometimes to things, suggests an inherent or constitutional tendency to change frequently; it commonly implies an incapacity for fixity or steadiness (as in one’s affections, aspirations, or course) (shrew not by the moon, the inconstant moon, that monthly changes in her circled orb—Shak.) (people seldom know what they would be at, young men especially, they are so amazingly changeable and inconstant—Austen) (Spanish assistance from the sea was inconstant, almost accidental—Jones) Fickle retains only a hint of its basic implication of deceitfulness or treacherousness, but its basic implications of instability and unreliability are colored by the suggestion of an incapacity for being true, steadfast, or certain (Fortune, Fortune! all men call thee fickle—Shak.) (bitter experience soon taught him that lordly patrons are fickle and their favor not to be relied on—Huxley) (she is fickle! How she turns from one face to another face—and smiles into them all!—Milly) Capricious suggests qualities which manifest or seem to manifest a lack of guidance by a power (as law, authority, or reason) that tends to regularize movements or acts. When used in reference to persons, it suggests guidance by whim, mood, freak, or sudden impulse (Louis XIII . . . a boy of eight at his accession . . . grows up capricious, restricted and cold, hardly normal—Bello) (he judged her to be capricious, and easily wearied of the pleasure of the moment—Wharton) When used in reference to things, it implies an irregularity, an uncertainty, or a variability that seems incompatible with the operation of law (a capricious climate) (the capricious hues of the sea—Lamb) (the capricious uncertain lease on which you and I hold life—Quiller-Couch) (the olive is slow-growing, capricious in its yield—Huxley) Mercurial is a synonym of the other words here discriminated only when it carries a strong implication of resemblance to the metal mercury and its fluctuations when subjected to an external influence. The word, however, also carries implications (as of swiftness, eloquence, cleverness, and volatility) derived from its cultural association with the god Mercury. Consequently when it applies to persons, their temperaments, or their natures, it usually suggests a pleasing even if baffling variability, an amazing succession of gifts capable of being displayed at will or at need, and such other qualities as sprightliness, restlessness, flashing wit, and elusive charm (the gay, gallant, mercurial Frenchman—Disraeli) (I was ardent in my temperament; quick, mercurial, impetuous—Irving) (it seems impossible that her bright and mercurial figure is no longer among us, that she will delight us no more with the keen precision and stabbing brilliance of that jewelled brain—New Republic) Unstable, which is applicable to persons as well as to things, implies a constitutional incapacity for remaining in a fixed position mentally or emotionally as well as physically; it suggests, therefore, such fluctuations in behavior as frequent and often unjustified changes in occupation or in residence or sudden and startling changes of faith or of interests (unstable as water, thou shalt not excel—Gen 49:4) (his nature, lamentably unstable, was not ignoble—Macauley) (woman’s love . . . is volatile, insoluble, unstable—M. L. Anderson) (an unstable world economy . . . subjected to periods of wars, inflation, and depression—Farmer’s Weekly)

**Ana** *changeable, changeful, variable, protean, mutable: *faithless, disloyal, false, treacherous, traitorous, perfidious: volatile, frivolous, light, light-minded (see corresponding nouns at LIGHTNESS)

**Ant constant** —**Con** *reliable, dependable, trustworthy, trusty: true, loyal, staunch, steadfast, *faithful

**inconvenience** vb Inconvenience, incommode, disincommode, trouble are comparable when they mean to subject to disturbance or annoyance. Inconvenience usually suggests little more than interference with one’s plans, one’s comfort, or one’s freedom of action; it seldom carries suggestions of more than a temporary or slight disturbance or annoyance (I hope the new arrangement will not inconvenience you) (do not inconvenience him by intruding upon him while he is writing) (she was frequently inconvenienced by the strong scent of tobacco which the fresh breeze conveyed through the porthole—Wylie) Incommode and, even more, disincommode carry a somewhat heightened suggestion of disturbance or annoyance, but not enough to imply actual suffering or injury; rather, they connote some mental agitation (as embarrassment or
incorporate 432 incur

Increase, enlarge, augment, multiply mean to increase incorporeal

Incorporate vb embody, assimilate, *identify An incorporate 432 incur

literary and most ordinary of these terms, usually implies infection or something analogous to it <i>catch a heavy cold</i> (religion, in point of fact, is seldom taught at all; it is <span class="highlight">caught</span>, by contact with someone who has it—Inge)

<i>Ana</i> *get, obtain, acquire

<i>Con</i> *escape, elude, evade, avoid, shun, eschew: avert, ward, *prevent

indecisive unconcerned, *indifferent, aloof, detached, uninterested, disinterested

<i>Ana</i> *abstracted, preoccupied, absent, absentminded, distraught

<i>Ant</i> curious, inquisitive —<i>Con</i> prying, snoopy, nosy (see <i>CURIOUS</i>): intrusive, meddlesome, *impertinent: observing or observant, remarking, noticing, noticing (see corresponding verbs at <i>SEE</i>)

indecisive unbecoming *indecisive, indecorous, unbecoming

<i>Ana</i> obscene, ribald, *coarse, gross, vulgar: lewd, lascivious, *licentious: *immoral: *offensive, revoltin, repulsive, repugnant, loathsome

<i>Ant</i> decent —<i>Con</i> *chaste, pure, modest: virtuous, *moral, ethical

indecisive, improper, unseemly, indecent, improper, *indecorous, unbecoming

<i>Ana</i> indecorous in carrying a stronger implication of interrupted activity; often they specifically suggest an extraordinary ability to go on continuously and without a break while <i>indecisive</i> and <i>indecisive</i>, by contrast, often imply repeated returns over a very long course of time <i>indecisive</i> for a lost child <i>indecisive</i> efforts to attract attention <i>indecisive</i> devotion to a cause <i>indecisive</i> reiteration of a call <i>indecisive</i> pursuit of an ideal <i>indecisive</i> activity engaged in <i>indecisive</i> to the end of his life he was an <i>indecisive</i> worker—McGiffert

<i>Ant</i> unyielded differs little from <i>indecisive</i> in its meaning, but it is more often applied directly to the person or thing concerned than to the activity engaged in <i>indecisive</i>, so long a worshipper of nature, hitherto unyielded in that service—Wordsworth

<i>Ant</i> the unyielded and disinterested seeker after truth—Jowett <i>Ant</i> men who recalled the days of the Armada did not feel proud over James's unyielded appeasement of Spain—Bush

<i>Ant</i> Unflagging differs little from <i>indecisive</i>, for it too stresses a display of power to continue without signs of weariness; but it also stresses no diminution of activity, and it applies to a person's powers rather than to the person himself <i>indecisive</i> attention <i>indecisive</i> <i>Ant</i> a purpose . . . which he pursued with unflagging energy—Froude

<i>Ant</i> such a hold on the imaginations of scholars . . . that they pursued it with unflagging zeal—Southern

<i>Ana</i> diligent, assiduous, sedulous, industrious, *busy: dogged, pertinacious (see <i>OBSTINATE</i>): energetic, strenuous, *vigorous

<i>Con</i> wearying, tiring (see <i>TIRE</i> vb): lagging, dawdling, procrastinating (see <i>DELAY</i>): indolent, feainet, slothful, *lazy

indefinable *indefinable, indecipherable

<i>Ana</i> indecisive indecent, unseemly, improper, *indecorous, unbecoming

<i>Ant</i> *coarse, gross, vulgar, obscene: *rude, rough, crude, callow, uncouth: lewd, wanton (see <i>LICENTIOUS</i>)

<i>Ant</i> delicate, refined —<i>Con</i> pure, modest, *chaste, decent
indemnify 434 indifferent

**indemnify** reimburse, recompense, compensate, remunerate, *pay, repay, satisfy

**indemnity** *reparation, redress, amends, restitution

**indented** article, *bound, bond

**independence** autonomy, freedom, sovereignty, autarchy, autarky (see under FREE adj)

**Ana** liberty, *freedom, license

**Ant** dependence —Con *subordination, subjection (see corresponding adjectives at SUBORDINATE); *servitude, slavery, bondage

**independent** autonomous, *free, sovereign, autarchic, autarkic

**Ana** *alone, solitary: self-governed, self-ruled (see base words at GOVERN)

**Ant** dependent —Con *subordinate, subject, tributary: *subservient, servile, slavish: relative (see DEPENDENT)

**indescribable** *unutterable, inexpressible, ineffable, un-speakable, indefinable

**indicate**, betoken, attest, bespeak, argue, prove can all mean to give evidence of or to serve as ground for a valid or reasonable inference. One thing indicates another when the former serves as a symptom or a sign pointing to the latter as a justifiable or necessary conclusion, treatment, or remedy (the facts revealed by the auditor’s investigation indicate that the peculiarations were not confined to one person) (conflicting findings indicate further neurological research—Collier’s Yr. Bk.) (such symptoms indicate an operation) (the results . . . are believed to be the first to indicate a possible magnetic effect directly attributable to a solar eclipse—Harradon) One thing betokens another when the former serves as visible or sensible evidence or, more narrowly, as a presage or portent of the latter (his appearance betokened complete security—Meredith) (the black clouds betoken a storm) (like a red morn, that ever yet bespeaks the seaman, tempest to the field—Shak.) (towering business buildings, great warehouses, and numerous factories betoken its importance—Amer. Guide Series: N. C.) One thing attests another when the former serves as indisputable evidence of the latter and has the force though not necessarily the character of legal testimony or documentary proof (the great seal . . . attests . . . the verity of the presidential signature—John Marshall) (their success is attested by the marvelous exactness with which eclipses are foretold—Darrow) One thing bespeaks another when the former leads to the inference that it is the outward manifestation of the latter (to Him whose works bespeak his nature—Cowper) (the large abstinence from voting in our elections must certainly bespeak an indifference not without meaning—Frankfurter) (a glint of pride in her eyes that bespoken her new dignity—Lasswell) One thing argues another when the former gives good reason for belief in the existence, the reality, or the presence of the latter (his evasion, of course, was the height of insolence, but it argued unlimited resource and verve—Kipling) (to the grub under the bark the exquisite fitness of the woodpecker’s organism to extract him would certainly argue a diabolical designer—James) (a becoming deference argues deficiency in self-respect—Whitehead) One thing proves another when the former serves to demonstrate or manifest the truth of the latter (your language proves you still the child—Tennyson) (to become a writer was, however, in Thoreau’s mind; his verses prove it, his journal proves it—Canby)

**Ana** intimate, hint, *suggest: evince, evidence, demonstrate, manifest, *show: import, signify, denote, *mean

**Ana** blame, denounce, condemn (see CRITICIZE)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
indignation: *anger, ire, rage, fury*

*native, autochthonous, endemic, aboriginal*

*poverty, destitution, privation*

*indirect, circuitous, roundabout*

*rich, wealthy, affluent*

*indifferent, aloof*

*complacent, smug, self-satisfied: indifferent, unconcerned*

*injury, wrong, injustice, grievance: offending, offense, outraging or outrage (see corresponding verbs at OFFEND)*

*affront, insult*

*circuitous, roundabout are comparable when applied to ways, routes, or means with the meaning not leading by a straight path to a destination or goal. Indirect basically implies departure from the straight and short line between two points (by what bypaths and indirect crooked ways I met this crown—Shak.) In its extended use indirect implies following a course that is not plain, obvious, explicit, or straightforward (Jane's mother was making indirect but perfectly legitimate inquiries into his prospects—Mary Austin) INDIRECT TAXATION <indirect taxation> we have seen grow up . . . a whole new family of subtle, indirect influences—Kefauver> *man's possible development from non-Homo stock, must be based upon indirect evidence—R. W. Murray* CIRCUITOUS implies not only indirection but usually a winding and, because of its length, slow way or course (they were forced to take a circuitous route on account of the floods) <two lines possible—the one direct by sea, the other circuitous through Gaul—Mahan> paths . . . more circuitous, but not less sure to reach the point marked out by Heaven—Wordsworth> <in speech and in action most Japanese are indirect and circuitous—Buchanan>* Roundabout may be used interchangeably with circuitous, but specifically it implies a following of a more or less circular or semicircular course from one point to another; the term more often than indirect or circuitous, especially in its extended use, implies deliberate, often blameworthy evasion or avoidance of the direct course or way (take a roundabout course to one's destination) <a roundabout explanation> <the roundabout, diffident appeal for pity—Day Lewis> <she declared that she would have nothing to do with any roundabout ways, but go openly and instantly to law—Burney>* Devious, oblique, crooked: winding, sinuous, tortuous

Direct: forthright, straightforward

Indiscriminate, wholesale, sweeping are comparable when they mean including all or nearly all within the range of choice, operation, or effectiveness. Something is indiscriminate which does not distinguish the deserving from the undeserving but acts (as in giving, treating, selecting, or including) regardless of individual deserts or merits <indiscriminate charity> <indiscriminate praise> <the critic does a wrong who brings them under his indiscriminate censure—Quiller-Couch> <an indiscriminate lavish Irish meal, sausages, eggs, bacon, all together on one plate—O'Flaherty>* Wholesale often implies indiscriminateness, but sometimes it carries almost no such suggestion; however, it regularly stresses extensiveness, usually suggesting that no person or thing within the range of choice, operation, or effectiveness has escaped <the wholesale vaccination of a community> <communism can spread only . . . as a development of existing economic civilization and not by a sudden wholesale overthrow of it—Shaw> <the continuous battle of this generation against wholesale character assassination through the application of indiscriminate labels—Roy> Sweeping implies a reaching out in or as if in a wide circle to draw in everyone or everything within range; it usually carries a stronger suggestion of indiscriminateness than wholesale and often specifically implies exceeding the bounds of right, justice, or jurisdiction or suggests generality rather than a concrete, specific character <sweeping reforms> <sweeping accusations> <a sweeping and consummate vengeance for the indignity alone should satisfy him—Meredith> <the statute is of a very sweeping and general character—Justice Holmes>* Promiscuous, motley, heterogeneous, assorted, miscellaneous: uncritical, superficial, shallow

Selective: discriminating

Indispensable essential, necessary, requisite, necessary

Vital, cardinal, fundamental, essential

Indispensable

Indispensible disinclined, loath, aversive, hesitant, reluctant

Inimical, hostile, antagonistic, antipathetic (see corresponding nouns at ENMITY)

Indisposed answer—Con eager, keen, anxious: friendly, amicable, neighborly: sympathetic, responsive (see TENDER)

Individually 1 particular, specific, special, especial

Indiscernible

Indissoluble

Indolent lethargic, sluggish, comatose: inactive, inert, idle, passive, supine: languid, languorous, lackadaisical, listless

Industrious busy, diligent, assiduous, industrious

Industrious

Indomitable invincible, unconquerable, impregnable, impuugnable, unassailable, invulnerable

Indomitable

Induce persuade, prevail, get are comparable when meaning to move another by arguments, entreaties, or promises to do or agree to something or to follow a recommended course. Induce usually implies overcoming indifference, hesitation, or opposition especially by offering for consideration persuasive advantages or gains that depend upon the desired decision being made; the term usually suggests that the decision is outwardly at least made by the one induced rather than forced upon him by the one that induces <only those . . . doctors who were possessed of superior courage and capable of supreme self-sacrifice could be induced to continue at the work—Heiser>*
is often used to imply attentions that are likely to have this effect ("She talks a great deal, sir," Elizabeth apologized. "She's our only little girl, and I'm afraid we spoil her"—Deland) Baby implies excessive attentions, especially of the kind given to those who are unable to care for themselves and need the constant attention of a mother or nurse; it also carries a strong implication of humoring or pampering (babying Americans, telling them what they should read and should not read—Sokolsky) (Lydia had two methods of taking men down: babying them and harping on their faults—Edmund Wilson) Mollycoddle usually implies babying; it distinctively suggests inordinate attention to another's health or physical comfort or undue efforts to relieve another of strain or hardship. It often also connotes, as the effect or danger of such treatment, effeminateness or infantilism (schools where grown boys and girls are mollycoddled) (look here, mother dear: I'm as well as ever I was, and I'm not going to be mollycoddled any more—Braddon)

Ana favor, accommodate, *oblige: gratify, *please, regale, delight

Ant discipline (others): abstain (with reference to oneself, one's appetite)

indulgence forbearance, tolerance, clemency, mercifulness, leniency (see under FORBEARING)

Ana *mercy, charity, lenity, grace: kindness, benignity or benignity, benignness, kindliness (see corresponding adjectives at KIND): mildness, gentleness (see corresponding adjectives at SOFT)

Ant strictness —Con severity, sternness (see corresponding adjectives at SEVERE): rigorousness, rigidity (see corresponding adjectives at RIGID): harshness (see corresponding adjective at ROUGH)

indulgent lenient, *forbearing, tolerant, clement, merciful

Ana humor, pampering (see INDULGE): forgiving, pardoning, condoning, excusing (see EXCUSE vb): benignant, benign, *kind, kindly: mild, gentle (see SOFT)

Ant strict —Con stern, *severe: rigorous, stringent (see RIGID): harsh (see ROUGH)

indulgently forbearingly, tolerantly, clemently, mercifully, leniently (see under FORBEARING)

indulge vb *harden, solidify, petrifY, cake

Ana season (see HARDEN): fix, establish, *set

indurate vb *hardened, callous

Ana rigid, *stiff, inflexible: obdurate, adamant, adamantine, inexorable, *inflexible

Ant pliable —Con *flexible, pliant, ductile, malleable: flexible, *elastic, supple, resilient

industrious diligent: *busy, assiduous, sedulous

Ana *active, operative, live, dynamic: persevering, persisting or persistent (see corresponding verbs at PERSIST): *indefatigable, tireless, untiring, unflagging, unwearied

Ant slothful, indolent —Con idle, *inactive, inert, supine: *lazy, faineant: *lethargic, sluggish, torpid

industry *business, trade, commerce, traffic

inebriate n *drunkard, alcoholic, dipsomaniac, sot, soak, toper, tosspot, tippler

Ant teetotaler

inebriated adj *drunk, drunken, intoxicated, tipsy, tight

ineffable *unutterable, inexpressible, unspeakable, indecipherable, indefinable

Ana *celestial, heavenly, empyrean, empyreal: ethereal (see AIRY): spiritual, divine, *holy, sacred: transcendent, transcendental, ideal, *abstract

Con expressible, utterable (see corresponding verbs at EXPRESS)

ineffective, ineffectual, inefficient, inefficacious mean not producing or incapable of producing results. Except for
ineffactual 437

depth and ineluctable—A. S. Paton

inescapable and unescapable carry a stronger suggestion than either inevitable or ineluctable that the person concerned would, if he could, avoid what must be but is convinced of its inexorable character his inescapable fate continuity in design appears to be inescapable—Gloag

the unescapable expansion of the nation’s foreign policy—D. S. Freeman

Unavoidable carries a weaker implication of necessary occurrence than the other terms, but it does imply that the exercise of foresight or care has not enabled one to escape what has occurred <unavoidable delays> <an unavoidable accident>

An a certain, necessary: determined, settled, decided (see decide): inexorable, inflexible

Ant evitable —Con escapable, avoidable, eludable, evadable (see corresponding verbs at ESCAPE): preventable (see corresponding verb at PREVENT) 2 certain, necessary

An a infallible, inerrant, unerring: perfect, entire, whole: definitive, determinative, decisive, conclusive

Inexorable obdurate, adamant, adamantine, inflexible

An a rigid, rigorous, strict: resolute, steadfast (see FAITHFUL): implacable, implacable: inescapable: impenetrable, relentless, merciless: grim

Ant inexorable —Con compassionate, responsive, sympathetic, tender: merciful, clement, lenient, indulgent, forbearing

Inexpressible unutterable, ineffable, unspeakable, inexpressible, indefinable

Ant tenuous, rare (see THIN): infinite, boundless, illimitable

Ant expressible

Inexpugnable unassailable, impregnable, invincible, unconquerable, invulnerable, indomitable

An a uncombatable, irresistible, unopposable (see corresponding affirmative verbs at RESIST)

Ant expugnable —Con assailable, attackable, stormable (see corresponding verbs at ATTACK)

Infallible, inerrable, inerrant, unerring are comparable when they mean incapable, or manifesting incapability, of making mistakes or errors. Infallible occurs in this narrow sense chiefly in reference to something (as a person, institution, or book) that is accepted as the divinely inspired medium for the revelation of moral or spiritual truth (the pope is held by Roman Catholics to be infallible only when he speaks ex cathedra and defines a doctrine or a rule of morals held by the church) (believed in an infallible Bible—Sweet) (no mathematician is infallible; he may make mistakes; but he must not hedge—Eddington) Inerrable and inerrant are erudite synonyms of infallible and may be preferable to the latter when it is desired to avoid connotations associated with the notion of papal infallibility (decision from the inerrable and requisite conditions of sense—Brownie) (not an inerrable text—Gladstone) but inerrant may imply not so much the incapacity for making mistakes or errors as the fact of their absence <an inerrant account of the battle> (the Church was ubiquitous, omniscient, theoretically inerrant and omnicompetent—Coulton) (the inerrant literary sense which gave us the Prayer Book Collects—Sperry) Unerring implies inerrancy, but it stresses reliability, unremitting, exactness, or accuracy (as of aim or observation) (a marksman of unerring aim) (an unerring eye for fleet expression of the moral features of character—J. R. Lowell) (a man is infallible, whose words are always true; a rule is infallible, if it is unerring in all its possible applications—Newman) (a man’s language is an unerring index of his nature—Binyon)

An a certain, inevitable, necessary: impeccable, flaw-
Infectious, contagious, communicable, catching

infamous nefarious, flagitious, iniquitous, *vicious, villainous, corrupt, degenerate

Ana ignominious, disgraceful, displeasurable, shameful

 delaude (see FAME): degradation, humiliation, de-basement, abasement (see corresponding verbs at ABASE)

Con honor, glory, renown, celebrity, *fame, repute: prestige, authority, *influence, credit, weight

infancy minority, nonage denote the state or period of being under the age established by law for the attainment of one’s full civil rights and independence of guardianship.

Infancy is seldom used in this denotation outside of legal documents and court reports; in these it is especially likely to be chosen when reference is made to the condition or status of the person who is not of age (<the defendant pleaded infancy at the time the lease was made>). Minority is widely used in general as well as in legal writing and is the word most often chosen when reference is made to the period or term of being under age (<he inherited the title during his minority>). Nonage is the equivalent of infancy and minority in their legal senses, but it is often distinguishable from them in its acquired connotations and by its greater susceptibility to literary and extended use. Nonage may suggest mere immaturity (<an adolescent Parisienne . . . bored with the nonage of her contemporaries—NewswEEK>). Not infrequently it suggests adolescence and its weaknesses and strengths and may be thought of as the opposite of dotage, or senility (the brook we leaped so nimbly in our nonage is a mere ditch or too wide for our nonage—HILLYER). A world which is still after all young and has plenty of time to make good the mistakes of its nonage—Times Lit. Sup.>

infatuated 1 *fond, besotted, insensate

Ana deluded, deceived, beguiled, misled (see deceive): duped, gulled, befuddled (see DUPE): foolish, silly, fatuous, asinine (see SIMPLE)

Con sensible, prudent, sane, judicious, *wise: *rational, reasonable

2 *enamored

infected Infectious, contagious, communicable, catching in their basic use as applied to diseases are distinguishable though closely similar in meaning. Infectious designates a disease resulting from the invasion of and multiplication in the body by germs (as bacteria, protozoans, or viruses) that produce toxins or destroy or injure tissues. Contagious more precisely designates an infectious disease caused by receiving living germs directly from a person afflicted with it or by contact with a secretion of his or some object he has touched. Communicable in this relation is nearly equivalent to infectious, but it emphasizes the transmissibility of the disease rather than the method by which it is acquired. Catching, a less formal term, is close in meaning to contagious, but it implies even more the dangers of contact.

Infectious, contagious, and catching all have extended use but in such use the fine distinctions exhibited in their technical senses are not carried over with the result that they are nearly exact synonyms meaning rapidly imparted to others; thus, one may speak of contagious, or infectious, enthusiasm or of enthusiasm that is catching (<what a bad temper! I hope it’s not catching> (<fear is exceedingly infectious: children catch it from their elders even when their elders are not aware of having shown it—Russell>).

Ana toxic, mephitic, pestilent, pestilential, virulent, *poisonous

2 Infectious, infective as applied to agents related to the causing of disease may be interchangeable and then mean capable of infecting or tending to infect. Infectious, however, is more often restricted to the technical and figurative senses expounded in the preceding article. Infective may be distinctively applied to matter and means potentially infectious (<an infective secretion> (<an infective wart>). In extended use it preserves the implication of corruption, strong in infect but often absent in infectious (<infective doctrines>.

infected Infected

Ana contaminating, tainting, polluting, defiling (see CONTAMINATE): corrupting, vitiating (see DEBASE): *poisonous, virulent, toxic, mephitic

Con salutary, hygienic, *healthful, wholesome

infelicitous Infelicitous, unhappy, inapt, inappropriate, unfitting, *unfit, unsuitable, improper

Ana unconforming, unseemly, *indecorous, improper, indelicate, indecent: inept, maladroit, gauche, *awkward

Ant felicitous —Con happy, apt, appropriate, fitting (see FIT (adj)): apposite, apropos, germane, pertinent, *relevant

infer, deduce, conclude, judge, gather are comparable when they mean to arrive at by reasoning from evidence or from premises. All except gather are so clearly differentiated in logical use that these distinctions tend to be retained in general use. The derivative nouns inference, deduction, conclusion, judgment, especially as applied to the propositions or mental formulations derived by reasoning, are even more precisely fixed in usage. Infer basically implies a formulating (as of an opinion, a principle, a fact, or a probability) from evidence presented or premises accepted. In general use the term often connotes slightness in the evidence and so comes close to surmise; in logic, however, it and inference convey no suggestion of weakness or strength (<"I see motion," said Thomas: "I infer a motor!" This reasoning . . . is . . . stronger than some more modern inferences of science—Henry Adams>) (<"Oh, well, don't worry. Jane hasn’t got any complexes." From which Gard . . . inferred she thought he [Gard] had—Mary Austin

Deduce, in nontechnical language, usually means to infer, with added implications of very definite grounds for the inference; in strict logical use, it means to derive an inference from a general principle; that is, to make a deduction as opposed to an induction (see DEDUCTION 3). This distinction, an important one to logicians and philosophers, is nearly lost in general use (<what a man is as an end perishes when he dies; what he produces as a means continues to the end of time. We cannot deny this, but we can deny the consequences deduced from it—Russell>). (<the last entry was in pencil, three weeks previous as to date, and had been written by someone with a very unsteady hand. I deduced from this that the management was not overparticular—Chandler>). Conclude is often employed as an equivalent of deduce in its general sense. More precisely used, it means to draw the inference that is the necessary consequence of preceding propositions whether these propositions are the premises of a syllogism or the members of a series of previously drawn inferences constituting an unbroken chain of reasoning. A conclusion is therefore either the third proposition of a syllogism or the final, summarizing proposition in a rational process. In general use conclude and conclusion frequently preserve the implication of logical necessity in the inference (<do not conclude that all State activities will be State monopolies—Shaw>). (<the more one scans the later pages of Mark Twain’s history the more one is forced to the conclusion that there was something gravely amiss with...>
inferior

Inferior, underling, subordinate mean one, usu-

ratiocinative (see under INFERENCE 2)

inference

Belloc) first, gravely his inferior <they are

analogous words Ana

Ant

or underlings—Vannevar Bush) Subordinate likewise

suggests subjection but has an entirely different flavor

from underling. The term implies a being in subjection to

the will or wishes of another but seldom carries a sug-

gestion of disdain and usually expresses no more than

relative position in a hierarchy <his tendency to meddle

and give orders to Welles and his subordinates annoyed

Welles—Beale> <marked in the eyes of his young sub-

ordinate a subtle light—Guy Fowler> <matters. . . talked

ever endlessly by . . . Captain Anthony’s faithful sub-

ordinates—Conrad>

Ana dependent, subject (see corresponding adjectives at

SUBORDINATE)

Ant superior —Con *chief, head, master, leader

infernal, chthonian, hellish, Hadean, Tartarean, stygian

mean of or characteristic of the abode of the dead. In-

fernal basically denotes of or characteristic of the under-

world regions once held to be inhabited by the earth gods

and spirits of the dead. Through confusion of pagan con-

ceptions of the underworld with Jewish and Christian

conceptions of hell as the abode of devils and a place of

torment for the souls of the damned infernal has acquired

connotations of horror, torturing fiends, and unendurable

suffering through fire, which nearly always blur and some-

times blot out its original subterranean implications

<from the infernal Gods, 'mid shades forlorn—Words-

worth) > <the most abhorred fiend in the infernal regions

is sent to torment me—Scott> When the classical con-

ception of the underworld must be suggested without an

admixture of alien connotations, chthonian is sometimes

used <but the worship of the dead . . . and of the chthonian

gods, was marked off by broad lines from that of the Olymp-

ian gods—Hastings> Hellish comes close to the current

meaning of infernal but carries so strong an implication of

devilishness that it more nearly approaches fiendish in

its meaning <heavenly love shall outdo hellish hate—

Milton> <burned them both with hellish mockery—

Shelley> Hadean, Tartarean, and stygian are used in

poetry in place of infernal, sometimes without any re-

grence to the conception of Hades, Tartarus, and the Styx

in classic mythology. Very frequently Hadean is a loose

equivalent for chthonian, Tartarean suggests darkness

and remoteness, stygian connotes bounds with no outlet

for escape, but all three are without fixed content.

Ana *fiendish, devilish, diabolical, demoniac: damnable,

accursed, cursed, *execrable: nefarious, flagitious,

iniquitous, villainous, *vicious

Ant supernal

infertile

*infertile

* sterile, barren, impotent, unfruitful

infest

*infest

*BROOKS> <on the basis of years of intensive

work . . . [he] concludes that comic books are a profound

"anti-educational" influence—Mills> Judge and judgment

are nearly equivalent to conclude and conclusion but

usually connote careful examination of evidence or critical

testing of premises and the fitness of the conclusion for

affirmation <an economist should form an independent

deduction on currency questions, but an ordinary mortal

had better follow authority—Russell> <his career will

inevitably be judged by the achievements or failures of

his Government as a whole—Wills> <most of the tribes of

Southern Iraq, judged by their physical characteristics,

are of very mixed origin—Thesiger> To gather is to con-

clude, but it connotes reflection rather than careful reason-

ing, and the putting of two and two together <thereby

he may gather the ground of your ill will—Shak> > <from

Thomasin’s words and manner he had plainly gathered

that Wildeve neglected her—Hardy>

Ana reason, speculate, *think: surmise, *conjecture, guess

inference 1 deduction, conclusion, judgment (see under

INFER)

2 Inference, ratiocination denote the process of arriving

at conclusions from data or premises. Inference often con-
notes guesswork based on trivial or inadequate data or

premises; in technical logical use it names the process

of inferring (see INFER) but does not in itself suggest care-

reasoning or in deduction. Ratiocination adds the impli-
cation of exactitude and of an extended process or the

passing by steps from one inference to another. It often
carries the connotation of tediousness or of hairsplitting.

The same distinctions in implications are observable in

the corresponding adjectives inferential and ratiocinative.

Ana deduction, conclusion, judgment (see under INFER): reason,

thinking, speculation, cogitation (see cor-

responding verbs at THINK); surmise, conjecture (see under

CONJECTURE vb)

Con intuition, understanding (see REASON): assumption,

presumption, presupposition (see under PRESUPPOSE)

* implication

inferential ratiocinative (see under INFERENCE 2)

Ana hypothetical, putative, purported, conjectural, sup-

positious, *supposed: *theoretical, speculative, aca-
demic: *implicit, constructive, virtual

Con *explicit, express, definite, categorical: intuitive, *instinctive: proved, demonstrated, tried, tested (see

PROVE)

inferior n Inferior, underling, subordinate mean one, usu-

ally a person, who is lower than another. Inferior, the

most inclusive of these terms, may be applied to anyone

that is lower in some significant matter (as rank, station,

quality, or value) than another; the term suggests, ex-

plicitly or by implication, a comparison, sometimes with

those obviously and individually higher or superior but

sometimes with those merely belonging to a level felt as

higher <that an inferior should punish a superior, is

against nature—Locke> > <he would be judged by his peers,

and safeguarded against the obtuse hostility of his inferiors

—Mencken> > <Napoleon was his equal or superior in the

first, gravely his inferior in the second—Bellow> > <they

are gracious to equals, abrupt to inferiors—Temple Field-

ing> Underling routinely implies subjection to the will

or wishes of another; it may apply to a condition from

that of a slave or servant to that of one who is just below

the master but ordinarily it implies some degree of con-

tempt <the fault, dear Brutus, is not in our stars, but in

ourselves, that we are underlings—Shak> > <the discon-

idered underling was in danger of becoming his master

—Buchan> > <scientists need to be used not as lackeys

See also explanatory notes facing page 1
running or spreading is to be conveyed (the cellar is over-
run with mice) (the garden is overrun with weeds) 
(heavily wooded and overrun with flowers—Amer. Guide Series: Mich.) (conformity of belief has . . . overrun whole populations like a plague—MacLeish) (he found the East already overrun with refugee conductors—Green Peyton) Beset has usually the meaning to trouble through frequency and persistence, and often connotes assailing or attacking (he was beset by enemies on every side) 
(she hurried at his words, beset with fears—Keats) (the road is beset with dragons and evil magicians—Costain) (subject to none of the pressures that beset American and English papers—Mott)

Ana *teem, swarm, abound: harass, harry, pester, plague, *worry, annoy

Ant disinfest —Con *exterminate, extirpate, eradicate, wipe: *abolish, annihilate, extinguish, abate

infidel unbeliever, *atheist, freethinker, agnostic, deist

infinite, eternal, sempiternal, boundless, illimitable, un-circumscribed mean having neither beginning nor end or being without known limits. Infinite especially as applied to God or his attributes implies immeasurability or an incapacity for being estimated in any conceivable respect (as duration or extent) (great is our Lord, and of great power: his understanding is infinite—Ps 147:5) (great are thy works, Jehovah! infinite thy power! what thought can measure thee, or tongue relate thee—Milton) In mathematical and scientific use the term usually stresses indeterminableness; often it implies that no limits can be set to which a thing does or may extend, or that no point at which it ends can be discerned; thus, the number of positive integers is infinite since no one can set a limit to the number that can be indicated; an infinite decimal is one (as a repeating decimal) that cannot be brought to a termination (the total number of stars is supposed, even by those who reject the idea of infinite extension, to run into thousands of millions—Inge) In more general use, infinite usually implies not only exceeding greatness or vastness but indefiniteness or seeming endlessness of extent (Chinese landscape [painting] is certainly preeminent . . . in suggesting infinite horizons, the look of mountains . . . melting away into remote sky—Binyon) (the Truth . . . is of necessity infinite and so is not for any poor finite creature like man—Babbitt) (the infinite ingenuity of man—Webb) Eternal, in its earliest and still prevailing sense, implies having neither beginning nor end in time; it is therefore applied chiefly to God, in the sense of being uncaused or uncreated and unending (the eternal God is thy refuge—Deut 33:27) But it may be applied with essentially the same meaning to things and especially to abstractions and concepts for which no beginning is known or under present conditions is discoverable, and for which no end can be foreseen or predicted (argue that matter is eternal) (the idea that the world is eternal is now seldom advanced) (the consideration of the general flux of events leads to this analysis into an underlying eternal energy—Whitehead) (the tradition that nature is ruled by hard, eternal, immutable laws—Cohen) In more general use eternal may be indistinguishable in meaning from endless and is then applied to things with a known or evident beginning but no ending or an ending infinitely remote or completely indeterminable (the Christian's hope of eternal life) (no eternal historical trend toward economic equality can be discovered—Sorokin) This sense is frequent in hyperbolic use in which it may imply either endless duration or constant recurrence often to the point of weariness or disgust (the eternal effort to discover cheap and agreeable substitutes for hard work—Justice Holmes) (the staircase door opened with its eternal creak—Bennett) but it also applies to something which, though it changes in appearance, form, or method, never dies out (Macaulay, who has a special affinity for the eternal schoolboy—Inge) (princes were mortal, but the commonwealth eternal—Graves) Sempiternal, a bookish word, is an intensive of eternal with somewhat greater emphasis upon the continuity of the thing so described (all truth is from the sempiternal source of Light Divine—Cowper) (he did not really believe that infinity was infinite or that the eternal was also sempiternal—Shaw) but it is chiefly a hyperbolic term (full dinners . . . with the sempiternal saddle of mutton—Jekyll) (the oldest, deepest, and seemingly sempiternal controversy involves the definition of itself—Hentoff)

Boundless implies little more than an apparent lack of restrictions or bounds, or a capacity for extending, expanding, or increasing indefinitely; it often applies to something which so far exceeds in range, measure, or amount what is usual for a thing of its kind that it staggered the mind (boundless wealth) (boundless impudence) (my bounty is as boundless as the sea—Shak) (a boundless command of the rhetoric in which the vulgar express hatred and contempt—Macaulay) (this long and sure-set liking, this boundless will to please—Housman) In mathematical and scientific usage, boundless applies specifically to a surface or a space (as a closed curve or line or a spherical surface) which has the property of permitting an object starting from any point in the space and proceeding by one mathematical law to return to the same point without being interrupted (the surface of a sphere is boundless but not infinite) Illimitable also stresses a lack of bounds or limits, and may be used in place of boundless (an illimitable appetite—Stephen) but it is often applied specifically to something (as a distance) that can theoretically be measured in extent but in actuality exceeds the capacity of human ingenuity or of human instruments for measurement or determination of extent (the heavens' illimitable height—Spenser) (the illimitable distances between the earth and the stars) Uncircumscribed implies the lack of a determinable limit in any conceivable direction; it applies to something that extends or expands or seems to extend or expand in all directions in the manner of radii from the center of a circle (uncircumscribed freedom) (so arbitrary and uncircumscribed a Power—Charles I) (the lighthouse symbol penetrates the novel with uncircumscribed power—Robert Humphrey) Ant finite —Con circumscribed, limited, restricted (see LIMIT vb): *dependent, conditional, contingent, relative

infirm feeble, decrepit, *weak, frail, fragile

Ana debilitated, disabled, crippled (see WEAKEN)

Ant hale —Con *strong, sturdy, stalwart, stout: *healthy, robust, sound

inflammable *combustible, flammable, incendiary, inflammatory

Ana igniting, kindling, firing, lighting (see LIGHT vb): glaring, blazing (see BLAZE vb): infuriating, enraging, incensing (see ANGER vb)

Ant extinguishable

inflammatory *combustible, inflammable, incendiary

Ana inciting, instigating (see INCITE): stimulating, exciting (see PROVOKE): sensitive, susceptible (see LIABLE)

inflate distend, swell, *expand, amplify, dilate

Ana enlarge, *increase, augment: magnify, aggrandize, 

Ant deflate —Con *contract, compress, shrink, condense, constrict

inflated, flatulent, tumid, turgid mean filled with some-
thing insubstantial (as air or vapor). Inflated implies ex-
pansion by the introduction of something (as a gas) lacking in
substance to the point where the walls are stretched
taut or tension is evident (an inflated tire) (an inflated
balloon) In its extended use inflated implies a stretching
or expanding, often by artificial or questionable means,
to a point not justified by reality or truth; thus, currency
is said to be inflated when the amount in circulation far
exceeds the amount normally necessary to meet the de-
mands of trade and commerce; one's ego is said to be
inflated when one is puffed up with self-confidence and
pride not warranted by one's ability or achievements;
a style may be described as inflated when it is far more
pretentious or imposing than its subject matter warrants
(a pretentious and inflated tract on feminism—Men-
ninger) (caricaturing the inflated elegance of Eastern
culture as represented in its refined fiction—J. D. Hart)

Flatulent applies basically to persons or their organs when
gases generating in the alimentary canal cause distention
of stomach or bowels. In its extended use flatulent usu-
ally implies emptiness with the appearance of fullness or
a lack of pith or substance (flatulent with fumes of self-
approbation) (a score or two of poems, each more or
less flatulent than the last—Swinburne) (enthusiasts who
read into him all sorts of flatulent bombast—Mencken)

Tumid implies noticeable enlarge-
ment by swelling or bloating, especially as a result of an
abnormal condition (my thighs grow very tumid—John-
son) (his face looked damp, pale under the tan, and
slightly tumid—Cossens) In its extended use tumid im-
plies an abnormal or conspicuous increase in volume with-
out a proportionate increase in substance and often sug-
gests pretentiousness or bombast (to compare, in thy
tumid pride, with me?—Shelle) (while Shakespeare,
great words on the lower subject, contrives to make
them appropriate, with Burke, writing on the loftier sub-
ject, the same or similar words have become tumid—
Quiller-Couch)

Turgid is not always distinguishable from
tumid; however, it is more often used when normal
distention as distinct from morbid bloating is implied
(healthy living cells are turgid) (woody tissue turgid
with sap) Consequently, in extended use, especially as
applied to literary expression or style, turgid often adds
to tumid the connotation of unrestrained vitality or of
undisciplined emotion, especially as manifest in bom-
bast, rant, or rhapsody (see bombast) (the effects . . .
already . . . show in French architecture—which is grow-
ing repulsive—and in French prose—which is growing
turgid—Bello) In general, however, turgid may be used
to describe anything that is not measured or restrained
and perfectly in keeping with orderly thought (the turgid
intricacies the modern foundation gets itself into its
efforts to spend its millions—Dwight Macdonald)

football . . . a turgid struggle of monolithic masses—
Thurber)

Inflection, intonation, accent are comparable when they
designate a particular manner of employing the tones of
the voice in speech. Inflection implies change in pitch or
tone; it often suggests a variation expressive of emotion
or sentiment, and, usually, a momentary mood (it was not
her words, but her inflection, that hurt) (a slight inflection
made one feel that one had received a great compliment—
Cather)

Intonation is often individual but it is seldom
thought of as the result of a mood; it is applied to the rise
and fall in pitch that constitutes what is called "speech
melody" and that distinguishes the utterance of one
individual or group from another (a ministerial intonation)
(we still write . . . for the actors, reckon upon their in-
tonations, their gestures—Quiller-Couch) (that peculiar
and pleasant intonation that marks the speech of the
Hebridean—Black) In some languages (as Chinese),
called "tone languages," fixed pitch, or intonation, dis-
tinguishes the various meanings of single words. In a
more specific sense, intonation often (as into always)
implies reciting or speaking religious matter (as a psalm
or a prayer) in a singing voice, usually in monotone (in-
tonation of that majestic iambic verse whose measure
would have been obscured by a rapid and conversational
delivery—Dickinson) Accent denotes such manner or
quality of utterance or tone as may distinguish a particular
variety of speech (as one peculiar to a person, race,
district, or class) (a Southern accent) (a Parisian accent)
(speak with a refined accent)

Like the other terms in
this group, it often suggests, and sometimes indicates,
the speaker's feelings (a different accent was notable
in Joseph's voice when he spoke of Azariah—George
Eliot)

Inflection, pronunciation, articulation (see corre-
sponding verbs at articulate)

Inflexible 1 rigid, *stiff, tense, stark, wooden

Ana hard, solid, *firm: rigid, rigorous, strict, stringent:
tough, tenacious, stout, *strong: immutable, *immoveable

Ant flexible—Con *elastic, resilient, supple, springy:
pliable, pliant, *plastic, malleable, ductile: fluid, *liquid

2 Inflexible, inexorable, obdurate, adamant, adamantine
mean not to be moved from or changed in a predetermined
course or purpose. All are applicable to persons, decisions,
laws, and principles; otherwise, they vary in their appli-
cations. Inflexible usually implies firmly established prin-
ciples rigidly adhered to; sometimes it connotes resolute
steadfastness, sometimes slavish conformity, sometimes
mere pigheadedness (society's attitude toward drink and
dishonesty was still inflexible—Wharton) (a morality
that is rigid and inflexible and dead—Ellis) (arbitrary and
inflexible rulings of bureaucracy—Shils) Inexorable,
when applied to persons, stresses deafness to entreaty
(more fierce and more inexorable far than empty tigers
or the roaring sea—Shak) (our guide was inexorable,
saying he never spared the life of a rattlesnake, and
killed him—Mark Van Doren) When applied to decisions,
rules, laws, and their enforcement, it often connotes re-
liantlessness, ruthlessness, and finality beyond question
(nature inexorably ordains that the human race shall
perish of famine if it stops working—Shaw) It is also
often applied to what exists or happens of necessity or
cannot be avoided or evaded (inexorable limitations of
human nature) (inexorable destiny) (you and I must see
the cold inexorable necessity of saying to these in-
human, unrestrained seekers of world conquest . . . "You
shall go no further"—Roosevelt)

Obdurate is applicable chiefly to persons and almost invariably implies hardness of
heart or insensitiveness to such external influences as
divine grace or to appeals for mercy, forgiveness, or assistance (if when you make your prayers, God should be
so obdurate as yourselves, how would it fare with your
deposed souls?—Shak) (the obdurate philistine material-
ism of bourgeois society—Connolly) Adamant and ada-
mantine usually imply extraordinary strength of will or
impenetrability to temptation or entreaty (Cromwell's
adamantine courage was shown on many a field of battle—
Goldwin Smith) (when Eve upon the first of men
the apple pressed with specious cant, O, what a thousand

influence

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

**influence**

- **influence**, **authority**, **prestige**, **weight**, **credit** are comparable when they mean power exerted over the minds or acts of others either without apparent effort or as the result of the qualities, the position, or the reputation of the person or thing that exerts this power. **Influence** suggests a flowing from one thing into another of something imperceivable or impalpable; this connotation is retained when the word implies the effect or effects which one person or thing insensibly has on another or the ascendancy which one person or thing similarly acquires over another. *(he was not strong enough to resist the influence of bad companions)* *(we find primitive men thinking that almost everything . . . can exert influence of some sort—James)* *(as provost of the Swedish clergymen he exercised a quickening influence over all the Swedish congregations—Gzenzer)* **However** influence often loses this implication of insensible or unconscious operation and suggests instead the conscious use of personal power or, sometimes, of underhanded means to determine the acts of another; in this sense it often follows the verb *use* or one of its synonyms *(use undue influence over a person making a will)* *(used his influence in getting a bill through a legislature)* **Authority** originally was applied to one (as a preacher, teacher, or writer) or to writings or utterances having the power to compel belief or to win acceptance. *(he is still applicable to a person or publication that is able to command respect or obedience)* *(by turning o'er authorities, I have . . . made familiar to me . . . the blest infusions that dwell in vegetives, in metals, stones—Shak.)* **This sense persists and authority is still applicable to a person or publication that is able or qualified to gain credence or to inspire belief in its authoritative ness** *(do not cite this historian; he is not an authority)* *(an economist should form an independent judgment on currency questions but an ordinary mortal had better follow authority—Russell)* *(scholars who held that Cicero was an unchallengeable "authority"—Hight)* From this use mainly, but also from its other sense *(see power 3), authority has come to be applied also to the power resident in a person or thing that is able because of his or its inherent qualities to win the devotion or allegiance of men and to gain rather than exact their obedience and belief *(a book of manifest authority)* *(that personal authority, which, far more than any legal or constitutional device, was the true secret of his later power—Buchan)* *(a doctrine that has acquired authority in our own time—Alexander)* *(some of the new philosophies undermine the authority of science, as some of the older systems undermined the authority of religion—Inge)* *(to face a good orchestra with inward and outward authority and assurance—Burk)* **Prestige**, in contrast with authority, implies the power to gain ascendancy over the minds of men and to command their admiration for distinguished and superior performance, or for conspicuous excellence in its kind *(nothing more affects the prestige of a power than its dramatic and rapid defeat in the field—Bello)* *(the almost magical prestige that had belonged to the original humanists—Huxley)* *(such lustre—or prestige or mana—as individual writers possess—Times Lit. Sup.)* **Weight** denotes measurable influence, especially in determining the acts of others *(Mrs. Hawthorne's authoritative air was beginning to have some weight with him—Archibald Marshall)* *(men who take the lead, and whose opinions and wishes have great weight with the others—Frazer)* **Credit** *(see also belief 1) denotes influence that arises from one's reputation for inspiring confidence or admiration *(Buckingham . . . resolved to employ all his credit in order to prevent the marriage—Hume)* *(as it [the ballet] declined as an art, so also it declined in credit and in popularity; it became scarcely respectable even to admire dancing—Ellis)* *(driving or drive, compelling or impulsion, actuation (see corresponding verbs at move): *power, control, dominion, sway, authority: ascendancy, *supremacy: dominance (see corresponding adjective at dominant)*

**influence** *affect, sway, impress, touch, strike*

**inform** *move, actuate, drive, impel: stimulate, *provoke, excite: *stir, arouse, rouse: *incline, dispose, predispose, bias*

**inform** *1* *(inform, animate, inspire, fire are comparable when they mean to infuse (a person or thing) with something (as a spirit, a principle, an idea, or a passion) that gives him or it effective power or an urge to action or activity. Sometimes, especially in the last three words, the idea of driving or actuating is so strong that it becomes their common denotation and the idea of infusion is merely a common connotation. To inform is to give character or essence to or to so permeate as to become the characteristic, peculiar, essential, and often abiding, quality of (the inspiration of religion passed on to inform and subtly to perfume an art nominally concerned with the aspects of earth and sky, wild creatures and wild flowers—Burns)* *(everything that is made from without and by dead rules, and does not spring from within through some spirit informing it—Wilde)* *(sentimental, Protestant ethos that has always informed his writing—Fiedler)* **To animate is to endow with life, a vital principle, or an impulse to action. Although animate is often used where inform is also possible, it suggests, far more than inform, vitality and living energy *(religion . . . which is animated . . . by faith and hope—Johnson)* *(when what is affected is a person or when motivation of action or transiency of impulse is to be implied, animate is the more precise word)* *(he was animated with love for all men)* *(when the community is animated with anger against some heinous offence—Alexander)* *(his hatred of restraint animated his resistance to authority)* **To inspire is to communicate to a person, as if by breathing into him, power or energy in excess of what he believes to be his own. The word usually implies both the operation of a supernatural power or of some inexplicable agency and such an effect as a spiritual illumination, or a quickening of intellectual or imaginative activity, or an exaltation of feeling *(great artists know or believe that they are inspired from something outside themselves—Alexander)* *(that sublimated language used by the finest minds in their inspired moments—Hudson)* *(we climb the mountains for their views and the sense of grandeur they inspire—Jefferies)* **Inspire** may also imply indirect rather than inexplicable influence, methods, or source *(as in imparting knowledge or arousing a feeling)* *(teachers should inspire their pupils to work hard)* *(today's editorial on the mayor's policy was certainly inspired: it does not represent the editors views but those of someone in power)* **To fire is to animate or inspire so powerfully that one is inflamed with passion, ardor, or enthusiasm *(one step beyond the boundary of the laws fires him at once in Freedom's glorious cause—Cowper)* *(O how they fire the heart devout—Burns)* *(inform, imbue, impute, leaven: instill, *implant,
information

443

infuse

infuse: enlighten, *illuminate: fire, kindle (see LIGHT vb); endue, endow (see DOWER)

2 Inform, acquaint, apprise, advise, notify are comparable when meaning to make (one) aware or cognizant of something. One informs a person of something when one imparts knowledge, particularly of occurrences or of facts necessary to the understanding of a situation (inform a person of his success in a competition) (the radio announcer informed his audience of the accident) (kept the staff informed of Chinese public opinion concerning the American military action there—Current Biol.) Also, one informs oneself when by study or investigation one gathers the pertinent facts (his obligation as a citizen is to inform himself . . . regarding the controversial issues—Houston) Inform in one specific use also carries the implication of talebearing or accusation (I shall not inform upon you. It is not my business—Wilde) One acquaints a person with something when by introducing him to the experience of it or by imparting information concerning it one makes him familiar with it (in the first meeting of the class, the teacher acquainted his pupils with the program of study) (to acquaint people with information instead of just telling it to them—Gowers) Familiarity is even more strongly implied in the participial adjective acquainted (the examination) is clear enough to anyone acquainted with the history of Puritan thought—Parrington) (a man of sorrows, and acquainted with grief—Isa 53:3) One apprises a person of something when by a message or sign one communicates it to him (he has apprised his employer of his intention to resign) (I made up my mind to send the waiter to . . . apprise him that I was there—Mary Austin) One advises a person of something when one gives him information about it, especially of a kind that is important to him (as in making a decision, determining a policy, or arranging plans) (the president asked to be kept advised of changes in public sentiment) (consulted the wine card and advised me that the wine I had chosen had no special merit—Lovett) Often there is a suggestion of forewarning or counsel (see also advise under ADVISE 1) (the passengers were advised of the risk before the vessel left New York) (against which a solemn trespass board advised us—Mary Austin) One notifies a person of something when one sends a notice or formal communication concerning it, usually as a matter requiring his attention (notify students of a change in the date of opening) (the court clerk promised to notify the witnesses when to appear) In commercial use, advise is used in preference to notify when information is given by letter, telegram, or cable (please advise us when the shipment is made)

An *offense, sin, crime, vice, scandal: slip, lapse, faux pas, *error

Ant observance

Infrequent, uncommon, scarce, rare, occasional, sporadic

are comparable when they mean appearing, happening, or met with so seldom as to attract attention. Something is infrequent which does not occur often, especially within a given period of time, or which does not recur except at very wide intervals of time or of space (torpedoes are infrequent in New England) (far from being infrequent, the crystalline state is almost universal among solids—Dawson) (infrequent pines dot the forest) (though it was only a few hundred miles north of Santa Fe, communication with that region was so infrequent that news traveled to Santa Fe from Europe more quickly than from Pikes Peak—Cather) Something is uncommon which does not occur or is not found ordinarily and which therefore is singular, exceptional, or extraordinary (smallpox is now uncommon in most parts of the United States) (in certain country districts in Europe families of fifteen are not uncommon enough to be regarded as extraordinary—Shaw) (such muscular strength is uncommon among girls) (a writer possessing uncommon inventive ability—A. C. Ward) (Mr. Coates’s life has not been especially eventful, but he has enjoyed it with uncommon relish—Richard Findlater) Something is scarce which at the moment in mind is not easily found or which does not exist or is not produced in sufficient quantities (a bad harvest makes wheat scarce) (highly skilled mechanics are now scarce) (the Boones wanted land where deer and buffalo were numerous and men and cabins scarce—J. M. Brown) Something is rare (see also choice, thin) of which but few examples, specimens, or instances are found; also, the term often carries such implications of uncommon as being exceptional or of extraordinary character (rare postage stamps) (rare books and first editions) (a perfect union of wit and judgment is one of the rarest things in the world—Burke) (great men are scarce . . . but great biographers are positively rare—Seccombe) (I may say again, if only rare, how this butterfly would be prized!!!—Jeffreys) (reported to give very indifferent wines to the rare guests he received in his grim old house—Wharton) Something is occasional which happens or is met with merely now and then. Occasional more than any of the preceding terms implies irregularity or nonconformity to a rule or law that might govern occurrences or appearances (this was not an occasional outburst of activity; it was Wesley’s routine—Crothers) (Artemus Ward was all fun and sweet reasonableness . . . , with an occasional barb that by its unexpectedness did the more damage—Lucas) Something is sporadic which has no continuous existence or continuity in its manifestations and which comes into existence or occurs only in rare and, usually, isolated instances (sporadic cases of an infectious disease) (sporadic outbursts of opposition to high taxes) (humanism and religion are thus, as historical facts, by no means parallel; humanism has been sporadic, but Christianity continuous—T. S. Eliot)

An encroachment, invading or invasion, entrenchment

Infuriate

enrage, incense, *anger, madden

An provoke, rile, exasperate, aggravate (see irritate): outrage, insult, affront, *offend

Infuse, suffuse, imbue, infuse, inoculate, leaven mean to introduce one thing into another so as to affect it throughout. Infuse implies a permeating like that of inflating fluid, usually of something which imbues the recipient with new spirit, life, or vigor or gives it or him a new cast or new significance (thou
ingeminate 444 inhabitant
didst smile, infused with a fortitude from heaven, when I . . . under my burden groaned—Shak. 〈he infused his own intrepid spirit into the troops—Gibbon 〈whose work is for the most part infused with the spirit of scientific materialism—L. A. White〉 Suffuse implies an over-spreading of a surface by or a spreading through an extent of something that gives the thing affected a distinctive or unusual color, aspect, texture, or quality 〈a blush suffused her cheek〉 〈eyes suffused with tears〉 〈when purple light shall next suffuse the skies—Pope〉 〈she . . . pulled the chain of the incandescent mantle . . . the room was suffused with the sickly illumination—Mackenzie〉 〈the poetic faculty will, in fact, have to deal—not with an abstract idea—but with an idea suffused and molded by emotion—Day Lewis〉 Imbue implies the introduction of something that enters so deeply and so extensively into the thing’s substance or nature that no part is left untouched or unaffected; unlike infuse, which it otherwise closely resembles, imbue takes as its object the person or thing affected, not the thing that is introduced 〈infuse courage into his soldiers〉 〈imbue his soldiers with courage〉 〈infuse grace into the soul〉 〈imbue the soul with grace〉 〈thy words, with grace divine imbued, bring to their sweetness no satori—Milton〉 〈Virgil〉 has imbued every object that he touches, with the light and warmth and color absorbed from its contact with life—Lowe 〈individuals or societies whose life is imbued with a cheerful certitude, whose aims are clear—Krutch〉 Ingrain is found in the past participle or passive forms only; like imbue, it implies an incorporation of something comparable to a pervading dye with the body, substance, or nature of whatever is affected, but unlike imbue, it takes for its object or, when the verb is passive, as its subject the thing introduced rather than the person or thing affected 〈cruelty and jealousy seemed to be ingrained in a man who has these vices at all—Helps〉 〈the idea of absolute financial probity as the first law of a gentleman’s code was . . . deeply ingrained in him—Wharton〉 〈the feeling . . . is so deeply ingrained in human nature—F. M. Miller〉 Inoculate implies imbuing a person with something that alters him in a manner suggestive of a disease germ or an antigen. Often, the term implies an introduction of an idea, a doctrine, an emotion, or a taste by highly surreptitious or artificial means, in order to achieve a desired end; less often, it additionally implies an evil and destructive quality in what is introduced 〈students inoculated with dangerous ideas〉 〈the theory . . . that if the great masses of the plain people could be inoculated with it [a taste for music] they would cease to herd into the moving-picture theaters—Mencden〉 Leaven implies a transforming or tempering of a body or mass by the introduction of something which enlivens, elevates, exalts, or, occasionally, causes disturbance, agitation, or corruption 〈knowledge . . . must be leavened with magnanimity before it becomes wisdom—A. E. Stevenson〉 〈there was need of idealism to leaven the materialistic realism of the times—Parrington〉 Ana impregnate, saturate, impenetrate, *permeate, pervade: *inform, inspire, animate, fire; instill, inculcate, *implant

inhabitant, denizen, resident, citizen are comparable when meaning one whose home or dwelling place is in a definite location. Inhabitant, the least specific word, implies nothing more than an abode in a given place (in 1940 the city had 243,718 inhabitants) 〈certain disagreeable inhabitants of open impounded water supplies, known as algae—Morrison〉 Denizen denotes one that belongs by birth or naturalization to a given locality 〈denizens of the deep〉 〈winged denizens of the crag—Scott〉 (as if the old denizens of the forest had been felled with an axe—Maury) Even when substituted in literary use for inhabitant, denizen retains something of its own flavor of belonging to the locality by birth or naturalization 〈judged and oversophisticated denizens of towns—Lowes〉 Resident is not always clearly distinguished from inhabitant, especially when a town or city, as distinguished from a state or country, is in question. Often the term implies nothing more than tenancy of a room, an apartment, a house, or a locality for a considerable length of time 〈the summer residents of Bar Harbor〉 Often, in the case of a person who has several residences or who lives mainly in a place other than the one regarded as his home, the term suggests not permanent inhabitants but legal recognition of one of these places as his domicile, and as the seat of his fundamental legal rights (as of voting) and responsibilities (as of paying income tax) 〈proof that the multimillionaire was a resident of Massachusetts brought several million dollars in inheritance taxes to that state〉 〈are the students at this college considered residents of the town and entitled to vote in town matters?〉 In reference to a country, resident is more usual than inhabitant as a designation of an alien living in that country for a time and regarded as subject to certain taxes (an alien actually present in the United States who is not a mere transient or sojourner is a resident of the United States for purposes of the income tax—Income Tax Regulations, U. S.) Citizen when denoting a person that is an inhabitant is rarely wholly free from its political sense (see citizen 2); hence, it usually carries some suggestion of membership in, as distinct from mere presence in, a community and of possession of the privileges and obligations inherent in such membership. It is particularly applicable to an adult and substantial resident of a city or town (no mere pedant, but a leading citizen of the town, serving as justice of the peace and as its first postmaster—Starr) 〈the body of citizens or those who were members of the

Ant righteous —Con virtuous, *moral, ethical, noble: just, *upright, honorable, honest

initial adj Initial, original, primordial can all mean existing at or constituting the beginning or start of a thing, especially of a thing that gradually assumes shape or form or that manifests itself in many ways. Nevertheless, in spite of this agreement in meaning, the words are rarely interchangeable, usually because of additional and differing implications, but often also because of the determination of their use by idiom. Initial, in general, is used in reference to things seen as a whole, often in fact but sometimes in thought; the term, therefore, usually implies an end or completion <the initial letter of a word> (the initial stage of a disease) <an aggressor nation would always have the initial advantage—Dean> (the great incentive to effort, all through life, is experience of success after initial difficulties—Russell) Original (see also NEW) is used especially with reference to what is the very first in order or constitutes the ultimate beginning or source; in this sense it usually connotes the idea of being undervis or uninitiated and implies that there is nothing from which the original thing has sprung. A court that has original jurisdiction has the right to try a case to determine both the facts and the application of the law to them, as distinguished from a court with appellate jurisdiction. "Original sin" was committed by Adam and Eve as the first human beings but, in theological use, the phrase also means that sin as it leaves its traces upon every human being <great books are original communications, but our authors are communicating what they themselves have discovered—Adler> Sometimes, however, original means something more specific; thus, the original owner of a piece of land would strictly be the one who first held it by a natural or legal right, but in legal interpretation the phrase may be used of an earlier owner when successive owners are mentioned; an author's original work may be the work first produced by him, but more often it means (without regard to order of writing) a work independently conceived and executed by him <an original print is not, of course, original in the same sense as a painting. With a painting there is only one true original, whereas there may be as many as 50 or 75 originals of a given print—Cain> Primordial (see also PRIMARY) is comparable with initial and original through its implied reference to what forms the actual beginning or starting point or the earliest form taken by something that follows a course, an evolution, a progression, or an unfolding <speculate on the nature of the primordial universe> (the primordial mind) (<the new discoveries . . . strongly support the theory that the universe has been expanding ever since a primordial explosion in which it was born—Walter Sullivan>

initiation

T. H. Huxley

initiate a new reporter into the secrets of successful news gathering

Induct may often be used in place of initiate, especially when introduction with guidance is also implied (induct a person into the duties of a new position)

But induct, as well as inaugurate, install, and invest, may imply a formal or ceremonious endowing of a person with the powers and prerogatives of an office or post

Induct the new governor of a colony

Induct is used technically of clergymen who are put in possession of a benefice or living, or of officials who are established in their office with appropriate rites or ceremonies

The new superintendent of schools was inducted into office at last night's meeting of the board of education

Inaugurate (see also BEGIN) usually implies more formal and dignified ceremonies and much more publicity than induct

Inaugurate the president of the United States

Inaugurate the new president of the university

Install implies induction into an office associated with a seat

Install the officers of a society

Install a bishop as the archbishop of his new diocese

The term also may be used in reference to persons who are formally or comfortably seated

Install the guest of honor in the most comfortable chair

Install the tottering old lady in a chair by the fireside

It is also the only one of these terms which may be used in reference to things as well as to persons

Install new machinery in a factory

Install electric light fixtures

Invest usually suggests a clothing with the robes or other insignia of an office and, by extension, with the powers of that office. It often also implies a ceremony but it may suggest only the addition of powers that come to one on one's induction into a position or office

The constitution of the United States the president is invested with certain important political powers

John Marshall

Con finishing or finish, completion, conclusion, ending or end, termination, closing or close (see corresponding verbs at CLOSE)

initiative referendum, *mandate, plebiscite

injunction *command, order, bidding, behest, mandate, dictate

Ana instruction, direction, charging or charge (see corresponding verbs at COMMAND): warning (see WARN): precept, rule, regulation, *law, statute, ordinance, canon

injure, harm, hurt, damage, impair, mar, spoil all mean to affect someone or something so as to rob it of soundness, strength, or perfection or to reduce its value, usefulness, or effectiveness

Injure in its earliest and still frequent sense means to do an injustice to or to wrong another (as by robbing him of his good name or of a rightful possession); in this sense it often suggests intent or knowledge on the part of one that injures (when have I injured thee? when done thee wrong?—Shak.)

Another injured burgher speaking of their forfeited rights—Cloete

The verb may also imply the infliction not of injustice but of something detrimental to one's appearance, health, success, or comfort (a bullet injured his eye) (industrialism has been very injurious to art; may it not have injured religion also?—Inge)

Has to withhold information the release of which might injure the national security—Mott

Harm is more specific than injure in stressing the infliction of pain, suffering, or loss (the boy is so gentle that he would not harm a fly) (the circulation of the rumor greatly harmed his business) (for none of woman born shall harm Macbeth—Shak.)

(bitterness among the elders must not be permitted to harm or wound the innocent children of either race—Beverly Smith) (every time any one of us . . . fails to make the fullest possible contribution to . . . justice, he harms himself spiritually—Atlantic)

Hurt usually implies the infliction of a wound whether to the body or feelings or to a thing capable of sustaining an injury; often, it is used where injure is also possible (he was severely hurt by a falling brick) (hurt a friend's feelings)

It's damnable to have to hurt the people we love—Rose Macaulay

A limitless desire to hurt and humiliate—H. G. Wells

Damage implies an injury that results in lowered value or involves loss in effectiveness, attractiveness, or efficiency (his automobile was damaged in a collision) (the frost damaged the late crops) (whatever psychoanalysts may say, the parental instinct is essentially different from the sex instinct, and is damaged by the intrusion of emotions appropriate to sex—Russell)

(like Hemingway, he was permanently damaged and therefore permanently inspired by war—Morton)

Impair, though coming close to damage in its meaning and often interchangeable with it, more frequently suggests deterioration or diminution (as in value, strength, or validity)

A weak piece of evidence often impairs the strength of a good argument (his value as a candidate has been impaired by his hysterical attacks on his opponent) or a weakening (as of a function or power of functioning) (his eye was injured and his vision impaired) (kindness that left an impression on my heart not yet impaired—De Quincey)

(like physical prowess of all sorts is in no way impaired by heavy drinking and smoking, of course—Christopher La Farge)

Mar implies the infliction of an injury that disfigures or maims or involves the loss of a thing's perfection or well-being (striving to better, oft we mar what's well—Shak.)

A man who had spoiled his constitution with bad living—Shaw

When a child persistently interferes with other children or spoils their pleasures, the obvious punishment is banishment—Russell

A great novel spoiled by hasty (and lazy) composition—Laski

Ana *deface, disfigure: *deform, distort, contort: *injure

injure is also possible (he injured his eye) (industrialism has been very injurious to art; may it not have injured religion also?—Inge)

Has to withhold information the release of which might injure the national security—Mott

Injury 1 Injury, hurt, damage, harm, mischief mean the act or the result of inflicting on a person or thing something that causes loss or pain. Injury is the comprehensive term referable to an act or to a result of that act which involves a violation of a right or of health, freedom, and soundness of body or mind, or causes a partial or entire loss of something of value (an injury to his eyes) (an injury to his reputation) (for an injury) (the very essence of civil liberty . . . consists in the right of every individual to claim the protection of laws, whenever he receives an injury—John Marshall)

Mental or emotional
upset is just as truly an injury to the body as a bone fracture, a burn or a bacterial infection—G. W. Gray

A great injury could be done to our nation . . . if this political campaign were to descend to the level of competitive threats and veiled hints—A. E. Stevenson

Hurt, applies basically to a physical injury (as a wound, lesion, or contusion) that results from a hit, a stab, or a blow

get him to bed, and let his hurt be looked to—Shak.

rattleweed, made into a tincture, is better than arnica for hurts of every sort—Emily Holt

In extended use hurt applies chiefly to an act or result that involves pain, suffering, or loss; thus, a person whose rights as an heir have been violated may be said to suffer an injury but not a hurt; a person whose reputation has been damaged by a false rumor has suffered both an injury to his business and a hurt to his feelings; a dentist in drilling a tooth may cause a hurt, but not commonly an injury (leaving forever to the aggressor the choice of time and place and means to cause greatest hurt to us—Eisenhower)

Damage applies to an injury that involves loss (as in property, in value, or in usefulness)

the fire caused great damage to the house

repair the damage done to the cathedral by the bombs

deliver Helen, and all damage else—as honor, loss of time, travel, expense . . . shall be struck off—Shak.

Harm (usually without an article) is referable to an evil that injures or may injure; often it suggests a consequent suffering (as grief or shame)

I meant no harm

almost every evening he saw Lucy. The inexperienced little wife apprehended no harm in his visits—Meredith

the men were terrified of Yusuf's cruelty, and wanted to retreat every evening he saw Lucy. The inexperienced little wife apprehended no harm in his visits—Meridith

the men were terrified of Yusuf's cruelty, and wanted to retreat every evening he saw Lucy. The inexperienced little wife apprehended no harm in his visits—Meredith

Mischief carries a stronger reference to the person or thing that works harm or is capable of inflicting injury; it applies either to the harm or injury that results from an agent or agency

one failure led to another, suspicion became general, and the mischief was done—Todd

that’s the mischief of the Modernists . . . They don’t claim that the Divine revelation has been supplantled or even added to, but that it has been amplified—Mackenzie or occasionally to the aspect of a situation that causes harm or vexation

the mischief is that people—especially the young—do not confine themselves to one cocktail—Bennett

and faith, 'tis pleasant till 'tis past: the mischief is that 'twill not last—Housman

Anna *distress, suffering, agony, misery: *pain, pang: violation, transgression, trespass, infringement (see breach): detriment (see corresponding adjective at pernicious): *evil, ill

2 wrong, *injustice, grievance

Anna see those at injury 1

injustice, injury, wrong, grievance are comparable when they denote an act that inflicts undeserved damage, loss, or hardship on a person. Injustice is the general term applicable not only to an act which involves unfairness to another or a violation of his rights (class privileges which make injustices easy—Spencer) (the injustices that angered him were never quite genuine—Mailer) but, as a collective noun, to all acts which come under this description

he flamed out against injustice because he was a lover of justice—Perry

the appropriate attitude toward prejudice and injustice and cruelty is indignation—Hicks

Injury applies to an injury to a person for which the law allows an action to recover compensation or specific property, or both (every person who suffers damage to his person, his property, or his reputation as a result of an infringement of the law suffer a legal injury—Rubenstein)

Wrong is in law, a more general term than injury for it applies not only to all injuries as just defined (private wrongs) but to all misdemeanors or crimes which affect the community (public wrongs) and which are punishable according to the criminal code. But in general use wrong differs little from injustice, except in carrying a stronger connotation of flagrancy or of seriousness

we are . . . steel to the very back, yet wrung with wrongs more than our backs can bear—Shak.

so many were the wrongs that were to be righted, the grievances to be redressed—Muggeridge

Grievance applies to a circumstance or condition that, in the opinion of those affected, constitutes a wrong or that gives one just grounds for complaint

they sent to the king a statement of their grievances—Keightley

In an early state of society any kind of taxation is apt to be looked on as a grievance—Freeman

Anna damage, hurt, harm, mischief, *injury: infringement, trespass, transgression, violation, infliction, *breach: unfairness, inequitableness (see affirmative adjectives at fair)

Con *justice, equity

innate, inborn, inbred, congenital, hereditary, inherited are comparable but not wholly synonymous terms that refer to qualities which either are or seem to be derived from one's inheritance or from conditions attending one's birth or origin. Innate and inborn are often used without distinction. But innate (opposed to acquired) is frequently synonymous with inherent, essential, or constitutional, and then tends to apply to qualities, characters, or elements that are not inherited but belong as part of the nature or essence to something imbued with life

innate ideas exist in the mind as a result of its constitution and are therefore found wherever a mind exists

I do not believe that a sense of justice is innate, but I have been astonished to see how quickly it can be created—Russell

this stubbornness has been explained as being innate in the German's, as a natural racial characteristic. But some of the stubbornness is not innate but acquired—Woody

Innate also may apply to elements or qualities (as virtues or defects) which arise out of the very nature or character of a thing that has no life and therefore literally no birth

the innate defect of this plan

the innate magnetism of the proton—Davis

the innate tendency of a dictatorship to overreach itself

On the other hand, inborn, which is frequently synonymous with natural or native, retains more specific reference to what is actually born in one or is so deep-seated as to seem to have been born in one; the term is therefore usually applied to qualities or characters that are peculiar or distinctive, sometimes to the type, often to the individual

inborn aptitudes

the tendency towards schizophrenia was inborn—N. Y. Times

his inborn ability to sing

an inborn love of country life

Inbred implies reference to breeding, or to the processes concerned with the generation, nourishment, and rearing of offspring; the term therefore is more readily applied to what is deeply rooted or ingrained as a result of one's immediate parentage or the circumstances attending one's earliest education or training than to what is constitutional or merely natural

an inbred love of freedom

an inbred feeling of superiority

those inbred sentiments which are . . . the true supporters of all liberal and manly morals—Burke

a methodical man, an inbred Yankee—White

Congenial applies chiefly to something which dates from the birth or inception of the individual concerned

congenital hip disease

congenital blindness

the theory that what was acquired habit in the ancestor may become congenital tendency in the offspring—James

yet art for art's sake suffers from a congenital disease; it professes to create substance out of form, which is physically impossible—Santayana

Both hereditary and inbred are applied to a result of natural heredity (an inherited bearing defect)

unless he had the hereditary dispositions which he has, he would not behave the way he does—Pop or some-
times of social heredity (the reciter who might graft on to an inherited body of literature a few embellishments of his own—Lerner & Mims) <(several hereditary enemies of the Olivesa brothers—Cather) In technical biological use congenital and hereditary are clearly distinguishable, for congenital implies presence at birth (as of a disease or an organic defect) from whatever cause and hereditary implies transmission (as of a tendency, a weakness, or a quality) from an ancestor through the chromosomal mechanism and DNA <(a birthmark is a congenital blemish of the skin) <(the color of the eyes is hereditary) Ana constitutional, *inherent, intrinsic, essential, ingrained: *instinctive, intuitive: natural, typical, regular, normal: *native, indigenous Ant acquired —Con *accidental, adventitious, incidental, fortuitous: assumed, affected, feigned, simulated (see ASSUME): cultivated, fostered, nurtured (see NURSE) inner, inward, inside, interior, internal, intestine are comparable when they mean being or placed within something. Although in many cases interchangeable, they are more or less restricted in their applications and therefore clearly distinguished in their implications. Inner typically applies to something far within or near the center <(thrust them into the inner prison—Acts 16:24) <(an inner room) <(the inner bark of a tree) while inward typically applies to something directed within or toward the center <(the inward curve of a scroll) Both words apply also to the mental or spiritual, frequently with the added implication of something intimate, secret, or inaccessible <(the sense by which thy inner nature was apprised of outward shows —Shelley) <(outer events only interest me here insofar as they affected my inner life—Ellis) <(with an inward smile she remembered Spandrell's summary—Huxley) <(the inward struggle of the heroes to find their own truth—Rees) Inside is used chiefly of spatial relations <(an inside seat) <(the inside track) but it may be used with reference to persons who are so placed in their work or who have such contacts that they may be said to be figuratively inside a place or group; thus, inside work implies a contrast with field or road work; inside knowledge of a negotiation implies participation to some extent in that negotiation (have inside information of what is going on in a club) Interior and internal usually suggest more abstract or technical and less intimate relations than inner and inward. Interior frequently implies contrast with the outer limits of the thing itself; thus, the interior features of a country are by implication opposed to those of the coast or boundaries; interior decoration deals with the decoration and furnishing of the inside of a house or other building rather than with its outside; one's interior life is one's life as expressed in thoughts and aspirations rather than in outward activities. Internal implies contrast with something beyond or outside of the outer limits of a thing: thus, internal evidence of a poem's authorship is gained from a study of the poem itself rather than from outside sources; the internal affairs of a country is its domestic, as opposed to its foreign, affairs; internal medicine is that branch of medicine dealing with the diagnosis and treatment of diseases affecting the internal organs (as the heart, lungs, stomach, and liver). Intestine is a close synonym of internal used specifically of what may otherwise be described as domestic or civil (as opposed to foreign) with, however, the connotation of an evil or mischievous origin or nature (as of a worm and foreign and intestine war occasioned the neglect . . . of these works—Lord) <(a coalition . . . was paralyzed from the start by intestine quarrels—Current History) Ana central, middle, focal, nuclear (see corresponding nouns at CENTER): intimate, close, *familiar: intrinsic, constitutional, essential, *inherent: *instinctive, intuitive: deep-seated, deep-rooted (see INVETERATE) Ant outer —Con outward, outside, exterior, external (see OUTER) innocent *harmless, innocuous, inoffensive, unoffending Con harmful, hurtful, injurious, mischievous (see corresponding nouns at INJURY) innocuous *harmless, innocent, inoffensive, unoffending Ant pernicious —Con *poisonous, venomous, virulent, toxic: injurious, harmful, hurtful (see corresponding nouns at INJURY) innuendo *insinuation Ana hinting or hint, intimation, suggestion (see corresponding verbs at SUGGEST): *implication, inference: Allison (see corresponding verb at REFER) inoculate *infuse, imbue, ingrain, leaven, suffice Ant impregnate, saturate, interpenetrate, permeate, pervade: introduce, admit, *enter: instill, inculcate, *implant offensivE *harmless, innocuous, innocent, unoffending Ant offensive —Con loathsome, repulsive, revolting (see OFFENSIVE): distasteful, obnoxious, repellent, *repugnant inordinate *excessive, immoderate, exorbitant, extreme, extravagant Ana *irrational, unreasonable: *supererogatory, wanton, uncalled-for, gratuitous: *superfluous, surplus, extra: *unnecessary: *additional; (rare): Con: *moderate: restrained, curbed, checked, inhibited (see restrain): *due, rightful, condign: *fair, just, equitable inquest investigation, probe, *inquiry, inquisition, research Ana examination, inspection, scrutiny, audit (see under SCRUTINIZE): questioning, interrogation, catechizing, examining (see corresponding verbs at ASK) inquire query, question, *ask, interrogate, catechize, quiz, examine Con reply, *answer, respond, rejoin, retort inquiry, investigation, inquest, inquiry, protest, research all mean a search for truth, knowledge, or information. Inquiry is the most general of these terms, applicable to such search regardless of the means (as questioning, observation, or experimentation) used or of the end in view (make inquiries about a sick friend) <(the passion for pure knowledge is to be gratified only through the scientific method of inquiry—Elliot) <(witnesses convicted of contempt of Congressional inquisitions—Current Biog.) <(legislative inquiry into the acts of a man or group of men—Thomas) <(a primitive but effective police inquiry—T. S. Eliot) Inquisition ordinarily carries heightened implications of searchiness and of penetration far below the surface to uncover what is concealed or withheld <(strenuously protested against being subjected to an inquisition into his motives) The term, however, is chiefly applied to a judicial inquiry aiming to unearth facts or conditions to support suspicions or charges; probably from its historical application to the ruthless ferreting out of heretics or heresy especially in the late Middle Ages and in the Reforma-
down of something that one hopes to discover or needs to know (a strong movement to make American universities centers of scholarly work and scientific investigation—Conant) (an investigation of the causes of the prolonged depression) (the bank never employs a clerk or teller without an investigation of his habits and record) Inquest applies chiefly to a judicial or official inquiry or examination especially before a jury, and specifically to one conducted by a coroner and jury in order to determine the cause of a death (when the rumors of murder became rife, the body was exhumed and an inquest held) In more general use, the term usually applies to an investigation that has some of the characteristics of a coroner's inquest (as the exploration of the grounds for an accusation or suspicion in relation to some disastrous or troubling event) (can inquest on the fall of Singapore and the sinking of H. M. S. Repulse and H. M. S. Prince of Wales—New Yorker) Probe applies to an investigation that searches deeply and extensively with the intent to determine the presence or absence of wrongdoing; it suggests methods of exploration comparable to a surgeon's probing for a bullet (a legislative probe of banking activities) (another probe would result merely in a reshuffle in police and political circles—Newsweek) Research applies chiefly to an inquiry or investigation which requires prolonged and careful study, especially of actual conditions or of primary sources of information. It is especially applicable to scholarly and creative inquiries or investigations (as by scientists, historians, or linguists) especially for the sake of uncovering new knowledge, of getting at the facts when these are not known, or of discovering laws of nature (basic research in science is concerned with understanding the laws of nature—Grainger) (research is a creative activity engaged in by talented human beings—Leedy) but it may sometimes be used for a study leading to the writing of a résumé of facts or laws already known (research has shown and practice has established the futility of writing of a résumé of facts or laws already known—Justice Holmes) or even for quite casual or trivial investigations (I... managed to get involved in a highway accident. All in the interest of research, you understand—Joseph) Ana questioning, interrogation, catechizing (see corresponding verbs at ask): examination, inspection, scrutiny, audit (see under scrutinize)

inquisition inquest, *inquiry, probe, investigation, research

Ana see those at inquiry

inquisitive *curious, prying, snoopy, nosy

Ana *impertinent, intrusive, meddlesome: interfering, meddling, intermeddling (see meddle)

Ant incurious —Con *indifferent, unconcerned, aloof, detached, uninterested, disinterested

inroad *invasion, incursion, raid

Ana intrusion, butting in (see corresponding verbs at intrude): encroachment, entrenchment, infringement, trespassing or trespass (see corresponding verbs at trespass): *entrance, entry, ingress

insane, mad, crazy, crazed, demented, deranged, lunatic, manic, non compos mentis are comparable in their general or nontechnical senses (for senses of corresponding nouns used technically see insanity) and as meaning afflicted by or manifesting unsoundness of mind or an inability to control one's rational processes. Insane as applied to persons usually implies such unsoundness of mind that one is unable to function safely and competently in ordinary human relations, usually does not recognize one's own condition, and is not responsible for one's actions (adjudged insane after a period of observation) (an extreme antisocial, perverted personality whose reactions differ widely from the normal, but are not necessarily to be classified as insane—Foulkes) In more general use insane implies utter folly or irrationality; the person or the act or utterance so described is, by implication, governed by blind passion or senselessness (the insane ambition and insatiable appetite which have caused this vast... war—Sir Winston Churchill) (dumbfounded by the insane assault—Al Newman) (now that wars... have become far more horrible and... insane—Inge)

Mad usually implies more frenzy than insane and therefore carries a stronger suggestion of wildness, rabidity, ravage, or complete loss of self-control (O, let me not be mad, not mad, sweet heaven! Keep me in temper: I would not be mad!—Shak.) (>he's mad. He always was. But he's worse than mad now. He's possessed—Graves) (>he has fallen in love... with a stupid cocotte who has begun by driving him mad with jealousy—Edmund Wilson)

Crazy often suggests such mental breakdown as may result from illness or old age (>he has gone crazy) (>we will bestow you in some better place, fitter for sickness and for crazy age—Shak.) (>Stuff!" exploded the Doctor. "You're not crazy and you never were and you're not going to be, unless you keep on making such a commotion about nothing"—Nancy Hale) or it may suggest a distraught or wild state of mind induced by some intense emotion (as anger, grief, joy, desire, etc.) (Lunette is a woman who finds but goes crazy if she hears Murdoch's voice—just swallows and trembles all over—Gerald Beaumont) (>she was crazy with desire for sleep—Ruth Park) (>somebody had shot a squirrel and he took on about it as though he had lost a child. I said then he was crazy—Anderson) As applied to such things as schemes, projects, or notions crazy usually suggests that they are the product of a disordered or ill-balanced mind (>no educated Socialist believes such crazy nonsense—Shaw) (>who would pay such a crazy price for a book) Crazed is often used in place of crazy when a temporary disorder, usually with a specific cause, is implied (>crazed with grief) (>they were crazed by the famine and pestilence of that last bitter winter—Amer. Guide Series: Wash.) Demented and deranged are more formal than the preceding words and less rich in connotations; both terms, moreover, imply a change from mental soundness to unsoundness, demented usually suggesting clear signs (as profound apathy or incoherence in thought, speech, or action) which indicate deterioration of the mental powers (>there was now no doubt that the sick man was demented) (>the great part of the German army in the early stages of the war was really an army of demented civilians—H. G. Wells) (>apparently not clearly demented until after 1818, he was for years dangerously near the border of insanity—Amer. Guide Series: Va.) and deranged (compare derangement under aberration 2) suggesting a loss of mental balance or a state of mental disorder resulting from a functional disturbance of the brain or nervous system (he was temporarily deranged by the shock) (>in our culture a person who falls sick, hears voices, communicates with shadows, and acquires special abilities from them is inevitably classed as deranged—Kroeber)

Maniac is approximately the equivalent of insane but is less frequently applied to persons and may imply no more than extreme folly (consuming with lunatic speed the assets of the earth—Agar) Maniac comes closer to mad, for it commonly connotes violence, fury, or raving (>the maniac rage of the multitude) (>the maniac dreamer; cruel... is he with fear—Shelley) Non compos mentis (Latin for "not sound of mind") is a legal term which specifies a state, but does not

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
define the particular condition or kind, of mental unsoundness. It is often used, especially in its shortened form non compos, more generally with similar indefiniteness. "Bar-ron's non compos. Lear controls him completely—Ken-neth Roberts\)

\textit{Ana} *irrational, unreasonable: distracted, bewildered (see PUZZLE vb)

\textit{Ant} sane —\textit{Con} sensible, judicious, *wise, sapient, prudent

**insanity, lunacy, psychosis, mania, dementia** are the leading general terms denoting serious mental disorder. Insanity as a technical term belongs to law rather than to medicine. It is used to cover a wide variety of mental disorders, all of which have in common one characteristic—an un-fitting of the afflicted individual to manage his own affairs or perform his social duties. Mental deficiency and delirious conditions are usually excluded, the former as in-born and not acquired, the latter as temporary and not long-lasting. Since in law a person's sanity or insanity becomes an issue when he is charged with a crime or when his legal capacity to make a will or contract or to transfer property is questioned, proof of insanity is tantamount to proof of his inability to act rationally and to understand the nature of his act and its natural consequences in affect-ing his rights, obligations, and liabilities. In general use insanity is commonly distinguished from mental deficiency and from neuroses and is applied to disorders involving unsoundness or derangement of mind. Lunacy in general use often applies to insanity manifested in spells of madness and fury or interrupted by intervals of lucidity. (Cervantes's hero was led into amiable but disastrous lunacy by a belated obsession with the literature of chival-ry—Muggeridge) (it's the tangle of good and badness; it's the lunacy linked with sanity makes up, and mocks, humanity!—Stringer) Lunacy sometimes is used interchangeably with insanity in law (a lunacy commission).

\textit{Psychosis} is the psychiatric term for a profound disorga-nization of mind, personality, or behavior resulting from an individual's inability to cope with his environment. Though in content often coextensive with insanity or lunacy it carries none of the special implications of these two terms.

\textit{Mania} (for fuller treatment see MANIA 2) denotes a phase marked by sustained and exaggerated elation, excessive activity (as in emotional expression or physical action), or delusions of greatness that characterize certain psychoses. Dementia implies a marked decline from a former level of intellectual capacity often accompanied by emotional apathy and is applicable to most psychoses that involve organic deterioration, not only those mani-festing themselves in spells of excitement but those manifesting themselves in apathy, depression, flightiness, or personality disintegration.

\textit{Ana} alienation, derangement, *aberration: frenzy, delirium, *mania, hysteria

\textit{Ant} sanity

**inscription, legend, caption** are comparable when they mean something written, printed, or engraved (as on a coin or a medal or under or over a picture) to indicate or describe the purpose or the nature of the thing. Inscription may apply to something written or printed, but it more often applies to something engraved, incised, or impressed on some hard surface (as stone, bronze, or silver); the word often carries an implication of durability or of permanence that is lacking, usually, in the others, and therefore often suggests a statement that has been framed or selected with care. (the inscription on a monument) (the bronze tablet has the following inscription) (some god direct my judg-ment! Let me see; I will survey the inscriptions back again. What says this leaden casket? "Who chooseth me must give and hazard all he hath"—Shak.) A legend (see also MYTH) is basically a very short inscription (as on a coin, a medal, or a heraldic shield) that is a motto or a statement of an aim, an ideal, or a guiding principle (the legend "In God we trust" is found on all coins of the United States of America) (the legend on the Victoria Cross is "For Valour"). The term is also used for the printed statement giving the title or a brief description or explanation of an illustration or diagram (as in a textbook or a work of reference) (according to the legend, this illustration is that of "A Roman legionary") Caption basically applies to a heading or title (as of a document, an article, a chapter, or a section) (an editorial under the caption "Where are we headed?") (the stories have appeared in a running series under the caption of "The Adventures of Brigadier Gerard"—N. Y. Evening Post) But the implication of a catching or arresting quality in the title is often evident, and caption may refer to a title or name given a story, an article, or an illustration that is designed to seize the atten-tion of the reader (delighting the readers of the Athenaeum with the treasures of his ... reading, under the caption, "A Budget of Paradoxes"—Grosart) The term caption is also used interchangeably with legend for the printed statement describing or explaining a picture or illustration (a diagram of a motor with all the working parts explained in the caption) (under each [picture] was an appropriate caption, such as Surprise, Grief—S. E. White) Caption is also used in motion pictures for any of the brief statements or bits of dialogue thrown on the screen to explain the scenes of a silent motion picture or of a sound motion picture in which the actors speak in a foreign language.

**inscrutable** *mysterious, arcane

\textit{Ana} profound, abysmal, *deep: baffling, balking, thwarting, frustrating, foiling (see FRUSTRATE); hidden, concealed, secreted (see HIDe); enigmatic, cryptic, dark, *obscure, vague: mystifying, perplexing, puzzling (see PUZZLE vb)

\textit{Con} obvious, plain, clear, manifest, *evident, patent

**insensitive** besotted, *fond, infatuated

\textit{Ana} fatuous, asinine, foolish, silly (see SIMPLE): *stupid, slow, dense, crass, dull, dumb: *irrational, unreasonable

\textit{Con} sensible, sane, judicious, *wise, prudent, sapient, sage: *rational, reasonable: *intelligent, quick-witted, knowing, alert

**insensible** 1 Insensible, insensitive, impassive, anesthetic mean unresponsive to stimuli or to external influences. Insensible usually implies total insensitiveness, and therefore unawareness or unconsciousness such as may result from blunted powers of sensation, obtuseness of mind, apathy, or complete absorption in something else. (he also warned me against X, a local professor of history, as a man full of prejudice and quite insensible to evidence—Laski) (so engrossed in his work that he was insensible of the flight of time) (men have a keener relish for privileges and honors than for equality, and are not insensible to rewards—Sédillot) Insensitive implies sluggishness in response or less than normal susceptibility; more specifically, it suggests dullness rather than acuteness of sensation or perception, thickness rather than thinness of skin, callousness rather than sympathy or compassion (an ear insensible to changes of pitch) (he was insensitive to all kinds of discourtesy—Joyce) (insensitive to the misery of others) (many... Europeans still think Americans are soulless and insensitive machines, a raw society of mass-produced healthy extroverts—Viereck)

Impassible basically and historically implies absence of response because of incapacity for feeling or suffering.
insensitive

but is often used synonymously with impassive or in reference to persons who by discipline have conquered the normal human susceptibility to pain or suffering (the Hindu striving for Nirvana renders himself impassible) or in reference to things in contrast with persons or creatures thought of as beings who through necessity of nature suffer pain or are susceptible to injury (the language of strategy and politics is designed . . . to make it appear as though wars were not fought by individuals . . . but either by impersonal and therefore wholly nonmoral and impassible forces, or else by personified abstractions—Huxley) <Svengali was sitting, quite impassible, gazing at Monsieur J—, and smiling a ghastly, sardonic smile—du Maurier> Anesthetic implies a deadening of the mind or senses by or as if by such a drug as ether and therefore an induced rather than a natural insensitiveness (the intelligentsia . . . neither as anesthetic to ideas as the plutocracy on the one hand nor as much the slaves of emotion as the proletariat on the other—Mencken) (all except the young girls are in a state of possession, blind, deaf and anesthetic—Cary)

insipid, vapid, flat, jejune, banal, wishy-washy, inane mean devoid of qualities which give spirit, character, or substance to a thing. Something insipid is without taste, or savor, or pungency; the term is applied not only to food and drink which are so tasteless as to give no pleasure or stimulation or to the qualities (insipid substitutes for coffee) but also to persons and their utterances and ideas which strike one as thin, weak, and characterless and leave one completely indifferent (the tepid quality of the expatriate American novel, which has escaped vulgarity to become insipid instead—Connolly) <happiness is a wine of the rarest vintage, and seems insipid to a vulgar taste—L. P. Smith> (the insipid veracity with which Crabbé used to report some of the most trite doings of Nature and of man—Montague) Something vapid is stale, uninteresting, or pointless because it has lost its characteristic taste, freshness, spirit, sparkle, or tang (the table beer was sour . . . the wine vapid—Smollett) <had a genius for making the most interesting things seem utterly vapid and dead—Graves> (we could spare a lot of the more frivolous and even vapid content of our papers—Mott) Something flat is so vapid that it seems dead or lifeless. The word is applied chiefly to what has lost all savor, sparkle, zest, or capacity for stimulating interest or pleasure (how weary, stale, flat and unprofitable, seem to me all the uses of this world—Shak) <the sonnet became, in the hands of innumerable practitioners, a thing . . . of artificial sentiment, flat as the lees and dregs of wine—Lowes> (the action follows the standard interpretation of Russian history in a flat and mechanical way—Newsweek) Something jejune is so devoid of substance or nutritive quality that it cannot satisfy the appetite; the word is only occasionally used with reference to physical hunger and is usually employed with reference to hunger of the mind or the emotions. It often connotes barrenness, aridity, or meagerness in addition to its basic implications (read through the sermon once more). It seemed more jejune than ever—MacKenzie> (literary history without evaluative criteria becomes jejune and sterile—Glicksberg) Something banal is so commonplace or so trite that it lacks all freshness or power to stimulate or appeal. The term often also

Ana obtuse, *dull, blunt: *impassive, apathetic, phlegmatic, stolid, stoic: *hardened, indurated, callous: engrossed, absorbed, *intent, rapt
Ant sensible (to or of something) —Con conscious, *aware, cognizant, alive: awake: impressed, affected, influenced, touched (see AFFECT)

insight

mean covert suggestion or a covert allusion to something. Insinuation applies chiefly to a remark, comment, or question which conveys or seems to convey a hint or implication, often one that is discreditable to the person at whom it is aimed (by tacit agreement they ignored the remarks and insinuations of their acquaintances—D. H. Lawrence) <we reject any insinuation that one race or another, one people or another is in any sense inferior or expendable—Eisenhower> Innuendo more often applies to the method of covert suggestion than does insinuation, and when it applies to a definite instance, it is referable to meaningful smiles, glances, inflections, as well as to remarks; in both cases the term definitely implies a suggestion of something that is injurious to the reputation of the person concerned (I prefer the most disagreeable certainties to hints and innuendos—Byron) (in this play Middleton shows his interest . . . in innuendo and double meanings—T. S. Eliot) <He—eventually—married her." There were volumes of innuendo in the way the eventually was spaced, and each syllable given its due stress—Wharton> (he learned by chance remarks overheard, from innuendo, a dropped word here and there, a sly, meaningful snicker—Harold Sinclair)

Ana hinting or hint, implying or implication, suggestion, intimation (see corresponding verbs at SUGGEST): *animadversion, aspersio, reflection: imputation, ascription (see corresponding verbs as ASCRIBE): allusion (see corresponding verb at REFER)

insipid, vapid, flat, jejune, banal, wishy-washy, inane mean devoid of qualities which give spirit, character, or substance to a thing. Something insipid is without taste, or savor, or pungency; the term is applied not only to food and drink which are so tasteless as to give no pleasure or stimulation or to the qualities (insipid substitutes for coffee) but also to persons and their utterances and ideas which strike one as thin, weak, and characterless and leave one completely indifferent (the tepid quality of the expatriate American novel, which has escaped vulgarity to become insipid instead—Connolly) <happiness is a wine of the rarest vintage, and seems insipid to a vulgar taste—L. P. Smith> (the insipid veracity with which Crabbé used to report some of the most trite doings of Nature and of man—Montague) Something vapid is stale, uninteresting, or pointless because it has lost its characteristic taste, freshness, spirit, sparkle, or tang (the table beer was sour . . . the wine vapid—Smollett) <had a genius for making the most interesting things seem utterly vapid and dead—Graves> (we could spare a lot of the more frivolous and even vapid content of our papers—Mott) Something flat is so vapid that it seems dead or lifeless. The word is applied chiefly to what has lost all savor, sparkle, zest, or capacity for stimulating interest or pleasure (how weary, stale, flat and unprofitable, seem to me all the uses of this world—Shak) <the sonnet became, in the hands of innumerable practitioners, a thing . . . of artificial sentiment, flat as the lees and dregs of wine—Lowes> (the action follows the standard interpretation of Russian history in a flat and mechanical way—Newsweek) Something jejune is so devoid of substance or nutritive quality that it cannot satisfy the appetite; the word is only occasionally used with reference to physical hunger and is usually employed with reference to hunger of the mind or the emotions. It often connotes barrenness, aridity, or meagerness in addition to its basic implications (read through the sermon once more). It seemed more jejune than ever—MacKenzie> (literary history without evaluative criteria becomes jejune and sterile—Glicksberg) Something banal is so commonplace or so trite that it lacks all freshness or power to stimulate or appeal. The term often also

carries one or more of such various connotations as
tastelessness, pedestriamism, triviality, or platitudinous-
ness (a simple person marvelously protected from vul-
gularity and the balan—T. E. Brown) (the "poor working
girl" of the balan songs of the period—Farrell) (the aver-
age man, doomed to some balan and sordid drudgery all his life long—Mencken) Something wishy-washy has
the essential or characteristic qualities so weak or diluted
that it strikes one as extremely insipid or vapid (she is
too wishy-washy to attract interesting friends) (his cour-
age in expressing opinions that are always judicious but
never wishy-washy—W. R. Crawford) (they accepted
the wishy-washy, almost meaningless, resolution—Spec-
tator) (Baudelaire's notion of beatitude certainly tended
to the wishy-washy—T. S. Eliot) Something inane is
devoid of sense, significance, or point (to us the book
seems a very inane, tiresome, and purposeless affair—
Manchester Examiner) (in order to cover his embar-
sassment, he made some inane remark on the weather
—Conrad)

inspiration, afflatus, fury, frenzy, especially when quali-
fied by divine or poetic, all designate the seemingly in-
voluntary element in the arts of expression for which the
artist often holds a power outside himself responsible.
Inspiration may distinctively imply a preternatural en-
lightening and quickening of the mind and connote,
especially when used by religious persons, the intervention
of or as if of such a supernatual influence as the Holy
Spirit among such men there remains a . . . belief in
what is vaguely called inspiration. They know by hard
experience that there are days when their ideas flow
freely and clearly, and days when they are dammed up damnable—Mencken) Often, from its use in connection
with the authorship of the Scriptures, inspiration implies
supernatural or supranatural communication of knowl-
edge (has the highest aspect of Greek religion ever been
to be inspiration and not from books?—Inge) Afflatus distinctly applies to the inspiring influence rather than to the process or its effects (the artists and
poets who but once in their lives had known the divine
afflatus, and touched the high level of the best—Henry
James) (we imagine that a great speech is caused by
some mysterious afflatus that descends into a man from
above—Eastman) but it also may name a quality rather
than an influence or an operation (he never again achieved
that delicate balance of cold, scientific investigation and
imaginative afflatus—Scalia) Fury and frenzy emphasize
the emotional excitement that attends artistic creation and
the tendency of the artist to be carried out of himself.
Fury found most often in the phrases "poetic fury" and
"divine fury," does not in ordinary use imply extreme
agitation; it characteristically connotes profound ecstasy
induced by the poet's vision or conception (they are so
beloved of the Gods, that whatsoever they write, pro-
ceeds of a divine fury—Sidney) (in an age of formalism,
poetic fury itself became a formal requirement—Babbitt) Frenzy usually implies agitation rather than rapture,
and stresses the imaginative or inventive element in
creation, sometimes to the exclusion of any extraneous
influence (does he compose in a frenzy of mystical
exaltation or does he work out his lines slowly and even
laboriously?—Kilby) (caught the first fire of the writer's
frenzy in the classroom when a long dead poet was being
discussed—Dock Leaves) (Mencken and his Mercury
were anything but cold. They were always in a state of
frenzy—Angoff)

instance n Instance, case, illustration, example, sample,
specimen mean a concrete thing which has or manifests
the qualities, characters, or nature of a type, a class, or a
group. Instance applies to an individual person or thing
brought forth in support or disproof of a general statement
(he instance may be rejected, but the principle abides
—Cardozo) (Herodotus is a shining instance of the strong
Greek bent to examine and prove or disprove—Edith
Hamilton) or as a means of indicating the character of
a class (this novel is a good instance of his best work)
(the patterns on the breasts are an instance of the formal-
ism of the period—Saunders) Case applies to an act, situa-
tion, condition, or event demonstrating the occur-
rence or the existence of something which is being con-
sidered, studied, investigated, or dealt with or exhibiting
it in actual operation (cite cases of bribes given as pay-
ments for services never performed) (students of the
effects of poverty now base their conclusions on
instances for services never performed) (there has been no case of malaria in this section for three years) Illustration applies to an
instance adduced or cited as a means of throwing light
upon what has been explained or discussed in general
terms (give several illustrations of the use of a word in
a particular sense) (cites indiscriminately . . . materials
of such different value that they provide illustration
rather than documentation of his points—Dinkler)
Example (see also MODEL) applies to a typical, repre-
sentative, or illustrative instance or case (if I were asked
to define what this gentlemanliness is, I should say that

instance vb *mention, name, specify

Aprooof, *reason, ground: *evidence: particular, *item, detail

instant n Instant, moment, minute, second, flash, jiffy, twinkling, split second are comparable when they mean a particular point of time or a stretch of time of almost imperceptible duration. Instant and moment are often used interchangeably to us . . . the moment 8.17 a.m. means something . . . very important, if it happens to be the starting time of our daily train. To our ancestors, such an odd eccentric instant was without significance—did not even exist—Huxley but instant carries so much stronger a suggestion of infinitely small duration that it is better fitted than moment for contexts that imply urgency, extreme transiency, or inconceivable swiftness to trace the visionary company of love, its voice an instant in the wind (I know not whither hurled)—Hart Crane to come this instant (he was not an instant too soon) it passed in an instant Moment, on the other hand, is particularly serviceable when the word or the context carries the implication of a definitely apprehended, even though extremely brief, point of time to wait a moment a moment of dreadful suspense—Greene (it was the finest moment of her life) I haven't had a moment to attend to it) Minute and second technically apply to measured fractions of an hour, but in the present relation minute, even more than moment, suggests an appreciable though short duration of time, and second, quite as much as instant, suggests its imperceptible duration who buys a minute's mirth to wait a week—Shak. the train will start in a minute I was gone only a minute standing in the middle of the street he would blow, and in a minute boys would come swarming to him—John Reed they showed a second or two of hesitation, and then plunged off the road—Ingamells I'll get it this second. Flash suggests duration comparable to that of a flash of lightning; the term is therefore often used when incredible speed in movement, action, or thought is implied the secret of the poor wretch's death was plain to me in a flash—Kipling eyes that in a flash could pick out a friend from a throng—Cather Jiffy is found chiefly in the phrase in a jiffy, equivalent to very quickly or directly she could have tossed off an article for The Times in a jiffy—Nicolson the fisherman raises the submerged net in a jiffy—Nat'l Geog. Mag. I'll be there in a jiffy Twinkling, often with an added "of the eye," suggests the quickness of a wink or blink (his patient would be carried off by ménimins in the twinkling of an eye—Stafford the kettle will boil in a twinkling—Punch) Split second, basically denoting a fractional part of a second, heightens the implication of brevity as expressed by second Mr. Moon stood for one split second astonished—Chesterston one split second of surprise—Sharp

instinctive 1 Instinctive, intuitive both mean not involving, based on, or determined by the ordinary processes of reasoning, but as applied to human mentation they are not normally interchangeable because of consistent differences in connotation. Instinctive in this connection (see also SPONTANEOUS) implies a relation to instinct, the more or less automatic and unreasoned reactive behavior characteristic of a natural group (as a species) rather than of the individual; as applied to human mental activity and behavior instinctive stresses sometimes the automatic quality of the reaction, sometimes the fact that it takes place below the level of conscious reasoning and volition whether as a true expression of instinct or as being through habituate as deeply ingrained as instinct (a baby may be born with a fear of a loud, sudden noise and a fear of falling. Those things we call instinctive—Fishbein) while yet a boy he was a thorough little man of the world, and did well rather upon principles which he had tested . . . and recognized as principles, than from those profounder convictions which in his father were so instinctive that he could give no account concerning them—Butler d. 1902 some of our most inevitable and instinctive sentiments . . . cannot be brought directly under logical laws—Coulton) Intuitive, correspondingly, indicates relationship to intuition, the highly personal intellectual capacity for passing directly from stimulus to response (as from problem to solution or from observation to comprehension) without the intervention of reasoning or inferring; as applied to the human mind and to products of its activities intuitive suggests activity above and beyond the level of conscious reasoning (God's thought obviously differs in its character from that of man. The latter . . . proceeds in step-by-step fashion from premise to conclusion; God's thought is entirely intuitive . . . it grasps its object by a single flash of insight—Thilly) every scientific generalization is intuitive, for while the scientist may see a phenomenon just by looking, as at Newton's apple, he must use creative imagination and intuition to relate this apple to the moon and so discover the universal law—G. R. Harrison an intuitive mind, passionate in its attempt to capture a great truth in a few words, but impatient of logical sequences—Canby

Insubordinate, rebellious, mutinous, seditious, factious, contumacious mean having or showing defiance or indifference to constituted authority. Insubordinate is used primarily in reference to a person whose status is that of a subordinate and especially of a member of an organized group (as a force, a crew, or a staff) under the control of a head (as a military or naval officer, a chief, or a master) who is responsible for their service as individuals and their discipline as a group; the term implies disobedience to orders or infraction of rules either as a particular instance or as a habit (insubordinate sailors are confined in the warship's brig) (insubordination . . . may consist simply in a persistent and concerted refusal or omission to obey orders, or to do duty, with an insubordinate intent—Manual for Courts-Martial) Rebellious implies disaffection and insubordination; it may refer to a state of mind or to a temperamental tendency (temperamentally rebellious, instinctively disliking externally imposed authority—Biddle) but more often it suggests active or organized resistance (rebellious troops) (an outlaw'd desperate man, the chief of a rebellious clan—Scott) (the sword his grandsire bore in the rebellious days of yore—Longfellow) Mutinous is a stronger and more derogatory term than rebellious which may imply justifiable resistance, for it suggests the refusal to obey the lawful demands or commands of an officer in charge, especially a military, naval, or ship's officer, with the result that there is no longer discipline and efficiency in the group or, if the mutiny is successful, that a new and usually unlawful control is set up (the master ordered the mutinous sailors put into irons) (the mutinous members of the crew finally gained the upper hand) (each one . . . gave him to understand, roughly and roundly, that to go to sea in her they would not. In the midst of this mutinous uproar, the alarmed con-
sul stood fast—Melville) Mutinous is also frequently applied to active forces (as passions, winds, or waters) that are exceedingly turbulent or uncontrollable (I have . . . called forth the mutinous winds—Shak.) (mutinous passions, and conflicting fears—Shelley) Seditious implies treasonable activities and often specifically a stirring up of discontent or of opposition to or rebellion against the go-

vernment (seditious societies) (seditious writings) (seditious factionalism went on a rampage and began to wreck our foreign policy—Ascoli) (revolutions that were not made in Boston, by Boston gentlemen, were quite certain to be wicked and seditious—Parrington) Factious stresses the contentious, perverse, or turbulent provocation of party spirit or a tendency to break up into embittered and irreconcilable factions. Only when it implies as a result the destruction of peace in the group as a whole does it suggest indifference to or defiance of constituted authority; very frequently it suggests the opposition of legislative groups or blocs to the government (a quarrelsome, factious race) (the government's plan to entertain the proposals for peace aroused the factious spirit of the parliament) (Florence . . . sow ing the wind and reaping the whirlwind, wearing her soul out by factious struggles—Oliphant) (the Opposition will be vigilant but not factious. We shall not oppose merely for the sake of opposition—Attlee) Contumacious is found chiefly in legal and ecclesiastical use. It implies persistent, willful, or open disobedience of the orders of a court or of one's superiors; often, it specifically suggests contempt of court by a bold refusal to obey a summons or subpoena, or open and stubborn defiance of laws or orders that are seldom disobeyed (con her refusal to appear in person or by her attorney, she was pronounced contumacious—Lingard) (magistrates and populace were incensed at a refusal of customary marks of courtesy and respect for the laws, which in their eyes was purely contumacious—Inge)

Ana recalcitrant, refractory, *unruly, ungovernable, intractable

Con *obedient, amenable, docile, tractable, biddable: submissive, subdued, *tame

Insular, provincial, parochial, local, small-town are comparable when they mean having or indicating the limited or restricted point of view considered characteristic of the geographically isolated. Insular is usually applied to people or the ideas of people who are in one way or another isolated, so that they become or are regarded as self-contained or self-sufficient and disinterested in matters remote from their own concerns. The term implies an aloofness that proceeds from this isolation, but it usually also connotes narrowness of attitude, circumscription of interests, or prejudices in favor of one's own people or one's own kind (as of customs, literature, and art) (much of the impetus for international thinking and planning has come from our schools and our colleges, and the pressures for insular chauvinism have come from self-seeking groups of adults—Brown) (Bradley was fighting for a European and ripened and wise philosophy, against an insular and immature and cranky one—T. S. Eliot) Provincial sometimes applies to what is characteristic of outlying districts as in opposition to what is characteristic of such metropolitan centers as London or New York (a provincial accent) (provincial theaters) (provincial fashions) but the word tends to connote narrowness of view or of interest as opposed to what is cosmopolitan or catholic (he replaced a philosophy which was crude and raw and provincial by one which was, in comparison, catholic, civilized, and universal—T. S. Eliot) (harm commitment to a given ideal is not equivalent to provincial intolerance towards other forms of excellence—Nagel) (Stalin, a provincial, Victorian philistine, fancied himself as an infallible connoisseur—Willets) Parochial, with its reference to a parish, a local unit of administration in the church or, in some regions, in the state, implies confinement to views and interests of a particular place and connotes extreme narrowness and, often, intolerance (of all kind of human energy. Art is surely the most free, the least parochial; and demands of us an essential tolerance of all its forms—Galsworthy) (even so great a historian as Toynbee, who has, compared with Mr. Toynbee, who has literally taken the world . . . as his province—Brogan) (small wonder that the news is often out-of-date, and that it is mostly political polemics or parochial gossip—Kim

2 *news, tidings, advice

intelligent 1, *mental, cerebral, psychic

2 Intelligent, clever, alert, quick-witted, bright, smart, knowing, brilliant are comparable when they mean mentally quick or keen. Intelligent implies greater than average power to use one's mind successfully when demands are made upon it (as in understanding the new or abstruse or in meeting and solving problems) (Puritanism presupposed an intelligent clergy capable of interpreting Scripture)—Amer. Guide Series: Mass.) (the vigor of his quick and lucid mind, keenly intelligent rather than deeply intellectual—Lustgarten) Clever implies resourcefulness or aptness more strongly than intelligent, and it emphasizes quickness in apprehension rather than fullness of comprehension, and dexterity or adroitness, rather than soundness, in the mental processes (the poor girl liked to be thought clever, but she hated to be thought bookish—Henry James) (he could deal competently with effects, but he was not clever at assigning causes—Sinclair) Often the word suggests a contrast with higher or more substantial qualities (be good, sweet maid, and let who will be clever—Kingsley) (a clever boy trains for an examination as he trains for a race; and goes out of training as fast as possible when it is over—Inge) Alert stresses quickness in the mental processes, especially in comprehending a situation (she seemed more feeble in body . . . but her mind was still alert—L. P. Smith) (after Munich alert observers urged more forcefully that our country must hurry to develop its military power—Feis) Quick-witted also implies quickness in thinking but in addition it suggests promptness in action in an emergency, in response to a challenge, in conversation, or in debate (we are not a quick-witted race; and we have succeeded . . . by dint of a kind of instinct for improvising the right course of action—Inge) Bright and smart are more often applied to young or promising persons than to those who are proficient or of proved intelligence. Bright suggests cleverness that is manifested especially in liveliness of mind or in liveliness of talk or manner (how they could, who had once been so eager and bright, be so stodgy now—Edman) (bright young fellows with a charming literary swagger, they aspired to be wits—Parrington) Smart, too, implies cleverness but it also suggests alertness or quick-wittedness that enables one to get ahead (I wish I was smart enough to invent something and maybe get rich—Anderson) (the master said he was the smartest lad in the school—D. H. Lawrence) (the race is no longer to the strong, but to the smart—Drake) Both words are used ironically, bright then implying dullness or stupidity and smart, pertness, facetiousness, or sometimes trickery or duplicity (a smart aleck) (given to making smart retorts) (other bright ideas—some showing a superabundance of practical feasibility, as well as of the weld of any unfortunates who might happen to be in the experiment area—include the scattering of concentrated sulphuric acid—The Countryman) (I do not want . . . to be converted by a smart syllogism—Birrell) (the smart work is hidden in the wording of the Monroe doctrine—Emporia Gazette) Knowing carries a stronger implication than any of the preceding terms of the possession of information or knowledge that is necessary or useful under given circumstances (the knowing collectors of records—Sat. Review) (bipartisanship, as a knowing Republican politician once remarked, is a fine thing—between elections—Collins) Occasionally the term further suggests a less agreeable quality such as sophistication, secretiveness, or the possession of knowledge of others' secrets (a knowing wink) (a face so mean, so knowing—Thackeray) (his work has a distasteful air of pretentious smartness, of being altogether too knowing—Read)

Brilliant adds to intelligent the implication of unusual and outstanding keenness of intellect that manifests itself so openly or effectively as to excite admiration; the term usually suggests an opposition to qualities that characterize one whose mind works more slowly or cautiously (a brilliant mathematician) (John Todhunter was esteemed a shrewd sensible man—only not brilliant—Meredith) (Einstein's brilliant solution of the . . . puzzle—Zinsser) (the brilliant anthropologist whom de Gaulle wished to place in charge of a combined intelligence service—Funk)

Ana *sharp, keen, acute: *shrewd, sagacious, perspicuous, astute: cunning, ingenious, adroit, *clever

Ant unintelligent—Con foolish, idiotic, imbecilic, moronic (see corresponding nouns at IDIOT): *stupid, slow, dull, dense, crass, dumb: *irrational, unreasonable

intend, mean, design, propose, purpose signify to have in mind as an end, end, or function. Intend implies that the mind is directed to some definite accomplishment or to the achievement of a definite end (if one earnestly intends a conspiracy, one does not commence with a series of public readings—Kristol) (intended twenty-four books, sketched fourteen, but left only four—Highet) or is bent upon some person or thing (as an invention or a writing) serving a certain purpose or use, or fulfilling a certain destiny (a play, intended for great Theseus' nuptial day—Shak.) (a strong suspicion that the new instrument with which Einstein has presented the mathematicians is being put to use for which it was never intended—Inge) (a man set aside and intended by nature to lead a blameless life—Anderson) Intend often implies an aim to express a definite idea by a given word or phrase (just what the framers of the constitution intended by the phrase "to be twice put in jeopardy" is still a matter of some doubt) (he caught the phrase as it dropped from his lips with a feeling that it said more than he intended—H. G. Wells) Mean often carries a denotation close to that of intend (those organ tones of his were meant to fill cathedrals or the most excided of tribunals—Cardozo) but it does not convey so clear an implication of determination to effect one's end as does intend and, sometimes, it implies little more than volition or decision (he always means to work harder) (a book that I mean to get when I reach Beverly—Justice Holmes) (I don't mean to defend Charles' errors, but before I form my judgment of either of them I intend to make a trial of their hearts—Sheridan) (he shouldn't have done it, of course; but he was thoughtless. And he meant to pay the money back—Dela) Design (see also under PLAN) usually stresses forethought and deliberation in arriving at an intention (the American people) (did not design to make their government dependent on the States—John Marshall) (we wanted absolute surrender and we wanted it within a matter of hours, and the bomb of Nagasaki was designed to achieve just that, which it did—Cousins) Often, the term also implies scheming or contriving, especially by underhand means, in an attempt to effect what is designed (your father and sister, in their civilities and invitations, were
intense, vehement, fierce, exquisite, violent are comparable
to do when your funds run out? © I

pardon—Quiller-Couch) © she burns with a fierce pietistic
suspiciousness of all the arts—Trilling) © so fierce were the passions that had been aroused, that again he was in
danger of violence—Froude) Exquisite (see also CHOICE) raises the implications of intense to a point suggesting an
extreme near to consummation or completeness. In this sense it has been applied indifferently to things good or bad but often with the result that, when applied to things as nasty as the soul's feelings, judgments, or color which may be called good, its meaning is taken as equal to that of exquisite at CHOICE; thus, although exquisite cleanliness may mean cleanliness so extreme that it suggests immoderateness, it is usually thought of as cleanliness so perfect that it gives joy to the fastidious. Consequently, exquisite in this sense is more often applied to what is felt or appreciated keenly or acutely (with a brilliant mind, nervous temperament, intense susceptibil-
ity to artistic and spiritual impressions . . . [she] was at-
tuned to exquisite pleasure and exquisite pain—Hanscom
(subject a person to exquisite torture—Violent (for
(senses of acting with or caused by violence compare vio-
ence under FORCE) implies immoderate strength or force and, usually, the exceeding of normal bounds even in
something that is strong or forcible; the term need not
impute a disagreeable quality to that to which it is applied,
but the possibility of this implication is more frequent than
in the other terms © violent heat) © his intense faith and his
violent spiritual agonies are experiences which few of us
today are able to share—Day Lewis) © an unreasoning
passion of despair descended upon them both, violent yet
essentially slight—Wyle) ©
intensified, enhanced, heightened, aggravat
uated (see INTENSIFY) accentuated, emphasized, stressed (see cor-
responding nouns at EMPHASIS)
Ant subduced (colors, lights, emotions)

intensify, aggravate, heighten, enhance mean to increase
markedly in degree or measure. Intensify implies a deep-
ening or strengthening of a thing or especially of its char-
acteristic quality (a clear atmosphere intensifies the blue
of the sky) (an unfortunate atmosphere . . . it is that
intensi
s the suspicions with which the hardheaded and skep-
tical naturally approach such revolutionary claims—
Flew) © historical circumstances of recent years have
conspired to intensify nationalism—Huxley) © Aggravate
implies a manifest increase in the seriousness of a situa-
tion or condition that is already unpleasant or difficult
false rumors that aggravate racial animosities) © truth and
frankness dispel difficulties, but the attempt at
repressive moral discipline only aggravates them—Russ-
ello) © these considerable defects in a parish priest were
aggravated rather than offset by his talents as an orator—
Anthony West) © Heighten and enhance both imply a lift-
ing or raising: heightened, however, tends to imply a
lifting above the ordinary, the trite, or the commonplace, and
a consequent increase in sharpness and poignancy, and
enhance a lifting above the norm or the average in desir-
ability or attractiveness by the addition of something that
increases the value, charm, or prestige of the thing en-
hanced © a dramatist heightens the effect of his scenes by
rapidity of the action and he enhances his dialogue by the
addition of witty repartee) © had heightened his apprecia-
tion of the more austere pleasures of the afternoon—Arch-
ibald Marshall) © a painter discards many trivial points
of exactness, in order to heighten the truthfulness of a few
fundamentals—Montague) © (Augustus sought . . . in
every way to enhance its [the Roman Senate's] prestige and dig-
nity—Buchan) ©

attention either by a driving purpose or emotion or an easier interest or by the force or urgency of circumstances beyond one’s control (he appears to have been so engrossed by domestic issues as to have given little attention to foreign problems—W. L. Langer) (Sieveking was naturally engrossed in the musical problem, which was perplexing enough—Hilton) (these constitutional changes . . . were pushed through during and after the war by a group of busybodies who were not too much engrossed by the agony of their country to conduct a raging agitation in all parts of England—Inge) Absorbed often differs little from engrossed in this sense (the point is that Broch is never engrossed in, and never permits the reader to become absorbed by, the story itself—Arendt) but it may carry a stronger suggestion of the power of the thing on which the attention is fixed to capture one’s attention and to hold it firmly so that there is difficulty in distracting it (wholly absorbed in his preparations for saving souls in the gold camps—blind to everything else—Ana) Farthest North. Imogen, at eight years old, had read it, absorbed, breathless, intent, tongue clenched between teeth—Rose Macaulay) Rapt implies both extreme intentness and complete absorption, as though one were taken out of oneself or were in an ecstatic trance (rapt in adoring contemplation—Farrar) (expounded the ultimate meaning of existence to the white, rapt faces of Humanity—L. P. Smith) (in openmouthed wonder the lama turned to this and that, and finally caught in rapt attention before a large alto-relief representing a coronation or apotheosis of the Lord Buddha—Kipling) 

Ana attending or attentive, minding, watching (see corresponding verbs at TEND): *abstracted, preoccupied: concentrated (see COMPACT vb): riveted (see SECURE vb) Ant distracted

intention, intent, purpose, design, aim, end, object, objective, goal are comparable when meaning what one proposes to accomplish or to attain by doing or making something, in distinction from what prompts one (the motive), or from the activity itself (the means), or from the actual or envisioned outcome (the effect). The first four of these words stress the clearly defined will to do or make something. Intention, however, often denotes little more than what one has in mind to do or to bring about (she had not had an intention or a thought of going home—Dickens) (she had divined the intention behind her mother’s tolerance—Joyce) (announced its intention to divide its Indian Empire into two dominions—Current Biog.) Intent suggests clearer formulation and greater deliberateness than intention (they become enamored of official declarations of intent, though not much is said about the machinery to translate intent into action—Cousins) (behind my look you saw such unmistakable intention—Millet) Purpose implies more settled determination or more resolution than intention (have a purpose in life) (the missionary was here for a purpose, and he pressed his point—Cather) (there lie youth and irresolution: here manhood and purpose—Meredith) Design carries further the notion of deliberateness and purposiveness in formulating an intention; in this sense it is not always clearly distinguishable from design denoting plan (see under PLAN n), for it retains the implications of careful ordering of details, of calculation, and sometimes of scheming (a great man by accident rather than design—Laski) I had suspected him of harboring sinister designs—Hudson) (the United States has no ulterior designs against any of its neighbors—Vandenberg) Aim implies a clear definition of something that one hopes to effect and a direction of one’s efforts or energies to its attainment; thus, one who proposes to make the best of his powers and of his opportunities may be said to have a purpose in life: one who has clearly defined the mark he hopes to reach and determines his actions by it may be said to have an aim in life (her steadiness and courage in the pursuit of her aims—J. R. Green) (the aim of the Elizabethans was to attain complete realism—T. S. Eliot) The remaining words of this group, like aim, imply that what one does is affected by what one hopes to accomplish or attain. End in this relation retains some of the suggestion of remote ness and finality inherent in some of its other senses (see LIMIT, END 2) and therefore is appropriately applied to an aim or purpose which takes its nature from principle or logical necessity and of which the attainment requires a definite and planned course of action leading to the modification of existent reality (holding that the good of the end justified all the evil of the means) (the relation between means and ends is clearly bound up with a temporal view. Ends are in the future, means in the present. We do control means, we do not control ends. Hence the foolishness of conceiving ends apart from means. On the contrary, ends must be judged, and evaluated, in the light of the means available for their attainment—Visalberghi) (provide the safeguard we need against the abuse of mankind’s scientific genius for destructive ends—Dean) (the end of law was to bring about the widest possible abstract individual liberty—Roscoe Pound) (it is commonly said and commonly believed that science is completely neutral and indifferent as to the ends and values which move men to act: that at most it only provides more efficient means for realization of ends that are and must be due to wants and desires completely independent of science—Dewey) Object and objective apply to an end as being that toward which effort or action or emotion (as hope) is directed (the object is to gather data that can be taken only during a total solar blackout—Coven) (one of the important objectives of public education has been and will always be to inspire in youth a deep appreciation of the basic spiritual and religious values which give meaning to existence—Current Biog.) Distinctively, object may suggest an end based on more individually determined desires, needs, or intentions (Colonel Belgrave, who is bent on aborting Amanda . . . pursues his object with a pertinacity and ingenuity that does credit to his understanding—Crothers) (the object of a legislator, he declares, is to make not a great but a happy city—Dickinson) (we call a man cruel who takes pleasure in the suffering of others and inflicts it with that object—Bellow) while objective may suggest one which is concrete and immediately attainable or at least one which involves no obviously insurmountable problems (the objectives of the Guild are to promote and advance the spiritual, social, educational and recreational welfare of the blind persons in the Diocese—Humrah) (Columbia included among its earliest stated objectives the instruction of youth in surveying, navigation, husbandry, commerce, government, and manufacture—Eurich) Goal often evokes the image of one running a race: usually it implies struggle and endurance of hardships and cessation of effort at attainment (the Goal, which is the goal of all moral endeavor—Inge) (In the average man’s mind leisure is a goal to strive for—Furnas) (equality is, of course, a goal or ideal rather than an immediately attainable objective—Gallagher)

**Ana** transpose, *reverse

**intercourse, commerce, traffic, dealings, communication, communion, conversation, converse, correspondence** are comparable when meaning the connection established between persons or peoples through a medium that permits interchange (as of information, of opinions, of ideas, or of goods). **Intercourse** usually means little more than this and requires a qualifying adjective to indicate the things interchanged or the medium permitting interchange (business intercourse) (trade intercourse) (sexual intercourse) (social intercourse). In ordinary use, when employed without qualification, intercourse means social intercourse or the normal interchange of such things as ideas, opinions, news, and civilities between one person or group and another with whom there are more or less intimate relations (the truth was, he could not be happy for long without human intercourse —Cather) (the keen and animated intercourse with its exchange of disputable convictions —Repliger) (he welcomes extra-class intercourse with students and encourages them to think critically —G. H. White) (if nations are to cooperate, the first condition must be that they have social and political intercourse —E. B. White). **Commerce**, which applies primarily to the interchange of goods by buying and selling (for this sense, see BUSINESS 3) also is used in the more general sense of intercourse in which it is considered a type of behavior between living creatures characterized by mutuality, rooted in biological heredity, and constituting one of the general manifestations of life —(Révéz) or of the process or art of effectively interchanging symbols (in order to develop and maintain that basic consensus of values, beliefs, and institutional behavior upon which its existence must rest . . . a society must maintain effective communication among its parts . . .). Indeed, the effectiveness of the communication process is a measure of the social integration of a society —Cottrell) (Lilly was not expert in communication, and did not try to draw Mr. Sprockett out although it would have been easy —Ethel Wilson) or, in the plural, of the means by which spatially or temporally separated individuals or groups engage in such exchanges (communication) were disrupted by the storm (there is . . . no conclusive evidence that the organized life of any Romanos-British town survived the severance of its communications in the troubles of the fifth century —Stenton) (the poor communications that exist in many factories between the front office and the men at the workbenches —Purtell). **Communion** usually implies intercourse between those who are close in love or sympathy or in mutual understanding; it often suggests rather than implies spiritual intercourse or the absence of words (the consummation of communion with God coincides with the final resolution of the sense of estrangement from Him —Inge) (Delia sat down beside her, and their clasped hands lay upon the coverlet. They did not say much . . . their communion had no need of words —Wharton) (most of the time my father was buried in his religious books, and my mother recognized it as her function to keep this communion undisturbed —Behrman). **Conversation** has a use, chiefly in the phrase criminal conversation, in which it is equivalent to sexual intercourse, and converse has a poetic sense in which it approaches communion (to hold fit converse with the spiritual world —Wordsworth) (to spend in pure converse our eternal day —Rupert Brooke). In general use, however, both terms usually imply free and often lively oral interchange of opinions, comments, or news between two or more persons; conversation often applies specifically to the act of interchanging opinions, ideas, and information in talk, and converse, to the ideas, gossip, and opinions involved in such conversation (an important general . . . deep in converse with the wealthiest of all the astrologers of those war years —Han Suyin) (give a freedom to resolve difference by converse —Oppenheimer) (we had talk enough, but no conversation; there was nothing discussed —Johnson) (genuine conversation —by which I mean something distinguishable from disputation, lamentation, and joke telling —Krutch). **Correspondence** implies intercourse through an interchange of letters (there has been no letup in their correspondence for fifty years) (the business was conducted by correspondence).

interpose 1 interject, introduce, insert, interpose, intercalate
*throw, toss, cast: *intrude, obtrude: *push, shove, thrust

2 Interpose, interfere, intervene, mediate, intercede all basically mean to come or to go between two persons, two things, or a person and thing. Interpose (see also INTRODUCE 2) may be used in place of any of the succeeding words largely because it carries no further implications, except as they are derived from the context <the tops of the trees behind him interposed between him and the sun—Forster> he should not interpose between other engineers and their clients when unsolicited—Wagner> our host . . . interposed and forbade the experiment, pleading at the same time for a change of subject—Shaw> Interfere (see also MIDDLE) implies a getting in the way of a person or thing whether by crossing his or its path—or, more often, by creating a condition that hinders his movement, activity, or vision or its free operation or full effectiveness <parliament interfered to protect employers against their laborers—Froude> the atmospheric disturbance interfered with radio reception) <wooden palings that did not interfere with a wide view—Mackenzie>
Intercede may be used with reference to something that interposes itself or is interposed between things in space or time <a huge and at that time apparently barren waste . . . intervenes between the St. Lawrence basin and the fertile prairie—Sandwell> <the events of the intervening years—Dewey> or between persons <the interjection of a third party who has a valid interest, or who intervenes between the physician and the patient—W. T. & Barbara Fitts> or between a person and his interests, work, or goal <the trained self-consciousness, which . . . intervenes between the poet's moods and his poetry—Day Lewis> <fortunately, mercy and diplomacy intervened and the vengeful sentence was never carried out—Thruelsen>

Mediate often specifically implies intervention between those who are hostile, antagonistic, or otherwise opposed to each other, for the sake of reconciling them or settling their difficulties; mediate usually implies, as intervene need not imply, an interest in both sides or freedom from bias toward either side <Bacon attempted to mediate between his friend and the Queen—Macaulay> <I want to mediate between the two of you now, because if this breach continues it will be the ruin of us all—Graves> But mediate may also be used abstractly in reference to something that lies between extremes or contradictions and effects either their union or a transition between them <critics . . . who mediated between extreme points of view—Glicksberg>
Intervene implies intervention on another's and usually an offender's behalf and the use of one's good offices in imploring mercy or forgiveness for him from the one who has been injured or offended <for each at utter need—true comrade and true foeman—Madonna, interceded—Kipling> <the Duchess of Aiguillon interceded for Marie de Médicis with Richelieu> <the conviction that the Western powers would not intercede in favor of the peoples of the satellites—Timasheff>

by implied threats (a mean, stingy, bulldozing poseur with woodchuck whiskers—Pegler) (through the sheer strength of his reputation and the force of his will bulldozing them into making loans—F. L. Allen) (some irate customer who had come in to bulldoze me ... and had tried to bully me with mere words—White) (Bully) implies intimidation through overbearing, swaggering threats or insults, and in schoolboy usage it usually suggests bulldozing of small boys by those who are larger or more aggressive (suppose the cabman bullies you for double fare—Shaw) (1) (I know what you're going to call me ... but I am not to be bullied by words—L. P. Smith) (Browbeat) implies a cowering through arrogant, scornful, contemptuous, or insolent treatment (he browbeat the informers against us, and treated their evidence with ... little favor—Fielding) (who saw my old kind parents ... too much trustful ... cheated, browbeaten, stripped and starved, cast out into the kennel—Browning) (Ana) terrorize, terrify, *frighten: hector, hound, ride, chivy, *bait, badger: coerce, *force, compel, constrain, oblige (Con) *coax, wheedle, cajole, blandish: persuade, prevail, *induce (intol) intolerant *illiberal, narrow-minded, narrow, bigoted, hidebound (Ana) obdurate, *inflexible: *antipathetic, unsympathetic, adverse (Ant) tolerant—Con *forbearing, indulgent, lenient intonation *inflection, accent (intone) *sing, roll, carol, descant, warble, trill, hymn, chant intoxicated *drunk, drunken, inebriated, tipsy, tight (Ana) fuddled, befuddled, confused, muddled (see confuse): maudlin, *sentimental (Con) *sober, temperate intractable *unruly, ungovernable, refractory, recalcitrant, willful, headstrong (Ana) obstreperous, boisterous (see vociferous): contumacious, rebellious, factious, *insubordinate: froward, perverse, *contrary, wayward, balky (Ant) tractable—Con *obedient, docile, biddable, amenable: *tame, submissive, subdued: *compliant, acquiescent intrepid *brave, courageous, unafraid, fearless, valiant, valorous, dauntless, undaunted, doughty, bold, audacious (Ana) daring, venturesome, *adventurous, daredevil: mettlesome, high-spirited, *spirited, fiery: plucky, gritty (see corresponding nouns at fortitude) (Con) timorous, *timid: *fearful, apprehensive, afraid intricate complicated, involved, *complex, knotty (Ana) perplexing, puzzling, mystifying, bewildering (see puzzle vb): tortuous (see winding): difficult, *hard, arduous (Con) *easy, simple, light, smooth, facile, effortless: obvious, plain, clear, patent, *evident, manifest intrigue n 1 conspiracy, machination, *plot, cabal (Ana) scheme, design, *plan: stratagem, maneuver, ruse, artifice, *trick, feint, gambit, ploy 2 liaison, affair, *amour intriguing *interesting, engrossing, absorbing (Ana) provoking or provocative, piquing, exciting (see corresponding verbs at provoke): mystifying, puzzling (see puzzle): luring, tempting, enticing, inveigling (see lure) intrinsic *inherent, ingrained, constitutional, essential (Ana) *inner, inward, internal, interior, inside, intestinal: *innate, inborn, inbred, congenital: natural, normal, typical, *regular extrinsic *outer, outward, external, outside, exterior: adventitious, *accidental, incidental: added, annexed, appended, superadded (see add): extraneous, alien, foreign (see extrinsic) introduce 1 *enter, admit (Ana) induct, install, inaugurate (see initiate): instill, inculcate, *implant: *infuse, inoculate, imbue 2 Introduce, insert, insinuate, interpolate, intercalate, interpose, interject mean to put something or someone in a place among or between other things or persons. Introduce (see also ENTER 2) implies a bringing forward of someone or something not already in company with the other persons or things, but it also suggests as the aim of such an act the placing of the person or thing in the midst of that group or collection so as to form a part of it (introduce a new subject into the conversation) (introduce several amendments into a bill before the legislature) (domestic science was introduced into the high school curriculum—Current Biology) (insert) implies a setting of a thing in a fixed place between or among other things; thus, to insert lace in a garment is to put it between two pieces of the material which forms the garment; to insert leaves in a book is to put leaves into their proper places (as by the use of glue) (insert additional words in a statement) (nowhere else, surely, can there be such a compulsion to make plays out of books, musicals out of plays ... to insert scenes, delete characters—Kronenberger) (Insinuate (see also SUGGEST) implies a slow, careful, often gentle or artful introduction (as into or through a narrow or winding passage) by pushing or worming its or one's way (the dog liked to insinuate his nose into his master's closed hand) (slang ... has to insinuate itself into the language: it cannot pressure or push its way in—Sat. Review) (trees which insinuate their roots into the fissures of nearby rocks) (slowly but surely they insinuated themselves through the crowd to the edge of the pavement) (he couldn't quite insinuate the Huntingtons into American society, but he did pretty well for them in England—Behrman) (Interpolate) implies the insertion of something that does not belong to and requires to be distinguished from the original, whether because it is extraneous to the subject under discussion or because it is spurious or simply because it is in fact not part of the original (although here and there, I omit some passages, and shorten others and disguise names, I have interpolated nothing—Le Fanu) (he has interpolated editorial and critical comments of his own—Redman) (Intercalate) primarily implies an insertion in the calendar (as of a day or month) (since the calendar year contained only 355 days, an extra month was occasionally intercalated—R. H. Baker) but in its extended sense it implies insertion into a sequence or series, then often also connoting intrusion (lava beds intercalated between sedimentary layers of rock) (some of these discrepancies ... are obviously due to the fact that Chaucer is intercalating stories previously written—H. S. Bennett) (Interpose) (see also INTERPOSE 2) differs from interpose mainly in its implication that what is inserted serves as an obstacle, obstruction, or cause of delay or postponement (she actually interposed her body between him and the street door then, as though physically to prevent him from going—Ferber) (the early Church fought against the tendency to interpose objects of worship between God and man—Inge) (Professor Murray has simply interposed between Euripides and ourselves a barrier more impenetrable than the Greek language—T. S. Eliot) (All of these words, interject carries the strongest implication of abrupt or forced introduction (he remained silent for the most part but occasionally interjected a question) (as they chewed on bones and roots, they paused to interject grunts of encouragement for the narrator—Mott) The word is often employed in place of said in introducing a remark, statement, or ques-
introduction, prologue, prelude, preface, foreword, exordium, preamble are comparable when denoting something that serves as a preliminary or as an antecedent to an extended treatment, development, discussion, or presentation (as in an exposition, a dramatic or musical work, or a poem). In their extended senses many of these terms are interchangeable, but in the special or technical senses in which they are here chiefly considered they tend to be mutually exclusive. **Introduction**, the ordinary term of this group, and the comprehensive one, specifically applies to that part of a work (as a discourse, treatise, play, or musical composition) which precedes the reader or auditor for the body of the work, especially by giving him material necessary for his understanding of what follows. He always writes the body of his treatise first and then adds the introduction and conclusion. **Prologue** applies specifically to the initial and distinct part of a poetic or dramatic work which may serve the purposes of an introduction (as by describing the characters or expounding the situations in which they find themselves) **Chaucer's Prologue to the Canterbury Tales** or which may be a discourse preceding the opening of a play, by a character of the play or by an actor who serves as a mouthpiece for the author, and giving a hint of the author's purposes or methods or attempting to attract the auditors' attention to or interest in the play to come (the Prologue to Shakespeare's Troilus and Cressida and to each act of his King Henry V). In his prologue, which contains some of the finest poetry-in-prose writing of our day, Dr. MacIver explores the meaning of time—Donald MacIver—In its extended use, therefore, the prologue often suggests an action or an event that sets the stage or paves the way for a series of exploits, achievements, or significant events (this as a prologue to her own later dazzling history—Hugh Walpole). **Prelude** applies in its general sense to something (as a series of events, actions, or natural phenomena) which constitute figuratively a short play or performance and serve as a sign or indication of or a preparation for what is to follow (functional changes in glands often serve as a prelude to structural changes). This was the prologue to a stormy afternoon—H. G. Wells). As a technical term in music prelude applies sometimes to an opening voluntary in a religious service but more often, and more specifically, to an introductory piece forming a section or a movement, especially of a fugue or a suite but sometimes of an oratorio or of an opera, and serving usually to introduce the theme or chief subject of the work. In this sense prelude applies sometimes to musical, or occasionally other, works which have something of the character of an introductory section or movement but are so constructed that they have intrinsic and independent value (Wordsworth's poem "The Prelude"). In ecclesiastical use preface applies to the prayer of exhortation to thanksgiving and of divine praise which opens the important part of a solemn Eucharistic service where the consecration of the bread and wine occurs. In its more common general sense preface applies specifically to a short discourse which is distinct from the literary work (as a treatise, a novel, a poem or collection of poems) which follows, is written usually by the author but sometimes by an editor or a friend, and has for its main purpose either to put the reader into the right frame of mind for the understanding or appreciation of the work he is about to read or to supply him with information that may be necessary to his proper understanding or use of it. When, however, a work is preceded by both a preface and an introduction, preface is usually applied to the introductory discourse written, and often also signed, by the author or editor, and introduction to the one which is definitely informative rather than personal in its character and usually carries no signature. In extended use preface may apply to something which serves as an introduction or prelude (as an introductory work on or a more or less tentative treatment of a subject) Walter Lippmann's book entitled A Preface to Morals or to an act or speech, or series of acts or speeches, which has no other purpose than to prepare the way for what is to follow (they walked in the rose garden. "Do you read Utopias?" said Mr. Direck, cutting any preface, in the English manner—H. G. Wells) we fight for lost causes because we know that our defeat and dismay may be the preface to our successor's victory—T. S. Eliot. **Foreword** when used in place of preface in reference to front matter of a book may suggest simplicity and brevity of treatment and more often than not applies to material prepared by someone other than the author. **Exordium**, a technical term of rhetoric, applies to a formal beginning, especially of an oration but sometimes of a written exposition or argument, in which the speaker or writer makes an approach to his subject by remarks intended to awaken the interest of his auditors or readers and to pave the way for their understanding of what he is to say or for their acceptance of his conclusions. **Preamble** applies to a formal introduction, often only an introductory paragraph (as in a statute, a constitution, a treaty, a deed, or a set of resolutions) which states the grounds, purposes, or guiding principles of what follows. It is sometimes used as a designation of a long monotonous preface. **Introductory** adj. *preliminary, preparatory, prefatory*. *Ant closing, concluding*. **Intrude**, obtrude, interlope, butt in are comparable when meaning to thrust oneself or something in without invitation or authorization. Intrude both transitively and intransitively carries a strong implication of forcing someone or something in without leave, without right, or against the will of others; it often connotes rudeness, officiousness, or invasion of another's property, time, or personal privacy (this court always had disavowed the right to intrude its judgment upon questions of policy or morals—Justice Holmes). **Sayer** I stood there, feeling very abashed at intruding on all these busy people—Mannix. **Obtrude** in this relation retains much of its basic notion of pushing or extending something into view; it may imply nothing beyond this fact (I intended plain prose, but a rhyme obtruded itself and I became poetical—Cowper) or it may suggest the impropriety and objectionableness of the act or the disagreeableness of the offense (the first sin against style as against good manners is to obtrude one's personality—Quiller-Couch). **Interloper** implies an interposition of oneself in a place or position which has an injurious effect on one or both of the persons or things concerned (he regarded her new acquaintance as an interloping ruffian who don't know the rules of the game—Time). **Buff** in implies an abrupt or offensive intrusion suggestive of the manner in which a horned animal attacks its enemy; in this sense the term usually suggests absence of ceremony, a sense of propriety, or decent restraint (it's a thankless job to butt in and tell a man that in your important opinion his wife is a vampire bat—Sinclair Lewis).

Create stresses a causing of something to exist; it not only implies previous nonexistence but it often suggests an evoking of something into being out of, or as if out of, nothing (as by fiat, by an act of the will, or by inspiration) (God created the heaven and the earth—Gen 1:1) (the law creates rights) (the king created an earldom for his favorite) (to this strange force within him, to this power that created his works of art, there was nothing to do but submit—Huxley) (I do not believe that a sense of justice is innate, but I have been astonished to see how quickly it can be created—Russell) (modern science, which created this dilemma, is also capable of solving it—Bliven b. 1889) Discover (see also DISCOVER 2: REVEAL) presupposes both the existence of and a lack of knowledge about something; the term therefore implies the finding of such a thing, often as the result of mental or physical effort (as by exploration, investigation, or experiment) (remains of this Belgic culture have often been discovered—Jacquetta & Christopher Hawkes) (men who were fighting Communism long before McCarthy ever discovered it—Davis) (William Harvey discovered the circulation of the blood) Thus, in discriminative use one invents processes or ways of doing something, as well as instruments, tools, implements, or machines, but one discovers things which exist but have not yet been known (as lands, stars, or natural laws) (Newton invented the differential and the integral calculus ... and discovered the laws of motion—Darow)

invertebrate, confirmed, chronic, deep-seated, deep-rooted

are comparable when meaning so firmly established or settled that change is almost impossible. Invertebrate applies especially to something which has persisted so long and so obstinately that it has become a fixed habit or an almost inalterable custom or tradition (the growing infirmities of age manifest themselves in nothing more strongly than in an invertebrate dislike of interruption—Lamb) (supported by precedent so invertebrate that the chance of abandonment is small—Cardozo) When applied to a person, the term implies the formation of a seemingly ineradicable habit, attitude, or way of acting or behaving (an invertebrate smoker) (an invertebrate and formidable foe—Peacock) Confirmed applies chiefly to something which has grown stronger or firmer with time until it resists all attack or assault or attempts to uproot it (a confirmed belief in God) (a confirmed hatred of a person) not so easy to say that a confirmed anti-American mood has settled on the British people—Barbara Ward) Like invertebrate, it may also apply to a person who is such as he is described in the noun by the strengthening or crystallization of a taste, a vice or virtue, or an attitude (a confirmed bachelor
inviolable
—H. O. Taylor— Something material (as a fortress) or intangible (as virtue) is impregnable when it is strong enough or sufficiently guarded to repel all attacks or assaults. There is no such thing as impregnable defense against powerful aggressors who sneak up in the dark and strike without warning—Roosevelt. Cato was a fanatic, impregnable to argument, and not to be influenced by temptation—Froude. There was always a traitor in the cabinet; and after he (or generally she) had surrendered the keys, what was the use of pretending that it was impregnable?—Wharton. A thing is inexpugnable or unassailable either because it is impregnable or because it offers no point at which it can be attacked or no occasion or reason (as a weakness or a defect) for attacking or impugning. Castles were often built at the tops of craggy mountains in the hope that they might be inexpugnable. That we are conscious, sentient, evaluating and thinking creatures . . . is an inexpugnable fact of existence—Nagel. Nothing but an unassailable alibi would save them—Stong. An argument so logical and convincing that it is unassailable. A person or thing is invulnerable that cannot be wounded or penetrated by a destructive weapon or piercing instrument. They had lived through the Nazi plague and, having survived, were henceforth invulnerable to its poison—Dean. Ironclad warships were once believed to be invulnerable. How was one to pierce such hidebound complacency? It was invulnerable except to the Grace of God—Mackenzie. Ana dauntless, undaunted, intrepid (see BRAVE). Con conquerable, vanquishable, surmountable, subduable (see corresponding verbs at CONQUER).

inviolable
inviolable, *sacred, sacrosanct
Ana hallowed, consecrated, dedicated (see DEVOTE): *holy, sacred, blessed, divine, religious: pure, *chaste.

inviolate
sacrosanct, *sacred, inviolable
Ana violated—Con profaned, desecrated (see corresponding nouns at PROFANATION): polluted, defiled (see CONTAMINATE).

invite, bid, solicit, court, woo are comparable when they mean to request or encourage a person or a thing to come to one or to fall in with one's plans or desires. Invite in its ordinary and usual sense implies a courteous request to go somewhere, do something, or give some assistance which it is assumed will be agreeable or at least not disagreeable to the person invited. Invite an acquaintance to spend the night. Invite an audience to express their opinions. He had invited all the girls, including Miss Tolman, to go out with him on various occasions, but . . . everyone declined his offer—Woodfin. In this sense the word usually implies providing an opening for those who otherwise might hesitate to go, or do, or give without such a request. Consequently, in its extended sense invite implies providing an opening by such means as a seductive manner or a challenging statement or policy that serves as an encouragement or temptation to another. Dress so conspicuously as to invite unwelcome attentions. Fairly imminent collisions invited by the Captain's inept conning—Heggen. The writer who brings a new revelation is not necessarily called upon to invite the execution of the herd—Ellis. Bid (see also COMMAND vb) is increasingly uncommon in the sense of to request the presence of (as at a feast or great occasion) as many as ye shall find, bid to the marriage—Mt 22:9 (usually with for), from its sense to offer a price for something up for sale, has developed an extended use in which it means to make an effort to win or attract or an appeal (as for sympathy) and in this use sometimes comes close to invite in conveying the notion of offering a tempting opening for something (in his difficult position he could not bid for their affection; he wanted only their obedience—Douglas). Stood for Congress in this virgin district, bidding for the support of labor—Green Peyton. Solicit (see also ASK 2) differs from invite in stressing urgency or need rather than courtesy in requesting or encouraging. We may come to feel a little impatient at having our pet so continually solicited—Edmund Wilson. Moral utterances which solicit the obedience of children—Melden. Court basically implies an endeavor to win the favor of a person (as by flattery, attentions, or making love) Only in its extended sense does it imply a providing of a favorable opportunity by tempting or encouraging something to come to one or to happen to one (he kept himself somewhat aloof, seeming to avoid notice rather than to court it—Arnold). So long as a scientific textbook is obsolete in a decade or less, to poetize science is to court mortality—Lowes. Woo basically implies amorous courting; consequently, in its extended sense it frequently stresses a drawing to or upon one by allurements, blandishments, and extravagant promises. Herodotus in search of a public . . . found a favorable "pitch," as we should say, and wooed an audience to him—Quiller-Couch. The young author trying to woo his reader, via heavy humor—Keene. Occasionally the word is very close to court and scarcely distinguishable from it. You . . . woo your own destruction—Shak.

involve 1 *entangle, enmesh

3 Involve, Implicate mean to bring a person or thing into circumstances or a situation from which he or it is not easily freed. Involve (see also INCLUDE) need not impute disgrace to the circumstances or situation but it usually implies complication or entangling and often suggests extreme embarrassment (the war may not end until every nation in Europe is involved in it). The case of a judge involved by the exigencies of his office in a strong conflict between public duty and private interest or affection—Colvin. Had been involved in some affair that made it uncomfortable for him to return to live in that city—Anderson. The controversies . . . moved on in all their ugliness to involve others—J. M. Brown. Implicate usually implies a disgraceful connection or one that casts a reflection on a person's reputation; it may even imply definite proof of association with a crime (the detectives discovered that an uncle of the child was implicated in its kidnapping). They were unable to implicate any of the suspected political leaders in the conspiracy to defraud the city (all men, even the most virtuous and wise, are implicated in historic evil—Niebuhr.

Ana ensnare, entrap, snare, trap (see CATCH): connect, link, associate, relate (see JOIN): *embarrass: fetter, shackles, *hamper.

involved intricate, complicated, knotty, *complex
Ana confused, muddled (see CONFUSE): perplexing, puzzling, bewildering, mystifying (see PUZZLE): difficult, *hard, arduous.

Con simple, *easy, facile.

invulnerable impregnable, inexpugnable, unassailable.
irritable, choleric, splenetic, testy, touchy, cranky, cross

mean easily angered or enraged. Irritable implies the possession of a fiery or inflammable temperament or a tendency to flare up at the slightest provocation. (the irritable but kindhearted deity who indulges in copious curses to ease his feelings—Cohen) (a peppy and irritable old gentleman—Shak.) (a testy and choleric gentleman easily wrought into passion—Cooper) Splenetic implies a similar temperament, but one especially given to moroseness and fits of bad temper which exhibit themselves in angry, sullen, or intensely peevish moods, words, or acts (that splenetic temper, which seems to grudge brightness to the flames of hell—Landor) (he was not splenetic: nay, he proved in the offending volume he could be civil, courteous, chivalrous—Meredith) Testy implies irritability occasioned by small annoyances (the testy major was in a frame to find no hunter standing waiting—Masefield) (he raged . . . he was ever more autocratic, more testy—Sinclair Lewis) Touchy suggests readiness to take offense; it often connotes undue irritability or oversensitiveness. (I am not touchy under criticism—Stevenson) (touchy about their own sacred symbols and alert to interpret any slight as an insult—Blanshard) Cranky and cross often mean little more than irritable and difficult to please. But cranky may carry an implication of the possession of set notions, fixed ideas, or unfounded standards which predispose one to anger or a show of temper when others (as in their speech, conduct, requests, or work) do not conform to the standards (a cranky critic) (a cranky employer) (a cranky teacher) (old age seemed to settle on me; I grew nervous, cranky and thin, I quarreled with the travelers—Rosenfeld) Cross, on the other hand, may imply a being out of sorts that results in irritability or irritability only but for the duration of one's mood (sometimes, when I am cross and cannot sleep, I engage in angry contests with the opinions I object to—L. P. Smith) (the attempts to persuade the Intelligent Woman that she is having a glorious treat when she is in fact being . . . bored and tired out and sent home cross and miserable—Shaw) (a irritable, fractious, snappish, waspish, huffy, querulous, petulant, peevish: *impatient, restive, jumpy, jittery, nervous: crabbed, surly (see Sullen) Con good-natured, *amiable, complaisant, obliging: *calm, placid, serene, tranquil

irate *angry, wrathful, wroth, mad, indignant, acrimonious

Provoked, exasperated, nettled, irritated (see irritate); incensed, infuriated, enraged (see anger vb) Con *forbearing, tolerant, clement, lenient, indulgent, merciful

ire rage, fury, *anger, indignation, wrath

passion: temper, humor, *mood

ireric *peculiar, peaceful, peaceful, pacifist, pacificist

conciliating or conciliatory, placating or placatory, propitiating or proprietary (see corresponding verbs at

... and the reserve, passivity, and isolation which myopia enforced, seemed to him absolutely irrational—Ellis] <though normal and very intelligent in most respects Mrs. Lincoln was irrational on one subject: she could not think straight in matters that pertained to money—R. P. Randall> Unreasonable implies guidance or control by some force (as self-will, passion, ambition, greed, or stubbornness) which makes one deficient in judgment or good sense. As applied to one's acts or utterances, it suggests lack of justification by reason; the term therefore comes close to inequitable, immoderate, excessive, unfair, or extravagant (you will not be so unreasonable as to send your child out in this storm) (his demands are unreasonable) (obstinate and unreasonable pertinacity) (an unreasonable price for beef) (the earnings ... were found materially in excess of a fair return, and the general level of their rates was found unjust and unreasonable—J. C. Nelson) (it is a little unreasonable to find fault with his maxims because they do not apply to all times and places—A. M. Young>

**Ana** absurd, preposterous, *foolish, silly*; fatuous, asinine, *simple; crazy, demented, mad, insane*  
**Ant** rational —Con reasonable (see RATIONAL): *wise, judicious, sage, sapient, prudent, sane, sensible*: "logical

irregular, anomalous, unnatural mean outside the sphere of what conforms to or is explainable by law, rule, custom, or principle. **Irregular** implies failure to conform to a rule, a law, or a pattern, especially to one imposed for the sake of uniformity in method, practice, or conduct; thus, an irregular marriage is one that does not conform to the regulations of church or state; an irregular verse does not conclude with the practice of civilized nations or conventional military theory; **irregular** conduct may or may not be morally reprehensible, but it defies the code or standard of the community or class (there are always irregular fluctuations of the seasonal weather—Ellis) (made a strong appeal for the highest standards of medical education in an effort to combat irregular practitioners—Vioet) (the chicanery was gross, the forgery patent, the procedure irregular and illegal—Woodward) Anomalous stresses lack of conformity to what might be expected of a thing because of the class or type to which it belongs, the laws which govern its existence, or the environment in which it is found (all seven of us ... appeared on the show under pseudonyms. Which may sound highly anomalous, considering that we're the children of vaudevilians, a sect not usually antipathetic to publicity—Salinger) Sometimes it specifically implies inconsistency or a conflict of principles (<acts so anomalous, in such startling contradiction to all our usual ways and accepted notions of life and its value—L. P. Smith>) and sometimes it specifically means unclassifiable or indefinable (<anomalous literary works such as Holmes's Autocrat of the Breakfast Table> <anomalous emotions>) Again, it suggests the absence of the character or of the characteristics essential to a thing of its kind (a few judges find in her last book new support for the anomalous opinion that its author was a great artist, but insignificant—Beck) or it suggests a contradiction between the professed aims or intentions of a person or institution and the conditions in which that person or institution exists or finds himself or itself at a given time (the anomalous position of the free Negro in the slave states—E. T. Price) (President Wilson found himself in an anomalous position when Congress rejected his proposal that the United States enter the League of Nations> Unnatural is the strongest of these words in its implication of censure, especially when it implies a violation of natural law or of principles accepted by all civilized men as based on reason and essential to the well-being of society. In such cases it often specifically connotes moral perversion (<an unnatural practice>) (she had been vicious and unnatural; she had thriven on hatred—S. S. Van Dine) or abnormal indifference or cruelty (<an unnatural parent> Sometimes the word merely means contrary to what is received as natural, either because it is not in accordance with the normal course of nature (<snow in May is unnatural in this region>) or because it is not in keeping with what one regards as normal, balanced, proper, or fitting under the circumstances (<an unnatural appetite for acid foods>) (a poetic language which appears natural to one age will appear unnatural or artificial to another—Day Lewis) (thy deed, inhuman and unnatural provokes this deluge most unnatural— Shak.) (a daughter who left her father was an unnatural daughter; her womanhood was suspect—Woolf) **Ana** aberrant, *abnormal, atypical*: *exceptional: singular, unique, *strange, peculiar, odd, queer

**Ant** regular —**Con** natural, normal, typical (see regular): *usual, customary, wonted, accustomed, habitual*; licit, legitimate, legal, *lawful

irreligious, unreligious, nonreligious, ungodly, godless mean not religious or not devoted to the ends of religion. Irreligious is not only the most common of the negative forms of religious but the most clearly defined in meaning, for it implies not merely lack of religion but hostility to religion or courses in opposition to it or in violation of its precepts (that non-churchgoers are not necessarily irreligious—Streit) It may even suggest impurity, immorality, or blasphemy (it is unworthy a religious man to view an irreligious one either with alarm or aversion—Carlyle) (they are so irreligious that they exploit popular religion for professional purposes without delicacy or scruple—Shaw) Unreligious, a somewhat uncommon term, implies nothing more than lack of religion; it therefore applies aptly to men, their utterances, or their works and suggests merely the absence of religion or of religious training or religious ideas (the popular poetry ... became unreligious . . . in some parts irreligious—Milman)   

**Nonreligious** applies not so much to persons as to institutions, activities, projects, and themes for art that are outside the sphere or province of religion or not under the control of a religious body; it therefore comes close in meaning to secular (see under PROFANE) <nonreligious education> <nonreligious charitable societies> <made it hard for them to trust a nonreligious institution, such as the State University—Amer. Guide Series: Ind>) Ungodly often comes close to irreligious, but it carries a stronger suggestion of disobedience to or defiance of divine law (blessed is the man that walketh not in the counsel of the ungodly—Ps 1:1) (they decided to leave so ungodly a land—Usher) Godless commonly implies atheism or agnosticism and often definitely implies rejection of religion (<godless philosophers> <godless teachings>) (<here were decent godless people: their only monument the asphalt road—T. S. Eliot>) (fercely predicting the end of Lorenzo and all his godless court—Moorehead)

**Ana** impious, profane, blasphemous, sacrilegious: *im-moral, amoral, unmoral

**Ant** religious —**Con** pious, *devout

irritable, fractious, frolicious, peevish, snappish, wapish, petulant, pettish, huffy, fretful, querulous apply to persons or to their moods or dispositions in the sense of showing impatience or anger without due or sufficient cause. Irritable implies extreme excitability of temperament, often associated with or arising from fatigue or physical or mental
irritate, to make one exceedingly easy to annoy or difficult to please. Mental work brings on an irritable and nervous disgust—Arnold. A hot day and the clerk in the store was irritable... had not slept much the night before and he had a headache—Saxon. Fractious carries a stronger implication of willfulness or of unreasonableness than irritable, and although it also implies extreme excitability, it suggests even greater loss of self-control; the term is often applied to animals as well as to persons. Those who are spoilt and fractious, who must have everything their own way—Swinnerton. She was fractious in the saddling paddock and slow leaving the starting gate—Audax Minor. Peevish implies childish irritability and a tendency to give expression to petty complaints or ill-humored trivial criticisms. Peevish because he called her and she did not come, and he threw his bowl of tea on the ground like a willful child—Buck. I have heard some London wits, rather peevish at Macaulay's superiority, complain that he occupied too much of the talk—Thackeray. Snappish implies irritability or sometimes peevishness that manifests itself in sharp, cutting questions, comments, or objections that discourage conversation or sociability. Snappish is not easily ruffled, snappily is the more common oblique of bickering and snappish comment—Bester. Waspish stresses testiness rather than irritability, but it implies a readiness to sting or hurt others without warrant or without sufficient warrant. Beware of his waspish temper—her comments may be amusing but they are always waspish—a little waspish woman who... snapped out at a man who seemed to be with her—C. S. Lewis. Petulant usually suggests the sulkiness of a spoiled child as well as peevishness and capricious irritation. As he had no means of confuting his nephew, all he could do... was to utter petulant remarks on his powerlessness to appear at the dinner table that day—Meredith. In his youth the spoiled child of Boston, in middle life he was petulant and irritable, inclined to sulk when his will was crossed—Parrington. Pettish implies sulky or childish ill humor (as of one who is slighted or offended) said many careless, many foolish, many merely petty things—Fadiman. Stephen's resistance was but the pettish outbreak of a ruined man—J. R. Green. Huffy also implies a tendency to take offense without due cause, but it suggests more of a display of injured pride than pettish when he is reproved, he is huffy for the rest of the day—W. J. Locke. I hear no grudge at all against you. I am not huffy and crabbit—Gregory. Fretful implies irritability and restlessness that may manifest itself in complaints or in a complaining tone of voice. A fretful child but often is merely suggested by a lack of ease and repose—several villages were isolated by the storm—find an isolated spot in which to live. Her intensity, which would exasperate him sharply—Huxley. The air, breathed many times and spent, was fretful with a whispering discontent—Milly. Weary days of fretful argument—Charles & Mary Beard. Querulous implies an often habitual discontent that manifests itself in whining complaints or in fretfulness of temper; it often also suggests petulance. The man himself grew old and querulous and hysterical with failure and repeated disappointment and chronic poverty—Hughes. Ana cranky, cross, testy, touchy, choleric, splenetic, irascible. Ant easygoing—Con amiable, good-natured, complaisant, obliging; genial, sociable, affable, cordial, graceful; from momentary impatience to an outburst of rage the chattering crowd, with their rude jokes... irritated him sharply—Andersen. Her intensity, which would leave no emotion on a normal plane, irritated the youth into a frenzy—D. H. Lawrence. Something which exasperates arouses bitter or intense irritation. The word, however, sometimes expresses nothing more than keen vexation or annoyance an opportunity to... aggravate his poor patient wife, and exasperate his children, and make himself generally obnoxious—Simeon Ford. Though she could exasperate she could never offend—H. G. Wells. Something which nettles irritates sharply but momentarily and stings or piques more than angers a touch of light scorn in her voice nettled me—W. J. Locke. Something which provokes awakens strong annoyance or vexation and often incites to action a Tory resident who provoked local animosities and was charged with high treason—Amer. Guide Series: Conn. Though they were definitely provoked to extremity before they did this deed—Ingamells. He is provoked with me for not talking more—Burney. Something which aggravates (see also intensify) arouses displeasure, irritation, or anger often through prolonged or repeated action nothing so aggravates an earnest person as a passive resistance—Melville. It is aggravating to have you talking about so small a business—Shaw. Something which riles disturbs one's serenity or peace and agitates as well as angers with raucous taunting and ribald remarks to rile up the proprietor—White. Something which peeves excites often petty or querulous fretfulness or a tendency to be easily irritated... a restless night—when she ventured to criticize it, even mildly, he was peeved—Auchincloss. Ana *annoy, vex, irk, bother: incense, anger, madden, enrage, infuriate: offend, affront: fret, chafe (see abrade) Con appease, mollify, conciliate, propitiate, placate, pacify: gratify, please, gladden, delight isolate, segregate, seclude, insulate, sequester are comparable when they mean to separate from the usual or natural environment, but they are rarely interchangeable because their other and differentiating implications are often stressed. Isolate implies a detachment of someone or something from his or its usual environment so that he or it will not affect or be affected by others. The word is sufficiently general that it may be employed in reference either to an actual separation or to a separation that is merely virtual, arbitrary, or speculative. Several villages were isolated by the storm—find an isolated spot in which to live. Under present conditions no country can remain isolated—he was singularly isolated, untouched by the interest or the gossip or the knowledge of the life about him—Deland. We must remember that religion, like some chemical substance, is never found pure, and it is not at all easy to isolate it in order to learn its properties—Inge. Segregate also applies to both persons and things and usually refers to them as a group separated from the mass or main body; its secondary implication is often, therefore, a collection in one place, one class, one mass and it may in addition imply a holding incommunicado. Segregate is less decided than the rest of the population segregate hardened criminals from first offenders in prisons. That innate instinct which ever aimed at uniting, not segregating groups of Christians—D. P. Hughes. Seclude implies a removal or withdrawal from external influences; it is therefore often used reflexively or at least in such a way as to imply acceptance of the protection afforded by such removal or withdrawal seclude in their childhood from all evil influences—so she sat hard and close at her writing
isolation

470

An asterisk (*) indicates place of treatment of each group. A colon (:) separates groups of words discriminated.
Brook invents fresh and interesting groupings—Knight> <Winchester rather than London was regarded as the official capital of the peripatetic monarchy—Trevelyan> <our peripatetic Scot has apparently ended his fictional travels and is now shorebound—Barkham> Ambulatory and ambulant both basically imply a relation to walking and may be close synonyms of pedestrian (ambulatory exercise) <an ambulant traveler> but more often they stress, as pedestrian does not, ability to walk or capability of walking as distinguished from the fact or practice of walking (ambulatory patients treated at the clinic) <he seemed an ambulant variety of cactus standing strangely in our way—Samples> When applied to things, ambulatory and ambulant imply lack of fixity especially in physical station (an ambulant radio station) <small ambulatory businesses> or occasionally (as in legal usage) in immaterial qualities; thus, the provisions of a will are ambulatory so long as the testator is alive and legally competent to alter them. Nomadic is applicable to individuals <he merely walked off and set out upon a nomadic career, finding work where he could—Lindner> but is more often used to designate groups or tribes of men who have no fixed place of residence but wander, according to season or food supply or the needs of their means of livelihood, from one place or region to another <the Bedouins are a nomadic tribe found in the deserts of Arabia, Syria, and North Africa> <a system that compels a large segment of labor to be nomadic, trailing endlessly from end to end of the country—G. W. Johnson> Vagrant (see also vagrant n under VAGABOND) as applied to human beings stresses lack of a fixed place of residence but unlike nomadic is applicable typically to individuals rather than to groups; in this use it commonly lacks the pejorative quality of the corresponding noun (the humility with which this vagrant and utterly original genius turned to them for wisdom—Sinclair Lewis) <I must go down to the seas again, to the vagrant gypsy life—Masefield> But in its more common application to things vagrant usually stresses the slight, fleeting, ephemeral quality of what is vaguely wandering rather than either firmly fixed or following a fixed course <to catch vagrant currents of air, door and window flaps were propped open—Heiser> <nature itself in its vagrant moods and infinite variety—Schlesinger d. 1965> <her mind, called vagrant, is like a butterfly, seemingly fragile and even awkward in erratic flight—Beck> <tasks too vagrant or too taxing ever to have been accomplished—Hilton> <the great increase in numbers of vagrant boys during the depression> An> wandering, roving, rambling, straying, roaming, ranging (see WANDER): moving, shifting (see MOVE vb)
snatching, locking, or breaking suddenly) <the hounds were fine beasts . . . lank and swift as they bent over the food to snap it into their jaws and swallow it quickly—Roberts> or a taking of possession with avidity <the syndicate snapping up land as soon as it is for sale> or sometimes specifically an uttering with the brisk sharpness of a bite <snapped at her because Theophilus did not eat enough—Dundal> Twitch may imply quick, sometimes spasmodic, and often light action combining tugging and jerking <shrunken body continued to jerk and quiver, tongues twitching at his gray beard—Gerald Beaumont> <one Pan ready to twitch the nymph's last garment off—Brown> <put out his hand to twitch off a twig as he passed—Cather> Yank implies a quick and heavy tugging and pulling <watches two-year-old stand passive while another child yanks his toy out of his hand—Mead> <she yanked the corset strings viciously—Chidsey> <by means of long blocks and tackle they set to yanking out logs—S. E. White> 

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
of attachment; it is therefore the more precise word when one wishes to preserve the basic implications of connect and yet to avoid its common connotations of a weak or severable attachment; thus, to link a person with a crime is, by implication, to have ample evidence of his involve-
ment with it (Augustus set himself to revive the state religion... as part of his policy of linking up past and present, and as an instrument in securing the restoration of the old morality—Buchan) none of the subjects that linked us together could be talked about in a bar—Nevil Shute (mobilize civilian science and link it effectively with the war effort—Baxter) Associate primarily implies a joining with another usually in an amiable relationship and on terms of equality (a group of men associated in business) when bad men combine, good men must associate—Burke (my father's conviction that they were too lowly to associate with me, when it was so clear that I was too poor to associate with them, may have had some sort of imaginary validity for him; but for me it was snobbish nonsense—Shaw) In its extended use as re-
ferred to things, the implication of companionship on equal terms gives way to the implication of a connection in logic or in thought which comes naturally or involun-
tarily to the mind of the observer either because the things traditionally go together, or naturally or rightfully belong together, or for some reason have come to be linked together in one's thoughts (for the artist life is always a discipline, and no discipline can be without pain. That is so even of dancing, which of all the arts is most asso-
ciated in the popular mind with pleasure—Ellis) (sur-
realism has been associated with psychological and intel-
lectual atmosphere common to periods of war—
Bernard Smith) (a fir tree is not a flower, and yet it is
associated in my mind with primroses—Jefferies) Relate implies a connection, or an attempt to show a connection, between two or more persons or things. In reference to persons it implies a connection through a common ancestor or through marriage (John and James are remotely related to each other) In reference to things or to persons objectively regarded, it implies that each has some bearing on the other and often indicates the existence of a real or presumed logical connection (related his misfortunes to events which preceded them) (the two circumstances are not related) (their ability to relate what they observe to what they know or have previously observed—Hil-
dreth)

Ana conjoin, *unite, combine, cooperate, concure: articu-
late, concatenate, *integrate: attach, affix, *fasten: knit, *
weave: *tie, bind
Ant disjoin: part —Con *separate, sever, sunder: *de-
tach, disengage: disentangle, untangle, disembarrass (see EXTRICATE)

Joint, articulation, suture denote a place where two things are united or the mechanism by which they are united. Joint is the most inclusive of these terms and is freely usable in reference both to anatomical and mechanical structures. In anatomical reference it applies to a junction whether rigidly fixed or capable of more or less complex movements of two skeletal parts (as vertebrate bones or cartilages or molluscan shell valves) and is the one of these terms that is equally applicable to the bodily region or part at which there is such a junction (the knee joint) (the joint at the elbow is flexible) he aches in every joint) Similarly, in mechanical reference, joint applies to a junction between two parts that serves as a coupling and may be rigid (a dovetail joint at the corner of a drawer) (a joint in a gas pipe) (mortar joints between bricks carefully finished to shed water) or may form a flexible union (a swivel joint) (the ball joints... have a lateral as well as up-and-down action, thus cushioning against bumps—Ford Times) or even (as in a universal joint) one through which motion is transmitted from one part to the other. Articulation is chiefly an anatomical term, though it has some extended use (see under INTE-
GRATE). Anatomically articulation is applicable to the same parts of the skeleton as joint but distinctively it implies, as joint does not, the fitting together or adjustment of two parts or bones with relation not only to each other but to the entire structure and its function and is therefore not applicable, as joint is, to the bodily region or part where a joint occurs. It is especially appropriate when the mechanism of a joint or the elements entering into its formation are under consideration (ball-and-socket structure of a movable articulation) (various articulations are supported by ligaments) (the synovial membrane reduces friction at an articulation) The word may also denote the process of joining or the adjustment in joining (in the flat bones the articulations usually take place at the edges—Henry Gray) Suture is used of a joint or articulation that suggests a seam or that has been brought about by sewing (the joints of the two parts of a pea pod are called respectively the ventral and dorsal sutures) (the form of articulation observable in the skull where two flat bones meet in a line is called a suture) Suture is used in surgery of a seam, especially of one whereby two edges of an incision are brought together so that they may ultimately unite.

I joke, jest, jape, quip, witticism, wisecrack, crack, gag are comparable when they mean a remark, story, or action intended to evoke laughter. Joke, when applied to a story or remark, suggests something designed to promote good humor and is especially an anecdote with a humorous twist at the end; when applied to an action, it often signifies a practical joke, usually suggesting a fooling or deceiving of someone at his expense, generally though not neces-
sarily good humor in intent (everyone knows the old joke, that "black horses eat more than white horses," a puzzling condition which is finally cleared up by the statement that "there are more black horses"—Reilly) (issues had become a hopeless muddle and national politics a biennial joke—Wecter) (a child hiding mother's pocketbook as a joke) (the whole tale turns out to be a monstrous joke, a deception of matchless cruelty—Redman) Jest may connote raillery or ridicule but more generally suggests humor that is light and sportive (continually... make a jest of his ignorance—J. D. Beres-
ford) (won fame by jests at the foibles of his time, but... his pen was more playful than caustic—Williams & Pollard) Jape is identical with jest or joke (the merry japes of fundamentally irresponsible young men—Ed-
mund Fuller) (the japes about sex still strike me as being prurient rather than funny—McCarten) Quip suggests a quick, neatly turned, witty remark (full of wise saws and homely illustrations, the epigram, the quip, the jest—Cardozo) (many quips at the expense of individuals and their villages—Mead) (enlivened their reviews with quips—Dunham) Witticism, wisecrack, and crack all apply to a clever or witty, especially a biting or sarcastic, remark, generally serving as a retort (all the charming witticisms of English lecturers—Sevareid) (a vicious witticism at the expense of a political opponent) (merely stroll by, makes a goofy wisecrack or screwball suggestion—Hugh Humphrey) (though the gravity of the situation forbade their utterance, I was thinking of at least three priceless cracks I could make—Wodehouse) Gag, which in this relation basically signifies an interpolated joke or laugh-provoking piece of business, more generally applies to a remark, story, or piece of business considered
funny, especially one written into a theatrical, movie, radio, or television script. Sometimes the word has extended its meaning to signify a trick whether funny or not but usually one considered foolish <gags grown venerable in the service of the music halls—Times Lit. Sup.> <the gag was not meant to be entirely funny—Newsweek> <gave a party the other night and pulled a really constructed gag . . . had every guest in the place vaccinated against smallpox—Hollywood Reporter> <a frivolous person, given to gags and foolishness> **An**a *prank, caper, antic, monkeyshine, dido: *trick, ruse, wile: travesty, parody, burlesque, *caricature: raillery, *badinage, persiflage: jocoseness, jocularity, facetiousness, witlessness, humorousness (see corresponding adjectives at WITTY): *wit, humor, repartee, sarcasm

**Jollity** hilarity, glee, *mirth

**Ana** erriment, joviality, jocundity, blitheness (see corresponding adjectives at MERRY): sport, disport, play, frolic, rollick, gambol, romp (see under PLAY vb): diversion, amusement, recreation (see under AMUSE): *fun, jest, sport, game, play

**Con** gloom, dejection, depression, melancholy, *sadness: solemnity, gravity, seriousness, earnestness, steadiness, sedateness, somberness (see corresponding adjectives at SERIOUS)

**Jolly** adj jovial, jocund, *merry, blithe

**Ana** bantering, chaffing, jollying, joshing (see BANTER vb): jocular, jocose, *witty, humorous, facetious: sportive, *playful, mischievous, roguish, waggish, frolicsome: gay, *lively, vivacious, animated, sprightly

**Con** solemn, somber, grave, sedate, staid, *serious, earnest: lugubrious, doleful, dolorous, *melancholy, rueful: morose, gloomy, glum, *sullen, dour, saturnine

**jolly vb** *banter, chaff, kid, rag, rib, josh

**Ana** blandish, cajole (see COAX): deride, *ridicule, twit, rally, mock, taunt

**Jolt n** jar, shock, *impact, impingement, collision, clash, concussion, percussion

**Ana** shaking or shake, rocking or rock, convulsing or convulsion (see corresponding verbs at SHAKE)

**Josh vb** *banter, chaff, kid, rag, rib, jolly

**Jot n** tittle, iota, *particle, bit, mite, smidgen, wht, atom

**Journal, periodical, newspaper, magazine, review, organ** are comparable when denoting a publication which appears regularly at stated times. Basically, a **Journal** is a publication which is issued daily and gives an account of matters of interest occurring during the preceding twenty-four hours. Continued use, however, has made it an acceptable designation both of a publication that appears less often (as a weekly, a monthly, or a quarterly) (<the Hibbert Journal> appeared every three months and called itself a Journal—Mackenzie) and of one that is the official publication of some special group (<the Journal of the American Medical Association> **Periodical** applies to a publication appearing at regular intervals and especially to weeklies, biweeklies, monthlies, and quarterlies (<the periodicals are assembled in a special room of the library> **Newspaper** is the usual term for a sheet or group of sheets of which the main function is to provide the news of the day and which is usually issued daily; such a publication is called a **journal** only in formal speech or writing, although those whose profession is writing for newspapers are often termed **journalists** and although the language and style believed to be typical of the newspaper is commonly called **journalese. Magazine** applies chiefly to a periodical, often illustrated, that offers a miscellaneous collection of articles, fiction, poetry, descriptive sketches, and commentary. **Review** applies to a periodical that emphasizes critical writings or articles commenting on important events and significant questions of the day. **Organ** usually applies to a publication by an organization (as a political party, church, business, or institution) that gives news of interest to its members or adherents or presents its particular principles and views authoritatively (<Science is the official organ of the American Association for the Advancement of Science>)

**Journey, voyage, tour, trip, jaunt, excursion, cruise, expedition, pilgrimage** mean travel or a passage from one place to another. **Journey**, the most comprehensive term in general use, carries no particular implications of the distance, duration, destination, purpose, or mode of transportation involved (<plans a journey to California> <wished him a happy journey home> <the journey to Italy will not take more than two months> <a journey of twenty-five miles in Britain will often afford . . . much variety of scenery—Stamp> <the sound film took four years to make the journey from Hollywood to Rome—Jarrett> **Voyage** normally implies a journey of some length over water, especially a sea or ocean (<with a fair sea voyage, and a fair land journey, you will be soon at his dear side—Dickens> <Gordon made the voyage from San Francisco around the Horn on a big full-rigged Glasgow sailing ship—Current Big> but sometimes it may indicate a journey through air or space (<through the long 109-day, 180,000,000 mile voyage, Mariner was precisely controlled—Christian Science Monitor> **Tour** applies to a somewhat circular journey from place to place that ends when one reaches one’s starting point (<set out on a walking tour> <tour of Western Europe> <penologists made a tour of all the prisons in the state> <my next design was to make a tour round the island—Defoe> <left in September for a seven-week goodwill tour of northern and western Europe—Current Big>) **Trip** is the preferable word when referring to a relatively short journey, especially one for business or pleasure (<his new position requires frequent trips to New York> <the English came over in droves on the day trips—A. V. Davis> <surveys revealed that 59 percent of city-driver trips . . . were made for purposes of making a living—American Annual> The term is also used in place of **journey** to refer to more extensive travels (<conclusions I had reached on my trip around the world—Willkie> <a trip through western Pennsylvania, then down the Ohio—L. M. Sears> **Jaunt** carries a stronger implication of casualness and informality than any of the others and is especially applicable to a short trip away from one’s home or one’s business, usually for pleasure or recreation (<they are off for a day’s jaunt> <a jaunt to the shore or the hills—F. L. Allen> <lip service is paid . . . to the idea of Congressional travel but the general tone throughout runs: They’re off again on their jaunts at public expense—H. A. Williams> **Excursion** applies to a brief pleasure trip, usually no more than a day in length (<the rural neighborhood of Sneyd, where they had been making an afternoon excursion—Bennett> **Excursion** is the preferred term, especially in railroad and steamship use, for a round trip at reduced rates to a point of interest (as a resort or an exposition or a metropolis) (<the Minneapolis, Northfield & Southern Ry. runs excursions to Bush Lake on tournament days—Amer. Guide Series: Minn.> When the excursion involves a voyage of some days or weeks and, often, a sight-seeing tour with frequent stops during which the participants use the ship as their living quarters, **cruise** is the usual term (<a Mediterranean cruise> <the steamship lines are featuring winter cruises through the Caribbean and their yacht is off with a party on an> **Expedition** applies to a journey intended to further a definite purpose (<he called this trip frankly a begging

joyless —Con *despondent, despairing, desperate, forlorn, hopeless: depressed, weighed down, oppressed (see DEPRESS)
joyous joyful, happy, *glad, cheerful, lighthearted
blithe, jocund, *merry: rapturous, ecstatic, transported (see corresponding nouns at ECSTASY)
Ant lugubrious —Con dolorous, doleful, *melancholy: *miserable, wretched
judge vb 1 Judge, adjudge, adjudicate, arbitrate mean to decide something in dispute or controversy upon its merits and upon evidence. All these words imply the existence of a competent legal tribunal or of its equivalent. Judge implies mainly the investigation of evidence on both sides, a comparison of the merits of each case, and a decision as to where the truth lies (the court must judge between the claimants) the matter is to be judged on the facts as they appeared then —Justice Holmes Adjudge stresses decision by a court either at the end of a trial or during a legal process (the evidence was adjudged inadmissible) the court adjudged the will void the district court adjudged the 1946 agreement void Harvard Law Review Adjudicate, on the other hand, stresses formal deliberate determination of an issue by or as if by a court and often the pronouncing of a judgment, sentence, or decree the court proceeded to adjudicate the rights and interests of the parties it is useless to reargue a seemingly adjudicated case —Lowes A bitter dispute that was not adjudicated until 1972 —Amer. Guide Series: Conn. all former WW II POWs whose claims were adjudicated by the commission —The Naval Review Arbitrate implies deliberate determination of a matter in dispute by one or more persons who constitute a tribunal that may or may not be legally recognized and who are usually acceptable to both sides to the controversy the strikers and the employers finally agreed on a group of three men to arbitrate their differences litigation has virtually ceased: it is possible, of course, that the elders are arbitrating these cases out of court —Gunn
Analogous to judge: arbiter, arbitrator, referee, umpire are comparable when they denote a person who decides or helps to decide questions or issues that are unsettled or in controversy. Judge implies the assumption or the possession both of superior knowledge, experience, or wisdom, and of the power to determine the truth by weighing critically and impartially the merits of a case (it doth appear you are a worthy judge; you know the law, your exposition hath been most sound —Shak.) the polls in each district or precinct are in charge of two judges, who help decide disputes —Ogg & Ray the question is whether in language the results justify the quibble. Well, the public is here the best judge —Barzun Arbitrators have disagreed or are tied. In sports and games both umpire and referee are technical terms applied to the official or officials charged with the regulation and supervision of a contest (as by enforcement of rules of a game, making decisions on plays, and determining penalties for faults). In most sports either one term or the other is used; thus, these officials in baseball, cricket, and tennis are designated umpires, while in boxing, basketball, football, and ice hockey they are designated referees. In nontechnical use referee usually is applied to one to whom disputants have recourse when agreement seems impossible, umpire to one who enters in and arbitrarily ends the struggle or dispute (clear-sighted, unprejudiced, sagacious . . . he was the universal referee —Disraeli) just death, kind umpire of men's miseries —Shak.
judgment vb judgment implies deliberate determination of an issue by or as if by a court and often the pronouncing of a judgment, sentence, or decree (the court proceeded to adjudicate the rights and interests of the parties) it is useless to reargue a seemingly adjudicated case —Lowes (a bitter dispute that was not adjudicated until 1972 —Amer. judgment vb
judges who form such a court <judicial decision> <judicial duty> <judicial proceeding> I am told at times by friends that a judicial opinion has no business to be literature—Cardozo> The term is also used in distinction from executive, legislative when applied to that one of the powers, departments, or functions of the government which is associated with a court (as the United States Supreme Court), which gives definitive decisions on questions of law or interprets the constitution or basic law <judicial, legislative, and judicial branches of the government> <government analyzes into three main functions . . . legislative, executive, and judicial activities > <judiciary> In extended use judicial is applied especially to a type of mind, mental activity, or manner suggestive of that of a judge (as in detachment or fair-mindedness) or appropriate to a judge or court of justice (as in orderliness and seriousness of procedure) <judicial mind . . . the quality of age or of novelty would carry no necessary implication of value—Grandgent> The review made an evident effort to be judicial . . . and so exhibiting both the good and bad points of the novel it alternated favorable and unfavorable judgments—McCloskey> <judiciary> is occasionally used in place of judicial, especially when it suggests reference to the courts in general and to the administration of justice as a whole <the appointment of more women to higher judiciary positions > <Current Big> In current usage, however, judiciary occurs predominantly as a substantive, with judicial its corresponding adjective. The two words <judicial and juristic> imply a connection with the law, especially as it is administered in the courts, rather than with the judges or those who settle questions of law. Often these terms come close to legal in meaning <ordered . . . to grant judicial recognition to the Assemblies of God churches in Italy—Time> but in learned use they are more restricted in significance. Both terms, but especially <judicial>, imply a reference to the law as it appears to learned lawyers and judges—that is, as a highly complex and involved body of principles, statutes, decisions, and precedents requiring vast knowledge, skill in interpretation, and a keen logical mind in those who put it to use; therefore, the term often means characteristic of, determinable by, or useful to a person with such knowledge and skill <Eden is clearly working for the <judicial> separation of Formosa and the Pescadores from the mainland—Healey> <high time that we act on the <judicial> principle that aggressive war-making is illegal and criminal—R. H. Jackson> <jurisprudence> implies rather a reference to the science of law <set forth with all the circumstance of philosophical and <jurisprudence> scholarship—Veblen> <laws and <jurisprudence> compilations of the Norman period—Stenton> <Justice> Holmes had struck in 1905 in his dissent in Lochner v. N.Y. the high pitch of American <jurisprudence> thought—New Republic> <judiciary> *judicial, juridical, juristic <judicial> *wise, sage, sapient, prudent, sensible, sane Ana *rational, reasonable: just, *fair, equitable, dispassionate, objective: sagacious, perspicacious, astute, *shrewd, discreet, prudent (see under PRUDENCE) Ant *injudicious, asinine —Con *foolish, silly, absurd, preposterous: *stupid, slow, dull, dumb, crass, dense: rash, reckless, foolhardy (see ADVENTUROUS) jumble n *confusion, disorder, chaos, disarray, clutter, snarl, muddle jump vb <jump> Jump, leap, spring, bound, vault are comparable as verbs meaning to move suddenly through space by or as if by muscular action and as nouns designating an instance of such movement through space. All of these terms apply primarily to the movements of men or lower animals, but they also may be used of similar movements of inanimate things. Jump, the most general term, basically implies a projection of the body that results in reaching a spot which is to some extent distant, whether below, above, or on the same plane <she jumped from a second-story window> <jump over a fence> <jump from the ground to the top of a low wall> <a jump across a ditch> Since jump usually implies a rise and descent in a curve and a landing away from the point of origin, it is often applicable to things as well that follow a similar curve or seem to have a similar objective <the fire> then jumped Essex Street and burned the house of Samuel Prince—J. D. Phillips> Jump may be extended to various sudden or sharp movements whether physical or not <his heart jumped with fright> <prices jumped when war was declared> <the children jumped with joy> <leap usually implies greater muscular effort than jump, though it otherwise often agrees with it in implications; it may or may not suggest suddenness, swiftness, a forward or a backward motion, or an upward or a downward motion, but it usually includes one or more of these connotations in its meaning <the chamois leaps from crag to crag> <a leap from a window> <leapt over a wall> In extended use <leap> goes further than <jump> in suggesting suddenness or intensity (as of change, response, surprise, or exaltation of thoughts) <my heart would have leaped at sight of him—Kenneth Roberts> *ashes am I of all that once I seemed. In me all's sunk that leapt, and all that dreamed is wakeful for alarm—Millay> <spring> implies a jumping or leaping, but both as verb and as noun it additionally suggests ideas not involved in <jump> and only occasionally involved in <leap>, such as resiliency, elasticity, grace of movement, and emergence by issuing or flowing. The emphasis is often upon the action itself rather than upon the fact of movement to or over <spring from the bed> <the <spring> of a cat on a bird> <spring> to my feet, for anger had overtaken me—Edith Morris> <spring> across the stream, inviting those who shared his views to follow him—Amer. Guide Series: Vt.> <bound> comes very close to <spring> in its emphasis upon the action itself, but it carries an implication of vigor and strength not apparent in <spring>, so that it often connotes a plunging or a lunging forward <the bounded forward in order to catch the ball> <with a bound, he was at her side> <there were great kangaroos that . . . would descend the hillslopes in large, slow, gracious <bounces>—Ellis> Although <vault> is often used specifically in respect to leaping as a physical exercise with the aid of a long pole as a fulcrum, it may also apply to a leap or a leaping upward with the aid of a support or a leap over an object often with a hand laid on the object <unperturbed by the tumble he vaulted back into the saddle> <an acrobat . . . was vaulting over chair backs> <an acrobat . . . was vaulting over chair backs> <Deland> *put his hand on the counter and vaulted over, landing heavily on the other side—J. W. Johnson> jump n <jump> leap, spring, bound, vault (see under <jump> vb) jumpy adj <jumpy> jittery, nervous, restless, uneasy, fidgety, *impatient, unquiet, restive Ant <steady> Conjunction, confluence, concourse are comparable when meaning the act, state, or place of meeting or uniting. <Junction>, the most general of these words, applies to the meeting or uniting usually of material things (as roads, rivers, lines, or railroads) <at all the street <junctures> along the <juncture> <junction> is one of these words which is associated with a court (as the United States Supreme Court), which gives definitive decisions on questions of law or interprets the constitution or basic law <junctures and <junction> branches of the government> <government analyzes into three main functions . . . legislative, executive, and judicial activities > <judiciary> judicial, juridical, juristic
juncture of interest between Brady and the so-called Standard Oil group—*H. P. Willis* and only occasionally of persons or groups of persons <(another small force of Frenchmen, reinforced by Ethiopian natives, moved westward, seeking a juncture with [Major] Marchand—Lengyel) <(there he proposed to effect his *junctio*on with the man who should make all the difference to this new civil war—Bello) *Confluence* suggests a flowing movement that brings things together. It is applicable to two or more things or persons viewed as things which flow or seem to flow toward a point where they merge and mingle <(the *confluence* of cowboys, cattle traders, and railroad men gave Dodge City a lively homicidal character—*Life*) It specifically applies to the place at which streams unite, often to form a larger stream or body of water <(the Ohio river is formed by the *confluence* of the Monongahela and Allegheny rivers) <(this river, which is formed by the *confluence* of the historic Tigris and Euphrates rivers—Boschen) *Concourse* places the emphasis on a running or flocking together of great numbers of persons or things <(the . . . frame of the universe was not the product of chance, or fortuitous *concourse* of particles of matter—*Hale*) It is commonly used of a place, sometimes out of doors but sometimes in such a great building as a railroad terminal, in which there is an endless flow of persons or things passing through <(just off the waiting room is the passenger *concourse*, a 24 x 1200-foot "bon voyage deck" where passengers of the *Lurline* arrive and depart and their friends greet them or wave them on their way—*Ships and the Sea*)

**juncture, pass, exigency, emergency, contingency, pinch**

would constitute an exigency or emergency <(having thus devised a plan for use in a *contingency*, Calhoun sought in various ways to prevent the *contingency* from coming—*U. B. Phillips*) <(every citizen must have a stake in his country adequate to justify in his eyes the sacrifices that any *contingency* may entail—*W. O. Douglas*) <(to be dug out and then in the winter is a *contingency* the mail driver reckons as part of his daily life—*Jefferies*) *Pinch* suggests pressure and the need for action but without the same intensity as *emergency* or *exigency*; it is particularly appropriate for use of a juncture in personal affairs <(I could always in a pinch pawn my microscope for three pounds—*Maugham*) *(ready in a pinch to ride roughshod over opposition—*Power*) <(this—the great *pinch* of his life—*Hawthorne*) *Strait,* often in its plural *straits,* applies to a situation from which the person involved finds it difficult to escape, so hampered or fettered is he by some given or implied set of circumstances <(he was in great *straits* for lack of money) <(this disagreeable companion had, of his own free will, assisted him in the *strait* of the day—*Dickens*) *(he was at a loss what to invent to detain him . . . He rendered homage to the genius of woman in these *straits.* "My Aunt," he thought, "would have the lie ready"—*Meredith*) *(the army's truly desperate *straits*—*Mason*) *Crisis* applies to a juncture or pass whose outcome will make a decisive difference, for good or ill, in a life or a history or a disease. The term usually connotes suspense, but need not imply either evil in the situation or a particular outcome <(the pneumonia patient has passed the *crisis*) *(Tiberius gave one million pounds out of his own pocket to relieve the agrarian *crisis* of *A.D.* 33—*Buchan*) *(Father finally . . . brought the matter to a *crisis*. He said, after all, the boy had a right to choose—*Mary Austin*) *(her adolescence had passed without the trace of a religious *crisis*—*Huxley*)

**Ana** *(state, posture, situation, condition, status: *predicament, plight, quandary)*

**Junk** *vb* *scrap, *discard, cast, shed, molt, slough*

or to a quality in a thing which never departs from the truth in the slightest degree (he painted a psychological portrait of himself which for its serenely impartial justice, its subtle gradations . . . has all the qualities of the finest Velázquez—Ellis) or to the treatment accorded one who has transgressed a law, whether a divine law, a natural law, or the law of a state, or who seeks relief when wronged or protection when his rights are threatened (at the present time . . . there is more danger that criminals will escape justice than that they will be subjected to tyranny—Justice Holmes) or to the system of courts of law whereby the rights of an individual or his innocence or guilt are determined in accordance with the laws of the state (in the modern state . . . Justice and administration are directly connected with whatever governs—Belloc) Equity differs from justice chiefly in being more restricted in its denotation, for it usually implies a justice that transcends the strict letter of the law and is in keeping with what is reasonable rather than with what is merely legal. It is in this sense that a court of equity is, theoretically at least, distinguished from a court of law. To the former go for adjudication and settlement the unusual cases where abstract justice might not be dealt out according to the limitations of the written law while to the latter go the vast majority of cases where the determination of facts is of first importance and where the law, once the facts are established, provides the treatment to be accorded the person or parties involved (in informal terms, a law case is one where the courts have only to decide who is right; an equity case is one where the courts have to decide not only who is right, but go on to say what must be done—Science) But equity in nonlegal use implies a justice based upon a strictly impartial meting out of what is due (as rewards and punishments or praise and blame) (that noble word liberal, which in America has become dissociated from its essential humanism and sense of equity—Ustinov) (the union claimed that the lower wages paid to aliens were not in keeping with any principle of equity—Smith College: The President's Report 1952-1953) 

justify 1 vindicate, defend, *maintain, assert
Ana *prove, demonstrate: *support, uphold, back
Con *disprove, refute, confute
2 account, rationalize, *explain
Ana *excuse, condone: *exculpate, exonerate, absolve,
acquit, vindicate: extenuate, gloze, gloss, whitewash,
*palliate
Con incriminate, indict, arraign, *accuse: condemn, denounce, blame (see CRITICIZE)
3 Justify, warrant are comparable when meaning to be the thing (as evidence, a circumstance, a situation, or a state of affairs) that constitutes sufficient grounds for doing, saying, using, or believing something. Justify may be preferred when the stress is on providing grounds that satisfy conscience as well as reason, and usually refers to an action that, unjustified, would be looked upon with disapproval (no consideration on earth justifies a parent in telling lies to his child—Russell) I remember a very tenderhearted judge being of opinion that closing a hatch to stop a fire and the destruction of a cargo was justified even if it was known that doing so would stifle a man below—Justice Holmes) (Locke justified the right of revolution—W. S. Myers) (Batista justified his seizure of power on the grounds of an alleged conspiracy by the government to control the elections—Americana Annual) Warrant is especially appropriate (see also ASSERT 1) when the emphasis is on something that requires an explanation or reason rather than an excuse and suggests support by authority, precedent, experience, or logic (the deposits contain too high a percentage of sulfur to warrant development—Wythe) (the history and appearance clearly warrant such assumption—Armstrong) (a shorter course is designed for students whose graduate study and experience warrant it—Smith College: The President's Report 1952-1953)
Ana allow, permit (see LET): sanction (see APPROVE):
authorize
jut *bulge, stick out, protuberate, protrude, project, overhang, beetle
Ana *extend, lengthen, elongate: swell, distend, dilate,
expant
juvenile *youthful, puerile, bovish, virgin, virginal, maiden
Ana *immature, unmatured: callow, green, crude (see RUDE)
Ant adult: senile —Con *mature, matured, grown-up
juxtaposed *adjacent, adjoining, contiguous, abutting, tangent, conterminous
Ana *close, near, nigh

K

keen adj 1 *sharp, acute
Ana piercing, penetrating, probing (see ENTER): *pungent, poignant, piquant: cutting, biting, *incisive, trenchant
Ant blunt —Con *dull, obtuse
2 *eager, avid, agog, athirst, anxious
Ana ardent, fervent, fervid, fervent (see IMPASSIONED): *intense, vehement, fierce: fired (see LIGHT vb)
Con atypical, impassive, stolid, phlegmatic: listless, *languid: unconcerned, incurious, *indifferent, uninterested, disinterested
keen vb wait, weep, *cry, whimper, blubber
Ana lament, bewail, bemoan (see DEPLORE): mourn, sortow, *grieve
keep vb 1 Keep, observe, celebrate, solemnize, commemorate are comparable when they mean to pay proper attention or honor to something prescribed, obligatory, or demanded (as by one's nationality, religion, or rank), but they vary widely in their range of reference or applica-
tion. Keep and observe are closely synonymous terms, especially when they imply heed of what is prescribed or obligatory, but they differ fundamentally in their connotations. Keep implies opposition to break, and emphasizes the idea of not neglecting or violating; thus, one keeps, rather than observes, a promise (keep the peace) (keep the commandments) Observe carries such positive implications as punctiliousness in performance of required acts and rites and a spirit of respect or reverence for what one holds or honors; when these more appropriate ideas are definitely to be suggested observe is the more appropriate term, even though keep would otherwise be possible; thus, few persons observe, rather than keep, the Sabbath in the manner of the early Puritans (observed Passover with the utmost strictness) (he observes the letter of the law) Celebrate and solemnize are also close synonyms because they may take as their objects not only a day, a season, or an occasion which for religious, political, or

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
other significant reasons is observed with pomp and ceremony but also a ceremony or rite, usually a religious ceremony or rite, that is marked with unusual dignity and splendor. Celebrate, however, except in certain idiomatic phrases (as celebrate the Eucharist, celebrate a marriage, celebrate Mass) in which the gravity and forms of religion are implicit, suggests demonstrations of joy or festivity (as by singing, shouting, speechmaking, and feasting) (celebrate Independence Day) (celebrate their golden wedding) (the family decided to celebrate the occasion by a large dinner party) Solemnize as applied to occasions of joy and festivity stresses their grave, ceremonious, or solemn aspects and usually suggests greater formality in observance and greater dignity and splendor of ceremony than does celebrate (Harvard each June solemnize the award of degrees to students . . . of the University—Official Register of Harvard Univ.) (solemnize this sorrowing natal day to prove our loyal truth—Burns) The term is often specifically used of the celebrating of marriage especially with the fullest applicable religious ceremonial; thus, in the Roman Catholic Church a marriage is solemnized only when administration of the sacrament of matrimony is followed by a nuptial Mass and a special blessing (Catholics may marry but their marriages may not be solemnized during Lent) Commemorate implies remembrance and suggests observances that tend to call to mind what the occasion (as the day, the season, or the ceremony) stands for; thus, one celebrates Christmas by religious ceremonies that commemorate the birth of Christ; the people of the United States commemorate the birth of their independence on the 4th of July; the French people commemorate the fall of the Bastille on the 14th of July. Ana regard, respect (see under REGARD Ana overlook, omit, slight: violate, transgress, contravene, further implications this until I ask for it) When, the birth of Christ; the people of the United

promised is to fulfill what has been promised. Reserve implies either a keeping in store for other or for future use (the runner reserved some of his energy for the final sprint) (reserve some of the milk for breakfast) or a withholding from present or from others' use or enjoyment (the force of will which had enabled her to reserve the fund intact—Bennett) (reserved his judgment) Hold and hold back are often used in place of withhold or keep back and sometimes in place of detain and reserve when restraint in letting go, whether self-imposed or imposed by others, is implied (hold back a portion of each week's wages for group insurance) (held back the truth in giving his testimony) Ana *save, preserve, conserve: hold, *have, enjoy, possess, own: control, direct, manage, *conduct Ant relinquish —Con *discard, cast, junk: refuse, reject, repudiate, spurn (see DECLINE vb): surrender, abandon, resign, yield (see RELINQUISH) keep n *living, livelihood, subsistence, sustenance, maintenance, support, bread keep back, keep out *keep, retain, detain, withhold, reserve, hold, hold back keepsake *remembrance, remembrancer, reminder, memorial, memento, token, souvenir ken n *range, gamut, reach, radius, compass, sweep, scope, orbit, horizon, purview Ana *field, sphere, province, domain: view, sight (see look n) kibitzer onlooker, looker-on, bystander, *spectator, observer, beholder, witness, eyewitness kick vb *object, protest, remonstrate, expostulate Ana oppose, combat, *resist, withstand, fight: *criticize, denounce, condemn: objure, *execute, curse, damn, anathematize kid vb chaff, *banter, rag, rib, josh, jolly Ana tease, plague, pester, harry, *worry kidnap *abduct kidney kind, sort, *type, nature, description, character, stripe, ilk kill vb Kill, slay, murder, assassinate, dispatch, execute are comparable when meaning to deprive of life or to put to death. Kill is so general that it merely states the fact and does not, except in special phrases (as "Thou shalt not kill"), suggest human agency or the means of death or the conditions attending the putting to death. Also, the object of the action may be not only a person or other living thing but also an inanimate or immaterial thing with qualities suggestive of life (kill snails in the garden) (a boy killed by a fall) (vegetation killed by frost) (the president killed the project when he vetoed the bill making an appropriation for it) (kill a friend's love by indifference) (he believed at that time that the League of Nations was going to kill war, that the Labour Party were going to kill industrial inequity—Rose Macaulay) Slay implies killing by force or in wantonness; it is rare in spoken English, but it often occurs in written English where it may convey a dramatic quality whether in poetic or elevated writing or in journalnale (though he slay me, yet will I trust in him—Job 13:15) (the slain man has not yet been identified) In its extended uses slay usually suggests wanton or deliberate destruction or annihilation (to slay the reverence living in the minds of men—Shelley) (never had she greatly loved before; never would she greatly love again; and the great love she now had she was slaying—Rose Macaulay) Murder definitely implies a motive and, often, premeditation and imputes to the act a criminal character; it is the exact word to use in reference to one person killing another either in passion or in cold blood (Macbeth murdered Duncan) (Thomas à
Becket, archbishop of Canterbury, was murdered in his own cathedral. It is sometimes used in place of kill as more expressive or in place of slay as more brutally direct and condemnatory, both in literal and extended use. (Glamis hath murdered sleep, and therefore Cawdor shall sleep no more; Macbeth shall sleep no more—Shak.) The language of strategy and politics is designed . . . to make it appear as though wars were not fought by individuals drilled to murder one another in cold blood—Huxley. Assassinate implies murder especially of a person in governmental or political power by stealth or treachery and often by an agent or hireling of an opposition. It usually suggests an attempt to get rid of a person who is believed to be an obstacle to the safety of a tyrant, the welfare of a people, the liberty of a nation, or the success of a design (Marat was assassinated by Charlotte Corday). Dispatch also suggests an attempt to get rid of a person by killing him, but it is far more colorless than assassinate (and the company shall stone them with stones, and dispatch them with their swords—Ezek 23:47). Because it nearly always implies taking direct means of killing (as by shooting or stabbing) and so sometimes connotes expedition or speed in killing or in ending suffering, it is applicable, as most of the other terms are not, to killing (as of a sick or injured animal) for humane reasons (the policeman dispatched the rabid dog with a single shot). Often dispatch is merely a euphemism for another of the terms of this group when quick killing or a sudden end is implied (reached up, caught Wright by the coat, . . . and at one stab dispatched him—Amer. Guide Series: La.). Execute is the term for putting to death one who has been condemned to such a fate by a legal or military process, or sometimes by summary action of a group (execute a convicted assassin).

**kind n** type, sort, stripe, kidney, ilk, description, nature, character

**kind adj** Kind, kindly, benign, benignant mean having or exhibiting a nature that is gentle, considerate, and inclined to benevolent or beneficent actions and are comparable especially as applied to persons and to their acts and utterances. Kind and kindly both imply possession of qualities (as interest in others' welfare, sympathy, andhumaneness) appropriate to man as a rational, sensitive, and social being. The two words are often used interchangeably in speech but may be used distinctively, kind then implying reference to a disposition to be sympathetic and helpful, and kindly to the expression of a benevolent, sympathetic, or helpful nature, mood, or impulse; thus, he has a kind, rather than kindly, heart; he takes a kindly, rather than kind, interest in ambitious boys (be kind to animals) (the kindly ministrations of a nurse) (kindly words of advice) (the kindest man, the best-conditioned and unwearyed spirit in doing courtesies—Shak.) (ring in the valiant man and free, the larger heart, the kindlier hand!—Tennyson) Benign (see also favorable) and benignant stress mildness, serenity, and mercifulness more than do kind and kindly; they also often imply graciousness and therefore are more frequently applied to superiors than to equals, when they are used to describe persons or their acts, utterances, or politeness. (A benign master) The transformation of a benign personality into a belligerent one—Mumford. (A benignant influence) Strange peace and rest fell on me from the presence of a benignant Spirit standing near—Sill.

**Anna** benevolent, *charitable, humane, altruistic, philanthropic, eleemosynary, humanitarian: sympathetic, warm, warmhearted, responsive, *tender, compassionate: element, lenient, indulgent, merciful, *forbearing, tolerant;

*amiable, good-natured, complaisant, obliging
Ant unkind — Con cruel, inhuman, *fierce, savage, fell: harsh, *rough: *grim, implacable, unrelenting, merciless

Ana *blaze, flame, flare, glow: *provoke, excite, stimu-
late: arouse, rouse, *stir: *incite, foment, instigate

Ant smother, stifle

kindly benign, benignant, *kind

Ana *gracious, cordial, genial, affable, sociable: *amiable,
good-natured, complaisant, obliging: friendly, neighborly
(see amicable): considerate, *thoughtful, attentive

Ant unkindly: acrid (of temper, attitudes, comments)—
Con malevolent, malignant, *malicious, spiteful

kindred *related, cognate, allied, affiliated

Ant alien

kingly, regal, royal, queenly, imperial, princely are comparable when meaning of, relating to, or befriending one who occupies a throne. Kingly, regal, and royal are often interchanged, especially when used in reference to a monarch who is called king; thus, kingly, regal, or royal power are equally appropriate and idiomatic. However, usage shows a degree of preference for kingly when the reference is to the personal or ideal character of a king or to his feelings, disposition, aims, or actions (kingly courtesy) (kingly condescension) (leave kingly backs to cope with kingly cares—Cowper) or for regal when the reference is to the king's office or the state or pomp which accompanies the exercise of his powers (regal ceremonies) (regal splendor) (ascend your throne majestically . . . sit regal and erect—Auden) and for royal when the reference is to persons or things associated with the king either as a person or as a monarch, but not necessarily involving magnificence or display (the royal family) (the royal residences) (a royal society is one under the patronage of a king or members of his family)

In extended use kingly carries the strongest implication of dignity and nobility (kingly pride) (i am far better born than is the king, more like a king, more kindly in my thoughts—Shak.) while regal suggests magnificence or majestic character (a regal feast) (her rather regal conception of the behavior to be expected of a whore-house madam may have a comic value—Gibbs) ("Just tell me what you would like to eat; you can have anything you want.") . . . it had a regal ring—Henry Miller) and royal, fitness or suitability for a king especially in superlative excellence (a royal welcome) (had a royal time) (was treated with the royal acclamation of a visiting statesman—White) Queenly is used in place of kingly when the reference is directly to a person who is a female sovereign in her own right or is the consort of a king (queenly courtesy) (queenly prerogatives) But when the reference is to the office, the family of the queen, or anything to which regal and royal are normally applied, the latter adjectives are used without reference to the sex of the sovereign. Imperial suggests reference to a monarch who is called emperor or empress (His Imperial Majesty) (an imperial court) (the imperial power) In extended use imperial implies fitness or suitability for an emperor or empress and typically suggests a more awe-inspiring quality than kingly and more pomp and grandeur than regal or royal (i have seen new york grow from the little old town of the nineties to the imperial city that stands there now—White) (she was imperial rather than rude—Wylie) Princely implies reference to one who is called a prince and especially to one who is so called as the monarch of a principality, as the heir to a royal throne, or as a male member of the immediate royal family (the representative of the princely power—Sarah Austin) (among the princely houses of Western Europe—Free-
knowledge

knack

**knack** bent, turn, *gift, faculty, aptitude, genius, talent**

3. **knack** *ability, capacity, capability: aptness, readiness, quickness (see corresponding adjectives at **quickness**): facility, dexterity, ease, *readiness**

**Ant** ineptitude

**knave** *villain, scoundrel, blackguard, rascal, rogue, scamp, raps-collion, miscreant**

knit

**knit** *weave, crochet, braid, plait, tat**

knock

**knock** *tap, rap, thump, thud**

**knock** *strike, hit, smite: *beat, pound, pummel**

knotty

**knotty** intricate, involved, complicated, *complex**

knowing

**knowing** alert, bright, smart, *intelligent, clever, quick-witted, brilliant**

**Ana** *shrewd, astute, perspicacious, sagacious: *watchful, vigilant, alert: discerning, observing or observant, perceiving or perceptive (see corresponding verbs at **see**)**

**Con** obtuse, *dull, blunt: dense, crass, *stupid, slow**

**knowledge** science, learning, erudition, scholarship, information, lore are comparable when they mean what is known or can be known, usually by an individual but sometimes by human beings in general. **Knowledge** applies not only to a body of facts gathered by study, investigation, observation, or experience but also to a body of ideas acquired by inference from such facts or accepted on good grounds as truths **his knowledge is both extensive and accurate** (the advantage of gaining a knowledge of French literature) **strength and bustle build up a firm**. But judgment and knowledge are what keep it established —Hardy** the inventor of the radio . . . had the advantage of accumulated knowledge—Krutchy** Science (see also art 3) is occasionally employed as a close synonym of knowledge but ordinarily it applies only to a body of systematized knowledge dealing with facts gathered over a long period and by numerous persons as a result of observation and experiment and with the general truths or laws derived by inference from such facts. The term usually connotes more exactness and more rigorous testing of conclusions than knowledge does and therefore is often used to denote knowledge whose certainty cannot be questioned (the art of feeding preceded the science of nutrition by many centuries—Hadley** the defense of nations had become a science and a calling—Macaulay** (perhaps all the science that is not at bottom physical science is only pretentious nescience—Shaw** Learning specifically applies to knowledge gained by long and close study not only in the schools or universities but by individual research and investigation; it may be used of those who are engaged in the study of science, but it is more often employed in reference to those who devote themselves to the study of the humanities (as languages, literature, history, and philosophy) **he is a man . . . of deep learning—Burney** a man of good education and learning, of an excellent understanding, and an exact taste—Swifty** learning commonly connotes organized lore outside of any scientific area. It is an end in itself, it has been so honored by the world for centuries—H. M. Jonesy** Erudition carries a stronger implication of the possession of profound, recondite, or bookish knowledge than does learning (all the encyclopedic erudition of the middle ages—Lowes) but often the terms are employed as if they were equivalent in meaning (I arrived at Oxford with a stock of erudition, that might have puzzled a doctor—Gibbon** (it does not seem to me fitting . . . that one layman, with no special erudition in that subject, should publicly express his views—T. S. Elioty** Scholarship implies the possession of the learning characteristic of the trained scholar; the term usually suggests mastery in detail of a field of study or investigation, the exhibition of such qualities as accuracy and skill in carrying on research intended to extend knowledge in that field, and the display of powers of critical analysis in the interpretation of the material that is gathered (never fulfilled the promise of scholarship given by his great and precocious intellectual power and his even greater erudition—Economisty** what scholarship represents is a change in the temper of the human mind, in the focus of its attention and in the quality of the things it cherishes—Fraenkel** Information usually denotes a kind or items of knowledge gathered from various sources (as observation, other persons, or books) and accepted as truth; the term carries no specific implication regarding the extent, character, or soundness of that knowledge; often it suggests no more than a collection of data or facts either discrete or integrated into a body of knowledge seeking information about her ancestors** his sources of information are not always reliable** the adult, with trained powers, has an immense advantage over the child in the acquisition of information —Elioty** a full, rich, human book, packed with information lightly dispensed and fortified with learning easily worn—Tracyy** Lore is occasionally used in place of learning, but ordinarily it applies to a body of special or out-of-the-way knowledge concerning a particular subject possessed by an individual or by a group and is primarily traditional and anecdotal rather than scientific in character **sacred lore** folk, or popular, etymology does not usually create words, but it provides lore about words which is as pleasant as it is unreliable—Lairdy** a lore composed of beliefs, customs, crafts, anecdotes . . . bearing in its content and terminology the unmistakable stamp of the backwoods—Amer. Guide Series: Ind.**

**Con** contrasted words

See also explanatory notes facing page 1
label n mark, brand, stamp, tag, ticket (see under MARK vb)
labeled vb *mark, brand, stamp, tag, ticket
labor n *work, toil, travail, drudgery, grind
laborer n *work, toil, travel, drudgery, grind
lack, lack, lack vb Lack, want, need, require are comparable when denoting the fact or state of being without something, especially something essential or greatly to be desired. Lack may imply either an absence or a shortage in the supply or amount of that something (the house lacks a back doorway) (the army lacked tanks and airplanes as well as rifles) (they are not lacking in food or comforts) (good counselors lack no clients—Shak.) (what he lacks in knowledge he can make up for by talking fast—Chase) Want frequently adds to lack the implication of urgent necessity and may be difficult to distinguish from its sense connoting longing (see under DESIRE vb) (the oldest . . . showing incipient moustaches and long hairs on the face that wanted a razor—Sacheverell Sitwell) (everything was dingy and wanted paint—Crofts) For this reason need may be preferred when a clear connotation of urgent necessity is desirable (he cannot get the rest he needs) Need usually throws the emphasis on urgent necessity rather than on absence or shortage, though both implications are often present (that family needs food and clothing) (the country needs the services and support of every citizen) (the letter needs no reply, but it would be courteous to acknowledge it) (that woman needs a lesson, Gideon. She's a public nuisance—Rose Macaulay) (needs vicarious compensations and manages to find them in the gossip columns—Huxley) (implements sorely needed by the British in the construction of vessels—Brock) Require (see also DEMAND) is often interchangeable with need but it may heighten the implication of urgent necessity (great acts require great means of enterprise—Milton) (the Doctor . . . required a few days of complete rest—Dickens) Con *have, hold, possess, own, enjoy
lack n Lack, want, dearth, absence, defect, privation are comparable when denoting the fact or state of being without something. Lack is somewhat ambiguous in scope since it may imply either a total or a partial failure of something that in the circumstances might be expected to be present and often requires qualification to make its intent unequivocal (with a complete lack of bloodshed, the republic was proclaimed—William Tate) (the comparative lack of simian fossils—R. W. Murray) (there is a slackening, a lack of faith in the pioneer dream that everyone may be rich, free, and powerful—Lord) Want (see also POVERTY) may imply either a partial or a complete lack but its range of application is far narrower than that of lack since it specifically applies to deficiencies of what is essential or at least needed or desirable; thus, one may exhibit either a want or a lack of tact; there may be a complete lack, rather than want, of pain immediately after some injuries (showed a certain want of courtesy) (war production occasionally suffered from want of hands to tend the machines or harvest the crops—Handlin) (an utter and radical want of the adapting or constructive power which the drama so imperatively demands—Poe)
Dearth implies an often distressingly inadequate supply rather than a complete lack (her vanity, dearth of brains, and excessive sentimentality were compensated by her kindness—Simmons) (there were six seasons of dearth approaching famine—Van Valkenburg & Huntington) (there is no dearth of simple violence in San Antonio—Green Peyton) Absence is perhaps the most unequivocal of these terms; when not qualified it denotes the complete lack of something (the prolonged absence of rain) or that something or occasionally someone is not present (in the absence of his father the boy managed the farm) (the general absence of undergrowth was understood . . . to have resulted from repeated Indian-set fires—R. H. Brown) (the confusion resulting from the absence of a critical discriminating attitude in the discussion of religion—Cohen) Defect (see also BLEMISH) implies the absence or lack of something required for completeness (as in form) or effectiveness (as in function) (be mine the privilege to supplement defect, give dumbness voice—Browning) (defect in a work [of art] is always traceable ultimately to an excess on one side or the other, injuring the integration of matter and form—Dewey) (there are certain obvious and superficial defects in this poem . . . But merit easily outweighs defect—Day Lewis) Privation in the sense pertinent here (see also POVERTY) is used primarily in certain philosophical definitions of negative qualities or states as absences of the corresponding positive (cold is the privation of heat) (St. Thomas regards evil as privation. In so far as a thing acts according to its nature, which is good, it cannot cause evil—Thilly) (dialectical terms . . . are terms standing for concepts, which are defined by their negatives or their privations—R. M. Weaver) (negative facts or states of affairs . . . seem clearly to be absences, lacks, or privations, and as such devoid of any properties which could possibly render them apprehensible in experience—Richard Taylor) Ana *need, necessity, exigency: deficiency (see corresponding adjective DEFICIENT): exhaustion, impoverishment, draining, depletion (see corresponding verbs at DEPLETE) Con abundance, amleness, copiousness, plentifulness, plenteousness or plenty (see corresponding adjectives at PLENTIFUL): excess, superfluity, surplus
lacoenic succinct, terse, *concise, summary, pithy, compendious Ana curt, brusque (see BLUFF): brief, short Ant verbose —Con *wordy, prolix, diffuse: loquacious, *talkative, voluble, glib, garrulous

landing field, landing strip *airport, airdrome, airfield, airstrip, flying field

language 1 Language, dialect, tongue, speech, idiom are comparable when they denote a body or system of words and phrases used by a large community (as of a region) or by a people, a nation, or a group of nations. Language may be used as a general term for a body of communicative symbols whether it is made up of words, or of sounds, gestures, and facial expressions, or of visual signals (as a code of lights, smoke, or flags), or of electrical impulses in a computer. However, in its ordinary and specific sense the term refers to a body of words that by long use by the population of a widespread territory has become the means whereby the ideas or feelings of the individual members of that population are communicated or expressed. The term suggests some degree of stability in behavior (as in vocabulary, pronunciation, and grammaticality); it usually connotes the existence of a standard determined by the usage of educated writers and speakers. English and French are languages, that is to say they are systems of habits of speech, exactly like Eskimo or Hottentot or any other language—R. A. Hall

dead languages such as classical Latin and ancient Greek

But language is also applied to a body of words and phrases that is peculiar to an art, a science, a profession, or a class and that, however well understood by others of the community, is not generally adopted by them. In economic language the “marginal saver” determines the price—Hobson

(it took the three of us, representing economics, sociology, and political science, about six weeks to learn each other’s language—Kerrwin)

dialect (see also dialect 1) may denote a form of language which is clearly distinguishable from other forms by marked differences and an identity of its own. More often it refers to a variant of a recognized language, restricted to a limited area and not entirely unintelligible to speakers of the language of which it is a phase (Venetian and Sicilian are equally dialects of Italian, although as far as mutual intelligibility is concerned these two might as well be called independent languages—Sapir)

(there is no poet in any tongue—not even in Latin or Greek—whom stands so firmly as a model for all poets—T. S. Eliot)

(totally the Bible into an Indian tongue—Cocket)

(he is a New England poet . . . true to its landscape, its climate, its history, its morality, its tongue—Mark Van Doren)

Speech, with rare exceptions, means spoken language, or (as in modern technical use) language as it is spoken (people of a strange speech—Ezek 3:6) (there are at least two sounds in the Anglo-Saxon which are unknown in our present speech—Whitney)

Idiom suggests reference to a country or sometimes to a province or section of a country with its own peculiar and distinctive tongue (part of the difficulty lies in the English idiom which is unfamiliar to the American reader—Stead)

(on the spot I read . . . the classics of the Tuscan idiom—Gibbon)

Idiom also may apply to private or peculiar language (as of a particular writer, class, literary school, or group) (the eminently personal idiom of Swinburne—T. S. Eliot)

(the medieval poetic idiom came after a while to seem a jargon—Lowes)

(I have read very little Runyon, whose idiom I always suspected—wrongfully, I’m sure—of being more or less synthetic—Gibbs)

Ana *dialect, vernacular, patois, lingo, jargon, cant, argot, slang

2 Language, vocabulary, phraseology, phrasing, diction, style are comparable rather than synonymous terms when they mean oral or written expression or a quality of such expression that is dependent on the variety, or arrangement, or expressiveness of words. Language applies primarily to verbal expression with reference to the words employed. It may call attention to excellence or ineptness in the use of words, to their dignity or their vulgarity, to their fitness or lack of fitness, to their sonority or their stridency, or to any of the qualities which speech or writing may derive from the choice and arrangement of words (he avoided harsh language in dealing with his children)

(language, grave and majestic, but of vague and uncertain import—Macaulay)

(when I read Shakespeare I am struck with wonder that such trivial people should muse and thunder in such lovely language—D. H. Lawrence)

Vocabulary calls attention chiefly to the extent or variety of the writer’s or speaker’s stock of words or to the source from which such a stock is derived (the constant play and contrast in English poetry between the Latin and the Anglo-Saxon vocabularies—Bottrall)

(German, famous for its polysyllabic vocabulary—G. A. Miller)

(even the vocabulary of renunciation, and its conventional gestures, were unfamiliar to him—Wharton)

Phraseology or phrasing is sometimes used in place of vocabulary when the reader’s attention is called especially to its idiomatic or peculiar character (coccidentencies of phraseology)

(awkward phrasing)

(exquisite phrasing in which we feel that every word is in its place—Edmund Wilson but phraseology in particular stresses the grouping of words as much as their choice (he can say in the phraseology of the sentimentalist that he “loves nature”) (the phraseology, rather than the vocabulary, of Donne offers difficulty to the inexperienced reader) (the gaudiness and inane phraseology of many modern writers—Wordsworth) (this cryptic and involved
phraseology, obscure to the uninitiated, permeates all communist publications—Report of Special Committee on Communist Tactics. Diction calls attention to the choice and arrangement of words with reference to their expression of ideas or emotions. The term is used commonly of considered language (as of poetry, literary prose, or oratory) and it usually, therefore, implies selection or arrangement with reference to such ends as impressiveness, elegance, and beauty of sound. He was in a high fever while he was writing, and the blood-and-thunder magazine diction he adopted did not calm him—Kipling. His choice of forceful picturesque diction in speech and writing—Laweson Brown. A poet cannot help being of his age, the diction and the idiom see to that—Gogarty. Style denotes a mode or manner of expressing one's thoughts or emotions or imaginative conceptions in words, as distinct from or as distinguishable from the thoughts or emotions or conceptions expressed. It is sometimes thought of as a structure and diction peculiar to an age or a literary type and found in each representative work of that time and type (the Renaissance epic style is based upon that of Vergil) (a poem written in the style of the ode) but perhaps more often it is thought of as a manner of expression which in structure and diction involves artistry but is individual and characteristic of its author. Style . . . is a peculiar recasting and heightening, under a certain condition of spiritual excitement, of what a man has to say, in such a manner as to add dignity and distinction to it—Arnold. What he believed in was style: that is to say, a certain absolute and unique manner of expressing a thing, in all its intensity and color—Pater. This is Style. As technically manifested in literature it is the power to touch with ease, grace, precision, any note in the gamut of human thought or emotion—Quiller-Couch.

languid, languishing, languorous, lackadaisical, listless, spiritless, enervated are comparable when they mean lacking in vim or energy or, when applied to things, the appearance of it. Languid usually implies an unwillingness or an inability to exert oneself owing to fatigue, exhaustion, or physical weakness (struck by something languid and inelastic in her attitude, and wondered if the deadly monotony of their lives had laid its weight on her also—Wharton; walked from the room with languid deliberate steps; . . . she moved as though she were intolerably weary—Wylie). Languishing may suggest delicate indolence, often accompanying boredom or futilely wasteful pensiveness and often connotes an affected rather than a real state (a languishing gaze) (with their languishing, sorrowful melodies . . . with their high-flown sentimentalism, these ballads reflected . . . stalne romanticism—Mooney). Languorous carries a suggestion of languidness and delicacy acquired through soft living, through shrinking from exertion, or through sentimentalism or overindulgence in tender or amorous emotions (sought out rich words with which to re-create the languorous, stilling beauty of the Old South—Springfield Republican). A poignant perfume, soft and languorous, all-enveloping and heart-stirring—Kenneth Roberts. Her shaded lids . . . were languorous from my kisses, and gave . . . an inebriating love-bemused and longing-solemn look—Edmund Wilson. Lackadaisical implies a carefree or indifferent attitude that either forbids exertion or makes for futile, piddling, or halfhearted and indolent efforts (at the terse tempo of mechanized war, lackadaisical men, lacking in self-confidence and slow to obey are lost—G. S. Patton). A lackadaisical river town that tolerated a generous amount of vice—T. D. Clark. Listless need not imply physical weakness, but it almost invariably implies either a lack of interest in what is going on around one or in what one is doing, or a languid appearance that may be the result either of boredom or ennui or of fatigue or disease (the child has grown thin, white, and listless within the past two months; suddenly relaxed into a listless attitude of sullen tractability—S. S. Van Dine). They were effete, weary, burnt-out revolutionists, whose listless voices slid sleepily over their melodies—Mooney. Spiritless implies the loss or the absence of the animation or fire that gives life or dash to a person or to his words and acts (a spiritless performance of a play) (dominated the starving, spiritless wretches under him with savage enjoyment—Mason). No courage can repel the dire assault; distracted, spiritless, benumbed, and blind, whole legions sink—Wordsworth. Enervated implies a destruction of qualities or powers essential to the vigorous exercise of the will and the intellect. Often it suggests the influence of luxury or of sloth but it may imply the operation of other causes, even of those that in themselves are not evil but may have deleterious effects (the enervated and sickly habits of the literary class—Emerson). Society in Rome, enervated as it was by vicious pleasure, craved continually for new excitements—Froude) (that enervated, run-down condition that is commonly known as Southern gentility—Basso).

Ana *lathargic, sluggish, comatose, torpid: phlegmatic, apathetic, *impassive: inert, *inactive, supine
Ant vivacious: chipper
languishing *languid, languorous, lackadaisical, listless, spiritless, enervated
Ana weakened, enfeebled, debilitated (see weaken): indolent, faineant (see Lazy): inert, *inactive, supine: *sentimental, romantic: pining, longing, yearning (see Long vb)
Ant thriving, flourishing; unaffected—Con robust, *healthy, sound, hale: *vigorous, energetic, lusty: *natural, artless, unsophisticated, naive
languor *lathargy, lassitude, stupor, torpor, torpidity
Ana exhaustion, fatigue, weariness (see corresponding verbs at tire): ennui, doldrums, *tedium: depression, blues, dumps (see sadness)
Ant alacrity—Con *celerity, *leregerity: quickness, promptness, readiness (see corresponding adjectives at Quick): zest, gusto (see taste)
languorous languishing, *languid, lackadaisical, listless, spiritless, enervated
Ant vigorous: strenuous (of times, seasons)
lank, lanky gaunt, rawboned, *lean, spare, angular, scrappy, skinny
Ana *thin, slim, slender, slight: attenuated, extenuated (see Thin vb)
Ant burly—Con husky, brawny, *muscular, sinewy: plump, portly, round, chubby, *fleshy, stout
lapse n 1 slip, *error, mistake, blunder, faux pas, blun, howler, boner
Ana *offense, sin, vice, crime: *fault, failing, frailty, foible: transgression, *breach, violation, trespass
2 relapse, backsliding (see under Lapse vb)
Ana *deterioration, decline, declension, decadence, degeneration, devolution: retrograding or retrogradation, receding or recession (see corresponding verbs at recede): retrogressiveness or retrogression, regressiveness or regression (see corresponding adjectives at backward)
Con advance, progress (see under Advance vb): *development, evolution
lapse vb Lapse, relapse, backslide and their corresponding nouns, lapse, relapse, backsliding, are comparable when they mean to fall back into a state or condition from which one has raised oneself or has been raised, or the act or state of one who has so fallen back. As distinguished from decline, degenerate, and deteriorate, these verbs do not necessarily imply the reversion of a process or development or the gradual losing and the inevitable loss of a valuable quality (as strength, power, or influence) but they do distinctively imply a failure to continue without break a course of improvement and a return, often quickly effected but not always irremovable, to an earlier bad or lower state or condition. Both lapse and relapse basically imply a sliding or slipping but they are increasingly divergent in their applications and connotations. Lapse usually presupposes reformation in manners, morals, or habits, or the acceptance of a high standard (as of rectitude, accuracy, or accomplishment). It need not imply culpability or weakness, for it often suggests no more than a sudden failure of the memory or the influence of habit or tradition or the pressure of an overwhelming emotion (it is easy for the person who has acquired good manners by effort to lapse into old ways when he is not on guard) (only when she was strongly moved did she lapse into the dialect she spoke in her youth) (the moment his attention is relaxed ... he will lapse into bad Shakespearean verse—T. S. Eliot) (whatever rhetorical or technical lapses they may contain, the conception is throughout that of a great musician—Edward Sackville-West). When culpability is strongly implied, the word still, in comparison to the other terms in the group, often connotes extenuating circumstances; it is therefore the fitting choice when the context indicates such circumstances (he constantly fought his tendency to lapse into easygoing ways) (the natives lapsed back into accustomed vices—Billington) (in estimating a man's place in the scale of perfection ... the moral judgment, not withholding condemnation of a particular lapse, may not condemn the man wholly for it—Alexander) Relapse presupposes definite improvement or an advance (as toward health or toward a higher physical, moral, or intellectual state) and it implies a complete and often dangerous reversal of direction; thus, one whose improvement in a serious illness has been marked may be said to relapse, or suffer a relapse, when his condition becomes definitely worse; a reformed thief is said to relapse when he returns to his old life (the Arabs were once the continuators of the Greek tradition; they produced men of science. They have relapsed ... into pre-scientific fatalism, with its attendant incuriosity and apathy—Huxley) (man's eternal tendency to relapse into apathy and atavism—Stewart) (his firmness of mind soon relapsed into a cankering intolerance—Cranston) (the corruptions and vices which accompany the horribly swift relapse of a culture into barbarism—Edmund Fuller) Backslide and backsliding also imply a reversal in direction of one who has been going forward, but unlike relapse, which is in many ways their close synonym, they are restricted in their reference largely to moral and religious lapses. They therefore often suggest unfaithfulness to one's duty or allegiance or to principles once professed (did not I ... backslide into intemperance and folly—Marryat) (this is not to say that backslidings fail to occur; on the contrary backslidings normally follow any strenuous moral experience—G. W. Allport) Ana revert, *return: slip, *slide: deteriorate, degenerate, decline (see corresponding nouns at DETERIORATION): *descend: *rede, retrograde Con progress, *advance: develop, *mature larcener, larcenist thief, robber, burglar (see under

larceny *theft, robbery, burglary large, big, great mean above the average of its kind in magnitude, especially physical magnitude. Large may be preferred when the dimensions, or extent, or capacity, or quantity, or amount is being considered <a large lot> <a large hall> <a large basket> <a large meal> <a large allowance> <a large crevasses and huge tunnels in many of them [icebergs] bore witness to a long voyage—Schuyt) Big, on the other hand, is especially appropriate when the emphasis is on bulk, or mass, or weight, or volume <a big book> <a big pile> <the box is too big to carry> <a big voice> <a big already—so enormous in fact—that we named him Monster, and he padded about like a furry whale—Atlantic) As applied to material objects, great has been practically displaced by large or big. Where great is used to denote physical magnitude, it now regularly connotes some impression (as of wonder, surprise, amusement, or annoyance) associated with the size (the great head that seemed so weighted down with thought and study—The Nation) (the great size of these figures—the largest man is 167 feet long ... prevented their character from being recognized—Amer. Guide Series: Calif) (his eyes were great and hollow, as a famished man forlorn—Morris) Great alone, in standard English, expresses degree <he was listened to with respect and, when aroused, with nearly as great fear—W. C. Ford) <great kindness> <great heat> In extended use, great suggests eminence, distinction, or supremacy <if we win men's hearts throughout the world, it will not be because we are a big country but because we are a great country. Bigness is imposing. But greatness is enduring—A. E. Stevenson) while large suggests breadth, comprehensiveness, or generosity (in intellect and humanity he is the largest type I have come across. Other greater men in my time were great in some one thing, not large in their very texture—Ricketts) and big carries over the implication of mass or bulk but often suggests impressiveness or importance rather than solidity or great worth (so-called big names, which are still big and still have great readership value, command high prices—Baldwin) (he didn't expect to work here all his life ... pretty soon he'd have a new job and would be a big man—Granite) Ana vast, immense, enormous, *huge, mammoth, colossal, gigantic: tremendous, prodigious, monumental, stupendous, *monstrous: inordinate, *excessive, exorbitant, extreme, immoderate, extravagant Ant small —Con little, diminutive, tiny, wee, minute (see SMALL): slight, slender, slim, *thin largely, greatly, mostly, chiefly, mainly, principally, generally are often interchanged, but they are capable of being used with explicitness even though they basically agree in meaning. Largely stresses quantity or extent; it usually connotes copiousness or abundance and often suggests an amount exceeding that of other ingredients, components, or constituents <water enters largely into the composition of the bodies both of plants and animals—Geikie> <good country sausage is largely pork> Greatly carries a heightened suggestion of greatness in degree that differentiates it from largely <he is greatly admired> <careless and lazy is he, greatly inferior to me—Kipling> (the sprouting of seed is greatly helped by sun and rain) Mostly usually stresses numbers <the audience was made up mostly of children> (twenty-seven millions mostly fools—Carlyle) Chiefly emphasizes the importance of one thing among other things; it may connote an outstanding or preeminent position or it may connote merely relative importance <the basket contained many fruits, but chiefly apples> (the battle was won chiefly by the aid of

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
the air force  Mainly is often used interchangeably with chiefly, but not where preeminence is implied; rather it connotes greatest importance among a number of things, but not exclusive value  be sure to take along with you all that you will need, but mainly informal clothes  the cause depends mainly on the validity of this act—John Marshall  the Pickwickian Christmas did very little to stimulate consumption; it was mainly a gratuitous festivity—Huxley  Principally carries an idea of primary importance rather than outstanding or relative importance; the difference is not great between it and chiefly or mainly except when the idea of being first or primary is emphasized  they wholly mistake the nature of criticism, who think its business is principally to find fault—Dryden  his support comes principally from the income of invested money  the cash crops are principally wheat and rye  Generally stresses reference to the majority of persons, instances, or cases involved  the people, not universally, but generally, were animated by a true spirit of sacrifice—Froude  the news was generally received with joy  the land breezes here are generally hot and dry

largess boon, *gift, present, gratuity, favor

Ana benefaction, *donation, contribution; grant, subvention (see APPROPRIATION)

lascivious lewd, *licentious, libertine, lustful, libidinous, lecherous, wanton

Ana  immoral, unmoral, amoral: sensual, *carnal, fleshy, animal: obscene, gross, coarse

Con  chaste, pure, modest, decent: virtuous, *moral

lassitude languor, *lethargy, stupor, torpor, torpidity

Ana exhaustion, weariness, fatigue (see corresponding verbs at TIRE): ennu, doldrums, *tedium: dumps, blues, depression (see SADNESS): impotence, powerlessness (see corresponding adjectives at POWERLESS)

Ant vigor —Con energy, strength, might, force, *power

last vb endure, *continue, abide, persist

Ana survive, outlast, *outlive: remain, *stay

Ant fleet

last adj Last, latest, final, terminal, concluding, eventual, ultimate are comparable when they mean following all the others in time or order or in importance. What is last comes at the end of a series, especially of things of the same kind or class; the term usually implies that no more will follow or have followed  the last page of a book  their last child is now ten years of age  fairest of stars, last in the train of night—Milton  but it may imply only that the thing so qualified is or was the most recent or is the closest or nearest with respect to the present or a given time or period  his last book is his best so far  their last visit to us was in December  In this latter sense latest may be preferred as less ambiguous; thus,  his latest book  is clearer than  his last book  since the latter wording might suggest the author’s ensuing death  the latest number of a current magazine  the latest news is that all is well  vetoed the latest version of Norris’s . . . bill—Lepawsky  What is final definitely closes a series or process not only because it is the last in order of individuals or details  the final day of school  the final float in the procession  the final event on a program  but because it is decisive or conclusive  the final answer to this question is still to be found  a final decree of divorce  a judgement that is final, that settles a matter—Dewey  a genuinely popular ballad can have no fixed and final form, no sole authentic version—Child  What is terminal comes at the end of something and marks the limit of its extension, its growth, or its completion as a series or process  the terminal point of a railroad  the Tamiami Trail, a name compounded of the syllables from the names of its terminal cities, Tampa and Miami—Amer. Guide Series: Fla.

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

little newboys crying their wares in correct Bosonense, down to broad a’s and softened terminal t’s—Price  What is concluding brings something (as a speech, a book, a program, a celebration) to an end or marks its finish  the concluding address was delivered by the chairman  provoked comparison by making their concluding paragraphs almost identical—R. G. Davis  What is eventual is bound to follow as the final effect of causes already in operation or of causes that will be operative if a given or understood contingency occurs  the silent decay and eventual overthrow of her natural defenses—Gladstone  it is his object to point out the necessity . . . for a deliberate and purposive art of eugenics, if we would prevent the eventual shipwreck of civilization—Ellis  What is ultimate (see also ULTIMATE 2) is the last, final, or terminal element in a series or process  this ultimate book of my autobiography—Osbert Sitwell  the ultimate stage in a process of descent—Ellis or is the final outcome or end to which a person or thing is moving or working  the ultimate effect of a drug  when I think of the earth’s refrigeration, and the ultimate collapse of our solar system—L. P. Smith  or is the most remote in time, either past or future, or most important in a scale of values  the ultimate effect of a war  (that word comes into English from French, but its ultimate source is Sanskrit)  its utopianism interferes with an interest in proximate, rather than ultimate, goals—Niebuhr  Ant first

lasting, permanent, perdurable, durable, stable, perpetual mean enduring for so long as to seem fixed or established. Lasting may imply long continuance with no end in sight; in this sense, it may be close in connotation to everlasting  who . . . sings his soul and body to their lasting rest—Shak. More typically, however, it does not imply endlessness, but rather a surprising capacity to continue indefinitely  the anger of slow, mild, loving people has a lasting quality that mere bad-tempered folk cannot understand—Deland  an excellent mind, shrewd wit, and an amazing capacity for developing lasting friendships—Douglas  Permanent applies chiefly to things which are not temporary, tentative, transitory, or fluctuating but which continue or are likely or expected to continue indefinitely or as long as relevant; thus, a permanent position may be expected to continue on the one hand until death or retirement removes the employee holding it or, on the other, until fundamental changes in or termination of the business of the employer renders it superfluous; permanent damage to an object is damage that will remain as long as the object persists  settled down and made a permanent home for his family  the stimulation of violent emotions may leave permanent traces on the mind—Inge  much of the current literature on this subject, both ephemeral and of permanent value, comes out of Russia—Sokolsky  Perdurable carries a stronger implication than does lasting in its typical use of endlessness of existence; but it suggests endless or apparently endless existence especially from the point of view of human remembrance or of historical record  makes him one of the few perdurable figures of our Civil War and secures him a sainthood that slander has not been able to violate—Cargil  our literature is going to be our most perdurable claim on man’s remembrance—Quiller-Couch  Durable implies power of resistance to destructive agencies; it usually suggests a capacity for lasting that exceeds that of other things of the same kind or sort  a durable pavement  a durable color  more durable than brass—Junius  (many writers have longed for durable renown—L. P. Smith  Stable applies to what is so firmly or solidly established that it cannot be moved or changed; the term therefore is applicable to things that
are lasting or durable because they are deeply rooted, or finely balanced, or infixed and not subject or likely to be subject to fluctuations (a stable foundation) (a stable form of government) (stable institutions) (the stable earth and the changing day—George Eliot) (men as steady as . . . wheels upon their axles, sane men, obedient men, stable in contentment—Huxley) (a relatively stable society . . . where the individual remains, both physically and socially, in the place in which he was born—Cheek)

**Perpetual** (see also **CONTINUAL**) is in many respects closer to **permanent** than to the remaining terms but it differs from it signally in the absence of any notion of relevance and may approach everlastings in its suggestion of an endless course or a going on without a prospect of something intervening to bring about an end; thus, the furnace has a **permanent** not a **perpetual** place in the cellar since the cellar itself will ultimately crumble away; **perpetual**, rather than **permanent**, motion is considered impossible because of the inevitable interference of friction (a dark, a colorless, a tasteless, a perfumeless, as well as a shapeless world: the leaden landscape of a **perpetual** winter—Mumford) (the song of the minstrel moved through a **perpetual** Maytime—J. R. Green) (a **perpetual** embargo was the annihilation, and not the regulation of commerce—John Marshall)

**Ana** enduring, abiding, persisting or persistent, continuing (see corresponding verbs at **CONTINUE**): **everlasting**, endless, unceasing: **continual**, continuous, incessant, unremitting, perennial: eternal, sempiternal (see **INFINITE**)

**Ant** fleeting—**Con** fugitive, passing, evanescent, transitory, **transient**, short-lived

**late** 1 *tardy, behindhand, overdue**

**Ana** delayed, retarded, detained (see **DELAY**)

**Ant** early: punctual, prompt—**Con** timely, *seasonable*, opportune, well-timed

2 departed, deceased, defunct, *dead*, lifeless, inanimate

3 *modern, recent**

**latent**, dormant, quiescent, potential, **abeyant** are comparable when meaning not now manifest or not evincing signs of existence or activity. **Latent** implies concealment and is applied to what is present without showing itself (**latent energy**) (a **latent** infection) (his sinister qualities, formerly **latent**, quickened into life—Hardy) (it remained possible that by further development, **latent** contradictions might have been revealed—Russell) **Dormant** usually suggests sleeping and is applied to something which has once been active but now is inactive though not incapable of future activity (a **dormant** plant) (a **dormant** volcano) (which power can never be exercised by the people themselves, but must be placed in the hands of agents, or lie **dormant**—John Marshall) (she pursued him with attention, and when his passion was **dormant** sought to excite it—Maugham) **Quiescent** emphasizes the fact of inactivity without necessary implications either of causes or of past or future. It suggests the increase of their wealth as they sank into **quiescent** Tories—Meredith) Sometimes it connotes immobility (if only we could persuade ourselves to remain **quiescent** when we are happy!—Jefferies)

**Potential** applies to something which at a time in question does not possess such being, nature, or effect as is expressed but which is likely to have or capable of having such being, nature, or effect at some future time (**potential** energy) (disaffected citizens who are a **potential** danger to the nation) (this eye for a **potential** and achievable best—Mumford) (it [an infant] must from the very first be viewed seriously, as a **potential** adult—Russell) **Abeyant** (more often, predicatively, in **abeyance**) implies a suspension of activity or active existence (in Mr. Brooke the hereditary strain of Puritan energy was clearly in **abeyance**—George Eliot)

**Ana** analogous words **Ant** antonyms **Con** contrasted words

sailing in ... and orders me out—Faith McNulty) Farcical is often used interchangeably with comical but it is especially appropriate when what creates amusement is, like dramatic farce, dependent upon extravagance, nonsenseness, practical jokes, or burlesque for the effect it produces (boys are like monkeys ... the gravest actors of farcical nonsense that the world possesses—Meredith) (almost farcical to suppose that Henry, as a Norman prince, could not talk his own language to his Norman bride—Emerson) Droll and funny usually imply oddity or strangeness to what makes a thing laughable, but droll ordinarily carries a stronger implication of unfamiliarity, quaintness, absurdity, or intentional humorlessness (Thackeray's names, though often ludicrous, are always happy, and often inimitably droll—Athenaeum) (the habit of trying to marshal all the facts, weigh them, and think things through ... is sometimes regarded as droll—Bunche) and funny of queerness or curiosity (the night mail set me down at Marwar Junction, where a funny little happy-go-lucky native-managed railway runs to Jodhpore—Kipling) (children thought he was a very funny old Chinaman, as children always think anything old and strange is funny—Steinbeck) Funny is, however, the ordinary informal term interchangeable with any other word of the group (a funny story) (he could rarely risk being funny and lightening his deadly seriousness with comedy—Anthony West)

lavish *profuse, prodigal, luxuriant, lush, exuberant Ana *liberal, bountiful, bounteous, openhanded, generous, munificent, handsome: sumptuous, opulent, *luxurious: *excessive, inordinate, extravagant Ant sparing—Con *meager, scanty, scant: economical, frugal, thrifty (see sparing): provident, prudent, discreet (see under Prudence): *stingy, niggardly, parsimonious, penurious, miserly

lavish 488 lawful

lawful

formity in procedure, or conformity to a standard of practice) (the rules of a game) (the rules of a school) (the rules of good writing) Sometimes rule does not imply ordering and prohibiting but suggests a positive way of thinking or acting in order to get desired or concrete results (the rule of three) (like many old-time craftsmen he worked strictly by rule of thumb) Regulation often equals rule, but distinctively it connotes prescription by authority for the control or management of an organization or system (military regulations) (regulations respecting interstate commerce) (factory regulations) (we, the artists, are individualists ... what right have you to circumscribe us with petty rules and regulations?—Harford) (this regulation establishes ceiling prices for producers (brewers) of domestic malt beverages—DiSalvo) Precept, like law, usually implies generality and lack of detail in the statement and an authoritative origin; like rule, however, it implies closer reference to individual conduct than to government (he really was the one child to whom the "spare-the-rod" precept did not apply—Deland) Often precept is applied to what is enjoined by teaching; it commonly suggests counsel or advice, and is opposed in its abstract use to practice or example (by precept and by practice he proclaimed the lofty solitude of the individual soul—Ellis) (observe the sixth commandment, not as a precept of divine law but as a counsel of profitable prudence—Sullivan) Statute, ordinance, and canon all come under the general class of law. A statute is a written law, formally enacted by a legislative body. An ordinance is a local law, especially one enacted by a municipal government. A canon, basically, is a law of a church binding upon all of its members. In extended use canon is applied to such laws of ethics, of society, of criticism, and of the practice of the arts, as have the sanction of accepted authority and are enforced by one's moral, social, or artistic conscience (are we witnessing a violent reaction against accepted canons of decency in life?—Grandgent) Ana mandate, dictate, *command 2 *principle, axiom, fundamental, theorem Ana necessity, exigency (see Need n) Ant chance 3 *hypothesis, theory 4 statute, act, *bill

lawful, legal, legitimate, licit mean permitted, sanctioned, or recognized by law or the law. Lawful differs from the others in implying a reference to various sorts of law (as divine law, natural law, or the law of the land, or as civil law, common law, or canon law). Consequently, the term often comes close in meaning to allowable or permissible (all things are lawful unto me, but all things are not expedient—I Cor 6:12) (tell me, which knave is lawful game, which not? Must great offenders, once escaped the Crown, like royal harts, be never more run down?—Pope) or sometimes to rightful or proper (the lawful heir) (a lawful prize) (the lawful sovereign) (that man was not Hannah's lawful husband—Ingamells) (William desired to reign not as a conqueror but as a lawful king—J. R. Green)

Legal implies a reference to the law as it appears on the statute books or is administered in the courts; thus, the lawful heir is also the legal heir; the lawful owner of a piece of property is one whose legal right to it is certain; the legal heir is entitled only to legal interest on his loans. Legal is used more often in the sense of sanctioned by law, or in conformity with the law, or not contrary to the law, than in the sense of allowable by the terms of the law (a legal marriage) (the legal period for the payment of a debt) (the capture of the neutral ship carrying contraband was held to be legal) (she became the virtual head of our family, supplanting ... my Uncle Tiberius (the legal

lean adj *lean, spare, lank, lanky, gaunt, rawboned, angular, scrawny, skinny mean thin because of absence of superfluous flesh. Lean stresses the lack of fat and therefore of figure that one often finds in army men—<a quote by Wolfe>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Wolfe

Several other adjectives are shown in a concordance with links to their definitions. This text snippet appears to be from a concordance or dictionary. The author seems to be discussing the meanings of words related to thinness and shape, particularly in the context of physical appearance and characteristics. Words such as lean, spare, lank, lanky, gaunt, rawboned, angular, scrawny, and skinny are being compared and contrasted. The text mentions specific sources, indicating that the definitions or usage notes might be derived from them. The snippet ends with a colon, suggesting that more information could follow. The asterisk (*) marking seems to denote specific points of interest or emphasis within the text.
learned: He reads Greek and Latin easily. He can recite poetry in seven languages—Book-of-the-Month Club News. Scholarly also implies learning, but it is applied particularly to persons or to the utterances, ideas, and writings of persons who have attained mastery in a field of study or investigation, who have to a greater or lesser extent advanced knowledge in that field, and who have exhibited consistently high standards in the appraisal of their own and others' discoveries. (never academic—still less pedantic—but always scholarly; with the effect of profound learning ever so lightly worn—Storr) Often, more narrowly, the term implies great care for accuracy or exactness (a scholarly study of the causes of the war). (scholarly pursuits) (this biography ... is scholarly to the point of being unreadable, with footnotes covering half the space—New Yorker) Erudite, though often employed as an equivalent of learned or scholarly, usually implies a love of learning for its own sake, a taste for what is out-of-the-way or remote from the interests of the average well-read man, and often an inordinately wide range of knowledge (the point of view of a profound and erudite student, with a deep belief in the efficacy of useless knowledge—Benson) (that excellent critic, the late Mr. Walkley, was often spoken of as erudite, because his charming quotations gave so many readers a feeling of having to do with a man who had all literature at his command—Montague)

Ana cultivated, cultured (see corresponding nouns at culture): *pedantic, academic, scholastic, bookish: *recondite, abstruse, esoteric

Con illiterate, unlettered, uneducated, unlearned, un-tutored, *ignorant

learning erudition, scholarship, *knowledge, science, information, lore

Ana *culture, cultivation, breeding, refinement: enlightenment (see corresponding verb at illuminate)

lenient 1 *soft, gentle, smooth, mild, bland, balmy

Ana assuaging, alleviating, relieving (see relieve): grateful, agreeable, welcome, gratifying, pleasing, *pleasant

Ant caustic —Con harsh, *rough

2 indulgent, merciful, clement, *forbearing, tolerant

Ana forgiving, excusing, condoning, pardoning (see excuse vb): kindly, benign, benignant (see kind): compassionate, *tender: indulging, pampering, humoring, spoiling, mollifying (see indulge): lax (see negligent)

Ant stern: exacting —Con rigid, rigorous, stringent: *severe, austere

leniently forbearingly, tolerantly, clemently, mercifully, indulgently (see under forbearing)

leniency clemency, mercy, charity, grace

Ana leniency, indulgence, clemency, mercifulness, forbearance, tolerance (see under forbearing): benignity,
beneignity, kindness, (see corresponding adjectives at kind): compassionateness or compassion, tenderness (see corresponding adjectives at tender): benevolence, humaneness, charitableness (see corresponding adjectives at charitable): laxity (see corresponding adjective at negligent)

**Ant** severity — **Con** strictness, rigorousness, rigidity, stringency (see corresponding adjectives at rigid): sternness, austerity (see corresponding adjectives at severe)

**lesion** wound, trauma, traumatism, bruise, contusion

**Ana** *injury, hurt, damage

less adj. Less, lesser, smaller, fewer are comparable terms that approach each other in meaning but are not synonyms and are rarely interchangeable. Less means not as much, especially in degree, value, or amount, and its opposite is usually more. It applies chiefly to collective nouns or nouns denoting mass or abstruse whole (the moon yields less light than the sun) <John has less money than James> <please make less noise> <humility has less appeal to men of today than other virtues> Lesser means not as great, as important, or as significant as that with which the thing so qualified is compared and implies opposition to greater or major <God made ... the lesser light to rule the night—Gen 1:16> <humility is not, in Christian ethics, regarded as a lesser virtue> <lesser breaches of the law—Locke>

In vernacular names lesser implies that the kind of plant or animal so designated is distinguished from a very similar one carrying the same name chiefly by its comparative smallness of size <the lesser celandine> <the lesser snipe>

**smaller** means not as large as that with which the thing so qualified is compared (as in size, dimensions, or quantity) <the smaller of two rooms> <give her the smaller table for it will take up less room> **fewer** means not as many and implies a difference in number of individuals or units; the term therefore modifies a plural noun <he has fewer pupils than he had last year> <give her fewer lumps of sugar> <no fewer than fifty were present>

**Ant** more

lessen *decrease, diminish, reduce, abate, dwindle

**Ana** *shorten, curtail, retrench, abridge, abbreviate: shorten, curtail, retrench, abridge, abbreviate: lighten, mitigate, alleviate (see RELIEVE):

*thin, dilute, attenuate

lesser smaller, *less, fewer

**Ant** major

let 1 lease, rent, *hire, charter

2 Let, allow, permit, suffer, leave denote to refrain from preventing, or to fail to prevent, or to indicate an intention not to prevent. Let, allow, and permit, though frequently used with little distinction of meaning, are capable of discrimination. Let is the most informal <her mother wouldn't let her go> <she didn't go because her mother wouldn't let her> Sometimes let implies failure to prevent through awkwardness, inadvertence, negligence, or inaction <the third baseman let the ball get through him> (this dismal sketch of the future of countries that let themselves become dependent on the labor of other countries — Shaw> <he is usually very particular not to let his beasts stray —F. D. Smith & Barbara Wilcox> and sometimes it implies failure to prevent through lack of power or inclination <he'll have to be a good deal tougher than his dad, who lets himself be pushed around—Mead> Allow and permit imply power or authority to prohibit or prevent. But allow may imply little more than acquiescence or lack of prohibition, whereas permit implies express signification of willingness <the freedom of conscience allowed dissenters, the tolerance extended to all creeds—Billington> (a business or profession which allows you to get away when you want to—Joseph) <I blush for the weakness that allows me to cherish such a passion—Gilbert> <he permitted none but Quaker preachers to smoke or drink in his home—Starr> <we do not give gifts, throw parties or pay bonuses at Christmas time. We do permit our employees to gather in the lobby and sing carols on Christmas Eve—Wall Street Jour.> Suffer (somewhat bookish in this sense) is often a mere synonym for allow in the narrowest implication of that word <suffer little children to come unto me—Lk 18:16> <suffer me to take your hand. Death comes in a day or two—Millay> but it may imply indifference or reluctance <the eagle suffers little birds to sing—Shak.> <she suffered herself to be led to the tiny enclosure where ... other generations had been buried—S. E. White> <perhaps the whole business ... of the death penalty will seem ... an anachronism too discordant to be suffered, mocking with grim reproach—Cardozo> Leave (see also 1) as used with the implication of letting, allowing, or permitting is not clearly distinct from the use discriminated at relinquish, but it tends to stress strongly the implication of noninterference; often it also suggests the departure of the person who might interfere <leave the choice of games to be settled by the guests> <the defendant's attorney left him free to tell his story as he wished> <we must leave the children to settle their affairs for themselves—Rose Macaulay>

**Ana** sanction, endorse, *approve, accredit, certify: authorize, license, commission

Con *forbid, prohibit, interdict, enjoin, ban, inhibit: hinder, impede, obstruct, block, bar: thwart, *frustrate, foil, circumvent

**lethal** deadly, fatal, mortal

**Ana** destroying or destructive (see corresponding verb at destroy): killing, slaying (see KILL): *pernicious, bane, ful, noxious: *poisonous, virulent, venomous, toxic

Con salutary, wholesome, hygienic, *healthful: renewing, restoring or restorative (see corresponding verbs at renew)

**lethargic**, sluggish, torpid, comatose are comparable when they mean being by constitution or condition physically and often mentally inert or inactive. Lethargic usually implies either a constitutional or a temporary or pathological state of sleepiness or drowsiness that makes for slowness in reactions, responses, or movements, or for temperamental apathy <bullfrogs, in a recent shipment, were quite lethargic ... and reacted only when they were strongly stimulated—Giese> <one is the lethargic atmosphere of an apathetic people, hopeless and helpless to direct their own destinies—Atlantic> <not all the industries of a Hercules will suffice to awaken the lethargic brain—Mencken> (but it was no lethargic calm; my brain was more active than ever—Hudson>

Lethargic applies not only to persons but to whatever by its nature moves, acts, or functions; the term implies conditions which create stagnation, inertia, indolence, or inability to proceed at a normal or usual pace <sluggish attention> (a sluggish pond) (a sluggish circulation) (a sluggish market for securities) <I want no sluggish languor, no bovine complacency. A pheno- barbital philosophy does not appeal to me—Warren Weaver>

England has become unenterprising and sluggish because England has been so prosperous and comfortable—H. G. Wells>

**Torpid** suggests the loss of power of feeling and of exertion; basically it implies the numb or benumbed state of a hibernating animal, but in its more common extended sense it implies a lack of the energy, vigor, and responsiveness that one associates with healthy, vital, active beings <memory was not so utterly torpid in Silas that it could not be wakened by these words—George Eliot> <still Richard was torpid; could not think or move—Woolf> <Oxford was torpid also, drooping along in its eighteenth-century grooves—
lethargy, languor, lassitude, stupor, torpor, torpidity are analogous words to discriminating powers of the mind, and . . . reduce it to a torpidity, however, probably more often applies to a torpidity which the last solitary tourist, flying with the yellow leaves . . . had left them to enjoy till the returning spring—Peacock

A sluggishness, comatoseness (see corresponding adjectives at lethargic): indolence, slothfulness or sloth, laziness (see corresponding adjectives at lazy): inertia or inertia, inactivity, idleness, passiveness, supineness (see corresponding adjectives at inactive): apathy, phlegm, impassivity (see under impassive)

Ant vigor—Con quickness, readiness, promptness, aptness (see corresponding adjectives at quick): alertness, quick-wittedness (see corresponding adjectives at intelligent)

lethargy, languor, lassitude, stupor, torpor, torpidity are comparable when meaning physical and mental inactivity. Lethargy implies a state marked by an aversion to activity which may be constitutional but is typically induced by disease, extreme fatigue or exhaustion, overeating or overdrinking, or constant frustration and which exhibits itself in drowsiness or apathy (what means this heaviness that hangs upon me? This lethargy that creeps through all my senses? Nature, oppressed and harassed out with care, sinks down to rest—Addison) (the state of apathy and lethargy, which they had been thrust by their stunning defeat—Political Science Quarterly). Langor (compare languid) has nearly lost its basic application to a condition of weakness, faintness, or delicacy of constitution induced by illness and serving as a bar to exertion or effort (I nearly sank to the ground through languor and extreme weakness—M. W. Shelley) and has come to imply an inertia such as results from soft living, from an enerating climate, or from amorous emotion (intervals of repose, which though agreeable for a moment, yet if prolonged beget a languor and lethargy that destroy all enjoyment—Hume) (she is characterized essentially by languor. Her most familiar posture is on a bed or divan—Fowle) (instead of the languor of the tropics, they seem to have acquired . . . a good deal of our energy and enthusiasm—Eleanor Roosevelt)

Lassitude implies such a listless seedy mental or physical condition as may result from strain, overwork, poor health, or intense worry; it usually connotes an inertia of mind or body which one has not the strength to fight (the results of overstrained energies are feebleness and lassitude—Borrow) (she sat for twenty minutes or more ere she could summon resolution to go down to the door, her courage being lowered to zero by her physical lassitude—Hardy) (an overpowering lassitude, an extreme desire simply to sit and dream—Moorehead). Stupor implies a state of heaviness when the mind is deadened (as by extreme drowsiness, intoxication, narcotic poisoning, or the coma of illness); the term may imply any state from a dreamy trancelike condition to almost complete unconsciousness (there is . . . something almost narcotic in such medieval poetry; one is lulled into a pleasing stupor—Lowes) (was in a stupor of mental weariness—Anderson) (had collapsed for the moment in a stupor of pain—Steen). Torpor and torpidity basically suggest the condition of a hibernating animal which has lost all power of exertion or of feeling (a poorwill found during the winter . . . which was in a state of profound torpidity—F. C. Lincoln). Both terms, especially when employed in reference to persons, usually imply extreme sluggishness and inertia (as in some forms of insanity); torpidity, however, probably more often applies to a physical condition and torpor to a mental state (blunt the discriminating powers of the mind, and . . . reduce it to a state of almost savage torpor—Wordsworth) (a deathlike torpor has succeeded to her former intellectual activity—Prescott) (in a world of torpidities any rapid moving thing is hailed—Birrell) (the torpidity which the last solitary tourist, flying with the yellow leaves . . . had left them to enjoy till the returning spring—Peacock)

Ana sluggishness, comatoseness (see corresponding adjectives at lethargic): indolence, slothfulness or sloth, laziness (see corresponding adjectives at lazy): inertia or inertia, inactivity, idleness, passiveness, supineness (see corresponding adjectives at inactive): apathy, phlegm, impassivity (see under impassive)

Ant vigor—Con quickness, readiness, promptness, aptness (see corresponding adjectives at quick): alertness, quick-wittedness (see corresponding adjectives at intelligent)
or by a diplomatic, military, or naval officer in its service. 

**Report** (see also **Account 2**) applies particularly to a communication sent by an official (as a diplomat) to his own government. The term is also applicable to an official communication giving a detailed statement of facts, proceedings, or recommendations (the committee on foreign affairs is ready to make a report to Congress) (the school sends a monthly report of each student's work to his parents) **Memorandum** is used chiefly in business for an informal communication sent to an executive or employee, conveying instructions or directions.

**levee** *wharf, dock, pier, quay, slip, berth, jetty

**level** vb point, train, *direct, aim, lay

**level** adj. Level, flat, plane, plain, even, smooth, flush are comparable chiefly as applied to surfaces and as meaning having a surface comparable to that of a perfectly calm body of water with no part higher than another. Something is level whose surface, from every point of view, lies on a line corresponding to or parallel with that of the horizon (the top of the table is not perfectly level) (the prairies are vast stretches of nearly level land) (a plot of ground made level by grading) But level is also applicable to an adjacent surface lying in exactly the same plane (in the spring, the river's surface is often level with its banks) (buildings whose roofs are level with one another) In extended use level implies an equality of parts, or of one thing with another, so that there are no manifest fluctuations or irregularities; thus, to speak in a level voice is to speak without the variations in pitch or voice volume that indicate imperfect self-control; to keep a level head is to keep free from distracting excitement. Something is flat (see also **insipid**) which is marked by absence of noticeable curvatures, prominences, or depressions, whether it lies in a horizontal plane or not (there is no flat ground hereabouts) (the flat face of a cliff) (the sides of a pyramid are all flat) But flat may apply to something that lies directly upon or against a flat surface (flat feet) (lay the map flat on the table) (the chairs have their backs flat against the wall) (lie flat on the ground) In extended use flat applies sometimes to what is so lacking in variation or variety as to be monotonous (a flat speech delivered by the new president) (a flat entertainment) or to what gives no ground for doubt or for difference in description because direct, pure, complete, or unqualified (a flat question) (a belief that is flat heresy) (a flat failure) or to what is fixed or absolutely exact (ask a flat price) (he ran the race in a flat ten seconds) Something is plane or plain which is flat and usually level. Plane is more usual in technical and mathematical use and more often applies to angles, curves, or figures (as triangles, rectangles, and pentagons) all points of which lie in the same real or imaginary surface so that if any two points be taken within the boundary lines of the angle, curve, or figure, the straight line joining them lies wholly within that surface; thus, **plane geometry**, which deals with plane angles, curves, and figures, is distinguished from **solid geometry** (the plane sides of a crystal) **Plain** is much less frequent in adjective use and applies chiefly to the ground (I recovered some strength, so as to be able to walk a little on plain ground—John Wesley) Something is even (see also **steady**) which exhibits a uniformity of all the points either of a plane surface or of a line so that the surface's flatness or levelness or the line's straightness is observable (he trimmed the top of the hedge to make it even) (the hem of your skirt is not even) (the frigate was on an even keel—Marryat) Something is smooth that exhibits perfect evenness of surface, as though polished, rolled, or planed free from the slightest traces of roughness or unevenness (the smooth surface of a rubbed and polished table) (a smooth lawn) (the tall bamboo and the long moss threw farther shadows . . . over the smooth bayou—Stark Young) A surface or a line is flush that is in the same horizontal or vertical plane or forms a continuous surface or line with another surface or line (the front of the house is flush with the front boundary line) (the river's surface is now flush with that of its banks) (a flush panel) (in the ordinary printed page, all lines are flush except those in titles or headings or those that are indented for paragraphing)

**Ana** parallel, uniform, *like, alike, akin, identical, similar: *same, equivalent, equal

**Con** undulating, fluctuating, swaying (see **swing vb**): varying, changing (see **change vb**)

**levitate** *rise, arise, ascend, mount, soar, tower, rocket, surge

**Ant** gravitate, sink

**levity** *lightness, light-mindedness, frivolity, flippancy, volatility, lightness

**Ana** foolishness or folly, silliness, absurdity (see corresponding adjectives at **foolish**); gaiety, liveliness, sprightliness, vivaciously or vivacity (see corresponding adjectives at **lively**)

**Ant** gravity — **Con** seriousness, soberness or sobriety, earnestness, solemnity, somberness (see corresponding adjectives at **serious**); severity, sternness, austerity, asceticism (see corresponding adjectives at **severe**)

**lewd** lustful, lascivious, libidinous, lecherous, wanton, *licentious, libertine

**Ana** *immoral, unclean, amoral: gross, * coarse, obscene: indecent, indecency (see **indecorous**)

**Ant** chaste — **Con** decent, pure, modest (see **chaste**): moral, virtuous: continent, temperate (see **sober**)

**liability** *debt, indebtedness, obligation, debit, arrear

**Ant** asset (or **plural assets**)

**liable** 1 amenable, answerable, * responsible, accountable

**Ana** obliged, constrained, compelled (see **force vb**): bound, tied (see **tie vb**)

**Con** exempt, immune (see corresponding nouns at **exempt**: *free, independent

2 **Liable**, open, exposed, subject, prone, susceptible, sensitive are used with reference to persons or things and mean being by nature or situation in a position where something stated or implied may happen. **Liable** (see also **Apt 2**; **Responsible**) is used particularly when the thing one incurs or may incur is the result of his obligation to authority, of his state in life, or of submission to forces beyond his control (one of the most horrible diseases to which mankind is liable—Eliot) (literature is liable to obsolescence, not only because language changes and gradually becomes less intelligible, but because the ideas, the interests, the conception of life it expresses, the very form of the thought, the experiences which arouse emotion, all become obsolete—Aldington) (liable to be burned at the stake for . . . heresy—Repple) **Open** suggests lack of barriers or ease of access (standing thus alone . . . open to all the criticism which descends on the lone form of the thought, the experiences which arouse emotion, all become obsolete—Aldington) (liable to be burned at the stake for . . . heresy—Repple) **Subject and prone** (see also **Prone 2**) both suggest greater likelihood

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
of incurring or suffering than liable and even less resistance than exposed; they may both connote the position of being under the sway or control of a superior power, but otherwise they differ in implications. Subject implies openness to something which must be suffered, borne, or undergone for a reason (as a state in life or a social, economic, or political status or a quality of temperament or nature) (the French people would have stood permanently weak, open to invasion and subject to continual interference—Belloc) (both were subject to constant criticism from men and bodies of men whose minds were as acute and whose learning was as great as their own—Henry Adams) (Paul was rather a delicate boy, subject to bronchiitis—D. H. Lawrence) (the cycles to which all civilizations are subject—Ellis) (the constitution was strictly an unknown one, and was awesomely subject to revision in the light of new developments—Buchan) Prone, on the other hand, usually implies that the person, or less often the thing, concerned is more or less governed by a propensity or predisposition to something which makes him or it almost certain to incur or to do that thing when conditions are favorable (you may well warn me against such an evil. Human nature is so prone to fall into it!—Austen) (I think that girls are less prone than boys to punish oddity by serious physical cruelty—Russell) (in those industries that are most prone to periods of depression and unemployment—Hobson) (our painters are prone to acquiesce in the colors of nature as they find them, rather than to use colors expressive of the mood evoked in themselves—Binyon) Susceptible carries a stronger implication than the preceding terms, with the exception of prone, of something in the person's or thing's nature, character, constitution, or temperament that makes him or it unresistant or liable to a thing and especially to a deleterious influence (wheat tends to be very susceptible to smut—Furnas) (a mind enormously more susceptible to tragic impressions than your own—Montague) (a natural-born actor, who was, in childhood, susceptible not only to somnambulism but to mesmeric control—Brooks) When used attributively the word often implies a readiness to fall in love (a very susceptible young man) Sometimes, however, susceptible stresses openness by reason of one's nature, character, or constitution, rather than liability, and when followed by of is equivalent to admitting or allowing (a theory susceptible of proof) (today's pedagogical theory asserts that memory cannot be cultivated: it is inborn, full-grown at the start, and not susceptible of increase—Grandgent) Sensitive differs from susceptible chiefly in implying a physical or emotional condition that predisposes one to certain impressions or certain reactions (she was too sensitive to abuse and calumny—Macaulay) (she discovered that with the clarification of her complexion and the birth of pink cheeks her skin had grown more sensitive to the sun's rays—Hardy) (she was extremely sensitive to neglect, to disagreeable impressions, to want of intelligence in her surroundings—Henry Adams) (the eye is much more sensitive to light than the hand or the balance to weight—Darrow)

**Ana** analogous words  
**Ant** antonyms  
**Con** contrasted words  
See also explanatory notes facing page 1
openhanded generosity and miserly penny-pinching—Newsweek> Munificent stresses splendid or princely liberality (a munificent endowment) <Caesar had been most munificent to his soldiers. He had doubled their ordinary pay. He had shared the spoils of his conquests with them—Froude> Handsome (for application to a person see beautiful) is often a close synonym of liberal and may carry a suggestion of astonishing largeness when applied to a gift, an offer, or a salary <in the case of the king and other public dignitaries we have arranged that they shall have handsome incomes—Shaw> {assuredly the archbishop . . . leaves something handsome for the servants—Borrow> or it may be a close synonym of generous especially when applied to an act or deed that evokes admiration for its unexpected magnanimity or graciousness {I should like to think of your house as your home, Tony} . . . This was handsome, if it was meant, and there seemed no reason why it shouldn't be—Archibald Marshall> Anna lavish, prodigal, *profuse, exuberant: benevolent, philanthropic, eleemosynary, *charitable Ant close {sense 5} —Con {stingy, niggardly, close-fisted, tight, tightfisted, penurious, miserly, parsimonious: *meager, scanty

2 Liberal, progressive, advanced, radical are comparable when used of a person or thing {as an idea, a writing, or an organization} to denote being freed from or opposed to what is orthodox, established, or conservative. Liberal implies emancipation from what binds the mind or will and connotes either indifference to tradition, convention, dogmas, or laws or the rejection of one or more of these. It therefore may suggest tolerance and broad-mindedness on the one hand, or unorthodoxy, laxness, or even lawlessness, on the other {a liberal Christian} {a liberal Republican} {some people who themselves hold liberal views are willing that their children shall first acquire conventional morals—Russell> Progressive is commonly a relative term, because it usually implies a comparison with what is reactionary or backward and a willingness to forsake old and seek out fresh methods and beliefs in the search for betterment {one progressive publisher is now experimenting with plastic bindings—Third Degree} {progressive economic and social legislation designed to benefit the masses—A. C. Gordon} {mentally so progressive that they were agitating for schools and the vote—Heiser> The term seldom suggests the espousal of extreme policies {a progressive businessman} {progressive ideas in education} Advanced is usually applied to men or to ideas and discoveries that are, or are believed to be, ahead of their time. It can favorably suggest liberalism or progressiveness and distinctively connote mental hardiness and experimental impracticality <the economic interests of the advanced and backward peoples—Hobson> {as interdependent and technically highly advanced world—Wirth> {endeavoring . . . with the aid of the most advanced scientific discoveries, not only to injure but also to destroy fellow beings—Gilroy> Radical often is employed in place of advanced, but discriminatively it may imply a willingness to root out and destroy the institutions which conserve or propagate the ideas or policies condemned; it is often therefore virtually interchangeably with revolutionary {radical ideas let loose by the American Revolution, the French Revolution, the revolutionary movements of 1848, have slowly but profoundly affected men's desires and their demands upon governments—Frankfurter> All of these words are capable of being used disparagingly especially as applied to politically active individuals or their works, often with little thought of their meaning content in more general applications. Ana tolerant, *forbearing, indulgent, lenient Ant authoritarian —Con strict, stringent, *rigid, rigorous: dogmatic, doctrinaire, *dictatorial, oracular liberate release, *free, emancipate, manumit, deliver, discharge, enfranchise Ana disengage, *detach: *extricate, disentangle, untangle, disencumber, disemarrass: *rescue, redeem, ransom, deliver Con *imprison, incarcerate, immure, intern: confine, circumscribe, restrict, *limit: *tie, bind: ensnare, snare, entrap, trap {see catch> libertine *licentious, lewd, wanton, lustful, lascivious, libidinous, lecherous Ana debauched, corrupted or corrupt {see under DEBASE>} {abandoned, dissolve, profligate, reprobate: *immoral, amoral, amoral Ant straitlaced —Con *moral, virtuous, ethical: continent, *sober, temperate: *chaste, decent liberty *freedom, license Ana independence, autonomy {see under FREE adj} {exemption, immunity: liberation, emancipation, enfranchisement, delivery {see corresponding verbs at FREE} {scope, range, compass, sweep Ant restraint —Con constraint, compulsion, duress, coercion {see FORCE} {confinement, restriction, limitation, circumscription {see corresponding verbs at LIMIT} libidinous lecherous, lustful, lascivious, lewd, wanton, libertine, *licentious Ana sensual, animal, *carnal: *immoral: gross, obscene, *coarse: dissolve, *abandoned, profligate, reprobate library *museum, archives, treasury, gallery license n liberty, *freedom Ana *exemption, immunity: looseness, laxity, slackness, relaxedness or relaxation {see corresponding adjectives at LOOSE} {privilege, prerogative {see RIGHT} Ant decorum —Con *obligation, duty: decency, propriety {see DECORUM} {restraint, constraint, compulsion {see FORCE} {continence, *temperance, sobriety license vb *authorize, commission, accredit Ana permit, *let, allow, suffer: *approve, endorse, sanction, certify: empower, *enable Ant ban —Con *interdict, inhibit, enjoin, prohibit, *forbid: *restrain, curb, check licentious, libertine, lewd, wanton, lustful, lascivious, libidinous, lecherous all suggest unchaste habits, especially in being given to or indicative of immorality in sex relations. Licentious basically implies disregard of the restraints imposed by law or custom for the enforcement of chastity; the term stresses looseness of life and of habits rather than the impiety of one's desires {licentious living} {licentious morals} {the precept that enjoins him abstinence forbids him none but the licentious joy, whose want, though faint, tempts only to destroy—Cooper} {an irreligious and licentious age had abetted depravity—Glasgow> Libertine suggests a more open and a more habitual disregard of moral laws, especially those pertaining to the sex relations of men and women {the frank libertinism of their old stage—Gibbon> he castigated the libertine lives of many of his generation {by merely living together a couple is practicing libertinism love—and the mere repetition doesn't, in some mysterious way, make it legal—Stone> Lewd often carries strong connotations of grossness,ileness, and vulgarity which color its other implications of sensuality, dissoluteness, and unconcern for chastity. As a result it is applied less often than the preceding terms to persons, or to the manners, thoughts, and acts of persons, who retain in their im-A colon (:) separates groups of words discriminated. morality evidence of breeding, refinement, or gentility
seen in the company of lewd women
lewd songs
lewd actions in public
where dowdy women whispered lewd invitations from behind wooden shutters—Baum
the whiskey had filled his body with a rosy sense of complete well-being, and vague lewd sensual images stroked his mind—Mailer
Wanton (see also supererogatory) implies moral irresponsibility or a disposition or way of life marked by indifference to moral restraints; it often suggests freedom from restraint comparable to that of animals, thereby connoting lassitude, incapacity for faithfulness or seriousness, or a generally unmoral attitude
wanton little creatures without character or depth of feeling—Nordhoff & Hall
all this was done with a gay, and, as I said, a wanton disregard of the ill effects—Sir Winston Churchill
so wanton, light and false, my love, are you, I am most faithless when I most am true—Millay
Lustful implies the influence or the frequent incitement of desires, especially of strong and often unlawful sexual desires
she took the greatest care of his health and comfort, and was faithful to him, not being naturally lustful except of power—Graves
Lascivious, like lewd, definitely suggests sensuality, but it carries a cleaner implication of an inclination to lustfulness or of a capacity for inciting lust
lewd desires
lewd thoughts
lewd glances
lewd dress
tales that... are Rabelaisian
boasted of his pornographic life marked by indifference to moral restraints; it often implies freedom from restraint comparable to that of animals, thereby connoting lassitude, incapacity for faithfulness or seriousness, or a generally unmoral attitude
implies habitual indulgence of one's lust, the term often suggests sensuality, but it carries a clearer implication of lasciviousness
implies moral irresponsibility or a disposition or way of life marked by indifference to moral restraints; it often suggests freedom from restraint comparable to that of animals, thereby connoting lassitude, incapacity for faithfulness or seriousness, or a generally unmoral attitude
implies a playing fast and loose, not only in statements but in dealings; it often specifically implies prevarication, equivocation, or the making of promises one does not intend to keep
and be these juggling fiends no more believed that palter with us in a double sense—Shak.
caroline, don't go back—don't palter with us—abide by your own words—Edgeworth
Fib (see also lie n) may be used as a euphemism for lie; but it more often implies the telling of an untruth that is trivial either in matter or in significance
she was given to fibbing about her admirers
the child fibs when he thinks he can gain something by it
she didn't like Janet. She fibbed, she said, and was a telltale—Glasgow
Ana *deceive, delude, mislead, beguile
lie n
lie, falsehood, untruth, fib, misrepresentation, story are comparable when they mean a statement or declaration that does not conform to the truth. Lie is usually felt to be a term of extreme opprobrium because it implies a flat and unquestioned contradiction of the truth and deliberate intent to deceive or mislead you told a lie; an odious, damned lie—Shak.
his decent reticence is branded as hypocrisy, his circumlocutions are roundly called lies—Maugham
Falsehood may be both less censorious than lie and wider in its range of application. The term need not imply sinfulness or criminality, for it applies not only to lies (told two flat falsehoods about what had happened in secret session—Davis) but to such fictions as literary fictions, polite fictions, and legal fictions and then contrasts most directly with fact (a man's entire life may be a falsehood, while with his lips he may not once directly falsify—F. N. Scott & J. V. Denney)
Like lie, the term implies known nonconformity to the truth, but unlike lie, it does not invariably suggest a desire to pass off as true something known to be untrue
Falsehoods which we spur nowadays were the truths of long ago—Whittier
Untruth is often euphemistic for lie or falsehood and may carry similar derogatory implications (his report was riddled with inaccuracies and untruths) or it may be selected because of mitigating circumstances (told you untruths yesterday morning merely to cheer you up—Bennett)
Sometimes, however, untruth may apply to an untrue statement made as a result of ignorance or a misconception of the truth (so far as he knew he had never told an untruth) the traditions and the untruths our cultural fathers have sometimes told us—La Barre
Fib is an informal or childish term for a trivial falsehood; it is often applied to one told to save one's own or another's face (not that I couldn't tell a downright fib if I had to... but a lie is to me just as silly a performance when it is about marriage or work as about the law of gravitation—Mary Austin)
the trade in drama seems to be prosecuted in a world of perfunctory fibs which no one believes—Montague
Disrepresentation applies to a misleading and usually an intentionally or deliberately misleading statement which gives an impression that is contrary to the truth; the term implies glossing over defects or weaknesses (as in something offered for sale) or placing the emphasis upon details that highlight a character, an occurrence, or a train of events rather than on those that in reality marked it (Our guides deceived us with misrepresentations—Addison)
his duty to further the in-
terest of his client does not require him to employ any sort of trickery, chicane, deceit, or misrepresentation—Drinker> Story (see also ACCOUNT 2) in the sense relevant to this discussion is an informal term used chiefly by or with reference to children in place of any of the preceding terms, especially falsehood, untruth, and fib > boys who tell stories are likely to be caught
An> prevarication, equivocation, fibbing or fib (see corresponding verbs at LIE): mendaciousness or mendacity, untruthfulness, dishonesty, deceitfulness (see corresponding adjectives at DISHONEST)
Anti true — Con> veracity, verity, verisimilitude (see TRUTH)
life > biography, memoir, autobiography, confessions
lifeless > inanimate, * dead, defunct, deceased, departed, late
lift vb 1 Lift, raise, rear, elevate, hoist, heave, boost are comparable when meaning to move from a lower to a higher place or position. Lift often carries an implication of effort exerted to overcome the resistance of weight > lift a large stone > lift a pail of water from the ground > lift a child to one's shoulders but it may be extended to whatever rises high by natural or artificial means or processes > high lifted up were many lofty towers — Spencer > a high conical peak > lifted some four thousand feet into the sky — Kyne > to something immaterial that rises or is made to rise (as in spirit, in feeling, or in aspiration) > the news lifted a weight from his mind > he was lifted by his simple love of all creatures ... far above right and wrong — Webb> Raise may suggest less effort than lift, but it carries a stronger implication of bringing something to the vertical or to a high position for which it is fitted by nature or intended function; thus, one raises a pole by setting it on end, but one lifts it by picking it up; a flag is raised to the top of its staff, but it is lifted when held high enough to be seen > those arts which were destined to raise our Gothic cathedrals — Coulton> In extended use raise may imply a lifting to a higher level (as of worth, efficiency, or accomplishment) > the most whole-hearted attempt ever made to raise the individual to his highest power — Day Lewis> Rear is often used in place of raise > (the mast we rear — Pope) > (the maypole was reared — Irving) but, unlike raise, it can be used intrinsically with the meaning to raise itself or, in the case of a horse, to raise its forelegs > (the ... storm clouds reared on high — Millay) > (horses, rearing and prancing — Anderson) > Elevate may be used in place of lift or raise in certain collocations where it does not seem unduly formal or pretentious > (an eagle rising with wings elevated — Fox-Davie) > (meldole field pieces ... were elevated for range in even more slow and primitive ways — Wintringham) but, in general, the word suggests exaltation, uplifting, or enhancing > elevate a priest to a bishopric > elevate one's standards of literary taste > his renown sobered still higher. He had elevated the white man's name in Africa again — James Cameron> Hoist implies raising something heavy aloft, often by such mechanical means as a tackle > hoist a cargo into a ship > hoist a sail > Mrs. Malins was helped down the front steps by her son and Mr. Browne and, after many maneuvers, hoisted into the cab — Joyce> (it takes five power winches to hoist this mammoth expanse of canvas — Monsanto Mag.)> Heave implies a lifting upward or onward with strain or effort usually by impulse from without > a boat heaved high by a wave > a nature's way of creating a mountain peak — first the heaving up of some blunt monstrous bulk of
rumpled rock — Montague> Boost implies lifting by or as if by means of a push or other help from below, usually without the suggestion of strain or effort found in hoist and heave > boost prices > (friendly critics boosted the sales of his books) > (no matter how depressed he might be, a few cocktails always boosted his spirits) > David tenderly boosted Elimelech up the steps and through the door — Douglas> Ant rise, arise, ascend, levitate, mount, soar, tower, rocket, surge: > exalt, magnify, aggrandize: heighten, enhance, intensify
Ant lower — Con reduce, lessen, diminish, * decrease: * abase, debase, degrade, demean, humble, humiliate: * depress, weigh, oppress
light vb 1 Light, kindle, ignite, fire > basically mean to set something burning or on fire. Light (see also ILLUMINATE), when it takes as its subject the agent or agency, usually implies such an end of the action as illumination > she lighted the lamps or heating > he will light a fire in the fireplace or smoking > he lit his cigar > Kindle often connotes difficulty or slowness in setting combustible materials (as wood, straw, or paper) afire; it is therefore the appropriate word when what is to burn requires special preparation or does not at once burst into flame > using kerosene to kindle the damp wood > a carelessly thrown match kindled one of the worst forest fires in the state's history > bonfires were kindled on the top of every hill> Ignite is not only much more common in technical than in popular use but usually shows a difference in meaning. In technical use ignite sometimes implies heating of a substance until it glows or becomes incandescent > when the electric current is turned on, it ignites the tungsten filaments in the bulb but it more often implies the placing of a small flame or spark (as an electric spark) in direct or indirect contact with a flammable substance (as gasoline, fuel oil, or gunpowder) so as to produce its combustion > ignite the mixture in the cylinder of an internal-combustion engine > In more general use, ignite varies little from kindle except in being more frequently employed in reference to explosives or highly flammable substances. Fire suggests blazing and rapid combustion of what is set on fire; it is typically used in respect to something that lights easily and burns fiercely > a lighted match was sufficient to fire the haystack > the turnkey fired the little pile, which blazed high and hot — Dickens>
All of these words have extended use. Light in such use is purely a figure of speech > a quick animation lit her face — C. F. Cushman> while kindle implies an exciting, arousing, or stimulating > real intellectual interest ... can be kindled ... by a master who really loves and believes in his subject — Inge> > armies cannot be raised by nations or parties unless the rage of the people is first kindled by lies and name-calling — Kenneth Roberts> and ignite implies a stirring up into activity > that genius for igniting others essential to all great teachers — J. M. Brown> > the idea of the rising, of Irish freedom, of freedom everywhere ignites him and begins to consume him — S. R. L.> Fire implies an inspiring with strong passion, ardent desire, or intense zeal and is usually chosen when the agent or agency enables or induces energetic activity > the nations of Europe were fired with boundless expectation — Johnson> > the subject ... had fired her imagination — Jan Struther>
2 lighten, * illuminate, illumine, enlighten, illustrate

vb lighten
*alight, land, perch, roost
vb lighten
Ana buoyancy, resiliency, elasticity, effervescence, expansiveness (see corresponding adjectives at ELASTIC): gaiety, liveliness, vivaciousness or vivacity (see corresponding adjectives at LIVELY): lightheartedness, cheerfulness (see corresponding adjectives at GLAD)
Ant seriousness —Con graveness or gravity, earnestness, sobriety, sedateness, staidness, somberness (see corresponding adjectives at SERIOUS)
like vb Like, love, enjoy, relish, fancy, dote are comparable when meaning to be so attracted to a person or thing as to regard him or it with favor. Like (opposed to dislike), the most general and, especially when unqualified, the most colorless of these words, means merely to regard with favor or without the slightest aversion. Therefore, it is chiefly used in reference to persons or things that are pleasing but evoke no great warmth of feeling or urgency of desire (Sumner whom I admire and dislike; and Shaw of Dunfermline whom I like but do not admire—Laski) Arn, having been poor, liked money and knew the value of it—Osbet Sitwell) Hawthorne liked to sit in barrooms; Thoreau would have enjoyed doing so, but not at crowded inns, as farmers, and fishers on the river—Canby Love (opposed to hate) implies not only longing liking but ardent attachment and is therefore used with reference to persons or things that arouse the deeper or higher emotions; thus, one likes his neighbors but loves his family; one likes the open country but loves his native land (I like a church; I like a cow; I love a prophet of the soul—Emerson) this peculiar, brooding woman, who loved best in life the sorrow and high seriousness of things—Ballett Love also is often used with reference to trivial objects as an informal intensive of I love ice cream (old Sarah Battle loved a good game of whist—Lamb) Enjoy implies a liking or loving that awakens deep satisfaction and keen delight which may be sensuous or intellectual or often a mingling of the two (we had written our first stories together . . . and together enjoyed the first sweets of success—Rose Macaulay) no one but Molny and the Bishop had ever seemed to enjoy the beautiful site of that building,—perhaps no one ever would. But these two had spent many an hour admiring it—Cather (it is this specific quality, the power of enjoying things without being reduced to the need of possessing them, which differentiates the aesthetic instinct from other instincts—Ellis) Relish implies a liking, or sometimes an enjoyment, that arises because the thing relished meets one's approval, satisfies one's taste, or gives one peculiar gratification (his fine taste taught him to relish the beauties of Virgil and Cicero—Halle) a few hundred (not more) choice-loving connoisseurs relish him as the most perfect opportunist in prose—Morley) Fancy (see also think 1) implies a liking for something that corresponds to one's imaginative conception or sometimes one's ideal of what it should be (I never yet behold that special face which I couldn't fancy more than any other—Shak) he should have yachts, horses, whatever he fancied—Meredith) or for something that appeals to one's taste or one's eye especially at the moment (while she was ill, she fancied only the most delicate of foods) Dote, with on or upon, implies an infatuation or a foolish excessive liking or fondness (you dote on her that cares not for your love—Shak) he doted on his daughter Mary; she could do no wrong—Havighurst) Like love it may be used as an informal intensive of like (two peoples, both of whom love palaver and dote on uproar—Monroe) he dotes on bland horrors in food—Liebling)
Ana prefer, *choose, select, elect: admire, esteem, repect, regard (see under regard n); *approve, endorse:

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
like

appreciate, comprehend, *understand

Ant dislike—*Con *hate, abhor, detest, abominate, loathe: *despise, contain, scorn, disdain

like adj. Like, alike, similar, analogous, comparable, akin, parallel, uniform, identical are comparable though seldom strictly synonymous terms which describe the relation between things or persons that closely resemble each other. Like is a general word indicating resemblance or similarity ranging from virtual identity in all characteristics to a chance resemblance in only one (the children were very like) (their finest intuitions may... prove convincing only to himself, or to a limited circle of like minds—*Times Lit. Sup.) Like is similar to like but is less likely to be used for the chance, farfetched resemblance and is generally limited to use in a predicate or postposed situation after a compounded substantive modified (their resemblance as brother and sister... they looked utterly alike—Sinclair Lewis) (they were strikingly alike in gifts and tastes—Starr) Similar often stresses the likenesses between different things, implying that differences may be overlooked or ignored for a time (Virginia creeper or the deceptively similar poison ivy—*Amer. Guide Series: Md.) (regard the attraction which illusion has for us as similar to that which a flame at night has for a moth—Cohen) (this is not to say that the quarterlies are all alike. But they are as similar as the generation of young writers who contribute to them—*R. B. West) Analogous calls attention to the presence of some likeness which makes it feasible or permissible to draw from it an analogy, a sustained or appropriate comparison (the two new states would have a position analogous to that of British Dominions—Manchester Guardian) (quite analogous to the emotionalizing of Christian art is the example afforded by the evolution of the Latin hymn—H. O. Taylor) Comparable implies a likeness on one point or a limited number of points which permits a limited or casual comparison or matching together (the Syrians... with Arabian coffee, served thick and strong in tiny cups, as a national drink comparable to the Englishman's tea—Amer. Guide Series: R.I.) The word is especially likely to be used in connection with considerations of merit, standing, rank, or power (neither in military nor industrial terms is China comparable to the other three great powers—Dean) Akin, limited to use in postpositive situations, indicates an essential likeness, often of the sort of likeness found in kinship or suggestive of common descent from an original ancestor, prototype, or ancestral stock (the Mongols of Outer Mongolia... are akin to those of the neighboring Buryat-Mongol A.S.S.R.—Foreign Affairs) (real nursery tales, akin to Brer Rabbit—Times Lit. Sup.) (science... is akin to democracy in its faith in human intelligence and cooperative effort—Muller) Parallel stresses the fact of similarities over a course of development throughout a history or account or the fact of resemblances or likenesses permitting a setting or bracketing together as though side by side (the almost parallel growth of the Twin Cities—Amer. Guide Series: Minn.) (parallel to the classic and academic Italian school was one with a more distinctive native feeling—Manship) (parallel to the powers of the king were the powers of the father in the individual household—Linton) Uniform suggests a likeness and similarity throughout and a lack of noticeable variation wherever things in question occur or operate (one of the most fundamental social interests is that law shall be uniform and impartial—Cardozo) (schools... no longer expect all children to learn to read at a uniform rate—Education Digest) Identical indicates either the fact of being the same person or thing or, in connection with things copied, reproduced, or repeated, an exact correspondence without detectable or significant difference (George Eliot and Mary Ann Evans were identical) (the interests of workers and their employers were not altogether identical—Cohen) (his home life and his life as a man of letters are never identical—Canby)

Ana equivalent, equal, *same, selfsame, identical: cognate, allied, *related

Ant unlike—*Con *different, diverse, divergent, disparate, various: dissimilar, distinct (see corresponding nouns at DISSIMILARITY): discrepant, discordant, *inconsonant, inconsistent

likely 1 *probable, possible

Ana credible, believable, colorable, *plausible: reasonable, *rational

Ant unlikely—*Con *doubtful, dubious, questionable, problematic: *certain, inevitable, necessary

2 *apt, liable

likeness, similarity, resemblance, similitude, analogy, affinity are comparable when they denote agreement or correspondence or an instance of agreement or correspondence in details (as of appearance, structure, or qualities) brought out by a comparison of two or more things. Likeness commonly implies closer correspondence than similarity, which often applies to things which are merely somewhat alike (thou shalt not make thee any graven image, or any likeness of any thing that is in heaven above—Deut 5:8) (yes, I should have known you anywhere from your likeness to your father—Archibald Marshall) (Zaza is an old woman, while you, princess, still have youth and beauty. Nevertheless, the likeness is positively amazing—Robert Standish) (certain insects escape danger by their similarity to plants—Lubbock) (great works of art have a decided similarity to great human beings— they are both three-dimensional—Hartford) Resemblance suggests especially similarity in appearance or in superficial or external qualities (it would be as difficult to discover any resemblance between the two situations as between the appearance of the persons concerned—Wharton) Similitude, which is somewhat infrequent and bookish, is occasionally preferred to likeness or similarity when an abstract term is desired (the law which reconciles similitude and dissimilitude, the harmony of contrast—Reed) (all medieval variances of thought show common similitudes—H. O. Taylor) Analogy distinctively implies comparison of things which are unlike, not only specifically or generally, but often even in substance or essence, and it more often draws attention to likeness or parallelism in relations rather than in appearances or qualities. Philosophically, it suggests such assumptions as that similar causes will produce similar effects or that what is true in one order of existence must be true in another (three principal types [of ants] offering a curious analogy to... the hunting, pastoral, and agricultural stages in the history of human development—Lubbock) (such senile efforts to penetrate... the mystery of religion... have a real analogy to that final effort of the emotionally starved to grasp at love which has been called "old maid’s insanity"—Ellis) Affinity adds to resemblance the implications of such a relationship as natural kinship, temperamental sympathy, similar experience, or historical influence, which is responsible for the likeness (in Keats, there are... phrases and paradoxes that have surprising affinities with Taoist thought—Binyon) (his face... had a curious affinity to the faces of old sailors or fishermen who have lived a simple, practical life in the light of an overmastering tradition—Galsworth) Ana equivalence, equality, sameness, identicalness or identity (see corresponding adjectives at SAME): agree-
likewise

Analogous words: Analogousness, comparability, uniformity, parallelism (see corresponding adjectives at LIKE)

**Ant** unlikeliness—**Con** *dissimilarity, difference, divergence, discrepancy, distinction

likewise *also, besides, moreover, furthermore

**limb** bough, branch, *shoot

**limb** adj *supple, lithe, lissome, lissom

**Ana** plant, pliable, *plastic: flexible, *elastic, resilient, springy

**Con** *stiff, inflexible, rigid, tense, stark, wooden

**limit** n Limit, bound, confine, end, term are comparable when they mean an actual or imaginary line beyond which a thing does not or cannot extend. Limit is the most inclusive of these terms because it carries no necessary implication of number, that always being suggested by the context; thus, a thing (as a man's strength, the extent of his authority, or the reach of his arm) may be said to have a limit, implying one only; some other thing (as a race course, a lifetime, or a period of time) may be said to have its limits, but since linear extent and duration are specifically implied, these limits are by implication two in number. The limits of a room are usually its four walls; nightingales will not pass their limits; they seem to have a marked-out range as strictly defined as the lines of a geological map—Jeffreys. Also, limit may be applied to a line which is fixed by nature or inner necessity, established by authority, or determined by agreement (within the limits of human reason). The limit of the fisherman's catch is determined by the state game laws. Lives within the limits of his income. Determine the limits for the treatment of a topic. The limits of Santanyana as a poet . . . are the restraints of an academic habit—Edman. Bound and confine, on the other hand, are applicable to only one of the limits that comprise the real or imaginary boundaries of a thing. Both terms are used chiefly in the plural, even when the boundary line is continuous and forms a circle or only one side; the same is true of a bounding surface that forms a sphere (within the bounds of the earth; thirty bonfires could be counted within the whole bounds of the district—Hardy). The western confines of China. Within the confines of our subject. The furthest confines of the family property—Menen. The distinctions between these two words are not always apparent; however, bounds usually indicates a point of view from within and suggests restriction, and confines indicates a point of view either from within or without and suggests enclosure (the book passes beyond the bounds of decency; how they behaved in their spare time, nobody cared, and few knew . . . . They had no bounds to respect—Frodé). Strain the confines of formal monogamous marriage—La Barre. End (see also END 2; INTENTION) applies usually to one of the two uttermost limits or extremes of a thing; this use is chiefly found in idiomatic phrases (travel to the ends of the earth) but it occurs also in reference to either extreme in an ascending or descending scale, or in a series that progresses from one extreme to its diametrical opposite (at one end of the social scale there is the outcast or the pariah; at the other end, the elite) (admired from one end of Europe to the other—Andrews). Term applies usually to a limit in duration (neither history nor archaeology has yet put a term to Roman civilization in London—William Page). Limitation, restriction, circumscription, confinement (see corresponding verbs at LIMIT): *border, margin, verge, edge, rim, brim, brink

**limit** vb Limit, restrict, confine mean to set or prescribe the bounds for a person or thing. Limit usually implies the predetermination of a point (as in time, in space, in quantity, in capacity, or in production) beyond which the person or thing concerned cannot go or is not permitted to go without suffering a penalty or incurring undesirable consequences (limit the speed of automobiles to 45 miles an hour outside of towns and cities). Limit the time allowed for the erection of a building to one year from the date of the signing of the contract. Limit the acreage planted with potatoes. Limit a day's work to five hours. The great point . . . on these sacred occasions was for each man to strictly limit himself to half-a-pint of liquor—Hardy. The Constitution limits his functions in the law-making process to the recommending . . . and the vetting of laws—Current History. But limit may also be used with reference to a bound or bounds not predetermined but inherent in a situation or in the nature or constitution of a thing (the soil limited their crops). A lonely young girl limited . . . by the absence of companionship—Handlin or brought about as desirable by conscious effort or by full choice (medical science knows how to limit these evils—Eliot). Limited his aspirations to the search for the attainable—Restrict, in contrast to limit, suggests a boundary that encircles and encloses rather than a point that ends; the term therefore often applies to something which can be thought of in the terms of the space, territory, or field that it covers. The word often also connotes a narrowing or tightening (restrict the powers of a court). Restrict the freedom of the press; restricted his diet on orders from his physician; the bureau was dismembered, its staff dispersed, and its appropriations for research restricted almost to the vanishing point—Heiser. Combinations have arisen which restrict the very freedom that Bentham sought to attain—Justice Holmes. Circumscribe differs from restrict in that its implication of an encircling or enclosing boundary is always clear; consequently, it is often preferred to restrict when the idea of being kept within too small an extent or range is to be stressed (people . . . think that the emotional range, and the realistic truth, of drama is limited and circumscribed by verse—T. S. Eliot) or when there is the intent to suggest a distinct, complete, but limited whole and its apartness from all that surrounds it (to undertake here to inquire into the degree of its necessity, would be to pass the line which circumscribes the judicial department—John Marshall). The world to which they belonged and for which they worked was strictly circumscribed and complete within itself—Binyon. Confine may imply limitation, restriction, or circumscription, but it usually emphasizes the bounds which must not or cannot be passed; consequently, it often suggests severe restraint or restraints and carries connotations such as those of cramping, fettering, hampering, or bottling up that are not often present in the other words (now I am cabin'd, cribb'd, confined, bound in to saucy doubts and fears—Shak.). The distinction between a government with limited and unlimited powers is abolished, if those limits do not confine the persons on whom they are imposed—John Marshall. It is not desirable to confine knowledge to whatever can be put into a useful shape for examinations, drawing rooms, or the still more pretentious modes of publicity—T. S. Eliot. We are confined to our senses for perceiving the world—Darrow.

**limp** vb *represent, depict, portrait, delineate, picture

**limp** floppy, flaccid, flabby, flimsy, sleeky mean deficient in firmness of texture, substance, or structure and therefore unable to keep a shape or in shape. Limp applies to
something that lacks or has lost the stiffness or firmness necessary to keep it from drooping or losing its original sturdiness or freshness (collars limp with perspiration) (a limp body that seemed to have been poured into its clothes as if it were sand—Sitwell) (this body was danging in a most uncomfortable position, all loose and limp, and shapeless—Dickens) (squash-flowers hanging limp as widow’s weeds on the stringy stems—Britain) Floppy applies to something that sags or hangs limply (a dog with floppy ears) (foreigners—fortunately scarce—wear floppy ties, long hair and beards—Kinos) (an old lady in a . . . floppy garden hat—Greene) Flaccid implies a loss or lack of elasticity or resilience and therefore an incapacity to return to an original shape or condition or to keep a desired shape; the term applies primarily to flesh and other living tissues (flaccid muscles) (a flaccid stem) (now, in swift collapse, he was as flaccid as a sick hound and as disgusting as an aged drunkard—Bennett) In extended use the term implies lack of force or energy or substance (the style is . . . worthless, slipshod, flaccid—Wilde) (our flaccid culture—T. S. Eliot) (when a writer thinks clearly his prose itself is sharp and fresh, and when his thought becomes flaccid his words too become limp, mechanical and fogged—Krim) Flabby applies to something that is so soft that it yields readily to the touch or is easily shaken (her breasts had grown flabby and pendulous with many children—Buck) In extended use the term implies the loss or lack of what keeps a thing up or in good sound condition; it often carries suggestions of spinelessness, spiritlessness, or lethargy (the flabby government which was . . . incapable of defending its own interests—Owen Latimore) (very few . . . are worth converting. Their minds are intrinsically flabby and parasitical—Mencken) Flimsy applies to something that by its looseness of structure or insubstantiality of texture cannot hold up under use or strain (a wooden seat put together with nails—a flimsy contrivance, which defies all rules of gravity and adhesion—Jefferies) In extended use the term applies to whatever is so frail or slight as to be without value or endurance (a flimsy excuse) (the story is fashioned of such flimsy stuff that it almost tears apart in the telling—Krou) Sleazy applies especially to flimsy textiles, but it often suggests, as flimsy need not, fraud or carelessness in its manufacture (a sleazy dress) (thin sleazy woolens) In extended use the term may stress lack or inferiority of standards (a sleazy little gold digger—New Republic) (the sleazier forms of competition—Fortune) or inferiority of the resultant product (sleazy new apartment blocks, their broken, rubble-salvaged back unfurnished—Flora Lewis) but often its suggestion is one of cheap shabby inferiority (a sleazy piece of the old, tedious reality—Mary McCarthy) (a stammered, sleazy chronicle, told by fits and starts—Time) Ana (loose, slack, relaxed, lax: limber, *supple Con (stiff, rigid, inflexible, stark, wooden, tense: *firm, hard, solid: brittle, crisp (see fragile) limpid (clear, transparent, translucent, lucid, pellucid, diaphanous Ana (pure, sheer: lucid, perspicuous, *clear Ant turbid —Con muddy, roily (see turbid): *obscure, vague, dark: murky, dusky (see dark) line n Line, row, rank, file, echelon, tier are comparable when meaning a series of things arranged in continuous or uniform order. Line means little more than this, except when it is attached to a specific application that increases its implications; thus, a line of type may equal a line of poetry, but there is a wealth of implication in the second that is absent from the first (a line of trees) (soldiers fall in line) (the crowd formed a line in front of the ticket office) (there were three lines of enlisted men awaiting examination by physicians) (a line of trading posts from the Mississippi . . . across the Rocky Mountains—Irving) Row may suggest one line or one of several parallel lines; it is applicable to lines composed of persons or of things whether they range horizontally or vertically or abreast or away from one (a row of trees lines the south side of the street) (rows of seats in a theater) (the shrubs are arranged in rows) Rank and file are found chiefly in military use, rank denoting a row of men side by side, file a row of men one behind another (march in single file) (the front rank was ordered to take one pace forward) The conjoined use of these terms in rank and file is an idiomatic extension meaning the masses of men as distinguished from their leaders or rulers. Echelon usually implies a regular arrangement or formation in which each unit (as one of a series of parallel ranks of troops or one of a fleet of vessels headed in the same direction) is a little to the left or to the right of the unit immediately behind. Tier applies to one of a set of rows arranged one above another; it occasionally refers to persons but usually deals with parts of a structure or framework which are repeated (the seats rise in tiers in the great Opera House) (three tiers of arches rose on each side of the cathedral’s nave) (their mountain-like San Philip [a Spanish warship] . . . with her yawning tiers of guns—Tennyson) Ana *succession, progression, series, sequence, chain line vb Line, line up, align, range, array mean to arrange in a line or in lines. Line, or more often line up, implies setting in single file or in parallel rows (line up prisoners for identification) (line up troops for inspection) (four or five men were lined up at the bar—Basso) Align stresses the bringing of points or parts that should be in a straight line into correct adjustment or into correspondence (align the lenses of a telescope) (align the front and rear wheels of an automobile) (align type in printing) (the tents were aligned in two rows—Mailer) Range stresses orderly or correct disposition, sometimes merely in straight or parallel lines, but more often with the added implication of separation into groups or classes according to some plan or design (oaken benches ranged in seemly rows—Wordsworth) Array implies actual formation in order, especially battle order, and therefore suggests full equipment and readiness for action (there is a great Field-Marshal, my friend, who arrays our battalions; let us to Providence trust, and abide and work in our stations—Clough) (scarce had time to array his men at the townward wall before arrows, stones, and heavy javelins . . . began to fall upon them—A. C. Whitehead) These words also are comparable in extended use. Line up stresses organization for unity or singleness of effort (line up the opponents of a measure to achieve its defeat) (line up public opinion in favor of a proposal) (lined up on the side of those who oppose even attempting to set up peaceful coexistence with Russia is the FBI for the week) Align is commonly used reflexively in this connection and implies falling into line or into a lineup (at the beginning of World War I France, England, and Belgium aligned themselves with Serbia) (so long as the symptoms failed to align themselves with any known disorder, they were supposed to be amenable to neighborly advice—Mary Austin) Range implies putting or falling precisely into a group (as a class, party, rank, or category); it may suggest alignment but more often connotes partisanship or alliance or, when used of things, susceptibility of classification (tis better to be lowly born, and range with humble lives in content—Shak) (they differed violently and ranged themselves into distinct schools of thought—Dinsmore) Array in its extended use retains its implication of
lineage 503 liquid

orderly formation; it sometimes also suggests arrangement in logical or chronological order, or as parts of a design. These doubts will be arrayed before their minds—Farrar. More often, however, it stresses the impressive or imposing character of an opposition (several of the best legal minds were arrayed against the prosecution) so much prejudice of one kind or another was arrayed against it that it was not till nearly two hundred years after its discovery that saltpeter became the god of war—Encore.

Ana: marshal, arrange, *order

Con: derange, disarrange, *disorder, disturb: disperse, dissipate, *scatter

lineage *ancestry, pedigree

lineal, linear share the basic meaning of or relating to a line or lines, but they are clearly distinguished in their specific senses. Lineal is more often applied to a direct line of succession from or to a common ancestor either physical or spiritual, and is often distinguished from collateral: thus, the lineal descendants of a man would include all his sons and daughters, all his grandsons and granddaughters, all his great-grandsons and great-granddaughters, etc. George Washington had no lineal kinsmen to inherit his property, for he had no children. These men, the lineal descendants of the mystics, found the source of certainty in inner experience, in feeling and instinct—Thilly. Linear tends to lay the stress on a relation to a line other than a line of succession, either in fact or in likeness; often it suggests a relation to something having or felt as having one dimension only, usually length, especially in contrast to what has two or more dimensions (linear measures such as the inch, foot, yard, and rod are used in measuring lengths (as of cloth, rope, poles, wire, and edges or bounds). From the linear dimensions of a room we can compute the square feet of floor to be covered. A conductor of electricity (as a wire) which is very small or negligible in two of its dimensions, is called a linear conductor: atoms which are so small that it takes one hundred millions of them lying side by side to extend one linear inch—Darrow. The longest linear structural features on the earth's surface are the east-west fracture zones of the northeast Pacific Ocean—Malahoff, Strange & Wollardy.

line up *line, line, range, array

linger tarry, wait, *stay, remain, abide

Ana: *delay, procrastinate, loiter, dawdle, lag

link vb connect, relate, associate, *join, conjoin, combine, unite

Ana: concatenate, articulate, *integrate: tie, bind

Ant: sunder—Con: *separate, part, sever, divorce

liquefy, melt, deliquesce, fuse, thaw are comparable when they mean to convert or to become converted to a liquid state. Liquify, the general term, is applicable not only to solids but also to gases (liquefy oxygen and nitrogen). Liquefy a solid mass of ice; jellies liquefy if exposed to the air in a warm room. Melt basically implies slow liquefaction, usually through heat; the term commonly suggests a softening, a loss of shape, and a running consistency: butter melts in a warm room. Melt wax in a candle flame. In its frequent extended use melt is applied to masses that are gradually dispersed or grow thinner or more tenuous and finally disappear mountains beyond mountains melting away into remote sky—Binyon or to persons or their emotions or reactions that grow softer, gentler, or more tender (one whose subdued eyes, albeit unused to the melting mood, drop tears as fast as the Arabian trees their medicinal gum—Shak.) Romeo and Juliet the profounder dramatist shows his lovers melting into unconsciousness of their isolated selves—T. S. Eliot. I cannot look up to your face. You melt my strength—Lowell or to tones, colors, and sounds that have a liquid quality and merge imperceptibly with others (snow-light cadences melting to silence—Keats). Substance and shadow melted into each other and into the vastness of space—Glaspell. Deliquesce implies a disappearing by or as if by melting away and applies especially to gradual liquefying through exposure to the air and the absorption of moisture from it (hygroscopic salts that deliquesce in moist air) or to plant structures (as mushrooms) that liquefy in their decay a great display of specimens [of fungi] that presently dried up or deliquesced and stank—H. G. Wells. In its extended use deliquesce stresses loss of coherence rather than disappearance. Flaubert's instincts were less epical than lyrical, and drama itself was deliquescing into indeterminate forms—Levin. Their lives tended to deliquesce into a murmuring indefiniteness of language—Matthiessen. Fuse (see also mix) may sometimes replace liquefy or melt (thunderstorm had fused the electric mains—Finlay) but more often it stresses union (as of two or more metals into an alloy) by or as if by the action of intense heat foundries which fuse zinc and copper into hard, bright brass—Newspweek. In its extended use, too, fuse stresses union a ship, itself a little community in which people of various backgrounds are temporarily fused—Felix Morley. The strata fused together by heat—Livingstone. Thaw may specifically replace melt in reference to something (as ice or snow) that is frozen or in extended use to something (as a cold heart, a cold disposition, or extreme reserve) equally stiff or rigid (the midday sun has thawed the ice on the roads) a lady . . . whose very looks would thaw a man more frozen than the Alps—Shirley. A native reserve being thawed by this genial consciousness—Hawthorne.

liquid adj Liquid, fluid are comparable both as adjectives meaning composed of particles that move easily and flowingly and change their relative position without any perceptible break in their continuity and as nouns denoting a substance composed of such particles. Both terms imply an opposition to solid, but liquid is the more restricted in its application, for the term implies the flow characteristic of water and refers only to substances which, like water, have a definite volume but no independent form except such as is temporarily given by their container: such potable liquids as water, milk, and wines blood does not remain liquid long after removal from the blood vessels. Fluid, on the other hand, implies flow of any sort and is applicable not only to all liquids but also to gases, which, unlike liquids, have neither independent volume nor shape air whether in the gaseous or liquid state is a fluid fluid blood. Fluid is especially appropriate for referring to a substance that is highly viscous: molasses is a fluid substance or to one liquefied (as by melting, dissolving, or saturating with water) fluid rock fluid wax mud is fluid earth. In extended use fluid is opposed to rigid, fixed, unchangeable open societies of which the boundaries are fluid or indefinite, such as humanity or even the League of Nations—Alexander emotion, formless, chaotic, fluid in itself—Lowes. In London all values and all meanings were fluid—Rose Macaulay. Liquid, on the other hand, often implies an opposition to harshness liquid tones: thy liquid notes that close the eye of day—Milton but it sometimes implies transparency or extreme softness or both his liquid glance—Wharton: with what liquid tenderness she turned and looked back—

Ana: analogous words

Ant: antonyms

Con: contrasted words

Bennett> In financial circles, where both terms are used, fluid may distinctively apply to money or funds that are not permanently invested or that are constantly in circulation (the fluid gold of international trade) but more often the terms are used interchangeably to imply the quality or condition of assets that are in the form of money or are easily convertible into money and are therefore readily available for another use. Ant solid: vaporous

liquid n fluid (see under LIQUID adj) Ant solid: vapor

lissome lissomes, lithe, *supple, limber Ana & Con see those at LITHE

list n List, table, catalog, schedule, register, roll, roster, inventory denote a series of names or of items written down or printed as a memorandum, a record, or a source of information, but, because of wide differences in their range of application, they are not freely interchangeable. List is the most comprehensive and the most widely applicable of these terms since it may or may not apply methodical arrangement (as in alphabetical or chronological order) and it may itemize units of various kinds (as persons or objects or facts or words or figures) (a grocery list) (a list of invited guests) (price list) (an engagement list) Table is also widely applicable, but it distinctively implies arrangement in an order that will assist the person who makes use of it in quickly finding the information he desires; consequently, it usually suggests presentation of items in columns, often, when the items are related or associated with each other, in parallel columns; thus, a table of weights may give in the first column an alphabetical list of the weights of all countries and add in the following columns, directly on a line with each of these names, the place in which it is used, its equivalent in American or British weights, and its equivalent in metric weight (a table of contents of a book) (a table of logarithms) (annuity tables) (a timetable of trains) Catalog basically applies to a complete list or enumeration of all instances of a kind (a catalog of the Lepidoptera of Michigan) (a catalog of the popes) The term is used more often of an informative itemized descriptive list (as of the books in a library, the works of art in a museum, the courses given in a university or college, or the articles for sale by a company). Because business, educational, and art catalogs often contain much other information of value, the term often loses its essential meaning of list, although these catalogs have usually for their main object the presentation of complete lists. Schedule (see also PROGRAM) applies especially to an itemized statement of particulars, whether it is appended to a document (as a bill or statute) to provide supplementary details (Schedule D of the tariff bill) or is separate (a schedule of a bankrupt's debts) (a schedule of assets and liabilities) Register is applicable primarily to the official book, parchments, or papers in which are entered the names or titles of persons or items of a specific character, together with pertinent details, for the sake of maintaining a record (a register of births) (a register of marriages) (a register of seamen) Since, however, these entries constitute not only a record but also a list or catalog, the term often more strongly suggests an official listing or enumeration than a series of entries (this name is not in the register of voters) Roll is applicable to a list and especially an official list of the names of those who belong to a certain group or force; thus, a muster roll includes the names of all the officers and men of a military body or of a ship's company present or accounted for on the day of muster; a class roll is a list of all students belonging to a class. Roster, which is chiefly a military term, applies basically to a table containing a roll of officers and men or sometimes of units and specifying such matters as the order of their rotation in duties or their special assignments. Inventory is a catalog of the goods and chattels and sometimes the real estate held by a person or a corporation at a particular time (as at the person's death or at the stocktaking of the corporation) (the merchant makes an inventory of his stock annually on January 15th) In extended use the term often refers to a list similar in its details to those of a true inventory (nothing short of an authentic passion for concrete detail ... can give the saving gusto and animation which carry off safely the long inventories of utensils and articles of food and attire in Scott and Defoe—Montague)

lively adj Lively, animated, vivacious, sprightly, gay denote in common keenly alive. Lively suggests especially briskness, alertness, or energy (spent an hour in lively talk about their respective travels in England and France) (she ... was a lively conversationalist, advanced, original —Gore) (the horses ... were lively, and sprang about the street—Thackeray) Animated applies especially to what is also spirited or bright (was not nearly so animated as he had been in his pre-khaki days; there was a quiet exultation in his manner rather than a lively excitement—H. G. Wells) (the animated excitement and hubbub that gives the ... institution its friendly vitality—Saarinen) Vivacious and sprightly suggest greater lightness of spirits or quickness of wit; they apply especially to manner or language (remember her as very pretty and vivacious ... I never met a girl with as much zip—Ring Lardner) (in contrast to the dour, lethargic, and solitary orang, the chimpanzee is highly active, vivacious ... and uninhibitedly vocal—La Barre) (he was sprightly, vigorous, fiery in his belief in success—Crane) (readers prefer sprightly trash to dull excellence—Canby) Gay implies utter carefreenss and exuberant or overflowing spirits (wild with joyful

living

livid ashen, ashy, *pale, pallid, wan

* ASA living, alive, animate, animated, vital mean

living adj Living, alive, animate, animated, vital mean endowed with or manifesting life. In their primary senses where life means that character or quality which is peculiar to things that are capable of growth, reproduction, and, often, motion and which is lost by death, they come very close to each other. Living and alive are opposed to dead and, therefore, are applied to organic bodies which have life as distinguished from those from which life has departed; they are distinguishable chiefly by the fact that alive follows the noun it modifies either directly or as a prepositional adjective (among living men) (among men still alive) (all living things) (of all it ever was my lot to read, of critics now alive, or long since dead—Cowper) (our appreciations of living or dead writers—T. S. Eliot) Animate is opposed to inanimate and is applied to living organic bodies as contrasted with dead organic bodies or, more often, with inorganic bodies having no capacity for life (those who ignore the natural world around, animate and inanimate—Spencer) Animated (see also lively; compare animate under quicken vb) is opposed to lifeless or inert, and may apply to something which, once devoid of life, becomes alive (viruses that may behave as animate bodies or as lifeless crystals) or may be used to perfect a comparison of something by its nature lifeless with something living (a large Australian phasmid popularly known as the animated stick) (the moral relativism engendered by the notion that man is nothing more than an animated machine—Nagel) Vital is applied chiefly to qualities (as power, force, energy, or motion) which result naturally from or are associated with life in distinction from qualities which result from purely physical or chemical causes (vital functions) (it derived its growth and movement from its internal vital force, not from external sources of energy—S. F. Mason)

When these words are applied to things which have not life in the sense defined, they form other groupings. All, however, stress qualities suggestive of life. Living usually suggests continued or continuous existence with no diminution of activity or efficacy (a living principle) (a living force) (ballet as an art form was living and not dead—Coleman) Alive and vital are very close in their emphasis on abundance of vigor, on capacity for development, or on powers of endurance; both are applicable to persons as well as to things (we are not sufficiently alive to feel the tang of sense nor yet to be moved by thought—Dewey) (Queen Victoria remains . . . one of the most absorbing figures of her time. Obviously she is still enough to be condemned—Times Lit. Sup.) (the veterans insist that college be made alive, dynamic, vital—Fine) Alive and animated often imply the presence of living things in great numbers (the stream is alive with trout) (as animated as water under a microscope—Hardy) Animated also may stress endowment with qualities suggestive of life, especially motion (animated pictures) (an animated doll) (the animated signs that blink, bubble, and bedazzle visitors to Times Square—Fixx)

Ant dull —Con lethargic, sluggish, torpid: * languid, lackadaisical, listless, languorous: stolid, apathetic, phlegmatic, *impassive: tedious, *irksome, boring

vital adj Vital is opposed to lifeless —Con lifeless —Con lifeless —Con dead, defunct, deceased, departed, inanimate

living n Living, livelihood, subsistence, sustenance, maintenance, support, keep, bread, bread and butter are comparable when they denote the means, especially the amount of money or goods, required to keep one supplied with the necessities of life (as food, housing, and clothing) and sometimes also the nonessentials that with the necessities supply the needs of a full life. Living is perhaps the most general term since it may denote either the necessities and provisions with which one supports life or the income with which these may be obtained (had undertaken to work as a manager in return for a living and a share of the crops—Glasgow) (many of his other customers had gone . . . so that his own poor living was cut in impossible half—Malamud) (an industrial community, in which livings are insecure, incomes are inadequate—W. H. Hamilton) Typically it is used in a few simple idioms; thus, a man usually earns or makes or gets a or his living; he does something (as writing, spinning, or farming) for or a or his living; someone or something owes or provides him a living (I am quite pleased to make my living by what I write, but the attempt to write for my living would be hopeless, for I can write nothing that is not in itself a pleasure to me to write—Ellis) (men who start out with the notion that the world owes them a living—Sumner) Livelihood may be indistinguishable in meaning from living (the population derives its livelihood from farming—Americana Annual) (the livelihood of the people of Malaya has always been uncertain because of the narrow base of their economy—Langdon) (the profession is of necessity a means of livelihood or of financial reward—Maclever) but unlike the latter it may apply specifically to the means (as a trade, profession, or craft) by which one earns a living (education is a preparation for life, not merely for a livelihood, for living not for a living—Sampson) (it is their profession and livelihood to get their living by practices for which they deserve to forfeit their lives—South) (had a low opinion of politics as a livelihood—White) Subsistence may be a close synonym of living (Harbor Springs relies for its subsistence chiefly on the summer vacationist trade—Amer. Guide Series: Mich.) (between disappointment and expectation, is soon disgusted, and returns to pursue his more legitimate means of subsistence—Burroughs) but often it more specifically denotes means sufficient merely to maintain life and implies an amount of money or supply of goods that provides a person or his family with no more than basic necessities (as of housing, food, and clothing) (the question whether people on relief shall be provided only with subsistence) (only in the meanest and most limited sense is subsistence a standard of living—Harper's) Sustenance is often used in place of living when the emphasis is upon the food that is necessary not only to one's existence but to one's well-being (she was able to wring only a bare sustenance from his farm) (that thin layer of topsoil that . . . provides the sustenance for our growing population—K. D. White) But it is also often used to imply all the necessaries of life (it was the fur trade . . . which gave early subsistence) and vitality to the great Canadian provinces—Irving) Maintenance usually denotes either a complex of necessities such as food, lodging, and laundry, and sometimes clothing or the amount needed to supply such a complex (advertised . . . for a general resident doctor at $300 a
month and maintenance—Greer Williams> (enough to give him books, and a moderate maintenance—Cibber> (at least half of them are living parasitically on the other half instead of producing maintenance for themselves—Shaw> Support applies not only to the amount of money that provides maintenance but to the person who provides the means by which others are maintained (he is the sole support of his family) (they look for their support to him) (each son was expected to contribute to his own support—C. L. Thompson> Keep is a less dignified synonym of maintenance and is applicable not only to men but to animals (the horse is scarcely worth his keep) (hired men could no longer be had for ten or fifteen dollars a month and keep—White> Bread and bread and butter are synonyms—doches for living or sustenance, partly as a result of the use of the former in the Lord's Prayer "Give us this day our daily bread" (he is a fine poet, but he makes his bread and butter selling insurance)

load n Load, burden, freight, cargo, lading are comparable

are protected against shrinkage and leak-

from the houses, shacks, small mills and

refuse heaps along its banks—Amer. Guide Series: N.Y>

<bear ye one another's burdens—Gal 6:2> (his chief burden was a racking doubt of his own legitimacy—Wyndham Lewis> (a woeful burden of debts that plagued her—R. P. Randall> Freight applies to goods or merchandise in transit, especially long-distance transit (as by ship, railway train, or motor truck) (the wrecked truck spilled its freight over the road) Cargo applies specifically to freight carried by a ship or aircraft (a tramp ship carrying a cargo of grain) (the increasing use of airplanes for the shipping of valuable or perishable cargoes) Lading is chiefly a poetic or commercial synonym for freight or cargo (ladings are protected against shrinkage and leakage—Dun's Review)

load vb 1 *burden, encumber, cumber, weigh, weight, lade, tax, charge, saddle

Ana bear, convey, *carry, transport

Ant unload

2 *adulterate, weight, sophisticate, doctor

load vb *idle, lounge, loll, laze

Ana rest, repose, relax (see corresponding nouns at REST): *saunter, stroll, amble

Con work, labor, toil, travail (see corresponding nouns at WORK)

loath vb *disinclined, indisposed, averse, hesitant, reluctant

Ana *adverse, averse: *antipathetic, unsympathetic, adverse

Ant anxious —Con *eager, keen, avid: desiring or desirous, wishing, wanting (see corresponding verbs at DESIRE)

loathe abominate, detest, abhor, *hate

Ant dote on —Con *like, love, relish, fancy, enjoy;

*desire, crave, wish, want, covet

loathing abhorrence, detestation, abomination, hate, hatred (see under HATE vb)

Ana aversion, *antipathy: repugnance, repellency, distaste (see corresponding adjectives at REPUGNANT)

Ant tolerance

loathsome *offensive, repulsive, repugnant, revolt ing

Ana abominable, abhorrent, detestable, odious, *hateful: repellent, *repugnant, distasteful, obnoxious, invidious

Ant engaging, inviting —Con attractive, alluring, charming, enchanting, fascinating, bewitching (see under ATTRACT)

local adj *insular, provincial, parochial, small-town

Ana narrow, narrow-minded (see ILLIBERAL): circumscribed, limited, restricted, confined (see LIMIT vb)

Ant cosmopolitan

locality, district, vicinity, neighborhood denote a more or less definitely circumscribed place or region, especially from the point of view of those who live in it. Locality applies to a region of undefined boundaries, but it usually suggests an area round a center (as the place where the saver or other lives) or no longer resides in this locality or round a place remarkable for some event or landmark (the deliverer is to be sought in the locality nearest to the chief scene of the invasion—Stanley> District usually applies to a locality that has clearly defined boundaries determined (as by the nation, state, or town) for such purposes as for administrative and electoral use (representative of the Fifth Congressional District) (federal judicial districts) (police district) (postal district) In a less specific but in this instance more pertinent sense district is often applied to a locality with reference to some of its most obvious or clearly defined characteristics rather than to the exact area it covers (the agricultural districts of the United States) (the Lake District of England) (the mining district of Pennsylvania) (the theater district of a city) Vicinity never loses its basic implication of nearness but, since it suggests a distinct point of view, it applies only to the locality that is very near from that point of view (there are no ponds in this vicinity> Neighborhood usually carries an implied reference to one's neighbors and it may be preferred to vicinity, which it closely resembles in denotation, when the emphasis is on the inhabitants rather than on the locality referred to (there is no one of that name in this neighborhood> (lived in a good neighborhood> (she is on good terms with the entire neighborhood> However, it is frequently interchangeable with vicinity when the emphasis is on proximity; thus, a man might live in the neighborhood or the vicinity of a school (the country must be on guard against the establishment of hostile bases in its neighborhood)

Ana region, *area, zone, belt, tract: section, sector (see PART): territory, *field, bailiwick, province, sphere, domain

location *place, position, situation, site, spot, station

lodge vb 1 house, board, *harbor, shelter, entertain

Ana receive, take, accept, admit: accommodate, *contain, hold

2 *reside, live, dwell, sojourn, stay, put up, stop

lofty *high, tall

Ana elevated, raised, lifted (see LIFT): exalted, magnified, aggrandized (see EXALT): imposing, stately, august, majestic (see GRAND): sublime, glorious, superb (see SPLENDID)

Con lowly, *humble, modest
**logical**

**analytical, subtle** are comparable when they are applied to persons, their minds, their mental habits, or products of their reasoning and mean having or showing skill in thinking or reasoning. They are often used interchangeably or without clear distinction, but it is possible to employ them distinctively and with precision. **Logical** may imply the power to think according to the rules of logic and therefore in an orderly fashion; more often, however, it suggests the power to impress others that clearness of thought, soundness of reasoning, and freedom from bias underlie one's arguments, one's decisions, or one's policies (he had . . . the logical as opposed to the intuitive temper. He distrusted emotion for which he could not find a rational basis—Montague). <Keats . . . was a perfectly logical, straightforward, and unprejudiced thinker. His emotions might run away with him; his ideas, never—Lowell> **Analytical** stresses the power to simplify either what is complex or complicated (as by separating it into its constituent parts) or what is chaotic or confused (as by reorganization that shows the relation of the details to each other and the whole). In derogatory use it may imply a tendency to multiply subdivisions but in favorable or neutral use it connotes a power to systematize, clarify, and interpret, as distinguished from the power to create or invent (if a man is being purely analytical . . . the thing is then something to be classified, related to other things by cause and effect, or broken down into elements—Pepper). <his mind was analytical rather than constructive—Scudder> **Subtle** stresses the power to penetrate below the surface and to perceive fine distinctions and delicate, almost imperceptible, relations (John Donne . . . one of the most subtle . . . intellects that ever, before or since, expressed itself through the medium of verse—Lowes). When applied to arguments its use may imply a criticism, such as being hard to follow because of being overreferred (it is a subtle and urbane, but none the less complacent, beggning of all the serious questions in the case—Cohen) <a subtle and intricate book which does not readily yield its full implications—Canad. Forum> Usually, however, it connotes extraordinary skill in reasoning or in analysis (that is a point of view which . . . would hardly have escaped the subtle intellect of the Greeks—Dickinson) <the actual facts have required for . . . their interpretation the most subtle speculations of modern science—Justice Holmes> <for subtle, acute analysis they cannot be matched in any earlier period—Muller>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
beauteous, pulchritudinous, good-looking

_An_ alluring, enchanting, charming, attractive (see under ATTRACT): *delightful, delectable: exquisite, delicate, dainty, rare (see CHOICE)

_Ant_ unlively: plain

_loving, affectionate, devoted, fond, doting_ are comparable when they mean feeling or showing love or strong liking.

_Loving_ stresses the inward emotion and usually implies sincerity and depth of feeling (a _loving_ father) _loving friends_ (looking at it with eyes at once critical and loving, as if recalling the glow with which he had created it—Galsworthy) _so we'll go no more a roving so late into the night, though the heart be still as loving, and the moon be still as bright—Byron_. _Affectionate_ often stresses demonstrativeness (she is a very _affectionate_ child) _he had an affectionate_ heart. _He must love somebody—Austen_ or implies the need for or fact of outward expression of inward feeling (his _affectionate_ care for his people was winning him love—Buchan). _Devoted_ emphasizes attentiveness, sometimes implying little more than assiduousness, sometimes connoting self-dedication or active loyalty to the person or thing one loves or likes (devoted lover) _devoted disciple_ (I did everything for him that the most _devoted_ mother could do—Shaw) _Fond_ implies affectionate attachment and often connotes foolish tenderness (a _fond_ husband is a very amiable character. A _fond_ one I think is not so—John Wesley) _her_ preoccupation with petty things of no importance whatever was worthy of the finest traditions of _fond_ motherhood—Bennett) _When fond_ (of) and _devoted_ (to) imply a strong predilection or addiction, they are not often clearly distinguished. However, one is _fond_ of the theater who welcomes every opportunity to see a play; one is _devoted_ to the theater who spends much of his time in seeing plays or in efforts to further the development of the drama. One may be _fond_ of the country and yet not go there often, but if one is _devoted_ to it, one prefers to spend most of one's time there. _Doting_ implies excessive fondness that leads to overindulgence in parents or fatuousness in lovers (doting mothers end by ruining their children—Hallam Tennyson)

_Ant_ unloving — _Con_ indifferent, unconcerned, aloof, detached: *cold, chilly, frigid: *faithless, false

_low* base, vile

_An_ abject, ignoble, *mean, sordid: *coarse, vulgar, gross, obscene, ribald: *crooked, devious, oblique

_Con_ decent, seemly, proper, *decorous: noble, *moral, ethical: _fine, high,

_lower vb_ slower, *frown, scowl, gloom

_An_ glare, stare, peer (see GAZE)

_lowly* meek, *humble, modest

_An_ submissive, subdued, *tame: retiring, withdrawing (see GO): reverential, deferential, obeisant (see corresponding nouns at HONOR)

_Ant_ pompous — _Con_ pretentious, ostentatious, _showy: _arrogant, lordly, overbearing, haughty, _proud

_loyal* faithful, true, constant, staunch, steadfast, resolute

_Ant_ disloyal — _Con_ false, *faithless, perfidious, traitorous, treacherous: disaffected, alienated, estranged (see ESTRANGE): rebellious, mutinous, seditious, *insubordinate, factious, contumacious

_loyalty* fidelity, allegiance, fealty, devotion, piety

_An_ trueness or truth, faithfulness, constancy, staunchness, steadfastness (see corresponding adjectives at FAITHFUL): *attachment, affection, love

_Ant_ disloyalty — _Con_ faithlessness, falseness or falsity, perfidiousness or perfidy, treacherousness or treachery, traitorousness (see corresponding adjectives at FAITHLESS)

_lubricate* grease, *oil, anoint, cream

_lucent* bright, brilliant, radiant, luminous, lustrous, effulgent, refugent, blazing, lambent, incandescent

_An_ glowing, blazing, flaming (see BLAZE vb): *splendid, resplendent, glorious

_lucid* 1 pellucid, *clear, transparent, translucent, diaphanous, limpid

_An_ luminous, *bright, brilliant, lucent

_Con_ murky, gloomy, dusky, *dark: *turbid, muddy

_2* clear, perspicuous

_An_ distinct, plain, manifest, _evident

_Ant_ obscure, vague, dark — _Con_ enigmatic, cryptic, ambiguous, equivocal (see obscure)

_lucky* fortune, hap, accident, hazard, *chance

_An_ break, chance, occasion, _opportunity: _lot, portion, destiny, _fate

_luckless* unlucky, disastrous, ill-starred, ill-fated, unfortunate, calamitous, hapless

_An_ unhappy, infelicitous (see UNFIT): * miserable, wretched

_lucky, fortunate, happy, providential_ all mean meeting with or producing a favorable outcome or an unforeseen or unpredictable success. Lucky implies that the person or persons involved have been favored by chance and that the success has not been the result of merit or merits (a _lucky_ gambler) (said he was a _lucky_ fellow not to be sent to school—Meredith) (it was a _lucky_ day for him when he met the girl who later became his wife) _Fortunate_, although it is often indistinguishable from _lucky_ in its implications, is more formal and more likely to suggest an unanticipated absence of all handicaps and mischances or presence of such favorable circumstances as might argue the intervention of a higher power (compare _fortune_ under CHANCE n 1) that watches over one (in friendships I had been most _fortunate_—Shelley) (we are aware, too, that the critical discrimination which comes so hardly to us has in more _fortunate_ men flashed in the very heat of creation—T. S. Eliot) (it took a very _fortunate_ conjunction of events to bring about the rapid spread and seemingly complete victory of democracy—Dewey) _Happy_ differs from the preceding words chiefly in its combining the meaning of _lucky_ or _fortunate_ with that of its more common sense of being blessed or made glad (see GLAD); thus, a happy outcome is not only one that is fortunate but one that makes the person affected feel happy; a happy accident is an accidental event or circumstance that brings to light something that proves a treasure (giving them patience under their sufferings, and a happy issue out of all their afflictions—Book of Common Prayer) (Homo sapiens is among the safest of all animals, because he is omnivorous. His heredity is a mixture of _fortune_ and _fate_:—La Barre) _Providential_ often carries an implication of good fortune resulting from the help or interference of Providence (a _providential_ escape) (I thought to myself, this can't be chance. Indeed it seemed _providential_—de la Mare) _Often_, however, the word carries no trace of this implication and means little more than lucky or fortunate (it was _providential_; the sisters had made no remark that the Critchlows might not hear—Bennett) (it was certainly most _providential_ that I looked up at that instant, as the monster would probably, in less than a minute, have seized and dragged me into the river—Bartram)

_An_ *favorable, benign, auspicious, propitious: advantageous, *beneficial, profitable: happy, felicitous, meet (see fit)

_Ant_ unlucky — _Con_ *sinister, baleful, malefic, malef-
lure vb Lure, entice, inveigle, decoy, tempt, seduce are comparable when they mean to draw one from a situation or a course (as of action or behavior) typically felt as right, desirable, or usual or into one felt as wrong, undesirable, or unusual. Lure implies the action of a strong or irresistible influence which may be baneful <sensationalism that had lured new readers to the yellow journals during the circulation wars of the 1890's—H. L. Mencken> perfectly innocuous or even desirable <stretches of woodland dotted with lakes where hunting and fishing lure sportsmen from many distant points—American Guide Series: Me.> The essential thing is to lure into classroom instruction the finest type of trained men and women—Fuess> Entice adds to lure a strong suggestion of artfulness and adroitness <with her . . . high-mindedness she enticed him into a sphere of spirituality that was not his native realm—Stahl> <she appeared to be playing with the bird, possibly amusing herself by trying to entice it on to her hand—Hudson> Inveigle implies the use of wiles and often of deceit and flattery <with patience and diplomacy, she can eventually inveigle him into marrying to a wildfowl or the likeness of one which is used to lure other wildfowl into shooting range or into a net. In extended use it is applied to a person or sometimes to a thing that leads one to go somewhere or to do something that exposes one to the danger of being entrapped (as in the commission of crime, in compromising or unpleasant circumstances, or into being used to further another person's ends) <pretty young girls were the unconscious decoys by means of which she assembled numbers of men at her receptions> <the troops were led into ambush by a decoy> <are said to have lured ships onto the dangerous Briggantine shoals in order to plunder them. The decoy was a lantern hanging from a pole lashed to a jack-ass—Amer. Guide Series: N. J.> <wealthy department stores had the idea of using their book sections as decoys to draw the public into their doors by offering the latest big-selling books at heavily cut prices—Times Lit. Sup.> Snare basically applies to a line with a running noose for catching a bird or animal. In extended use it is applicable to a danger one may run into accidentally or unexpectedly or through lack of caution or wariness and from which, once involved, one cannot easily extricate oneself <the path to bliss abounds with many a snare—Cowper> <thou know'st the snares on ev'ry hand, guide thou their steps alway—Burns> <the wish for perfect security is one of those snares we are always falling into—Russell> led years before into the snare of matrimony with him, in consequence of which she was encumbered with the bringing up of six children—Stowe> <she meant to weave me a snare . . . to entangle me when we met—Tennyson> <gin's but a snare of Old Nick the deluder—Barham> Trap basically applies to a device that shuts with a spring for capturing animals. In extended use it is, like snare, applied to what is a danger to the unwary or incautious. The two words are often used interchangeably as though they were indistinguishable in meaning; however, trap is preferred to snare when disastrous effects, or deliberate setting for the purposes of capture, or trickery beyond detection are implied <the army feared a trap but rather than retreat, they advanced into it> <a trap for speeders> <knowing the examiner's methods, he was certain that there would be a trap set for him but he could discover none> <they accused the Western Powers of setting a trap for Italy so that she would be irrevocably tied to them—Collier's Yr. Bk.> <with traps and obstacles and hazards confronting us on every hand, only blindness or indifference will fail to turn . . . for guidance or for warning, to the study of examples—Cardozo>
lurid

Distinctively, it may apply to the coaxing of something from someone by such means (although he used the most subtle means to inveigle the author into the office to read the press notices, he never succeeded—Bok) (over gin and water we inveigled him from a pack of well-worn cards—Beaglhole) Decoy may mean to entrap or lead (as into danger) by artifice and especially by false appearances (the islanders had been living in relative opulence from the wreckage of ships which they had skillfully decoyed to destruction on the reefs—Barbour) (the female bird . . . practiced the same arts upon us to decoy us away—Burroughs) Temp historically meant and still may mean to entice into evil through hope of pleasure or gain (with weak . . . nations tempt others to prey upon them—Richardson) In more general use it may carry a suggestion of exerting such an attraction as inclines one to act against one's better judgment or higher principles (the receipt of remuneration from patents or copyrights tempts the owners thereof to retard or inhibit research or to restrict the benefits derivable therefrom—W. T. & Barbara Fitts) but more often implies an attracting or inducing that is morally perfectly neutral (the decision to tempt women away from their gray flannel suits . . . with a kaleidoscope of color—American Annual) (had a personality that could tempt a female ichthyologist's interests away from fish—Current Bio).

Seduce usually means to lead astray (as from the course of rectitude, propriety, or duty) by overcoming scruples (the hideous beast whose craft had seduced me into murder—Poe) and even in its most favorable senses in which it implies a moving or turning into a new course it commonly suggests some degree of deluding or misleading as the method employed (words when used with the gift of magic can seduce a reader into belief that has no roots in reality—Feld) (knew how to seduce the interest of his pupils; he did not drive, he led—Anspacher)

Ana ensnare, snare, entrap, trap, capture, *catch, bag; bewitch, fascinate, allure, captivate, *attract: blandish, wheedle, cajole (see COAX)

Ant revolt, repel

lurid *ghastly, grisly, gruesome, macabre, grim

Ana livid, *pale, pallid, wan, ashy, ashen: *sinister, malign, baleful, malefic, maleficient

lurk vb Lurk, skulk, slink, sneak do not share a common denotation, but they are comparable because the major implication of each word is furtive action intended to escape the attention of others. To lurk is to lie in wait (as in an ambush); the term sometimes implies only a place of concealment (his faithful Tom . . . with his little bridle and leading rein—Burke) or because well polished (buffed the leather to a high gloss) or specially finished (the glossy varnish of a newly varnished room accomplishments upon them—Bell) or because of its fresh surface—Dickens) (the luster of minerals can be divided into two types, metallic and nonmetallic—Hurlbut) In literary and extended use luster is often used to imply radiance or brilliance (see BRIGHT) (the sun was shining with uncommon lustre—Dickens) Sheen applies to a lustrous surface (as of a textile) or a surface luster (as of a mineral cleavage surface or a dark feather) that may be dull or bright and may be a simple shining or marked by richly iridescent or metallic tones (repeated scrubbings have given the wood a silvery sheen—Amer. Guide Series: Mich.) (the flashing sheen on the bird's plume—Sitwell) (the sheen of their spears was like stars on the sea—Byron) (the sheen of his poplin and velvet—Cather) In extended use sheen may stress richness and brilliance (an amazing sheen over the orchestral sound, a definition of textures and effects not to be heard even in the concert hall—Robert Lawrence) or it may stress a superficiality suggestive of a surface luster (daughters with a sheen of drawing-room accomplishments upon them—Bell) Gloss stresses superficiality more than luster or sheen and is appropriately applied to something that shines because coated with a shining substance (the gloss of a newly varnished floor) or because well polished (buffed the leather to a high gloss) or specially finished (the gloss on this chintz will wash off) In extended use, gloss often implies superficial attractiveness or plausibility (Mr. France plans to put the same gloss . . . on the place as he does on the fancy Collins Avenue hotels—Friedlander) (writes with his usual agreeable gloss, but it may be that the ingredients are wearing just a bit thin—New Yorker) Glaze applies particularly to a glasslike coating which provides a smooth impervious lustrous surface on ceramic wares, but it is also applicable to such comparable coatings as one made on cooked meats by pouring over them broth thickened by boiling or by

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
### Lustful

- **vigorous, energetic, strenuous, nervous**
- **lustful**

- **machination**
- **machine, mechanism, machinery, apparatus, engine, motor**

### Macabre

Specifically to any of the six *simple machines* (the lever, the wheel and axle, the pulley, the inclined plane, the wedge, and the screw) that together contain the elements of which all other machines are composed. Again, it may apply to a machine in the basic sense together with its power-generating unit and sometimes with supplementary equipment (as for moving the whole complex) or it may apply specifically to a conveyance and especially an automobile the term “machine” as used in the patent statute includes every mechanical device or combination of mechanical powers and devices to perform some function and produce a certain effect or result—Toulmin

These terms and the most varied in its applications. Basically it denotes an assemblage of parts that transmit forces, motion, and energy from one to another in a predetermined manner and to a desired end (as sewing a seam, hoisting a load, printing a book, or maintaining an electric current) **drilling machine**,  **machines that convert rags to paper** **washing machine** **conveyance and especially an automobile** **term “machine”** **used in the patent statute includes every mechanical device or combination of mechanical powers and devices to perform some function and produce a certain effect or result—Toulmin** **only an organism has its own internal purposes which belong to it intrinsically and a machine, so far as we know, is merely an extension of the specific purpose of organisms, men—La Barre** **gears are modified simple machines** such as the lever, pulley, wheel-and-axle, and inclined plane. They all serve to multiply force, speed, direction of motion and serve as connecting devices between driving units and driven mecha-

### Antonyms

- **ascetic**
- **austere, stern, severe, self-denying, self-abnegating**

### Contrasted Words

- **luxurious, sumptuous, opulent** 2 Luxurious, sumptuous, opulent are comparable when they are applied to things and mean ostentatiously or obviously rich and magnificent. Sometimes luxurious (also sensuous) is exceedingly choice and costly (luxurious sable coat) (the luxurious appointments of their drawing room) **a luxurious cargo of wine, olive oil, and candied tropic fruits—Wylie** Something sumptuous is extravagantly rich, splendid, gorgeous, or luxurious; the word usually suggests a grandeur or magnitude that almost overwhims the senses (the sumptuous life of the Court provided material for some painters—Binyon) **Venice, soon to be known as the most beautiful and sumptuous city of Europe—Ellis** (a velvet gown, sumptuous and wine-purple, with a white ruff that stood up . . . high and stiff—Edmund Wilson) **for the most sumptuous masques in England, Italian managers, engineers and artists were brought over—T. S. Eliot** Something opulent (see also rich) flouts or seems to flout its luxuriousness, or luxuriance, and, in some cases costliness **offered the bribe not only of her person but of an opulent and glittering eastern throne—Buchan** **the diction of poetry became, with notable exceptions, opulent, sumptuous, lavish, rather than pointed, terse, concrete—Lowes**

### Morals

- **ancient, pretendous, showy: magnificent, stately, imposing, majestic, grand: costly, expensive, valuable, precious**
- **frugal, thrifty, economical, sparing: meager, scant, scanty, skimpy, scrumpy, spare,exiguous**
- **luxury, amenity**

### Sentiments

- **pleasure, joy, delight: agreeableness, gratification, gratefulness**
- **hardship, delusion, deceitful**
- **truth-telling, honest, just, upright, conscientious, scrupulous, honorable: candid, frank, open, plain:**

### Attributes

- **glamor, ruse, stratagem, maneuver, gambit, ploy, artifice, feint, wile**
- **mechanical, machinery, apparatus, engine, motor**

### M

**Machines**
nisms—Heitner» man uses machines to transform energy, transfer energy, multiply force, multiply speed, or change the direction of a force—C. E. Dull, H. C. Metcalfe, & J. E. Williams» and machine is the only term of this group that is freely used collectively of machines as a class or abstractly of the technology and technological society associated with their use when I use the word machines hereafter I shall refer to specific objects like the printing press or the power loom. When I use the term "the machine" I shall employ it as a shorthand reference to the entire technological complex—Mumford» the domination of our cultural and collective life by the machine—Glcksberg» the liberty of choice allowed to the craftsman who worked by hand has almost vanished with the general use of the machine—Dewey» Mechanism may come close to the basic sense of machine when it denotes an assemblage of working parts functioning together to produce an effect, but more often than not it applies to relatively simple straightforward mechanical linkages such as make up a complex machine; thus, a sewing machine is made up of several mechanisms (as one to advance the thread, another to convey the cloth, another to determine the length of the stitch, and still another to wind the bobbins) the real mechanic understands the construction of his machine; he knows the names and uses of the parts and the principles underlying the operation of the mechanisms—Burghardt & Axlrod» the economic machine that provides for our everyday needs is so intricate that it is hard to see the purpose of particular cogs in its mechanism—W. T. C. King» Sometimes, however, mechanism suggests not merely the physical parts but the various steps that lead to the final result of the process (the propeller is the source of an intense sound but the exact mechanism by which this sound is produced is not clearly understood—Armstrong» Machinery (see also EQUIPMENT) may apply to machines collectively the mill sold its old machinery and bought more efficient machines» machinery for making shoes» the term machinery is very much more comprehensive in scope than the word machine. . . . Unquestionably, the term is broad enough to include a number of machines and their connecting appurtenances which are operated as a unit for a given purpose—U. S. Treasury Decisions» but it may also replace mechanism to denote an assemblage of working parts performing a function (a strange, quiet boy, interested much less in booklearning than in the assemblage; thus, chimpanzees have been reported to fiddle with the adjustment machinery put in the backs of most bow ties—New Yorker» Apparatus (see also EQUIPMENT) basically denotes an assemblage of parts for attaining some end or doing some thing, but in itself it implies nothing about the complexity or simplicity, the efficiency or inefficiency, or the precision or crudity of the assemblage; thus, chimpanzees have been reported to put sticks together into a crude apparatus for reaching fruit that is beyond the reach of their hand modern heating and refrigerating apparatuses raise the temperature during the winter and lower it during the summer—Carrel» (the apparatus which took the photographs and reproduced them. . . are more sensitive and truthful than the human eye—Day Lewis» Engine and motor in their basic relevant sense both denote a machine for converting energy (as heat, chemical, or nuclear energy) into mechanical force or motion, but in many situations they are not at all interchangeable, choice between them being firmly fixed by idiom. Engine is the more general term in this relation and is applicable to such machines whether large or small, simple or complex (an internal-combustion engine or it may apply both to a power-generating unit and a working unit that depends upon this (these engines were built to pump out mines—Kettering & Orth» and sometimes specifically designates certain automotive units (as a locomotive or fire engine (sent engines, hose carts, and ladder trucks to the fire (a long freight train drawn by two engines» From an earlier general use engine is still specifically applied to a few kinds of machines (rose engine) and it is the idiomatically appropriate term to designate the power plant of an aircraft (with either turbojet or rocket engines these research aircraft planes would have sufficient power to permit the maximum speed aerodynamically possible—Bonney» Motor is applicable to a small or light engine (an outboard motor» a spit worked by a small clockwork motor» or to a gasoline or other internal-combustion engine; thus, one may speak of the motor or engine of an automobile; diesel engines or motors power many modern locomotives (the finest machine in the world is useless without a motor to drive it—Furnas» Motor is the specific term for a rotating machine that transforms electrical energy into mechanical energy household appliances run by electric motors» a motor is a machine for transforming electrical energy into mechanical energy or power—Cloud» Like machine, motor also applies specifically to an automotive vehicle (as an automobile or truck) we want a truck battalion of at least four companies. . . . The vehicles for this unit would be obtained by drawing on excess motors in various division units—Combat Forces Jour.» the taxpayer did not then provide Ministers with carriages and coachmen as he now provides them with motors and chauffeurs—Collis» Ana contrivance, *device, contraption, gadget: *implement, tool, instrument, utensil, appliance machinery 1 equipment, apparatus, paraphernalia, outfit, tackle, gear, matériel Ana *mean, instrument, instrumentality, agency, medium, vehicle, organ, channel, agent: *machine, mechanism, apparatus, engine, motor: *device, contrivance, contraption, gadget: *implement, tool, instrument, utensil, appliance machinery 2 *machine, mechanism, apparatus, engine, motor macrocosm cosmos, universe, world, *earth mad 1 *insane, crazy, crazed, demented, deranged, lunatic, maniac, non compos mentis Ana frenzied, hysterical, delirious (see corresponding nouns at MANIA): *irrational, unreasonable 2 *angry, irate, wrathful, wroth, indignant, acrimonious Ana maddened, incensed, infuriated, enraged (see ANGER vb): offended, outraged, affronted (see OFFEND) madden *anger, incense, enrage, infuriate Ana vex, *annoy, irk: exasperate, provoke, rile, aggravate, *irritate Con pacify, placate, mollify, appease, propitiate, conciliate: assuage, alloy, mitigate, *relieve maelstrom *eddy, whirlpool, vortex magazine 1 *armory, arsenal 2 *journal, periodical, review, organ, newspaper magic n Magic, sorcery, witchcraft, witchery, wizardry, alchemy, thaumaturgy are comparable rather than synonymous in their basic senses. In extended use they are sometimes employed indifferently without regard to the implications of their primary senses and with little distinction from the most inclusive term, magic, but all are capable of being used discriminately and with quite distinctive implications. Magic primarily denotes one of the arts or the body of arts whose practitioners claim supernatural
or occult powers (as in calling spirits to their assistance, in performing miracles, in divining the future, and in fixing the destinies of men). In extended use the word denotes a power or influence that produces effects akin to or suggestive of those of magic. Usually it stresses the power to call forth an image, an emotion, or a response from or as if from a void (his magic was not far to seek—he was so human! . . . where'er he met a stranger, there he left a friend—J. R. Lowell) (the faint significance of words . . . for a common dullard, or their evocative magic for a Keats—Montague) Less often it is applied to an art or an artist transcending the natural or explainable (but Shakespeare's magic could not copied be; within that circle none durst walk but he—Dryden) Sorcery is the form of magic practiced by those who use incantations and charms and cast spells in order to work their usually harmful ends. In extended use it is especially appropriate to suggest an attempt to overpower or enthrall by glamour or artful enchantment (to fence my ear against thy sorceries—Milton) (the old evocative themes recur . . . and they are still touched with that verbal and metrical sorcery whose secret his younger contemporaries seem to have lost—New Yorker) Witchcraft, witchery, and wizardry in their primary senses suggest powers derived from evil spirits or the use of human beings as the instruments for the accomplishment of Satanic ends, the only difference being that the first two are chiefly applied to the work of women, and the last to that of men. In extended use, however, they often vary in implications. Witchcraft is sometimes indistinguishable from sorcery, but it more often suggests guile rather than enchantment and wiles rather than spells (there is something more than witchcraft in them [women], that masters even the wisest of us all—Rowe) Witchery, on the other hand, occasionally implies either sorcery or guile (thus has a bit of witchery crept into certain methods of plague control in the past—Hubbs) but usually stresses a winning grace or an alluring loveliness (the soft blue sky did never melt into his heart; he never felt the witchery of the soft blue sky!—Wordsworth) (the witchery of legend and romance—Riker) Wizardry suggests a more virile and compelling power to enchant and usually connotes exceptional skill, talent, or creative power in the person who exerts such an influence (that white-winged legion through whom we had plowed our way were not, could never be, to me just gulls . . . ; there was the wizardry of my past wonder, the enchantment of romance—Galsworthy) (his playing had a grandeur that one often misses in the work of younger and more meticuluous artists, and there were moments when his wizardry held me spellbound—Sargeant) Alchemy is properly classed with magic only because its practitioners claimed mastery of secret forces in nature and the power to work such miracles as the changing of base into precious metals. In discriminative extended use, therefore, it implies transmutation or sometimes transfiguration (gilding pale streams with heavenly alchemy—Shak.) (by happy alchemy of mind they turn to pleasure all they find—Green) (the vast majority of those who write verse are unendowed with the assimilating alchemy of genius—Lowes) Thaumaturgy basically is applied to performing of miracles and wonders or to the art of wonder-workers (as conjurers or those who profess the power to work miracles) (a world of miracles wherein all fabled or authentic thaumaturgy and feats of magic were outdone—Carlyle) In extended use it is applied to what mystifies and dazzles or is designed to mislead or confuse.

Aura cardinal, vital, *essential, fundamental: prime, *primary, primal

Con *subordinate, secondary, dependent, subject, collateral

mainly *largely, greatly, mostly, chiefly, principally, generally

maintain, assert, defend, vindicate, justify are comparable when they mean to uphold as true, right, just, valid, or worthy of notice or acceptance in the face of opposition or indifference. Maintain implies a firmness of conviction. When this implication is the only one, maintain usually means to argue in the spirit of one who does not admit any weakness in his contention *(the artisan, for example, ranks no doubt lower than the professional man; but no one maintains that he is a different kind of being—Dickinson) *(there is . . . a Philosophic Doctrine— . . . I know that many serious people believe it—which maintains that all men, in spite of appearances and pretensions . . . live alike for pleasure—L. P. Smith) Often, however, the term additionally implies persistency or insistency in upholding in defiance of all opposition *(before this court ought to intervene the case should be of sufficient magnitude clearly and fully proved, and the principle to be applied should be one which the court is prepared deliberately to maintain against all considerations on the other side—Justice Holmes) Assert (see also ASSERT 1) so strongly implies a determination to make others accept or recognize what one puts forward as the truth, or as a claim, or as a right, that it often suggests aggressiveness or obtrusiveness *(the provision of the constitution never has been understood to embrace other contracts, than those which . . . confer rights which may be asserted in a court of justice—John Marshall) But assert does not always imply the use of argument to force conviction or recognition *(anyone . . . can feel the sustained dignity of the sculptor's work, which is asserted with all the emphasis he could put into it—Henry Adams) *(on the whole New Zealand was lavish with money and attention, and used force only to assert her sovereignty—Heiser) Defend implies a maintaining in the face of attack with the intention of demonstrating the truth, rightness, or propriety of what is questioned; thus, one defends a thesis who, as a candidate for a degree, submits himself to examiners who assail the weak or dubious points of his argument *(the independence of the Supreme Court of the United States should be defended at all costs—Lippmann) Defend, in this sense, does not imply, as it so often implies in its more common sense (see DEFEND 1), that the defender is in a weak or dubious position; however it seldom suggests as much aggressiveness as does assert and often connotes the aim of an apologist *(I have not adopted my faith in order to defend my views of conduct—T. S. Eliot) Vindicate (see also EXCULPATE) implies an attempt, usually a successful attempt, at defense or assertion. It presupposes that whatever is being defended or asserted has been or is capable of being challenged, questioned, denied, or contended. When the emphasis is on defense, then argument or something which has the force of argument is usually implied, and an aim not only to make one's point but to confute and confound one's opponents is often connoted *(writers who vindicated our hereditary House of Lords against a certain Parliament Act—Quiller-Couch) *(the view of the informed and disinterested men turned out to be almost completely wrong, while the relatively uninformed . . . were vindicated on all counts—Roveree) When the emphasis is upon assertion, vindicate usually implies an effort to resist triumphantly the force of encroachment or interference or to overwhelm those who deny or doubt, not so much by argument as by appropriate action *(arise, and vindicate Thy Glory; free thy people from their yoke!—Milton) *(what was it that stood in his way? His unfortunate timidity! He wished to vindicate himself in some way, to assert his manhood—Joyce) Justify (see also EXPLAIN 2, JUSTIFY 3) implies that the thing concerned can no longer be opposed or ignored because it has been conclusively shown to be true, valid, or proper by irrefutable arguments or on inescapable grounds, such as its consequences or its successful operation *(if the Germans are to justify the high claims they make for lessening as a critic, they must rest them on other grounds than his intellectual originality—Babbitt) *(fate persists in justifying the harsh generalizations of Puritan morals—Bennett) *(it isn't by the materials you use that your claim to originality will stand justified or condemned; it is solely by the thing you do with them—Lowes) Assert, aver, protest, avow, declare, profess, avouch (see ASSERT): *contend, fight, battle, ward; persist, persevere

Con oppose, combat, *resist, withstand, fight: *deny, gainsay, contradict, traverse

maintenance sustenance, support, *living, livelihood, subsistence, keep, bread

majestic stately, august, noble, magnificent, imposing, *grand, grandiose

majority, plurality are arbitrarily defined in the United States, especially by statute, when they refer to an excess of votes as determining an election. Both imply an excess of votes over the next highest candidate. The distinction between the two words applies when there are three or more candidates; then the person who is elected by a majority has more votes than the other candidates combined, that is, his vote is in excess of half of the total number of votes cast, and his majority is the number of votes cast for him in excess of one half of the total number of votes. A person is elected by a plurality when he has more votes than any other candidate, whether he has a majority of the total or not. Thus, if a total of 290,000 votes are cast in an election contested by three candidates, with candidate A polling 200,000 votes, candidate B polling 75,000, and candidate C polling 15,000, candidate A wins the election by a majority of 55,000, and by a plurality of 125,000 over candidate B, and by a plurality of 185,000 over candidate C. Sometimes, where the successful candidate has a vote that exceeds the total of votes cast for all opposing candidates, the term plurality is applied to this excess; thus, in the example given, while candidate A's majority is 55,000, his plurality over candidates B and C together is 110,000.

make vb Make, form, shape, fashion, fabricate, manufacture, forge can all mean to cause something to come into being or existence. This is the underlying meaning of make, the most general and the most widely applicable of these terms. Make may imply the operation either of an intelligent agent or of a blind agency, and either material or immaterial existence *(make a chair) *(make a poem) *(make a choice) *(this factory makes bicycles) *(she is unable to make friends) *(God made the world) *(the spider makes webs) *(the liver makes bile) Form adds to the implication that the thing brought into being has a definite outline, design, or structure *(a sculptor who forms hands with exquisite delicacy) *(we are ready to form a plan) *(form a federation of states) *(character

make-believe

is partly formed by training) Shape, though often interchangeable with form, is much more restricted in its application because it characteristically connotes an external agent that physically or figuratively impresses a particular form upon something (as by molding, beating, carving, or cutting) (the blacksmith shapes a horseshoe on his anvil) (shape a hat on a block) (events that shaped his career) (every life is a work of art shaped by the man who lives it—Dickinson) Fashion means to form, but it implies an intelligent and sometimes a purposeful agency and more or less inventive power or ingenuity (he fashioned a lamp out of an old churn) (legislative committees often fashion strange bills out of miscellaneous suggestions) (intelligent creatures, fashioned by the hand and in the image of an all-wise God—Hambly) Fabricate stresses a making that unites many parts or materials into a whole (Dr. Hitchings and his associates alone have fabricated more than 500 compounds resembling one or another of the simpler chemicals out of which D. N. A. (an enormous complex substance) is fashioned in the cell—Engel) and it usually connotes either a making according to a predetermined pattern (fabricate doors, windows, and other parts of a house) or skillfulness in construction (fabricate a good plot for a novel) (fabricated a creed fitted to meet the sordid misery of real human life—Woolf) Very commonly fabricate implies an imaginative making or inventing of something false (the particulars of that fashion strange bills out of miscellaneous suggestions) (events that shaped his career) (every life is a work of art shaped by the man who lives it—Dickinson) Fashion means to form, but it implies an intelligent and sometimes a purposeful agency and more or less inventive power or ingenuity (he fashioned a lamp out of an old churn) (legislative committees often fashion strange bills out of miscellaneous suggestions) (intelligent creatures, fashioned by the hand and in the image of an all-wise God—Hambly) Fabricate stresses a making that unites many parts or materials into a whole (Dr. Hitchings and his associates alone have fabricated more than 500 compounds resembling one or another of the simpler chemicals out of which D. N. A. (an enormously complex substance) is fashioned in the cell—Engel) and it usually connotes either a making according to a predetermined pattern (fabricate doors, windows, and other parts of a house) or skillfulness in construction (fabricate a good plot for a novel) (fabricated a creed fitted to meet the sordid misery of real human life—Woolf) Very commonly fabricate implies an imaginative making or inventing of something false (the particulars of that fashion strange bills out of miscellaneous suggestions) (events that shaped his career) (every life is a work of art shaped by the man who lives it—Dickinson) Fashion means to form, but it implies an intelligent and sometimes a purposeful agency and more or less inventive power or ingenuity (he fashioned a lamp out of an old churn) (legislative committees often fashion strange bills out of miscellaneous suggestions) (intelligent creatures, fashioned by the hand and in the image of an all-wise God—Hambly) Fabricate stresses a making that unites many parts or materials into a whole (Dr. Hitchings and his associates alone have fabricated more than 500 compounds resembling one or another of the simpler chemicals out of which D. N. A. (an enormously complex substance) is fashioned in the cell—Engel) and it usually connotes either a making according to a predetermined pattern (fabricate doors, windows, and other parts of a house) or skillfulness in construction (fabricate a good plot for a novel) (fabricated a creed fitted to meet the sordid misery of real human life—Woolf) Very commonly fabricate implies an imaginative making or inventing of something false (the particulars of that
style, dignity rather than sparkle, graciosity rather than grace—Joseph \(\text{Lincoln}\) \(\langle\text{although this is largely a masculine disease, about 5 percent of the patients are women—Fishbein}\rangle\) Manly (often opposed to boyish or, from another point of view, to womanly) is used to qualify whatever evidences the qualities of a fully developed man \(\text{manly virtues}\) It often specifically suggests the finer qualities of a man (as courage, frankness, and independence) or the physical characters and skills which come with maturity; it is applicable not only to men but to boys \(\langle\text{his big manly voice, turning again toward childish treble—Shak}\rangle\) \(\langle\text{what more manly exercise than hunting?—Walton}\rangle\) It was amusing to watch the manly coolness with which the announcement was taken—Meredith \(\text{malevolence}\) (often opposed to womanlike) is more apt to suggest characteristically masculine qualities or, especially, foibles \(\text{manlike} \) (often from long association with men she had learnt a manlike reticence—H. S. Scott) Often manlike suggests reference to man in the more general sense of the word and therefore means little more than human or like human beings \(\langle\text{there were a dozen or more of the hairy manlike creatures upon the ground—Blue Book}\rangle\) Manish (often contrasted with womanish or effeminate) applies chiefly to women or their dress, gait, and manners, when they suggest masculinity rather than femininity \(\langle\text{a woman impudent and manish grown—Shak}\rangle\) \(\langle\text{a manish costume}\rangle\) \(\langle\text{those who dislike . . . manish headgear, might try his simple but feminine small hats—Lois Long}\rangle\) Manful differs from manly and manful in being applied only to mature men \(\langle\text{virile controversialists—Inge}\rangle\) \(\langle\text{a virile style}\rangle\) \(\langle\text{ye chiefly, virile both to think and feel, deep-chested Chapman and firm-footed Ben—J. \(\text{Ant}\) female — \(\text{Con feminine, womanly, womanlike, womanish, ladylike (see female)}\)
malignant, malevolent, malignant, malign, spiteful are comparable when they mean disposed to do or to inflict evil or resulting from a disposition to do or to inflict evil. A person or thing is malicious that is motivated or dictated by hatred or spite and, usually, by a desire to inflict injury and suffering or to see another in disgrace or an object of ridicule or contempt (episodes . . . when they create a scandal, they are hushed as much as possible, so as not to offend chaste ears and rejoice malicious ones—Guérard) (criticism based on guesswork and even on malicious falsification of fact—Roosevelt) (took a malicious pleasure in emphasizing this point and in watching me wince—Kipling) A person or thing is malevolent that evidences ill will or an intent to do evil, or a sinister influence (Captain Tilney must have heard some malevolent misrepresentation of her—Austen) (there is no free breath to be drawn within the sphere of so malevolent an influence—Hawthorne) (the medicine man . . . can be malevolent as well as benevolent. If he desires the death of enemies he calls his spirits and bids them to harm the object of his hatred—Corlett) A person or thing is malignant that is actu- ated or characterized by virulent ill will or extreme malevolence (tested in the crucible of a malignant marriage—Hewes) (a great temptation to . . . insist that the lack of relation between what happens and what is supposed to happen is due to some spell or enchantment laid by a malignant magician—Muggeridge) (his cold, malignant rage—L. P. Smith) A person or thing is malign (see also SINNER) that harbors violent enmity or ill will or threatens extreme evil or danger; the term, in contrast with malignant, carries a stronger implication of potentiality and therefore need not suggest certainty of effect (a soul that spurns the crowd's malign control—Gifford) (by fiends of aspect more malign—Wordsworth) Spiteful implies a deep-seated malicious or malevolence provoked especially by a desire to get even with others for real or fancied offenses; it suggests meanness or venomousness of temper and refers more often to utterances than to acts (spiteful gossip) (she has a spiteful tongue) (a spiteful saying gratifies so many little passions—Addison) (‘Well, said Mr. Potter, who was not spiteful to his children, and preferred his wife unfurled, ‘We'll let you off this time’—Rose Macaulay) Ana ▶ poisonous, venomous, virulent, toxic: *pernicious, noxious, baneful, deleterious, detrimental: *envious, jealous: wanton, gratuitous, un-called-for, *supererogatory malign adj 1 malignant, *malevolent, *malign, spiteful Ana inimical, hostile, rancorous, antipathetic, antagonistic, *toxic (see corresponding nouns at ENMITY): venous, virulent, *poisonous, toxic Benignant ▶ benign, kindly, *kind 2 *sinister, baleful, malefic, *maleficient Ana threatening, menacing (see THREATEN): baneful, noxious, *pernicious, deleterious: disastrous, catastrophic, cataclysmic, calamitous (see corresponding nouns at DISASTER) Ant benign ▶ *favorable, auspicious, propitious: fortunate, *lucky, providential, happy malign vb Malign, traduce, aspere, vilify, calumniate, defame, slander, libel mean to speak evil of for the purpose of injuring and without regard for the truth. Malign and traduce usually imply persecution; they commonly suggest such a blinding passion as hatred, violent prejudice, or bigotry as the motive. Malign, however, although it carries the implication that the person, group, or race affected is the victim of lies, does not necessarily impute deliberate lying to the speaker or writer (the most malign race in history) (gossips had maligned the lady—Meredith) (whether Richard III has been maligned by his earlier biographers or not is still an open question) (other British historians have malign Ward in order to build up the fame of ‘Chinese’ Gordon—Richard Watts) Traduce carries these implications also, but it stresses the resulting ignominy more than malign (if I am traduced by ignorant tongues . . . ‘tis but the fate of place and the rough brake that virtue must go through—Shak.) (political bias or society scandalmongers fastened on them and traduced them and made them notorious—Gore) (a bank-owned newspaper which . . . traduced the members of its adversary faction in the town—White) Aspere and vilify both imply efforts to destroy a person’s good name or reputation. Asperse suggests an intent to detract from one’s reputation or to lower one in popular esteem by direct accusations or, more often, by such subtler methods as innuendo or spreading false reports (there were foul tongues to asperse a Douglas—Scott) (found their characters assailed and their motives aspersed—Parrington) (he neither aspersed men’s idealisms nor sniffed at their aspirations—Kronenberger) Vilify implies open methods and an intent to blacken one’s good name and to make it vile and shameful; it usually suggests direct accusation coupled with violent abuse and scurrilous name-calling (with a malignant insanity, we oppose the measures, and ungratefully vilify the persons, of those whose sole object is our own peace and prosperity—Burke) (the soldier of today . . . should not be blamed for falling back. He should be shot or hanged afterward . . . but he should not be vilified in newspapers—Kipling) Calumniate impales malice to the speaker or writer and falsity to his aspersions or accusations (calumniating and ridiculing the Church which he had deserted—Macauley) and often implies that the false and malicious statements have seriously damaged the good name of the victim (the verdict of history is that Benedict Arnold was not calumniated, but was justly charged with treason) Defame, slander, and libel are found both in general and in legal use, but their strict legal definitions are more or less affecting their literary meanings. All imply calumniation, but they differ from calumniate mainly in their emphasis on the positive damaging effect of the lies. Defame, both in legal and in literary use, suggests an actual injury to one’s good name or a definite loss of reputation or reputation (defaming that defacing, till she left not even Lancelot brave nor Galahad dear—Tennyson) (Captain Basil Hall . . . was publicly accused . . . of being an agent of the British government on a special mission to blacken and defame this country—Brooks) To slander, in legal use, is to defame orally; in general use it covers both written and printed as well as oral calumni- ation. It also, more strongly than defame or calumniate, connotes positive suffering on the part of the victim (slandered to death by villains, that dare as well answer a man indeed as I dare take a serpent by the tongue—Shak.) (he was to be imprisoned again, his friends were to betray him, his name was to be slandered—Woodham-Smith) Libel (compare LABEL n) is chiefly a legal term; in general use its implications are much the same. It implies the printing or writing of something that defames a person.
malodorous, stinking, fetid, noisome, putrid, rank, rancid, plastic, pliable, pliant, ductile, adaptable

malignity, malign, malevolent, malicious, spiteful

malignancy, malign, ill will, malevolence, spite, despite, spleen, grudge

maligning *dodge, parry, sidestep, duck, shirk, fence

malleable *plastic, pliable, pliant, ductile, adaptable

malodorous, stinking, fetid, noisome, putrid, rank, rancid, fastidious, musty mean having an unpleasant smell. Malodorous is the general term which is referable to any smell of this character, from one that is noticeably unpleasant to one that is distinctly offensive "malodorous flowers". The flavor . . . like that of many malodorous cheeses, is delicate—Rowlings Stinking, the familiar term, and fetid, the literary or technical term, describe an odor or a thing that emits an odor which is peculiarly offensive; the former more obviously suggests disgusting foulness than the latter. A stinking dungeon, a stinking outhouse, the cave . . . was indescribably foul and stinking—Barbour. Exploded stinking flashlight powder in enclosed rooms—Mott.

petrify—also stinking weed, he detected at once a fetid odor, not very strong but highly disagreeable—Cather. Noisome is applicable chiefly to what emits a poisonsly or unwholesomely offensive odor. Four sewers emptied into these twenty-five acres of swamp and morass—stagnant, noisome, and crawling with huge snakes—Heiser. Putrid is applicable primarily to organic matter in such a state of decomposition that it is loathsome and malodorous—a bloated, putrid, noisome carcass—Burke. The whole was putrid with fish corpses—Semon. Rank (see also RANK 1: FLAGRANT) applies to an odor or to a thing which emits an odor that is exceedingly strong and unpleasing yet not necessarily loathsome (the rank smell of a sunflower). O, my offence is rank, it smells to heaven—Shak. Wreathed in smoke from a rank cigar—Ralph Watson.

Rancid usually suggests an offensive taste as well as an offensive smell that is indicative of a loss of freshness; it is used especially of fatty substances (as oil or butter) that have undergone a chemical change or decomposition (rancid bacon). Fusty and musty both suggest lack of ventilation and sunlight, but of the two words, musty carries the stronger implication of age and prolonged uncleanness or an accumulation of dust and dirt, and musty, the stronger implication of moldiness or of the effects of darkness or dampness (the ill-ventilated schoolroom full of boys smelled . . . musty—Ellis). (the department had moved from its musty old headquarters . . . to a shiny new home—Time). The musty odor of a damp cellar (there was an acrid, musty smell; the raw air was close with breathing—Rose Macaulay).

Ant odorous—Con fragrant, aromatic, redolent (see ODOROUS)

maltreat mistreat, ill-treat, misuse, abuse, outrage

mammal *huge, vast, immense, enormous, elephantine, giant, gigantic, gigantic, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian

maneuver *trick, ruse, gambit, ploy, artifice, wile, feint

manful virile, mannish, manlike, manly, masculine, male

**Ant** lucidity

2 Mania, delirium, frenzy, hysteria are comparable when they mean a state of mind in which there is loss of control over emotional, nervous, or mental processes. Mania (see also INSANITY) definitely implies madness or insanity; the term may designate a type of madness in which the patient manifests extreme excitability or, more precisely, the phase of manic-depressive insanity in which the patient loses control over his powers of thought, of speech, and of movement through violent excitement or excessive emotion (see George III suffered a third attack of mania—William Hunt) Delirium implies extreme mental disturbance that may be associated with or induced by toxic factors (as of disease or drugs) or occur episodically in a prolonged mental disorder and that is characterized by raving, hallucinations, delusions, and extreme restlessness (a raging fever accompanied with delirium—Dickens) (by pain reduced to a state approaching delirium) But delirium also, in nontechnical use, applies to a state of intense emotional excitement that manifests itself in an individual or in a group and robs him or them of self-control (in a delirium of joy) (the delirium of popular enthusiasm—Lecky) Frenzy (see also INSPIRATION) suggests wilder or more violent agitation or disorder than delirium but no less emotional excitement; it is applicable both to a state bordering on a mania (an act done in the . . . frenzy of despair—Freeman) and to one in which for the time being all self-control is lost (his hands released her . . . and went up to his white hair, which they tore in a frenzy—Dickens) (her intensity, which would leave no emotion on a normal plane, irritated the youth into a frenzy—D. H. Lawrence) Hysteria applies strictly to a psychoneurosis simulating organic disease and manifesting such symptoms as disturbance of sensation, motion, and visceral functions expressed typically in functional paralysis, nausea, and emotional excitability (a structurally normal arm paralyzed by hysteria) In ordinary non-technical language hysteria implies extreme emotional instability that may show itself in swift transitions of mood or from laughing to crying (she laughed and cried together . . . in a hysteria which she could not control—Bennett) (they were gradually worked up to complaisance and then to enthusiasm and then to hysteria and then to acute mania—Mencken)

**Ant** enslave

many, several, sundry, various, divers, numerous, multiform mean consisting of a large number or comprising a large group. Many implies a likeness between the individuals or units in class, category, kind, or sort; except that it vaguely implies more than a few, the term gives no explicit suggestion as to how large the number is (of the eleven poets who accepted (representing, in many cases, a second choice on the part of the committee . . . ) —Mary McCarthy) (many inventions which we now see to be precursors of the second industrial revolution—Wiener) Several (see also DISTINCT 1) is almost as vague as many in its implication of number. In law the term is construed as meaning more than one; thus, the several counts of an indictment may be two or more counts. In more general use it is usually construed as meaning at least three (the journey will take several days) (they saw several strangers on the road) (there are several reasons why you should not go) Sometimes the term means both more than a few and different each from the other; in such use, several is often preceded by a possessive adjective (a review of our denominational theologians . . .). There have been many of them; they have served their several causes well—Sperry (her several thoughts . . . as signaled by the changes on her face—Hardy) (chosen every second year by the people of the several States—U. S. Constitution) Sundry also implies an indefinite number, but it carries regularly a stronger implication of the difference of each from the others than does several; thus, there are several, rather than sundry, eggs left; there are sundry, more explicit than several, aspects of the problem that have not been considered (she differed in sundry important features—Quiller-Couch) (all their sundry emotions of a moment ago were one now in a sense of submissive, unquestioning reverence—Tasaki)

**manipulate**

*Ana* various (see also DIFFERENT) is often used to mean an indefinite number, with a more or less attenuated implication of difference in identity of each from each (various persons spoke to me about it) (the various social layers of the American population—Packard) Divers (compare diverse under DIFFERENT) also has come to imply a vague number, often meaning little more than many or several, but often retaining some of its originally strong impli-
cation of difference among the individuals *(he told his story to divers persons)* *(divers styles of musical expression—Virgil Thomson)* Numerous may qualify plural nouns or singular nouns that designate a collection or assembly of units or individuals. In each case the term implies the existence of a noticeably large number of units or individuals; sometimes, in fact, it connotes a crowding or thronging *(every president has numerous letters from numerous persons)* *(I have contracted a numerous acquaintance among the best sort of people—Steele)* *(the commoners who had been summoned . . . formed a numerous assembly—Macauley)* Multifarious adds to the implications of many that of great diversity and often incongruity in the units, individuals, or elements involved *(in many of the multifarious activities he undertook—Ellis)* *(the multifarious Italian dialects—Heiser)* *(the large desk on which multifarious files and papers were ranged—Bennett)* *(the multifarious sufferings of the refugees)*

2 *room, berth, play, elbowroom, leeway, clearance

**marine** adj 1 oceanic, thalassic, neritic, pelagic, abyssal, *aquatic, lacustrine, fluviu, fluviatile

2 Marine, maritime, nautical, naval are not closely synonymous terms but they are so interrelated that they are sometimes a cause of confusion. Marine and maritime both imply a connection with the sea. Marine is the appropriate term when what is qualified is produced by or is found in the sea or in a body of salt water (for this sense see AQUATIC) or is intended for use at sea *(marine barometer)* *(marine chronometer)* or deals with the sea or with vessels that ply the sea or other large bodies of water *(marine painting)* *(marine engineers)* Marine is sometimes used also when there is an actual or implied reference to seamen *(at that time the Marine Board examinations took place at the St. Katherine's Dock House on Tower Hill—Conrad)* *(the marine hospital system long maintained by the United States for the care of sick and disabled merchant seamen)* and the term commonly applies to soldiers who serve at sea *(the Marine Corps)* Maritime is the appropriate term when the reference is to countries, climates, or peoples on the borders of a sea *(the Maritime Provinces of Canada are on its eastern coast)* *(maritime races)* or to the navigation of or commerce on the seas *(maritime pursuits such as fishing or whaling)* *(maritime laws)* *(maritime perils)* *(in the whole of British genius . . . I have estimated the maritime ancestry as 1.9, less than any other class—Ellis)* But maritime and marine are sometimes used interchangeably, especially in reference to law and insurance. Nautical and naval, on the other hand, imply a connection with ships and shipping, and therefore only indirectly with the sea. Nautical, however, is the usual term in applications where a relationship to sailors or seamen or the sailing of ships or boats is distinctly implied *(nautical pursuits such as yachting)* *(nautical skill)* *(a man of nautical interests is never satisfied until he owns some sort of boat)* *(nautical clothes)* *(no one rows, very few sail . . . ; Bright-ton . . . is the least nautical of seaside places—Jefferies)* Nautical is usually the preferred term when reference to the art or profession of navigation is implied *(nautical charts)* *(nautical tables)* *(nautical astronomy)* *(a nautical mile)* Naval usually implies reference to a navy as distinguished from a merchant marine and as composed not only of ships, but of men, supplies, and armaments; at times, only from the context can a reader be sure whether ship or naval force is referred to *(naval stores)* *(a naval architect)* *(a naval engagement)* *(he belongs to the naval reserve)*

**mariner**, sailor, seaman, tar, gob, bluejacket all denote a person engaged in sailing or handling a ship. In non-technical use mariner generally refers to those directly involved in the navigation and operation of the ship but in legal use it is applicable to a person employed aboard a ship in any capacity and then includes not only the navigators and operators but such persons as those concerned with the ship's business and housekeeping; thus, a ship's master, officers, engineers, and stewards are all in this sense mariners. Mariner is not so common as the other terms, but it is very common in literary use *(ye mariners of England that guard our native seas—Campbell)* Sailor still so strongly retains its original implication of concern with the management of boats or ships that are propelled by sails that it is the appropriate term whenever this idea is specifically suggested. However the term is also applicable to a person engaged in the actual navigation or operation of a vessel regardless of the power which drives it. In ordinary use it applies especially to one more technically called a seaman, one of the working force sometimes including or sometimes excluding officers employed on a ship. The term seaman alone is not ordinarily applied to apprentices, for it suggests skill and craft in operation and guidance of a vessel. Tar is a familiar, often poetic, designation of a sailor; gob designates informally a sailor belonging to the navy and is not applied to an officer, whether commissioned or noncommissioned. Bluejacket is commonly applied to an enlisted man in the British or American navy; the term originally referred to the distinguishing uniform of such a seaman; it is often employed in distinguishing a sailor in the navy from a marine or a sailor in the merchant marine.

3 brand, stamp, label, tag, ticket (see under mark vb)

**mark** vb 1 Make, brand, stamp, label, tag, ticket are comparable both as verbs meaning to affix, attach, or impress something which serves for identification and as nouns meaning the thing affixed, attached, or impressed for such a purpose. Mark, the comprehensive term of this group, in itself as distinct from context implies nothing about the way of affixing, attaching, or impressing and therefore may take the place of any of the remaining terms to suggest a means by which something may be identified, or
such matters as its ownership, origin, and quality may be established {all her linen was marked by embroidered initials} {English gold and silver articles are marked, to attest their purity, with the official mark of the Goldsmiths' Company} {the marks of old age are appearing in his face} {bringing with him the marks of his rank and privilege, the silver and china, the linen and damask, the portraits in peeling gold frames—Warren} Brand basically implies a burning or searing with a hot iron to make a permanent mark that serves to identify (as in respect to status, ownership, quality, or make) {cattle on the open range were branded to show their owner} But brand has been extended to other methods of marking and then commonly stresses the indelibility of the mark and this implication affects its various extended uses much as does the more basic one (see brand n under STIGMA) {history has once again branded this lesson on the minds of those who choose to see—Beackmore} In particular the noun often implies a being the identified product of a specified maker {accustomed to ask for goods by brand} {a store that carries only well-known brands} Stamp (see also IMPRESSION) basically implies an impressing of a mark of identification, authentication, or authorization upon some softer material by means of a machine or instrument that hammers it in; it may imply also any comparable method of affixing a mark, usually with some suggestion of permanence or indelibility {every coin is stamped with a particular design that certifies it as belonging to a certain country and as having such and such a value} {the meat was dark red with uneven white edges of fat. Blue inspection stamps were on the white fat—Wirt Williams} {stamp a bill “Paid”} {stamp a letter with the date of arrival at the post office} {put a ten-cent postage stamp on that letter} {this passport now bears all the necessary stamps} {this paternity was stamped so indelibly on his outer shell—Costain} {a poet who has left her stamp on her generation—S. H. Hay} Label implies the affixing of a piece of material (as paper, metal, or cloth) upon something to show its name, description, origin, or the person and address to which it is being sent {label all the minerals in the collection} {she affixed a small paper label to each jar of preserves} {the contents of every bottle should be carefully labeled} In its extended use label usually applies to the applying of an epithet, often rather arbitrarily, to something or someone {when I was at Harvard all the types of narrative were labeled and classified like butterflies in a case—Marquand} {hanging the subservive label on their own liberal clergy—Winnett} Tag is applied to a label loosely attached (as to a package or a piece of baggage) giving direction or information; it often implies less permanent attachment than label {a tag pinned to his lapel, bearing his name and destination—Current Biog.} {tag a parcel for shipment} {price tags} {write out tags for all the pieces of baggage} Ticket in the relevant sense is more common as noun than verb and basically denotes a slip (as of paper, cardboard, or metal) usually conveying information or evidencing a right. Often the word is interchangeable with label or tag without loss of meaning {many retailers who attach their own store tags to the merchandise look at the manufactur- ers' tags and labels as auxiliary tickets supplementing their own—Women's Wear Daily} Ana imprint, impress, print (see corresponding nouns at IMPRESSION); recognize, identify (see corresponding nouns at RECOGNITION) 2 *characterize, distinguish, qualify Ana *indicate, betoken, attest, bespeak, prove, argue; intimate, hint, *suggest marriage, matrimony, wedlock, wedding, nuptial, espousal are comparable though not always synonymous because they all refer directly or indirectly to acts by which a man and woman become husband and wife or to the state of being husband and wife. Marriage is the common term; it may apply to the rite or ceremony {many were present at their marriage} {a civil marriage} but it more often applies to the legal or spiritual relation which is entered upon {joined in marriage} {annul a marriage} or to the state of being married {theirs was a long and happy mar- riage} or to the institution as an abstraction {nor does he dishonor marriage that praises virginity—Donne} In extended use the term is applicable to any similarly close and intimate union {let me not to the marriage of true minds admit impediments—Shak.} {the same sort of poetic effect as the Romantics obtained by the marriage of fertile words—Day Lewis} Matrimony is in most contexts interchangeable with marriage, but it is the more appropriate term in religious and sometimes in legal use; in many Christian churches it designates one of the seven sacraments {matrimony is the sacrament which unites in holy wedlock a man and a woman, between whom there is no impediment that would render marriage null and void—Currier} The term therefore may be chosen in place of marriage when a religious ceremony or sanction is implied {joined in bonds of holy matrimony} In general the term is more often applied to the relationship which exists between husband and wife than to the ceremony or the state of marriage {so prays the Church, to consecrate a vow “The which would endless matrimony make”—Wordsworth} Wedlock, chiefly legal or archaic, applies especially to marriage as a legally or ecclesiastically sanctioned relationship or state; thus, children born out of wedlock are children of parents who are not legally married {grave authors say, and witty poets sing, that honest wedlock is a glorious thing—Pope} Wedding is the common term for the ceremony that marks a marriage and the festivities that accompany it {a thousand invitations to the wedding were sent out} Nuptial, usually as the plural nuptials, is a more rhetorical term than wedding; it also carries a stronger implication of an elaborate ceremony {I don’t object to married priests, but I do strongly object to their nuptials. . . .} When a priest . . . indulges in an immense artistic wedding, I feel there is something undignified and almost unpleasant about it—Mackenzie Espousal, often as the plural es- pousals, differs little from nuptial except in its extended application. In the latter use it implies a spiritual union, especially one that is dependent upon a vow or pledge {let every act of worship be like our espousals, Lord, to thee—John Wesley} marshal vb *order, arrange, organize, systematize, methodize Ana array, range, align, *line, line up Con derange, disarrange, *disorder, disorganize, unsettle, disturb; *scatter, disperse, dissipate martial, warlike, military carry as their basic meaning belonging to, suitable to, or characteristic of war. Martial distinctively implies reference to war in general and to its essential and fundamental characteristics; it often specifically suggests the pomp and circumstance of war {standing in martial array} {the army set out to the mar- tial strains of a fife and drum corps—Amer. Guide Series: Calif.} Warlike, as a rule, implies reference to war as a reality, its actual causes, its actual methods, its actual effects; it therefore applies more often to feelings, acts, or activities that lead to or accompany real war than to those which suggest its thrilling or stirring qualities; thus, a warlike temper suggests bellicosity or readiness to fight to the bitter end, whereas a martial temperament

marvel 524 massive

suggests qualities (as dauntlessness, spiritedness, and eagerness) that bespeak one likely to behave well and valiantly in war (a warlike race) (tales of warlike deeds—Wordsworth) (everything that might be of value to a warlike power—the muskets, the cutlass—was thrown overboard—Forster) (the Huns, whose warlike fury had swept the earth like a living flame—Stoker) Military is the broadest of these terms since it may imply reference to war, to arms, or to armed forces or might (a military expedition) (the military needs of the nation) (a distinguished military career) (of military bearing, six feet in height, erect and compact, with black hair and commanding appearance—Colegrove) Sometimes military in reference to armed forces is specifically opposed to civil or civilian (a military governor) (it is beyond the scope of any military representative to effect a solution by political means—Cilley) (Spencer also could see only two main types of states, the military, fashioned primarily for war and extremely authoritarian, and the industrial state, set up chiefly for productive industry and implying democratic politics, extensive civil liberties and extreme limitations of state activities—H. E. Barnes) (it may be restricted to land, or land and air, forces and is then opposed to naval (among military and naval attaches, military rank takes precedence of "courtesy to the stranger"—Squire)

massacre n Massacre, slaughter, butchery, carnage, pogrom

are comparable when they mean a great and often wanton killing of human beings. Massacre implies promiscuous and wholesale slaying, especially of those who are not prepared to defend themselves and can make little or no resistance (the tyrannous and bloody deed is done, the most arch act of piteous massacre that ever yet this land was guilty of—Shak) (the vengeful murder of the mothers, bloodthirsty ringleader, and the massacre of most of the surviving crew by natives—Dulles) Slaughter, basically a butcher's term for the killing of animals used as food, suggests extensive and ruthless killing, whether the scene of that killing be a battle or a massacre (the chief...cut his way through the enemy with great slaughter—Irving) (determined not to repeat the slaughter of the First World War, during which hundreds of thousands of soldiers were sacrificed in fruitless frontal attacks—Bethe) (it was no longer a battle but a slaughter...from nine o'clock in the morning until seven o'clock in the evening, when it began to get dark, the killing went on—Graves) Butchery adds to slaughter the implication of exceeding cruelty or of cold-blooded indifference to the sufferings of the victims (boasting of his fights, his cruelties and his butcheries—Kingsley) (thus was the butchery waged while the sun clomb Heaven's eastern steep—Shelley) Carnage is often not easily distinguishable from slaughter, except that it sometimes carries additional connotations similar to those of massacre (a slight resistance was followed by a dreadful carnage—Gibbon) (war and all its deeds of carnage—Whitman) Pogrom applies especially to an organized massacre of helpless people carried on usually with the connivance of officials. It is often applied specifically to such a massacre of Jews, especially in one of the European countries (the pogrom at Gomel and Kishinev in Russia in 1903) (the carried out a full-scale pogrom against the Jews, slaughtering hundreds of thousands—New Republic) (the Hindus interpret every manifestation of individual violence...as the launching of a pogrom against them—Edmond Taylor)

Ana assassination, murdering or murder, slaying, killing (see corresponding verbs at kill)

massive, massy, bulky, monumental, substantial are comparable when they mean impressively large or heavy. Massive distinctively stresses solidity and strength of construction and may imply an imposing appearance (its ceilings...heavy with massive beams—Dickens) (the mainland of Asia, and especially that part of it occupied by the massive bulk of China—Owen Lattimore) (a man whose massive shoulders and determined cast of features ought to have convinced him that such an enterprise was nothing short of desperate—Shaw) Massy, chiefly a literary word, carries a stronger implication of ponderousness than massive, but an equal implication of solidity and strength (your swords are now too massy for your strengths and will not be uplifted—Shak) (hast thou a goblet for dark sparkling wine? That goblet right heavy, and massy, and gold?—Keats) (it was a castle, steadfast among storms, its side a massy wall—Sinclair Lewis) Bulky stresses size rather than weight, and the excessive amount of space occupied rather than solidity or strength of construction (a bulky parcel) (a bulky report) (its front door and steps were wide, presumably in order to permit the passage of bulky objects—Chidsey) (the museum finds it impossible to accept for display a great number of interesting but bulky items such as aircraft, guns or tanks—Report on Nat'l Development (Ottawa)) Monumental implies greatness of size, but it distinctively suggests an imposing massiveness (me, Godess, bring to arch'd walks of twilight groves, and shadows brown...of pine, or monumental oak—Milton) (the monumental fourpost bed has been taken down—Daily Telegraph) (a tall red-haired woman of monumental build—Wharton) Substantial stresses solidity and strength of construction but it carries a weak implication of size or outwardly imposing appearance and a strong implication of established quality, worth, and stability (the most substantial buildings in England today are the Old Norman cathedrals) (the British Empire crowded in their drab, substantial, gray and brown clothes—Dorothy Canfield) (substantial homes, and substantial relatives of some sort or other, on whom we could fall back—Galsworthy)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
material

526
materi

Applies to what not only has physical existence but also is tangible or can be described as a body; thus, energy in itself has no corporeal existence though it is a physical power found usually in corporeal things (in a monistic . . . sense "the mind" may be regarded as a living, growing "structure" even though it lacks corporeal tangibility—Science) (the spiritual life commences where the corporeal existence terminates—Frazer) Phenomenal implies a relation to what is known or knowable through the senses and experience, as distinguished from what is knowable only through thought or intuition because beyond perception by the senses; the term is chiefly used in philosophy and science when there is an intent to mark the line between what is actually perceived and what has been ascertained by the reason, has been accepted by faith, or is theoretical or hypothetical (phenomenal reality is often specifically called \textit{actuality}) (phenomenal nature is reduced to an array of events in the four-dimensional continuum—Jeans) (her introspective bent has yielded more and more, in her recent writing, to a determination to capture the \textit{phenomenal} world—Redman) Sensible which basically applies to what is known or knowable through sense experience and therefore, comprises the specific terms \textit{visible}, \textit{audible}, \textit{tangible}, \textit{palpable} is sometimes opposed to \textit{intelligible}, \textit{conceptual}, or \textit{notional} (there is no \textit{sensible} movement of the earth) (is this a dagger which I see before me, the handle toward my hand? Come, let me clutch thee . . . are thou not . . . sensible to feeling as to sight? or art thou but a dagger of the mind, a false creation—Shak.) (the man of science may carry us off into a world of symbols, but his symbols stand for features of the external world and he is bent on verifying them by \textit{sensible} experience—Alexander) Objective (see also \textit{fair}) implies the same kind of existence as \textit{phenomenal} and \textit{sensible}, but it stresses the apartness of the thing known through the senses from the person who perceives it through his senses; the term, therefore, implies not only material existence but an existence which is or is felt as uncolored by the prejudices and preconceptions of the perceiver (the ancient Hebrew . . . saw the rainbow as an \textit{objective} structure set in the heavens for all men to behold—Jeans) (acosmism, the theory which denies the \textit{objective} existence of the world or universe—Ingé) \textit{Ana} *carnal, fleshly, sensual, animal: actual, true, *real: tangible, *perceptible, appreciable, palpable \textit{Ant} immaterial 2 *relevant, germane, pertinent, apposite, applicable, apropos \textit{Ana} important, significant, consequential, momentous (see corresponding nouns at \textit{importance}) (vital, cardinal, \textit{essential}, fundamental \textit{Ant} immaterial \textit{Material} \textit{n} *matter, substance, stuff \textit{Ana} *element, constituent, ingredient, component \textit{Materialize} externalize, objectify, incarnate, embody, actualize, *realize, hypostatize, reify \textit{Matériel} 1 *equipment, apparatus, machinery, paraphernalia, outfit, tackle, gear 2 *armament, munitions, arms, ordnance, artillery, ammunition \textit{Matrimonial, marital, conjugal, connubial, nuptial, hymeneal} mean of, relating to, or characteristic of marriage. Matrimonial is the most general term applicable to whatever has to do both with matrimony and with marriage in most of its senses (see \textit{MARRIAGE}) (\textit{matrimonial} \textit{vows}) (the \textit{matrimonial} state) (with close fidelity and love unfigned, to keep the \textit{matrimonial} bond unstained—Cowper) (\textit{matrimonial} bliss) \textit{Matrimonial} which sometimes implies specific reference to the husband and his part in marriage (\textit{marital rights}) (\textit{marital authority}) is often used interchangeably with \textit{matrimonial} (\textit{matrimonial} vows) (the \textit{marital} relationship) Conjugal and connubial are frequently used interchangeably. More discriminatively, \textit{conjugal} refers to persons who are married (they flaunt their \textit{conjugal} felicity in one's face—Wilde) (1 count it my good fortune that never once in . . . my childhood was I the witness of any \textit{conjugal} jar—Ellis) and \textit{connubial} to the marriage state (of my friends who have been least successful in \textit{connubial} contracts—Johnson) (enter the \textit{connubial} state) \textit{Nuptial} has primary reference to the marriage rites or ceremony (the \textit{nuptial} torch—Milton) (the \textit{nuptial} ceremony was then performed by the Superintendent—Motley) \textit{Hymeneal} is a poetical or literary word, suggestive of the splendors of marriage rites and festivities (\textit{hymeneal} songs) (chorus \textit{hymeneal}, or triumphant chaunt matched with thine would be all but an empty vaunt—Shelley) (one fully expects that . . . the characters will join hands at the conclusion and dance off the stage to \textit{hymeneal} music—Booth) \textit{Matrimony} *marriage, wedlock, wedding, nuptial, espousal \textit{Matter} \textit{n} 1 Matter, substance, material, stuff are comparable when they mean what goes into the makeup or forms the being of a thing whether physical or not. In the relevant sense \textit{matter} basically denotes that of which all physical objects are made, but to the physical scientist this may imply the component of the observable universe that includes among its properties extension, inertia, and gravitation and is held to consist ultimately of relatively few kinds of elementary particles, to be convertible into energy, and together with energy to form the basis of \textit{objective} phenomena (but what is more common than \textit{matter}? We and the universe about us are \textit{matter}. We know nothing of force or energy, nor of any physical phenomenon, except through the agency of \textit{matter}—Foley) (\textit{matter} is a form of energy and . . . presumably in nature processes go on in which \textit{matter} is destroyed and transformed into more familiar forms of energy such as heat, radiation, and mechanical motion—E. O. Lawrence) while to the philosopher it tends to imply an unordered material substratum distinguishable on the one hand from immaterial qualities (as spirit or energy) and on the other from form or formed bodies (Aristotle defined the \textit{word} \textit{matter} figuratively and successfully when he said that \textit{matter} is to substance what the bronze is to the statue—Richard Robinson) (it may be worth noting here the fundamentally opposed characters of Aristotle's \textit{matter} and that of the new science. Aristotle's \textit{matter} is the source of being, but not of intelligibility. To analyze an entity into its material components is to lose its essence. Modern science's \textit{matter}, on the other hand, is the most intelligible of natural principles—W. D. Oliver) In more general use \textit{matter} often specifically applies to a particular portion or kind of physical matter (strain the solid \textit{matter} from the broth) (living \textit{matter}) \textit{Substance} usually implies a particular kind of matter (\textit{hard} \textit{substances}) and often one of known chemical or physical nature (\textit{gaseous} \textit{substances}) (an \textit{object} may be either a homogeneous mass of a single \textit{substance}, such as water, or a combination or mixture of different \textit{substances}, as, for instance a cup of tea—Jeoff) or it may distinctively suggest the particular matter or kind of matter that enters into the composition of something or gives it its characteristic properties (the \textit{substance} of this vase is porcelain) (are we not all of the same \textit{substance}—men, planets and earth, born from the heart of darkness, returning to darkness, the consoling mother—Sitwell) \textit{Material} applies basically to \textit{matter} or \textit{substance} as a constituent of phys-
mature

adj  Mature, matured, ripe, mellow, adult, grown-

matured—

mature stresses fullness of growth and readiness for
normal functioning (in warm climates human beings
mature more rapidly than in cold climates) (in his ma-
turing days, young Warren was a cheerful and attractive
person—Bryant) (he was matured by six years' prac-
tical experience in a New York militia regiment—
Robert Lowell) while develop stresses the unfolding of all
that is latent and the attainment of the perfection that is
appropriate to the species or is possible to the individual
(kitten's hunting instinct was not yet developed—
Russell) and ripen emphasizes the approach to or the
attainment of the peak of perfection (the fruits are now
sufficiently ripened) (there is nothing here of slow bud-
ing, of fruits ripening in stillness—Carlos Baker) (at
twenty-three she was still young enough to ripen to a
maturer beauty—Glasgow) Age may equal mature when it
is applied to the young (hard work ages a boy) but more
and in other contexts, routinely, it implies approach to
the period of decline or decay (the leaders of the move-
ment are aging rapidly) (as the individual matures and then
ages, he constantly has to unlearn patterns of re-
response which have ceased to be effective—Linton)

In their extended applications to things with latent
capacity for improvement all these terms imply a per-
foming with time. Mature suggests that something not
fully formed undergoes completing changes (mature a
plan) (an art that toiling ages have but just matured—
Cowper) (his ideas about the novel continued to develop
and mature—Cousins) while develop especially applies
to the unfolding into full being or effectiveness of some-
thing that is potential, latent, or nebulous (the environ-

and in other contexts, routinely, it implies approach to
the period of decline or decay (the leaders of the move-
ment are aging rapidly) (as the individual matures and then
ages, he constantly has to unlearn patterns of re-
response which have ceased to be effective—Linton)

In their extended applications to things with latent
capacity for improvement all these terms imply a per-
foming with time. Mature suggests that something not
fully formed undergoes completing changes (mature a
plan) (an art that toiling ages have but just matured—
Cowper) (his ideas about the novel continued to develop
and mature—Cousins) while develop especially applies
to the unfolding into full being or effectiveness of some-
thing that is potential, latent, or nebulous (the environ-
ment fitted to develop . . . a genius at once so subtle and so humane as that of Socrates—Dickinson (the sense of fact is something very slow to develop—T. S. Eliot)

Both ripen and age imply a becoming fit for some use, action, or purpose over a period of time. Distinctively, ripen tends to suggest the addition of desirable qualities (<time had ripened his life and mellowed its fruits—Brooks> (the civil law, which was in force in most of the countries of continental Europe and their colonies, was the accepted product of the ripened experience of many centuries of Roman jurisprudence—Encyc. Americana) while age may suggest the elimination of unwanted qualities (<water for tropical fish should be aged by standing long enough for toxic substances to escape> (aging tends toward the restoration of real equilibrium in the metal, and away from any unstable condition induced by a prior operation—Rusinoff) but often the two are used without distinction (<beef, mutton, venison, and game birds become more tender and palatable by the process of ripening, hanging, aging, or maturing—Ashbrook>)

Ana *harden, season, acclimatize, acclimate: *habituate, accustom, inure, addict

may *can

meager, scanty, scant, skimpy, scrumpy, exiguous, spare, sparse are comparable when they mean so small (as in amount, number, or size) as to fall short of what is normal, necessary, or desirable. Meager stresses thinness: as applied to persons or animals, it suggests emaciation (<meager were his looks, sharp misery had worn him to the bones—Shak>) but as applied to things in general, it implies the absence of elements, qualities, or numbers necessary to a thing’s richness, substance, or potency (<a meager diet> (an outline in itself is meager, truly, but it does not necessarily suggest a meager thing—James) (his austere and meager life bred too little sensuousness of nature and too few intellectual passions—Parrington) (<meager appropriations which necessitated the most rigorous economies—Pahlow>) Scanty emphasizes insufficiency in amount, quantity, or extent (<a scanty supply of food for the winter> (the book . . . is not, like some biographical essays with scanty material, stuffed out with appreciation and conjecture—T. S. Eliot) (<such a scanty portion of light was admitted . . . that it was difficult, on first coming in, to see anything—Dickens>) Scant may differ from scanty in suggesting a falling or a cutting short (as in amount or quantity) of what is desired or desirable rather than in what is necessary or essential (<the work of those hours was miserably scant—Hardy> (they were held in scant esteem—Grandgent) Scanty and the less common scrimpy as applied to things may be quite interchangeable with meager (<sufficiently recovered from her cold to climb out of bed and into a skimpy, strapless blue gown—Capote>)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

appraisal of the new Russian leader, based on such skimpy evidence as is now available—Uhl) (<four acres is scrimpy measure for a royal garden, even for a king of the heroic ages, whose daughter did the family washing—Notes & Queries>) but often they are more strongly colored by the related verbs, skim and scrump, and then usually suggest niggardliness or penury as the cause of the deficiency (<prevents skimpy construction that often leads to airfield shutdowns and aircraft accidents—Livingston>) (<European art books commonly come out with hundreds of huge, magnificent color plates. American art books, especially those produced by commercial publishers, are often skimpy, starved and inadequate by comparison—Frankenstein>) (<more of their breeding than they were of the scrimpy, almost stingy respectability of the menage—White>) Exiguous stresses a smallness in size, amount, extent, or capacity that is more or less inherent in the thing under consideration and makes it compare unfavorably with other things of its kind (<trains too exiguous to hold more than half an idea at a time—Amer. Speech>) (<building ships to supplement his exigous navy—Buchan>) (<a much larger dominion than the exiguous Dalriada—Times Lit. Sup.>) Sparse (see also lean, superfluous) implies merely a falling short of what is easily or fully sufficient; unlike scanty and meager, it seldom suggests resulting loss or hardship (<a spare diet> (a javascript alert, and jaunty figure—Wolfe) (the journals . . . are by no means spare and laconic—Dulles)) Sparse stresses a lack of normal or desirable thickness or density; the term need not suggest insufficiency or inadequacy in numbers or in quantity, but it always connotes a thin scattering of the units (<the sparse population of the mountainous district> (facing the facts of her defeat and her poverty and by encouraging sparse, stringent living—Anthony West)) (<a sparse congregation of old women scattered over the church—Bruce Marshall>)

Ana *thin, slender, slim, slight, tenuous, rare: thinned, attenuated, extenuated, diluted (see thin vb): jeune, flat, *insipid, inane: penurious, *stingy, parsimonious

Ant ample: copious

mean adj Mean, ignoble, abject, sordid can all be applied to persons, their behavior, or the conditions in which they live with the meaning so low as to be out of keeping with human dignity or generally acceptable standards of human life or character. Mean usually suggests such repellent antisocial characteristics as malevolence or cupidity. It almost invariably connotes small-mindedness (<those who are tempted by the flesh have usually nothing to fear from avarice or the meaner vices—Mackenzie>) (<her father is a decidedly vulgar person, mean in his ideals and obtuse in his manners—Erskine>) Often mean implies conduct or an attitude that is detestable and unworthy of a human being (<Delane . . . flung him off like a thing too mean for human handling—Wharton>) (<now and then in his pages war flashes out in romantic or heroic episodes, but for the most part it is mean and degrading, a thing to be hated—Parrington>) Ignoble, like its opposite noble, usually implies qualities of mind or soul. It frequently comes close to mean except that it seldom connotes small-mindedness. Its distinguishing implication is loss or lack of some essential high quality (as spiritual elevation, moral dignity, or intellectual excellence) (to see how those he has converted distort and debase and make ignoble parodies of his teaching—Huxley) (<these are . . . as low and ignoble, as gutter-fallen and dispiriting, as can only be found in the gloomier literature of imperial Russia—J. M. Brown>) Abject, in its most inclusive sense, means little more than extremely low in station or in degree (<had not that fear of beautiful and rich things which renders
mean

adj People incapable of associating costliness with comfort—Shaw> Sometimes it is merely an intensive applied to something that is itself low in the scale (the wars and their changing fortunes, which made abstract ruin and undreamt-of power occurrences of every day—L. G. DeRusseau) In discriminative use, however, abstract carries the implication of being cast down and so variously implies abasement, debasement, or contemptible servility (disgrace not your own king, that he should be so abstract, base, and poor, to choose for wealth and not for perfect love—Shak) resolved to be a man who . . . would live no longer in subjection to the past with abstract mind—Wordsworth> (the stagnation and the squalor that are the abstract human realities left by the ebb of power and splendor—Edmund Wilson> Sordid emphasizes the degrading baseness associated with physical or mental corruption (the counterrevolution . . . ranks among the most sordid periods in Chinese history. Compromise, blackmail and treachery mark the pages devoted to this episode—Lasker> (books filled with sordid, filthy statements based on sexual deviations—U.S. House of Representatives Report> Ana base, low, vile: contemptible, desppicable, sorry, scurrvy, cheap, beggarly, shabby, pitiable.

vb 1 intend, design, propose, purpose Ana wish, want, desire: aim, aspire, pant

2 Mean, denote, signify, import are comparable when they mean to convey to the mind a definite idea or interpretation. Not only words or phrases can be said to mean, denote, signify, or import something, but also whatever admits of interpretation or of being intellectually appraised (as a poem or an essay or an act of Congress, or the behavior of one person to another, or a set of circumstances). These words are commonly employed without distinction, but precision in their use is often possible and desirable. In their general application mean is the most common; it is often more expressive or poignant than the others when used to connote not only interpretation but also evaluation or appraisal (he can have no idea of what it means to be the daughter of Mr. de Barral—Conrad> (national prosperity . . . has two surfaces: ability to sell; employment means production—Benedict Denote, in its widest application, is distinguished from the others by its taking for its subject things that serve as outward marks or visible indications; signify, by its taking for its subject things of a symbolic or representative character (his somber expression denoted a worried mind) (slumped into a chair near the doorway, his posture denoting complete exhaustion—Douglas> (the scales in the hands of the figure of Justice signify impartiality> (The Eucharistic rite signifies one thing to Protestants and another to Catholics> (the “&c.” signify that portion of King Henry’s title . . . which, for the sake of brevity, was not written in full—Maitland) Signify often suggests distinctiveness or importance (events which signify little at the time of occurrence often attain significance when the history of that period is written) (I did not understand that I was living in a debtor land, nor what that signified—White> Import frequently conveys an implication of carrying into the mind (new ideas import little to those not intellectually fitted to receive them) but it frequently conveys closer to signify (what this is signified I could not divine—Wordsworth) (it imports little whether the sensible citizen is a Democrat or a Republican, an Episcopalian or a Presbyterian; it imports a good deal whether he is nationalistic or internationalist—Gerould>

In their special use in reference to the interpretation of the content of a term, these words are not always distinguishable. Mean, however, is capable of implying reference to the term’s full content, that is, to the idea or relation between ideas which it conveys to the mind and the suggestions which it evokes (only a philosophically minded person can grasp what beauty and truth mean in Keats’s lines “Beauty is truth, truth beauty,—that is all ye know on earth, and all ye need to know.”>) Signify can, as mean usually does not, suggest symbolic relationship between the term and the idea it conveys (the phrase “bread and butter” signifies the material needs of life> Denote (see also denote 2) can imply a logical definition in which the idea named or expressed by a term is clearly marked out and its application or range of application accurately determined ("decoration" denotes one of three ideas, the act of adorning, or a thing used in adorning, or the results achieved by one who adorns) Import, used with less frequency in relation to terms, is precise in its implications. A term imports not what it denotes, or bears as a definition, but any or all of the implications involved in its interpretation (does it [the word "necessary"] always import an absolute physical necessity . . . ?—John Marshall>

Ana *carry, convey, bear, transmit: denote, connote: define, assign, prescribe: suggest, imply, intimate, hint

n 1 average, median, norm, par

2 Mean, instrument, instrumentality, agent, agency, medium, organ, vehicle, channel denote a person or thing through or by which work is performed or an end is effected. Mean, usually in the form means, which may be the singular or plural in construction, is the mode of general of these words; it may be applied not only to persons and to such concrete things as implements, tools, and machines, but also to their actions or operations; it may also be applied to methods, policies, devices, and strategies (the habit of regarding the laboring class as a mere means to the maintenance of the rest—Dickinson> (the manufacturer who doesn’t look into every possible way and mean to show . . . where he may practically and economically find new business—Harry Martin) (the justification of barbarous means by holy ends—Muller> (the principal means of transportation was . . . Afghan camels—Hoover> Instrument is applied especially to persons who merely carry out another’s will or intention, often as tools, sometimes as dupes (he . . . turned on me . . . suspecting perhaps that I only wished to make an instrument of him—Hudson) (if they [judges] were to be used as the instruments, and the knowing instruments, for violating what they swear to support—John Marshall>

When applied to concrete things, instrument often derives connotations from its musical sense (as susceptibility to manipulation and responsiveness to touch or use) (he knew his brain was now a very uncertain instrument, sometimes quite good, sometimes a weary fount of half-formed ideas—H. G. Wells> Instrumentality is interchangeable with means but not with instrument because its chief implication is effective action by, or effective use of, the instrument (through the instrumentality of the police he was able to locate his relatives) without the instrumentality of a free press liberty could not be preserved> Agent is applied chiefly to persons and only by extension to things; the term usually names the one who does the work as distinguished from the one who wills, plans, or orders (I often think, when you scan an unconscious agent in the hands of Providence when you recalled me from Tucson—Cather> ultimately these tattooed devils . . . were turned into effective agents for the maintenance of law and order—Heiser>

When applied to a thing, agent names what effects a desired result or serves as a cause producing a definite effect

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
<the cooling agent in making ice cream is a mixture of ice and rock salt> Agency, like instrumentality, is not usually interchangeable with its related noun (agent) for it names the activity or operation of the agent or of something used to produce an effect. It is distinguished from instrumentality by its implication of causative, as opposed to effective, activity (some communicable diseases are transmitted only through the agency of vermin or insects) <presumptuous thoughts that would assign mechanic laws to agency divine—Wordsworth> Medium is more often applied to things than to persons; it designates especially a substance or material through which something, usually something intangible, is conveyed from one person or thing to another or given objective form (air is the medium through which sound and light waves are transmitted) (language is the medium through which a person communicates his thoughts and feelings) (the sculptor's medium may be bronze, marble, or wood) An organ is a part or representative that performs a particular function (the political cartoon is one of the greatest organs of propaganda—Harmsworth) or accomplishes a particular end (the cabinet's function as a general organ of government without special regard to the king's wishes—Times Lit. Sup.) or presents a particular point of view (see under journal) A vehicle is a medium that serves to carry and especially to carry effectively something which is to be revealed through it (the play was an excellent vehicle for the genius of Booth) (we must find a new form of verse which shall be as satisfactory a vehicle for us as blank verse was for the Elizabethans—T. S. Eliot) A channel is a medium that provides either an outlet or a fixed course through which something may flow from one to another (the accident which directed my curiosity originally into this channel—Lamb) - submitting material to the Defense Department without going through the prescribed Army channels—N. Y. Times> Ana *method, mode, manner, way, fashion, system: machinery, apparatus, *equipment, paraphernalia 3 in plural form means resources, assets, effects, *possessions, belongings Ana *money, cash, currency: riches, wealthiness, affluence, opulence (see corresponding adjectives at rich) mean adj average, median, par (see under average n) Ant extreme meander stray, roam, ramble, *wander, rove, range, prow, gad, gavillant, trapse meaning, sense, acceptance, signification, significance, import are comparable when they denote the idea which something (as a word, a passage, a facial expression, an action, or a situation) conveys to the mind or is intended to convey to the mind. Meaning, the general term, may be used interchangeably with any of the remaining terms; it may be used of whatever can convey information when properly interpreted and therefore is not only applicable to language and expressions or gestures but to such more cryptic things as symbols and works of art (a dictionary gives the meanings of words) (if human and the words formed from it can have an exact meaning ... that meaning must refer to those qualities, characteristics, and powers which distinguish the human being—Krutch) (understand a plain man in his plain meaning—Shak.) (the sentence has meaning to Sam even if it will not have meaning to you. A great many ruminations, discoveries, and memories contribute their connotation—Mailer) Sense (see also sense 2) denotes either the meaning or, more often, one of the specific or particular meanings, of a word or phrase, or sometimes of an allegory (some words have many senses) (the literal and figurative senses of Pilgrim's Progress) (in the sense usually implied by the word, Minneapolis has no slums, even though it admits to neighborhoods where substandard housing conditions prevail—Amer. Guide Series: Minn.) More abstractly, it refers to intelligibility in general (speaks things ... that carry but half sense—Shak.) (in the first authentic edition ... the words, I believe, ran "and a table of green fields," which has no sense—Newman) (if his work rarely has startling originality ... it always has sense and penetration of judgment—Schlesinger b. 1917) Acceptance (see also acceptance) differs from sense as denoting a meaning of a term chiefly in its stress upon the actual use of that sense or upon its acceptance by a large number of writers and speakers (it is necessary first to consider the different acceptations of the word knowledge—Locke) (philosophy) in its common ... acceptance ... signifies the search after wisdom—Fielding) (where German has separate words for each subsidiary meaning, French is content with a general term, leaving it to the context to specify which particular acceptance is relevant—Ullmann) Signification and significance (see signify under mean vb 2; significance under importance) are often used interchangeably in spite of the fact that they can be carefully differentiated in their meanings. Signification applies specifically to the established meaning of a term, a symbol, or a character, or to an established sense of a word; it usually implies that when a particular term or symbol or character is used only such an established idea is evoked in the mind of informed persons (the significations of the characters which serve as Roman numerals) (I find it very ... interesting to know the signification of names, and had written to ask him whether Jerusalem meant "the vision of peace" or "the foundation of peace"—Arnold) (the counsel for the appellee would ... restrict a general term, applicable to many objects, to one of its significations. Commerce, undoubtedly, is traffic, but it is something more: it is intercourse—John Marshall) Significance, on the other hand, applies specifically to the covert as distinguished from the established or the ostensible meaning of something; it may from its other sense (see importance) carry a connotation of weight or moment (his language is so grandiose that one wonders if his speeches have any significance) (no one knows for a certainty the significance of some early Christian symbols) (for the mathematically illiterate, like myself, these things are ... mere scribblings, without significance—Huxley) (explaining all the minute happenings of the ranch ... as though each of them had a special joyous significance—Mary Austin) Import (see also importance), like significance, may imply momentousness, but in contrast with that term, and like signification, it denotes the idea or the impression conveyed or to be conveyed to the mind by the medium of words (spoke words in her ear that had an awful import to her—Meredith) (Kim gathered the import of the next few sentences—Kipling) Ana suggestion, implication, intimation, hinting or hint (see corresponding verbs at suggest): denotation, connotation (see under denote) meaningful significant, pregnant, sententious, *expressive, eloquent Ana important, consequent, momentous, weighty (see corresponding nouns at importance) Ant meaningless measly paltry, trifling, trivial, puny, *petty, picayunish, picayune Ana *contemptible, despicable, sorry, scurvy, cheap, beggarly, shabby: *stingy, parsimonious, penurious, miserly mechanic workman, workingman, artisan, *worker, opera- asterisk (*) indicates place of treatment of each group.

meddle, interfere, intermeddle, tamper are comparable when they mean to busy or concern oneself with someone or something officiously, impertinently, or indiscriminately. One meddles with or in something that is not one's concern or is distinctly the affair or the responsibility of another or of others; the term usually suggests the interposition of oneself without right or without permission or authorization. It would be better if government meddled no farther with trade than to protect it—Franklin. His enemies accused him . . . of . . . meddling in matters which did not belong to him—Newman. It is inexpedient to meddle with questions of state in a land where men are highly paid to work them out for you—Kipling. One interferes (see also INTERPOSE 2) with someone or something or in something when one meddles, whether intentionally or not, in such a way as to hinder, frustrate, molest, check, or defeat a physicist is not interfering with nature, any more than an architect is interfering with nature when he directs the building of a house—Darrow. The Puritans made life in many ways a great deal less pleasant for the poor by interfering with their leisure—Lewis & Maude. One intermeddles with or in something when one meddles impertinently and officiously and in such a way as to interfere (The board of control had no right whatsoever to intermeddle in the business—Burke. A petition to parliament sets forth how all kinds of unlearned men intermeddled with the practice of physic—Coit. One tampers with someone or something when one seeks to make unwarranted alterations, to perform meddlesome experiments, or to exert an improper influence; the term need not suggest corruption or clandestine operation (provided, the farmer said, nobody had been tampering with any of his witnesses—Meredith. Money and sex are forces too unruly for our reason; they can only be controlled by taboos with which we tamper at our peril—L. P. Smith). The goal of the search was fixed; it was sacrilegious and dangerous to tamper with the dogmas—Thilly. Ana intrude, obtrude, interlope, butt in: *interpose, intervene: discommode, incommodate, trouble, *inconvenience

medium n *mean, instrument, instrumentality, agent, agency, organ, vehicle, channel

medium adj Medium, middling, mediocre, second-rate, moderate, average, fair, indifferent mean midway, between the extremes of a scale or measurement or evaluation. Medium usually presupposes reference to some scale of measurement or comparison, whether by literal use of an instrument, or through mental power of measuring or gauging attained by experience (a boy of medium height) (a book of medium size) (a medium grade of motor oil) (a medium gray) (the reports . . . received from about 70 publishers, large, medium and small, of hard-cover books—Publishers' Weekly) (cheddar . . . is mild, medium, or sharp, depending on the amount of acidity in the milk—Standen). Middling is seldom used when accurate measurement or gradation is implied; it is employed chiefly in estimations (as of quality, rank, or value) to describe what is as far removed from the worst or lowest as it is from the best or highest. It may appropriately describe something that fails to measure up to the best or the first rate yet does not merit disapproval or rejection (I discovered that I had been poised for an enormous sale, a failure—a middling success was cruel to take—Mailer) (both of the writers lauded highly . . . contemporaries who were certainly no better than middling performers in their several arts—Montague) (not all merchants were merchant princes. The great majority were middling people, mildly prosperous—Plumb). In commercial use middling sometimes specifically designates the second of three grades (carded yarn spun from 1-in. middling cotton—Sheldon & Blake). Mediocre tends to be more depreciative than middling; thus, one who describes a moving picture as middling implies that it was good, but far from excellent, but one who describes it as mediocre gives ground for the inference that it was distinctly less than what one might call good. Often the word is modified by an adverb of degree (it is a very mediocre poem) (he has only mediocre ability) (my performance is mediocre to the last degree—Austen) (a best seller is the gilded tomb of a mediocre talent—L. P. Smith). Second-rate implies a ranking midway between extremes regarded as first-rate and as third-rate (he is possessed of a good heart, and a second- or third-rate brain—Erskine) (fears that a strong continental coalition would soon surpass Britain . . . and the United Kingdom would gradually sink from the status of a second-rate to a third-rate power—Patrick McMahon). Frequently second-rate loses all suggestion of a position on a scale of rating and then connotes inferiority and is used interchangeably with mediocre (a second-rate singer) (a second-rate performance) (even an occasional notable critic like Edmund Wilson has dismissed him as second-rate—Cordell) (a gang of second-rate imitators who enjoyed moving in the reflected glory of the man who could outrun, outdrink, outright, outlove, and outcuss any other man in the County—Lockridge). Moderate (see also MODERATE 1) stresses limitations in quality, intensity, or degree; it implies distance from the extreme or from either of the extremes possible to a thing of its kind (moderate wealth) (a man of moderate ability) (a moderate wind) (attain moderate success) (an infusion of moderate strength) (I was a moderate scholar and a competent athlete—Benson). Average (see also under AVERAGE n) implies a theoretical level at which all things of a given kind, class, or category would find themselves or would seek, if their inequalities

meet

vb 1 Meet, face, encounter, confront can all mean to come across or to run into someone or something face-to-face or as if face-to-face. Meet fundamentally implies the action of two or more persons or things which from different directions come across each other by design or by accident; often it implies nothing more than the narrow strip of Syrian seaboard which they occupied when we first met them in history—Clodd <where the Mohawk meets the Hudson river> <the little girl ran to meet her father as he came up the hill> Beyond this, the word may suggest such actions or intentions as finding, experiencing, or dealing with successfully <I never met with such kindness before> <it is perhaps only in England that such ideas can be expressed without meeting anger or ridicule—Sykes> <Hobart . . . could talk; he could assert; produce opinions and information, but he couldn't meet or answer arguments—Rose Macaulay> Face may imply nothing more than a standing or a meeting face-to-face (as of persons or things that merely present their faces or their fronts to each other) <they faced each other across the table> <a very capacious couch faced a generous fireplace—Sidney Lovett> but it more often emphasizes the act or intention of one who with courage or resolution or confidence, or with effrontery, and with desperation, looks upon or meets another person or thing <the government faces a strong storm of protest over its decision—Current History> <the artist must face life and defy it—Bambrick>

melancholic

adj Melancholic, melancholy, atrophial, hypochondriac are comparable when they mean gloomy or depressed, especially as a manifestation of one’s temperament or state of health. Melancholic and melancholy are often used interchangeably without additional implications or suggestions <the drawings Thuber has produced . . . calling into being an ireradicable population of fierce-looking women, furive men, and gently melancholic dogs—Newsweek> <the Cape Colored, a gentle and melancholy people—N. Y. Times> although each can be used discriminately to suggest the differences inherent in their related nouns (see melancholía and melancholy under sadness). In such use melancholic describes a person who is afflicted with or inclined to melancholia <those recurring moods of melancholic suspicion which had so tortured me . . . remained absent and she seemed on the road to recovery—Ellis> Melancholy, on the other hand, describes a person, or the mood, disposition, acts, or utterances of a person, who is excessively sad or detached in spirit and, usually, averse to what is cheerful or gay <"They say you are a melancholy fellow."

"I am so; I do love it better than laughing"—Shak. <a changed smile flickered like sunlight over the melancholy countenance—Wylie> <there is no merriment . . . comparable to that of melancholy people escaping from the dark region in which it is their custom to keep themselves imprisoned—Hawthorne> Atrribial preserves the implication of an
unhealthy physical condition more strongly than the preceding words; often in modern use it suggests the morose or choleric disposition of the dyspeptic or the predilection for gloom of those who have been subjected to severe strain (neither were those plump rosy-gilled Englishmen that came hither, but a hard-faced, atrabilious, earnest-eyed race—J. R. Lowell) (that the American genius was foredoomed to fail was the atrabilious Ames's firm conviction—Brooks) Hypochondriac comes close to atrabilious in its suggestion of constitutional gloominess but it implies also an unwonted anxiety about one's state of health (she was rather hypochondriac and was gloating over the tale of her symptoms—Edmund Wilson) (the culture just had gone hypochondriac, and all members of the society, whatever their congenital individual dispositions, had fear and pessimism pounded into them from childhood on—Kroese)

**melancholy**

*adjective*

1. melancholic, atrabilious, hypochondriac

- morose, gloomy, glum, *sullen, dour, saturnine*: Ana
- morose, morose, morose: Ant
- morose, morose, morose: Con

- melancholy, dolorous, doleful, lugubrious, rueful, plain-tive—are comparable when they mean expressing or suggesting sorrow or mourning. All of these words have, to a greater or less extent, weakened from their original meaning and are often used with a half-humorous connotation.

- Melancholy may stress a quality that inspires pensiveness or sad reflection or awakens mournful thoughts or recollections which are not only not necessarily painful or disagreeable, but often agreeable, especially to the poetic or thoughtful mind (sweet bird, that shunn'st the noise of death) (I have in the present moment only a melancholy pleasure of an easy conscience—Warren)

The term more frequently applies to something which expresses or excites dejection or depression (his melancholy old house on the hill—Deland) (that melancholy problem of a money-earning occupation which lay so heavily on my thoughts—Ellis)

Dolorous describes what is lamentable in its gloom or dismalness or is exaggeratedly dismal (that dolorous aspect of human nature which in comedy is best portrayed by Molière—T. S. Eliot) (a rapid succession of warnings, as dolorous and pessimistic as the little booklets of possible mishaps that accompany the sale of English cars—Gallant) Doleful and lugubrious are also frequently applied to what is exaggeratedly dismal or dreary, but doleful connotes a weight of woe (a doleful and lackadaisical air) (the mourners, who are singing a very doleful dirge—Goodenough) and lugubrious, an undue, and often an affected, heaviness or solemnity (dark funereal barges like my own had flitted by, and the gondoliers had warned each other at every turning with hoarse, lugubrious cries—Howells) (a lugubrious obituary quality in the treatment given by the American press to Sir Winston's resignation—Reporter) (a lugubrious place which filled me with dread—Henry Miller)

Rueful implies sorrow and regret but it often suggests a quizzical attitude (the woebegone heroes . . . eyed each other with rueful countenances—Irving) (the fleeting glory of Napoleon, the rueful memory of Josephine and her somehow less enviable successor—Cassidy) Plain-tive applies chiefly to tones, sounds, utterances, or rhythms that suggest complaint or mourning or that excite pity or compassion (the plaintive cries of a child) (he sighed, his voice became plaintive—Huxley) (the clarinet sings, in its eerie plaintive tone—S. R. Watson)

- Ana pathetic, poignant, *moving, touching*: hopeless, forlorn, despairing (see despondent): pensive, reflective, *thoughtful: discomposing, disquieting, perturbing, disturbing (see discompose)

- Con happy, *glad, cheerful, joyous, joyful, lighthearted*: *lively, vivacious, gay

- melee fracas, row, *brawl, broil, rumpus, scrap

- Ana altercation, *quarrel, wrangle, squabble*: *confusion, disorder

- Ana *tender, warm, sympathetic, responsive, warm-hearted

- Ant unmellow: green—Con raw, crude, callow, uncouth—rude, rough

- melodramatic histrionic, theatrical, dramaturgic, *dramatic

- Ana *showy, pretentious, ostentatious*: *sentimental, romantic, maudlin, mawkish

**melody, air, tune** all denote a clearly distinguishable succession of rhythmically ordered tones. Melody stresses the sweetness or beauty of sound produced by such an arrangement of tones (sweetest melodies are those that are by distance made more sweet—Wordsworth) It also commonly suggests expressiveness or moving power and a carefully wrought pattern (nerve-dissolving melody—Tennyson) (tis a rich sobbing melody, withReliefs and majesty—Keats) Technically, as applied to complex musical structure, melody implies a contrast to harmony; it designates that kind of musical beauty produced by a continuous series of tones in one or more of the voice parts, in distinction from that produced by simultaneously sounded tones in all the voice parts. Air is applied technically to the dominating melody, usually carried by the upper voices (as in a chorale or part-song) (and whistle all the airs from . . . Pinax—Gilbert)

In more general use air is often applied to an easily remembered succession of tones which identifies a simple musical composition (as a song, a ballad, or a Waltz) and which is more commonly and more precisely called tune; thus, one may refer to the air, or the tune, of a song (thum the air of the Marseilaise) (left her fancwork and played for them some old Scotch airs—Black) (he . . . can invent a good tune which immediately captivates one—Dyeneley Hussey)

Tune is also applied to the musical setting of a text (as a ballad, psalm, or lyric) (a hymn tune) and to a simple composition whetherpassion or harmonized (a dance tune) (many hundred texts and tunes of English-Canadian folk songs—Report on Nat'l Development (Ottawa))

**melt** liquefy, deliquesce, fuse, thaw

**member** part, portion, piece, detail, division, section, segment, sector, fraction, prog, piece, detail, section

- Ana *element, component, constituent*: branch, limb

- shoot, bough

- memento *remembrance, remembrancer, reminder, memorial, token, keepsake, souvenir

- Ana token, earnest, *pledge*: gift, present, favor

- memoir *biography, life, autobiography, confessions

- memorable *noteworthy, notable

mending—Library Jour. In extended use, too, repair may be quite like mend. The plain fact is that peace—or what passed for peace before it was broken—cannot be mended, cannot be repaired, cannot be restored—MacLeish—but often it more specifically implies a making good or making up for something reminds himself that he had not wept for the death of his mother a year or so earlier, and proceeds to repair the omission—Times Lit. Sup. Although his range of reading was wide, he could not in some respects repair the lack of early education—Colliot.

Patch basically implies a mending by covering, filling in, or reinforcing such a defect as a hole, rent, or weak spot, typically with the same or a similar material. Patch overalls worn thin at the knee, patch holes in the road with asphalt. Patch an inner tube. Sometimes, often with up, it implies careless, hurried, clumsy, or temporary mending ($4,800,000 appropriated to start a new prison in New Jersey has been since diverted to patch up the 118-year-old penal slum at Trenton—O'Leary) and in much of its extended use this is the aspect stressed he hastily tries to patch up his marriage and purify his politics—Beverley. Relations between the two men had to be patched up repeatedly—Isselb Ross. Sometimes, often with together, patch implies a making from bits and pieces or odds and ends, patch a quilt, patch a car together from pieces out of the junkyard. His life must be patched together from scattered references in the contemporary colonial records—J. T. Adams.

mercy, charity, grace, clemency, lenity are comparable when meaning the disposition to show compassion or kindness in one's treatment of others, especially of those who offend one and who are in one's power to punish or rebuke. Mercy implies compassion so great as to enable one to forbear, even when justice demands punishment, or to give help or comfort even to the lowest or most undeserving <earthly power doth then show likest God's when mercy seasons justice—Shak.> <souls who God's forbearance try, and those that seek his help, and for his mercy sigh—Wordsworth> Charity stresses benevolence and goodwill, especially as it reveals itself not only in giving generously (for this sense see charity 2) but in the understanding and kindly concern with others' welfare. Justice (with malice toward none, with charity for all—Lincoln) lacks another faculty: the faculty which theologians still call charity. Nowhere, in the whole of the volume, does any character act out of genuine kindness—Time>

(1) is far commoner at the University to meet men of great attainments combined with sincere humility and charity—Benson>

Grace implies a benign attitude toward those who are dependent on one and a disposition to grant favors or to make concessions to them <each in his place, by right, not grace, shall rule his heritage—Kipling> <(that quiet but unabashed hospitality which is a common grace in Mexican households—Cather> <though the wages of sin are exacted with biblical sternness, a tender grace is present in a hundred minute particulars—Gaither> Clemency (see also clement under forbearance) implies a mild or merciful disposition in one whose duty or function it is to administer justice or to punish offenses <clemency . . . is the standing policy of constitutional governments, as severity is of despotism—Hallam> <(off went poor Tom . . . to rejoice in the clemency that spared his appearance at Sessions—Meredith> Lenity differs from clemency only in its greater emphasis on lack of severity. It often suggests undue gentleness or softness or even at times undue leniency <what makes robbers bold but too much lenity?—Shak.> <(if it produces a proper lenity to our citizens in captivity, it will have the effect we meant—Jefferson> <errors which, had he been regarded with a less affectation lenity, would have stood against his official account—S. H. Adams> Con vengeance, revenge, retribution, reprisal, *retaliation: punishment, chastening, chastisement, disciplining or discipline, correction, castigation (see corresponding verbs at PUNISH)

mere, bare are often employed with little or no distinction in the sense of being such as the term qualified states but nothing more. But mere is commonly used to emphasize the limitations of a thing, as if it were declared to be "simply what it is and nothing more" <it began to rain—not a mere hill-shower, but a good, tepid, monsoonish downpour—Kipling> <is mere living . . . without reference to any intrinsic values, a thing of any worth?—Inge> <(the saying that we are members one of another is not a mere pious formula . . . without any meaning: it is a literal truth—Shaw> Bare is stronger and frequently
meretricious

suggests that the thing just escapes falling short of what it actually is (elected by a bare majority) (the short-lived Ukrainian Republic which lasted a bare four years before succumbing—Current History) (some must know higher mathematics, but the bare elements suffice for those to whom mathematics is distasteful—Russell)

Ant: faults: defect

merit vb *deserve, earn, rate

Ana reward, award (see corresponding nouns at PREMIUM): *worth, value: gaining or gains, winning or winnings (see GET) 2 *excellence, virtue, perfection

method, mode, manner, way, fashion, system are comparable when they denote the means taken or the plan or procedure followed in doing a kind of work or in achieving an end. Method may denote either an abstraction or a concrete procedure, but in both cases it implies orderly, logical, and effective arrangements (as of one’s ideas for an exposition or an argument, or of the steps to be followed in teaching, in investigation, in the treatment of a disease, or in any kind or piece of work); often, also, the term connotes regularity or formality in procedure (his teaching is too informal to be said to have method) (the inductive method of reasoning) (the crude methods of trial and error—Sazzallo) (the method of unfolding the course of a plot must in some ways be different in a play meant for acting and in a book meant for reading—Montague) (always submitted the vowels in accordance with the Arabian method of orthography—Krutch) (surely not to leave to figural chance the things that method and system and science should order and adjust—Cardozo) Mode (see also fashion 2; state) is sometimes used interchangeably with method, but it seldom stresses orderly or logical arrangement; rather, it denotes an order or course pursued as the result of custom, tradition, or personal preference (the reasons given . . . do not seem very plausible to our modes of thought—Binyon) (a man to whom music was a necessary mode of expression—Read) (a study of fictional villains and the mode their villainy assumes—Austin Warren) Manner is often used in place of mode where the reference is to a personal or peculiar course or procedure, or to a method, whether pursued by a number of persons or not, that seems to be individual or distinctive (mark the manner of his teaching—Shak.) (the mathematician . . . is not capable of giving a reason in the same manner as the dialectician—Jowett) (it is not consistent with his manner of writing Latin—Sellery) Way (see also way 1), the most general of these terms, may be used in place of any of the rest and is found in many familiar idiomatic expressions where theoretically method, mode, or manner might be more explicit (religion implies not only a way of worship but a way of life) (it was the white man’s way to assert himself in any landscape, to change it, make it over a little . . . it was the Indian’s way to pass through a country . . . and leave no trace—Cather) (the century has brought . . . do not seem . . . take it to mean one’s way in any landscape, to change it, make it over a little . . . it was the Indian’s way to pass through a country . . . and leave no trace—Cather) (the century has brought . . . do not seem . . . take it to mean one’s way in any landscape, to change it, make it over a little . . . it was the Indian’s way to pass through a country . . . and leave no trace—Cather) (the century has brought . . . do not seem . . . take it to mean one’s way in any landscape, to change it, make it over a little . . . it was the Indian’s way to pass through a country . . . and leave no trace—Cather)

mind n 1 *memory, remembrance, recollection, reminiscence, souvenir

2 Mind, intellect, soul, psyche, brain, intelligence, wit are comparable when they mean the sum total of powers, often felt as a distinct entity, by means of which each individual knows and understands both his inner life and the external world and establishes effective relations between them and which are commonly felt as the distinctive possession of human beings. Mind indicates the complex of man’s faculties involved in perceiving, remembering, considering, evaluating, and deciding; it contrasts variously with body, heart, soul, and spirit (the mind must have its share in deciding these important matters, not merely the emotions and desires—Rose Macaulay) Mind may indicate the peculiar complex of a particular individual as differing from all others (the mind of a dreamer joined to the temperament of a soldier—Buchan) Intellect, sometimes interchangeable with mind, may focus attention on the powers of knowing and thinking by which one may comprehend, consider, and conclude and especially the more coldly analytic powers, independent of and discrete from willing and feeling (the emotionalist keeps himself or herself in luxurious feeling and pathetic imagination, which makes no severe call upon either the will or the intellect—Inge) (now the significance of Sir Thomas Browne lies in the fact that he was at once by intellect a force in the forward movement and by temperament a reactionary—More) Soul (see also SOUL 2), used with considerable variation in meaning and suggestion, may indicate that principle which vitalizes, directs, selects, or inspires in matters emotional and volitional as well as mental (my inner existence, that consciousness which is called the soul—Jeffries) (the soul is an intelligent, sensitive, and vital principle, a trinity which forms and moves the body predisposed to such action, as well as feels, thinks, and wills—Thilly) Psyche may refer to the totality of self composed of all attributes, powers, and activities not purely bodily or somatic but definitely including the unconscious or subconscious (by the psyche I understand the totality of all the psychic processes, both conscious as well as unconscious; whereas by soul, I understand a definitely demarcated function-complex that is best characterized as a “personality”—Baynes) Brain, often as the plural brains, may more forcefully than intellect focus attention on powers of individual comprehension or independent thought (it requires brains and education to follow the argument—Inge) (I have ever even felt inclined to write anything, until my emotions had been unduly excited, my brain immoderately stirred, my senses unusually quickened, or my spirit extravagantly roused?—Galsworthy) Intelligence is likely to imply specific ability to cope with problems and situations and may apply to exhibition of the play of powers of the intellect or comparable ones (it had turned capable men into mere machines doing their work without intelligence—Shaw) (wild animals are not automata—they have intelligence if they lack intellect—Clarke) Wit, often as the plural wits, may refer to a mind marked by inborn capacity, strong common sense, bright perception, or ready intelligence (the un-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
tutored natural wit of savages—Shaw} <everyone had to be a jack-of-all-trades, everyone had to live by his wits—Brooks>  

**Ana** *power, function, faculty:* *reason, understanding, intuition: wisdom, judgment, *sense, gumption*  

**mind vb 1** *remember, recollect, recall, remind, reminisce, bethink*

**miracle** *wonder, marvel, prodigy, phenomenon*  

**miraculous** *supernatural, supranatural, preternatural, superhuman*  

**mirage** hallucination, *delusion, illusion*  

**mirror n** *model, example, pattern, exemplar, ideal, standard, beau ideal*  

**mirth, glee, jollity, hilarity** are comparable when they mean the mood or temper of a person or a group of persons manifesting joy or high spirits especially in laughter, play, or merrymaking. **Mirth** often implies lightness of heart and a love of gaity; it may, however, imply great amusement or cause for laughter. **Darcy was not of a disposition in which happiness overflows in mirth—Austen** <some of them literally throwing themselves down on the ground in convulsions of unholy mirth—Kipling> <they seem to quiver on the edge of mirth, as if some deep continual laughter was repressed—HALLAM Tennyson>  

Glee is often employed in reference to an individual who by reason of special circumstances is filled with joy, delight, or happiness, and shows his exultancy by laughter, smiles, and cries of joy. <full well they laughed, with counterfeited glee, at all his jokes, for many a joke had he—Goldsmith>  

The best constitutions will not prevent ambitious politicians from succumbing with glee and gusto to the temptations of power—Huxley> But glee may express the exultation of one who takes more or less malicious delight in another's misfortunes or predicaments <in great glee over his friend's embarrassment> <with malicious glee they quoted a previous boast of the President's—F. L. Allen>  

<it betrayed the glee felt by the mean-spirited when they see people who do not deserve humiliation forced to suffer—it—West> **Jollity**, on the other hand, usually implies mirth in a group, especially a merrymaking group. Distinctively, however, it connotes exuberance and lack of constraint and may imply revelry of any kind <midnight shout and revelry, tipsy dance and merriment—Milton> <contributed more than his share of the jollity by turning out puns by the hamperful—Balliett>  

**Hilarity** fundamentally implies the exhilaration of spirits (as by wine, pleasurable excitement, or great amusement) <wine gives not light, gay, ideal hilarity, but tumultuous, noisy, clamorous merriment—Johnson> <through all the works of Chaucer, there reigns a cheerfulness, a manly hilarity—Coleridge> but it often carries implications of boisterousness or exuberance <he entered wholeheartedly into the hilarity of the boys, till he too was talking only nonsense—Rövvaag> <the hilarity of a New Year's Eve celebration>  

*Ana* *cheerfulness or cheer, lightheartedness, joyfulness, gladness, happiness (see corresponding adjectives at GLAD): joy, *pleasure, delight: merriment, bliteness, jocundity, joviality (see corresponding adjectives at MERRY)*  

**miscanthropic** pessimistic, misogynic, *cynical*  

**miscellaneous**  

**miscarry** *failure, neglect, default, dereliction*  

*Ana* abuse, maltreatment, misuse <see corresponding verbs at ABUSE>  

2 *abortion*  

**miscellaneous, assorted, heterogeneous, motley, promiscuous** are comparable when they mean marked by diversity or variety and are applied to the things that make up a group, a collection, or a mass, or to a group, collection, or mass. **Miscellaneous** usually implies a mixture of many kinds, showing few signs of selection, and often suggesting dependence on chance <there is always a miscellaneous assemblage at the meetings of the association> <Joyce's wide and miscellaneous acquaintance—Colom> <the contents of the chests were of the most miscellaneous description:—sewing utensils, marling spikes, strips of calico, bits of rope—Melville> <what appears at first to be a miscellaneous lot of books often reveals, on closer inspection, an interesting pattern of interrelationships—Redman>  

**Assorted** <see also ASSORT> and the related noun **assortment** also imply a mixture but not a haphazard one; they carry the implications of a selection including various kinds or involving consideration of various tastes or needs <a box of assorted candies> <there were passable performances of potpourri from assorted operas—Copland> <none of these authors has published books of assorted essays—K. B. West> <a case containing an assortment of tools>  

**Heterogeneous** is applicable chiefly to masses or groups in which the individuals or the elements are in proximity or close relationship to each other by chance; it suggests not only variety or diversity in the individuals or the elements but also absence of uniformity or unity and little evidence of fusion <the task of transforming a heterogeneous selection of mankind into a homogeneous nation—Russell>  

(the family is heterogeneous enough to make quite good party in itself—Rose Macaulay> <the heterogeneous structure of granite> <a photograph lacks organization and unity . . . . It is haphazard, heterogeneous, aimless, and amorphous—just as is nature—S. S. Van Dine>  

**Motley** adds to heterogeneous the suggestion of discordance in the individuals or elements or their striking contrast to each other; perhaps from the notion of discordance it is more deprecative than the foregoing terms and is more likely
to qualify groups made up of elements felt as inferior or undesirable (one would enquire from whence this motley style did first our Roman purity defeile—Dryden) (motley support drawn from Tammany Hall Irish, Wall Street bankers, and odds and ends of all factions—Parrington) (that motley aggregation of impudent and flattering camp followers—Walker) Promiscuous may suggest haphazardness or the appearance of it, but it usually implies selection that is completely devoid of discrimination and that results in disorderly confusion; thus, a miscellaneous acquaintance may imply a catholicity of taste, but a promiscuous acquaintance implies an absence of taste and good judgment; from a description of a club's membership as heterogeneous one might infer its interesting diversity but from a description of it as promiscuous one can infer only a diversity that is distasteful and senseless from the point of view of the speaker or writer (a classless, promiscuous world where True Story and London's New Statesman and Nation share the same rickety table—Time) For this reason, promiscuous as applied specifically to people or their acts, emotions, and relations stresses not only lack of discrimination, but lack of restriction within bounds set (as by prudence, good sense, or sound morals); thus, promiscuous charity implies licentious disregard of normal standards of conduct (safety involves some order and discrimination, rather than a promiscuous acceptance of all our impulses as good—Cohen) (the dangers to civil freedom of a promiscuous and unprincipled attack on radicalism—Schlesinger b. 1917)

backdrop

miserable, wretched both describe something (as a person's state of health or of mind, a state of affairs, a human being with reference to his condition or character, or a thing compared with others of its kind) that is deplorably or contemptibly bad or mean. A person is miserable if in misery or in a state either of extreme or acute distress of body or mind (Plato) would forbid any novelist to represent a good man as ever miserable—Ellis (Gideon has been absolutely miserable, and gone about like a man half stunned, ever since it happened—Rose Macaulay) or of pitiable poverty or degradation (a miserable creature of a crazed aspect...shattered and made drunk by horror—Dickens) A thing is miserable when it is exceedingly mean or paltry, and provocative only of misery in the person affected or of strong distress or dislike in the observer (miserable cold) (miserable dinner) (the squoral of mean and miserable streets—Binyon) A person is wretched who is extremely unhappy or abjectly despondent (as from want, grief, oppression, affliction, or anxiety); a thing that relates closely to the happiness of a person is wretched if it produces such dejection or mental suffering (O cruel death! To those you are more kind than to the wretched mortals be left behind—Walker) (it was her unhappy lot to be made more wretched by the only affection which she could not suspect—Conrad) (she's "poor Ellen" certainly, because she had the bad luck to make a wretched marriage—Wharton) A thing, in general, is wretched if it is extremely or deplorably bad (a wretched French cabaret, smelling viley—Meredith) (wretched crops) (it was the wretched truth, and not something I had conjured out of imagination—Deasy)

Ana forlorn, hopeless, despairing, *despondent: pitiable, piteous, pitiful; dolorous, dolorous, *melancholy

Ant comfortable

miserly penurious, parsimonious, niggardly, tight, tight-fisted, *stingy, close, closefisted, cheesepearing, penny-pinching

Ana avaricious, greedy, *covetous, grasping: *mean, sordid, abject, ignoble

Con bountiful, bounteously, openhanded, munificent, *liberal, generous: benevolent, *charitable, altruistic

miser *distress, suffering, agony, dolor, passion

Ana adversity, misfortune: affliction, visitation, *trial, tribulation: melancholy, dejection, *sadness, depression

Ant felicity, blessedness—Con *happiness, beatitude, bliss: comfort, ease, repose (see REST)

misfortune, mischance, adversity, mishap are comparable when they denote bad luck or adverse fortune or an instance of this. Misfortune is both the most common and the most general term; it is applicable equally to the incident or conjunction of events that is the cause of an unhappy change of fortune (by misfortune he lost his job) or the ensuing state of distress (a crook and stupid person who had fallen through luck into losing prosperity. His every good fortune spurred others with misfortune—Malamud) and it may denote a particular unfortunate incident (they could by cooperation brave misfortunes and supplement each other's efforts in bettering the lot of the common man—Middle East Jour.)

Mischance rarely applies to a state of distress but is otherwise very close to misfortune from which it differs chiefly in greater objectivity. While sometimes used to imply grave affliction or even death it is especially appropriate when the situation involves no more than slight inconvenience or minor annoyance (I threw a stone and hit a duck in the yard by mischance—Yeats) (they proceeded on their journey without any mischance—Austen)

Adversity, on the other hand, denotes the state or the instance but not the cause; it is distinctly the strongest of these words and in its typical use implies a state of grave and persistent misfortune (a wretched soul, bruised with adversity—Shak.) (what fairy palaces we may build of beautiful thought—proof against all adversity—Ruskin)

In application to the instance adversity is normally used in the plural (the many misfortunes and adversities Bolivia has suffered have brought this national spirit to a high pitch—Americas) Mishap, (see also ACCIDENT) like mischance, commonly implies triviality (directed the concert without any of the mishaps expected of a two-year-old's performance—Current Biol.)

Brown)* Ana displacex (see REPLACE): derangement, disarray, *dis-order

mistranslation, falsify, belie, garble mean to present or represent something in a manner that is contrary to the truth. Mistranslation usually implies an intent to represent or portray falsely, and therefore may take as its subject not only a person or his utterance but also such things as an organization, a political platform, or a cartoon; it often carries a suggestion of deliberate lying, but it may suggest bias or prejudice or a desire to do injustice *(mistranslation a candidate's statement)* *(mistranslation the value of an article)* *(the account misrepresents not only his actions but his motives)* Falsify implies a perversion of the truth, either by deliberately altering the facts in whole or in part *(falsify bookkeeping records)* *(falsified her account of the accident)* or by giving something an appearance that does not accord with the truth or reality *(falsify the meaning of a document by an incorrect translation)* *(good breeding has made the tongue falsify the heart—Steele)* *(a low-priced sunglass lens said to be completely effective without falsifying the colors seen through it—Newsweek)* Belie implies an impression given that contradicts or is at variance with the truth or the facts; it usually takes as its subject an appearance, a manner, or form of speech and lacks the implication of intent that is usually present in the preceding words *(his confident words were belied by his anxious look)* *(a brusque manner that belies a real kindness of heart)* *(you are an Englishman . . . unless your physiognomy belies you—Kingsley)* Garble implies a mutilation or distortion of statements, testimony, evidence, or messages that need not be deliberate but that creates a wrong impression of the original and frequently gravely alters its tone or implications *(the newspapers have sadly garbled the account of his speech)* *(by the time the story had passed from mouth to mouth until it reached him again, it was so garbled that its original form was barely recognizable)* *(the manufacture and dissemination of propaganda literature, for the purpose of rousing the passions of the people by garbled statements—Inge)* Ana *disguise, dissemble, cloak, mask, camouflage: simulate, counterfeit, feign (see ASSUME): *lie, prevaricate, equivocate, palter

misrepresentation *lie, falsehood, untruth, fib, story Ana dishonesty, deceitfulness, mendaciousness or mendacity (see corresponding adjectives at DISHONEST): sophistry, doctoring, loading, weighting, adulteration (see corresponding verbs at ADULTERATE): sophistry, casuistry (see FALLACY)* misrepresent *lie, prevaricate, equivocate, palter

mistake vb Mistake, confuse, confound are comparable when they mean to mix up things, typically by taking one thing for another. One mistakes one thing for another when by an error of perception or of thought or as a result of a predisposition or a bias one fails to recognize the thing or to comprehend its real nature and identifies it with something not itself or with something of another nature *(pointed out that Johnson's "s and o's have been mistaken one for the other—Sherbo)* *(the tendency of the rest of us to gush for vigor and substitute mistaken ideas for the colors seen through it—Newsweek)* *(far too intellectually keen to confuse moral problems with purely aesthetic problems—Ellis)* One confounds things, or one thing with another, when one mixes them up so
hopelessly that one cannot detect their differences or distinctions. Confound usually carries a stronger connotation of mental bewilderment or of a muddled mind than the preceding words and is accordingly often preferred when the differences are more or less obvious to a clear-headed or intelligent person. <p>Courage must not be confounded with brutality. Brutality is pleasure in forcing one's will upon other people; courage is indifference to personal misfortunes.—Russell</p> <p>The temptation to confound accumulated knowledge and experience with intrinsic progress is almost irresistible—Inge</p> <p>**Note:** A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.</p>
moan 543 model

pound of both—Scott> (rare compound of oddity, frolic, and fun—Goldsmith) In its technical senses compound is definitely restricted in application. In chemistry a compound is a distinct substance formed by a union of two or more elements or radicals in definite proportions by weight (water is a compound of oxygen and hydrogen) As applied to words, a compound is a word or group of word elements which is formed of recognizable parts but has a distinct sense often not inferable from the meanings of its component parts. A compound may be written solid (as blackboard), hyphenated (as long-distance), or open (as all right). Composite is often interchangeable with compound in its general sense, but there is a tendency to prefer composite when the constituent parts are artificially or fortuitously combined (the American people is a composite of many races) (the opinions of America are formed from the composite of the voices of America, official and unofficial, true and false—A. E. Stevenson) An amalgam is basically an alloy made by adding mercury to a metal; the term is particularly applicable to such alloys that are intended for use in dental restoration, usually contain several metals in addition to mercury, and set into a firm mass after a relatively brief period of time. In its extended use amalgam may draw on the notion of complexity of mixture (one’s judgment is inevitably an amalgam of impressions of the work and impressions of the man—T. S. Eliot) or it may stress the hardening into final form (a mixture of affection and contempt, which later days hardened into an amalgam of generosity and sadism—Wecker)

Ana analogous words  Ant antonyms See also explanatory notes facing page 1

〈the Saint whose name is given to a child serves as . . . an ideal model to be imitated—Nurnberg & Rosenblum〉 Example applies chiefly to a person (or his acts or conduct) that is or may be imitated by others; the term usually implies that the person, or the act, or the conduct, for some good reason is one that is likely to be imitated, whether good or bad, right or wrong (a father should set a good example to his children) (she always followed the example of her mother in her social behavior) (one of the immortal examples of a true man in a world of bounders, cowards, and squeaking specters—Sullivan) Sometimes, however, example applies to what is not intended to be imitated, but rather to serve as a warning (let it profit thee to have heard, by terrible example, the reward of disobedience—Milton) Example is also used in a highly abstract sense in antithesis to precept, then implying the setting of an example, usually but not necessarily a good example (the mistake of thinking that all can be done by precept, when . . . example is no less potent a force—Benson) Pattern applies either to the divine archetype of a thing or to a carefully worked out design or plan (as an architect’s drawing) to be followed in fashioning a thing (according to an heavenly pattern . . . which He had fashioned in his wise foresight, He man did make—Spenser) (almost all the common things we use now . . . are made by machinery, and are copies of an original pattern—Jevons) In a more general sense (see also FIGURE 3) pattern applies to what merits or seems to merit imitation; it often differs from model in suggesting a more clearly worked out design, or a fuller presentation of details, or in connoting fixity or compelling power (a housewife in bed, at table a slattern; for all an example, for no one a pattern—Swift) (the ancient pattern of life had been woven continuously for so many centuries that even illiterate farmers knew how to be courtly and dignified—Blofeld) Exemplar often comes closer to pattern than to example because it usually applies to something set before one as worthy of imitation and, therefore, inherently good (Christ is . . . exemplar that all preachers ought to follow—Latimer) (dear . . . as an exemplar of goodness, probity, and pure life—Thackeray) Sometimes, however, exemplar is specifically applied to a person or thing that exhibits a quality, or sums up all the characteristics that distinguish a type, whether that quality or type be in itself good or bad (Sisyphus, the legendary exemplar of cunning—Thirlwall) (Stendhal’s Julian Sorel . . . this exemplar of ruthless individualism—Huyshey) Ideal may specifically imply existence not in the actual world but in the mind and therefore may suggest a remoteness from reality and especially perfection exceeding what is possible in reality (traditions grew up around his name, to be interpreted according to the hearers’ own ideals of personality and education—D. E. Smith) But ideal also may apply to a real person or thing that is held before one as embodying or representing the perfection one hopes to realize or attain (the boy found his ideal in his father) (the Saint whose name is given to a child serves as . . . an ideal model to be imitated—Norhurnberg & Rosenblum) concertedly ideal is almost indistinguishable from standard when it applies not to a person or object that serves as a pattern or exemplar, but to something (as a rule, a practice, an aim, or an established level of excellence) by which one seeks to maintain a high quality in a product or of performance (the ideal of general cultivation has been one of the standards in education—Eliot) (accuracy is still a noble and inspiring ideal. It is the morality of the intellect: it prescribes what it ought to strive for—Ballard) (each generation . . . has its own ideals and its own standards of judgment—Crothers) But standard (see also STANDARD 2) is inter-
changeable with ideal only when it applies to what is the test of perfection or of human perfection (the very art . . . incommensurable with any standard except that of pure beauty—I refer of course to the art of music—Dickinson) (with the spread of impressionism literature has lost standards and discipline, and at the same time virility and seriousness—Babbit) Beau ideal applies to one and especially a person felt to be a fit model or ideal because of high excellence (the beau ideal of all that was romantic, exquisite, and passionate—Harrison Smith) Mirror applies to something so exemplary of its kind that it may serve as a model (no modern building could act as a better mirror of functional needs . . . than this seventeenth-century Spanish mission—Liturgical Arts

**moderate**

**adj** 1 Moderate, temperate When contrasted moderate often connotes absence or avoidance of excess and is opposed to excessive and immoderate, while temperate connotes deliberate restraint or restriction and is opposed to intemperate and inordinate; thus, "a moderate drinker" suggests free but far from excessive indulgence in intoxicants, and "a temperate drinker" suggests restrained and cautious indulgence: "moderate enthusiasm" suggests lukewarmness, "temperate enthusiasm" suggests keeping a hold over one's exhibition of feeling; one's anger may be far from moderate, yet one's reply may be temperate. Especially in technical language moderate and temperate often denote falling or staying within a range midway between extremes or designate a point (as in a scale) characterized neither by excess nor by deficiency of something understood. When so used they are not usually interchangeable, for custom or terminology has determined the selection moderate temperature, moderate breeze, moderate climate, moderate zone. In this sense both moderate and temperate have two antonyms, one on the side of deficiency and the other on the side of excess. These antonyms are usually specific and vary according to the application, for example: light and strong (of breezes); arctic and torrid (of climate); abstemious and glutonous (of eating); mild and violent (of something having force and intensity).

**Ana** ordinary, *common, familiar: gentle, mild, bland, *soft: *sparing, economical

**Ant** immoderate —Con *excessive, extreme, inordinate

2 *medium, middling, mediocre, second-rate, average, fair, indifferent

**Ana** decent, *decorous, proper: *steady, even, equable, constant

**moderate**

**vb** Moderate, qualify, temper are comparable when they mean to modify something so as to avoid an extreme or to keep within due bounds. Moderate stresses reduction of what is excessive, but it does not necessarily imply finding the happy mean (the sun at midday moderates the cold) you must moderate your demands if you wish to be listened to) "Moderate your language, old man," I said: "remember that you are addressing a superior"—Hudson (moderating his big voice to the dimensions of the room—Clifton Daniel) Qualify emphasizes restriction or more precise definition that brings a thing closer to the truth or facts or that makes it less general, inclusive, or sweeping or that gives it a clearly defined quality or character of its own (it is time to qualify the over simple account I have given of the artist's process of creation—Alexander) (almost every important point must be qualified with adverbs and adjectives expressing uncertainty, approximation, tentativeness—Urey) Temper strongly implies accommodation to the needs or requirements of someone or something; it need not suggest moderation or qualification, but it usually implies the addition of a countervailing or mitigating thing (God tempers the wind to the shorn lamb—Old Proverb) (denunciation must be firm, tempered with sadness over the falling from grace—MacInnes) (temper justice with mercy

**Ana** abate, reduce, lessen, diminish, *decrease: mitigate, alleviate, lighten, *relieve: slow, slacken (see DELAY)

**Con** *intensify, aggravate, heighten, enhance: augment, *increase

**modern**

**adj** 1 Modern, recent, late, though not close synonyms, are subject to confusion when they are used to date things or events which have taken place, come into existence, or developed in times close to the present. Modern (see also NEW) is the term of widest range of meaning; it may date anything that is not medieval or ancient (the ancient languages have now been superseded by the modern languages in popular favor in high schools and colleges) (the date of the discovery of America, 1492, is often used arbitrarily as the beginning of modern history) (the weed-caught wrecks of ancient galleys, medieval shipwreck and modern dreadnaughts—Beebe) or anything that marks the end of a period nearer in time than another (modern surgical techniques, the modern novel) the ornate mansions of a bygone era mingle with more modern concepts of architecture—N. Y. Times) or less clearly to anything that is new, fresh, or up-to-date (she is very modern in her clothes and in her manners) we all have to remember that what is modern today and up-to-date, what is efficient and practical, becomes obsolete and outworn tomorrow—Roosevelt In all these uses a change or contrast in character or quality is to some extent implied by the term modern. Recent is usually without such implication and may simply indicate a date that approximates that of the immediate past, though the time to which this term, too, refers depends upon the thing that is qualified; thus, "recent geological ages" designates those ages immediately preceding the present geological age, although, since each age may represent millions of years, recent is obviously used relatively; "Shakespeare is a more recent author than Chaucer" implies only a comparative status, for Shakespeare was born in the sixteenth century and Chaucer in the fourteenth; "we have all the recent books" implies an absolute relation to a time that may be described as the immediate past (recent news) a recent purchase) a recent issue of a magazine

**Late** (see also Tardy, Dead) implies a series or succession of which the person or thing so described is the most recent in time the late war (the servant's late master testified as to his honesty) (moose which of late years have been showing up around Stewartstown—Holbrook) Sometimes the word carries an implication that is less definite and equivalent to "not long ago holding the position of or serving as" (the firm's new director of research was the late professor of applied chemistry at the University)

2 modernistic, *new, novel, new-fashioned, newfangled, original, fresh

Money, cash, currency, legal tender, specie, coin,

coinage are comparable when they mean pieces of stamped metal or their equivalents issued by a government, or by an authority recognized by the government, to serve as a medium of exchange in the country or section under the control of that government. Money applies to both coined gold, silver, copper, or other metal issued as a medium of exchange and to certificates or notes, often called specifically paper money, that sometimes promise payment in metal money, are issued by a government or governmentally recognized authority (as a bank), and pass like coined metal as a medium of exchange. Cash applies to money, sometimes specifically called ready money, actually in hand or immediate possession of an individual or a business or institution (the firm's supply of cash was very low because the larger part of the day's accumulation had just been deposited in the bank). Currency may apply to all of the money in circulation, as distinguished from that which is not in circulation for one reason or another (the first panacea for a mismanaged nation is inflation of the currency—Hemingway) but it may also apply to paper money as distinguished from coined metal. Legal tender applies specifically to the type of money which the law authorizes a debtor to offer and requires a creditor to receive as payment of money obligations and may or may not at any given time include all lawful money of a particular jurisdiction. Specie, coin (only in a collective sense), and coinage apply only to minted or coined money; they therefore imply an opposition to all forms of paper money (as treasury notes and bank notes) (payments were demanded in specie, or in the coin of the realm) (we are far more concerned today with the debasement of the coinage—Shaw)

monopolize, engross, absorb, consume mean to take up completely. Monopolize, the general term, means to possess or control exclusively (monopolize the year's crop of cotton) (a child should not be allowed to monopolize the attention of his family) (every railroad monopolizes, in a popular sense, the trade of some area—Justice Holmes) (the party in power at Washington can organize the two houses of the Congress . . . but it cannot monopolize the business of lawmaking—Holcombe) (never attempted to monopolize or even dominate the discussion—J. G. Gray) Occasionally engross implies getting a physical control of (as by purchase of the available supply) (the process of engrossing the land which attended the ascent to power of the aristocracy—Becker) and this notion may persist in extended use (the sun engrossed the east, the day controlled the world—Emily Dickinson) but more often the verb takes an immaterial object and implies a preoccupying (political theory has long engrossed the Indian mind—Poleman) (the works manager who . . . is engrossed chiefly with the engineering problem of securing maximum output with minimum input—Huff) Absorb is frequently interchangeable with engross, but it is less often predicated of persons as conscious agents and more often of things that have an inherent capacity for monopolization (manual occupations do not engage the mind sufficiently . . . . But composition, especially of verse, absorbs it wholly—Cowper) (it is arithmetically impossible for every child to absorb the whole time of an adult tutor—Russell) (the consumption of engross and absorb chiefly in an extended sense of each, implying monopolization of one's time, attention, or interest) (Flané is determined that men and their convictions shall be given a true and proper evaluation. He is consumed with the idea of justice—Boyle) (the consuming anxiety of the ride still held him though the reason for it was gone—Wheelwright) (Ana possess, own, *have, hold: utilize, *use, employ: control, manage (see conduct vb)

monopoly, corner, pool, syndicate, trust, cartel are comparable rather than synonymous terms when they apply to a means of controlling prices. Monopoly denotes the exclusive control of a service (as telephone or telegraph service) or traffic (as transportation of goods and passengers by railroad) or of a commodity (as wheat or petroleum) in a given market. Monopoly may imply exclusive control created by the state (as by franchise or patent or copyright). More frequently, however, the term is used to imply exclusive power to buy or sell a commodity or service in a given market, especially as a result of ownership or control of the sources of supply (as mines) or of the available stock of a commodity (in the reign of Edward 111 [German traders] had a practical monopoly of the carrying trade—Pattison) In extended use monopoly also denotes the group or organization having such control (it might be that when a combination reached a certain size it might have attributed to it more of the character of a monopoly merely by virtue of its size than would be attributed to a smaller one—Justice Holmes) A temporary or local monopoly (as of a particular security on a stock exchange or of a particular commodity on a produce exchange)
constitutes a corner, so called because it puts all those who are determined to buy into a corner, or position where they must pay the price asked (maintained his corner on wheat for three days) Pool in this relation applies primarily to a combination of property, or of interests of different persons or companies, by means of which a more or less permanent control or monopoly is acquired. Distinctively, however, pool implies a joint undertaking or end which cannot be attained unless the market is managed either by manipulating prices (as of a commodity or security) or by destroying the effects of competition (through agreements concerning prices or rates, regulation of outputs, or division of earnings of each organization concerned). Syndicate is applied chiefly to a group of individuals, firms, or corporations (as banking houses) which organize for a limited time to accomplish a given purpose or more specifically such a group that is organized to market an issue of a security, makes its profit from the difference between the agreed-upon sum advanced to the issuing corporation for the securities and the fixed sale price at which they are marketed, assumes responsibility for absorbing any surplus securities not marketed, and dissolves when the marketing period is completed. Outside of the field of finance, the use of the term is extended in its application to any combination (as of newspapers, business concerns, or criminals) interested in a common project or enterprise, and often implies relation to a monopoly. Trust specifically applies to a merger in which stockholders in the merged corporations exchange their stock for trust certificates in the new corporation and surrender their rights to trustees who operate the combined corporations, but trust is often extended to any combination of business entities, especially when felt to represent a threat to healthy competition. Cartel implies an international combination for controlling production and sale of a product or group of products.

The words monstruous, prodigious, tremendous, stupendous, monumental are comparable especially in their extended more or less hyperbolical senses in which they mean astonishingly impressive. Monstrous commonly applies to something abnormal, usually in actual or relative size, but often also in shape or character; the term frequently carries suggestions of deformity, extreme ugliness, or fabulousness (the imagination turbid with monstrous fancies and missashed dreams—Wilde) he seemed of monstrous bulk and significance—G. D. Brown the monstrous way of living that mankind had made for itself out of the industrial revolution—Connolly) Prodigious usually implies a marvelousness that exceeds belief; it sometimes applies to something entirely out of proportion to what is the previous or usual best, greatest, or largest (the prodigious demand for steel in the First World War) men have always revered prodigious inborn gifts, and always will—Eliot) (a mind with such prodigious capacity of development as Shakespeare's—T. S. Eliot) Tremendous may come closer to awe-inspiring or terrifying in its immensity than to gigantic or enormous, its common denotations in more literal use must have made the animal in life look very much like a crocodile and the bite must have been tremendous—Swinton) (how shall we compare the cramped and limited vision of the universe which spread itself to the imagination of mankind in old time with the tremendous vistas opened out to us by modern science—Inge) (the spell and tremendous incantation of the thought of death—L. P. Smith)
basis (the merry vein you knew me in, is sunk into a turn of reflection—Pope) (the whole is written in a vein of ironic seriousness—Laski)

moral adj Moral, ethical, virtuous, righteous, noble are comparable when they mean conforming to a standard of what is right and good. Moral is the most comprehensive term of the group; in all of its pertinent senses it implies a relationship to character or conduct viewed as good or bad or as right or wrong. Sometimes moral implies relationship to or concern with character or conduct as distinguished especially from intellectual or physical nature (moral goodness may be distinguished from intellectual goodness or spiritual goodness) (the whole tendency of modern thought . . . is to extenuate the responsibility of human nature, not merely on the moral side, but equally on the spiritual side—Mackenzie) (we find ourselves confronted with a most disturbing moral problem . . . those situations, now of such frequent occurrence, in which good means have end results which turn out to be bad—Huxley) Moral also applies to such things as literary works, works of art, and philosophies, or to writers, artists, and philosophers concerned with the determination or teaching of principles of right conduct or good living (a moral tale) (moral essays) (paintings that convey a moral lesson) (tragedy . . . hath been ever held the gravest, morallest, and most profitable of all other poems—Milton) The term also applies to men or communities, to acts, or to conduct in the sense of conforming to the accepted standard of what is right and good, often specifically in sexual conduct, or of conforming to the customs or conventions of a people regarded as binding laws (lead a moral life) (a man of high moral character) (the moral ideals of the community) (I had a character who was ambitious, yet in his own way, moral, and with such a character one could travel deep into the paradoxes of the time—Mailer) (his nature was purely sensuous, and she strove to make him moral, religious—D. H. Lawrence) Ethical primarily implies a relationship to ethics, the branch of philosophy which deals with moral principles, or more specifically with the principles governing ideal human character and with the ideal ends of human action (an ethical system) (an ethical code) Although ethical is often used interchangeably with moral, it characteristically gives a slightly different impression owing to certain subtle connotations; thus, ethical principles may, according to the context, convey a strong suggestion of principles derived from a certain school of ethics, or of a formulated code behind them, or of an idealistic quality; an action is often described as ethical rather than moral when it accords with what the writer or speaker believes to be a higher or finer standard of morality than the one generally accepted, or when it is in keeping with the code of ethics governing a profession (especially law and medicine); the phrase "an ethical person" often differs from the phrase "a moral person," in suggesting an assent to ethical principles or an attention to the niceties of ethics or to the ideal ends suggested by a system or code of ethics (meanwhile we hear . . . the ethical instinct of mankind asserting itself with splendid courage and patience—van Dyke) Virtuous implies the possession or manifestation of moral excellence in character; in its most general sense it implies rectitude, justice, integrity, and all other virtues, but in more restrictive use and especially as applied to women, it often means little more than chasteness or perfect fidelity in marriage (poor people . . . whether they be lazy or busy, drunken or sober, virtuous or vicious—Shaw) (her life had been virtuous, her dedication to innocence had been unswerving—Cheever) (a man might grind the faces of the poor; but so long as he refrained from caressing his neighbors' wives and daughters, he was regarded as virtuous—Huxley) Righteous differs from virtuous chiefly in its stronger implication of freedom from guilt or blame; as applied to persons, it often implies justification, especially worthiness of salvation in the theological sense (I came not to call the righteous, but sinners to repentance—Mk 2:17) (what but thy malice moved thee to deride of righteous Job—Milton) As applied to acts, conduct, and even displays of passion, it usually implies justifiability and often consciousness of rectitude (righteous indignation) But righteous is the one of these words that is freely used in a worsened sense to imply an invalid and sanctimonious assumption of the appearance of rectitude (left most of the work to his assistants . . . and when he found that they were doing as they pleased, he was not righteous nor rebuking—Sinclair Lewis) (meets the resultant gossip, and the ruin of Lily's reputation, with a righteous indifference to either its unfairness or his share in it—Harper's Bazaar) Noble (see also GRAND) applies to persons, their acts, utterances, careers, or lives, and implies the possession and exhibition of a conspicuously high character. Often the word carries no other clear implications and seems little more than a term of high praise implying moral or ethical eminence (that noble passion for human rights and civil liberties possessed by . . . judicial libertarians—Gressman) (a noble aim, faithfully kept, is as a noble deed—Wordsworth) At other times the term suggests not only moral eminence but the absence of all taint of any such petty or dubious thing as self-seeking, self-interest, or concern for the world's standards; it then often suggests independence, or magnanimity, or high courage, or some other outstanding moral excellence (this was the noblest Roman of them all. All the conspirators, save only he, did that they did in envy of great Caesar; he only, in a general honest thought and common good to all—Shak.) (the disinterested search for truth is certainly one of the highest and noblest careers that a man can choose—Inge) And, right, *good: *upright, honest, just, honorable, scrupulous, conscientious: *chaste, pure, modest, decent: ideal: *abstract

Con *immoral, unmoral, amoral, nonmoral

moral, discipline, esprit de corps although not always close synonyms, are comparable when they mean a condition or spirit which holds together a body of persons. Morale usually applies to the qualities of an entire body of men (as an army or a regiment, a people, or a community) with respect especially to their courage and endurance under stress, but it sometimes may refer to an individual in his capacity of a member of a body held together by such qualities (moral . . . describes the communal condition of mind and emotion, and it is incorrect to refer to the low or high morale of an individual, except in his or her relationship to the group—Times Lit. Sup.) (by military leadership we . . . mean . . . the capacity to weld 50 to 250 men into a unit of high morale and lead them into battle—Psychiatry) Discipline applies to the order maintained and observed by a body or an individual that is or has been subjected to training (as in uniform behavior, in control over the passions or other individualistic traits, or in military exercises) so that the whole moves under command as one and the individual thinks of him-
motion

Motion, movement, move, locomotion, stir mean the act or an instance of moving. Motion is the appropriate term in abstract use for the act or process of moving, without regard to what moves or is moved; in philosophical and aesthetic use it is an especially comprehensive term, for it may apply to manifestation of change or of changing not only from place to place, but from condition to condition, or from step to step in a progression (the laws of motion); this vicissitude of motion and rest, which we call life—Steele—in all the arts the principle of motion prevails increasingly over the principle of repose—Babbitt. Movement is always to be preferred to inaction. In motion a man has a chance, his body is warm, his instincts are quick—Mailer. Ordinarily, however, the term implies discernible physical motion (the motion of the planets) (I was lying...injured, and incapable of motion—Hudson). The rest of motion of the sea) (every step and every motion in the old dances had meaning—Reginald & Gladys Laubin). Movement usually implies definite regulated motion; the term is used less often than motion to denote an abstraction, although it may be extended to denote a quality of representation in a work of art that suggests motion. Movement is one of the most striking characteristics of the Elgin marbles and of the Winged Victory (the new freedom and variety in the movements of the Apostles in the boat...are proofs of Giotto’s rare power of invention—Fry) or a quality in literary work (as poetry) that suggests a definite rate of speed or progression (as in the meter, the rhythm, or the action). Movement is most desirable, within a small and exclusive group it becomes dangerous. Assumptions of a closed club, the members of which can, in each other’s eyes, do no wrong—Political Science Quarterly). The inspired and faultless esprit de corps of her flesh and her bones and her blood; never were the features and the colors of a face in such serene and unassailable agreement, never had a skeleton been more singularly honored by the integument it wore—Stafford.

Motion is the appropriate term in abstract use for the act or process of moving, without regard to what moves or is moved; in philosophical and aesthetic use it is an especially comprehensive term, for it may apply to manifestation of change or of changing not only from place to place, but from condition to condition.
**motive**

actuate, *activate

*A* stimulus, quicken, *provok*; excite; arouse, rouse, *stir: inspire, animate, fire, *inform

**motive n**

1 Motive, spring, impulse, incentive, inducement, spur, goad all denote a stimulus inciting or prompting a person to act or behave in a definite way. Motive applies chiefly to such an emotion as fear, anger, hatred, or love or to a desire (as for fame, wealth, knowledge, supremacy, or revenge) or to such a physical appetite as hunger or sexual desire which operates on the will and definitely moves it to activity (always seeking the motive of everyone's speech or behavior—*Browell*). Whenever a man does a thoroughly stupid thing, it is always from the noblest motives—*Wilde*. A child may slay no living thing except from motives of hunger—*Hudson*. Even where some piece of knowledge is uninteresting in itself, a man can force himself to acquire it if he has an adequate motive for doing so—*Russell*.

Spring, often as the plural springs, is used in place of motive without much difference in meaning; however, it may refer to the underlying or basic motive which is often not fully recognized even by the person affected and is especially hidden from all but the most penetrating observers (it is difficult ... to come at the true springs of action—*Forrest*). The love of gold was the sordid spring of the most brilliant enterprises of the republic—*Merivale*. Laying open to his view the springs of action in both parties—*Peacock*. Impulse need not imply as motive and spring regularly imply, actual performance of an act or engagement in an activity; the term stresses impetus, or driving power, rather than its effect; thus, one may check, or restrain, or forgo, or dismiss an impulse. In its more general sense impulse is applicable to a powerful incitation or instigation to activity, especially one arising within oneself as the result of a native propensity, one's peculiarity of temperament, or one's intellectual or emotional constitution (he was not a man ... to yield timidly to the impulses of others—*Prescott*). In * Brave New World ... all are permitted to indulge their sexual impulses without let or hindrance—*Huxley*. Men like the elder Cato, Varro, and the elder Pliny liked to record the curiousities of nature, but they had not the systematizing impulse, the restless passion for order, of the Greeks—*Buchan*. Specifically, impulse is applicable to a spontaneous and often unconsidered and nearly irresistible urge to do something (Dr. Lavendar ... said to himself, chuckling, "If I'd followed my impulse, I'd have married them then and there, and made no bones of it"—*Deland*). The first impulse of a child in a garden is to pick every attractive flower—*Russell*. Garf suffered an odd impulse to get up and kick his chair over; but people don't do those things. He kicked the back log instead—*Mary Austin*. Incentive applies chiefly to a cause which incites and encourages action or activity and especially to one for which the person affected is not himself responsible or which does not originate within himself (offer a bonus as an incentive to greater speed and efficiency in production) (with some pupils praise is not an incentive to study) (money is not the only incentive to work, nor the strongest—*Shaw*). The great incentive to effort, all through life, is experience of success after initial difficulties—*Russell*). People ... cut off here without the influence of example or emulation, with no incentive but some natural yearning for order and security—*Cather*.

**Inducement** is narrower than incentive, for it consistently suggests an external influence and often an attempt to entice or allure to action or activity (the chief inducements to serve were the pension and the right of citizenship which awaited a soldier on his discharge—*Buchan*). His method of holding his followers together by culinary and bibulous inducements has often been described—*L. M. Sears*. Spur applies to an impetus to action which not only incites but stimulates the mind and increases its energy and ardor (fame is the spur that the clear spirit doth raise ... to scorn delights and live laborious days—*Milton*). Fear or despair may be a temporary spur to action—*Sat. Review*. Goad applies to a stimulus to action or activity that keeps one going in spite of one's will or desire (the daily goad urging him to the daily toil—*Macaulay*). Insecurity, considered by some management people as the indispensable goad for workers' efficiency—*Dun's Review*.

A cause, determinant, antecedent, reason: *desire, appetite, urge, passion, lust: *feeling, emotion, passion: purpose, intent, *intention, aim, end

2 *subject, matter, subject matter, argument, topic, text, theme, motif, leitmotiv

**motive adj** *movable, mobile

*A* active, operative, dynamic: moving, driving, impelling or impulsive (see corresponding verbs at move)

**motley adj** 1 *variegated, parti-colored, checkered, checked, pied, piebald, skewbald, dappled, freaked 2 heterogeneous, miscellaneous, assorted, promiscuous

*A* different, diverse, divergent, disparate, various: discrepant, incompatible, uncongenial, incongruous (see analogous words)

Con uniform, parallel, akin, alike, identical (see like)

**motor** *machine, mechanism, machinery, apparatus, engine

**motorcade** *procession, parade, cortege, cavalcade

**mottle vb** *spot, spatter, sprinkle, fleck, stipple, marble, speckle, spangle, bespangle

**mount n** mountain, peak, alp, volcano, mesa

**mount vb** 1 ascend, soar, *rise, arise, tower, rocket, levitate, surge

**Ant** drop 2 *ascend, climb, scale

**Ant** dismount

**mountain, mount, peak, alp, volcano, mesa** denote a relatively steep and high elevation of land. Mountain, the ordinary and inclusive term, varies somewhat in meaning according to locality. In general it designates an elevation higher and steeper than a hill, rising more or less abruptly from its surrounding country, and standing out conspicuously when viewed from a distance. Mount is often used in proper names of mountains. Peak, when applied to a mountain, designates one that rises to a sharp point; it may be isolated or one of a range. Alp suggests a towering, dizzly, or unscalable height (yet do I sometimes feel a languishment ... to sit upon an alp as on a throne, and half forget what world or worldling meant—*Keats*).

Volcano designates a cone-shaped mountain formed chiefly of ejected molten rock or ash and topped, usually, by a crater. Mesa is used especially in the southwestern part of the United States to designate a flat-topped elevation, usually comparable to a hill in height, but more suggestive of a mountain because of its steep clifflike sides.

**Ana** *height, altitude, elevation

**mountebank** n *impostor, faker, charlatan, quack

**mourn** sorrow, *grieve

**Ana** lament, bewail, beemoan (see deplore): weep, keen, wail, *cry

**Con** rejoice, gladden, delight, *please

**movable, mobile, motive** mean capable of moving or of...
being moved. Movable applies not to what has independent power of motion but to what can be moved by men or machines (as by lifting, drawing, pushing, or driving) (a movable steam engine) (one's movable possessions) (some of these cabins were movable, and were carried on sledges from one part of the common to another —Macaulay) or to what is not fixed in position or date (printing from movable type) (a movable attachment for a machine) (movable feast) such as Easter and Whitsunday). Mobile stresses facility or ease in moving or, less often, in being moved. It often describes the quality of flowing which distinguishes a fluid from a solid (the mobile liquid passes into a compact rigid solid —T. H. Huxley) or which characterizes an electric current or charge (long-lasting circulation of the mobile charge, around and around the circuit —Darrow) or the character which distinguishes something or someone that moves or is equipped or able to move quickly and readily, or to go (as from place to place or from one condition to another), from what is slow-moving or unlikely to engage in major moves (a mobile army) (a mobile radio unit) (they attract the more ambitious, the more mobile young people —Amer. Jour. of Sociology) (American society, though highly mobile by European standards, is not classless —Times Lit. Sup.) But equally often mobile describes features, faces, expressions of face, or thoughts which respond quickly and obviously to changing emotions, mental states, or external stimuli, often at the same time connoting either fickleness or instability or flexibility and versatility (the gray restless eye, the thin mobile lips —J. R. Green) (you are as mobile as the veering air, and all your charms more changeful than the tide —Millay) (delicately sniffing the air to the left of him with his mobile nose end —Dahl). Motive implies a moving only in the transitive sense of driving, or causing movement, or compelling to action; the term is used chiefly with reference to power or energy or their sources (as fuel, steam, or electricity) viewed as agent in a process of moving (diesel engines supply the motive power for the new ship) (when horsepower and man power were alone employed, the motive agent was not bound up with the tool moved —Spencer). Even when the reference is to something which constitutes a motive for action, "motive power," "motive force," or "motive energy" is likely to be used (there was no motive power in experience. It was as little of an active cause as conscience itself —Wilde) (this new wave of motive energy began to penetrate the deep absorption in their own affairs of her husband and children —Dorothy Canfield) (his motive force is a blissful and naive faith —Rosten). Ana (activate, actuate, motivate: *provoke, excite, quicken, stimulate: *induce, persuade, prevail, get)

Move, remove, shift, transfer are comparable when they mean to change or to cause to change from one place to another. All of these terms are general in that they do not in themselves and apart from the context imply a definite kind of agent or agency or a definite means of conveyance or transportation or give an indication of the extent of distance covered. Move is by far the most comprehensive term and is chiefly used when nothing more than the motion or activity involved in a change of place is to be indicated (move a table from a corner to the center of the room) (moved his family from New York City to Chicago) (move a house across the street to a larger lot) (he will not move from that chair until he is called to dinner). Remove adds to move the implication that the person or thing that changes or is changed from one place to another is moved from or quits a place which is his or its normal or original location, station, position, or occupation for which is new or temporary (remove the cover from a platter) (remove the dishes from the table). When the idea of getting rid or eradicating is stressed, remove is appropriate (remove a person from office) (they removed the cause of the epidemic of typhoid fever when they put the typhoid carrier under close surveillance) (shift throws so much emphasis on change of location or direction that the implications of voluntary or guided motion or activity are seldom apparent; therefore the term is often preferred when unrest or uncertainty or instability is to be suggested (the cargo shifted in the storm) (the wind will shift during the night to due east) (shifting his weight from one foot to another). However, shift also is used when a mere change in position is implied (shifted his quid of tobacco to the other side of his mouth before answering) (decided to shift his desk as of speed, violence, or show of power, rather more than the impetus given (a ship driven by wind and tide) (the washing machine is driven by electricity) (the heart drives the blood through the arteries) (air and petrol vapor . . . produce explosions powerful enough to drive the engine of a motorcar —Toynbee). Impel, when used of physical motion, adds to drive the implication of great force in the impetus (imitated the action of a man's being impelled forward by the butt ends of muskets —Dickens).

These words also are synonymous when they mean to excite or provoke a person to a given act or action or to given conduct or behavior. Move may imply an agent, an external influence, or an inner spring or motive as the mover (if kingdom move thee not, let move thee zed and duty —Milton) (he was, through the years, a hard man to move —Malamud). Actuate presupposes such an inner stimulus as a desire, a feeling, or a motive (it used to be the thing for parents to represent themselves as Olympians, immune from human passions and always actuated by pure reason —Russell) (you would deny with indignation that they are actuated in their esteem for science by its material serviceability —Dewey). Drive presupposes a compelling force, sometimes outer, sometimes inner, which affects the freedom of the will (it was the crass materialism of America . . . that drove him to exasperation —Parrington) (what had I ever done to you that would drive you to such a step? —Mary Austin). Impel, like actuate, implies an inner prompting, but it suggests greater urgency in the desire or motive and more headlong action (a life of adventure . . . was that to which his nature irresistibly impelled him —Arnold) (she was a prey to shoddy, facile emotions . . . none of which had power to impel her to any action —Rose Macaulay). Ana *activate, actuate, motivate: *provoke, excite, quicken, stimulate: *induce, persuade, prevail, get

Move

1 Move, actuate, drive, impel are comparable when they mean to set or keep going or in motion. Move is so general that the direction or nature of the motion can be gathered only from the context; it may imply an agent or an agency as the mover (who moves the rotating earth?) (the mechanism that moves the locomotive) (vessels moved by wind, steam, or electricity) Actuate is more restricted in its reference than move, being used chiefly in connection with machinery and mechanisms; it stresses the communication of power to work or to set in action (a turbine is actuated by the force of a current of fluid under pressure) (most of the hydraulically operated items of equipment are actuated by pistons and cylinders —W. R. Sears). Drive implies forward and, usually, continuous rather than current motion; it often emphasizes the effect produced,
into a better light> Transfer (see also TRANSFER 2) commonly implies a change from hand to hand, or from one mode of conveyance to another, or from one depository to another; it is often used in a specific sense especially in the business of transportation <you will need to transfer to another train at Albany> <there was no way in which he could transfer his own memories of European civiliza-
tion into the Indian mind—Cather>

Ana
displace, *replace, supplant, supersede: convey, *carry, bear, transport, transmit

move n movement, *motion, locomotion, stir

Ana
change, alteration, variation, modification (see under CHANGE vb): transformation, metamorphosis, conversion, transmogrification (see under TRANSFORM)

movement *motion, move, locomotion, stir

Ana
action, act, deed: change, alteration, variation, modification (see under CHANGE vb): activity, operative-
ness or operation, dynamism, liveness (see corresponding adjectives at ACTIVE)

moving, impressive, poignant, affecting, touching, pathetic are comparable when they mean having the power to excite or the effect of exciting deep and usually saddening and solemn emotion. Moving, the most general of these words, can be used in place of any of the others; the rest, though not mutually exclusive in their implications, can be used very specifically. Something moving stirs one deeply or evokes a strong emotional response (as by thrilling, entrancing, agitating, or saddening) <a moving scene in a play> <a moving appeal for help> <a modern version of the hero for the good of mankind exposed himself to the agonies of the damned. It is always a moving subject— Maugham> <a moving revelation of child life in an orphanage—MacColl>

Something impressive imposes itself forcibly on the mind and compels a response (as of admiration, awe, wonder, or conviction) <scenery . . . but in the sense of sweetness, warmth, and gaiety—Mannes> <men's most touching illusion as to the fragility of their own and their spiritual life—Conrad>

Something pathetic moves one to pity. Sometimes the word suggests pity induced by compassion for one in sorrow or distress <a lonely old man . . . . . . Rather pathetic!—Archibald Marshall> <pathetic gropings after the fragments of a shattered faith—Day Lewis> Sometimes it suggests pity mixed with contempt for what is weak, inadequate, or futile <a pathetic confusion of aims—

Binyon> <a pathetic attempt to make a virtue of necessity—Huxley>

Ana
exciting, stimulating, quickening, provoking (see PROVOKE): thrilling, electrifying (see THRILL): stirring, arousing, rousing, awakening, rallying (see STIR)

muddle vb *confuse, addle, fuddle, befuddle

Ana
*puzzle, perplex, mystify, bewilder, distract, non-
plus, confound, dumbfound: faze, rattle, discomfit, *em-
brarrass: fluster, flurry, upset, agitate, *discompose

Ant
enlighten

muddle n *confusion, disorder, chaos, disarray, jumble, clutter, snarl

muddy *turbid, roily

Ana

necked, pigheaded, bullheaded

Ana
headstrong, intrinsically recalcitrant, refractory, ungovernable, *unruly: fixed, set (see SET)

multifarious

divers, numerous, various, *many, several, sundry

Ana
disparate, diverse, divergent, *different: incongru-
ous, incompatible, uncongenial, discrepant, discordant, *inconsonant, inconsistent

multiply

*increase, augment, enlarge

Ana
propagate, reproduce, breed. *generate: expand, spread, stretch (see corresponding nouns at EXPANSE)

Con
*decrease, diminish, lessen, reduce, abate

multitude, army, host, legion mean, both in the singular and plural, a very large number of persons or things. They do not (as do the words compared at CROWD) necessarily imply assemblage, but all of them can be used with that implication. Multitude stresses numerosness with respect to what is the standard for or the test of numerosness in the thing referred to; thus, in “that child always asks a multitude of questions” and “I never saw such a multitude of books before in one house” multitude obviously refers to a much smaller number in the first than in the second illustration <we must not . . . expect systematic education to produce multitudes of highly cultivated and symbolically developed persons—Eliot>

When applied to a group of persons taken as a whole, multitude suggests an assemblage of a large number of persons moved his arms with large pawing gestures, as though he were distributing lay blessings to a kneeling multitude—Wharton> but multitude with a definite article suggests the masses of ordinary people or the populace <speeches that sway the multitude> <a book that appeals to the multitude> <both scorns and seeks the understanding and approbation of the multitude—Knight>

Army usually adds to multitude the implications of orderly arrangement without a suggestion of crowding and often, especially in clearly figurative use, a progressive advance without any suggestion of halting or gathering <they were served by a vast army of waiters> <an army of locusts> <we have considered science as a steadily advancing army of ascertained facts—Ingpe>

He discovered around him . . . . . . . a world whose existence he had neither known nor suspected, the army of persons who know no routine labor—Purdy>

Host has for its primary implication numeros-

ousness. It may mean nothing more <the burning of hosts of unfortunate old women—and sometimes young ones—as witches—Cobban> but it may suggest more
strongly than any of the other words a concentration in great numbers of the thing referred to; in such cases it often connotes an impressive or striking array (a clear, cold night and a host of stars in the sky) (<i>I saw a crowd, a host, of golden daffodils—Wordsworth</i>) (a host of exquisite creations, the expression of a great artist's subtle vision and faultless technique—Read) (a very uneasy division, giving rise to a host of perplexities whose consideration has occupied the intervening centuries—Whitehead) Legion in general use retains little suggestion of its basic application to the chief unit of the Roman army and but little more of its scriptural uses; typically it applies to an indefinitely or incalculably large number (the windy arguments of this legion of aberrants—McComas) (<i>the legion of animal owners is also rising fast—Investor's Reader</i>) (a legion of friends hastened to his support—W. B. Parker) (armies of angels that soar, legions of demons that lurk—Browning) Ana bountiful, bounteous, openhanded, *liberal, worldly, *earthly, earthy, terrestrial, sublunary mundane *gibberish, hocus-pocus, abracadabra performer, mime, mimic, player, *actor, thespian, impersonator, trouper mummer gibberish, hocus-pocus, abracadabra mundane worldly, *earthly, earthly, terrestrial, sublunary Ana fleshly, sensual, *carnal, animal: secular, temporal, *profane Ant eternal—Con *infinite, sempiternal, boundless: heavenly, *celestial, empyrean, empyreal munificent bountiful, bounteous, openhanded, *liberal, generous, handsome Ana benevolent, *charitable, philanthropic, eleemosynary, altruistic: *profuse, lavish, prodigal munitions *armament, matériel, arms, ordnance, artillery, ammunition murder vb *kill, slay, assassinate, dispatch, execute murky obscure, gloomy, *dark, dim, dusky Ana *turbid, muddy, roily: lowering, glozing, glooming or gloomy (see corresponding verbs at FROWN): lurid, grim, *ghastly Con *bright, brilliant, radiant, effulgent: illuminated, illumined, lightened, enlightened (see ILLUMINATE): *clear, transparent, translucent, lucid muscular, brawny, sinewy, athletic, burly, husky are applied to persons in the sense of strong and powerful in build or physique. Muscular implies well-developed, but applied to persons in the sense of strong and powerful in the full development of the muscles; it carries no connotation of fatness but rather suggests the might that is associated with hard flesh and great size (a blond, healthy-looking fellows, with short, bare arms, who were approached with dread by all—Zangwill) (tough, weather-rugged, brawny hunters of whales—R. L. Cook) Sinewy attributes no less power to the muscles than brawny, but it suggests greater energy and quickness and seldom connotes huggeness. Rather it often implies a leanness, toughness, and liteness that are the result of training or of persistent exercise; thus, such people as blacksmiths, steelworkers, stevedores, and prizefighters are often described as brawny, but fencers, runners, and acrobats, more often as sinewy (worthy fellows; and like to prove most sinewy swordmen—Shak.) Athletic as used in anthropometry denotes a particular body build marked by heavy frame, large chest, and powerful well-developed muscles. In more general use athletic may suggest much the same type, but more often it stresses fitness for athletic activity and emphasizes muscularity, sinewiness, quick reflexes, and vigor of health (<i>a tall, athletic young man</i>) and it is with this latter aspect that the term is usually extended to the mental life or its products (<i>imaginative skepticism and dramatic irony ... keep the mind athletic and the spirit on the stretch—Blackmur</i>) (<i>she had tried ... to shock and startle: and yet ... had feared to begin with Shaw's athletic wit—Yeats</i>) Burly stresses massiveness of build to such an extent that it often carries connotations of corpulence, of coarseness, or of grossness and suggests the possession of brute force (<i>tail ... burly</i>, quite featureless, built with such a jaw that no man's rule could be his law—Masefield) (<i>a great, burly, red-faced individual, huge in frame, with a stentor voice—Jesse</i>) Husky implies a powerful athletic build and brawniness (<i>the huskiest members of a football team are placed on the line</i>) (<i>good food and leisure and heredity gave me a husky build—S. E. White</i>) Ana robust, *healthy, hale, sound: *strong, sturdy, stalwart, stout: *vigorous, lusty muse vb *ponder, meditate, ruminate Ana *consider, study, contemplate, weigh, excogitate: reflect, reason, *think museum, library, gallery, archives, treasury are comparable but not synonymous terms when they mean a place serving as a repository for monuments (see DOCUMENT 1 for this sense) of the past. Museum is the most general of these terms; it usually implies the intention both to preserve and to exhibit for the education of the public. A museum may be an institution concerned with the preservation and exhibition of objects of historical or scientific interest, especially such as illustrate the development of human civilization or the evolution of species, or it may be one providing for the preservation and exhibition of works of fine art (as paintings and sculptures), or it may combine both purposes. Consequently, the term is usually qualified in proper names or in general designation (<i>The Museum of Fine Arts</i>) (<i>The Museum of Natural History</i>) (<i>an art museum</i>) Library is applicable to a place (as a room, building, or institution) which houses a collection of books not for sale but available for use by specified persons or sometimes the general public. But library is applicable also to a collection of literary material and as such may vary in scope from a handful of books making up a personal collection to a usually public collection consisting of a vast store of books of all kinds and of all ages, manuscripts, records, documents, files of journals, and often, in addition, works of art and serving primarily to preserve works of literature and of reference and documents in all fields of research and to make them available to scholars. Gallery (often art gallery) is used for a room, a suite, or a building housing and exhibiting works of art and especially paintings and pieces of sculpture. The term is used of a place housing a private as well as a public collection and (especially in the plural, galleries) of a place where works of art are exhibited for sale. Archives, when the term designates the place where a collection of old records, old documents, old files, and similar papers are kept rather than the collection itself (see DOCUMENT 1), may refer to a building or, as is more common, to a part of a building (as of a library or museum) where such a collection is housed (<i>the archives of the city hall</i>) (<i>the archives of the department of state</i>) (<i>place a manuscript in the archives of the Royal Society</i>) (<i>Treasury</i> is used to designate a place, often a room, where possessions of intrinsic value and often historical significance are stored and in some instances displayed to visitors (<i>the treasures of the cathedral ... there is a fine, whole, uncut chasuble—Rock</i>) The term is often extended to things or places that are or are felt to be storehouses of precious things (<i>forests whose treasury of bird and beast and insect secrets had been only skimmed by collectors—Beebe</i>)

The term can be extended to unsolved or unsolvable problems which provoke speculation rather than serious attempts at solution. <do you think life is long enough to let me speculate on conundrums like that?>—Black

<fail to touch on the political conundrums involved, particularly the problem of how the richer areas of the South can be made to subsidize the poorer>—Cater

mystic adj *mystical, anagogic, cabalistic

Ana occult, esoteric, *recondite, abstruse: *mysterious, inscrutable: visionary, quixotic, *imaginary

mystical, mystic, anagogic, cabalistic are comparable when they denote having a meaning or character hidden from all except those who enjoy profound spiritual insight or are spiritually initiated. Mystical and mystic, though often interchangeable, can be distinguished in use. In general, mystical suggests comprehension of something beyond the range of the perceptive or ratiocinative powers; its use therefore often implies belief in the possibility of such comprehension and the word variously connotes penetration into sacred mysteries, holiness of life, idealism, detachment from material concerns, ecstatic contemplation, or spiritual rapture <the mystical philosophy of Plotinus> <mystical religions such as Buddhism> <the mystical poetry of William Blake> <there is something mystical in this doctrine, this faith, as of Keats, that "what the Imagination seizes as Beauty must be Truth"—L. P. Smith>

Mystic is appropriately used when one wishes to avoid these special implications of mystical or to suggest others more in keeping with a rationalistic or skeptical point of view. Therefore mystic often imputes to the thing it describes: (1) an occult, esoteric, or visionary character <mystic ceremonies> <the mystic symbolism of Blake's poetry> (2) a mysterious, enigmatic, or sometimes nebulous quality <words of mystic import—Shelley> <Guérin's> expression has . . . more than Keats's, something mystic, inward, and profound—Arnold (3) a connection with magic or the arts of magic <mystic numbers> <each silver vase in mystic order laid—Pope> Often its basic denotation is completely obscured and it means merely unintelligible, unfathomable, or incomprehensible <the mystic gulf from God to man—Emerson>

Anagogic refers basically to an ultimate underlying meaning, especially in the Bible, perceptible only to those of profound spiritual insight <when Dante . . . describes his poetry as polysemous, with literal, allegorical, moral, and anagogic meaning levels, he at the same time insists that the literal meaning comes first in comprehension—Burnham> <looming in the distance, there was the final or anagogic meaning> that transformed the symbolic object into a spiritual truth—Malcolm Cowley>

Cabalistic in its primary meaning applies to a secret interpretation of Scriptures <Cabala> held to have been revealed to Moses and handed down orally through a line of chosen Jewish rabbis. The system came to be used by medieval magicians and sorcerers. Both aspects color the extended use of cabalistic so that it sometimes comes close to mystic in its connotations <the power of the theurgic rite or cabalistic word, understood only by the gods—H. O. Taylor> <self-conscious artists, working for the admiration of small followings and often requiring cabalistic analysis before they could be fully understood—Time> but commonly it is closer to occult or magic <by describing with the hands certain cabalistic patterns on the air and uttering at the same time the proper Sanskrit formulas it was believed that goblins and demons . . . could be exorcised—Noss>

myth 1 Myth, legend, saga all mean a story which has come down from the past, which ostensibly relates a historical event to legends, and of which the origin has been lost or forgotten. Myth varies considerably in its denotation and connotation depending on the persuasion of the user. Often the word is used to designate a usually fanciful and imaginative story that explains a natural phenomenon or a social practice, institution, or belief <the old myth, imported hazily from the East, which represented the cat-moon devouring the gray mice of twilight—Reppplier>

It is also used to designate a story, belief, or notion commonly held to be true but utterly without factual basis <the doubts that women have about themselves are made, and most women are so enslaved to the myths of their own inferiority they are unable to see the truth for the myths—Ashley Montagu>

The word may be used with wide comprehensiveness in general writing or with narrow exclusiveness and specificity in more limited use <myths may be subdivided into such classifications as origin myths, ritual myths, incidents involving the lives of the gods, stories of culture heroes, trickster tales, journeys to the other world, human and animal marriages, adaptations of old world myths, and retellings of biblical stories—L. J. Davidson> <myths are said to be expressions or objectifications of "collective wishes" which are personified in the "leader" who is endowed by a given society with powers of social magic to fulfill the collective wish—Kroeber>

Legend is likewise used with latitude, but in its most typical use it is likely to apply to a story, incident, or notion attached to a particular person or place that purports to be historical and often has or seems to have a basis in historical reality although as a whole it is either incredible or unverifiable <the medieval legends of the saints> <the wrecking of the Palatine which, according to legend, did not sink but rose flaming into the sky—Zimmer> <the violent deaths of several slaves quartered in them gave rise to a legend that this part of the house is haunted—Amer. Guide Series: Md.>

Saga may refer to a long, continued, heroic story that is action-packed but not especially romantic, that deals with a person or group, and that is historical or legendary or both <the Saga of Burnt Njal> <the building of the railroad in the Northwest was one of the great sagas of man's enterprise—Le Sueur>

Ana *fiction, fable, fabrication, *figment: invention, creation (see corresponding verbs at INVENT)

2 *allegory, parable, fable

mythical *fictitious, fabulous, legendary, apocryphal

Ana *imaginary, visionary, fanciful, fantastic: invented, created (see INVENT)

**Ana** *sincere, unfeigned: *spontaneous, impulsive, instinctive: fresh, original (see NEW)

naked *bare, nude, bald, barren

**Ana** revealed, disclosed, discovered (see REVEAL):
*evident, manifest, palpable, obvious: uncolored, *colorless:
*pure, simple, sheer

name **n** Name, designation, denomination, appellation, title, style mean the word or combination of words by which something is called and by means of which it can be distinguished or identified. Name is so general that it can be used of any such word or combination whether it distinguishes a person or an object, an individual or a class, a particular or a universal, a thing having distinct existence in fact or a thing having distinct existence only in thought *(all nouns are names)* *(love is the name of an emotion)* *(the child's name is John Joseph Brown)* Sometimes name is thought of as something apart from the real character of the thing to which it is attached *(what's in a name?)* that which we call a rose by any other name would smell as sweet—Shak. *(for sixty years he had been a name, not a figure—Bennett)* More often, however, the term connotes identification of the word with the thing or, especially, the person it names, so that what affects one affects the other *(Oxford)* home of lost causes, and forsaken beliefs, and unpopular names, and impossible loyalties!—Arnold *(if I discovered the worst, and it had to be exposed, I must see that Jane's name was kept entirely out of it—Rose Macaulay)* This common feeling of a mutual and almost inevitable relation between the name and the thing named is what distinguishes name from designation, denomination, appellation, all of which are thought of as given and therefore as having an artificial association with the thing and a utilitarian purpose such as description or identification.

A designation is a name given primarily for the sake of distinguishing one thing, whether an individual or a class, from other things of the same general description *(the French revolutionists changed the traditional designations of days and months)* *(recognizing that this parasite was new, [he] . . . gave it the designation Aphytis A—Jour. of Economic Entomology)* *(Madame Curie chose polonium as the designation of the newly discovered radio element in honor of her native Poland)* 

Denomination *(see also RELIGION)* is the name given especially to a class, to a category, or to a closely knit group (as of persons); the term implies actual use and differs from designation and denomination in precluding the idea, but not necessarily the fact, of self-choice *(James Tubbington Brown, a boy better known to his fellows by the appellation Stinky)* *(the government of the United States has been emphatically termed a government of laws, and not of men. It will certainly cease to deserve this high appellation, if the laws furnish no remedy for the violation of a vested right—John Marshall)* A title is either a distinctive name given to a work (as a book, a picture, a play, or a musical composition) or an honorary appellation coming to a person by virtue of his rank, office, dignity, or descent or given to him as a mark of respect *(the head of the state must have a title—Buchan)* When used without reference to a particular work of art or person title is sometimes preferred to denomination because it connotes distinction and dignity *(any admixture of logical, of 'prose' meaning detracts from the value of a poem, if it does not disqualify it for the title of poetry altogether—Day Lewis)* When used abstractly in preference to name or designation it often connotes the lack of an essential relation between the name and the thing it names *(things change their titles, as our manners turn—Pope)* Style is used to emphasize the exact form of a name and is applicable chiefly to such legal and formal titles as the legal name of a firm or corporation or the complete, formal designation of a royal or other exalted personage as used in documents or in ceremonial address *(a business incorporated under the style of the Globe Manufacturing Co.)* *(Thrones and Imperial Powers, offsprings of Heaven, ethereal virtues! or these titles now must we renounce, and, changing style, be called Princes of Hell?—Milton)* name vb 1 *(designate, nominate, elect, appoint)*

**Ana** *choose, select, prefer, elect, opt: *declare, announce, publish, advertise 2 *mention, instance, specify

**Ana** *refer, allude, advert: *designate: identify, recognize (see corresponding nouns at RECOGNITION): cite, *quote

nap vb catnap, doze, drowse, snooze, *sleep, slumber

narcotic *anodyne, opi ate, nepenthe

narrate *relate, rehearse, recite, recount, describe, state, report

**Ana** tell, *reveal, disclose, discover: *discourse, expatiate, dilate, descend

narrative *story, tale, anecdote, yarn

*Ana* chronicle, *account, report, story, version: fiction, fabrication, figment, fable

narrow, narrow-minded *il liber al, intolerant, bigoted, hidebound

**Ana** rigorous, *rigid, strict, stringent: obdurate, *inflexible, inexorable: provincial, parochial, local, small-town, *insular

**Ant** broad, broad-minded —*Con* *liberal, progressive, advanced, radical: tolerant, *forbearing, indulgent, lenient

narrow* *s trait, sound, channel, passage

nasty *dirty, filthy, squalid, foul

**Ana** *coarse, gross, vulgar, obscene, ribald: tainted, contaminated, polluted, defiled *(see CONTAMINATE): indelicate, indecent, unseemly, improper, *indecorous

nation **n** *race, people

national n *citizen, subject

native adj Native, indigenous, endemic, aboriginal, autochthonous all mean belonging to or associated with a particular place by birth or origin. A person or thing is native *(opposed to foreign, alien) that has had his or its birth or origin in the place in question *(a native American)* *(a native New Yorker)* *(a native tradition)* *(native artists)* left the state and studied abroad—Amer. Guide Series: Mich.) *(a one-story structure of native stone—S. S. King)* A person or thing is indigenous *(opposed to naturalized, exotic) that is not only native but also has not been introduced from elsewhere into the place indicated *(maize is indigenous to America)* *(Southern Rhodesia at present

**Ana** analogous words **Ant** antonyms **Con** contrasted words See also explanatory notes facing page 1
natural

556

employs about half a million Africans, of whom half are
indigenous and half are migrants from neighboring
territories—Peter Scott) <no written flora anywhere in
the world admits as indigenous that lusty weed . . . called
Good-King-Henry—Peattie) Indigenous is applied usually to kinds (as species or races) rather than to individuals
and often implies reference to a larger area than native
(as to a country, or to a region characterized by a particular type of climate). A thing is endemic (opposed to
exotic and in medicine to pandemic) which not only is
indigenous but is also peculiar to, or in the case of a
disease, prevalent in, a restricted region because of special
conditions favoring its growth or existence <edelweiss
is endemic in the Alps> <that complacency which is an
endemic disease of academic groups—Conant) A person
or thing is aboriginal that belongs to the earliest known
race inhabiting a country or to the people found there (as
by explorers, colonists, and invaders); the term usually
implies the lack of a known predecessor and often connotes a primitive culture <Indians are the aboriginal
Americans) < America must turn again to catch the spirit
of her own dark, aboriginal continent—D. H. Lawrence)
<the Kooboos, a primitive aboriginal race in the southeast of Sumatra—Frazer) Aboriginal is more rarely
applied to the earliest ascertainable native plants and
animals. Something is autochthonous which has its origin
in the place in which it is found (autochthonous rocks)
<an autochthonous flora) When applied to races of men
or their achievements, it implies purity of stock or freedom from all external influences <as long as the States
continue to . . . be dominated by the poetry of the Old
World, and remain unsupplied with autochthonous song
. . . so long will they stop short of first-class nationality
— Whitman)
Ant alien, foreign

natural

thing at all except his collection of modern paintings
—Dahl) <she was so simple and trustful that I always
thought it would be as wicked to hurt her as to hurt a
babe in swaddling clothes— Webb) Ingenuous stresses
inability to disguise or to conceal one's thoughts or
feelings; it usually implies frankness or candor, lack of
reserve, or freedom from dissimulation, often with a hint
of childlike simplicity < Father had set a dog on him. A
less ingenuous character would be silent about such
passages . . . but that is not his quality—H. G. Wells)
<to post-Freudian ears this kind of language seems touchingly quaint and ingenuous—Huxley) Naïve implies freedom from all that is artificial, conventional, or acquired;
in early use and still often, especially in its derivative
noun naivete, it suggests freshness, spontaneity, and
genuine expression of a nature untouched by worldly
influences and without affectation or artifices <by contrast
with the poetry of Vergil, that of Homer seems strikingly
naïve) <a delightfully naïve personality) <he claimed to
himself to be innocent or naïve, but his pretense was the
thinnest—Cheever) But it may sometimes become a term
of derogation and then often implies lack of worldly
wisdom <Sophia, the naïve ninny, had actually supposed
that her walking along a hundred yards of pavement with
a god by her side was not going to excite remark!—
Bennett) <one does not ask favors, if it can be avoided,
of persons one genuinely respects; one puts such burdens
upon the naïve and colorless, upon what are called the
good-natured—Mencken) Equally often, especially in
learned use, it suggests the point of view of the untutored
or unenlightened person or of one whose judgments are
not corrected by advanced scientific or philosophical
knowledge and who therefore supposes that things are
what they seem to be <the naïve science of an earlier
day merely took it for granted that space and time existed
in their own right—Jeans) <that naïve patriotism which
leads every race to regard itself as evidently superior to
every other—Krutch) Unsophisticated also stresses lack
of wisdom, especially worldly wisdom. It does not, however, emphasize native simplicity as strongly as naïve;
rather, it suggests lack of the experience or training necessary for worldly success or, more specifically, for graceful
and adroit social relations <she's not the type of the
moment, not elegant or artificial, too much the unsophisticated child of nature—Rose Macaulay)
<Italian
civilization had, in short, everything to dazzle the imagination of unsophisticated northerners emerging into a period
of prosperity— T. S. Eliot) Artless lays the stress on the
absence of design; it suggests naturalness that is the result
of indifference to, or unawareness of, the effect or impression one is producing (overflowing with . . . artless
maternal gratitude—Austen) <almost every turn in the
artless little maid's prattle touched a new mood in him
—Meredith) <he hated to seem heavy or profound or
anything but artless and spontaneous to Cecily—H. G.
Wells) Unaffected centers the attention on the absence
of affectation, but it usually implies both naturalness
and simplicity without any hint of childishness, unworldliness, guilelessness, or indifference <a well-bred, unaffected girl) <he was extremely simple and unaffected
in his attitude, and readily approachable—MacCallum)
<gratified by his young guest's unaffected admiration for
this treasure— Wylie)

natural adj 1 * regular, normal, typical
Ana ordinary, *common, familiar: *usual, customary,
habitual, accustomed, wonted
Ant unnatural: artificial: adventitious
2 Natural, simple, ingenuous, naïve, unsophisticated, artless, unaffected are applied to persons, their acts, and their
utterances, in the sense of wholly free from pretension or
calculation. Natural implies, on the one hand, freedom
from every sign of artificiality, effort, constraint, or
affectation and, on the other hand, an ease, a spontaneousness, or a flexibility that suggests nature rather than
art; the term often implies opposition to whatever is
labored, stiff, formal, or artificial <set him to write poetry,
he is limited, artificial, and impotent; set him to write
prose, he is free, natural, and effective— Arnold) <it is
of the essence of such talk that it should be natural
and attractive, not professional or didactic—Benson)
<she was so friendly and so natural that it was nice to
talk to her about what was interesting him—Archibald
Marshall) <the fact is that a poetic language which
appears natural to one age will appear unnatural or artificial to another—Day Lewis) Simple stresses complete
freedom from everything that might suggest unconscious
or conscious duplicity. It usually implies lack of confusion
of aims, desires, interests, or values and therefore may
carry one or the other of connotations as divergent as
mental immaturity and intellectual ripeness, as the lack
of experience characteristic of the child and the fullness
of wisdom characteristic of the sage, or as the transparency Ana *spontaneous, impulsive, instinctive: ingrained,
of those who do not know how to conceal their nature or constitutional, * inherent
motives and that of those who have nothing to conceal Con formal, conventional, ceremonious, *ceremonial:
<nothing is more simple than greatness; indeed, to be sim- pretentious, ostentatious, *showy: affected, assumed,
ple is to be great—Emerson)
<a man of mild and simple counterfeited, feigned (see ASSUME)
character who up to then had shown no interest in any- natural n *fool, idiot, imbecile, moron, simpleton

near adj & adv *close, nigh, nearby

Ant far

near vb *approach, approximate

Ana rival, *match, touch, equal

Con vary, *change, alter, modify: *differ

nearby adj & adv *close, near, nigh

Ant far off

nearest, next are both superlative forms of near, but they are not always interchangeable. Nearest may be used whenever the intent is merely to indicate the highest degree of propinquity (as in space, time, or kinship) <the nearest house is five miles distant> <their nearest neighbor lives two miles away> <her nearest relatives are her father and mother> Next has lost this sense and usually implies immediate succession, or sometimes precedence, in an order, a series, or a sequence; thus, the next house is the house just beyond the one in mind in a row or series of houses; their next child is the one who comes after the child under consideration in order of birth; the next best is the second best in a rating or choice <the next chapter of the story> <the next day> <the next time they met> <ask the next person we meet> But in law one's nearest relative is one's "next of kin"; one's "next friend" is a person (as a near relative or natural guardian) who has the right or is appointed by a court to act for a person (as an infant) who by the law of the state has not full legal capacity to sue or make other legal moves. In ordinary language "nearest of kin" is found as often as "next of kin," but "nearest friend" applies distinctively to one's most intimate friend.

nearly, almost, approximately, well-nigh are comparable when they mean within a little of being, becoming, reaching, or sufficing. Their differences in meaning are often imperceptible. However, nearly is suitable when mere proximity is implied <they are nearly at the end of their journey> <it is nearly six o'clock> <she was nearly hysterical with fright> Almost is more explicit when the emphasis is on a falling short or a deficiency <they had almost finished when they were interrupted> <she is almost out of her mind with grief> <the news is almost too good to be true> Approximately is an appropriate choice when the difference is of no practical importance and a reasonable approach to accuracy is implied <there were approximately 10,000 present> <government meteorologists make approximately correct forecasts> Well-nigh often equals virtually <he is well-nigh mad> <the difficulty of selecting the best of his short essays for a strictly limited space is well-nigh insuperable —Desmond MacCarthy>

neat, tidy, trim, trigg, snug, shipshape, spick-and-span mean manifesting care and orderliness. Neat through all its variations in sense keeps as its basic implication clearness, such as the clearness from dirt or soil that is manifest chiefly in perfect cleanliness <her house is as neat as a pin> <the cat is the neatest of domestic animals> <he was remarkably neat in his dress—Johnson> <it was a neat place, with its piles of magazines and newspapers stacked in orderly fashion—MacInnes> or the clearness that is indicated in simplicity and freedom from what clutters, complicates, or confuses or that indicates ordinlessness, deftness, or adroitness <neat workmanship> <a neat style> <neat minds, who prefer things in their proper places, ticketed and pigeonholed—Dixon> <a neat retort> Tidy commonly suggests a pleasing neatness and order diligently maintained <he's always tidy without being smart; his coat is old and his trousers are uncreased, but they're both clean, and nothing's loose or torn—Richard Harrison> As distinguished from neat, tidy throws the stress on ordleness, careful arrangement, or a place for everything, rather than on cleanliness or simplicity <a tidy desk> <a tidy sewing basket> Once upon a time the universe was all tidy, with everything in its proper place, and...ever since then it has been growing more and more disorderly—Russell> (they have an unfailing instinct for doing things in a tidy way—their busy airports handle passengers with remarkable smoothness—Rolo) Trim implies both neatness and tidiness; it stresses, however, such smartness or spruceness in appearance as is given by clear lines and excellent proportions <a trim clipper ship> <a trim figure> <his shoes and buckles, too, though plain, were trim—Dickens> <a crisscross of trim...paths—Lowet> Trig, though close to trim, tends to carry a stronger implication of compactness, of neatness, and of jauntness of appearance and is especially applicable to persons or their clothes <she has a trig new tailored suit> (his hair was hardly even gray, and he stood as straight and trig as a fence post—Hershey> <a wonderfully trig beret, wide and flat—New Yorker> Snug (see also COMFORTABLE) in the present relation applies basically to ships and suggests a fine trimness of line and construction <a snug little ship> or adequate and orderly preparation for a voyage and especially for riding out a storm <soon all was snug aloft, and we were allowed to go below—Dana> In other applications the term may imply a neat, compact, ordered state that affords security or sheltered ease <everything on this snug property was bright, thriving, and well kept—Hardy> <snoo little shops that once offered Cornhill the best soups and jellies—West> Shipshape is often used in place of snug to describe not only ships where tidiness and trimness prevail but whatever depends for its success or well-being upon habits of tidiness and orderliness <his affairs are in shipshape condition> <look to the babes, and till I come again keep everything shipshape—Tennyson> <everything from rifles to shoelaces got a complete going over. It was my job to see that all was perfect. Finally, I felt confident that all was shipshape—H. V. Kaltenborn> <everything was shipshape—Tennyson> Neatness has been kept new in appearance or made to look like new <spick-and-span> <the kitchen was spick-and-span> <spick-and-span machinery> <no spots came on his clothes. No slovenly habits crept upon him. He was always spick-and-span—White> Ana *clean, cleanly: fastidious, *nice, dainty, finicky: exact, precise, *correct, accurate Ant filthy —Con unkempt, disheveled, slovenly, *slipshod, sloppy: slack, lax, remiss, *negligent: confused, muddled, added <see CONFUSE>

need, necessity, exigency may all denote either a poor, indigent, needy, destitute, penniless, impoverished, drained, depleted, exhausted, bankrupt (see DEPRETE)

Con *rich, wealthy, affluent, opulent

necessity *need, exigency

*compelling, or compelling, constraining or constraint, obliging or obligation, coercing or coercion (see corresponding verbs at FORCE): indispensableness, requisiteness or requisition, needfulness (see corresponding adjectives at NEEDFUL)

need n 

Need, necessity, exigency may all denote either a state or condition requiring something as essential or indispensable or incapable of or create a demand for something indispensable (as to the well-being, protection, security, success, or functioning of those or the one concerned) (the need of a city for an adequate water supply) (provide food and lodging for those in need) (the need of the American navy for a two-ocean navy) (order and discipline were the crying needs—Malone)

Necessity, though often interchanged with need, usually carries a stronger suggestion of an imperative demand or of a compelling cause (telephone me only in case of necessity) (as soon as war is declared, every nation or institution must subsume all other considerations to the necessity of victory—Inge)

Necessity rather than charity was responsible for Republican commitments to the United Nations—Feuer

amid these malign forces, our haunting anxiety and our paramount necessity is the defense of our country—Hoover

Necessity may also apply to a compelling principle or abstract force inherent in nature or in the constitution of a thing and inevitable in its operation or incapable in its results (there is no logical necessity apparent in the conclusions you have reached) (such families get the necessities of life regardless of prices. To them differences in price levels mean only a difference in luxuries—Arnold)

one of the unhappy necessities of human existence is that we have to “find things out for ourselves”—Eliot

Exigency (see also JUNCTURE) implies the compulsion of necessity or occasionally of an inherent compelling principle, especially as a result of such special circumstances as a crisis, an emergency, or an accident, that imposes severe restrictions or great stress and strain; in either case, the term emphasizes, more than either of the preceding words, extreme urgency, demands of a peremptory and exacting character, and difficulties that cannot be easily overcome (figures which are doing nothing in particular...striking an attitude which is dictated not by the inner necessities of balance or motion, but by the exigencies of the composition—Binyon)

such travel exigencies as having to scout around for a room when you’re tired—Joseph

It may be argued that the exigencies of their work—the tension, the deadline...the abrupt arrivals and departures—drove them to alcohol—Hubbell

*stress, strain, pressure: *lack, want, dearth, absence, defect, privation: poverty, indigence, penury, destitution, privation, want

negate  

*nullify, annul, abrogate, invalidate

negative adj *neutral, indifferent

Ant affirmative

negative vb 1 *deny, gainsay, traverse, contradict, impugn, contravene 2 *neutralize, counteract

neglect vb Neglect, omit, disregard, overlook, slight, forget are comparable when they mean to pass over something without giving it due or sufficient attention. Neglect usually implies intentional or unintentional failure to give full or proper attention, especially to something one is doing (as a task) or should do (as a duty) or to someone who has a claim upon one's care or attention (he was changing into his dress clothes ... ). He had neglected to hang them up the night before, and for once they were bedraggled—Mailer. 'he asked Mr. Powell with some brusqueness that the chief mate had neglected to instruct him that the captain was to be found on the port side—Conrad. 'neglect his family' Omit leaves a leaving out of something which forms a part of a whole (omit two stanzas of a hymn) got up late and omitted breakfast or a neglecting entirely through oversight, inattention, or absorption of an important detail, opportunity, or aspect (Constance remembered small possessions of her own which she had omitted to remove from the cutting-out room—Bennett. Disregard usually implies voluntary, sometimes deliberate, inattention; the term may or may not imply justifiable neglect (disregard petty annoyances) (disregard an unimportant piece of evidence) (she persists in disregarding the wishes of her mother) (nearly all the humane alleviations of brutal violence, introduced and practised in the days when professional armies fought for a dynasty or for a point of honor, were disregarded—Inge) (flouting convention and disregarding his own clerical position—Handlin. Ignore usually implies either an intention to disregard or a failure to regard something more or less obvious; it may even suggest a deliberate closing of the eyes to what one does not wish to recognize (to those who agree with me I am uttering commonplaces and to those who disagree I am ignoring the necessary foundations of thought—Justice Holmes) (its mathematics approaches mysticism and its theory contains certain impossibilities which are ignored in practice—Theodore Sturgeon) (by tacit agreement they ignored the remarks and insinuations of their acquaintances—D. H. Lawrence. Overlook implies an omitting or disregarding, sometimes through intention but more often through haste, or lack of care (overlook an item in an account) (it is the practice of good nature to overlook the faults which have already, by the consequences, punished the delinquent—Johnson) (when he had heard so young a man call him by nickname, but he overlooked this also in light of what had happened—Purdy) Slight may imply neglect, omission, or disregard, but it also usually implies a contemptuous or an arrogant attitude that makes one undervalue a thing's importance, treat a person disdainfully, or be neglectful in performance of a task or duty (nothing in the service was slighted, every phrase and gesture had its full value—Cather) (I have been slighted, tricked, threatened, insulted, made ill ... but I am justified—H. G. Wells. Forget (compare FORGETFUL) often retains in this relation the implication of losing the memory of something or someone, so that when it implies neglect, it usually carries a suggestion of willful ignoring or of a failure to impress the thing neglected upon one's mind (I shall not be surprised to be neglected and forget—Nelson) (still, he told Hannah to get the boy better clothes—though he forgot to give her any money for the purpose—Deland) (it was—well, until yesterday—all but forgotten—put out of mind, I mean—de la Mare)

Ant cherish —Con *appreciate, value, prize, treasure: *nurse, nurture, foster, cultivate

neglect n 1 *failure, default, miscarriage, dereliction

Ana omitting or omission, disregarding or disregard, ignoring, slighting, forgetting, overlooking (see corresponding verbs at NEGLECT): forgetfulness, obliviousness (see adjectives at FORGETFUL) 2 *negligence

Ana neglecting, omitting or omission, disregarding or disregard, ignoring, slighting, forgetting, overlooking (see corresponding verbs at NEGLECT)

neglectful *negligent, lax, slack, remiss

Ana *careless, heedless, thoughtless

Ant attentive —Con *thoughtful, considerate

negligence, neglect are not always clearly distinguished in use, even though the lines between them may be drawn with some clearness. Negligence stresses the quality or fact of being negligent or careless either as shown in a lack of care in the performance of a task, a duty, or a piece of work or in the operation or handling of a dangerous machine or mechanism which requires effort or close attention (the amazing negligence of some housekeepers) (an act of criminal negligence) (no one has done more through negligence to corrupt the language—Byron) (most of these are involved in accidents through their own negligence—Theodore Sturgeon) or as shown in a temperamental or assumed indifference to small niceties (as in dress, manners, or style) that gives an impression of casualness, artlessness, or lack of artificiality (spoke with conviction, yet with a gentlemanly lightness, almost a negligence, as though to cancel any tone of dogmatism ... in his words—Wouk) (his companion wore well-cut tweeds with a sort of aggressive negligence, as though he hated them—I. A. R. Wylie). Neglect, on the other hand, applies either to the act or fact of leaving undone or carelessly, inadequately, or imperfectly done something which it is one's business or duty to do (convinced of neglect of duty) (we made a nice tidy cleanup ... . If I hadn't done it I ought either to have been shot for neglect or dismissed for incapacity—H. G. Wells) (in dealing with the infant ... there is need of a delicate balance between neglect and indulgence—Russell) or to the state or fact of being neglected, slighted, ignored, or forgotten (rescue my poor remains from vile neglect—Prior) (a motive for reading it ... [that] ensured poetry against neglect—Day Lewis) (destined either to constantly inadequate execution or to complete neglect—Virgil Thomson). For these reasons the phrase 'the negligence of a person' always refers to a quality of character of the person as an agent or to its outward manifestation (as in an act, a piece of work, or an accident) while 'the neglect of a person' refers to the act of another who neglects, slight, ignores, or forgets the person, thereby making the latter his victim.

Ana laxness, slackness, remissness (see corresponding adjectives at NEGLIGENCE): indifference, unconcernedness or unconcern, incuriousness (see corresponding adjectives at INDIFFERENT)

Ant attention: solicitude —Con *care, concern, anxiety, worry: diligence, assiduity, sedulousness (see corresponding adjectives at BUSY)

negligent, neglectful, lax, slack, remiss are comparable when applied to persons, their ways of working or acting,
and the results of their work or activities with the meaning culpably careless or manifesting such carelessness. Negligent implies such culpable inattentiveness as is likely to result in imperfection, incompleteness, slovenliness, or danger or damage to others (his family knew him to be . . . a most negligent and dilatory correspondent—Austen) 

 negociate 1 parley, treat, *confer, commune, consult, negotiate in his poetical style . . . so slovenly, slipshod, and infernicious—Arnold) (a careless workman, negligent of detail—Edith Hamilton) Neglectful is usually more derogatory or censorious than negligent, for it carries a stronger connotation of laziness or deliberate and blameworthy inattention (parents neglectful of their children’s health) (a government at once insatiable and neglectful—Mill) (show no trace of shame, and . . . are utterly neglectful of what we consider the first requirements of decency—Westernmark) 

 Lax (see also loose) implies a usually blameworthy lack of necessary strictness, severity, or precision; the term applies chiefly to persons who do not satisfy the rigorous demands made upon them by their work or duties or to work or an activity performed or carried on without the close attention, constant care, or strict adherence to law or custom that is necessary (a lax parent) (a lax discipline) (a lax morals) (a lax execution of a law) (scandalously lax in restraining drunkards from annoying the sober—Trevelan) (we do not intend to leave things so lax that loopholes will be left for cheats—Roosevelt) 

 Slack (see also loose) stresses the want of proper or necessary diligence and expedition as well as of care; the term usually also implies indolence or sluggishness or indifference (a slack worker) (we keep our wits slack—H. G. Wells) When applied to what is accomplished by a slack worker, the term usually suggests neglect of important details necessary to the completeness, finish, or perfection of the work (see how distant figure of admirable design, though of rather slack execution—Stobart) (a fine nose for what was slack in the play or insufficiently developed—Mailer) 

 Remiss implies culpable carelessness that shows itself in slackness and forgetfulness or in negligence; it is applied chiefly to something lax in performance or maintenance, but it may be applied to a person who is unduly careless or lax in the performance of his duties (remiss housekeeping) (a remiss police officer) (it certainly had been very remiss of him, as Mayor . . . to call no meeting ere this—Hardy) (so remiss did they become in their attentions that we could no longer rely upon their bringing us the daily supply of food—Melville) 

 Ana *careless, heedless, thoughtless, inadvertent: *indifferent, unconcerned, incurious: *slipshod, slovenly 

 Con *rigid, strict, rigorous: *thoughtful, considerate, attentive 

 Negotiate 1 parley, treat, *confer, commune, consult, advise 

 2 Negotiate, arrange, concert are comparable when they mean to bring about or accomplish by mutual agreement especially after discussion or parley. Negotiate and arrange both imply prior exchange of views and wishes and, sometimes, settlement by bargaining or compromise. Negotiate, however, is somewhat more formal and is especially appropriate when the dealings are carried on by diplomatic, business, or legal agencies, while arrange (see also order) may retain some notion of its basic idea of putting in order and is especially applicable to dealings tending to the establishment or restoration of order or to those carried on by private persons or their representatives 

 Negotiate a treaty (arrange a marriage) (negotiate a monetary understanding with the British government—Current Biol.) (arrange the settlement of a case out of court) (a peace with the native chiefs was arranged and the crisis passed—McPherson) Concert implies a planning together and especially a settling upon a joint course of action through conference and negotiation (a conference of Commonwealth finance ministers . . . to discuss the balance-of-payments crisis in the sterling area and to concert action to deal with it—Americana Annual) (within another generation there will be another world war if the nations of the world do not concert the method by which to prevent it—Woodrow Wilson) 

 Neighborhood *locality, district, vicinity 

 Neighboring friendly, *amicable 

 Con unneighborly: ill-disposed—Con antagonistic, *averse

 Ana forceful, forcible, potent, *powerful: *spirited, mottlesome: virile, manly (see Male) 

 Con *impatient, restless, restive, unquiet, uneasy, fidgety, jump, jurdy 

 Ana excited or excitable, stimulated, provoked or pro vocative (see corresponding verbs at provoke): *inconstant, unstable, mercurial 

 Ant steady—Con constant, even, equable, uniform (see steady) 

 Nettle provoke, exasperate, *irritate, aggravate, rile, peev 

 Ana *annoy, irk, bother, vex: disturb, perturb, agitate, upset, *discompose: fret, chafe, gall (see Abrade) 

 Network *system, scheme, complex, organism, economy 

 Neurologist, psychiatrist, alienist, psychopathologist, psychotherapist, psychoanalyst are comparable though not synonymous terms that denote a specialist in mental disorders. A neurologist is a physician skilled in the diagnosis and treatment of diseases of the nervous system, that is, of diseases (as epilepsy or locomotor ataxia) that involve structural or functional disorder of nervous tissue. Psychiatrist, alienist, psychopathologist all designate a physician who devotes himself to the diagnosis and treatment of diseases affecting the mind or emotions and especially, as distinguished from neurologist, of disorders (as neurasthenia, hysteria, and paranoia) not demonstrably of physical origin. Psychiatrist is the general term, applicable to any such physician, while alienist is the preferred term in medical jurisprudence and may especially suggest skill in detection of mental derangements or of insanity, and psychopathologist may specifically apply to a physician specializing in emotional disorders and dealing largely with the dynamic factors (as defects of personality or unfavorable environment) underlying such disorders. 

 Psychotherapist may be either a physician or a layman (as
neutral adj Neutral, negative, indifferent are comparable when they mean lacking decisiveness or distinctiveness in character, quality, action, or effect. Neutral, in one of its earliest and still common senses, applies to states, governments, parties, or persons who refuse to take sides with either of two or any of several contending parties. The term need not imply an attitude of impartiality, but it usually implies either indecision or a refraining from positive action (his family connections kept him neutral, and the household was never drawn into the war—Buchan) whether it is aimed to win him for the communist or fascist state—Day Lewis <the bucks bridled a little when I came in, and then ignored me. Once the atmosphere had become neutral again, Thompson was willing to talk—Mailer> When otherwise applied (as to colors or terms, or a failure to assume a definite or concrete form <there is some indication that the paradoxical and even mutually negating anecdotes in the history of a human heart can be juxtaposed and annealed by art into verisimilitude and credibility—Faulkner>) Ana offset, countervail, counterbalance, counterpoise (see COMPENSATE): defeat, overcome, subdue, *conquer new adj New, novel, new-fashioned, newfangled, modern, modernistic, original, fresh can all mean having very recently come into existence or use or into a connection, a position, or a state (as of being recognized). A thing is new that has never before the time of its advent been known, thought of, manufactured, or experienced, or that is just ready for use, sale, or circulation, or that has just been acquired (new books) (new ideas) (a new washing machine) (no man putteth new wine into old bottles—Mk 2:22) (a new way of dressing her hair) A person is new if he has just been taken into a military, business, social, or other group (a new soldier) (a new stenographer) (three new members) or if he has received his first experience (he was . . . frightened, being new to the sight—Dickens) or if he has been renewed in spirit or in mind or in body (the quiet hills which I am now seeing again, with a new and contented eye—O'Connor) (the hot food made a new man of him) A thing is novel which is not only new but so out of the ordinary course as to strike one as strange, unusual, or unfamiliar (novel forms of government, like those of Russia and Italy—Frankfurter) (novel schemes of salvation—L. P. Smith) (sermons . . . bold in thought and novel in language—Wharton) A thing is new-fashioned which is so different in form, shape, style, or character from what was previously known that it challenges curiosity or has only recently met general acceptance (new-fashioned modes of painting) (new-fashioned hats for women are regarded as absurd by many men) (the type of old-fashioned scholarship) (the type of new-fashioned criticism—S. E. Hayman) A thing is newfangled which strikes one as unnecessarily or as ingeniously novel; often, however, the term differs little from new except in suggesting disparagement (newfangled toys) (newfangled theories of art) (a newfangled nomenclature—Hamilton) quite a modern hostelry for its time. It had such newfangled doodads as mechanical dishwashers and potato peelers

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
—Green Peyton> A person or thing is modern that belongs to the present time or is especially characteristic of it; the term often implies up-to-dateness and novelty or a contrast with what has been long accepted and still is the choice of the conservative: in this special sense modernistic may be preferred to modern, but more often modernistic carries a contumacious suggestion of the ephemeral novel <when I refer to modern music, I do not mean necessarily modernistic music, much of which is a pale afterglow of the great and original modernism of yesteryear—Virgil Thomson> Modern, however, is always preferred to modernistic when contemporaneousness only is implied <in modern art atmosphere counts for so much—Wilde> this strange disease of modern life, with its sick hurry, its divided aims, its heads o‘ertaxed, its palsied hearts—Arnold> But modern is also applicable to things of more remote origin than any of the other terms; as supposedly ancient and medieval it usually implies reference to the centuries beginning with the full Renaissance up to the present <modern languages> modern civilizations> Often, however, the dividing line between what is modern and what is too far distant in time to be called modern has to be supplied by the context <the Victorian era gave way to the modern age of machinery> most modern well-to-do Englishmen and Americans, if they were transported by magic into the age of Elizabeth, would wish themselves back in the modern world—Russell> A person or thing is original that is or produces something new or novel and, at the same time, the first of its kind <that he would be successful in an original way, or that he would go to the dogs in an original way, seemed equally probable—Hardy> they contain no new ideas . . . [he was anything but an original thinker—R. A. Hall> some areas were occupied by savages, in others there were brilliant and original civilizations—Poole> A thing is fresh that is or seems so new that it has not had time to lose the signs of newness, such as liveliness, energy, brightness, or virginal quality <fresh footprints> receive a fresh impetus make a fresh start> this was a new voice falling upon the attentive ears of youth—a fresh challenge to its native and impetuous generosity—Repppler> a great shouting at the coal works because a fresh vein of coal had been discovered—Woolf> Ant

newfangled *new, novel, new-fashioned, modernistic, modern, original, fresh

new-fashioned *new, novel, newfangled, modernistic, modern, original, fresh

news, tidings, intelligence, advice are comparable when they designate a report or the reports of occurrences and conditions not previously known. News stresses novelty and freshness of information the gossip was not news to her> the letter contained no news> wanted to tell her> the letter contained no news> her) <the situation raises a nice question> <it is a nice point in ethics whether it is dishonest to rob one’s own money-box—Lynd> Dainty (see also choice) usually implies a tendency to select carefully what does, or to reject with more or less disdain what does not, satisfy one’s extremely delicate taste or sensibility; it usually connotes chairiness or a tendency to pick and choose, especially in eating I have been silent—the hungry cannot be dainty—but it is useless to tell a pampered man this—M. W. Shelley> <no shape but his can please your dainty eye—Shak> it’s all right to be dainty about money when you’ve lots of it as you have—Behrman> Fastidious implies a strong aversion to something that does not satisfy one’s sense of what is right, proper, or in good taste; it may suggest the possession of ethical, artistic, social, or other standards that are so high that they impose a strain upon those who would meet them <it is . . . an advantage for an author to have two or three fastidious readers whom he can imagine sniffing at his pages—L. P. Smith> he isn’t always easy to work for, being fastidious in his standards and uncompromising in his demands—Wechaburg> or that cause suffering to the possessor when they are not satisfied <the disorder was almost more than his fastidious taste could bear—Cather> or that foster extreme care in selection from what is offered or available <why such a desperate orgy of literature? I thought you were of a more fastidious habit—not like Stanley, who insists on reading everything—Rose Macaulay> he liked people, was . . . not too fastidious to get along with barkeeps and party toughs and sufficiently cultivated to get along with gentlemen—Commager> Finicky and finicking as well as the less common finical imply an affected or overnice fastidiousness <his reserve, to Mrs. Philips were now productive of the most interesting intelligence—Austen> In specific military use intelligence suggests clandestine methods of gathering information (as by secret agents). It is therefore applied not only to the information gathered but to the branch of the service commissioned to gather it <an enemy superior in numbers, who possessed also the advantage in armament, position, and more accurate intelligence—Buchan> In comparison with intelligence, which often suggests the gathering of important information, advice stresses the transmission of information and implies the immediacy of its value. It, or its plural advices, is often applied to the means (as letters, telegrams, or messengers) by which this information is communicated <no doubt he had advices that Casale was sufficiently provisioned to last for many months, perhaps a year—Belloc> beginning their advices with the revelation that a rich potential for future prosperity and happiness had been discovered in atomic energy—Burlingame> newspaper *journal, periodical, magazine, review, organ

nice 1 Nice, dainty, fastidious, finicky, finicking, finical, particular, fussy, squeamish, persnickety, persnicketty can all mean exacting or displaying exacting standards (as in selection, judgment, or workmanship). Nice (see also correct, decorous) implies fineness of discrimination and power to distinguish the very good from the merely good; the term may connote more of intellectual quality than the other words can appetite for knowledge <can’t be nice—Johnson> he had a nice taste in literature and had edited Crashaw with conspicuous taste and much perception—Mackenzie> Nice is also applicable to questions or problems which require such powers of discrimination and subtlety or delicacy in handling if the solution is to be found <a nice experiment> <the situation raises a nice question> <it is a nice point in ethics whether it is dishonest to rob one’s own money-box—Lynd> Dainty (see also choice) usually implies a tendency to select carefully what does, or to reject with more or less disdain what does not, satisfy one’s extremely delicate taste or sensibility; it usually connotes chairiness or a tendency to pick and choose, especially in eating I have been silent—the hungry cannot be dainty—but it is useless to tell a pampered man this—M. W. Shelley> <no shape but his can please your dainty eye—Shak> it’s all right to be dainty about money when you’ve lots of it as you have—Behrman> Fastidious implies a strong aversion to something that does not satisfy one’s sense of what is right, proper, or in good taste; it may suggest the possession of ethical, artistic, social, or other standards that are so high that they impose a strain upon those who would meet them <it is . . . an advantage for an author to have two or three fastidious readers whom he can imagine sniffing at his pages—L. P. Smith> he isn’t always easy to work for, being fastidious in his standards and uncompromising in his demands—Wechaburg> or that cause suffering to the possessor when they are not satisfied <the disorder was almost more than his fastidious taste could bear—Cather> or that foster extreme care in selection from what is offered or available <why such a desperate orgy of literature? I thought you were of a more fastidious habit—not like Stanley, who insists on reading everything—Rose Macaulay> he liked people, was . . . not too fastidious to get along with barkeeps and party toughs and sufficiently cultivated to get along with gentlemen—Commager> Finicky and finicking as well as the less common finical imply an affected or overnice fastidiousness <his reserve,
his delicacy, his distaste for many of the persons and things surrounding him... have produced an impression of Gray as being a man falsely fastidious, finical, effeminate—Arnold)—his voice is too soft, his manners too precise. He is genial, yet he is finicky—Mailer)—finicking fishermen demand almost as many rods as there are varieties of fish—Monsanto Mag.) Particular implies an insistence that all details or circumstances must be exactly as one wishes them or that one's special or peculiar standards must be met. In contrast with fastidious, particular need not imply what others would call a high standard; the term usually suggests standards which the individual regards as high or exacting (she is particular about the way steak should be broiled)—every year it used to get a nice coat of paint—Papa was very particular about the paint—Hellman)—when it came to sharing his walks, Henry was rather particular. Alcott served for a stroll, but the real art of walking was beyond him—Brooks)—as she approached, George Adams, who had a particular mother, rose, and Niel followed his example—Cather) Fussy is applicable not only to fastidious or particular persons and acts that manifest a disposition to be querulous or fidgety (she was not one of the trivially fussy domesticated women—Ellis)—men who are finicky and a bundle of nerves. Fussy about their food, too—Christie)—in this matter Augustus moved slowly and tactfully. He was no lawyer, and he had not the fussy interest of Claudius in the work of the courts—Buchan)—indenting each paragraph half the width of a page, in a fussy, old-maidish sort of way—Robert Lewis)—but also to things that are especially difficult or complicated (he looked like a natural for the fussy bookkeeping routine of an orderly room—Binney)—a fussy piece of work) Squeamish implies a tendency to be easily nauseated by the sight, taste, smell, or hearing of something disagreeable (the starved stomach is not squeamish—Hudson)—the increase in body size may have been an important factor in releasing the early primaries from their nightly or twilight feeding habits, by allowing them better to hold their own against aggressors—LaBarre)—but nightly is the one of these terms that usually carries a strong implication of recurrence and is especially appropriate to convey the idea of happening night after night (there is only one novel this writer can recall which delves beneath the surface of the daily and nightly life and death of a great and influential newspaper—Harrison Smith)—Nocturnal, opposed to diurnal, is often interchangeable with nightly, especially in its more general sense (the squares of light along the fifteenth story testified until midnight of their nocturnal industry—Auchincloss)—the changing beauty of nocturnal landscapes—Bennett)—but distinctively it may mean active at night (shopping, working, theatergoing, and arguing hours in Barcelona never cease to amaze visitors from less nocturnal countries. Some shops stay open until well after midnight, and then are closed until the next noon—Wechsb erg)—the eyes of most fish are adapted to the conditions of dim illumination associated with nocturnal feeding—Dowdeswell)—Night in much of its use is interchangeable with nocturnal and may be preferred to the latter when a less formal term is required (night noises) (the night train) (a night ape)—Distinctively, the term is used to describe persons who work at night (a night nurse) (ask the night clerk) and things that occur or are intended for use at night (night baseball) (a bank with a night depository)—Daily nighttime dream, vision, *fancy, fantasy, phantasy, phantasm, daydream—Ana) *delusion, hallucination, illusion: threatening or threat, menacing or menace (see corresponding verbs at Threaten)—Nimble *agile, brisk, spry—Ana) sprightly, *lively, animated: alert, wide-awake, vigilant, *watchful: *supple, limber, lithe—Nievb) blast, blight—Ana) check, *arrest: squeeze, *press: *frustrate, thwart, balk—Nieb n blast, blight (see under Blast vb)—Ana) arresting, checking (see Arrest vb) freezing (see corresponding adjectives at Cold)—Nobility *aristocracy, gentry, county, elite, society—Ana) 1 stately, majestic, imposing, august, magnificent, *grand, grandiose—Ana) glorious, *splendid, resplendent, superb, sublime: illustrious, eminent (see Famous)—Ant ignoble: cheap—Con) despicable, *contemptible, sorry, scurvy, beggarly—2 virtuous, righteous, *moral, ethical
notice

2 *remark, observation, comment, commentary, obiter dictum

Ana annotation, gloss (see under annotate): remembering, reminding or reminding, recalling (see corresponding verbs at remember)

3 *letter, epistle, missive, message, dispatch, report, memorandum

noteworthy, notable, memorable mean having some quality that attracts one's attention. Noteworthy implies a quality and often a degree of excellence in a person or thing that justifies observation or remark (enough to make a philosopher noteworthy . . . not enough to make him great—Arnold) {the appearance of a book which formulates a distinct philosophy of life is a rare and noteworthy event—Cohen} Notable too stresses the power of a person or thing to attract attention, but often it distinctively connotes such a special feature as an excellence, a virtue, a value, or a significance that gives rise to its being noted or remembered {the clock kept time with notable accuracy and pertinacity—New Yorker} {it is a symbol of the abnormality of our days that it should be notable when anyone dares stand up and criticize what is happening in America—Bliven b. 1889} {Elizabethan and Jacobean poetry . . . had this and that notable quality, but, when we wish to admit that it had defects, it is rhetorical—T. S. Eliot} Memorable stresses the capacity in a person or thing not only of attracting attention but of being worthy to be remembered; it sometimes implies a personal reason for remembrance {a girl with long black hair and a memorable figure—Gibbs} {for the irrepressible Lyovochka this first venture into the great world beyond the towered gates was a memorable event—Simmons} {this extravagant temperament endeared him and his work to the public, and it let him write and draw with memorable vividness—Devoe} {his very occasional compliments, steeped in vinegar though they always were, seem more memorable than those of others—Osbert Sitwell}

Ana *noticeable, remarkable, prominent, conspicuous: patent, manifest, *evident

notice vb remark, observe, note, perceive, discern, *see, behold, descry, espys, view, survey, contemplate

Ana recognize, *acknowledge: refer, advert, allude

Con ignore, slight, overlook, disregard, *neglect

noticeable, remarkable, prominent, outstanding, conspicuous, salient, signal, striking, arresting can all mean attracting or compelling notice or attention. Noticeable implies that the thing so described is unlikely to escape observation {a noticeable aversion to his company} {so slight a movement it was barely noticeable—a tiny pushing forward of the hand—Dahl} Remarkable adds to noticeable the further implication of inviting comment or of demanding a call to others' attention; it commonly imputes to the thing so described an extraordinary or exceptional character {he has a remarkable gift for making friends} {far too much has been written and said about ghosts and ghouls . . . . They're remarkable enough, but have you ever realized that things that are remarkable are by definition rare?—Theodore Sturgeon} Prominent seldom loses its basic implication of protuberance or projection above a level or beyond a surface; it is applied appropriately to things that noticeably protrude from their background {a prominent nose} {fleecy gleams . . . served to render sufficiently distinct the more prominent objects around—Poe} In extended use it is applied to persons or things that stand out so clearly from their surroundings that they are often in evidence, are generally known or recognized, or are frequently pointed out; in such use it typically attributes superiority or importance to what it describes {the church occupies a prominent position in the community} {the second prominent fault in our reading and thinking is that we have not learned to fix our attention discriminately—Mott} {with regard to ill fortune . . . fate is given the most prominent part—Linton} Outstanding, although it implies prominence, is applicable only to what rises above or beyond others of the same kind and is remarkable by comparison with them {a stories of outstanding legislators who had to resign simply because they couldn't afford to serve any longer—Armbister} Conspicuous is applicable chiefly to what is so obvious or patent that the eye or the mind cannot miss it {conspicuous merit} {conspicuous bravery} {there was also some Yankee shrewdness here, for to be conspicuous—to be a hero—might entail some untoward financial responsibilities—Cheever} It is also used to describe what strikes the eye or the mind, often unpleasantly, through its singularity {wear conspicuous clothes} {made himself conspicuous by his affectation} {his signature are conspicuous by their absence} {against spending money for cement sidewalks, which he considered conspicuous waste—E. W. Smith} Salient stresses emphatic quality and is applied to what demands the attention or impresses itself insistently upon the mind; it impinges significance more often than obtrusiveness to the thing so described {there are days rich in salient news and days far rich from it—Montague} {pick the salient details out of dull verbiage—Marquand} Signal suggests such distinction from what is ordinary or usual that the thing so described is in itself remarkable or memorable {a signal mark of esteem} {such an appointment is a signal distinction though its value is mainly honorific—Manoukian} {Emily Dickinson is a signal illustration of this assertion. The imagination of this spinner . . . was constantly aware that the universe surrounded every detail of life—Thornton Wilder} Striking is applicable to what impresses itself powerfully and deeply upon the observer's mind or vision {one easily remembers the striking scenes in a play} {give a striking example of loyalty} {a woman of striking beauty} {one of the most striking and fearful figures in our early fiction—Parrington} Arresting adds to striking the suggestion of capturing attention or of being of more than passing interest {an arresting personality} {an arresting story} {the slight, steel-colored figure with steel-colored hair, was more arresting in its immobility than all the vociferations and gestures of the mob—Galsworthy}

Ana *evident, manifest, obvious, palpable, patent

notify apprise, advise, acquaint, *inform

Ana announce, *declare, proclaim, publish, promulgate, broadcast: *oral, divulge, tell

notion *idea, concept, conception, thought, impression, tell

notoriety reputation, repute, éclat, *fame, celebrity, renown, honor, glory

Ana *publicity, ballyhoo, promotion, propaganda

notwithstanding, in spite of, despite are often interchangeable prepositions. Notwithstanding, the least emphatic, merely implies the presence of an obstacle; in spite of, the most emphatic, suggests active opposition or strongly adverse considerations to be encountered; despite is somewhat lighter in its emphasis than in spite of and otherwise is closer to notwithstanding than to in spite of {notwithstanding the rain, I shall go} {I shall go in spite of all your efforts to prevent me} {despite his assurances, I doubted him}

nourish *feed, pasture, graze

Ana *nurse, nurture, foster, cultivate

nourishment nutriment, sustenance, *food, aliment, pub-
noxious *baneful, *pernicious, deleterious, detrimental

novitiate *novice, novice, Apprentice, probationer, postulant, neophyte are comparable when applied to one who is a beginner, especially in a trade, a profession, a career, or a sphere of life. Novice and the less common novitiate may be applied to anyone who comes under this description, since inexperience is their chief distinguishing implication (a novice in writing) a novice in mountain climbing had better not start with Mount Everest—Guérard (acquaint the novice with the manuscripts about which the experts talk—Monaghan) (show the Communist novitiate as a being human with idealistic impulses—Daniel Bell) (novitates to the druidic priesthood required twenty years' training in the mysteries—C. W. Ferguson) Novice is specifically applied to a new member of a religious order who is undergoing training before taking first and usually not the final vows. Apprentice is applicable to a beginner who is serving under another as his master or teacher a graduate assistant would begin as an apprentice to a full-time staff member—H. R. Bowen (the breathless, the frustrating adoration of a young apprentice in the atelier of some great master of the Renaissance—Brooks) In such applications it emphasizes subjection to supervision and discipline rather than inexperience. It often denotes a young person who is starting his working career as a beginner at a skilled trade under an arrangement involving both work and on-the-job tuition and often a planned schedule of supplementary study or applies to an enlisted man in the United States Navy (usually called in full apprentice seaman) who is receiving instruction in seamanship, gunnery, and the rudiments of a general education. Probationer designates a beginner who is on trial for a period of time and must prove his aptitude for the work or life the young ones who are seeking recognition and establishment—the graduate students and the instructors—in general, the probationers in the field—R. M. Weaver (the brevity and vanity of this life, in which we are but probationers—Richardson) Postulant implies candidacy for admission (as into a religious order); it may also imply acceptance for a period of probation the Essenes had books of their own which the postulant for admission to their sect had to swear to preserve—Jeffery (words . . . often answering to calls too subtle for analysis, are constantly presenting themselves as postulants for recognition—Fitzedward Hall) Neophyte usually suggests initiation, and is applicable to one who is learning the ways, methods, or principles of something (as an art, a science, a society, a club, or a religious faith) with which he is newly connected such an encounter usually perplexes the neophyte at first—M. C. Cooke) It often carries connotations of innocence and youthful eagerness derived from its association with a newly baptized person or convert to Christianity the old philosopher of Monticello was more than pleased with this ardent neophyte . . . Not since his own years abroad had Jefferson seen such an eager student—Brooks

nutriment

fears and excitements—Dahl} {they sulkily avoid his eye, and nurse their wrath in silence—Shaw} Nurture stresses the rearing and training, and so the determination of the course the person, or by extension the thing, will follow {by solemn vision, and bright silver dream, his fears and excitements—Dahl} (they sulkily avoid his eye, and nurse their wrath in silence—Shaw) Nurture stresses the rearing and training, and so the determination of the course the person, or by extension the thing, will follow {by solemn vision, and bright silver dream, his fears and excitements—Dahl} (they sulkily avoid his eye, and nurse their wrath in silence—Shaw) Nurture stresses the rearing and training, and so the determination of the course the person, or by extension the thing, will follow {by solemn vision, and bright silver dream, his fears and excitements—Dahl} (they sulkily avoid his eye, and nurse their wrath in silence—Shaw) Nurture stresses the rearing and training, and so the determination of the course the person, or by extension the thing, will follow {by solemn vision, and bright silver dream, his fears and excitements—Dahl} (they sulkily avoid his eye, and nurse their wrath in silence—Shaw) Nurture stresses the rearing and training, and so the determination of the course the person, or by extension the thing, will follow
obdurate inexorable, *inflexible, adamant, adamantine
Ana *hardened, indurated, callous: *obstinate, stubborn, mulish, stiff-necked: *immovable, immobile
Con *tender, compassionate: yielding, submitting, succumbing, relenting (see yield)

obedient, docile, tractable, amenable, biddable mean submissive to the will, guidance, or control of another. Though applied chiefly to persons, they are sometimes extended to things. Obedient implies due compliance with the commands or requests of a person or power whose authority one recognizes or accepts < obedient to the law> <he seemed to have lost all power of will; he was like an obedient child —Maugham> When applied to things it implies compulsion by a superior force or movement in accordance with natural law <tides obedient to the moon> <and floating straight, obedient to the stream, was carried towards Corinth—Shak> <faces of others seem like stars obedient to symmetrical laws—S spender> Docile implies a responsiveness to teaching, but it stresses either a predisposition to submit to guidance or control or an indisposition to resist impositions or to rebel against authority <that is a question which you must excuse my child from answering. Not, sir, from want of will, for she is docile and obedient—Hudson> <whatever doctrine is best calculated to make the common people docile wage slaves—Shaw> <she is a gentle, docile person .... I think she can be molded into exactly what you would wish her to be—Gibbons> Tractable, which is nearly as often applied to things as to persons and animals, suggests success or ease in handling or managing <one of the most tractable liquid propellants is gasoline—Space Handbook> Unlike docile, which in many ways it closely resembles, it seldom when applied to persons or animals implies a submissive temperament; thus, a docile child is always tractable, but a strong-willed child may prove tractable when he is wisely guided <kept warning him that it really was pneumonia, and that if he wouldn't be tractable he might not get over—Day> <a wave of rebelliousness ran through the countryside. Bulls which had always been tractable suddenly turned savage—George Orwell> Ame nable stresses a temperamental willingness or readiness to submit, not so much in the spirit of obedience as because of a desire to be agreeable or because of a natural openness of mind <well, Joan had a broad brow; she thought things over; she was amenable to ideas—H. G. Wells> <one cannot say that Sean was amenable, but he was pliable, and more than that a wife does not need—Maurice Walsh> <the question they ask is, would he be amenable—would he play ball with the Regulars—New Republic> Biddable, a more homely word than docile, is used chiefly of children <well-behaved children, biddable, meek, neat about their clothes, and always mindful of the proprieties—Cather> <so used to being biddable that words and wishes said and shown by older folks were still like orders to her—Guthrie>

Ana *compliant, acquiescent, resigned: submissive, subdued, tamed: deferential, obedient (see corresponding nouns at honor)

obese corpulent, rotund, chubby, *fleshy, fat, stout, portly, plump

Ant scrawny —Con *lean, spare, angular, rawboned, lank, lanky, gaunt, skinny: *thin, slender, slim, slight

obey, comply, mind are comparable when they mean to follow the wish, direction, or command of another. Obey is the general term and implies ready or submissive yielding to the authority of another (as by the performance of his command or bidding) or subjection to a higher principle or to the agency, force, or impulse by which it is actuated <honor and obey your father and mother> <the fiercest rebel against society ... obeys most of its conventions—Muller> <in the feudal regime, disobedience to an order was treason—or even hesitation to obey—Henry Adams> <he marks how well the ship her helm obeys—Byron> <a wholesome and strenuous effort to obey at all costs the call of what was felt as "truth"—Ellis> Comply, often with with, usually carries a stronger suggestion than obey of giving in to or yielding to a person's desires or expressed requests, the rules of an organization, the requirements of a law, or the conditions of one's environment <she complied with them in order to get the instruction, but her own inner fancies broke through—Dodd> It therefore often comes close to conform and accommodate and tends to imply complaisance, dependence, or lack of a strong opinion <if he offered her any more sherry she would not be able to refuse, since all her instinct at this moment was to comply—West> <the rich woman can terrorize the poor woman by threatening to go to law with her if her demands are not complied with—Shaw> <on being invited by the brute to go outside, what could Gerald do but comply?—Bennett> Mind, though often used in the sense of obey, especially in reference to children <mind your mother, Bobby> in a weaker sense carries the implication of heeding or attending to an expressed wish, demand, or command in order that one may comply with it <now mind, mother, not a word about Uncle Richard yet—Lytton> <but if your reverence minds what my wife says, you won't go wrong—Macdonald>

Ana submit, *yield, defer, bow, succumb: accede, acquiesce, subscribe, agree, *assent

Ant command, order

object n 1 thing, article

Ana *affair, concern, matter, thing: *form, figure, shape, configuration

2 objective, goal, end, aim, design, purpose, *intention, intent

Ana *motive, incentive, inducement

Con result, *effect, consequence

object vb Object, protest, remonstrate, expostulate, kick mean to oppose something (as a course, a procedure, a policy, or a project) especially by making known one's arguments against it. Object carries so strong an implication of dislike or aversion that it often is lacking in a clear or definite implication of vocal or other outward opposition, though frequently such a reaction is suggested <why do you always object to everything he wishes to do for you> <there's nothing wrong with being painted in the
nude; artists do it all the time. But our silly husbands have a way of objecting to that sort of thing—Dahl
Protest (see also assert 1) implies strong opposition and usually the presentation of objections in speech or in writing against the thing to which one objects <the residents of the district unanimously protested against the granting of the license> <swearing and protesting against every delay in the work—Anderson> <she marched with the pickets, protesting atmospheric testing—Kleiner>
Remonstrate implies protestation but it carries so much stronger an implication of an attempt to convince or persuade than protest carries that it is especially appropriate when the objection is to something being done by a child, a friend, or a relative, rather than by an official or an impersonal agent, or when reproof is also implied <now and then a well-meaning friend of Sir Austin’s ventured to remonstrate on the dangerous trial he was making in modelling any new plan of education for a youth—Meredith> <“Father Joseph,” he remonstrated, “you will never be able to take all these things back to Denver”—Cather>
Expostulate differs little from remonstrate, but it usually carries a heightened implication of firmness, earnest, but friendly reason or insistence on the merits of one’s arguments <the priestly brotherhood . . . prompt to persuade, expostulate, and warn—Cowper> <lost his temper when reporters at his press conference expostulated against playing favorites—New Republic>
Kick implies strenuous protestation and, usually, an exhibition of recalcitrancy or defiance <wherefore kick ye at my sacrifice and at mine offering—1 Sam 2:29> <when the tax rate was raised for the fourth successive year, everybody kicked> <I kicked at that and said that Asquith might be limited but he was honest—Laski>

Ant grateful

**obscene** gross, vulgar, ribald, *coarse

Ant decent

**obscureantist** n Obscurantist, philistine, barbarian denote one inaccessible or opposed to enlightenment. An obscurantist is one who is precluded (as by prejudice, tradition, ignorance or bigotry) from intellectual candor and open-minded inquiry and who is opposed to the introduction of new and enlightened ideas and methods (from this class of obscurantists) who had hitherto resisted all Western innovations there now came young leaders eager to emulate Japan—*Peace Handbooks* (if liberals have not always recognized this, their opponents—obscurantists, authoritarianists, and enemies of enlightenment and scientific method—have amply done so—Cohen) (as soon as one begins to hint that the strain of wickedness in the human race . . . is still with us, he is called an obscurantist and is disqualified from further public hearing—R. M. Weaver)

A philistine is one whose attention is centered on material or worldly things, and is indifferent or blind to whatever makes an appeal only to the mind or soul. The term usually implies obtuseness and insensitiveness (it is only the Philistine who seeks to estimate a personality by the vulgar test of production—Wilde) (the Philistine wants to talk about morals, not to understand what is morally wrong—Farrell) Barbarian seldom wholly loses the notion of incompletely civilized that so strongly characterizes the adjective barbarian. As a result the term may be applied aptly to one whose cultural deficiency suggests that befitting a lower or more remote stage of civilization (teachers of freshman composition and mathematics search in vain for even an awareness of the recurring problem of each year's new invasion by lovable but illiterate barbarians who have to be taught the elements of grammar and arithmetic—Gideons) (have him take his meals in the dining room . . . let him sit with me, or he'll grow up a barbarian, with no manners—Deland)

**obscure** adj 1 murky, gloomy, *dark, dim, dusky

*Ana* shady, shadowy, unobtrusive (see corresponding nouns at shade)

*Con* *clear, lucid: bright, brilliant, luminous

2 *Obscure, dark, vague, enigmatic, cryptic, ambiguous, equivocal* are applied to language or expression (or less often to causes, motives, or thoughts) with the meaning not sufficiently intelligible or clearly understood. Something is obscure the true meaning of which is hidden or veiled, because of some fault or defect either in the thing itself or in the person trying to understand it (that decorum and orderliness without which all written speech must be indiscernible and obscure—Ellis) (this sordid, often obscure book, without visible motive or meaning—Purdy) (the mere text of the play will often look scrappy and disjointed and obscure to a reader who does not bring to it the special theatrical imagination—Montague) Something is *dark* which is imperfectly revealed and therefore mysterious (I will utter dark sayings—Ps 78:2) *dark hints of revenge—* ("Poison!") he whispered. But he pronounced it pye-za, making it into a soft, dark, dangerous word—Dahl) Something is *vague* which is lacking in distinct outlines or in clear definition, either because it is too general or because it is so imperfectly conceived or thought out that it is incapable of clear formulation (managed to gain from Judith a vague half-promise that she would be ready as suggested—Gibbons) (we shall never gain power from vague discourse about unknown or unassimilated facts—Grandgent) Something is *enigmatic* which puzzles, mystifies, and, often, baffles one seeking its true meaning or significance (the enigmatic announcement was an appropriate addition to the tangled story of this country's oddest piece of real estate—Thuelsen) (here Shaw's stage direction . . . has the additional advantage of being so enigmatic that even the reader cannot understand it without aid from other Shaw sources—Nethercot) (puzzling out the threats, the enigmatic promises, of a story—Paterson) Something is cryptic which is stated or expressed darkly or enigmatically: the word often implies a definite intention to perplex or to challenge (you had to intercede, with your cryptic innuendoes and mysterious head-waggings—S. S. Van Dine) (gave cryptic indications of his doubts but prudently refrained from open statements of them—Davies) Something is *ambiguous* which admits of more than one interpretation, largely because of the use of words having a dual or multiple meaning without giving an indication of which sense is intended (the title of this chapter is ambiguous. It promises a discussion of the end of the world, but it does not say which end—Eddington) (we are here not far from the ambiguous doctrine that art is "expression," for "expression" may be too easily confused with "communication"—Ellis) Something is *equivocal* which permits a wrong or false impression, thereby admitting uncertainty and confusion or fostering error. As applied to use of words, equivocal is distinguishable from ambiguous in that it may suggest intent to deceive or evade (nor could he find much pleasure in the subtle, devious, and equivocal utterances of Solomon—Omni) (veil the matter with uncertainties capable of more equivocal meaning—H. O. Taylor) In extended use equivocal is applied to something such as an act or a mode of life that admits of two possible or plausible interpretations, one of which may be harmful or discreditable (equivocal conduct) (an equivocal gesture) *Ana* abstruse, *recondite, occult, esoteric: difficult, *hard: complicated, intricate, involved (see complex): mysterious, inscrutable

*Ant* distinct, obvious: celebrated (as a person) —Con *clear, perspicuous, lucid: evident, manifest, obvious: express, *explicit, definite

**obscure** vb Obscure, dim, bedim, darken, eclipse, cloud, becloud, fog, befog, obfuscate all mean to make dark, indistinct, or confused. Of these terms obscure, dim, bedim, and darken all suggest the effect obtained by the lessening or the removal of illumination—the making of an object difficult to see clearly or the weakening or impairing of the ability to see with the eye or the mind. Obscure stresses the indistinctness, often concealment, of the object or idea or the unclearness of the vision or the comprehension (there are readers of papers who . . . like the ordinary, average, vague, undecipherable things, they do not want to have its nature denied or obscured—Montague) (the faded yellow building, its original

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
austerity of line somewhat obscured by a comfortable porch—Amer. Guide Series: Vt. Dim and bedim stress the diminishing of light or of clarity, intensity, or luster or the consequent diminishing of capacity to see, distinguish, or comprehend <celestial tears bedimmed her large blue eyes—Byron> (the old patriotic glow began to dim its ineffectual fires—H. M. Jones) Darken, although like dim and bedim suggesting a diminishing of illumination, is much richer metaphorically in suggesting strongly the alteration of an object or the impairment of clear or normal vision or mental comprehension by reason of confusion, ignorance, or evil <the yearly migrations of passenger pigeons . . . literally darkening the sky—Amer. Guide Series: Mich.> (his intellect was indeed darkened by many superstitions and prejudices—Macaulay) <evils enough to darken all his goodness—Shak.> Eclipse may stand alone in suggesting the effect of an actual astronomical eclipse, the partial or total darkening or concealment of one object by another and, hence, the overshadowing or supplanting of one object by another (in the English field, Anglo-Saxon never eclipsed the study of Shakespeare or Milton—Guérard) Cloud, becloud, fog, befog, and obfuscate all suggest the obstruction or impairment of vision by clouds, fog, or vapor or, in extended use, the making of the mental perception or object of that perception murky or confused. Cloud and becloud stress the obscuring of the object, or the murky view of the object, becloud being somewhat more literary than cloud (the beginnings of our physical universe are necessarily beclouded in the swirling mists of countless ages past—F. L. Whipple) (smoke clouding the prospect before us) (the actual issues clouded by prejudice and politics) (reasoning clouded by hysteria) Fog and befog are applied possibly more frequently than cloud and becloud to matters of the understanding or mental comprehension and usually suggest a greater obstruction or impairment of clear vision of eye and mind and, so, a greater and more unnecessary indistinctness, illogicality, or confusion; fog, however, occurs freely in both the basic sense and extended or metaphorical use while befog is uncommon in literal application (their breaths fogged the windshield—Hunter) (a time of . . . pressure for him and, if his memory fogged slightly, he was not alone—S. L. A. Marshall) (questions of . . . shaking hands or not befog many people—Miall) (the willfully created misunderstandings that so often befog the American political scene—Sandburg) Obfuscate, a somewhat pompous word, suggests strongly an avoidable, often willful, obscuring of an object or confusing of the mind by darkening or illogicality (the process, not of enlightening, but of obfuscating the mind—Thoreau) Ana *hide, conceal, screen: *disguise, cloak, mask, camouflage: *misrepresent, belie, falsify Ant illuminate, illumine obsequious *subservient, servile, slavish, menial Ana deferential, obedient (see corresponding nouns at HONOR): *compliant, acquiescent: sycophantic, parasitic, toadyish (see corresponding nouns at PARASITE): cringing, fawning, truckling, cowering (see FAWN vb) Ant contumelious observation *remark, comment, commentary, note, obiter dictum Ana *opinion, view, belief: annotation, gloss (see under ANNOTATE): *criticism, critique Ant obfuscate 1 *keep, celebrate, solemnize, commemorate Ana respect, esteem, regard (see under REGARD n): *revere, reverence, venerate Ant violate —Con *neglect, ignore, overlook, disregard, slight 2 survey, view, contemplate, notice, remark, note, perceive, discern, *see, behold, descry, esp'y Ana *scrutinize, examine, scan, inspect observer *spectator, beholder, looker-on, onlooker, witness, eyewitness, bystander, kibitzer obsolete *old, antiquated, archaic, antique, ancient, venerable, antediluvian Ant current obstacle, obstruction, impediment, bar, snag denote something which seriously hampers action or progress. Obstacle, which is used of both material and immaterial things, applies to an object, condition, or situation which stands in one's way and must be removed or surmounted if one is to progress or attain one's ends <love seats especially constructed for ardent couples who find such devices as armrests an obstacle to affectionate hips and hands—Green Peyton> (they smash themselves against the obstacles of circumstance—Cloote) (as to other social advancement, his record was an obstacle—S. H. Adams) Obstruction may be used of immaterial things, but such use is often obviously figurative, for the word suggests a blocking of a way or passage (an intestinal obstruction) (any phrase repeated too often becomes an obstruction to the flow of thought and feeling. It forms a clot—Brothers) (a very much denser obstruction is in the process of being erected now by literary critics—Day Lewis) Impediment is applied to something material or immaterial which serves to hinder or delay action or progress until one is freed from it (the refugee's limited knowledge of English was for a long time an impediment to his progress in his profession) (I have made my way through more impediments than twenty times your stop—Shak.) (legal restriction is a less effective impediment than the general sentiment that respectable people do not discuss birth control—Petersen) Bar applies to something interposed, whether by nature or by man, which serves to prevent admission or escape as effectually as the bars of a cage or prison (long sentences are a bar to easy reading—Mott) Sometimes the word carries a strong suggestion of prohibition, especially when it applies to a law or condition that restrains (under the immigration laws, a criminal record, an infectious disease, and illiteracy are bars to admission to the United States) (he found his infirmity no bar to his success in his profession) (must I new bars to my own joy create?—Dryden) Snap, from its application to a stump of a tree with jagged points which lies hidden under water and proves a hazard to boats, is extended to an obstacle or impediment which is hidden from view and which one encounters suddenly and unexpectedly (might run into a snag) on the question of whether federal aid should be extended—W. H. Lawrence> Sometimes snap suggests a mere temporary impediment (after an early snap . . . he was able to proceed with his work—The Irish Digest) Ana barrier, *bar: hindering or hindrance, blocking or block (see corresponding verbs at HINDER) obstinate, dogged, stubborn, pertinacious, mulish, stiff-necked, pigheaded, bullheaded are comparable when they mean fixed or unyielding by temperament or nature. Obstinate implies persistent adherence, especially against persuasion or attack, to an opinion, purpose, or course; when applied to persons or to their ideas or behavior the term often suggests unreasonableess or perversity rather than steadfastness (they will not be resolute and firm, but perverse and obstinate—Burke) (so yielding doubtful points that he can be firm without seeming obstinate in essential ones—J. R. Lowell) (>she was—is—a damned obstinate old girl, and the more he swore it was Elsie, the more she swore it was Deacon—Sayers) <unfortunately
grammar is the subject that of all others arouses the most obstinate propensities in the human mind—Richards
Dogged adds the implication of downright and tenacious, sometimes sullen, persistence; usually, also, it connotes great determination or an unwavering purpose (dogged veracity) (dogged perseverance) (men whose hearts insist upon a dogged fidelity to some image or cause—Hardy) (his mother’s influence was to make him quietly determined, patient, dogged, unwarried—D. H. Lawrence) (he had a hard personality in those days... dogged, not altogether fair—Mailer) Stubborn is often used interchangeably with obstinate and dogged, for it implies the unyielding adherence of the one and the tenacious determination of the other; more strongly than either of them, however, it carries an implication of a native fixedness of character or of a deeply rooted quality that makes a person sturdy resistant to attempts to change his purpose, course, or opinion, or that makes a thing highly intractable to those who would work it, treat it, or manipulate it (there is something stubborn in him that makes him follow his own path even though he isn’t certain where it goes—Malcolm Cowley) (Paddy and his old mare are teamed up... man and beast joined against stubborn nature—A. F. Wolfe) (it was all but impossible for the carpenter headstrong, willful, recalcitrant, unruly: obdurate, Ana stubborn up by pigheaded impenetrability to argument and bullheaded, headstrong however, often suggests of severe reproach; (he was formidably upright and his originality lay not in any purely speculative views, Richards) (a fierce, hot, hard, old, stupid squire... small brain, great courage, mulish will—Masefield) Stiff-necked, more even than obstinate or stubborn, stresses inflexibility; it often also suggests a haughtiness or arrogance that makes one incapable of respecting the commands, wishes, or suggestions of others (be ye not stiff-necked, as your fathers were, but yield yourselves unto the Lord—2 Chron 30:8) (she would have felt stiff-necked and ridiculous if she had resisted, like a republican who refuses to stand in a London theater when "God Save the King" is played—West) (he was formidably upright... too stiff-necked to kneel—Dorothy Thompson) Pig-headed and bullheaded suggest a particularly pervers or stupid kind of obstinacy; therefore they are chiefly terms of severe reproach; pigheaded, however, often suggests impenetrability to argument and bullheaded, headstrong determination (many of the managing posts will be filled up by pigheaded people only because they happen to have the habit of ordering poor people about—Shaw) (there was to be no relieving intermission. Using my prerogative as author, I had been bullheaded on this point —Paul Green) (she’s so bullheaded. She always has to have her way—Ginder)

 obstruction *obstacle, impediment, bar, snag

 Obstinate *prevent, preclude, obviate, avert: restrain, check, curb, inhibit

 Obstinate *inflexible: resolute, steadfast, staunch (see corresponding verbs at YIELD): *compliant, acquiescent

 Obstinate *stiff-necked, willful, recalcitrant, unruly: obdurate, Ana stubborn up by pigheaded impenetrability to argument and bullheaded, headstrong however, often suggests of severe reproach; (he was formidably upright and his originality lay not in any purely speculative views, Richards) (a fierce, hot, hard, old, stupid squire... small brain, great courage, mulish will—Masefield) Stiff-necked, more even than obstinate or stubborn, stresses inflexibility; it often also suggests a haughtiness or arrogance that makes one incapable of respecting the commands, wishes, or suggestions of others (be ye not stiff-necked, as your fathers were, but yield yourselves unto the Lord—2 Chron 30:8) (she would have felt stiff-necked and ridiculous if she had resisted, like a republican who refuses to stand in a London theater when "God Save the King" is played—West) (he was formidably upright... too stiff-necked to kneel—Dorothy Thompson) Pig-headed and bullheaded suggest a particularly perverse or stupid kind of obstinacy; therefore they are chiefly terms of severe reproach; pigheaded, however, often suggests impenetrability to argument and bullheaded, headstrong determination (many of the managing posts will be filled up by pigheaded people only because they happen to have the habit of ordering poor people about—Shaw) (there was to be no relieving intermission. Using my prerogative as author, I had been bullheaded on this point —Paul Green) (she’s so bullheaded. She always has to have her way—Ginder)
life of named or recognizable living persons—Yeats

Event is frequently regarded as arising from an antecedent state of things and is usually applied to a more or less important or noteworthy occurrence (the events of the year) (the sequence of events that followed the declaration of war) (the course of human events—U.S. Declaration of Independence) (events acting upon us in unexpected, abrupt, and violent ways—Dewey) (the flat, monotonous plains stretch away...a single tree...becomes an event—Moorehead)

An incident (compare incidental under ACCIDENTAL) is commonly an occurrence of subordinate character or secondary importance, either a mere casual happening having little relation to major events or an occurrence that merely follows because of them (her tone implied that bedroom fires were a quite ordinary incident of daily life in a place like Bursley—Bennett) (very few individuals can be considered as more than incidents in the life histories of the societies to which they belong—Linton) The term may, however, be used of a single event that stands out or is marked off clearly from the other events (as in a story, a play, or a history) in its nature or significance (the book narrates a series of thrilling incidents) (he was delighted and looked upon the incident as an adventure—Anderson) (and beat him she did—in just over 72 days—with only one dangerous incident. A "titled cad" tried to flirt with her—Sat. Review) or applied to a critical event that provokes a break in diplomatic relations between countries or suggests the possibility of war (border incidents)

Episode (see also DREGRESSION) is often used in place of incident in the sense of a single or outstanding event, but the term usually carries a stronger implication of distinctiveness or apartness from the main course than does incident (a pretty little domestic episode occurred this morning—Meredith) (Clare would inevitably...come to regard her passion for Oliver Hobart and its tragic sequel as a romantic episode of girlhood—Rose Macaulay)

Circumstance is used as a synonym for incident only when the latter is thought of as a specific or significant detail (before closing his door for the night, he stood reflected on the circumstances of the preceding hours—Hardy)

The word is also occasionally used as a synonym for event in its more general sense (a life every circumstance of which is regulated after an unchangeable pattern—Wilde)

Ana appearance, emergence (see corresponding verbs at APPEAR): juncture, pass, exigency, emergency, contingency: posture, situation, condition, state

Ant anomalous, irregular, unnatural

Con usual, customary, habitual: ordinary, common, familiar: normal, regular, typical, natural

odds advantage, handicap, allowance, edge

odious hateful, abhorrent, abominable, detestable

odious wretched, loathsome, repulsive, revolting

odilum obloquy, opprobrium, ignominy, infamy, disgrace, dishonor, disrepute, shame

Ana hate, hatred: antipathy, aversion: abhorrence, abomination, detestation

Ana repugnant, repellent, distasteful, obnoxious: offensive, loathsome, repulsive, revolting

odorous flowers such as lilies, tuberoses, and narcissuses—odorous chemicals are often malodorous—odorous gums from the East—Wilde

ability to detect and...infinitesimally small traces of odorous and savory materials—Morrison

Fragrant applies to something with a sweet and agreeable odor, especially to flowers, fruits, spices, and beverages that through their lingering sweetness or richness of scent give sensuous delight (fragrant roses) (where the fragrant limes their boughs unite, we met—and we parted forever—Crawford)

perhaps far back...certain Chinese preferred fragrant tea to insipid water—Heiser

(the recollection that these unfortunate had once been fragrant children—Cheever)

Redolent occasionally means pleasantly odorous; in such use it applies not only to things that diffuse a scent but to the scent itself (the redolent scent of pine) (every flower and every fruit the redolent breath of the warm seawind ripeneth—Tennyson)

More often it applies to a place or thing impregnated with odors, especially with those that are penetrating (dim, shady wood roads, redolent of fern and bayberry—Millay) (ordinary salt air but stronger, redolent of seaweed, damp, and dead fish—Nancy Hale)

the air for half a block was redolent with the fumes of beer and whiskey—Ashbury

Aromatic is more restricted in its implications than aroma, for it distinctively suggests a pungent, often fresh, odor of the kind associated with the foliage of balsams, pine, and spruce, the wood of cedar, the dried leaves of lavender, such spices as cloves, and such gums as myrrh. It is therefore often applied to preparations scented with substances that are aromatic (aromatic blends of tobacco) (as aromatic plants bestow no spicy fragrance while they grow; but crushed, or trodden to the ground, diffuse their balmy sweets around—Goldsmith) (aromatic spirit of ammonia)

Balm applied mostly to things which have a delicate and soothing aromatic odor (the balmy winds breathed the animating odors of the groves around me—Bartram) (their tender beauty of balmy, flowery vegetation—Muir)

Ant malodorous: odorless—Con stinking, fetid, noisome, putrid, rank, rancid, fusty, musty (see MALODOROUS)

offal refuse, waste, rubbish, trash, debris, garbage

offend, outrage, affront, insult mean to cause vexation or resentment or damage to self-respect. One offends by displeasing another, by hurting his feelings, or by violating his sense of what is proper or fitting (if the First Amendment means anything, it means that a man cannot be sent to prison merely for distributing publications which offend a judge's esthetic sensibilities—Potter Stewart)

(fangless perceptions which will please the conservative power and delight the liberal power: offend no one—Mailer) (knew that he had offended his father but guilt would have been too exact a word for the pain and uneasiness he felt—Cheever)

One outrages by offending another past endurance, or by offending his pride or his sense of justice or honor (her power to make him do things which outraged all his upbringing—Wakefield-West)

(needed to begin...the beginning of the uproar, the shrill cries of the ladies and the outraged unbelieving exclamations of the men—Dahll) ("Grief of two years' standing is only a bad habit.") Alice started, outraged. Her mother's grief was sacred to her—Shaw

One affronts who, either with an intent to offend or with deliberate indifference to civility or courtesy, humiliates or dishonors a person and arouses his deep resentment (a moral, sensible, and well-bred man will not affront me, and no other can—Cowper)

One insults who wantonly and insolently offends another so as to cause him humiliation or shame (you can annoy, you can insult, you cannot move me—Meredith)

he would insult them flagrantly; he would fling his hands in the air
and thunder at their ignorance—Auchincloss

**Ana** annoy, vex, irk, bother: exasperate, nettle, *irritate*: pique, *provoke, excite: chafe, fret, gall (see ABRADE)

**offense** 1 offense, aggression, *attack

**Ana** assault, *attack, onslaught, onset

2 **Offense, resentment, umbrage, pique, dudgeon, huff** are comparable when they mean a person's emotional reaction to what he regards as a slight, an affront, an insult, or an indignity. **Offense** implies an often extreme state of displeasure or of wounded feelings (it is so sensitive that he takes *offense* at any unintentional or seeming slight) *(this tiny breath of genuine criticism had given deep offense—Forster)*  
**Resentment** implies more indignation than *offense*, more prolonged dwelling upon what one regards as a personal injury or grievance, and, often, more ill will to the person who has offended *(as long as I am free from all resentment . . . I would be able to face the life with much more calm—Wilde)* *(have no right to trifle with their lives merely to gratify an old man's resentment of skepticism—Anthony Boucher)*  
**Umbrage** used chiefly in the phrase "to take umbrage." differs from *offense* in carrying a clearer implication of being slighted or unfairly ignored; the term therefore generally suggests ruffled pride, resentful suspicion of others' motives, or jealousy of those favored *(he took such umbrage at Eliot—who had been delayed at his bank—arriving a few minutes late on the platform, that I doubt he ever forgave him—Osbert Sitwell)* *(Very often umbrage is not clearly distinguishable from offense* *(the instance of a Southern defender who took umbrage at our saying that the leader of the Confederacy was outstandingly dumb—N. Y. Herald Tribune Book Rev.)*  
**Pique** applies to the reaction of one who has taken offense or umbrage, but it distinctively suggests a petty cause and a transient mood and often connotes wounded vanity *(when the wanton heroine chooses to . . . flirt with Sir Harry or the Captain, the hero, in a pique, goes off and makes love to somebody—Thackeray)* *(had not for . . . years allowed his young green jealousy to show itself in words or pique—Buck)*  
**Dudgeon** applies chiefly to a fit of angry resentment or indignation provoked by opposition to one's views or a refusal of one's request *(he left the recent meeting in high dudgeon when compulsory purchase powers were eventually granted—Ian MacLennan)* *(sometimes the employer . . . will in a dudgeon refuse to sit in the same room with the union representatives—Bromley)*  
**Huff**, like dudgeon, applies to a fit of anger, but it comes closer to *pique* in suggesting pettiness of cause and transitoriness; distinctively it implies petulance and a sulky refusal to have more to do with those who have offended *(at the first hint that we were tired of waiting and that we should like the show to begin, he was off in a huff—Henry James)* *(half of 'em will be disgusted, and go away in a huff—De Morgan)*  
**Con** affront, insult, indignity: *indignation, wrath, anger* *(pleasure, delight, joy: gratifying or gratification, rejoicing (see corresponding verbs at PLEASE)*

3 **Offense, sin, vice, crime, scandal** are comparable as general terms denoting a more or less serious or conspicuous infraction or transgression of law or custom. **Offense** is the term of widest application, being referable to a violation of any law, including the law of the state, the law of the church, natural law, moral law, or standards of propriety and taste set up (as by society or the arts). It is also applicable to any transgression regardless of its triviality or gravity or its voluntary or involuntary character, provided it injures or tends to injure the welfare or well-being or happiness of others *(O, my offense is rank, it smells to heaven; it hath the primal eldest curse upon't, a brother-

er's murder—Shak.)* *(had been a strike leader, which, though not a crime, was certainly an offense in New England in 1920—Stong)* *(the greater the number of laws, the greater the number of offenses against them—Ellis)*  
**Sin** primarily applies to an offense against the moral law especially as laid down in the Ten Commandments and in laws derived from them. Theologically its essential character is disobedience of the divine will and willful opposition to the law of God; in somewhat wider use it implies a failure to live up to the moral ideals of one's time or environment or to the moral ideal one has set as the standard of one's own conduct *(regarded stealing and lying as sins—the sin of sacrilege)* *(nonobservance of the Sabbath was the sin most abhorred by the settlers of that region)* *(sin, remember, is a twofold enormity. It is a base consent to the promptings of our corrupt nature . . . and it is also a turning away from the counsel of our higher nature—Joyce)* *(it may not have been much of a culture, crude, bloodthirsty, harsh, and worst sin of all, different—Agnew)*  
**Vice** *(see also FAULT 2), though frequently applied to any of the offenses that from the theological and religious points of view are called sins, often carries little direct suggestion of a violation of divine law: rather, it may imply impropriety in the use of one's own will, and sometimes *vice* is a technical legal term, but it is sometimes used in the courts and is sometimes defined in penal codes, usually as a general term applicable to any act or omission forbidden by law and punishable upon conviction. In such use the term comprehends many clearly distinguished types of offenses *(as a misdemeanor, a felony, or an act of treason)* *(the reason for excluding evidence obtained by violating the Constitution seems to me logically to lead to excluding evidence obtained by a crime of the officers of the law—Justice Holmes)* *(offenses against marriage such as adultery, which is a crime punishable by death in Papua and only a sin in civilized society—Social Science Abstracts)* *(human society may punish us for crimes; human monitors reprove us for vices; but God alone can charge upon us the sin, which He alone is able to forgive—James Martineau)*  
**Crime** and, less often, *sin* may be applied to offenses that are of exceedingly grave nature; in fact, this implication is often found in *crime*, even in its original legal sense *(the betrayal by a people of itself is the ultimate historical crime: the final and the most degrading suicide—MacLeish)* *(I've not been guilty of anything more than an indiscretion . . . I behaved foolishly, but that's not a crime—Mackenzie)*  
**Scandal** *(see also DISGRACE)* applies to an offense against a law that is also an offense in another sense of that word—that of an act, a condition, or a practice which offends the public conscience or which puts a stumbling block in the way of those who should obey the law or should be trained to obey it; unlike the words *sin, vice, and crime, scandal* carries no implication of probable or certain punishment or retribution but emphasizes the distressing effect it has on others or the discredit
softer, kinder, amiable, unoffensive; 

**offensive adj** 1 attacking, aggressive (see under ATTACK 

**Ana** *injustice, injury, wrong, grievance: *breach, infraction, violation, transgression, trespass, infringement, contravention 

**offensive** 

**Analogous words** 

**Antonyms** 

**Contrasted words**
offhand 576  old

her hand preferred the bowl—Pope} ⟨I don’t prefer any claim to being the soul of romance—Dickens⟩

Ana meddling, interfering, intermeddling, tampering (see MEDDLE): annoying, vexing, irking, bothering (see ANNOY): pushing, assertive, *aggressive
offset countervail, balance, *compensate, counterbalance, counterpoise
Ana *neutralize, negative, counteract: *nullify, negate: redeem, reclaim, save, *rescue

onfing, young, progeny, issue, descendant, posterity are comparable when they mean those who follow in direct parental line. Offspring applies to those who are by birth immediately related to a parent; the term does not necessarily apply to human beings, for it may refer to animals or sometimes to plants ⟨at each farrow the sow produces many offspring⟩ ⟨the son endeavoring to appear the worthy offspring of such a father—Steele⟩ Young is used most often of the offspring of animals ⟨a bear surrounded by its young⟩ ⟨turtles bury their eggs in beaches and sandbanks and the young dig their way out when they hatch⟩

Progeny usually applies to the offspring of a father or a mother or of both; the term more often refers to those of human parentage, but it is used occasionally of the offspring of animals and plants ⟨from this union sprang a vigorous progeny—Hawthorne⟩ In comparison with offspring, however, it has somewhat extended use, being sometimes applied to those who trace their ancestry more remotely or to those who are the spiritual or intellectual successors of a great man ⟨all the progeny of David⟩ ⟨the intellectual progeny of Plato⟩ Issue, chiefly a legal term, is more abstract than the preceding terms and is used merely to call attention to the fact that a union has or has not reproduced its kind ⟨die without issue⟩ ⟨in the event of issue, the estate will pass to the children who are born of this union⟩ Descendant, on the other hand, applies to anyone who has or, in the plural, to all who have a right to claim relationship with a person as an ancestor in direct line; the degree of nearness does not matter, but the relationship of each as child, grandchild, great-grandchild, and so on must exist ⟨theirs are descendants of the first settlers of the town⟩ ⟨the claims of certain people to be descendants of George Washington are absurd, since he died without issue⟩ Posternity differs from descendants only in connoting all the descendants of a common ancestor ⟨the unnumbered posterity of William Bradford⟩

The term is also often used of the generations that come after a person, a race, or a people ⟨his fame will live to all posterity⟩ ⟨we are leaving many problems for posterity to solve⟩

 oft *often, frequently, oftentimes
often, frequently, oft, oftentimes may be used with little or no distinction to mean again and again in more or less close succession. But often stresses the number of times a thing occurs, without regard to the interval of recurrence; frequently usually stresses repetition, especially at short intervals ⟨he came often⟩ ⟨he called frequently⟩ ⟨the disease is often fatal⟩ ⟨I frequently examined the color of the snow—Tyndall⟩ ⟨you will often find this to be true⟩

unless you write me more frequently I shall feel out of touch with you⟩ Oft and oftentimes differ little from often; oft, however, is used chiefly in compound adjectives ⟨the oft-told tale of her hairbreadth escape—Cerf⟩ ⟨an oft quoted statement⟩ or occasionally in formal discourse ⟨seemingly trifling events oft carry in their train great consequences—Coolidge⟩ and oftentimes is occasionally preferred for intonational reasons ⟨a sense of humor which was sometimes loud, oftentimes lourd, but never deliberately unkind—Metallious⟩

oftentimes *often, frequently, oft
oil vb Oil, grease, lubricate, anoint, cream all mean to smear or treat with an oily, fatty, or greasy substance, but they vary greatly in their implications of the substance used and the purpose for which it is employed and in their idiomatic applications. One oils the parts of a machine or mechanism subject to friction, typically by drops or squirts of a liquid substance, usually a mineral oil. Also, one oils a fabric (as cloth, silk, or paper) when one impregnates it with oil so as to make it waterproof. One greases a thing when one rubs on or in a thick fatty substance, often an animal fat or oil, for some purpose such as to increase speed by reducing friction ⟨grease axles⟩ or as a medicinal application ⟨grease the chest with lard and turpentine⟩ or as a preventive of cohesion ⟨grease a baking dish⟩ One lubricates when one oils, or greases, or provides for the feeding of a lubricant (as oil or grease or graphite or a silicone) to contiguous surfaces in a machine or mechanism to make them slippery, thereby reducing friction, eliminating roughness, and preventing cohesion. Lubricate stresses the effect intended or produced; oil and grease, the substance used or the method of its application. One anoints the body or a part of the body when one smears it with, or rubs into it an oily or fatty substance for some purpose (as a protection from the sun or an aid in massage). Anoint, however, is especially employed in reference to ceremonial uses of oil. In the application of oily or fatty cosmetics, especially those which are called creams, cream is the customary term.

oily uncouth, oleaginous, *fleshy, slick, soapy
Ana hypocritical, pharisaical, sanctimonious (see under HYPOCRISY): bland, politic, diplomatic, smooth (see SUAVE)
old 1 *aged, elderly, supernannted
Ana *weak, feeble, infirm, decrepit

Ant young

2 Old, ancient, venerable, antique, antiquated, antediluvian, archaic, obsolete all denote having come into existence or use in the more or less distant past. Old, opposed to young or new (see also AGED), applies to what has lived or existed long or has been long in use or has stood for a long time in a particular relation to something; ancient, opposed especially to modern, to what lived, existed, or happened long ago or has existed or come down from remote antiquity ⟨old wine⟩ ⟨old friends⟩ ⟨old as the hills⟩ ⟨O heavens, if you do love old men . . . if yourselves are old—Shak⟩ ⟨this new exception condemns an advertising technique as old as history—W. O. Douglas⟩ ⟨from the ancient world those giants came—Milton⟩ ⟨some illus- trious line so ancient that it has no beginning—Gibbon⟩

Venerable suggests the hoariness and dignity of age (venerable as Anglo-Saxon is, and worthy to be studied as the mother of our vernacular speech—Quiller-Couch) ⟨green ropes and leafy ladders hung down from the high limbs of a venerable bread tree—Bemelmans⟩ Antique applies to what has come down from former, ancient, or classical times or is in some way related to them; with regard to articles (as furnishings, implements, or bric-a-brac) the term suggests an old-fashioned type characteristic of an earlier period ⟨an antique highboy that had
belonged to his great-grandmother (even a Leonardo regretted his failure to recover the antique symmetry, but he at least imitated the ancients vitally—Babbitt) refreshing our minds with a savor of the antique, primeval world and the earliest hopes and victories of mankind—Binyon) Something antiquated has gone out of vogue or fashion or has been for some time discredited; the word often implies some degree of contempt (is it true that antiquated legal ideas prevent government from responding effectively to the demands which modern society makes upon it?—Frankfurter) this very lack of manner keeps him from becoming antiquated. His style does not "date," like that of many of his contemporaries—Tinker) cherished still their old rage against the northern invaders, a stout and defiant loyalty to their antiquated limitations—Edmund Wilson) Something antediluvian is so antiquated and outmoded that it might have come from Noah's ark (the whole system of traveling accommodations was barbarous and antediluvian—De Quincey) those were antediluvian times. Unions were weak or nonexistent; employers were backed by the courts, the police, and the federal government—Dwight Macdonald) Something archaic has the characteristics of an earlier, sometimes of a primitive, period; with regard to words, specifically, archaic applies to what is not in use in ordinary modern language but retained in special context or for special uses (as in biblical, ecclesiastical, and legal expressions and in poetry) we visited Medinina, a town so archaic and unreal in its architecture that it was difficult to believe that it was actually inhabited by the human race—Hoffman) much of the remote past is conserved in the husk of convention, and archaic usages govern his conduct toward all the crucial issues of life—Norman Lewis) to those who do not learn to read Shakespeare as a school text his archaic language presents formidable difficulties—Botral) Something obsolete has gone out of use or has been or needs to be replaced by something newer, better, or more efficient that has subsequently come into being obsolete as the feudal baron—Snaith) a scientific textbook is obsolete in a decade or less—Lowes) it was she who had raised a fund for the granite horse trough . . . and who, when the horse trough became obsolete, had it planted with geraniums—Cheever) charged that United States Navy ships were equipped with obsolete torpedoes—Current Biog) Ana primitive, primeval, pristine, primal (see primary) Ant new

oleaginous oily, unctuous, *fulsome, slick, soapy Ana see those at OILY

oligarchy, aristocracy, plutocracy are comparable when they mean government by, or a state governed by, the few. The terms are often applied to governments or states that are ostensibly monarchies or republics but are, in the opinion of the user, actually governed by a clique. Oligarchy is the most inclusive term referred to a government or state where the power is openly or virtually in the hands of a few men (democracy and oligarchy shade into each other and are chiefly distinguished by the degree of the citizens' participation in government—McKeon) Aristocracy basically and historically suggests the rule of the best citizens (true aristocracy is just this, the government of the best, of a ruling class dedicated to the common well-being—F. G. Wilson) but it retains this implication chiefly when it is used in distinction from oligarchy and the latter connotes power seized or held for selfish or corrupt reasons (it ceased to be, in the Greek sense, an aristocracy; it became a faction, an oligarchy—Thirlwall) Its more common implication is power vested in a privileged class, especially in a nobility that is regarded as superior by birth and breeding and that by owning or controlling much of the land exercises direct control over a large portion of the population; in this sense Great Britain was until recent generations an aristocracy (Clay was right . . . revolution was abroad among the people, shifting the basis of our government from aristocracy to democracy without destroying its essential republicanism—Rossiter) Plutocracy, unlike the other terms, is usually derogatory; as a rule it implies concentration of power in the hands of the wealthy and, in consequence, a withholding of power from those to whom it properly belongs, either the people or their representatives (Ward held that we must differentiate three types of democracy . . . the second plutocracy, or the control of the state by organized and predatory wealth—H. E. Barnes) Carthage was a plutocracy and the real power of the state lay in the hands of a dozen big shipowners and mineowners and merchants—van Loon) omen augury, portent, *foretoken, presage, prognostic Ana *sign, mark, token, badge, note, symptom: foreboding, *apprehension, presentiment, misleading ominous, portentous, fateful, inauspicious, unpromising basically mean having a menacing or threatening character or quality. What is ominous has or seems to have the character of an omen, especially of an omen forecasting evil; the term commonly suggests a frightening or alarming quality that bodes no good, and it may imply impending disaster (there was something ominous about it, and in intangible ways one was made to feel that the worst was about to come—London) (my ears were startled by the . . . uproar of yelling and shouting. It sounded ominous, but . . . I had to go on—Heiser) What is portentous has or seems to have the character of a portent; portentous, however, less often than ominous suggests a threatening character; it usually means little more than prodigious, monstrous, or almost frighteningly marvelous, solemn, or impressive (his gravity was unusual, portentous, and immeasurable—Dickens) the assertion that children of six are "mighty prophets, seers blessed," . . . seemed to him portentous nonsense—Babbitt) (it is portentous . . . that here at midnight, in our little town a mourning figure walks, and will not rest—Lindsay) What is fateful has or seems to have the quality, character, or importance decreed for it by fate or suggests inevitability (the fateful conference that brought on war) to meet a Persian, any Persian, in New York seemed a fateful coincidence—Mehdevi) but the term often means little more than momentous or appallingy decisive (the great cases that make the work of the United States Supreme Court of fateful significance—Cohen) What is inauspicious (compare auspicious under FAVORABLE) is or seems to be attended by signs that are distinctly unfavorable (an inauspicious horoscope) But inauspicious usually means nothing more than unlucky, unfortunate, or unlikely to succeed (an inauspicious beginning of a great project) you come at a singularly inauspicious moment, when I need all my strength to forget the world—Sabatini) What is unpromising (compare propitious under FAVORABLE) carries or seems to carry no sign of favoring one's ends or intentions (unpromising omens) In its more common extended sense the term means merely unfavorable, discouraging, or harmful (made a by-election necessary at a time highly unpromising for the Government—Cockburn) (sleep and exercise are unpromising to learning—Jowett) Ana *sinister, baleful, malign, malefic, maleficient: threatening, menacing (see THREATEN) omit *neglect, disregard, ignore, overlook, slight, forget Ana cancel, delete, efface, *erase: *exclude, eliminate

Con *remember, recollect, recall: *tend, attend, mind, watch

omnipresent, ubiquitous mean present or existent everywhere. Though they carry this as a basic meaning, they are often used hyperbolically. Something omnipresent is present everywhere at the same time. Though basically applicable to the Supreme Being <omnipresent Deity> the term is often, especially in a weakened sense, applied to something that is or is felt to be always present or existent (as in a class or a type wherever it may be found or in an area to which it belongs) <omnipresent sense of social obligation—Eliot> <the creeping, silent atmosphere of omnipresent fear that I have sensed in the capitals of the satellite countries—Wechsberg> <the mechanization of entertainment through . . . the omnipresent radio—Millett> Something ubiquitous is found everywhere and, often, at the time or in the situation specified or implied <electronics being so numerous and so ubiquitous—Dar- row> <the big public services will have to be made practically ubiquitous—Shaw> Ubiquitous is applicable to a type or an individual, often with the specific implication that one cannot escape him or it wherever one goes <the ubiquitous American tourist> <the sad, ubiquitous spinster, left behind . . . by the stampede of the young men westward—Brooks>

on 1 *at, in 2 *at, in

onerous, burdensome, oppressive, exacting are comparable when they mean imposing severe trouble, labor, or hardships. All of these terms are applicable to a state of life, its duties or obligations, or to conditions imposed upon a person by that life or by another person; oppressive and exacting are applicable also to persons or agents responsible for these difficulties. Onerous stresses laboriousness and heaviness but often also implies irksomeness or distastefulness <the tyranny of a majority might be more onerous than that of a despot—Whitehead> <“What were the conditions?” “Oh, they were not onerous: just to sit at the head of his table now and then”—Wharton> Bur- densome usually implies mental as well as physical strain and often emphasizes the former <a burdensome tax> <burdensome Government regulations which are a nu- nance to everyone—Roosevelt> <the burdensome and invidious job of a formal application to the Board of Trade—Economist> Oppressive adds to burdensome the implication of extreme harshness or severity; it therefore usually connotes the unendurableness of what is imposed or inflicted, whether by nature or circumstances or by man, or cruelty or tyranny in the one responsible for the impositions or inflictions <oppressive heat> <oppressive rulers> <there are more ways of coercing a man than by pointing a gun at his head. A pacifist society may be unjust and oppressive—inge> <the women are . . . kind and they mean very well, but sometimes they get very oppressive—Cheever> Exacting, like oppressive, implies severity of demands, but otherwise it differs because it commonly suggests rigor, sternness, or extreme fastidiousness rather than tyranny in the one who demands, or the tremendous care or pains required of the one who satisfies these demands <an exacting technique> <an exacting employer> <the exacting life of the sea has this advantage over the life of the earth, that its claims are simple and cannot be evaded—Conrad> <the pity of it was that even the least exacting husband should so often desire something more piquant than goodness—Glasgow>

Ana *heavy, weighty, ponderous, cumbrous, cumber- some, hefty: arduous, *hard, difficult

onlooker looker-on, *spectator, observer, beholder, wit- ness, eyewitness, bystander, kibitzer

only adj & adv Only, alone are often used interchangeably (though alone is not found in the attributive position), but seldom without a slight change in meaning or emphasis. Only is especially appropriate when restriction to what is specified or asserted is implied and the term is equivalent to sole or solely; thus, “I want only this book” implies a wish for one and no more; “of all the family only John and Helen came,” that is, the specified persons and no more <to distinguish . . . that which is established because it is right, from that which is right only because it is established—Johnson> Alone may be chosen when the idea of the elimination of all other possibilities is expressed and the term is the equivalent of exclusive or, more often, exclusively; thus, “I want this book alone” implies a wish for a particular one and no other; “of all the family John alone came,” that is, John and none of the others <man shall not live by bread alone—Mt 4:4>

onset *attack, assault, onslaught

Ana aggression, offensive, offense, *attack: storming, bombarding, assailing (see ATTACK vb): *invasion, raid, incursion

onslaught *attack, assault, onset

Ana see those at ONSET

onward, forward, forth are comparable when they mean in the act of advancing or getting ahead (as in a movement, progression, series, or sequence). They are frequently used with little or no distinction, but onward often suggests progress or advance toward a definite goal, end, or place <half a league onward . . . rode the six hundred—Tenny- son> <onward into future lives—Hawridge> Forward, opposed to backward, has more specific reference to move- ment or advance with reference to what lies before rather than back in place <see onward under BEFORE> or in time <his skill in reconciling conflicting points of view and his forward-looking spirit—Dean> <from this time forward Webster’s bête noire was party spirit—Warfel> or in a succession (as of incidents in a narrative or of steps in a process) <the center has not yet been rebuilt, though they are . . . getting forward with it—Rowse> Forth is often interchangeable with forward without loss <expedi- tions went forth into the interior—P. E. James> from that day forth) but in certain idioms it may be quite distinctive and imply a making known, present, available, or real something previously unknown, lacking, unavailable, or hidden; thus, one brings forth from or as if from a place of concealment <bring forth a precious jewel> and one sets forth by providing <set forth an amble supper> or by making simple and clear <in his charge to the grand jury . . . he set forth the democratic basis of the new state government—Meriwether>

operative n mechanic, artisan, hand, workman, working-
opiate

*anodyne, narcotic, nepenthe

opinion, view, belief, conviction, persuasion, sentiment are comparable when they mean a more or less clearly formulated idea or judgment which one holds as true or valid. An opinion is a more or less carefully thought-out conclusion concerning something that is or may be questioned. The word not only does not exclude the suggestion of consideration of all the evidence and of arguments on both sides, but it sometimes implies such consideration (seek an expert opinion on the authenticity of a painting) (the word opinion...should be restricted to views entertained on subjects that admit of doubt and are open to controversy. Matters that are not debatable are not open to opinion—Corry) (the attending physician said he would like the opinion of a consulting physician)

However, the term more consistently suggests even in the preceding instances a personal element in the judgment, the possibility of its being in error, and the strong probability that it will be disputed (books...are a public expression of a man's opinions, and consequently they are submitted to the world for criticism—Benson) (the tolerant but untrained...will rarely know the difference between their tastes and their opinions—Virgil Thomson)

A view is an opinion more or less colored by the feeling, sentiment, or bias of the individual (fond of airing his views in public) (each member was asked to state his views on the proposed change in the constitution) (must take the manly view, which is that the failure of the western democracies...is due to the failings of the democratic peoples—Lippmann) (in the fourth century...adopted the view that deceit and lying were virtues if in the interests of the Church—Cohen)

A belief differs from an opinion or view in that it is not necessarily formulated by the individual who holds it, but may have been proposed to him for acceptance (as in the form of a doctrine, a dogma, a proposition, or an authoritative opinion). The emphasis in belief is placed on intellectual assent or assurance of truth (the belief that the whole system of nature is calculable in terms of mathematics and mechanics—Inge) (just one single example of real unreason is enough to shake our belief in everything—Theodore Sturgeon)

A conviction is a belief which one holds firmly and unshakably because one is undisturbed by doubt of its truth (if any one had asked him the reason of this conviction he could not have told them; but convictions do not imply reasons—Deland) (the teacher should learn not to take sides, even if he or she has strong convictions—Russell) (he had overlooked this fact, borne along on his conviction of the abundance of life—Cheever)

A persuasion is usually at once an opinion and a belief. The term often implies that one's assurance of its truth is induced by one's feelings or wishes, rather than by argument or evidence (it was the avowed opinion and persuasion of Calimachus...that Homer was very imperfectly understood even in his day—Cowper) (his strong interest in good government and the proper solution of social problems threw him more and more toward the Democratic persuasion—Michener)

Sentiment (see also FEELING 2) is becoming uncommon in this sense except in a few idiomatic phrases (those are my sentiments). The term applies to a more or less settled opinion, often with reference to something which involves one's feelings or which is formulated so as to suggest the stimulus of emotion (there is no expression in the constitution, no sentiment delivered by its contemporaneous expounders, which would justify us—John Marshall) (it is the actions of men and not their sentiments which make history—Mailer) (he would inform Miss Graves of his sentiments and she would translate them into a polite and brief answer—Bemelmans)

Ana thought, notion, impression, *idea, concept, conception: inference, deduction, conclusion, judgment (see under INFERENCE): deciding or decision, determining or determination, settling or settlement (see corresponding verbs at DECIDE)

opponent, antagonist, adversary all denote one who expresses or manifests opposition. Unlike enemy they do not necessarily imply personal animosity or hostility. An opponent is one who is on the opposite side in a contest (as an argument, disputation, or election) or in a conflict (as of opinion) (since [in France] opposition is never considered to be legitimate, the Government has no opponents—only enemies—Revel) (opponents of the desegregation decision have...largely founded their dissent on the principle that law cannot move faster than public opinion—Roche & Gordon)

Antagonist implies sharper opposition, especially in a struggle or combat for supremacy or control (where you find your antagonist beginning to grow warm, put an end to the dispute by some genteel badinage—Chesterfield) (a swift voracious fish, a formidable antagonist for the angler—J. L. B. Smith)

Adversary ranges in connotation from the idea of mere opposition to that of active hostility (do as adversaries do in law, strive mightily, but eat and drink as friends—Shak) (your adversary the devil, as a roaring lion, walketh about, seeking whom he may devour—1 Pet 5:8)

Ana *enemy, foe: rival, competitor, emulator (see corresponding verbs at RIVAL)

opportunity *seasonable, timely, well-timed, pat

Ana happy, felicitous, appropriate, fitting (see FIT adj): propitious, auspicious, *favorable: ready, prompt, *quick, apt

Ant inopportune

opportunity, occasion, chance, break, time are comparable when they mean a state of affairs or a combination of circumstances favorable to some end. Opportunity is perhaps the most common of these terms; it applies to a situation which provides an opening for doing something, especially in line with one's inclinations, ambitions, purposes, or desires (the suspect had both motive and opportunity for the murder) (to keep in the rear of opportunity in matters of indulgence is as valuable a habit as to keep abreast of opportunity in matters of enterprise—Hardy) (on the whole an infant's desire to learn is so strong that parents need only provide opportunity—Russell) (to strike out in search of new opportunities in new surroundings—Truman)

Occasion (see also CAUSE 1) carries the basic denotation characteristic of its leading senses—a definite moment or juncture, but it applies only to a moment that provides an opportunity or that calls for or prompts action of a definite kind or nature (had occasion to prove the seaworthiness of this type of lifeboat in a gale—N. B. Marshall) (he took the occasion to satisfy his desire for revenge—Occasion may suggest more strongly than opportunity a juncture that provokes or evokes action (with great things charged he shall not hold aloof till great occasion rise—Kipling) (so long as a child is with adults, it has no occasion for the exercise of a number of...virtues...required by the strong in dealing with the weak—Russell) (it has also produced and spread occasions for diseases and weaknesses—Dewey)

Chance applies chiefly to an opportunity that comes seemingly by luck or accident (they had no chance to escape) (it was war that gave Lenin his chance. He might have died in angry exile in Switzerland—Brogan)

oppose

Sometimes the word means little more than a fair or a normal opportunity, especially in negative expressions (the feeling that the system under which we live deprives the majority of the chance of a decent life—Day Lewis) Break applies to the occasion of a stroke of fortune that is usually good unless the term is qualified (as by an adjective indicating the kind of chance or suggesting its outcome) (had been haunting the tryouts, for two years: and this was her first break—Wouk) (ascrives his fortunes to luck, to getting the breaks—Cozzens) (She always did have a bad break if it was possible to get one—Nevil Shute) (shady folk ... are generally given a fine break—Lancaster) Time denotes a juncture that is well-timed or opportune (as for the execution of one's end or purpose) (time and tide wait for no man) in which one is found to have a certain superiority over a rival in the quality or force with which the soloist bides his time in his own confidence that he will be handsomely rewarded in the end—Kolodin) the time has come to assert the findings—Towlson) (this is the time to buy stocks) Ana *juncture, pass, contingency, emergency: posture, situation, condition, *state oppose contest, fight, conflict, antagonize, *resist, withstand Ana *contend, fight, battle, war: *attack, assail, assault, storm, bombard: *defend, protect, shield, guard, safeguard opposite n contradictory, contrary, antithesis, antipode, antonym (see under opposite adj) opposite adj Opposite, contradictory, contrary, antithetical, antipodal, antipodean, antonymous are comparable chiefly as applied to abstractions and as meaning so far apart as to be or to seem irreconcilable with each other. The same differences in applications and implications are found in their corresponding nouns, oppose, contradictory, contrary, antithesis, antipode, antonym, when they mean one of two things which are opposite or contradictory. Opposite is a complete term; it may be used interchangeably with any of the others, though few of the others are interchangeable in precise use. Opposite may be used to describe the relation of either of two abstract elements (as ideas, terms, statements, qualities, or forces) to the other when they are set against each other so as to bring out sharply the contrast, conflict, or antagonism between them oppose views (attraction and repulsion are opposite forces) the plant does two opposite things at once. It is making sugar from carbon dioxide and at the same time burning a little sugar—Michael Graham) (his private thesis that correction ... entails retreat to the opposite mean—a golden mean—Kolodin) he will be handsomely rewarded in the end—Kolodin) a contrary purely humanitarian influence—Santayana) he maintained that the contrary was true But especially as applied to terms and propositions contrary may imply diametrical opposition or the greatest conceivable or possible difference between the things opposed. Contraries are poles apart; unlike contradictories both may be false, for they represent extremes and do not mutually exclude every other possibility; thus, destitute and opulent are contrary terms as applicable to a person's circumstances, but they may be inapplicable in a vast number of particular cases for they describe only the extremes; "John is parsimonious" and "John is prodigal" are contrary statements, but John in truth may be neither parsimonious nor prodigal, but merely close, or thrifty, or free, or liberal, in the expenditure of money (a theory for which neither physics nor common sense can offer confirmatory or contrary evidence—Clement) Antithetical and especially antithesis (see also comparison) imply an intent to set the thing under consideration against its opposite, usually its diametrical opposite, in order to emphasize its significance or to reveal or define sharply its true nature. Both words are applicable to persons and things regarded objectively as well as to ideas, qualities, and terms (antithetical symbolism of ice and flame—Rees) (that mystic faith in unseen powers which is the antithesis of materialism—Rose Macaulay) (the essential interests of men and women are eternally antithetical—Mencken) Although antipodal or antipodean and the corresponding noun, antipode, which often occurs as the plural antipodes with singular or plural construction, also imply diametrical opposition, they do not suggest a logical relation but rather emphasize the unlikeness and the remoteness from each other of the things contrasted. So strong are these implications that often the things contrasted are only figuratively, not generally, opposites, and the contrast constitutes in a sense an inverse simile (the unspannable gulf between the two brothers is widened by their antipodal attitudes toward money—Behrman) (flashy, crude, essentially shallow, but nevertheless at the antipodes from villainy. He is good-hearted and generous—Walcutt) (the very antipode of Grupius. Where the American is romantic, the German is rationalistic—Werner) Antonymous and antonym are applicable only to a word or term which is so opposed to another in meaning that it, in effect, negates or nullifies every implication of it. Antonyms or antonymous words may be contradictory or contrary terms, as defined, or they may be terms which negate other terms by implying the undoing or reversing of what is denoted by them; thus, retain is the contradictory antonym of lose, but recover is the reverse antonym of lose. Ana reverse, converse (see corresponding nouns at converse): antagonistic, *adverse, counter, countercurrent Con reconciling, conforming, adapting, adjusting (see adapt): consistent, compatible, congruous, congenial, *consonant oppress 1 *depress, weigh Ana *abuse, mistreat, maltreat, ill-treat, outrage: *worry, annoy, harass, harry 2 *wrong, persecute, aggrieve Ana *afflict, torment, torture: overcome, subdue, subjugate, reduce, overthrow (see conquer) oppressive *onerous, burdensome, exacting Ana extorting or extortionate, extracting (see corresponding verbs at educe): compelling or compulsory, coercing or coercion, constraining, obliging or obligatory (see corresponding verbs at force): despotic, tyrannical, *absolute, arbitrary

Oracular doctrinaire, dogmatic, *dictatorial, authoritarian, magisterial

Ana positive, certain, *sure, cocksure

Oral 1 vocal, articulate

Ana written

2 Oral, verbal are often confused in use. Oral (see also vocal 1) implies utterance and speech; it is distinctively applicable to whatever is delivered, communicated, transmitted, or carried on directly from one to another by word of mouth (an oral as opposed to a written confession) (receive oral instructions) (oral teaching of the deaf as distinguished from teaching by signs) Verbal stresses the use of words that may apply indirectly to what is written or spoken, for it carries no implication of the method of communication (verbal difficulties caused by ambiguous or equivocal language) (he often loses himself in little trifling distinctions and verbal niceties — Gray) The use of verbal as a substitute for oral fails to convey the intended distinction or suggests unintended or irrelevant distinctions or contrasts; thus, one would speak of an oral invitation or oral testimony when spoken is to be implied, because verbal would be ambiguous.

Oration *speech, address, harangue, lecture, talk, sermon, homily

Orbit *range, gamut, reach, radius, compass, sweep, scope, horizon, ken, purview

Ordains *dictate, prescribe, decree, impose

Ana order, *command, enjoin, direct

Order n 1 *association, society, club

2 *command, injunction, bidding, behest, mandate, dictate

Ana instruction, direction, charging or charge (see corresponding verbs at command)

Order vb 1 Order, arrange, marshal, organize, systematize, methodize are comparable when they mean to put a number of persons or things in proper place especially relatively or to bring about an orderly disposition of individuals, units, or elements that comprise (a thing). Order is somewhat outmoded when the idea of putting in a definite order is to be expressed; it more usually implies a straightening out and may connotate either the elimination of friction or confusion, often with resulting peace or harmony, or the imposition of a fixed and rigid discipline (ordered his affairs in expectation of death) (it was a home strictly ordered, and he would have to conform to its ordering — Archibald Marshall) (the Greek states . . . were not well ordered; on the contrary, they were always on the verge, or in the act, of civil war — Dickinson) (a period of yearly relaxation in London, ordered and increasingly stately — Sackville-West) Arrange is more often used than order where the idea of setting in proper sequence, relationship, or adjustment is uppermost. The word often implies a notion of what is orderly, fit, suitable, or right and a placing of things in accordance with this notion (they are the great organizers . . . the Germans classify, but the French arrange) (rather (arrange the furniture in a room) (design fruit for a dish) (each of us arranges the world according to his own notion of the fitness of things — Conrad) Often the term implies a determination of the way in which the things are disposed by an end in view and then suggests careful management or manipulation (we shall arrange matters so that you will not be inconvenienced) (arrange the details of a conference) (she arranged leave for a counselor whose mother was ill — Auchincloss) (political and economic life had been arranged in Utopian fashion — Henry Miller) Marshal usually connotes generalship and implies assemblage and arrangement either for ease or advantage in management (as under stress) or for effectiveness in display or exhibition (marshal troops for battle) (p_FLUSH to marshal his thoughts before beginning his address) (marshaled like soldiers in gay company, the tulips stand arrayed — Lowell) (thanks to Mr. Dawson's erudition and his gift of marshaling facts, we begin to have a notion of what it is all about — Huxley) Organize implies an arrangement in which all persons or things are so related to each other that they work as a unit, each individual having his or its proper function or duty (organize the supporters of a candidate for the presidency) (part of this service is organizing — cataloging, classifying, and arranging on shelves — the collected literature — Bercaw) (the traditional logic was a logic for clarifying and organizing that which was already known — Dewey) Systematize implies arrangement according to a definite and planned scheme thus one systematizes one's daily work when one reduces it to routine order (if grammar was to become a rational science, it had to systematize itself through principles of logic — H. O. Taylor) (how Philosophy . . . blindly spinthet her geometric webs, testing and systematizing even her own disorders — Bridges) Methodize differs from systematize in suggesting the imposition of orderly procedure rather than of a fixed scheme; thus, one can methodize one's work without giving it the character of routine (that art of reasoning . . . which methodizes and facilitates our discourse — Shortshore) (philosophical decisions are nothing but the reflections of common life, methodized and corrected — Thilly)

Ana *adjust, regulate: *line, line up, align, range, array

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
deep and fundamental and that the thing itself is only an outward manifestation of its influence. Root therefore more often even than source applies to what is regarded as the first or final cause of a thing (the love of money is the root of all evil—1 Tim 6:10) <John Brown has loosened the roots of the slave system; it only breathes—it does not live—Phillips> Provenance and provenience are chiefly used to designate the place or, sometimes, the race or people from which a thing is derived or where or by whom or among whom it originated or was invented or constructed <antiquities of doubtful provenance> <he would have some difficulty in guessing its provenance, and naming the race from which it was brought—Lang> (a fragment of a cast copper dagger had been discovered earlier, but its provenance is not certain—Dafuku) In mechanics the term specifically applies to the natural or mechanical power which sets a thing moving or in motion; it has been used in reference to wind (as in driving a sailing ship), steam (as in driving a steamship), a waterwheel, a windmill, or a steam or diesel engine. Ana beginning, commencement, initiation, starting (see corresponding verbs at BEGIN): derivation, origination, rising or rise (see corresponding verbs at SPRING): *ancestry, lineage

original adj 1 *initial, primordial
Ana beginning, commencing, starting (see BEGIN): *primary, primal, pristine, primeval: basic, *fundamental Con deriving or derived, stemming or stemmed, proceeding or proceeded (see SPRING): imitated or imitating, copied or copying (see COPY): simulated or simulating (see ASSUME) 2 *new, new, novel, new-fashioned, newfangled, modern, modernistic
Ant dependent: banal: trite

ornate, rococo, baroque, flamboyant, florid can all mean elaborately and often pretentiously designed or decorated. Ornate is applicable to anything heavily adorned or ornamented or conspicuously embossed <an ornate style of architecture> <the room's communicating door, heavily ornamented with late Renaissance panels and tarnished silver handles—Machinnes> <in the fiacre were Gerald and a woman. Gerald . . . was talking eagerly to his ornate companion—Bennett> (introduced the direct and colloquial manner upon the American public platform, as distinguished from the highly elaborated and often ornate style which had been established—Higginson) Rococo basically applies to a French architectural style originating in the eighteenth century and characterized chiefly by the extravagant and often fantastic use of curves, shellwork, and fanciful exuberance. The term therefore implies the ornateness of design characteristic of this decorative style especially as evident in architectural details, in furniture, and in mirror and picture frames. It is often extended to describe a style (as in painting or writing) that seems tastelessly or meaninglessly ornate or overadorned <decided instead to have the wedding, rococo excess and all—Wouk> <doesn't mind getting caught out with a rococo phrase or an overstuffed image—Los Angeles Times> Baroque, which is sometimes interchanged with rococo, basically applies to a style of art and architecture which prevailed from the latter part of the sixteenth century to nearly the end of the eighteenth century and which emphasized energy in conception, amplitude in design, the use of dynamic contrasts, extremely high relief, and the employment of curved and often contorted forms <I entered this baroque interior, with its twisted columns and volutes and high-piled, hideous tombs, adorned with skeletons and allegorical figures and angels blowing trumpets—L. P. Smith> In its extended sense baroque may suggest more grotesqueness and extravagance and less fancifulness than rococo, although it too may imply tasteless ornamentation <baroque poetry with its frigid vehemence, its exhibitionistic forcefulness and false dynamism, its arbitrary twisting and distortions—H. L. Davis> (their literature, their modern painting and architecture, their music—it's all baroque. It gesticulates rhetorically, it struts across stages, it sobs and bawls in its efforts to show you how passionate it is—Huxley) Flamboyant basically applies to a late French Gothic architectural style characterized by curves that suggest ascending flames (as in the tracery of windows). In its more general application flamboyant can suggest ornateness but more often stresses such elements as excess of color, conspicuous vigor and dash, or bold and daring display that suggest the freedom and brilliancy of flames <a flamboyant display of courage> <flamboyant penmanship—Dowden> <the flamboyant period of prose—Saintsbury> (these . . . flamboyant tricks of virtuosity have gone quite out of fashion—Quiller-Couch) <some [people] are simply present at accidents, without being involved at all—catastrophes of death, if you'll pardon a flamboyant phrase—Theodore Sturgeon> Florid implies richness, usually overrichness, in details, shown particularly in the use of color, figures of speech, or flourishes, for their own sake; it implies, therefore, showy and ostentatious embellishment <a florid style of poetry> <a florid musical composition> (the screen was an old one, of gilt Spanish leather, stamped and wrought with a rather florid Louis-Quatorze pattern—Wilde) <inexpressible how a book . . . can . . . be banned because of the manner in which it is advertised and sold. However florid its cover, whatever the pitch of its advertisements, the contents remain the same—W. O. Douglas> (a florid musical composition) (the screen was an old one, of gilt Spanish leather, stamped and wrought with a rather florid Louis-Quatorze pattern—Wilde) <inexpressible how a book . . . can . . . be banned because of the manner in which it is advertised and sold. However florid its cover, whatever the pitch of its advertisements, the contents remain the same—W. O. Douglas> <a florid style of poetry> <a florid musical composition> (the screen was an old one, of gilt Spanish leather, stamped and wrought with a rather florid Louis-Quatorze pattern—Wilde) <inexpressible how a book . . . can . . . be banned because of the manner in which it is advertised and sold. However florid its cover, whatever the pitch of its advertisements, the contents remain the same—W. O. Douglas> Ana adorned, decorated, ornamented, embellished (see ADORN): flowery, aureate (see RHETORICAL): *luxurious, sumptuous, opulent: *showy, ostentatious
Ant chaste: austere

orotund *resonant, sonorous, ringing, resounding, vibrant
Ana *loud, stentorian, strident

oscillate *swing, sway, vibrate, fluctuate, pendulate, waver, undulate
Ana vacillate, waver, *hesitate, falter: *shake, tremble, quiver, quaver

ostensible *apparent, seeming, illusory
Ana specious, *plausible, colorable: pretended, assumed, affected, simulated, feigned (see ASSUME)

ostentatious *showy, pretentious
Ana vainglorious, vain, proud (see under PRIDE): flaunting, parading, displaying (see SHOW vb): boasting, bragging, gasconading (see BOAST)

ostacize *banish, exile, expatriate, deport, transport, extradite

oust

* eject, expel, evict, dismiss

out-and-out

* outright, unmitigated, arrant

outcast n

Outcast, castaway, derelict, reprobate, pariah, untouchable are comparable when they mean one who has lost contact with or has been excluded from association with men in general or with a particular group. Outcast is usually applied to a person who has been rejected by society and is forced to live without its help, its companionship, or its approval; the term need not imply a degraded or abject condition, but it does suggest a loss of the comforts that accrue from one’s association with other men (the casual offender expiates his offense . . . and after devastating years is given back an outcast to the society that made him—Cardozo) (Arnold the heart-broken outcast from the snug household of faith—Montague) Castaway usually implies abandonment as the result of shipwreck and suggests the wretched and pitiable condition of one isolated from both human society and normal human comforts (took part . . . in that passage through the Straits of Gibraltar which landed him as a castaway on the Portuguese coast—Seller) (a pitiful wreck of an old man he had picked up . . . castaway Englishman, Henry Atkins by name—Cather) Derelict basically applies to property and especially to a ship abandoned and left to the mercy of the elements. In application to human beings the term emphasizes a cutting off from normal social association particularly because of irresponsible or dissolute habits and more often than outcast or castaway suggests a debased state more or less voluntarily assumed (chronic ne’er-do-wells, useless delericts of society, seldom hired and then not for long—F. L. Allen) (strange things happen on a racetrack where human delericts and equine aristocrats fashion bonds . . . beyond the comprehension of the outside world—Gerald Beaumont) Reprobate basically applies to one who, because of his sins, is rejected by God. In extended use reprobate is more likely to imply the disapprobation of society than actual rejection by society, and, while it may impe the grave wrongdoing, it is very likely to suggest a degree of social toleration (may paint his hero as a gay, devil-may-care reprobate, striding to the galleries with a twinkle in his eye—Pawley) (an old reprobate who acted as medicine man, astrologer, doctor, wizard, rainmaker—Birtles) Pariah and untouchable are words basically used to denote specific socially inferior or unacceptable groups in India but in their more general applications often used without reference to the original meaning. Pariah in such general application typically denotes a person especially as a member of a group is, justifiably or unjustifiably, rejected or despised by society (with us, prison makes a man a pariah. I, and such as I am, have hardly any right to air and sun—Wild) (many virile minds dare not speak out for fear of . . . becoming political pariahs—L. L. Rice) (a man who had disgraced himself in battle was a pariah in his native land—Dickinson) (hundreds of thousands of lepers still exist throughout the world as social pariahs—Heiser) Untouchable is applicable not only to an individual but to a group (as a people, nation, or class) which another and supposedly superior group regards as beneath its notice or outside the sphere of its consideration (those in Whitehall may go on thinking there is something extremely meritorious in treating Russia as a diplomatic untouchable—Daily Express) (that former untouchable of the Atlantic, the Tourist-Class passenger—Sutton) (A na vagabond, vagrant, tramp, hobo

outcome

* effect, result, consequence, upshot, aftereffect, aftermath, sequel, issue, event

outdo

* excel, outstrip, transcend, surpass, exceed

outer, outward, outside, exterior, unsterior mean being or placed without something. Although in many cases interchangeable, they are more or less restricted in their applications and are therefore clearly distinguished in their implications. Outer usually retains its comparative force, then applying to what is farther out from something described as inner (the outer as distinguished from the inner court) (the outer layer of skin is called the epidermis) or is farther than another thing from the center (shed one’s outer garments) (the outer covering of a butternut is removed before the nut is cracked) Outer is also applicable to what is definitely without as opposed to what is definitely within something, but in this sense the term rarely suggests spatial relations; thus, the outer man is the man as known in the flesh and as distinguished from the inner man, that is, the man as he really is in mind and soul; one’s outer life is the part which is observable to one’s fellows; the outer world is the world as known directly through the senses. Outward may be used of spatial relations; when it is so used it commonly implies motion or direction away from, or the reverse of, what is inward (given to outward display—outward display from New York City is very heavy over the weekends) (the outward curve of a convex lens) Like outer, the term is sometimes used of what is manifest to others in contrast with what is within and especially with what is spiritual or mental (all outward actions, every overt thing we do—Powys) (obstinate questionings of sense and outward things—Wordsworth) (give outward and objective form to ideas that bubble inwardly and have a fascinating lure in them—Mencken) Outside usually implies a position on or a reference to the outer parts or surface of a thing (an outside stateroom on a ship) (outside shutters) (the outside paint is looking shabby) But outside, in extended use, applies especially to a person or thing that is beyond implied borders, bounds, or limits; thus, an outside influence is one not emanating from the particular society, group, or community in mind; the outside world is the world beyond the scope or interest (as of a family group, community, or set) or the confines of a place (as an institution, a town, city, or a state); an outside broker is one who is not a member of an exchange; outside work is work in the open air in contrast with inside work under cover (as in an office, factory, or store) (if it had condemned, Old Chester would not have cared in the very least. It looked down upon the outside world—Deland) External and exterior are often used interchangeably without loss, for both come close in meaning to outside (external appearance of an object) (the exterior form of a body) But external may be preferred when location or situation beyond or away from the thing under consideration is implied (our desires and wills are directed to some object external to us—Alexander) (the slavery which would be imposed upon her by her external enemies and her internal traitors—Russevelts) and exterior is often preferred when location or situation on the surface or on the outer limits of a thing is implied (the exterior slope of a fortification) (the exterior parts of the human body) (thou, whose exterior semblance doth belie thy Soul’s immensity—Wordsworth) In addition, external sometimes comes close to superficial in implying mere appearance or semblance that has no relation or little relation to what the thing really is (but under this external
appearance of ease she was covered with cold beads of sweat—Wharton} <beauty that is purely external> and exterior may, like outer and outward, apply to what shows or is made apparent {the exterior cold had stolen into the cars, forming lenses of ice on the inside surface of the windowpanes—Capote} <the absence of exterior demonstration of affection for my mother—Wecter> 

**Ana** extrinsic, extraneous, foreign, alien 
**Ant** inner —Con inward, inside, internal, interior, inner—testine (see **INNER**)

**outfit** 585 outrageous 

**outfit** n 1 Outline, contour, profile, silhouette, skyline, outlandish

**outfit** vb *furnish, equip, appoint, accouter, arm

**outlast** *stranger, foreigner, alien, outsider, immigrant, émigré
**outlast** *furnish, equip, appoint, accouter, arm

**outlive** outlandish *strange, singular, unique, peculiar, eccentric, erratic, odd, queer, quaint, curious

**outlive, outlast, survive** are comparable when they mean to remain in existence longer than another person or thing or after a given experience. **Outlive** carries a strong implication of a capacity for endurance and is especially appropriate when competition, struggle, or the surmounting of a difficulty is also connoted {not marble, nor the gilded monuments of princes, shall outlive this powerful rhyme—Shak} <the world has outlived much, and will outlive a great deal more—J. R. Lowell> **Outlast** differs little from outlive but usually stresses greater length of duration rather than greater capacity for endurance and therefore may be employed when comparison is more important than a suggestion of superiority or when the fact of existing longer is more important than the length of time involved {customs that have long outlasted their usefulness—Inge} <the sweet sensations of returning health made me happy for a time; but such sensations seldom outlast convalescence—Hudson> **Survive** may be used as an intransitive as well as a transitive verb; in general it suggests merely a living or existing longer than another person or thing, or after some event (sometimes implied rather than expressed) which might bring about his or its end {the elder sister survived the younger} <he is unlikely to survive the operation> <one in a million of these childish talents survives puberty—Huxley> <they had at least survived the old year and were alive for the next—Irwin Shaw> {all called their host “Mr. President.”}

That much sense of the proprieties survived the reek of whiskey—S. H. Adams

**Ana** endure, persist, abide, *continue: withstand, *resist

**Ana** endure, persist, abide, *continue: surpass, *exceed

outside *outer, outward, external, exterior
bulge, jut, stick out, protuberate, protrude,
overlay, overflow
*teem, swarm, abound
stranger, foreigner, alien, outlander, immigrant,
overbearing
frustrate, thwart, foil, baffle, balk, circumvent
outwit
prominent, conspicuous, salient, signal, outstanding
above
outward
outright
adj
Outright, out-and-out, unmitigated, arrant
are comparable when they are used hyperbolically as meaning not limited or qualified. They are often used interchangeably as intensives, but there are clear differences in meaning. What is outright has gone to the extreme and can be made neither better nor worse or is past recall (he is an outright fool) (you speak outright nonsense) (torture more unmerciful than outright killing). What is out-and-out is completely as described at all times or in every part or from every point of view (an out-and-out fraud) (an out-and-out villain) (an out-and-out blessing). What is unmitigated is or seems to be so utterly what it is as to be beyond the possibility of being lessened, softened, or relieved (an unmitigated evil) (unrequited affections are in youth unmitigated woes—L. P. Smith) What is arrant is all that is implied by the term that follows (usually a term of abuse) (an arrant coward) (an arrant hypocrite) (an arrant liar)

outside adj *outer, outward, external, exterior
Ana *extrinsic, extraneous, alien, foreign
Ant inside —Con *inner, inward, internal, interior, intestine
outsider *stranger, foreigner, alien, outlaw, immigrant, émigré
outstanding prominent, conspicuous, salient, signal, striking, arresting, remarkable, *noticeable
Ana *exceptional
Ant commonplace —Con *common, ordinary, familiar
outstrip outdo, *exceed, surpass, transcend, excel
outward *outer, outside, external, exterior
Ana extraneous, *extrinsic, alien, foreign

outwit *frustrate, thwart, foil, baffle, balk, circumvent
Ana defeat, overcome, surmount (see conquer): *prevent, preclude, obviate: overreach, *cheat, defraud
over *above
Ana beneath
overbearing supercilious, disdainful, lordly, arrogant, haughty, *proud, insolent
Ana domineering, *masterful, imperious: scorning or scornful, despising or despisive, contemptuous (see corresponding verbs at despise): autocratic, despotic, tyrannical, *absolute
Ant subservient
overcome surmount, overthrow, subjugate, rout, *conquer, vanquish, defeat, beat, lick, subdue
Ana capture, *catch: outstrip, outdo, *exceed: *suppress, repress
overdue *tardy, behindhand, late
Ana delayed, retarded, detained, slowed, slackened (see delay vb): deferred, postponed (see defer)
overflow *teem, swarm, abound
overhang *bulge, jut, stick out, protuberate, protrude, project, beetle
Ana *threaten, menace: suspend, *hang, dangle
overlay, superfuse, superimpose, appliqué can all mean to add one thing to another by placing the former upon or over the latter. Overlay usually implies covering with another material or substance, sometimes thinly (as with a wash, glaze, or coat) (plated silver is often a white metal overlaid with silver) or sometimes thickly (as by encrusting, veneering, or plastering) (a brick wall overlaid with stucco) In extended use overlay usually implies accretions or additions that conceal or encumber the original thing or smother and stifle whatever there is of life in it (the ancient world had its own complexities, but it was not, like ours, heavily overlaid with the debris of speculative systems—Buchan) (ages of fierceness have overlaid what is naturally kindly in the dispositions of ordinary men and women—Russell) Superpose and superimpose are not always clearly distinguished, especially when they imply a putting of one thing on top of another, thereby extending the height of the original mass; thus, strata are layers of rock successively built up by sedimentary deposits, each layer being superimposed or superposed on the one previously formed. Superpose, however, is more often chosen when relative position only is indicated, and superimpose when the thing added rests upon or is supported by the original thing; thus, superposed columns do not necessarily have the columns of the lower row for their respective bases, but superimposed columns do; an overtone is strictly a superposed tone. Superpose is also the technical term when dealing with light rays or other energy waves that occupy the same position without destroying each other or losing their identities (upon the large and general motion of the glacier, smaller motions are superposed—Tyndall) (originally they [two bright spots] were superposed on each other—Darrow) Superimpose often, especially in extended use, carries the implications of imposition or the addition of something extraneous and unintegrated (his symbolism is too often something superimposed—Bentley) Appliqué basically implies an ornamenting with pieces, usually of contrasting material, that are cut or shaped and applied (as by sewing or pasting); the term is used primarily in reference to textile ornamentation (appliqué a satin blouse with wool of the same color) In extended use appliqué suggests overlaying with something obviously added and forming a pattern (never taking his eyes off the pine trees, appliqué against the blue water—Cather) (footnotes have been appliquéed to books that would have been better off without this factitious decoration—D. C. Smith)
overlook slight, forget, ignore, disregard, *neglect, omit
overplus *excess, superfluity, surplus, surplusage
overreach *cheat, cozen, defraud, swindle
overrun *infest, beset
oversight supervision, surveillance all denote the function or duty of watching or guarding for the sake of proper control or direction. Oversight applies to the function or duty not only of one who is called an overseer or an inspector but of anyone whose duty it is to watch the progress of a piece of work so that no defects or imperfections may occur or to superintend the labors or efforts of a body of workers (each foreman is charged with the oversight of the work done in his department) (his widow was to have the oversight of the portions left to the younger children—Sudder) (legislative oversight of administration is a familiar and well-grounded assumption of responsible government—Macmahon) Supervision carries the strongest implication of authoritative powers, of responsibility, and of superintendence; it usually suggests more rigorous direction or closer management than oversight (the architect had supervision of the construction of the building) (the majority plan advocated supervision of the processing of ores . . . that is, complete control of uranium and
thorium—Current Biol.> Surveillance implies a close watch on persons suspected of being likely to commit misdeeds or offenses against the law or against morals or suffer untoward accidents <the police are maintaining a strict surveillance of the suspect> <keep the inmates of a lunatic asylum under surveillance> <I cannot drink a milk shake or put on a pair of shoes without their friendly but implausible surveillance—A.E. Stevenson> <they subjected her to a pride-breaking foreign surveillance, and refused her even the lip service of recognition as an equal—The Personalist>

**Ana** management, direction, controlling or control (see corresponding verbs at control): inspection, scrutiny, examination (see under scrutinize)

**overspread** vb *cover, envelop, wrap, shroud, veil* *hide, conceal, screen: cloak, mask, disguise, camouflage*

**overset ous ous** statement *exaggeration, hyperbole* *acknowledge, avow, admit, confess*

**overt** vb 1 *overturn, subvert, upset, capsize* *throw, cast, fling, hurl, toss* 2 rout, surmount, overcome, vanquish, conquer, defeat, beat, lick, subdue, subjugate, reduce

**overture** n Overture, approach, advance, tender, bid are words of somewhat indefinite application covering a variety of acts or actions by which one person or party tries to gain the goodwill of another person or party. Overture implies an attempt to begin a relationship. It may designate a formal proposal intended to open negotiations (as for peace; a marriage between persons of royal blood, or for a merger of corporations). It is, however, often applied to an act or speech that may be construed as a search for an opening (as for friendship, for reconciliation, or for cooperation) <she was not one of those backward and delicate ladies, who can die rather than make the first overture—Fielding> “You are the new second officer, I believe.”<Mr. Powell answered in the affirmative, wondering if this was a friendly overture—Conrad>

**Approach**, often in the plural, may be used in place of overture when the latter is felt to be too formal <the two girls made timid approaches to each other> <the minister is always tempted to break through . . . with intimate approaches to a congregation which are off the record—Sperry> <the females who are most often involved in tavern pickups and in street approaches—Kinsey et al> **Advance**, usually in the plural, may be applied to an attempt to gain love, friendship, or goodwill, whether it serve as an overture or as an effort to establish a closer relationship <she tried to make talk, but Hugh answered all her advances . . . briefly—Anderson> and it is the one of these terms that is freely used without qualification to suggest irregularity or impropriety in the overtures made <Frances withstood the advances of the King, but she accepted his gift—Sylvia Gray> <if an officer with a higher rank than my husband's makes advances to me, do I have to submit if I want my husband to get promoted?—Kaderly> **Tender** retains its primary meaning of offer, but it does not necessarily imply specific acts or a formal proposal. Sometimes it suggests little more than a sign or token <"He hath, my lord, of late made many tenders of his affection to me."—Affection! pooh! you speak like a green girl. . . . Do you believe his tenders, as you call them?"—Stark> <honored him by the tender of some important appointment—J.D. Hicks> **Bid** adds to advance the implication of appeal or, sometimes, of invitation; it always requires qualification <a bid for sympathy> <a bid for patronage> Like the other words of this group, the specific nature of the act or action can be inferred only from the context <de Gaulle's speech was generally considered a bid for the presidency—Ehrmann> <the establishing of a whaling colony as their first bid to fortune on the South river—Amer. Guide Series: Del.> **Ana** *proposal, proposition: offering or offer, proffering (see corresponding verbs at offer)*

**overturn**, upset, capsize, overthrow, subvert are comparable because they carry a common basic meaning—to cause to fall, or, intransitively, to fall, from the normal or proper position. Otherwise they vary widely in their applications and implications. Overturn is usually the least explicit in its additional implications; sometimes it implies a turning upside down <the boat overturned and floated with its keel upwards> but more often it implies a turning on the side so that the thing affected lies flat on the ground <overturn a chair by hitting against it> <they overthrew me in the dust, rubbed thistles into my hair, and left me—Masters> Sometimes, especially when the thing affected is a state, an institution, or something which has been built up or become established, the term also implies a breaking down and consequently a ruinizing or destroying <long-reverenced titles cast away as weeds; laws overturned—Wordsworth> <handed down a decision which overturned a century-old judicial rule—Walter Goodman> <a lever for prying apart and overturning the coalition—Straight> **Upset** is the familiar term and implies especially a loss of balance, sometimes physical, sometimes moral (often emotional) <by this sense of upset see discompose as the result of some external or internal cause or agency> <no birds in last year's nests—the winds have torn and upset the mossy structures in the bushes—Jeffries> <a European war lays its blight on whole peoples, deranges their life, upsets their standards of judgment—Montague> But upset more often than overturn is used to imply the abolition of something established or the demolishing of something built up <the general's calculations were upset by the swift advance of the enemy> <we are bound to be very cautious in coming to the conclusion that the Fourteenth Amendment has upset what thus far has been established and accepted for a long time—Justice Holmes> **Capsize** is specifically applicable to the upsetting or overturning of a boat; in more general use it usually suggests a complete overturning and is sometimes employed in an extended sense to imply a turning, especially a sudden turning, upside down or topsy-turvy, not only physically, but mentally or morally <it may well have been the comedians who restored the theatre's balance when the tragedies threatened to capsize it into absurdity—Bridges-Adams> **Overtw** (see also conquer) carries a stronger implication of the exercise of force, violence, or strategy than any of the preceding terms; it often also implies consequent defeat, destruction, or ruin <trees overthrown by a storm> <seek to overthrow religion> <my plans were overthrown—Darwin> <traditional beliefs which science may overthow—Cohen> **Subvert** implies an overturning or overthrowing of something held to be of intrinsic value (as a form of government, or morality, or religion) by undermining its supports or weakening its foundations; often it suggests the operation of insidious or corrupting influences <this doctrine would subvert the very foundation of all written constitutions—John Marshall> <a . . . question . . . whether more harm will be done to morality by weakening or subverting established usage than good—Alexander> <representative government . . . easily may be, and in England has been, used to subvert equality and fraternity—Brownell> **Ana** invert, *reverse, transpose

**own** vb 1 possess, hold, have, enjoy **Ana** control, manage, direct, *conduct: *keep, retain 2 *acknowledge, avow, admit, confess

**Con** contrasted words See also explanatory notes facing page 1
pacify, appease, placate, mollify, propitiate, conciliate are * pacific, peaceable, peaceful, irenic

pabulum *food, aliment, nourishment, sustenance, pap
disturbed persons. Pacify implies a soothing or calming of anger, grievance, or agitation, or the quelling of insurrection especially by force (seeing his mounting rage, friends did all they could to pacify and restrain him) (second-grade troops, useful mainly to occupy parts of the country that have already been pacified—Crozer)

Appease may indicate the quieting of agitation or insistent demand by the making of concessions (open in manner, easy of access, a little quick of temper but readily appeased—Buchan) he is utterly and absolutely implacable; no prayers, no human sacrifices can ever for one moment appease his cold, malignant rage—L. P. Smith and it may be used in reference to appetites, desires, and passions as well as persons and to imply a giving of quietening satisfaction (there is always the drive to excel. Work, literacy, food and shelter . . . are minimum requirements of civilization, but they will not appease this ambition—Edmund Wilson) A frantic effort to appease mounting discontent at home—Willen Placate is sometimes interchangeable with appease but may imply a more complete or lasting assuagement of bitter feeling (each and every new route projected was liable to drastic alteration to placate local opposition—O. S. Nock) (federal officials who try to placate witch-hunting Congressmen—New Republic

Mollify stresses softening of anger or abatement of hurt feelings by positive action (as flattery or concession) (the propagandist . . . must be able to mollify and perhaps even convert the hostile—Huxley) (mollified when they heard that the patio, with its famous cottonwood tree will be left intact—Green Peyton

Propitiate may refer to averting the anger or malevolence or winning the favor of a superior or of one possessing the power to injure greatly (propitiate this far-shooting Apollo—Grote) Aunty Rosa, he argued, had the power to beat him with many stripes . . . it would be discreet in the future to propitiate Aunty Rosa—Kipling (the unlimited power of trustees to abuse their trust unless they are abjectly propitiated—H. G. Wells) Conciliate may be used of situations in which an estrangement or dispute is settled by arbitration or to persons or to utterances, acts, influences, or ideas that tend to make peace or to conciliate strife (they flung out a challenge which even the most pacific Quaker in Philadelphia had to heed—Charles & Mary Beard) (the pacific policy of Walpole was regarded by them as a national humiliation—Plumb) Peaceable also applies to persons or to their actions or words, but it describes their character or quality as peace-loving, as disposed to avoid strife, or as inclined to keep peace, rather than their aims or tendencies (the villagers were quiet, peaceable folk) (our king the good Simonides . . . deserves so to be called for his peaceable reign and good government—Shak) (the Mayans were a traditionally gentle and peaceable people—Bracker Peaceful applies especially to a life, a condition or state, a period or age, or a country or people in which peace prevails or there is no strife, but it may apply to whatever is indicative of peace, especially of mind, or provides an opportunity for such peace (and may at last my weary age find out the peaceful hermitage—Milton) (the peaceful countenance of the old clergyman) (you shouldst have seemed a treasure-house divine of peaceful years—Wordsworth) (man has laid down his weapons and resumed a peaceful way of life—Bailey) (the peaceful comportment of the seals had quieted my alarm—London) Irenic, which applies primarily to peace in connection with religious controversy, may describe attitudes and measures likely to allay dispute (the political equivalent of the dogfight on the human level is not made more irenic by the capacity of the participants to verbalize their animosities—Murphy) (Pieter lived to see his synod adopt a very irenic attitude towards its former antagonists—Rohe) Pacifist and pacificist apply chiefly to the views, arguments, writings, or attitudes of opponents of war or the use of military force for any purpose but they may also apply to the spirit or utterances of someone who conscientiously objects to wars or who would substitute arbitration for settlement in any disputes (pacifistic antagonism to conscription) (Grotius' pacificist attitude is founded on his understanding of the humanitarian and cosmopolitan aspects of natural law—Albert Salomon) (as many pacifist writers argue, international warfare has consequences for the lives of people, in terms of spiritual sickness and the brutalizing of attitudes—Garvin)

Anita concede, *grant, allow: *reveal, disclose, divulge
Ant disown: repudiate

Pabulum *food, aliments, nourishment, sustenance, pap

Pacify, appease, placate, mollify, propitiate, conciliate are comparable when they mean to quiet excited, aroused, or disturbed persons. Pacify implies a soothing or calming of anger, grievances, or agitation, or the quelling of insurrection especially by force (seeing his mounting rage, friends did all they could to pacify and restrain him) (second-grade troops, useful mainly to occupy parts of the country that have already been pacified—Crozer)

Appease may indicate the quieting of agitation or insistent demand by the making of concessions (open in manner, easy of access, a little quick of temper but readily appeased—Buchan) he is utterly and absolutely implacable; no prayers, no human sacrifices can ever for one moment appease his cold, malignant rage—L. P. Smith and it may be used in reference to appetites, desires, and passions as well as persons and to imply a giving of quietening satisfaction (there is always the drive to excel. Work, literacy, food and shelter . . . are minimum requirements of civilization, but they will not appease this ambition—Edmund Wilson) A frantic effort to appease mounting discontent at home—Willen Placate is sometimes interchangeable with appease but may imply a more complete or lasting assuagement of bitter feeling (each and every new route projected was liable to drastic alteration to placate local opposition—O. S. Nock) (federal officials who try to placate witch-hunting Congressmen—New Republic

Mollify stresses softening of anger or abatement of hurt feelings by positive action (as flattery or concession) (the propagandist . . . must be able to mollify and perhaps even convert the hostile—Huxley) (mollified when they heard that the patio, with its famous cottonwood tree will be left intact—Green Peyton

Propitiate may refer to averting the anger or malevolence or winning the favor of a superior or of one possessing the power to injure greatly (propitiate this far-shooting Apollo—Grote) Aunty Rosa, he argued, had the power to beat him with many stripes . . . it would be discreet in the future to propitiate Aunty Rosa—Kipling (the unlimited power of trustees to abuse their trust unless they are abjectly propitiated—H. G. Wells) Conciliate may be used of situations in which an estrangement or dispute is settled by arbitration or conciliating

Pack, crowd, cram, stuff, ram, tamp are comparable when they mean to fill tightly or cause to fill tightly something which holds a limited amount or presents a limited space. Pack, in its basic sense, implies a forming into packs or bundles for convenience in storing or transporting (oranges are packed in crates for shipment) (pack books in cartons before moving them) (in this factory huge quantities of meat are processed, packed, and shipped to all parts of the country). Additionally it may imply close, orderly arrangement in receptacles of determined size, and, as a corollary, compact and complete
filing. In extended use it may suggest completeness of filing or, frequently, an excessive or uncomfortable filing, without any relation to the ideas of storing or transporting

*<the play packed the theater>*<the crowd in the bus was packed in like sardines>*<packs an extraordinary amount of information into a few pages>*<Time Lit. Sup.>*<Crowd (see also PRESS) implies the presence of great numbers of persons or things in proportion to the space, area, or time; the term often suggests numbers so great as to press upon or otherwise seriously inconvenience>*<the harbor was crowded with ships>*<crowd more persons into a hall than it can safely hold>*<in revolutions men live fast: the experience of years is crowded into hours>*<Macaulay>*<the road ... was now crowded with people who had come up the hill for their Sunday afternoon walk>*<Archibald Marshall>*<his mind was crowded with the detail he observed>*<Nevil Shute>*<Cram carries a similar implication of pressing so as to bruise or squeeze, but the word usually also suggests a forcible and, sometimes, disorderly insertion into a receptacle or space of more than can easily or comfortably or safely take>*<cram a trunk full of clothes>*<their storehouses crammed with grain>*<Shak.>*<crammed his head full of knowledge>*<cram for an examination>*<most of the newcomers arrive with only such means as can be crammed into a bundle or two>*<Hershey>*<Stuff implies the use of such a material as padding, wadding, or straw in expanding or distending>*<stuff a pillow with feathers>*<stuff a mattress with straw>*<from this specific meaning comes the more general meaning of to fill so that a thing bulges or so that the filling protrudes>*<stuffed his purse with bills>*<stuff a turkey with dressing>*<i have stuffed too many of the facts of history and science into my head full of knowledge>*<as many hot hors d'oeuvres as the greediest guest could stuff into himself>*<Wouk>*<Ram nearly always retains some notion of its basic implication of pounding and tamping>*<ram home the charge in a muzzle-loading firearm by means of a ramrod>*<but this implication is sometimes obscured or subordinated and that of stuffing or cramming as if by pounding in is stressed>*<ram tobacco into his pipe>*<i always ram my clothes into a box>*<Burty>*<pronging great slices of meat onto his fork and ramming them into his mouth>*<Bruce Marshall>*<Tamp, which often comes close to ram in meaning, originally meant and still means to plug up a drill hole above a blasting charge with clay, earth, or similar material. In its extended use it implies a series of blows which press something into a confined space or under, over, or about another thing that needs to be supported>*<cram the gravel back around the ties>*<Laird>*<crammed his pipe>*

**Ana** analogous words **Ant** antonyms **Con** contrasted words **See also explanatory notes facing page**

All of these words except the last designate also mental suffering. **Pain** commonly suggests sorrow (as for something lost or unattainable) <my craving to hear from her was at times a gnawing pain—Kenneth Roberts> **Ache** usually implies suffering that must be endured or longing not likely to be appeased <there was an ache in his heart like the farewell to a dear woman—Steinbeck> **Pang** suggests a sudden sharp access of a painful emotion <sharp pangs of envy>*<pangs of remorse>*<the next time I ran away just the same, and suffered the most ghastly pangs of fear—John Reed>*<statements ... made unhesitatingly, with no visible pangs of conscience—Sanders>*<Three presupposes the existence of mental agony and designates one of the recurrent spams that characterize the state of mind>*<fierce maternal passion ... was now bowing her still lower, in the throes of a bitter renunciation—Wharton>*<Twinge suggests less poignant than pang but often connotes compunction>*<twinges of conscience>*<too painfully preoccupied to feel a twinge of self-reproach at this undeserved praise—George Eliot>*<shot down his victims without shadow—Scott>*

2 in plural form pains *effort, exertion, trouble

**Ana** labor, toil, travail, *work: industriousness or industry, diligence, sedulousness, assiduousness (see corresponding adjectives at BUSY)

**pair n** *couple, brace, yoke

**palatable, appetite, savory, sapid, tasty, toothsome,** flavorsome, relishing mean agreeable or pleasant to the taste. **Palatable** is not emphatic in its implication of pleasantness; therefore it seldom suggests deliciousness and often, on the other hand, implies little more than acceptability <provide palatable meals for her family>*<the root, when properly cooked, was converted into a palatable and nutritious food—Prescott>*

The term is used frequently of things which are mentally digested <the rebuke was not palatable>*<I 'm afraid that my remarks have not been very palatable, but I can assure you that they were sincerely meant—Mackenzie>*

**Appetizing** implies a whetting of the appetite; it is applicable to the smell and appearance as well as to the taste of food <the appetizing odor of a roasting turkey>*<a convaalesce requires appetizing meals>*

In its extended use the word is applicable to things that stimulate a desire for more or an
eagerness to go further (an appetizing introduction to a subject) (the journalist with a nose for appetizing front-page tidbits—Zirato) Savory, also, is applied to foods that have an agreeable odor as well as taste, but it conveys definite implications of piquancy; it is therefore applied to highly seasoned dishes as contrasted with sweet or bland dishes (a bland meat sometimes needs a savory sauce) (a savory stuffing for the turkey) In extended use savory may suggest a pleasantly stimulating and agreeable quality (engaging books . . . neither autobiography, nor fiction, nor essays, but a savory mixture of all three—N. Y. Times) but more often than not it is used in negative construction or with or without implications (the conquest of the West . . . is not among the more savory chapters in American history—Agnew) Sapid is an uncommon and chiefly technical term that primarily applies to a substance able to stimulate taste receptors (assuming that the sapid substance . . . initiates the electrical depolarization of the taste cells—Beiderer) In general use it may imply a marked taste or flavor (a sapid dish) or in extended use one that is distinctly keen or exhilarating (a sapid and antisecptical quality of bright intelligence—Ellis) Tasty implies a marked taste, but it suggests in addition an appreciating quality (a tasty morsel) (a tasty cheese) (many trees, like the caju, which produce tasty fruits—P. E. James) (tasty ingredients for a good, breezy book—Barrett) Toothsome heightens the implication of agreeableness in palatable and may add the suggestion of tenderness or of daintiness (a toothsome dessert) (one of the most toothsome chicken dinners you'll ever munch—Gelston Hardy) Flavorsome usually suggests richness rather than sharpness of taste, and often implies fragrance as well as savor (flavorsome apricots) (incredibly flavorsome wild mushrooms from the forests—Davenport) Relishing stresses gusto in enjoyment (he found all this praise extremely relishing) (find ways in which the soldier's food could be made more relishing—Current Bigg) Ana *delightful, delicious, delectable, luscious: piquant, *pungent, spicy Ant unpalatable: distasteful palate *taste, relish, gusto, zest pale adj 1 Pale, pallid, ashen, ash, wan, livid mean devoid of natural or healthy color as applied to a complexion or deficient in vividness or intensity of hue as applied to a specific color. Pale is the least rich of these words in implications and connotations; it merely implies relative nearness to white and deficiency in depth and brilliance of coloring (his face grew pale) (the sea is a pale green in this light) Pallid adds to pale the suggestions of depriviation, rather than absence, of color and of an abnormal condition (as weakness or faintness, or intense weariness); thus, one may be naturally pale but a person made pale by illness would usually be called pallid (his pallid face reveals the strain he has been under) (trembling limbs and pallid lips—Shelley) (its little smoke, in pallid moonshine, died—Keats) Ashen and ashy definitely suggest not only the pale gray color of ashes but often, also, extreme pallor (as of the skin in death). A thing described as ashen or ashy may therefore be said to be deadly or ghastly pale (the skies they were ashen and sober—Poe) (the ash hue of age—Scott) (oft have I seen a timely-parted ghost, of ashen hue and presence—Shak) (Mr. Cruncher, who was all in a tremble, with an ashy and solemn visage—Dickens) Wan suggests the blanching associated with an unhealthy condition or waning vitality; it usually therefore denotes a sickly paleness (the blasted stars looked wan—Milton) (her poor wan face with its wistful, pitiful little smile—Hewlett) Livid basically means leaden-hued; it is chiefly used of things, especially of human faces that under the influence of something that distorts them have lost their normal coloring and have assumed a dull grayish tinge (he grew livid with rage) (in the greenish glass her own face looked far off like the livid face of a drowned corpse at the bottom of a pool—Conrad) The word is also applied to various dull or dun colors when the hue is barely apparent (the livid red of the sun seen through a heavy fog) (the livid yellow of a stormy sky) (his trembling lips are livid blue—Scott) Ana *ghastly, macabre: cadaverous, *haggard, worn 2 Pale, anemic, bloodless are comparable in their extended senses when they are applied to things and mean weak and thin in substance or in vital qualities, as though drained of blood. Pale stresses deficiency in qualities necessary to give a thing its true color or character. Sometimes it connotes lack of vigor, force, or energy (the French . . . shake in their fear and with pale policy seek to divert the English purposes—Shak) (does pale little studies that are as innocuous as his earlier work was adventurous—Coates) but more often it implies inadequacy or failure to measure up to the requirements of a type or standard (her whole existence was too pale, too inadequate in some way—too unvital—Farrell) Anemic in its extended applications to things implies deficiency in the elements that make for vigor or richness, especially intellectual or spiritual vigor or richness (the African Negro has . . . joy of life, love of color, keen senses, beautiful voice, and ear for music—contributions that . . . might one day prove a tonic to an anemic and artless America—Zangwill) (not even a respectable vocabulary of indecency to draw upon in support of our anemic cussing—Whicher) Bloodless stresses the absence of qualities necessary to life or lifelikeness (as vitality, warmth, color, and human emotion) (now if I make this sound bloodless, I am exaggerating a bit—even an old habit is livened once in a while with color—Mailer) (books are good enough in their own way, but they are a mighty bloodless substitute for life—Stevenson) Ana *insipid, wishy-washy, inane, jejune: ineffective, ineffectual pall clov, surfeit, *satiate, sate, glut, gorge palliate, extenuate, gloze, gloss, whitewash, whiten are comparable when they mean to give a specially fine appearance to what is base, evil, or erroneous. Palliate may stress the concealing or cloaking or the condoning of the enormity of a crime or offense (retracing thus his frolics (‘tis a name that palliates deeds of folly and of shame)—Cowper) (we have not endeavored to conceal or even palliate his errors—Lockhart) (we cannot . . . explain away this deliberate act as due to the garrulity of age, or accept the other excuses with which his admirers have sought to palliate it—L. P. Smith) The word also is used especially in reference to other than moral evils in the sense of to disguise the true nature or extent of so as to soften the bad effects (minds which are keener and wills which are stronger than the average do not rest in "quiet desperation" palliated by illusion—Krutch) (re- sort to coercive force and suppression of civil liberties are readily palliated . . . when the cry is raised that "law and order" are threatened—Dewey) Extenuate (see also Whit) implies the aim to lessen (as by excuses or explanations) the seriousness or magnitude of some crime, offense, or guilt (when you shall these unlucky deeds relate, speak of me as I am; nothing extenuate, nor set down aught in malice—Shak) (she did not extenuate, she rather emphasized, the criminality of Catiline and his confederates—Froude) But the term is often used in the sense of to make excuses for (had never forgiven Cromwell the execution of the martyr Charles; and to extenuate the conduct of the
great Roundhead captain, was to make Mrs. Doria despire and detest you—Meredith) he permits himself...costly Havana cigars and an electric typewriter. There are circumstances that extenuate both indulgences—Kahn> Gloze and gloss often followed by over, imply an aim to veil by more or less light dissembling (as by specious comments or by flattering talk) the true harshness, unpleasantness, or disagreeableness of something; often, the words suggest a representation of what is actually disagreeable as much or less agreeable or as not distinctly unpleasant; gloze, however, is usually more derogatory than gloss which is a relatively neutral word (the explorer has been endowed in glozing over the hardships he endured) (not to wish to gloss over the fragmentary state of our present knowledge—Edington) (with the tongue of flattery glozing deeds which God and Truth condemn—Whittier) (we glozed our fraud by conducting their necessary war purely and cheaply—T. E. Lawrence) (believed in youth and did not gloze the unpleasant consequences of age—MacNeice) Whitewash, and less often whitlen, imply an attempt to cover up (as a crime, a defect or fault, or a person's guilt) by some such means as a superficial investigation, or a perfunctory trial, or a special report that leads to a seeming acquittal or exonerating or that gives the person or persons accused an appearance of innocence or blamelessness (a poet and an author will go so far in whitewashing a munificent tyrant—Walpole) (by selecting the evidence any society may be relatively blackened, and any other society relatively whitened—Spencer) (his object in attempting to whitewash the evildoers was not so clear—Crofts) Ana mitigate, alleviate, light (see RELIEVE): condone; *excuse: *moderate, qualify, temper: cloak, mask, *disguise, dissemble, camouflage pallid *pale, ashen, ashy, wan, livid palpable 1 *perceptible, sensible, tangible, appreciable, ponderable Ana *apparent, ostensible, seeming: believable, credible, colorable, *plausible Ant *insensible 2 plain, clear, *evident, apparent, manifest, patent, obvious, distinct Ana *sure, certain, positive: *noticeable, remarkable, striking, arresting Ant impalpable —Con *doubtful, dubious, questionable, problematic palpate vb *touch, feel, handle, paw palpation see under palpate at TOUCH vb palpitate beat, throb, *pulsate, pulse Ana vibrate, oscillate, fluctuate, *swing, sway palpitation beat, throb, pulsation, pulse (see under PULSATE vb) Ana vibration, oscillation, fluctuation, swinging, swaying (see corresponding verbs at SWING) palter *lie, varietate, equivocate, fib Ana evade, elude, *escape: *trifle, daily pathology trifling, trivial, *petty, puny, measly, picayunish, picayune Ana *contemptible, despicable, sorry, scurrty, cheap, beggarly, shabby: abject, ignoble, *mean: *base, low, vile panopter *indulge, humor, spoil, baby, Mollycoddle pamper *gratify, tickle, regale, *please: fondle, pet, cosset, *caress, dandle Ant chasten pandect *compendium, syllabus, digest, survey, sketch, précis, aperçu pandemonium uproar, *din, hubbub, babble, hubbub, clamor, racket pander *cater, purvey Ana truckle, toady, *fawn, cringe: gratify, tickle, regale, *please panegyric tribute, eulogy, *encomium, citation Ana commendation, applauding or applause, complimenting or compliment (see corresponding verbs at COMMEND): acclaiming or acclaim, lauding, praising or praise, extolling or extollation (see corresponding verbs at PRAISE) pang *pain, ache, throe, twinge, stitch Ana agony, *distress, suffering: anguish, *sorrow, grief, heartache, heartbreak: torturing or torture, tormenting or torment (see AFFLICTION) panic terror, horror, trepidation, consternation, dismay, alarm, fright, dread, *fear Ana agitation, upsetting or upset, perturbation, disquieting or disquiet, disobeying or discomposing (see corresponding verbs at DISCOMPOSE) Con *confidence, assurance, self-possession, aplomb: *equanimity, composure, sangfroid pant aspire, *aim Ana thirst, hunger, *long, yearn, pine: crave, covet, *desire, wish, want pap *food, aliment, pabulum, nutriment, nourishment, sustenance paper n 1 Paper, instrument, document all mean a writing (often typed, sometimes printed) that is of value to its owner or to others who come after him as a source of information or proof of a right, contention, or claim. Paper is the most general term, applicable to such writing (as a letter, deed, certificate, or writ) filed away for future use or reference (state papers) (a peculiar difficulty I have experienced in dealing with Lord Macaulay's private papers—G. O. Trevelyan) (it was not until I was forty that my father put into my hands a few old family papers which furnished clues to an investigation of my more remote ancestry—Ellis) Instrument is a legal term applicable to a paper (as a deed, a writ, a will, or a contract) that is made and executed according to the terms of the law, as concrete evidence of some legally defined action (as a transfer of property, the enforcement of a judgment, one's decisions as to who shall inherit one's property, or the terms of an agreement) (set up a confederacy based upon a written instrument—Nevins) Document (see also DOCUMENT 1) applies to a legal instrument or to an original or authentic copy of a letter, a record, or other paper that may be used as a source of information, evidence, or proof (her letters I sent back except those of her correspondents, or proof of their quarrelling correspondence, and those, being documents, are placed in the hands of a third person—Byron) (the Declaration of Independence stands out as one of the vital documents of history—Canfield & Wilder) 2 article, *essay, theme, composition par n norm, *average, mean, median par adj mean, median, average (see under AVERAGE n) parable *allegory, myth, fable parade n 1 *display, array, pomp Ana showiness, ostentatiousness or ostentation, pretentiousness (see corresponding adjectives at SHOWY) 2 *procession, cavalcade, cortège, motorcade parade vb flaunt, expose, display, exhibit, *show Ana *reveal, disclose, divulge: *declare, proclaim, publish, advertise: vaunt, *boast, brag, gasconade Con cloak, mask, *disguise, dissemble, camouflage paradox, antinomy, anomaly are comparable terms that involve the idea of expressing or revealing an inner or inherent contradiction and are therefore not always clearly distinguished. A paradox is primarily a statement or proposition which contains a contradiction yet which, absurd as it seems to be, may still be true and in accordance with the facts and common sense (the perfectly bred man is...
born, not bred, if the paradox may be permitted—Brownell. By extension paragraph may apply to something which is known to exist, yet which when described or put in words seems incredible because it involves a logical contradiction <the old will perennially become new at the hand of genius. That is the paradox of art—Lowes> (the colon ... is a paradox—a well-known secret agent—Kohler) An antinomy, in philosophical use, is a contradiction among two or more terms, principles, or conclusions, both of which are held to be true but are mutually exclusive and irreconcilable. An antinomy, in the opinion of Kant both can be accepted as rules regulative of experience. In more general use the term is often applied to one thing that contradicts another thing and is irreconcilable with it (form and expression ... should stand toward one another not as clashing antinomies but as reconciled opposites—Babbit) or it may apply to a conflict (as of principles, beliefs, forces, tendencies, or aspirations) that is irresolvable in the light of present knowledge (a mind that is not naturally analytical, and conscious of the antinomies of existence—Amer. Speech) (every dogma is but one side of an inevitable antinomy—Cushing) (the antinomy between contented security and adventure for gain, between equilibrant justice and the justice of rewards—an antinomy whose resolution calls for a reasonable compromise and not a clear-cut choice—Aron) An anomaly is something that is contrary to what it should be. For example, it may be an exception or a contradiction to a rule; it may be a freak, a monster, a sport, or a contradiction to a type; it may be an anachronism or solemnism, irreconcilable with its surroundings or conditions; it may be an action, a practice, or a mood, that is in effect a denial of what one believes or teaches (there is no greater anomaly in nature than a bird that cannot fly—Darwin) (the anomaly of a war fought to preserve freedom by a people enslaved by prejudice—Quentin Anderson) (the political world must keep pace with the scientific world. A security league, in an age of flight, is an anomaly—E. B. White)

paragon n Paragon, apotheosis, nonpareil, onesuch are comparable when they mean a person or thing of consummate quality or transcendent excellence in its kind. Paragon distinctively implies supremacym and incomparability (an angel! or, if not, an earthly paragon—Shak.) (Mill's book is a paragon of expository writing—Macy) (neither the violent demagogue his enemies thought, nor the paragon his friends esteemed him—Bonham) Apotheosis basically applies to a raising from an earthly to a divine or ideal status (Wagner believed that Beethoven's Seventh Symphony ... was an apotheosis of the dance—Ellis) but it may be indistinguishable from paragon in denoting one that is the extreme and usually the highest of its kind (here all is spotless grace, ethereal delicacy ... the very apotheosis of womanhood—Jameson) (in the Third Reich the nation-state found both its zenith and its nadir, its apotheosis and its Black Mass—Deutscher) Nonpareil and onesuch, like paragon imply the absence of a rival or equal, but they sometimes impute uniqueness more strongly than excellence (thou art the best o’ the cutthroats: yet he’s good that did the like for Fleance: if thou didst it, thou art the nonpareil—Shak.) (it was the strapping leader, the nonpareil of newspaper-dom—Swabanerg) (a nonpareil at her dimly lit specialties, but ... certainly no Fitzgerald—Hentoff) (the Eiffel Tower, the mighty onesuch of the Paris exposition—Kobler) (for more than fifty years a political boss, a political onesuch, and a general nuisance to the forces of political progress—New Yorker)

parallel adj *like, alike, similar, analogous, comparable, akin, uniform, identical Ana *same, identical, equal, equivalent: corresponding, correlative (see reciprocal)

parallel n 1 *comparison, contrast, antithesis, collation Ana *likeness, similarity, resemblance, similitude Con *dissimilarity, unlikeliness, difference, divergence, diverseness

2 Parallel, counterpart, analogue, correlate are comparable when they denote a person or thing that corresponds in essentials to another person or thing, or closely resembles
the latter in the points under consideration. Parallel is especially appropriate when the two things compared are so like each other that their lack of divergence suggests two parallel lines; the term is often used in negative expressions (we shall seek in vain a parallel for this situation) (it is hard to find a parallel for this mode of procedure) (none but thyself can be thy parallel—PoPE) Sometimes, especially when actual comparison is implied, the word suggests that the two things follow a similar course, order, or line of development (cultural parallels found in the two hemispheres—R. W. Murray) (many interesting parallels are drawn with the historical plays of Shakespeare—Times Lit. Sup.) Counterpart often suggests a complementary and sometimes an obverse relationship (the two halves of a globe are counterparts of each other) (not an elaboration of Romanticism, but rather a counterpart to it, a second flood of the same tide—Edmund Wilson) More commonly, however, the word implies a duplication, especially in another sphere, or age, or language (synthetic chemistry has produced many a drug or perfume that has no counterpart in nature) (he saw that there was no mood of the mind that had not its counterpart in the sensuous life—Wilde) (French big businessmen and reactionaries politicians have the support of their counterparts in the U.S.—Gorell) Analogue usually implies a more remote likeness than the preceding words and suggests comparison with something familiar and tangible for the sake of clarifying an explanation or enforcing an argument. Like counterpart, it often involves reference to something in another sphere, or order, or genus (the gall in fishes is an analogue of the lung in quadrupeds) (the deepest and simplest reports of man’s trouble have always been told in animal analogues—Morley) (civilization is . . . the process by which primitive packs are transformed into an analogue, crude and mechanical, of the social insects’ organic communities—Huxley) Correlate retains its primary implication of correspondence, but does not retain that of a complementary relationship. A thing which is a correlate of another is what corresponds to it from another point of view or in a different order of viewing (the scientist asks what is the physical correlate of the rainbow) (words are the mental correlates of direct experience—Weaver) (fear persisted, and with it persisted an animosity toward the sister. Undoubtedly this is the psychological correlate of the incest taboo—Dollard)

**paralyze** *daze, stun, bemuse, stupefy, benumb, petrify* 
\*dismay, daunt, appall, horrify: disable, cripple, usually physical but sometimes social or intellectual, from reference to something in another sphere, or order, or genus of wealth, power, or influence in order to derive personal advantage or who is useless and unnecessary to society (the ones who evade the earth and live upon the others in some way they have devised. They are the parasites, and they are the despised—Buck) (a court society ridden with parasites) (as our present society disintegrates, this démodé figure will become clearer; the Bohemian, the outsider, the parasite, the rat—one of those figures which have at present no function either in a warring or peaceful world—Forster) (the poorer citizens were little more than parasites, fed with free state bread, amused by free state shows—Buchan) SycoPhant applies to one who clings to a person of wealth, power, or influence and wins or tries to win his favor by fawning, flattery, or adulation (a man who rose in this world because he curried favor, a sycophant—Kenneth Roberts) (sycophants who kept him from wholesome contact with reality, who played upon his overweening conceit and confirmed him in his persecutonal manias—Overstreet) Favorite applies to a close associate or intimate of a king or noble who is unduly favored by him, especially with power; it may suggest parasitism or sycophancy on the part of the one favored and often connotes the exerting of undue or improper influence (huge grants of land to court favorites—W. C. Ford) (reduced to the ranks every officer who had a good record and appointed scoundrel. favorites of his own in their places—Graves) (Pharaoh’s family and his favorites—J. E. M. White) Toady, often interchangeable with sycophant, stresses more the servility and snobbery of the social climber (he preens himself in the velvet coat, he spies out the land and sees that the Dowager is “the one”; he becomes the perfect toady—Stevie Smith) (this induced a sharp distaste for the flagrant political plunder, the obscene scramble for the loaves and fishes by the spoilsmen and their toadies—Sidney Warren) Lickspittle and bootlicker are interchangeable in common speech with sycophant and toady, implying, however, even stronger contemptibleness (characterized those who disagreed as licksplittles and toadies of official whiffy—Asahel Bush) (a ‘lickspittle humility that went beyond flattery—Moorehead) (its principal characters were stupid and bemused commanders, or vicious bootlickers tainted with homosexuality—Sutton) Hanger-on applies to someone who is regarded, usually contemptuously, as adhering to or depending unduly on another especially for favors (there were the hangers-on who might be called domestics by inheritance—Ybarra) (a hanger-on at Court, waiting for the preferment that somehow eluded him—Times Lit. Sup.) (those rather hangers-on than friends, whom he treated with the cynical contempt that they deserved—Graves) (Leech stresses the persistence of clinging to or bleeding another for one’s own advantage (hatred for the freeloader or deadbeat. Yet, as a student of humanity, he tolerated these leeches—Maule & Cane) (leeches: hateful parasites feeding up on the blood of pests—Robertson Davies) (Sponge and sponger stress a parasitic laziness, dependence, and indifference to the discomforts caused and usually a certain pettiness and constant regard for opportunities to cadge (all social sponges; all satellites of the court; all beggars of the marketplace—Drummond) (a girl whose disappointment with the world has made her the prey of an unsuccessful crook and sponger—Times Lit. Sup.)

**ana** fawner, cringer, truckler (see corresponding verbs at FAWN)

**parboil** *boil, seethe, simmer, stew* 
\*bundle, bunch, pack, package, packet, bale

**parcel** 1 part, portion, piece, detail, member, division, section, segment, sector, fraction, fragment 2 *bundle, bunch, pack, package, packet, bale* 3 *group, cluster, bunch, lot*

**ana** analogous words  **Ant** antonyms  **Con** contrasted words See also explanatory notes facing page
parcel vb *apportion, portion, ration, prorate
Ana *allot, assign, allocate, apportion: *grant, accord, award
parch *dry, desiccate, dehydrate, bake
Ana see, scorch, char, *burn: shrivel, wizen, *wither
pardon n Pardon, amnesty, absolutio in their legal and ecclesiastical senses mean a remission of penalty or punishment. Pardon, which is the comprehensive term, is often ambiguous; it denotes a release not from guilt but from the penalty imposed for a transgression of secular or spiritual law. Thus in civil and military affairs a pardon usually implies a release from prison, or from the payment of a fine, or from a sentence of death, and permission to go scot free, though not acquitted, but the term may suggest as a cause either executive clemency or the undoing of a judicial wrong. When a pardon is extended to an entire class (as an insurgent group) or to an entire community, it is called an amnesty (*a general amnesty and liberty of conscience were promised to parliament by Charles II in the Declaration of Breda (1660) >Amnesty often suggests not only that past offenses will go unpunished, but that they will be forgotten. When, in ecclesiastical use and especially in the use of the Roman Catholic Church, a pardon is extended for sins confessed and atoned for according to the laws of the Church, it is specifically called absolutio when it implies that the eternal punishment for sin has been remitted in the sacrament of penance.
pardon vb forgive, remit, *excuse, condone
Ana *free, release, liberate: acquit, absolve, *exculpate
Ant punish —Con *penalize, fine, amerce: discipline, correct, chasten, castigate, chastise (see PUNISH)
pardonable n *venial
pare peel, *skin, decorticate, flay
pariah *outcast, castaway, derelict, reprobate, untouchable
parley treat, negotiate, *confere, commune, consult, advise
Ana *discuss, debate, dispute, argue, agitate: converse, talk, *speak
parochial *insular, provincial, local, small-town
Ana circumscribed, restricted, limited, confined (see LIMIT vb): narrow, narrow-minded, *illiberal, intolerant, hidebound, bigoted
Ant catholic —Con *universal, cosmopolitan, cosmic
parody n travesty, *caricature, burlesque
Ana skit, squib, lampoon, *libel
parody vb travesty, caricature, burlesque (see under CARICATURE n)
paroxysm spasm, convulsion, *fit, attack, access, accession
parry *dodge, shirk, sidestep, duck, fence, malinger
Ana ward, avert, *prevent, preclude: forestall, anticipate (see PREVENT): elude, evade, avoid, shun (see ESCAPE)
parsimonious niggardly, penurious, *stingy, close, close-fisted, tight, tightfisted, miserly, cheeseparing, penny-pinching
Ana avare, *covetous, grasping, greedy: *sparing, frugal: *mean, ignoble, sordid, abject
Ant prodigal —Con *profuse, lavish: *liberal, munificent, bountiful, bounteous, openhanded, generous
part n Part, portion, piece, detail, member, division, section, segment, sector, fraction, fragment, parcel are comparable when they mean something which is less than the whole but which actually is or is considered as if apart from the rest of the whole. Part is the most comprehensive of these terms; it may be used in place of any of the succeeding words in this group or even in place of such words as element, component, or constituent (see ELEMENT) (all but parts of one stupendous whole—Pope) He spent part of his life in China >a large part of the estate went to the elder son >the cup was broken into three parts >the better part of valor is discretion—Shak. Its basic assumption is that the social whole has greater worth and significance than its individual parts—Huxley> Portion, although it denotes a part of a whole, does not always presuppose a compact or integral whole; it may suggest a whole that comprises all of an existing or a possible stock or store without any connotation of its assemblage (he is a portion of the loveliness which once he made more lovely—Shelley) >she dreaded . . . taking from the small sum of peace they had in the world, adding to the portion of their unhappiness—Malamud> But portion (see also FATE) is preferred to part when there is the intent to imply determination of amount or quantity or assignment or allotment, especially of a share (divide a pie into six equal portions) >a portion of each day was given to this artistic labor—Hudson> (when the plant was set, a portion of water, nicely calculated as to quantity, ran down a pipe and was deposited at the plant roots—Anderson> Piece applies to a separate or detached part of a whole; thus, a piece of bread is a part of a larger whole such as a loaf; a piece of clothing is a length cut from a bolt, a smaller length left after the larger part of that piece has been used, or a bit that serves as a swatch or sample >break a stick of candy into pieces >ask for a small piece of the cake> But piece so stresses the implication of independence that the term may come close to item and then is often applied to a thing that is relatively complete in itself, and has reference to a whole only as it presupposes a mass from which it was taken, a collection of similar or related things, especially as produced by one person, one machine, or one factory (the red-hot piece of iron upon the blacksmith's anvil) >each piece of furniture has been freshly polished >a piece of poetry >she had learned . . . that there really was more than one man in the world—the piece of knowledge that more than anything else divides women from girls—Wouk> Detail (see also ITEM) applies to a part chiefly when the presupposed whole is a plan or design, or represents the working out of a plan or design; in this sense the term is used largely in the arts of painting, sculpture, and architecture, and often denotes a small but important part or feature (produce a detail of a painting) (the sculptor's students were set to work, each modeling a detail of the Venus of Milo) >this blueprint shows the details of the façade >she had her plan clearly in her head, with every detail as distinct as though the scheme had already been carried through—Gibbons> Member applies to a part that constitutes one of the units of which a body (as a human or animal body, a social or legislative body, or a constructed or manufactured body) is comprised; the term, though it usually implies close association with the body under consideration, also usually implies separability of the unit in thought or in fact (the legs, arms, and head are often specifically regarded as members of the human body) >the saddle seat is a distinctive member of a Windsor chair> (the flying buttress is an important architectural member of most of the great medieval Gothic cathedrals) >members of Congress> (the club has 500 members) >a lolling, impudent tongue—a truly unruly member—Banfield> (society is a joint-stock company, in which the members agree, for the better securing of his bread to each shareholder, to surrender the liberty and culture of the eater—Emerson> Division and section apply to a distinct, often a detached, part formed by or as if by cutting or dividing. The terms are often used interchangeably, but division is usually applied to larger parts than is section; thus, one would refer to the divisions A colon (:) separates groups of words discriminated. A nuanced description of words and their usages is provided, emphasizing their context and usage in different scenarios.

pass vb Pass, pass away, expire mean to move or come to a termination or end. Pass and pass away imply gradual or gentle movement to another state or condition; they often imply a transition from life to death but they may suggest a transition from any one state or time or season to another (all that lives must die, passing through nature to eternity—Shak.) (when those conditions have passed away and history returns to normal—W. P. Webb) (but yet I know, where'er I go, that there has passed away a glory from the earth—Wordsworth) (the strangeness of his life passed, and he began to feel what this city was—Buck.)

Expire suggests a movement that seems like the slipping and gliding away of something that moves silently or without notice; the word applies particularly to a period of time, either in reference only to itself or in reference to something that should have been accomplished within that time (became burdensome to him as time elapsed and political conditions changed—Malone) (all prophecies make sad reading when their term has elapsed—Krutich) (the period for the payment of the debt had now elapsed) Expire basically means to breathe one's last breath and hence to die; but it comprehends the extended senses as well as the ordinary sense of die, and is used in reference to many things that come to an end as if by death (the flame of the candle suddenly expired) (the society expired after a single meeting) (in the expiring, diffused twilight—Conrad) (suddenly their whispers expired—Bennett)

It is often used with this underlying notion in reference to a period of time (as stated in a bond, a note, a promise, an agreement, a patent, or a lease) which has come to an end (your note, which was due on June 24, has now expired) (the two years of grace which the bank gave the city will soon expire) (when this copyright expires, it cannot be renewed, unless there is a new edition of the book) (Antony regarded the triumvirate as having expired on the last day of 33 B.C. and did not wish it renewed—Buchan)

pass n passage, way, route, course, artery

pass n *juncture, exigency, emergency, contingency, pinch, strait, crisis

passage 1 pass, *way, route, course, artery
2 Passage, passageway, corridor, hall, hallway, gallery, arcade, cloister, aisle, ambulatory designate a typically long narrow way connecting parts of a building or affording access to a particular room or section in it. Passage (see also WAY 1) and passageway are the comprehensive terms, usually interchangeable with any of the others. A corridor is a passageway flanked on one or both sides by rooms, apartments, compartments, or offices or leading from one part of a building to another. Hall can be applied to a corridor or to a room that serves as an entrance to a house, but hallway is used only of the former. A gallery is a corridor having a continuous row of windows; it may be a part of the building or form an enclosed veranda. An arcade is an arched and covered passageway, usually between rows of shops but, sometimes, between the fronts of a row of shops and the street or an open court. A cloister is a similar structure in a monastery or in a building imitating monastic architecture, but it runs along one or more sides of an open court or patio, and is arcaded or colonnaded on the outer side. An aisle is, basically, not a passageway but a part of a church or other building divided from the central part, or nave, by a row of columns or piers. The term is also applied to a passage flanked by rows of seats (as in an auditorium, a theater, a railway car,
passageway 597 pathos

or a bus). An ambulatory is a passageway through which one may walk; it is specifically applied to the cloister of a monastery, and to the curved passageway between the choir of a church and the chapels of an apse.

passageway *passage, corridor, hall, hallway, gallery, arcade, cloister, aisle, ambulatory

pass away *pass, elapse, expire

passing adj *transient, transitory, ephemeral, momentary, passage, corridor, hall, hallway, gallery, passageway

passion n 1 suffering, agony, dolor, *distress, misery

Passion which cause or in the pursuit of the end <with all the ardor or enthusiasm for a cause or end and coupled with Inge >they are both weary of politics today, still provides the pupil with something concrete to admire, to

enthusiasm channel, but he stimulates ardor; thus, a teacher may stimulate without a clearly envisioned goal, but

nearly

enthusiasm always implies an objective, a cause, or an object of devotion; thus, a teacher may stimulate without a hint from the context the nature of the emotion remains unknown <Knipe also knew that passion was powerful, heady stuff, and must be prudently dispensed— Dah!>

Passion (see also FEELING, DESIRE) may specifically designate intense erotic love, or often lust, or it may designate violent rage <she flew into a passion >I am very sorry, good Horatio, that to Laertes I forgot myself . . . but, sure, the bravery of his grief did put me into a towering passion—Shak.>

Fervor and ardor both imply the kindling of emotion to a high degree of heat, but fervor more often suggests a steady glow or burning and ardor a restless or leaping flame. Fervor is associated especially with matters (as emotions that express themselves in prayer, contemplation, or devotion) involving persistent warmth; ardor, with those (as emotions that express themselves in eager longings, or zealous efforts) that suggest the violence and sometimes the transitoriness or wavering of flames <the fervor of a nun >the ardor of a missionary >exhort with fervor >dampened his ardor >all prayed and hunted quail with equal fervor and died . . . at an advanced age—Styron >in the prints of Harunobu there is an intense sympathy with youth, with its shyness, its tumultuous aridors—Binyon>

Enthusiasm often comes very close to ardor, but it may differ in its emphasis on the rational grounds for the emotion, such as thoroughgoing admiration for a person, place, or thing, or the conviction of the worthiness of a cause or end. Aridors may suggest aspiration without a clearly envisioned goal, but enthusiasm nearly always implies an objective, a cause, or an object of devotion; thus, a teacher may stimulate ardor in a pupil without necessarily directing the latter's emotion into a definite channel, but he stimulates enthusiasm only when he provides the pupil with something concrete to admire, to follow, or to fight for <he showed in this cause not only the enthusiasm of an idealist, but the sagacity of a practical leader—Inge >they are both weary of politics today, still radicals out of habit, but without enthusiasm and without a cause—Mailer>

Zeal retains from earlier senses a suggestion of a goading or driving passion expressed as great ardor or enthusiasm for a cause or end and coupled with energetic and unflagging activity in the service of the cause or in the pursuit of the end <with all the zeal which young and fiery converts feel—Byron >it took the Frisian movement about twenty years to lose the passion of its early zeal—Huxley >worked in almost silent zeal and entire absorption—Buck>

Ana *ecstasy, rapture, transport: *anger, rage, fury, wrath: eroticism, amorousness (see corresponding adjectives at EROTIC)

passionate *impassioned, ardent, fervent, fervid, perverted

Ana *intense, vehement, fierce, violent: impetuous, headlong, *precipitate, abrupt: excited, quickened, stimulated (see PROVOKE)

passive *inactive, inert, idle, supine

Ana *impassive, phlegmatic, stolid, apathetic

ana active —Con live, operative, dynamic (see ACTIVE)

paste n *dough, batter

pastoral *rural, rustic, bucolic

pasture vb graze, *feed, nourish

pat adj *seasonable, timely, well-timed, opportune

Ana apt, happy, felicitous, appropriate, fitting (see FIT adj): pertinent, apposite, apropos, applicable (see RELEVANT)

patch vb *mend, repair, rebuild

Ana emend, remedy, redress, amend, *correct: fix, *adjust, regulate

patent *evident, manifest, distinct, obvious, apparent, palpable, plain, clear

Ana *noticeable, conspicuous, salient, prominent: *flagrant, glaring, gross, rank

Ant latent —Con *imperceptible, insensible, impalpable: hidden, concealed, secreted (see HIDE vb)

pathetic poignant, affecting, *moving, touching, impressive

Ana *pitiful, piteous, pitiable: plaintive, *melancholy, tenderness—J. R. Green>

the keenest sarcasm to the trick employed (as by a writer, speaker, or artist) in seeking to produce such an effect <he passed without an effort from the most solemn appeal to the gayest railery, from the keenest sarcasm to the tenderest pathos—J. R. Green>

"My poor children, what had I ever done to you that would drive you to such a step?" The touch of pathos was all that Jane needed to stiffen her—Mary Austin>

Poignancy is sometimes preferred by literary and art critics to pathos because it carries no suggestion of artificiality and centers the attention on the genuineness of the thing's emotional quality and of the emotions it arouses; it also specifically implies a power to pierce the mind or heart so that the reader, hearer, or observer feels acutely as well as with aesthetic pleasure the emotion aroused whether it be pity or sorrow or another overwhelming emotion <the most famous of the women-poets of Japan, whose verse expresses with peculiar poignancy a sense of the glory of beauty and the pathos of it—Binyon >felt the poignancy of the kakapo's plight and had somehow managed to slip in this intimation of pity for a fellow creature—Tilford>

Pathos is often applied to a false or pretentious
pathos and typically implies a maudlin sentimentality so detached from reality as to arouse disgust at contempt rather than the softer emotions that it is intended to elicit (the poet seeks to render soulfully the blubering of a happy idiot, and falls into bathos—Clariță) But bathos may also apply to a silly and artificially lugubrious reaction to something emotionally appealing that is akin to self-pity (the voice of God, even at second-hand, should do more than make us sniff moistly in self-indulgent bathos—Hatch)

patience, long-suffering, longanimity, forbearance, resignation can all mean the power to endure or a capacity for enduring without complaint something which is disagreeable or requires effort. Patience stresses calmness or composure, not only under suffering or under provocation, but in awaiting an outcome that seems unduly or inordinately delayed, or in performing a task that makes severe demands upon one's attention <upon the heat and flame of passion—Cronin> <upon the heat and flame of passion—Hooker> <he gathered . . . that he had been either a man of saintly patience, a masochist or a deaf-mute—Theodore Sturgeon> <bred to patience . . . she had cultivated and perfected a vast cowlike calm—Pynchon> Long-suffering and longanimity imply extraordinary patience under provocation or trial. The former sometimes also suggests undue meekness or submissiveness <it shows much long-suffering in you to put up with him, and keep him in your employ—Hardy> <the long-suffering type on whose bosom repentant tears always eventually fall—Warren> The latter term more often than the former names a virtue, and so is chiefly found in abstract use <in Isaac such simplicity, such longanimity in Jacob—Hooker> <the second window was to be devoted to longanimity, symbolized . . . by the passion-flower and the heavenly crown for long-suffering—Kil-lackey> Forbearance (see also under forbearing) adds to long-suffering the implication of restraint in the expression of one's feelings or in exacting punishment or one's due; it therefore often suggests toleration, for the sake of peace, of something that merits censure or castigation <my lord Kew has acted with great forbearance and under the most brutal provocation—Thackeray> Resignation implies a submission to suffering or evil or an acceptance of it because it must be endured or cannot be escaped; it sometimes connotes patience arising from submission to what is believed to be the Divine Will, but often it implies a stoical or fatalistic rather than a religious attitude <resignation superadds to patience a submissive disposition . . . ; it acknowledges both the power and the right of a superior to afflict—Cogan> <a last-ditch fighter by nature . . . humspheric resignation stems from the heart and flamel-y suspicious—Wouk> <for a modern American or Englishman, waiting is a psychological torture. An Indian accepts the blank hours with resignation—Huxley>

Ana perseverance, persistence (see corresponding verbs at persevere); fortitude, backbone, pluck, grit, sand, guts; *equanimity, composure

Ant impatience

patois *dialect, vernacular, lingue, jargon, cant, argot, slang

patrician *gentleman, aristocrat

patrimony *heritage, inheritance, birthright

Ana supporter, upholster, champion (see corresponding verbs at support); benefactor, contributor (compare benefaction, contribution, at donation); protector, defender (see corresponding verbs at defend)

Ant client: protégé

patter vb chatter, prate, *chat, gab, prattle, babble, gabble, jabber, gibber

pattern n 1 exemplar, example, *model, ideal, standard, beau ideal, mirror

Ana *paragon, apotheosis

2 *figure, design, motif, device

Ana *form, figure, shape, configuration, configuration

paunch *abdomen, belly, stomach, gut

pause n Pause, recess, repose, lull, intermission are comparable when they mean a temporary cessation especially in action, in activity, or in movement. Pause, though it carries an implication of expected resumption, stresses the fact of stopping without indicating, in itself, the duration or the cause of the stop. The term is often applied to such a letup in utterance as that marked in printing by a period or a caesura or as that caused by an interruption, by hesitation, or by awaiting an answer, but it may quite as readily be applied to a temporary cessation of activity (as for play, for sleep, or for relaxation) <there was a short pause before he resumed speaking> (between the dark and the daylight . . . comes a pause in the day's occupations, that is known as the Children's Hour—Longfellow> <there is no pause in the invention of new and appalling weapons—Grenville Clark> Recess implies a temporary cessation of work; usually it applies to an interval granted (as to legislators or students) for the sake of relaxation or diversion <the smaller boys and girls are granted a recess of ten minutes each morning> <Parliament is now in recess> <the justices adjourned for their summer recess—N. Y. Times> Respite implies a time of relief (as from labor, suffering, or war) or of delay (as before sentencing or executing) <there will be no respite for such workers for the duration of the war> <a battle that seemed to be without respite and without end—Röld-vaag> <a body of people . . . thrown together for a week or so without the possibility of respite or escape—Lowes>

Lull implies a temporary cessation or marked decline of activity (as in the course of a storm, in business, or in military activity between two offensives) <after a lull the storm turned inland with increased fury> <running full tilt in most of its departments following a summer lull—Eri-son> <there was a lull in the noises of insects as if they . . . were making a devotional pause—Crane> Intermission basically implies a break in continuity but comes close to lull in stressing one caused by a temporary cessation (as of an action, a process, or a proceeding). However, its application is usually quite different since it usually suggests a pause available for some new or special activity (as for rest or recuperation) <the habit of stern thrift, begun in 1870 and practiced without any intermission till . . . 1897—Bennett> <the attack occurred after a few pays' intermission> <the attack occurred after a few pays' intermission from such melancholy reflections—Burke> <several persons gathered around to talk during the intermission between the acts of a play>

Ana interruption, gap, interval, *break, interim: stopping or stop, ceasing or cessation (see corresponding verbs at stop)

paw vb *touch, feel, palpate, handle

paw n hostage, *pledge, earnest, token

pay vb Pay, compensate, remunerate, satisfy, reimburse, indemnify, repay, recompense are comparable when they mean to give money or an equivalent in return for something. Pay is the ordinary term when the giving or furnishing of money to discharge an obligation (as for services rendered or goods delivered) is implied <pays good wages to his gardener> <pay ten dollars for a hat> <taxes are what we pay for civilized society—Justice Holmes> <could once more meet his running expenses, and with pinching and scrimping, even pay off some outstanding bills—Malamud> When, in extended use, pay does not imply A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
the actual giving of money, the term is often employed purely as a figure of speech (nothing can pay him for his pains) (the hard knowledge of the hipster that you pay for what you get is usually too bitter for the beatnik—Mailer) or it means merely to give as due or deserved (pay a compliment) or to give in the hope of a return in kind (pay attention to a young woman) Compensate is often preferred to pay when no legal obligation is implied or no payment for services is expected, because the term stresses a return, usually in money, that is regarded as an equivalent for a service given or for trouble taken or time spent (compensate a waiter for his cheerful willing service) (compensate a neighbor for taking care of one's pets during the summer) (an epoch in which the immense costs of a war could never be compensated by any economic gains that came from it—Lerner) In this sense (see also COMPENSATE 1) compensate often does not imply an obligation to another or the passing of money; it often suggests a counterbalancing (as of something unpleasant by something pleasant or of something lost by something gained) (the beauty of the view compensated for the labor of the climb) (compensate for) or a feeling of liveliness by assertions of superiority—Auden Remunerate, like pay, usually implies the discharge of an obligation in money and, like compensate, usually suggests the giving of an equivalent for services rendered rather than for goods delivered (goods with which the Cayuá is remunerated for his work for Brazilians—J. B. Watson) but unlike both of these terms it often carries a suggestion, sometimes a mere hint, sometimes a distinct implication, of a reward (he promised to remunerate the searchers handsomely) (the king remunerated them both, the former with an addition of honor, the latter with an accession of estate—Fuller d. 1661) Both compensate and remunerate can replace pay when pay might seem offensive or indelicate (the party always remunerates its faithful workers) Satisfy (see also SATISFY 1 & 3) implies the payment of something that is asked, demanded, or required especially by the terms of the law or the decree of a court (satisfy a claim) (satisfy a judgment) (death duties had been paid and the demands of creditors satisfied—Gibbons) Reimburse implies a return for money that has been expended by oneself in hope of making a profit or by another (as one's agent or attorney) in doing one's business (the profits of his business did not reimburse him for the money he had invested in it) (reimbursed his lawyer for earlier expenditures) (a promise of reimbursing . . . what the people should give to the king—Bolingbroke) (only Pennsylvania, of all the states, reimbursed loyalists for confiscated property—Smelser & Kiprin) Indemnify implies promised or actual reimbursement for loss (as by fire), for injury (as by accident), or for damage (as by war or disaster) (the basic purpose for which insurance exists is to indemnify persons subject to loss when such loss occurs—Hedges) (the governments of Louis XVIII and Louis Philippe so far as practicable indemnified the citizens of foreign states for losses caused by . . . Napoleon—J. B. Moore) But indemnify may approach compensate and implies less a reimbursing than a counterbalancing (he flogged them with merciless severity: but he indemnified them by permitting them to sleep on watch, to reel drunk about the streets, to rob, beat, and insult the merchants and the laborers—Macaulay) Repay and recom pense carry a weaker implication of giving or furnishing money than any of the preceding terms and a stronger implication of returning like for like; both therefore stress the demands of justice and usually the compulsion of an obligation. When the passing of money or of an equivalent is implied, repay may be preferred when there is a suggestion of giving something back that has been paid out to one (repay a loan) and recompense when compensation for voluntary services or for losses or injuries sustained is suggested and a due or adequate return is implied (recompense these people, and especially the priest, for their great kindness—Kipling) But repay and recompense sometimes imply reciprocation of something given, advanced, or inflicted. Repay usually implies little more than paying back in kind or amount (repay her scorn for scorn—Keats) (we never can repay your kindness) (Peacock's fidelity as a correspondent . . . was repaid by the magnificent series of letters from Shelley—Garnett) but it is sometimes used when the return is not what might be expected but is its diametrical opposite (repay love with hate) (repaying incredulity with faith—Browning) (these Indians enabled the Pilgrims to replenish their dwindling stores, a friendly act that was later repaid with treachery—Amer. Guide Series: Me.) Recompense often in this extended sense specifically implies a desire to make amends or to atone for a wrong that has been inflicted (in some part to recompense my rash but more of it to some measure of my own folly—Virgil) Indemnify, like pay, wage or wages, salary, stipend, fee, hire, emolument Ana *repayment, restitution, indemnity, redress, amends

paying adj Paying, gainful, remunerative, lucrative, profitable share the meaning of bringing in a return in money. Paying often implies only such a return, but it may imply a satisfactory return for the labor or effort or expenditure involved (as in a venture, a business, or a trade) (a position as office boy was his first paying job) (oats proved a paying crop) (toolmaking is one of the better paying trades) (a paying investment) (important minerals found in paying quantities in Alabama include asbestos—Willingham) Gainful applies chiefly to an endeavor (as a business or a trade) that leads to a money return whether large or small, but it may apply to persons or their acts that are motivated by a desire for gain (gainful occupations) (the lawyer's profession is often preferred to government service as the more gainful career) (most girls choose to be gainful workers for at least a few years before marriage—Landis) (the hypocrisy that covers gainful exploitation by the pretext of a civilizing mission—Hobson) Remunerative suggests a rewarding of labor, effort, or expenditure and often implies a profit or recompense that exceeds what is usual or customary (it was a remunerative venture for all concerned) (some British farmers with land beside main lines of railways . . . find big boldly silhouetted advertisements to be the most remunerative of their crops—Montague) (the State has come nearer than usual to a useful and remunerative working partnership with the industry—Macmillan) Lucrative carries a stronger implication of large returns and applies to a business, trade, or profession or to an enterprise or undertaking that succeeds beyond one's hopes (he made a lucrative deal when he sold his house) (a lucrative speculation in cotton futures) (contributing to the town's prosperity and wealth was a lucrative smuggling trade—Amer. Guide Series: La.) (our rulers will best promote the improvement of the nation . . . by leaving capital to find its most lucrative course—P. M. Fraser)

Profitable also is applied to what is rewarding, but it need not imply a money return (see BENEFICIAL); however it usually suggests such returns, not necessarily in a lucrative manner but in any degree that is consonant with one's deavor (as a business or a trade) that leads to a money return whether large or small, but it may apply to persons or their acts that are motivated by a desire for gain (gainful occupations) (the lawyer's profession is often preferred to government service as the more gainful career) (most girls choose to be gainful workers for at least a few years before marriage—Landis) (the hypocrisy that covers gainful exploitation by the pretext of a civilizing mission—Hobson) Remunerative suggests a rewarding of labor, effort, or expenditure and often implies a profit or recompense that exceeds what is usual or customary (it was a remunerative venture for all concerned) (some British farmers with land beside main lines of railways . . . find big boldly silhouetted advertisements to be the most remunerative of their crops—Montague) (the State has come nearer than usual to a useful and remunerative working partnership with the industry—Macmillan) Lucrative carries a stronger implication of large returns and applies to a business, trade, or profession or to an enterprise or undertaking that succeeds beyond one's hopes (he made a lucrative deal when he sold his house) (a lucrative speculation in cotton futures) (contributing to the town's prosperity and wealth was a lucrative smuggling trade—Amer. Guide Series: La.) (our rulers will best promote the improvement of the nation . . . by leaving capital to find its most lucrative course—P. M. Fraser)

Profitable also is applied to what is rewarding, but it need not imply a money return (see BENEFICIAL); however it usually suggests such returns, not necessarily in a lucrative manner but in any degree that is consonant with one's wishes or hopes (he owns a profitable hardware business) (they hoped to make a profitable investment) (follow a profitable trade) (scientific research is the development of new, more profitable products and processes—K. S. Davis) (putting to profitable use his conviction that
the atmosphere of the music should determine its ... presentation—Koldin) (he spoke unreservedly and plainly ... at a time when it would have been profitable to have been, at least, noncommittal—Charles Graves)

peace *true, cease-fire, armistice

peaceable *peaceful, peaceful, pacific, pacificist, irenic

Ana *amicable, friendly, neighborly: *amiable, complaisant: *calm, placid, serene, tranquil

Ant contentious: acrimonious—Con quarrelsome, bellicose, *belligerent: *martial, warlike

peaceful 1 *calm, tranquil, serene, placid, halcyon

Ana *soft, gentle, mild: *still, stilly, quiet, silent, noiseless

Ant turbulent

2 *peaceable, peacefast, pacific, pacificist, irenic

Ana composed, collected, untruffled, *cool: equable, constant, *steady

peak 1 *mountain, mount, alp, volcano, mesa

2 *summit, pinnacle, climax, apex, acme, culmination, meridian, zenith, apogee

peculiar 1 individual, *characteristic, distinctive

Ana *special, especial, particular, specific: idiosyncratic, eccentric (see corresponding nouns at ECCENTRICITY)

2 eccentric, odd, queer, *strange, singular, unique, quaint, outlandish, curious

Ana bizarre, grotesque, *fantastic: *abnormal, atypical, aberrant: unusual, uncanny (see affirmative adjectives at USUAL).

pecuniary *financial, monetary, fiscal

pedantic, academic, scholastic, bookish are comparable as terms of derogation applied to thinkers, scholars, and learned men and their utterances. Pedantic often implies ostentatious display of knowledge, didacticism, and stodginess (his opinions were as pedantic as his life was abstemious—Froude) It may also connotate undue attention to scholarly minutiae and small interest in significant issues (much pedantic mistaking of notions for realities, of symbols and abstractions for the data of immediate experience—Huxley) Academic rarely carries implications of disagreeable personal characteristics but it does stress abstractness, lack of practical experience and interests, and often the inability to consider a situation realistically (there is so much bad writing ... because writing has been dominated by ... the academic teachers and critics—Ellis) Scholastic is less fixed in its implications than the others, for sometimes the allusion is to philosophic Scholasticism and sometimes to modern education. As a rule it implies dryness, formalism, adherence to the letter, and sometimes subtlety (it is very able, but harsh and crabbed and intolerably scholastic—Laski) Bookish often suggests learning derived from books rather than from actualities (the Greeks had a name for such mixture of learning and folly, which might be applied to the bookish but poorly read of all ages—Adler) (the gestures of Mr. Lytens's heroes are a trifle bookish, too seldom of the dusty streets—Times Lit. Sup.) and sometimes it implies a decided literary or rhetorical quality (bookish words) (bookish interests)

Ana *learned, erudite: *recondite, abstruse

pedestrian adj *dull, humdrum, dreary, monotonous, stodgy

Ana commonplace, platitudeous, truisic (see corresponding nouns at COMMONPLACE): banal, jejune, inane, wishy-washy (see INSIPID): *irksome, wearisome, tiresome, boring

pedigree *ancestry, lineage

peck n peep, glimpse, glance, *look, sight, view

peel vb *skin, decorticate, pare, flay

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

penetration insight, acumen, *discernment, discrimination, perception

Ana sharpness, keenness, acuteness (see corresponding adjectives at SHARP): shrewdness, astuteness, perspicacity, sagaciousness or sagacity (see corresponding adjectives at SHREW)

penitence, repentance, contrition, attrition, compunction, remorse denote sorrow or regret for sin or wrongdoing.

Penitence implies little more than such sorrow or regret <the outward signs of penitence> <all calls to penitence fall on deaf ears. Penitence implies admission of guilt and no one wishes to stand accused—Political Science Quarterly> <he showed his penitence in many ways> <the majority . . . took the attitude that no sin is beyond forgiveness if it is followed by true penitence—Latourette>

Remorse is richer in its implications, for it also implies a change of heart, an awareness of one’s shortcomings morally or spiritually, or of the evil of one’s actions or life as a whole <I came not to call the righteous, but sinners to repentance—Lk 5:32> <God of my mercy give you patience to endure, and true repentance—Shak.> <there’s no repentance in the grave—Watts> Contrition and attrition are both theological terms, and as such contrasted; only contrition is found in general use. Both imply deep sorrow for sin and the purpose of amendment, but in theological use contrition implies that one’s sorrow arises out of love of God and a realization of one’s failure to respond to his graces, and attrition that it arises from a lower motive, such as fear of hell or fear of the loss of heaven <O may Thy love and pity supply whatsoever has been wanting in the sufficiency of my contrition—Manual of Prayers> <sacramental grace to raise our sorrow from attrition to contrition—Manning> In general use contrition implies penitence that is manifest in signs of pain or grief <you must—whether you feel it or not—present an appearance of contrition—Meredith> <Sophia thought that, after such a sin, the least Amy could do was to show contrition—Bennett> Compunction and remorse both imply a painful sting of conscience, but compunction usually suggests a momentary reaction not only for something already done, but also for something being done or to be done, and remorse usually suggests prolonged and insistent self-reproach and often intense suffering for past wrongs and especially for those whose consequences cannot be escaped <a heartless scoundrel who had . . . abandoned her in her poverty forevermore, with no touch of compunction—Dickens> <would not have hurt a gnat unless his party . . . told him to do so, and then only with compunction—Sir Winston Churchill> <not one of them . . . was showing any trifling compunction at deserting the rebel cause when it was most in need—Kenneth Roberts> <remorse that makes one walk on thorns—Wilde> <spent in Paris a year marked by futile indiscretions and equally futile remorse—E. S. Bates> <O, that the vain remorse which must chastise crimes done, had but as loud a voice to warn, as its keen sting is mortal to avenge!—Shelley>

Ana regret, *sorrow, anguish: humiliation, humbling, degradation, debasement (see corresponding verbs at ABASE): *qualm, scruple

Con obdurate or obduracy, inexorableness, adamantine (see corresponding adjectives at INFLEXIBLE)

percept sense-datnum, sensum, *sensation, image

Ana *idea, concept, notion: recognition, acknowledgment (see corresponding verbs at ACKNOWLEDGE)

perceptible, sensible, palpable, tangible, appreciable, ponderable all mean capable of being apprehended through the senses or intellect as real and existent. Perceptible may be used inclusively to describe whatever comes within the range of one’s senses and can be recognized in itself or by certain signs (perceptible sounds) (the ship is barely perceptible on the horizon) (without argument, without any perceptible stages, the estrangement of almost a year was gone—Wouk) something strange was in the air, perceptible to a little boy but utterly beyond his under- standing—H. G. Wells) It may also be used with or without qualification (as by just, scarcely, or barely) to describe something that just passes a borderline (as that between invisibility and visibility or inaudibility and audibility) (a perceptible change in her tone) (there are perceptible differences between surprise and astonish) (a perceptible flavor of onion) (her remark had no perceptible relevance to the topic of conversation) Sensible (see also MATERIAL, AWARE) may be used to describe whatever is clearly apprehended through the bodily senses or which impresses itself strongly on the mind through the medium of sensations (a rich and thronging world of sens-

Ana analogous words  Ant antonyms  Con contrasted words  See also explanatory notes facing page 1
(sible things—Lowes) your true ideas of sensible things do indeed copy them—James) In contrast with perceptible, however, sensible applies to what is more obvious, even sometimes to what is patent through its effects or signs; thus, a sensible change in tone is one which is immediately recognized; a sensible difference in a person's expression is one which is quickly detected (the direct, sensible influence of Protestantism has been to isolate and to individualize—Brownell) every owner is entitled to have the water come on to him without sensible diminution as regards quantity and sensible alteration as regards quality—F. D. Smith & Barbara Wilcox) Both palpable and tangible in their primary senses may be used to describe anything which is perceptible through the sense of touch. Palpable, however, although it is used of what is felt by touching with the tips of the fingers (a palpable powder is one that feels gritty) (touch beauty as though it were a palpable thing—Maugham) (before the clouded night dropped its mysterious veil, it was the immensity of space made visible—almost palpable—Conrad) as often implies a sensation produced as a sensation sought and therefore may be applied to whatever evokes a response from tactile receptors in any part of the body (there is a palpable chill in the air) Tangible, on the other hand, is applied primarily to things which may be or are handled or grasped (if an infant is not provided with light tangible objects, he will play with a sandwich or shadow) (dots and solids or divisions in tangible form) (a cloud, a pillar of fire, a tangible physical something—London) In their secondary senses these two words diverge widely. Palpable, in one of its most common meanings, implies a high degree of perceptibility (see under evident); in poetic use, especially when applied to an immaterial thing, it suggests an almost physical awareness of its existence or reality (what happiness to live when every hour brings palpable access of knowledge—Wordsworth) Tangible in its extended senses is applied to things that can be thought of as having real, independent, or objective existence whether they are apparent to the senses or not or whether they can be handled or not; thus, tangible ideas are those that can be grasped by the mind and made objects of thought; tangible advantages are those having a substantial character; tangible assets are those (as equipment and inventory) that can be appraised with reasonable accuracy as distinguished from those (as goodwill) that are intangible (the conquest of a territory meant a tangible advantage to the conqueror—Angell) Appreciable is applicable to whatever is large enough to be measured, weighed, valued, or otherwise estimated; thus, a perceptible change in the temperature may be so slight a change that it almost but not quite escapes notice; a palpable change in temperature may still be slight, but it is great enough to make it definitely felt; an appreciable change in temperature may also be slight, but its extent is determinable by reference to a thermometer (the current . . . generated is small but appreciable—Engel) (a satellite must be launched above the appreciable atmosphere—Newell) But appreciable may lose any clear notion of measurability and then often approaches considerable or significant in meaning (there had been an appreciable feeling of strain, and a corresponding rise in your sense of the obligation of meeting it—Mary Austin) There was no appreciable craft tradition in astronomy before modern times—S. F. Mason) Ponderable is applicable to whatever can be weighed either physically or mentally (something ponderable from the outer world—something of which we can say that its weight is so-and-so—Jeans) The word tends, however, to be applied to what is appreciable in terms of weight or significance as distinguished from what is so intangible as to elude such determination (exert a ponderable influence upon the events of his time) A clear, lucid, perspicacious; *noticeable, conspicuous, signal: discerned or discernible, noted or notable, observed or observable (see corresponding verbs at SEE) Imperceptible penetration, insight, acumen, *discernment, discrimination Appreciation, comprehension, understanding (see corresponding verbs at UNDERSTAND) sharpness, keenness, acuteness (see corresponding adjectives at sharp) Percussion concussion, crash, shock, *impact, impingement, collision, jar, jolt Striking, hitting, smiting (see strike) (vibration, oscillation, fluctuation (see corresponding verbs at swing) Perdurable durable, permanent, stable, *lasting, perpetual Enduring, abiding, persisting, continuing (see continue) *everlasting, endless, interminable Fleeting impermanent, imperious, *masterful, dominating Decisive, *decided: positive, certain (see sure) *dictatorial, dogmatic, oracular Perennial perpetual, incessant, unremitting, constant, *continuous, continual Perishable perishable, perishable, perishable, *everlasting, interminable Perfect, whole, entire, intact are comparable when they mean not deficient, defective, or faulty in any particular. Perfect is the usual term to describe such a condition, for it may imply not only the presence of every part, every element, and every quality necessary to a thing in its finished or fully developed state, but the soundness, the proportionateness, and the excellence of each part, element, or quality (a perfect set of teeth) (a perfect diamond) (a physically perfect infant) (the memory of that night remained intact and perfect—Wylie) The term is also applicable where there is no more definite measure or test than correspondence to a very high standard of excellence (a perfect gentleman) (a perfect coloring) (a perfect poem like Lycidas, a perfect fiction like Esmond, a perfect handling of a theory like Newman's idea of a University—Pater) (he is the most perfect writer of my generation, he writes the best sentences word for word, rhythm upon rhythm—Mailer) or to an archetype, definition, or pattern (a perfect hexagon) (a perfect Greek temple) or to a conception that represents an ideal or personal vision of the highest possible of its kind (perfect virtue) The term is also used in the sense of utter or complete (he is a perfect fool) (that is perfect nonsense) Whole and entire (see also whole 2) are somewhat elevated and often reminiscent of scriptural use. Whole usually implies a perfection, typically a moral or physical perfection, that can be sought and attained or that can be lost and regained; it usually suggests the attainment of or restoration to health, soundness, completeness (here, with one balm for many fevers found, whole of an ancient evil, I sleep sound—Housman) (one silver spider of machine, so intricate and whole as to appear rightly sufficient in itself—Terry Southern) (daughter, be of good comfort; thy faith hath made thee whole—Mt 9:22) Entire usually implies a physical, intellectual, moral, or spiritual perfection that derives from the completeness, integrity, soundness, and often the freedom from admixture of the thing so described; more than whole, it suggests a perfection that is unimpaired or without sign of previous imperfection; thus, a collection is entire when no constituent item is missing; an entire horse is an adult uncastrated male (co...

period, epoch, era, age, aeon all denote a portion or division of time; epoch and era can also denote an event regarded as the beginning of a portion or division of time.

Period is the generic term, designating an extent of time of any length for whatever purpose delimited (request a one-minute period of silence as a tribute to a dead person) (it began in 1915 in one of the darkest periods of the first world war—Pollock) (was returned for eight successive Congresses—a period of seventeen years—W. C. Ford)

Epoch can denote the starting point of a new period, especially as marked by striking or remarkable changes or events (this is an epoch...the end and the beginning of an age—H. G. Wells) or it may apply to such a new period (a phenomenon of our own special epoch, a man who couldn’t...be a writer in the only meaning of the term, but who can and probably will write a book—Purdy) (Dante’s work...initiated a new epoch in literature—R. A. Hall)

Era applies to a period characterized especially by some new order of things (a better intellectual era is dawning for the working men—Kingsley) (the Victorian era) (an era of singular crisis and upheaval—Aldridge) Age, usually interchangeable with but possibly more specific than era, is frequently used of a period dominated by some central figure or clearly marked feature <the age

of politics—The Age) <the Bronze Age—John Gross> (the French Revolution and its age—Arnold) 

Aeon applies to an immeasurably or indefinitely long period of time (aeons of primeval power have shaped that pillared bulk—Gibson) (during the three terrible hours...he had lived centuries of pain, aeon upon aeon of torture—Wilde)

perjury, forswear are comparable when they mean to violate one’s oath or, when used reflexively, to make a false swearer of oneself. In general use perjury is often employed less precisely than in law, where it is a technical term meaning to make a willfully false statement of fact or sometimes of an intention to do something, while under oath or under a solemn affirmation to tell the truth (the judge was convinced that the witness had perjured himself) In general use perjure often implies making a liar of oneself whether one is under oath or not (when a native begins perjury he perjures himself thoroughly. He does not boggle over details—Kipling) (he thanked her, with as much enthusiasm as he could muster without actually perjuring himself—Archibald Marshall) Forswear (see also abjure) often implies a violation of an oath, promise, or vow (he swore a thing to me on Monday night, which he forswore on Tuesday morning—Shak.) (thou shalt not perjure thyself, but shalt perform unto the Lord thine oaths—Mt 5:33) but it may also suggest untruth or ill faith to something (as one’s principles, one’s beliefs, or the laws of one’s country) as sacred as an oath (Shelley indignantly refused to “forswear his principles” by accepting “a proposal so insultingly hateful”—Arnold)

Ana (deceive, delude, mislead, beguile: lie, prevaricate

permanent (lasting, perdurable, durable, stable, perpetual Ana (perennial, constant, continuous, *continual

Art temporary: ad interim (of persons

permeate, pervade, penetrate, impregnate, interpenetrate, impregnate, saturate can all mean to pass or cause to pass through every part of a thing. Permeate may be used in reference to either a material or an immaterial thing and implies diffusion through all the pores or interstices of some substance or entity (the rain has permeated the soil) (the air is permeated by the pungent scent of onions—Amer. Guide Series: N. C.) (the Elizabethan age) English society at large was accessible to ideas, was permeated by them—Arnold) (the sense of beauty had permeated the whole nation—Binyon) (the religious issue permeated every meeting I conducted—Michey

Pervade is a very close synonym of permeate, but it distinctively carries a heightened suggestion of diffusion throughout every part or parcel of the whole and it is more often used in reference to such matters as places, writings, and works of art than to purely material things (a deep and solemn harmony pervades the hollow vale from steep to steep—Wordsworth) (a principle which so entirely pervades the constitution...as to be incapable of being separated from it—John Marshall) (a kind of easy morality seems to pervade all levels of the state government—Armbrister)

Penetrate (see also enter 1) may be preferred to permeate or pervade when there is the intent also to suggest the entrance of something that goes deeply or profoundly into the essence or nature of a thing, thereby giving it its characteristic quality or efficient force (a whole nation...penetrated with an enthusiasm for pure reason, and with an ardent zeal for making its prescriptions triumphant—Arnold) (a letter penetrated with affection for the old plain edifice and its memories—Quiller-Couch) (a commanding significance, which penetrates the whole, informing and ordering everything—Leavis)

Impenetrable is an intensive of penetrate implying a more thorough and often a diffusive penetration (power to isolate and impenetrable Poland—Gunther) (the church structure is backed up and impenetrated by the kinship structure—Vogt & O’Doea) Interpenetrate, too, may imply no more than thorough penetration or penetration into, within, or throughout (Westerners who interpenetrated the East in the nineteenth century—Davis) but distinctively it may imply a mutual penetration (the state and the economy interpenetrate; during slump, war, and boom, the tie-ins tend to become ever closer—Labor and Nation) (had both imagination and a stubborn will, curiously balancing and interpenetrating each other—Cather)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
permission 605  persecute

pregnate often carries a stronger implication of the operation of a causative power (as a human agent) than any of the preceding terms; it also suggests a filling of every available part or portion of a whole so that the thing which enters or is entered is diffused throughout the entire substance, structure, work, or group (the water is impregnated with magnesium—Huxley) (any judge who has sat with juries knows that . . . they are extremely likely to be impregnated by the environing atmosphere—Justice Holmes) (a very notable poem impregnated with the pessimism of a time—Lovett) Saturate (see also SOAK) implies impregnation to the point where no more of the thing which enters can be taken up or absorbed; the term is often used in preference to permeate or pervade when what permeates or pervades is highly obvious,deeply ingrained, or overabundant (the smell, sweet and poignant beyond imagining, saturated the air—Woolf) (a verse that is saturated with emotion—Lowes) (the air is saturated with golden light—Diamant)

Ana *infuse, imbue, ingrain: drench, steep, *soak, saturate: *inform, animate, inspire, fire

permission, leave, sufferance denote the sanction which enables one to do something that requires the consent of those in authority. Permission is the ordinary term except in some conventional phrases; it commonly implies the power or authority to grant or to refuse what is asked (have the owner's permission to hunt on his estate) (‘The horses can go in our barn. I’m sure Mr. Forrester would have no objection.” She spoke as if he had asked her permission—Cather) Leave differs very little from permission. It occurs chiefly in conventionally courteous phrases such as “by your leave,” “to ask leave,” and “give me leave,” but it may be used elsewhere in place of permission (ask for leave to remove papers from a file) In military, naval, and some official use the term implies official permission to absent oneself from one’s duties or from one’s station for a fixed period of time, or the furnishing of leave to relieve papers from a file. (after being absent without leave for a month, the soldier was arrested as a deserter) (at home on sick leave) Sufferance usually implies a neglect or refusal to forbid and therefore suggests either a tacit permission writable on the books or, more often, merely allowing a person to be present or to do something (you are here only on sufferance and if you want to stay, you must listen without interrupting) (he comes among us on sufferance, like those concert singers whom mamma treats with so much politeness—Thackeray)

Ana moving or move, shifting or shift, removing or remove (see MOVE): transformation, conversion, metamorphosis (see under TRANSFORM)

pernicious, baneful, noxious, deleterious, detrimental are comparable when they mean exceedingly harmful but they differ as to the kind and extent of the potential for harm. Something is either pernicious or baneful which is irreparably harmful but pernicious is more often applied to things that harm exceedingly or irreparably by evil or by insidious corrupting or enervating and baneful to those that poison or destroy (pernicious anemia) (a pernicious

influence) (the effects of false and pernicious propaganda cannot be neutralized—Huxley) (pernicious social institutions which stifle the nobler impulses—Parrington) (the baneful notion that there is no such thing as a high, correct standard in intellectual matters—Arnold) (they were under as little personal restraint as was compatible with their protection from the baneful habit of swallowing one another—Bierce) (the full extent and degree of their baneful psychological influence is quite inadequately realized—Moore) (something is noxious which is harmful especially to health of body or mind (a cold noxious wind—Haughton) (only when the educator shall have been educated, the air cleared of noxious failancies . . . will the reign of Humbug come to an end—Grandgent)

Deleterious is used chiefly of something which causes harm when taken into the body (as into the digestive or respiratory tract) and may suggest obscure or ill-understood effects (many drugs that seem so good in the first trials prove to have deleterious aftereffects—Heiser) (this gas was well known to be deleterious—John Phillips)

Detrimental, like deleterious, generally suggests a much lower degree of harmfulness than the remaining terms; typically it imputes an impairing or hampering quality to the agent or an impaired or hampered condition to the one acted upon (a federal-scholarship program is a project worthy of our united support, provided it can be administered at the state level, free from political or other detrimental influences—L. M. Chamberlain) (they both ran down the theory as highly detrimental to the best interests of man—Peacock) (bismuth is considered to be a detrimental impurity in refined lead—Pasterneck) (although too rich a diet is harmful to calves of both sexes, the detrimental effects are less marked in a bull calf than in a heifer—Farmer’s Weekly)

See also explanatory notes facing page 1
persevere, persist are both used in reference to persons in the sense of to continue in a given course in the face of difficulty or opposition. Persevere nearly always implies an admirable quality; it suggests both refusal to be discouraged by failure, doubts, or difficulties, and a steadfast or dogged pursuit of an end or an undertaking (I will persevere in my course of loyalty, though the conflict be sore between that and my blood—Shak.) (For, strength to persevere and to support, and energy to conquer and repel — these elements of virtue, that declare the native grandeur of the human soul—Wordsworth) (I do not intend to take that cowardly course, but, on the contrary, to stand to my post and persevere in accordance with my duty—Sir Winston Churchill) Persist (see also CONTINUE) may imply a virtue (this is the poetry within history, this is what causes mankind to persist beyond every defeat—J. S. Untermeier) but it more often suggests a disagreeable or annoying quality, for it stresses stubbornness or obstinacy more than courage or patience and frequently implies opposition to advice, remonstrance, disapproval, or one's own conscience (persist in working when ill) (it is hard to see how they can have persisted so long in effecting useless misery—Russell)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
petulant impotent, feeble, or completely without vitality {none of your thin, puny, yellow, hectic figures, exhausted with abstinance and hard study—Smollett} {one no sooner grasps the bigness of the world's work than one's own effort seems puny and contemptible—J. R. Green} Something is trivial which seems petty and commonplace and scarcely worthy of special consideration or notice {that strange interest in trivial things that we try to develop when things of high import make us afraid—Wilde} {he regarded no task as too humble for him to undertake, nor so trivial that it was not worth his while to do it well—Huxley} The term is often applied to persons, minds, or activities which reveal engrossment in trivial affairs or a lack of serious or profound interests {she knew him for a philanderer, a trivial taster in literature—Rose Macaulay} {the incessant hurry and trivial activity of daily life— Eliot} Something is trifling which is so small as to have little if any value or significance {our ordinary distinctions become so trifling, so impalpable—Hawthorne} {a considerable sum was paid to Egmont and a trifling one to the Prince—Motley} Something is paltry which is ridiculously or contemptibly small in comparison especially to what it should be {a paltry allowance} {our little ambitions, our paltry joys—Benson} {the paltry prize is hardly worth the cost— Byron} Something is measly which is contemptibly small (as in size or quantity) or petty {a measly portion of pie} {snatch at a little measly advantage and miss the big one—Anderson} Something is picayunish or picayune which is insignificant in its possibilities or accomplishments or hopelessly narrow in outlook or interests {a picayunish policy} {a lifetime of picayunish drudgery in the company of louts—H. L. Davis} {the obvious futility, the picayune, question-begging character, of such ethical analyses—Asher Moore} {a picayune congressman} Ana *small, little, diminutive, minute Ant important, momentous: gross petulant *irritable, fractious, peevish, pettish, snapish, waspish, huffy, fretful, querulous Ana cross, cranky, touchy, testy (see irascible): *impatient, restive, fidgety phantasm 1 *apparition, phantom, wraith, ghost, spirit, specter, shade, revenant Ana *illusion, illusion, hallucination 2 *fancy, fantasy, phantasy, vision, dream, daydream, nightmare phantasy *fancy, fantasy, phantasy, vision, dream, daydream, nightmare phantom *apparition, phantom, wraith, ghost, spirit, specter, shade, revenant Ana counterfeit, deception, *imposture: *delusion, illusion, hallucination pharisical hypocritical, sanctimonious, canting (see under hypocritical) pharisism *hypocrisy, sanctimony, cant pharmaceutical n *drug, medicinal, biologic, simple pharmacist *drugist, apothecary, chemist phase, aspect, side, facet, angle are comparable when they denote one of the possible ways in which an object of contemplation may be seen or may be presented. Phase may distinctly imply a change in the appearance of a thing without a change in the observer's point of view. From its original denotation as one of the four different shapes which the moon apparently assumes during its waxing and waning it often suggests a cyclical change in appearance {the wheel of the world swings through the same phases. . . Summer passed and winter thereafter, and came and passed again— Kipling} In extended use it is often applied to an outward and passing manifestation of a stage in growth, development, or unfolding {the way children develop and the different phases they go through—Barclay} but it also may apply to one of two or more distinctive appearances or values of something with little or no suggestion of cyclical or temporal succession {the red fox occurs in several color phases, of which the silver phase has been found to breed true} {he was a shrewd, smooth political-financier, shady in both phases—S. H. Adams} {the two alternating forces or phases in the rhythm of the universe which Empedocles calls Love and Hate—Toynbee} Aspect sometimes implies a change in appearance without a shifting in point of view, but unlike phase it usually suggests a superficial change, especially one brought about by unpredictable circumstances {every time I look out of the window, the hills present a new aspect} More distinctively it implies a change in appearance that is traceable to a change in the observer's point of view {the one and only aspect of a rich and complex subject which I mean to treat—Lowes} {an entirely new aspect of the Everest massif filled our northwestern horizon—Shipton} {the two men lay whispering for hours, canvassing every aspect of Monck's situation—Upton Sinclair} Thus, one who proposes to treat the phases of the depression of the nineteen-thirties implies that he intends to consider its stages as they manifested themselves outwardly; one who proposes to treat all aspects of that depression implies that he intends to consider it from every possible point of view (as the political, the economic, and the sociological). Side, though often used interchangeably with phase and aspect, may retain implications derived from other of its senses and is used chiefly in reference to something that may be thought of as having two or more faces and therefore not fully apprehensible unless it or its observer shifts position {see life only on its pleasant side} {if you get on the wrong side of authority, you are executed or exiled—Edmund Wilson} {the history as a whole is deficient on the economic side—Allen Johnson} But side differs from phase and aspect in less regularly connecting appearance or referring to physical or intellectual vision {hear both sides of a dispute} {read all sides in a controversy} {on its theoretic and perceptive side, Morality touches Science; on its emotional side, poetic Art—George Eliot} {this kind of discussion went on all the time between the parents. They could take either side with ease— Wouk} Facet differs from side in implying a multiplicity of other faces similar to or like the one singled out for attention {noticed the different shades of green on the planes and facets of each clipped tree—Dahl} {the strength of the lyric lies in the complete statement of a single selected facet of experience—Day Lewis} Angle denotes an aspect which is observable from a point of view restricted in its scope {he knows only one angle of his subject} {it is necessary to consider all angles of the situation} {views these developments from a fresh angle— Dumas Malone} Ana *state, condition, situation, posture: *appearance, look, semblance phenomenal *material, physical, corporeal, sensible, objective Ana actual, *real Ant nounal phenomenon *wonder, marvel, prodigy, miracle Ana abnormality (see corresponding adjective at abnormal): anomaly, *paradox: singularity, peculiarity, uniqueness (see corresponding adjectives at strange) philanthropic *charitable, benevolent, humane, humanitarian, eleemosynary, altruistic Ana *liberal, munificent, bountiful, bounteous, open-handed, generous: lavish, *profuse, prodigal Ant misanthropic

phony adj *counterfeit, spurious, bogus, fake, sham, pseudo, phoney
photograph n, portrait, image, effigy, statue, icon, mask
phrase, idiom, expression, location mean a group of words which, taken together, express a notion and may be used as a part of a sentence. Phrase may apply to a group of words which for one reason or another recurs frequently (as in the language of a people, the writings of an author or school of authors, or the speech of a person or a clique of persons). Sometimes the word means little more than this <this phrase, a priori, is in common most grossly misunderstood—Southey> but more often it suggests a distinctive character, such as triteness <to use the phrase of all who ever wrote upon the state of Europe, the political horizon is dark indeed—Cowper> or pithiness or pointedness <I summed up all systems in a phrase—Wilde> <"You don't understand a young philosopher," said the Baronet. "A young philosopher's an old fool!" returned Hippias, not thinking that his growl had begotten a phrase—Meredith> In the combinations "noun phrase" and "verb phrase" it suggests one of the principal parts of a sentence. Idiom (see also LANGUAGE 1) applies to a combination of word elements which is peculiar to the language in which it occurs either in its grammatical structure or in the meaning which is associated with it but which cannot be derived from it when the elements are interpreted literally; thus, "to keep house," "to catch cold," "to strike a bargain" are examples of idioms. Expression and location are sometimes used in place of phrase when the idea of a way of expressing oneself is uppermost. Although both terms may be applied to phrases that are generally current, they are perhaps more typically applied to those that are idiosyncratic. Expression is particularly used when accompanied by a characterizing adjective or clause or phrase <he is in the habit of using telling expressions> <that is a very odd expression> <an expression that has gone out of use> Location is somewhat more bookish than expression and is therefore often preferred when the reference is to phrases that are peculiar to a language or a group as an idiom <a pet location of the author> <Carlyle and Carlyles were to leave their traces. Even the style of Thoreau was to be tinged faintly here and there with the rhythms and locations of a writer whom lesser minds could not resist—Brooks>

phraseology, phrasing *language, vocabulary, diction, style
physic n *remedy, cure, medicine, medicament, medication, specific
physical 1 *bodily, corporeal, corporal, somatic
Ana fleshy, *carnal, sensual, animal
2 *material, corporeal, phenomenal, sensible, objective

physique, build, habit, constitution all mean bodily makeup or structure or organization peculiar to an individual or to a group or kind of individuals. Physique applies to the structure, appearance, or strength of the body of an individual or of a race and may connotate such qualities as capacity for endurance, stamina, or predisposition to disease <a people of robust physique> <a man of slight physique> Build, though often interchangeable with physique, may distinctively suggest not so much the makeup of a body as its conformation; it tends to call attention to such qualities as size, structure, and weight and rarely when used of man or an animal to health or the lack of it <a horse of heavy build> <a person of fleshy build but of feeble physique> Habit implies reference to the body as the outward evidence of natural or acquired characteristics that suggest the nature of one's physical condition and capabilities; thus, a full habit suggests an appearance marked by stoutness, redness, and congestion of the visible blood vessels <a youth of consumptive habit> <old Mrs. Mingot's... being, like many persons of active mind and dominating will, sedentary and corpulent in her habit—Wharton> Constitution applies to the makeup of a body, particularly of an individual, as affected by the complex of mental or physical conditions which collectively determine its state (as of healthiness) and its powers (as of endurance and resistance) <persons of sickly constitutions are given to worry> <buy them horses to ride, if you want them to enjoy good health and sound constitutions—Jefferies> <the key to her nature lay, I think, largely in her fragile constitution—Ellis>

Ana plunder, loot, *rob, rifle: invade, encroach, *trespass: confiscate, *arrogate, appropriate, usurp

pillar, column, pilaster denote a structure that rises high from a base or foundation, is slender in comparison with its width, and usually has a monolithic and decorative appearance. Pillar is the general term and applies to any such structure whether it stands alone (an obelisk is a kind of pillar) or is a supporting architectural member of a building or similar structure (the building was a spacious theater, half round on two main pillars vaulted high—Milton). In extended use pillar usually applies to something which stays or supports (the four pillars of government...religion, justice, counsel, treasure—Bacon) (the Classics have...lost their place as a pillar of the social and political system—T. S. Eliot) but when the application is to persons the term usually suggests the character of one who supports, though it may also imply leadership or prominence (he is a pillar of the church) (the middlemen...the pillars of society, the cornerstone of convention—Lewis & Maude) Column in architectural use primarily applies to a supporting pillar that is often cylindrical and free at every point except its bottom and top. The term commonly also implies three more or less elaborate parts, the base, by which it is attached to the floor, the shaft, often a fluted or channeled cylinder which rises high from the base, and the capital, the uppermost member which crowns the shaft and takes the weight or its share of the weight of what rests on it (a portico supported by a line of columns) But column is also applicable to a monument or memorial fashioned in the manner of an architectural column (the most conspicuous object in the whole churchyard, a broken column of white marble, on a pedestal—Mary Fitt) By extension the term is also applicable to something that suggests a column especially in shape (the wind sent columns of smoke into the tenement—N. Y. Times) or in use or structure (the spinal column) Sometimes the suggestion is remote and the term is applied to anything that is long and relatively narrow (the columns of a newspaper page) (a column of figures) (a column of infantry) Pilaster, though used with reference to a supporting member of a piece of furniture, is chiefly employed with reference to an architectural member which in function is a pier (see pier under BUTTRESS) but which in design and treatment resembles a column. In this latter sense pilaster implies engagement or attachment to a wall and suggests a rectangular rather than cylindrical form.

pilot vb steer, *guide, lead, engineer

Ana direct, manage, *conduct, control: *handle, manipulate

pimple *abscess, boil, furuncle, carbuncle, pustule

pinch vb *steal, pilfer, pinch, pilloin, lift, snitch, swipe, cop

pinch n *juncture, pass, exigency, emergency, contingency, strait, crisis

Ana *difficulty, hardship, rigor, vicissitude

pinchbeck adj *counterfeit, spurious, bogus, fake, sham, pseudo, phony

Ant impious

piquant *pungent, poignant, racy, spicy, snappy

Ana *incisive, trenchant, cutting, biting, clear-cut, *bland Con *insipid, flat, banal, jejune, inane

pique n *offence, resentment, umbrage, dudgeon, huff

pique vb *provocate, excite, stimulate, quicken, galvanize

Ana *stir, rouse, arouse: prick, punch (see PERFORATE): kindle, ignite (see LIGHT vb)

2 *pride, plume, preen

pirate, freebooter, buccaneer, privateer, corsair basically mean one who sails in search of plunder. Pirate suggests a person or a ship or its crew that without a commission from an established civilized state cruise about in quest of ships to plunder. Since pirate in this sense is seldom used of contemporary life, the word has been extended to one who wanders over a wide territory in search of plunder (a band of 400 desert pirates...raided the bazaar section and fled back across the river with their loot—Time) or one who infringes upon a right legally restricted to another (English books published by American pirates...pirates of wavelengths in radio) or one known for predatory business practices (now my grandfather there who made the money...was a hard-boiled man of business. From your point of view he was a pirate—Edmund Wilson) Freebooter often suggests a maritime plunderer who pursues his occupation without the excuse that his country is at war and then differs from pirate only in its connotations of membership in a less closely organized band and of use of less violent methods (English freebooters who made life merry hell on the high seas for Spanish galleons waddling home from the Americas heavy-laden with gold—Dodge) In extended use freebooter is often applied to one who seizes rights, privileges, and property on a large scale without regard to the restraints of law or of order (many empire builders have been mere freebooters) (an era of comparably good feeling and incomparably good pickings. He took things easy, and his fellow freebooters took almost everything easily—Hodding Carter) Buccaneer, primarily applied to early French residents of Haiti, is more generally used of these people and others who preyed, sometimes with the tacit consent of their own governments, on Spanish ships and settlements in the New World (in the reign of Charles II, the buccaneers of the West Indian Islands were in the heyday of their romantic glory, as the unofficial maintainers of England's quarrels along the Spanish Main—Trevelyan)

Ana *sadness, melancholy, depression; *paths, poignancy: *charity, mercy, clemency, lenity

pivotal *central, focal
Ana *essential, cardinal, vital: important, significant, momentous (see corresponding nouns at IMPORTANCE): capital, principal, *chief

place n Place, position, location, situation, site, spot, station
 are comparable when they mean the point or portion of space occupied by or chosen for a thing. Place, the most general of these terms, carries as its basic implication the idea of extension in space, though often with no clear connotation of how great or how small that extent is; in some use it comes very close to space in meaning (he passed the flaming bounds of Place and Time—Gray) but it more usually implies a limited, though not always clearly defined, extent of space (the place where we shall meet) (the place where they were born) (the cardplayers changed their places several times during the evening)

Position is capable of abstract as well as concrete use and therefore may be employed whether the thing referred to is immaterial or material, ideal or actual, or invisible or visible; it usually also implies place in relation to something in particular (a point has definite position but no extent in space) (an instrument to find the position of an invisible target) (the 7th regiment took up its position on the left flank) (the plots of shade and flakes of light upon the countenances of the group changed shape and position endlessly—Hardy) (she dropped forks into their appointed positions with disdain—Bennett)

Location is used in a concrete sense implying a fixed but not necessarily a clearly definite place for something or sometimes a person; it may refer to the place as found or as usable as well as to the place actually occupied by a thing (this is a most desirable location for your factory) (he knows the location of every house in the town built before 1800) (they visited Windsor. Mr. Beck said that if he had such a location he should always live there—Besant & Rice)

Situation may differ from location in being more specific about the character of the surroundings (this is the best situation for the house, for the land is high and dry) (the situation of this camp was chosen with respect to its healthfulness and its nearness to the city) (not a place upon earth might be so happy as America. Her situation is remote from all the wrangling world—Paine)

Site, though close to situation in many ways, carries a clearer reference to the land on which something specific (as a building, a group of buildings, or a town) is built (every ruined village on the road stands on the site of an ancient city—J. L. Stephens) (you may derive amusement from the historians when they . . . explain how Oxford and Cambridge . . . came to be chosen for sites—Quiller-Couch) (the site for the factory has been well selected) (the hill, with its view of the lake, affords excellent sites for summer cottages) Spot, only in an extended sense, implies
a particular place, clearly defined in extent, which may be occupied or occupied by a person or thing or may be the scene of an occurrence or activity; the word carries a stronger implication of restricted space than of its particular use (it is one of the pleasantest spots in the Adirondacks) (we have found just the spot for the picnic)<br>she said he wouldn't move from the spot (the spot where the corpse was found) (there was one spot in Rome which was calm amid all tumults—Farrar)<br>Station implies the place where a person or sometimes a thing stands or is set to stand; it usually carries an implication of accepted responsibility (as in performance of duty or participation in a game) (waiters at their stations in the dining room) (every vessel in the squadron has its station) (the crew went to their battle stations)<br>placidity, tranquillity, serenity, peace, peacefulness, halcyon<br>pester, tease, tantalise, harry, harass, worry, plague<br>vb

in combination, self-delusion, craftiness, or self-seeking on the part of the agent (he doesn't scheme and twist things about trying to get the best of someone else—Anderson) (a lurking suspicion that our work was ... a scheme to superimpose American economic control upon ingenious foreign countries—Heiser) Project comes close to scheme except in its connotations. Sometimes it suggests enterprise; sometimes, imaginative scope or vision; sometimes, mere extensiveness (sanguine schemes, ambitious projects, pleased me less—Wordsworth) (such were my projects for the city's good—Browning) (I projected, and drew up a plan for the union—Franklin) (although his health was rapidly failing, he projected a new book—Dinsmore)

Ana *intention, intent, purpose: *idea, conception, notion: *chart, map, graph: diagram, outline, sketch (see under sketch vb)

plane adj plain, flat, *level, even, smooth, flush

Ant solid

plank *paragraph, verse, article, clause, count

plastic, pliable, pliant, ductile, malleable, adaptable are applied to things and to persons regarded as material susceptible of being modified in form or nature. Something plastic has the quality (as of wax, clay, or plaster) of being soft enough to be molded or to receive an impression yet capable of hardening into a final form (a pill mass should be plastic: that is, it should be capable of being worked—C.O. Lee) (the language at the period during which the Bible was being translated into English was in its most plastic stage—Lowes) (life is plastic: it will assume any shape you choose to put on it—Gogarty) Something pliable or pliant has the quality (as of willow twigs) of being supple enough to be easily bent or manipulated and therefore yielding without resistance. Pliable, in extended use, usually suggests the imposition of or submission to another's will (I flatter myself that I have some influence over her. She is pliable—Hardy) (I've always been a pliable sort of person, and I let the ladies guide me—Upson Sinclair) (he was criticized as being too pliable, too eager to please—Beverly Smith) Pliant, on the other hand, suggests flexibility rather than obedience (art which is alive and pliant in the hands of men—Quiller-Couch) (ready to be used or not used, picked up or cast aside ..., pliant to fate like a reed to the wind—Goudge) Something ductile has the quality of a tensile metal (as copper) of being tenacious enough to be permanently drawn out or extended, or of water, of being made to flow through channels. In extended use ductile often approaches plastic and pliant but it may have distinctive connotations directly derived from its literal senses, such as quick responsiveness (as distinguished from submissiveness) to influences that would form, guide, or fashion (verse ... is easier to write than prose ... Mr. Shaw would have found his story still more ductile in the meter of Hiawatha—Quiller-Couch) (a vast portion of the public feels rather than thinks, a ductile multitude drawn easily by the arts of the demagogue—Loweman) Sometimes fluidity within bounds is connoted (smooth, ductile, and even, his fancy must flow—Cowper) Something malleable is literally or figuratively capable of being beaten or pressed into shape, especially after being conditioned (as by heating) (tempers ... rendered pliant and malleable in the fiery furnace of domestic tribulation—Irving) (finds a sort of malleable mind in front of him that he can play with as he will—Masefield) Something adaptable is capable of being modified or of modifying itself to suit other conditions, other needs, or other uses. As applied to persons the term implies sometimes a pliant, but more often an accommodating, disposition and a readiness to make one's habits, one's opinions, and one's wishes correspond to those of one's present society or environment (he was an adaptable person. He had yielded to Joyce's training in being quietly instead of noisily disagreeable—Sinclair Lewis) (anarchism has always been an elastic and adaptable faith, and looking round for a suitable machinery to replace state centralization—Connolly)

Ana flexible, supple, *elastic, resilient: tractable, amenable (see obedient)

Con rigid, *stiff, inflexible

platitude *commonplace, truism, bromide, cliché

Ana banality, inanity, vapidity, insipidity (see corresponding adjectives at insipid): mawkishness, sentimentality (see corresponding adjectives at sentimental)

plaudits *applause, acclamation, acclaim

Ana cheering (see applause)

plausible, credible, believable, colorable, specious are comparable when they mean capable of impressing the observer, auditor, or reader as truly or genuinely possessing the quality or character that is set forth or claimed. A thing or otherwise a person is plausible that is capable of winning acceptance, approval, or belief by its or his apparent possession of qualities which make it or him seem pleasing, genuine, or reasonable at first sight or hearing; the word need not definitely imply a false outside, or an intention to deceive, or a lack of soundness, but it usually connotes such a possibility, even though it also clearly suggests an ingratiating or mentally satisfying character (a plausible argument) (the most plausible and persuasive confidence man of his day—S. H. Adams) (that is a perfectly intelligible position, and it is plausible to the last degree—Lowes) (he learns what is wanted is not an interesting or plausible story, but exact facts—Notes and Queries on Anthropology) A thing or less often a person is credible that seems to be worthy of belief or of being credited, sometimes because of plausibility, but more often because of its or his support by known facts or by sound reasoning (a credible explanation) (a credible witness) (right reason makes that which they say appear credible—Hobbes) (a theory which denies the truth of one of our fundamental convictions about our own minds must have very strong evidence from other quarters to make it credible—Inge) A thing that is credible because it comes within the range of possibility or probability, or because it is in accordance with other facts that are known, is believable (his undergraduate characters ... are all alive and believable. With his older characters he is less convincing—Havighurst) (a down-to-earth, rat-chasing, thoroughly believable wharf cat—Camper) (demand for ... believable explanations—Fearing) A thing is colorable which at least on its face or outwardly seems true, just, or valid or which is capable to some extent of being sustained or justified (a colorable evidence has as yet been presented in support of this theory) (the Chinese were given ... a colorable excuse for joining in the fight. The excuse, of course, was much more than colorable: it was morally and practically ideal—Purcell) A thing or, less often, a person is specious that is outwardly or apparently attractive, beautiful, valid, or sincere but that is inwardly or actually the reverse in character. Specious is the only one of these terms that clearly implies dissimulation or fraud or deceit or hypocrisy (specious picturesqueness) (specious piety) (a specious rogue) (they sanctified the wrong cause with the specious pretext of zeal for the furtherance of the best—Cowper) (effusions of fine sentiments about brotherly
love that are only a *specious* mask for envy and hatred of riches and success—Babitt

**Ant** work

---

**plea**

*Ana* divert, entertain, recreate, *amuse: *trifle, toy, daily

2 *act, impersonate

*Ana* feign, simulate, counterfeit, *assume

**player** *actor, performer, mummer, mime, mimic, thespian, impersonator, trouser

**playful,** frolicsome, sportive, roguish, waggish, impish, mischievous mean given to play, jests, or tricks or indicative of such a disposition or mood. **Playful** stresses either lighthearted gaiety or merriment (playful children) (in a playful mood) (a confiding, playful little animal, whom one . . . trained to do tricks—Sackville-West) or a lack of serious or earnestness (his words were serious, but in his eyes there was a playful gleam) (his pen was more playful than caustic—Williams & Pollard)

**Frolicsome** heightens the implications of **playful**; it carries a stronger suggestion of friskiness or prankishness or irresponsible merriment (as frolicsome as a bird upon a tree, or a breeze that makes merry with the leaves—Hawthorne) (frolicsome sailors returning from their cruises . . . paraded through the streets—Nevins & Commager)

**Sportive** carries a stronger implication of jesting or of levity than either of the preceding words; the term sometimes implies merely excess of animal spirits, but it usually connotes a desire to evoke or provoke laughter (three generations of serious and of sportive writers wept and laughed over the very nature of the senate—Macaulay)

**Roguish** not only heightens the implications of **sportive** but it suggests an engaging naughtiness or slyness ("I don't think I shall want anything else when we've got a little garden; and I knew Aaron would dig it for us," she went on with roguish triumph—George Eliot) (not a pretty girl or a roguish buck in the lot—Cooke)

**Waggish** suggests a less engaging sportiveness than roguish and one less delicate in its character; usually also the term carries a stronger suggestion of jocoseness or of jocularity (with all his overbearing roughness there was a strong dash of waggish good humor at bottom—Irving)

**Impish** adds to roguish a hint of elfish, malicious mockery (teasing . . . with impish laughter half suppressed—Hardy) (he also displays impish ingenuity in picking his examples of error from the most dignified sources—Brit. Book News)

**Mischievous** combines the implications of frolicsome and impish (took a secret and mischievous pleasure in the bewilderment of her attendants—Stafford) Although it may imply the doing of mischief (see mischief under INJURY 1) or the causing of an injury to others it commonly retains some suggestion of mingled playfulness and malice (the three mischievous, dark-eyed witches, who lounged in the stern of that comfortable old island gondola, . . . were a parcel of wicked hoodwinks, bent on mischief, who laughed in your face—Melville) (the little buried eyes still watching . . . in that mischievous, canny way, and . . . catching out some further unpleasantness or scandal—Dahl)

Often it suggests little more than thoughtless indifference to the possible effects of one's sports, tricks, or practical jokes (a garden ruined by mischievous boys) (she . . . was . . . waked by Meta, standing over her with a sponge, looking very mischievous—Yonge)

*Ana* gay, sprightly, *lively: merry, blithe, jocund, jolly, jovial: mirthful, gleeful, hilarious (see corresponding nouns at MIRTH)

Con bestow, confer, present, *give: *grant, vouchsafe, accord

Pleasant, pleasing, agreeable, grateful, gratifying, welcome are comparable when they mean highly acceptable to or delighting the mind or the senses. Pleasant and pleasing are often indistinguishable; however, pleasant usually imputes a quality to the object to which it is applied, and pleasing suggests merely the effect of the object upon one. A pleasant garden (she liked everything to be tidy and pleasant and comfortable about her—Gibbons) A pleasing arrangement of colors (the thought of gazing on life’s Evening Star makes of ugly old age a pleasing prospect—L. P. Smith) Agreeable implies harmony with one’s tastes or likings (an agreeable taste) (if I was obliged to define politeness, I should call it the art of making oneself agreeable—Smollett) (replied with an agreeable, cultured throaty intonation—F. M. Ford) Gratifying carries the implications of both pleasant and agreeable; in addition it stresses the satisfaction or relief after and sensations, something less often, the mind (they laid down on the clean grass under the grateful shade of the tall cottonwoods—Cather) (only occasional voices from the road outside came to disturb the grateful sense of quiet and seclusion—Archibald Marshall) Gratiying is applied chiefly to what affords mental pleasure to the individual by satisfying his desires, hopes, conscience, or vanity (the reviews of his book were very gratifying) (the gratifying feeling that our duty has been done—Gilbert) can satisfy their lust for power in a most gratifying way—Huxley) Welcome even more than pleasing stresses the pleasure or satisfaction given by the thing to which it is applied; it often suggests prior need or an answer to one’s longings (the explorers found fresh fruit and vegetables a welcome addition to their diet) (the news was most welcome) (revivals offered welcome interludes in pioneer life—Amer. Guide Series: Minn.)

Ana charming, attractive, alluring (see under ATTRACT vb): *soft, gentle, mild, balmy, smooth
Ant unpleasant: distasteful: harsh

Please vb Please, gratify, delight, rejoice, gladden, tickle, regale mean to make happy or to be a cause of happiness. Please usually implies an agreement with one’s wishes, tastes, or aspirations and a happiness which ranges from mere content and the absence of grounds for displeasure to actual elation (the family was pleased with the daughter’s marriage) (the aim of poetry is to please) (the suggestion did not please him) (he may apply himself . . . to feeding and protecting his family, but he no longer need strain to please—Edmund Wilson) (fangless perceptions which will please the conservative power—Mailer) Gratify (compare gratifying under PLEASANT) suggests an even stronger measure of satisfaction than please and is normally positive in its implication of pleasure (it gratifies us to imagine that . . . we have reached a point on the road of progress beyond that vouchsafed to our benighted predecessors—Elliot) it (gratified him to have his wife wear jewels; it meant something to him—Cather) he had a sense of humor in his peculiar quiet way, but he never gratified it by proofs of the obvious—Theodore Sturgeon) Delight stresses the emotional rather than the intellectual quality of the reaction, though the latter is often also implied; it suggests intense, lively pleasure that is not only keenly felt but usually vividly expressed in outward signs (O, flatter me; for love delights in praises—Shak) (the girl was embarrassed and delighted by the effusive attention that followed—Hervey) (she was as delighted as if he had given her a Christmas present all wrapped in shining paper—MacInnes) Rejoice implies a happiness that exceeds bounds and reveals itself openly (as in smiles, in song, in festivities, or in enthusiastic effort) (rejoice, you men of Angiers, ring your bells—Shak) (Hendrik worked, rejoicing in the strength that God had given him—Cloote) Gladden sometimes is indistinguishable from rejoice except in rarely suggesting excess of emotion and in being usually transitive (a small pleasant frankly uttered by a patron, gladdens the heart of the dependent—Irving) It often, however, connotes a raising of the spirits, or a cheering or consoling in depression or grief (the comrades of the dead girl assemble in the temple on certain days to gladden her spirit with songs and dances—Hearn) Tickle and regale involve the idea of delight, but they are often less dignified in their connotations. Tickles implies such pleasurable sensations as tingles and thrills or suggests an almost physical gratification (food that tickles the palate) Sometimes, with reference to physical tickling, it suggests provocation of laughter (the mimic court of justice in the orchard tickled him immensely—Deland) (the idea of himself as a parson tickles him: he looks down at the black sleeve on his arm, and then smiles slyly—Shaw) Regale connotes huge enjoyment or a feasting upon what gives pleasure (Mr. Sycamore was regaling himself with the discomfiture of Lady Charlotte—H. G. Wells) (would always regale them generously with madeira, sherry or whiskey, rich cake, and richer stories—Chapman-Huston)

Ana *satisfy, content: beguile, *while, while
Ant displease: anger: vex

Pleasing *pleasant, agreeable, grateful, gratifying, welcome
Ana winning (see GET): charming, attractive, alluring, enchanting (see under ATTRACT)
Ant displeasing: repellent

Pleasure, delight, joy, delectation, enjoyment, fruition denote the agreeable emotion which accompanies the possession, acquisition, or expectation of something good or greatly desired. Pleasure so strongly implies a feeling of satisfaction or gratification that it sometimes carries no implication of visible happiness or actual gladness (faintly unpleasant pleasures being atoned for by the dull unappreciated pain of guilt—Styron) (he owned over forty pairs of boots, and he had the same pleasure in handling them that jewels give—Bemelmans) Often, however, the term suggests an excitement or exaltation of the senses or of the mind that implies positive happiness or gladness (when these wild ecstasies shall be matured into a sober pleasure—Wordsworth) (a great work of art always gives pleasure) (she didn’t want to ride on the roller coaster . . . her ideas of pleasure were more sophisticated—Cheever) Delight carries a stronger implication of liveliness, intensity, or obviousness in the satisfaction or gratification (induced in pleasure often suggests a less stable or enduring emotion) (that pleasure the possession of my money could have afforded him I am unable to say; but . . . as it did give him evident delight I was not sorry that I had parted with it so readily—Kipling) (the errors he made in pitch and in language would be so amusing that the geishas would giggle with delight—Mailer) (next to their wondrous delight in each other came their delighted wonder at earth itself—Theodore Sturgeon) Joy is often used in place of pleasure and still more often in place of delight. It is, however, especially appropriate when a deep-seated, rapturous emotion is implied or when the happiness is so great as to be almost painful in its intensity (and all its aching joys are now no more, and all its dizzy raptures—Wordsworth)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
plebiscite

A superlative measure or procedure for determining the collective will of a group or nation, often used for matters of national importance or to resolve disputes within a country or international context. It typically involves voting by the populace, either directly or through representatives, to express their opinion on a particular issue.

In its historical and political context, plebiscite has been employed in various scenarios: to end long-standing conflicts such as the Italian unification process, to affirm national boundaries like in Ireland to decide whether to remain part of the United Kingdom or to form an independent republic, or to confirm the legitimacy of a government. Notably, plebiscites have been a controversial tool in the hands of leaders aiming to solidify their power or to resist external pressures by popular consent.

Plebiscite as a concept is also linked to the idea of self-determination, where people have the right to decide their own political status and the type of government under which they wish to live. This principle is enshrined in international law and is recognized by the United Nations.

Example: "The plebiscite was held to decide whether the region should remain part of the country or opt for independence, a decision that would shape the nation's future for decades to come."
or fullness of information <declarers of a copious vein —Berkeley> <French, English, or any other copious lan-
guage—Hobbes> <be copious and distinct, and tell me a

plight

plop n *difficulty, *difficulty, rigor, hardship, vicissitude

plot n 1 *plan, design, scheme, project

Ant *chart, map, graph

2 Plot, intrigue, machination, conspiracy, cabal are compa-

rable when they mean a secret plan devised to entrap or

ensnare others. Plot implies careful planning of details

and usually an intent to accomplish an evil, mischievous,
or treacherous end; the action may involve one or more

devisers and a person, a group, a class, or a people as the

victim <there is a plot against my life, my crown—Shak.>

<the great Jesuit plot for the destruction of Protestant

England—Crothers> <the conspirators roped into their

scheme a whole network of the magnates. Nevers joined

in the plot—Belloc> Intrigue implies more complicated

scheming or maneuvering than plot and often the use of

petty underhand methods in an atmosphere of duplicity;

it more often implies an attempt to gain one's own ends

through clandestine means (as in politics, in business, or

in love) than (as plot frequently implies) an attempt to

destroy, to betray, or to usurp power <Mr. Swift hath

desirably described that passion for intrigue, that love of

secrecy, slander, and lying, which belongs to weak people,

hangers-on of weak courts—Thackeray> <the party pol-

ticians forgot their good resolutions, and reverted to their

familiar intrigues—H. G. Wells> <they had all stooped to

folly and . . . here they were, alive, tainted, laughing,

and like as not in some new intrigue with a waiter or a

musician—Wouk>

Machination, usually in the plural, imputes hostility or treachery to the makers; often, also, it

suggests craftiness in devising or contriving annoyances,

injuries, or evils. If these ideas are to be connoted, it

may be applied to a plot, an intrigue, or any of the secret plans

named by the words in this group <tortured by some black

tube?—Deland> <we are plunged once more into the war-

bodily into the water after a forty-foot

(drop—Forester> <we are plunged once more into the war

into the crowd plunged and was soon lost to view> <the

singer drew breath and plunged, shrieked, plunged

down from the bank—Deland> <an enormous water rat

dived down from the bank—Deland>

plunge vb Plunge, dive, pitch are comparable when they

mean to throw or cast oneself or to be thrown or cast

cast forward or downward with force or impetuosity into or

as if into deep water. Plunge carries a more obvious impli-

cation than the others of the force with which one throws

oneself or is thrown, but it does not always suggest a

penetration of deep water; it may imply entrance into any

penetrable medium, especially one that suggests a being

lost to view, or into a state or condition in which one is

overwhelmed or immersed, or into a course which marks a

depth descent, a complete change, or a distinct involve-

ment <plunge bodily into the water after a forty-foot

drop—Forester> <we are plunged once more into the war

of nerves—Times Lit. Sup.> <he plunged into the crowd

and was soon lost to view> <the singer drew breath and

plunged into a new stanza—Henri>

Dive, though it implies an action very similar to that indicated by plunge, usually suggests deliberation or, at least, consciousness of an aim, more skill in execution, and less heaviness and more grace; thus, "he dived into the sea" usually implies intent where "he plunged headlong into the sea" may suggest either intent, accident, or impulsion by some force <the gulls dive into the water for pieces of food> <an enormous water rat dived down from the bank—Powys>

In techniques of verbal use the word implies the doing of an unlawful act or the use of unlawful means in accomplishing a lawful end <monopoly . . . is conspiracy in restraint of

dealings, including under the term conspiracy all contracts

and combinations entered into for the purpose of restrain-

ming trade—The Amer. Individual Enterprise System>

<the company brought suit against the strike leaders, charging

them with conspiracy to ruin the business—Amer. Guide

Series: Conn.> Cabal applies usually to an intrigue in

which a group combines to accomplish some end favorable to

it but injurious to or disastrous to the person or group,

often, specifically, the government, affected <the cabal

against Washington found supporters exclusively in the

north—Bancroft> <the innate character of the cabal and

its purposes roused resentments and antagonisms in

Congress which compelled its adherents to abandon the

move . . . and . . . the scheme collapsed—Fitzpatrick>

point of view

THROW is often used instead of plunge to imply a falling forward and downward usually without intent or design (he pitched headlong over the cliff) (he tripped on a root and pitched forward on his face) (my anxiety to own the ducks caused me to pitch into the water with all my clothes on—Wister) The term also is often used in reference to the alternate forward and backward plunging of a ship in a storm as distinguished from rolling or tossing from side to side (the passengers found the pitching of the ship more disquieting than the rolling) (the sea was rough and my heart pitched with the small motorboat—J. W. Brown)

plutocracy *oligarchy, aristocracy

ply vb *handle, manipulate, wield, swing

Ana submerge, immerse, *dip: *throw, cast, fling, hurl: *push, thrust, shove, propel

point of view, viewpoint, standpoint, angle, slant denote a fixed way of looking justified by one's fundamental principles or one's stock of information and not necessarily resulting in a limited understanding (from the poet-writer's standpoint all this prevalent talk about a New Order is sheer waste of time—Forster) (<my criticism of what seem to me one-sided views will be better understood if my general standpoint is known—Inge)

* massacre, slaughter, butchery, carnage

poignant 1 *pungent, piquant, racy, spicy, snappy

poetaster *poet, versifier, rhymer, rhymester, bard, minstrel, troubadour denote a composer who uses metrical or rhetorical language as his medium. Poet is used in a generic sense and in several highly specific senses. In its generic sense it applies to any writer or maker of verses in which it is used specifically only to a composer of verse who in his composition exhibits qualities regarded as essential by the age or time or by the writer or speaker who uses the term. With all its variations in implications in these specific senses, poet usually stresses creative and expressive power as the prime essential, sometimes without clear reference to skill in constructing verses (every man, that writes in verse is not a Poet—Ben Jonson) (<the Poet is chiefly distinguished from other men by a greater promptness to think and feel without immediate external excitement, and a greater power in expressing such thoughts and feelings—Wordsworth) Versifier may designate a composer who uses verse as his medium without reference to qualities thought of as essential to poetry. In contrast to poet, it implies the lack of such a quality or qualities (<a clever versifier might have written Cowley's lines; only a poet could have made what Dryden made of them—T. S. Eliot) Rhymer and rhymester, once descriptive rather than deprecative, now tend to be even more definitely and consistently deprecatory than versifier in their implication of mediocrity or inferiority. Poetaster is a term of contempt applied to versifiers whose work is regarded as unimportant, trashy, or inane (<there are poetasters always) <every man of great literature enables us to see with another man's eyes . . . but only when we abandon ourselves for the time to his point of view—Kilby) (<the general shape of the galaxy and the point of view from which we are looking at it—B. J. Bok) <all will benefit from exposure to the fresh viewpoint which he presents—Harrison Brown) <describes his own method of photographing motor races, and gives hints on the choice of subjects and viewpoints—Kodak Abstract> Standpoint may have connotations which tend to distinguish it from point of view and viewpoint; it is more often restricted to the mental point of view (<consider totalitarianism from the German standpoint> and it more often connotes than definitely implies a fixed way of looking justified by one's fundamental principles or one's stock of information and not necessarily resulting in a limited understanding (<from the poet-writer's standpoint all this prevalent talk about a New Order is sheer waste of time—Forster) (<my criticism of what seem to me one-sided views will be better understood if my general standpoint is known—Inge>)

Angle (see also PHASE) definitely implies one-sidedness or limitations in the scope or one's vision (<every man of genius sees the world at a different angle from his fellows, and there is his tragedy. But it is usually a measurable angle—Eliot) (<in the rhetorical speeches from Shake-
speare which have been cited, we have... a new clue to the character, in noting the angle from which he views himself—T. S. Eliot. Slant stresses bias, but it may be bias derived from temperament, mental habits, or experience rather than from prejudice (periodicals, not normally pro-Democratic in editorial slant—Cater) (no one sees anything without some personal slant—S. R. L.)

Ana *position, stand, attitude

poise vb *stabilize, steady, balance, ballast, trim
Ana *support, uphold, back

Con disturb, agitate, upset (see DISCOMPOSE): *overturn, overthrow, subvert

poise n 1 *balance, equilibrium, equipoise, tension
Ana suspending or suspension, hanging (see corresponding verbs at HANG): *equanimity, composure
2 *tact, address, savoir faire
Ana self-possession, aplomb, assurance, *confidence: calmness, tranquillity, serenity (see corresponding adjectives at CALM): grace, dignity, *elegance

poison n Poison, venom, virus, toxin, bane mean matter or a substance that when present in an organism or introduced into it produces injurious or deadly effect. Poison is the most inclusive of these words and is applicable to any deadly or noxious substance whether introduced into or produced within the body of an organism *killed by a poison-barbed arrow (carbon monoxide gas, when inhaled, is a deadly poison) *keeping poisons out of the reach of children *many alkaloids are dangerous poisons

In extended use poison applies to whatever is felt to have the destructive effect of a physical poison *fear uncontrolled is a poison that destroys all self-confidence
Ana basically means a fluid containing a poison secreted by an animal (as a snake, scorpion, or bee) and injected into another animal during offensive or defensive action, usually by a bite or sting (man spurns the worm, but poisons he who makes the slumbering venom of the folded snake—Byron) The term is occasionally extended to a poisonous secretion of a plant and in more general extended use applies especially to states of mind or utterances that are felt to have the malignant quality of an animal venom (their belief in venom and jealousy behind the war—Paxson) *spouting angry venom about his neighbors
Ana Virus (see also GERM), once equivalent to venom, retains this value only in extended use and then applies to something felt to have a corrupting quality that can poison the mind or spirit *the force of this virus of prejudice—V. S. Waters
Ana toxin applies to a complex organic poison that is a product of the metabolic activities of a living organism, is extremely poisonous when introduced into the tissues but usually destroyed by the digestive juices, and is usually able to induce antibody formation *bacterial toxins, such as those of botulism and tetanus
Ana Bane may apply to any cause of ruin, destruction, or tribulation (his wife is the bane of his life) *time can be an poison or something (as a plant) containing poison *ratsbane *henbane contains a poison resembling belladonna

poisonous, venomous, virulent, toxic, mephitic, pestilent, pestilential, miasmatic, miasmatic, miasmal are comparable when they mean having the properties or the effects of a poison (see POISON). Basically poisonous implies that the thing so described will be fatal or exceedingly harmful if introduced into a living organism in sufficient quantities (as by eating, drinking, or inhaling) *the most poisonous of mushrooms *poisonous gases *aniline is also poisonous but by proper chemical manipulation it becomes the parent of many beneficent medicines—Morrison

In its extended use the term implies extreme noxiousness or perniciousness or power to corrode, rankle, or corrupt *you might condemn us as poisonous of your honor—Shak. *the sentence was pronounced... in a stifling poisonous atmosphere—Conrad
Ana mortal, fatal, lethal, *deadly: *pernicious, baneful, noxious, deleterious, detrimental

poke vb Poke, prod, nudge, jog are comparable when they

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
mean, as verbs, to thrust something into so as to stir up, urge on, or attract attention and, as nouns, the act or an instance of such thrusting. **Poke** implies primarily the use of a body part (as a finger or foot) or of some instrument or implement (as a stick, a rod, or a poker), but sometimes, especially in verbal use and in idiomatic phrases, it may imply the operation of something equally effective in stirring up or in rooting out (walked up and down and **poked** among the rocks—Masefield) (he **poked** the man in front of him to attract his attention) (he **poked** the fire in a stove) (he handed one to Lonnie, poking it at him until Lonnie's attention was drawn from the hogs—Caldwell) (he **poked** his head round the corner—Sayers) (liked to **poke** his nose into another person's affairs) (give the fire a poke or two) **Prod** suggests the use of something sharp which can stab or prick or goad into action; it may be a physical thing (as a sharp pointed stick) (probed and **prodded** and palpated that tortured and self-tortured flesh—Styron) (the cottage needed to be **prodded** along) or it may be something less tangible but equally effective (as sharp words, a threat, or a taunt) (the excitement of trying to ... to **prod** them into action—J. R. Green) (**prod** lazy schoolboys (give Willis a **prod** on the subject of church attendance—Mackenzie). **Nudge** suggests gentler action than the preceding terms; it may imply the use of an elbow in attracting attention especially under conditions when speech is impossible (he **nudged** the person sitting next to him to allow him to pass) (Squeers then **nudged** Mrs. Squires to bring away the brandy bottle—Dickens) (give him a nudge or he will not see her) or it may imply a mere suggestion or hint (what was not trimmed from our pages by the editor's nudge was given away in the haggles of publisher and author—Mailer) or it may imply repeated gentle action (as in moving or shifting) (impudent little tugboats ...) **nudged** our ship out of its slip—J. W. Brown) **Jog** implies a thrust or, often, a touch on or as if on the elbow or arm that to some extent shakes one up (a bored-looking man, with a fashionably-dressed woman jogging his elbow—Jerome) (a jog to one's memory) (almost any idea which jogs you out of your current abstractions may be better than nothing—Whitehead).

**Ana** *push, shove, thrust: *stir, arouse, rouse, awaken: *provoke, excite, stimulate, galvanize, quicken.

**Poke** vb prod, nudge, jog (see under **Poke** vb)

**Polite** *civil, courteous, courtly, gallant, chivalrous.

**Ponder** *display, parade, array.

**Ponder**, **meditate**, **muse**, **ruminate** can mean to consider or examine something attentively, seriously, and with more or less deliberation. **Ponder** characteristically retains its original implication of weighing and usually suggests consideration of a problem from all angles or of a thing in all its relations in order that nothing important will escape one; unlike weight in a related sense (see **Consider** 1) it does not usually suggest a balancing that leads to a conclusion (the great Sung master was wont ... to ... spend the day pondering the subjects of his brush by the side of running streams—Binyon) (**was pondering** over the best style in which to address the unknown and distant relations—Gibbons) **Meditate** adds to **ponder** an implication of a definite directing or focusing of one's thought; in intransitive use, especially, it more often suggests an effort to understand the thing so considered in all its aspects, relations, or values than an effort to work out a definite problem (meditate upon these things; give thyself wholly to them—1 Tim 4:15) (I sat down ... to give way to the melancholy reflections called up by the sight before me. I know not how long I **meditated**—Wilkie Collins) **Intransitive use meditate** implies such deep consideration of a plan or project that it approaches **intend** or **purpose** in meaning (meanwhile, he was **meditating** a book on Shakespearean questions—H. J. Oliver) **Muse** comes close to **meditate** in implying focused attention but it suggests a less intellectual aim: often it implies absorption—Ogg & Ray> Sometimes **politician** is used with a strong suggestion of derogation or contempt to imply scheming, self-interest, artifice, or intrigue in accomplishing one's ends (made the better publicized pilfering of Washington **politicians** seem petty by comparison—Woodward) (known as a **politician** in the deprecatory sense of the word, with all its undertones of corruption and dirty deals and smoke-filled rooms—Rodell) **Statesman** implies elevation above party conflict and a mind able to view objectively the needs and problems of the state and its citizens and to concern itself with the long-term greatest good of the greatest number. The term, often in contrast to **politician**, is likely to stress both eminence and ability (they were **statesmen** not **politicians**; they guided public opinion, but were little guided by it—Henry Adams) (the scornful may say that "a **statesman** is a dead politician," but it is more truly said that a **statesman** lives by his principles and a **politician** is ruled by his interest—H. D. Scott) (the **statesman** differs from the ordinary **politician** in that he is able to envisage and inspire support for policies that are in the long-run, best interests of the most people—Hallowell) **Politico** is virtually interchangeable with **politician** but perhaps more likely to stress concern with partisan political activity than with the actual business of government (his strength rests on the support of veteran **politics** throughout the state—Shannon) (some sharp **politic** still think the President won't run again—Wall Street Journal) Like **politician**, it can be highly derogatory (Machiavelli's The Prince in which the individual **politico** is shown how to succeed by ignoring all moral, social, and religious restraints on his own action—Higher).

The term, often in contrast to **politician**, is likely to stress both eminence and ability (they were **statesmen** not **politicians**; they guided public opinion, but were little guided by it—Henry Adams) (the scornful may say that "a **statesman** is a dead politician," but it is more truly said that a **statesman** lives by his principles and a **politician** is ruled by his interest—H. D. Scott) (the **statesman** differs from the ordinary **politician** in that he is able to envisage and inspire support for policies that are in the long-run, best interests of the most people—Hallowell) **Politico** is virtually interchangeable with **politician** but perhaps more likely to stress concern with partisan political activity than with the actual business of government (his strength rests on the support of veteran **politics** throughout the state—Shannon) (some sharp **politic** still think the President won't run again—Wall Street Journal) Like **politician**, it can be highly derogatory (Machiavelli's The Prince in which the individual **politico** is shown how to succeed by ignoring all moral, social, and religious restraints on his own action—Higher).
and a languid turning over of a topic as if in a dream, a fancy, or a remembrance {let him ... read a certain passage of full poesy or distilled prose, and let him wander with it, and muse upon it ... and dream upon it—Keats} {Cabot mused over the fact that the old bastard considered himself ... one of the eminences of the great metropolis—Purdy} {still a pleasant mystery; enough to muse over on a dull afternoon—Davis} 

Ruminate implies a going over the same problem, the same subject, or the same object of meditation again and again; it may be used in place of any of these words, but it does not carry as strong a suggestion of weighing as ponder, of concentrated attention as meditate, or of absorption as muse, and it more often implies such processes as reasoning or speculation {I sit at home and ruminate on the qualities of certain little books like this one—little elixirs of perfection, full of subtlety and sadness—which I can read and read again—L. P. Smith} {forty years of ruminating on life, of glimpsing it in its simplest forms through microscopes—Kaempffert} {A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.} 

ponderable appreciable, *perceptible, sensible, palpable, tangible 

Ana important, significant, momentous, weighty, consequential (see corresponding nouns at IMPORTANCE) 

Con trivial, trifling, *petty, paltry 

ponderous cumbrous, cumbersome, *heavy, weighty, hefty 

Ana *massive, massy, bulky, substantial: clumsy, *awkward, maladroit: *onerous, burdensome, oppressive, exacting 

pool n *monopoly, corner, syndicate, trust, cartel 

poor adj 1 Poor, indigent, needy, destitute, penniless, impecunious, poverty-stricken, necessitous are comparable when they mean having less money or fewer possessions than are required to support a full life. Poor describes a person, a people, or an institution that comes under this description; it is the most general term of the group, applying not only to those who are in actual want or to those in straitened circumstances, but also to those who, as compared to other groups, live below the level of what is regarded as comfortable {despite the death of the breadwinner, his family was not left poor—Wecter} {I’t wasn’t only that they were not rich ... but that they were so poor that they couldn’t afford things—Mary Austin} 

Between indigent and needy there is very little difference in meaning, both implying urgent and pressing want; both, but especially indigent, may be used to express the state of want to which those who are poor are reduced {the depression had left a number of them indigent, without state or support, the only avoidable source of revenue}{Green Peyton} {would make contributions to needy groups of all races and creeds—Current Biog} {there are many needy persons in this town}{green Peyton} {needy children are provided with hot luncheons, free of cost} {old couple} <the bulk of the pioneers was formed by poverty-stricken people who migrated from densely populated areas—J. F. Embree & W. L. Thomas> 

Necessitous comes close to needy in meaning but often carries a clearer connotation of insistent or persistent demands for relief {it holds out a shadow of present gain to a greedy and necessitous public—Burke} {according to sample surveys ... six percent are only “moderately in need.” The rest are immoderately necessitous—Liebling} 

A rich—an wealthy, affluent, opulent (see RICH) 

2 *bad, wrong 

Ana *deficient, defective: *petty, puny, trivial, trifling, paltry: *base, low, vile 

Con *good, right: satisfying, fulfilling, meeting, answering (see SATISFY) 

poppycock *nonsense, twaddle, drivel, baffle, balderdash, gobbledegook, trash, rot, bull 

popular *common, ordinary, familiar, vulgar 

Ana general, *universal, generic, common: accepted, received, admitted (see RECEIVE): prevalent, *prevailing, current 

Ant unpopular: esoteric 

port n *harbor, haven 

port n presence, *bearing, deportment, demeanor, mien 

portal *door, gate, doorway, gateway, postern 

portend presage, augur, prognosticate, *foretell, predict, foretell, foreshadow, prophecies, forebode 

Ana betoken, *indicate, bespeak, attest: signify, import, *mean, denote 

portent *foretold, presage, prognostic, omen, augury 

Ana presentiment, foreboding, misgiving, *appréhension: forewarning, warning, cautioning or caution (see WARN) 

portentous *ominous, unpropitious, inauspicious, fateful 

Ana threatening, menacing (see THREATEN): prodigious, monstrous: prophesying or prophetic, presaging, foreboding, predicting, foretelling (see corresponding verbs at FORETELL) 

portico *colonnade, arcade, arcade, peristyle 

portion n 1 part, piece, detail, member, division, section, segment, sector, fraction, fragment, parcel 

Ana distribution, dispensation, division, dealing (see corresponding verbs at DISTRIBUTE): fortune, hap, *chance, luck 

portion vb *apportion, parcel, ration, prorate 

Ana allot, assign, allocate: *distribute, dispense, divide, deal 

portly *fleshy, stout, plump, rotund, chubby, fat, corpulent, obese 

Ana burly, hulky, brawny, muscular 

portrait photograph, *image, effigy, statue, icon, mask 

portray *represent, depict, delineate, picture, limn 

Ana image, photograph (see corresponding nouns at
image): describe, *relate, narrate: reproduce, copy, duplicate (see corresponding nouns at reproduction)

pose vb *propose, propose, pound

Ana *ask, question, query: *puzzle, confound: baffle (see frustrate)

pose n 1 Pose, air, affectation, mannerism are comparable when they mean an adopted rather than a natural way of speaking and behaving. Pose implies an attitude deliberately assumed in order to impress others or to call attention to oneself; it may be applied to opinions, policies, declared beliefs, and preferences as well as to manners (his reticence is just a pose) [identified himself with the Great Commoner, and this seemed to me purely a pose, which verged upon demagoguery—Edmund Wilson] Air in its more general related use may come close to demeanor (compare demeanor under bearing), but as compared with pose it, especially in the plural airs, definitely implies artificiality and the intent to give a false appearance, and usually also implies a vulgar pretense of breeding, of grandeur, or of superiority (the red-headed singer dropped her patronizing air, offered her scotch from the bottle—Wouk) [there was no doubt at all that she had acquired insufferable airs—Stafford] Affectation usually designates a specific trick of speech or behavior of one who obviously puts on airs or whose trick impresses others as deliberately assumed and insincere (regarded carrying cigarettes in a case as an affectation—Richard Burke) [agitation for opera in English seems a particular affectation to those who have come to know the works in the original—Dale Warren] Mannerism designates an acquired peculiarity or eccentricity in speech or behavior; it seldom implies insincerity, but it nearly always connotes habit or potential habit. A mannerism consciously assumed becomes thereby also an affectation; what begins as an affectation may become an unconscious and habitual trick of behavior, and so a mannerism (he giggled, and she was surprised she had not noticed this mannerism in him before—Purdy) [those little mannerisms of hers... especially the way she has of pointing a finger at me to emphasize a phrase—Dahl]

2 *posture, attitude

posit vb *presuppose, presume, assume, postulate, premise

posit n presupposition, presumption, assumption, postulate, premise (see under presuppose)

position 1 Position, stand, attitude denote a more or less fixed mental point of view or way of regarding something. Position and stand both imply reference to a question at issue or to a matter about which there is difference of opinion. Position, however, is often the milder term, since it, unlike stand, seldom connotes aggressiveness or defiance of a widely held or popular opinion (he was asked to make known his position on disarmament) [he took the stand that disarmament would not accomplish the ends its proponents had in view] [bases his position on a wide and shrewd scrutiny of man and his history—Alain Locke] [he... agreed thoroughly with my stand that no government or private organization could give health; people had to achieve it by their own efforts—Heiser] Attitude suggests a personal or, sometimes, a group or communal point of view, especially one that is colored by personal or party feeling, is influenced by one's environment or the fashion of the moment, and is, on the whole, more the product of temperament or of emotion than of thought or conviction (a humorous attitude to life) (the Greek attitude toward nature) (it was their attitude of acceptance... their complaisance about themselves and about their life—Wolfe) [their beliefs, attitudes, and prejudices were a crowd of inconsistencies—Farrell]

Ana *point of view, viewpoint, standpoint, angle, slant

positive 1 certain, *sure, cocksure

Ana *confident, assured, sanguine, sure: dogmatic, doctrinaire, oracular, *dictatorial

Ant doubtful

2 *affirmative

Ant negative —Con *neutral, indifferent: nugatory, *vain, idle, hollow: nullifying, annulling (see nullify)

possess own, enjoy, hold, *have

Ana control, manage, direct, *conduct: retain, *keep, reserve, withhold

possessions, belongings, effects, means, resources, assets can mean all the items that taken together constitute a person's or group's property or wealth. Possessions, belongings, effects stress ownership; means, resources, assets emphasize value and especially pecuniary value of what is owned. Possessions may be applied to the aggregate of things owned, regardless of the individual worth or significance of each thing; thus, one may speak of the possessions of an indigent old woman or of the possessions of a Rothschild, the former referring to a few articles of furniture and clothing, the latter to extensive properties and enormous invested capital. Belongings is applied commonly to an individual's more intimate personal possessions (as clothes, household goods, and valuables) (left the house and took all his belongings with him) (my belongings were put away in the room—Frank Perry) Effects may be more inclusive than belongings, but usually less so than possessions. It is often applied to personal as distinguished from real property, especially when the reference is to the estate of a deceased person (he died leaving no effects of value) (all his effects were divided among his relatives before an administrator could be appointed) Sometimes it is applied to movable articles as distinguished from those that are stationary (a sale of household effects) (all his personal effects are in his trunk) Means usually applies to all the money that is available, in the form of revenue from capital, income, or ready money, for expenditure (lived beyond his means) (a man of large means) When unqualified means frequently implies some degree of affluence (decked out with furs, gloves and a hat sewn with pearls—one of those middle-aged women of means—Cheever) Resources, on the other hand, is applied to all possessions that have actual or potential, but not necessarily money, value and that may be depended upon in case of need or of deficiency (a society which gives an increasing share of its resources to military purposes—Science) Sometimes the term comprehends all tangibles and intangibles possessed whether they are actually used or are merely available for use; thus, a statement of a company's resources is a statement that covers every item that may be regarded as a part of the company's wealth (the turn of the 20th century, when the financial resources of the well-to-do were matched by the national affluence—Lucius Beebe) Often the term refers specifically to possessions held in reserve for emergencies or to sources of supply as yet untapped; thus, the natural resources of a country include its unmined minerals, unfeled timber, water sources, and wild life. Assets both in law and in accounting implies an opposition to liabilities and therefore suggests the possibility of an inequality between the two and a difference between one's ostensible and one's actual wealth. When the term is used in reference to the settlement of the estate of a deceased person or to the legal administration of the property of an insolvent or bankrupt person or concern, the assets include all the possessions of marketable value which may be turned into money to provide for the payment of the liabilities (the assets of the estate were sufficient to cover all liabilities,
including the decedent's debts and his legacies. When used in reference to general balance sheets of a company or corporation, the term comprehends all items which from one point of view can be called resources having book value. But assets is never exactly the same as resources, because the latter word does not, as assets does, imply a comparison with liabilities.

**possible**

1. Possible, practicable, feasible can mean capable of being realized. Possible is used to dispel doubt that something may or does occur or exist or may come to exist (the regime of religious toleration has become possible only because we have lost the primal intensity of religious conviction—Cohen) (although he still asserts that community of goods would be the ideal institution, he reluctantly abandons it as a basis for a possible state—Dickinson). Practicable refers to what may be readily effected, executed, practiced, used, or put into operation (trial by jury—an institution in which . . . we have the very abstract and essence of all practicable democratic government—Mallock) (the only practicable tactics to be pursued were those of the routine police procedure—S. S. Van Dine).

Feasible may designate what is likely to work out or be put into effect successfully or what in a difficult situation seems the expedient least liable to fail (cheap iron and steel made it feasible to equip larger armies and navies than ever before—Mumford) (only the most simple types of utilization are feasible—Van Valkenburg & Huntington).

**posture**

1. Posture, attitude, pose denote a position assumed by the body, or the disposition of the parts of the body with relation to one another. Posture applies to the relative arrangement of the different parts of the body. It may apply to a habitual or characteristic arrangement and then specifically means the way in which one holds oneself and refers to one's physical carriage or bearing (her posture is excellent) (pictures illustrating defects of posture) (examples of correct posture) (an urbane alertness about the face, the posture—Wouk) or it may apply to an arrangement determined with reference to the needs of the mood or the moment and then requires qualification (a sitting posture) (a kneeling posture) (the posture of supposition) (his whole figure had a prowling and half-crouching posture—Wolfe) or the assistance of the context to evoke a picture of how the parts of the body are disposed or to reveal the intention or end (there's a posture for a man to fight in! His weight isn't resting on his legs—Shaw). Attitude applies chiefly to a posture that is unconsciously expressive or is intentionally assumed, often as a result of a particular mood or state of mind (they slipped into the embassy . . . so wary, so frightened and in such attitudes of wrongdoing—Cheever) (uttering platitudes in stained-glass attitudes—Gilbert). Pose applies to an attitude or to a position of some part or parts of the body which is assumed for the sake of effect, or which, if unconscious, strikes the observer as effective or as affected (the pose of a model) (the lofty pose of her head expressed an habitual sense of her own consequence—Shaw) (his pose was easy and graceful). A superb self-confidence radiated from him—Gibbons.

**pot**

1. *bet, wager, stake, ante

**potent**

1. *powerful, puissant, forceful, forcible

**pouch**

1. *bag, sack

**pour**

1. *beat, pummel, buffet, baste, belabor, thrash
poverty

though it also may connote abundance or continuousness in that flow <the guests streamed past, shaking hands, exchanging greetings—Styron> Gush implies a sudden and copious emission of or as if of something released from confinement; it often connotes a coming in a jet or in spurs <blood gushed from the wound> <he . . . suddenly gushed forth in streams of wondrous eloquence—Stephen> <beer began to gush . . . in a white cascade—Pynchon>

Sluice implies the operation of something like a sluice for the regulation or control of the flow of water; therefore the verb sluice suggests a sending of water or liquid over a surface in an abundant stream <water so fresh . . . never sluiced parched throats before—Thackeray> <Mowgli, with the rain sluicing over his bare shoulders—Kipling>

Ana emerge, *appear: flow, issue, proceed, *spring

poverty, indigence, penury, want, destitution, privation all denote the state of one who is poor or without enough to live upon. Poverty, the most comprehensive of these terms, typically implies such deficiency of resources that one is deprived of many of the necessities and of all of the comforts of life <in Syria he feathered his nest so successfully that in two years he raised himself from poverty to opulence—Buchan> <complaining of his poverty as if it were a new invention and he its first victim—Malamud>

Indigence, often opposed to affluence, does not suggest dire or absolute poverty, but it does imply reduced or straitened circumstances and therefore usually connotes the endurance of many hardships and the lack of comforts <reduced to indigence in his old age> <our newfound European indigence now makes us more materialistic than we used to pride ourselves on being—Times Lit. Sup.>

Penury may or may not imply abject poverty, but it does suggest such a degree of need, especially of money, that one is cramped or oppressed by it <chill Penury repressed their noble rage—Gray> <she has to take anything she can get in the way of a husband rather than face penury—Shaw>

But penury may imply the semblance of poverty that comes from miserliness or penuriousness <compare penurious under stingy> <her relatives considered that the penury of her table discredited the Mingott name, which had always been associated with good living—Wharton>

Want (see also lack) and destitution both imply an extreme of poverty that leaves one without the basic necessities of life; both terms, but especially the latter, often imply starvation and homelessness or the urgent need of help <he is in great want> <here to the homeless child of want my door is open still—Goldsmith>

<sinking stage by stage from indigence to squalor, from squalor to grimy destitution—Mumford> Privation, though implying a state that is comparable to the one suggested by indigence, does not, as the latter term does, necessarily suggest poverty; although it implies a condition of being without many of the comforts and sometimes of the necessities of existence or having only an insufficient supply of them, it may connote another cause of such a condition than a lack of money or of possessions of value <an explorer must undergo prolonged privations> <months of privation after the crop failure had left them ill-nourished>

Ana necessity, *need, exigency: strait, pass, pinch (see juncture)

Ant riches

poverty-stricken *poor, indigent, needy, destitute, peniless, impemcious, necessitous

power

1 Power, force, energy, strength, might, puissance mean the ability to exert effort for a purpose. Power is the most general of these terms and denotes an ability to act or be acted upon, to effect something, or to affect or be affected by something <the finest machine in the world is useless without a motor to give it power> <the mechanical power of the internal-combustion engine> <raise the productive power of the nation> <the sound of a great flood moving with majesty and power—Cather> <give an attorney the power to act for one> <in any link between past and present there was potent magic, some power to evoke allegiance—Hervey> <hateful to feel their power over me when I knew that they were nothing but fancies—Hudson>

Force (see also force 2) implies the exhibition or the exercise of power; the term usually carries with it a suggestion of actually overcoming resistance (as by setting a thing in motion or accelerating its motion or driving a person or thing in the desired direction); thus, one having the power to do something exerts force only when he actually does it <a wind gathers force> <accumulated force which drove them as if discharged from a crossbow>

jefferies> <a hard and rebellious element not to be conquered mainly by skill . . . but mainly by force—Ellis> <the perverse wish to flee . . . not from the laws and customs of the world but from its force and vitality—Cheever>

Therefore force is often applied to a person or thing that exerts its power with marked efficacy or efficiency <they believed that the Church was the only force which could consolidate the nation—inge> <art is but the expression of a harmony of life, a fine balance of all the forces of the human spirit—Binyon>

Energy in general use and especially as applied to persons implies stored-up power releasing itself in work or craving such release <the prodigious energy put forth by industry in time of war—Morrison> <in spite of his small size and fragile build, the man was a dynamo of energy and could perform the labors of a Titan—Wolfe> <it was marvelous . . . that the energy of her spirit could carry through so triumphantly her frail nervous system—Ellis>

Strength applies to the power that resides in a person or thing as a result of qualities or properties that enable him or it to exert force or to manifest energy or to resist pressure, strain, stress, or attack. Physically strength implies soundness (as of health or of construction or design) <the tensile strength of a rope> <I was not delicate, not physically; when it was a matter of strength I had as much as the next man—Mailer> while mentally and morally it may imply capacity for endurance or resolution or intrepidity <show strength in temptation> <strength to surmount the horrors and humiliations of . . . defeat—O'Donovan>

When applied to military forces it usually implies power manifest in such things as numbers, equipment, and resources <estimate the strength of the enemy> <a fleet incomparable in strength> Might and puissance are rather rhetorical or poetical words meaning operative or effective power or force. Might often suggests great or superhuman power; it is therefore appropriate when the reference is to supernatural beings or supranatural forces or to human power that is so strong that it cannot be gainsaid <protect us by thy might, Great God, our King—S. F. Smith> <let us have faith that right makes might—Lincoln>

<the pride and might and vivid strength of things—Galsworthy>

Puissance is often indistinguishable from might, but it can also connote an impressive display of power <we should advance ourselves to look with forehead bold and big enough upon the power and puissance of the King—Shak> <the sapience and puissance of the American businessman in general—G. W. Johnson>

Ana *ability, capacity, capability: *gift, genius, talent; faculty: qualification, competence (see corresponding adjectives at able)

Ant impotence

2 Power, faculty, function can all mean an ability of a living being to act or perform in a given way or a capacity for a
particular kind of action or performance. Power, the comprehensive term of this group, may apply to a capacity for action or performance that does not or apparently does not call the mind into play (the power to digest food) (the power of reflex movement) but it more frequently applies to an ability or capacity that involves either mental activity or mental receptiveness (the power to think clearly (the human mind is a fearful instrument... in its mysterious powers of resilience, self-protection, and self-healing—Wolfe) Faculty in general, as distinct from technical psychological or metaphysical use, is applicable to those powers which are the possession of every normal human being, though not always manifested in the first months of infancy or the earliest years of childhood (the faculty of hearing) (the faculty of speech) or it may apply to any one of the several specific powers of the mind (as will, memory, and reason) that are often felt as discrete and discoverable (the truth is that memory and imagination, the two most important human faculties, are scarcely cultivated at all—Grandgent) Sometimes faculty means no more than a distinguishable capacity of the functioning mind or soul (once a thing did become pertinent, he had an amazing faculty for absorbing it wholly—Terry Southern) (her faculty for moral perception had withdrawn into that dim neutrality—Hervey) (it is the one occasion when violent grief, disturbing his faculties, appears in his correspondence—Bello) Function may denote an activity which can be more or less definitely associated with the brain or the central nervous system or a part of either (all mental activities, such as seeing, hearing, perceiving, conceiving, imagining, recalling, etc., are termed functions—Murchison) or it may apply to one (as digestion or respiration) in which the mental component is slight or obscure.

3 Power, authority, jurisdiction, control, command, sway, dominion are comparable when they mean the right or prerogative of determining, ruling, or governing or the exercise of that right or prerogative. Power even in this specific sense never loses its fundamental implication of ability, but in this case it is a capacity for rule that may derive from rank, office, or even character or personality (in an absolute monarchy the king has sole power) (it is a strange desire, to seek power, and to lose liberty; or to seek power over others, and to lose power over a man's self—Bacon) (for thine is the kingdom, and the power, and the glory, for ever—Mt 6:13) Power when used with reference to a definite person or body or office commonly connotes divisibility or strict limitation (the trustees have power of appointment) (the charter gives the city power to tax sales) (he was given power of attorney to act for his brother) (it is not enough that a statute goes to the verge of constitutional power. We must be able to see clearly that it goes beyond that power—Justice Holmes) Authority is often used interchangeably with power; nevertheless, there can be an essential difference in meaning, since authority usually refers to power resident in or exercised by another than oneself; thus, one may have power, rather than authority, to determine one's own actions, but a parent or a master or a ruler has the authority, rather than the power, to determine the actions of those under him; children are obedient to authority rather than to power (they were both getting childish and needed care and yet they resented any loss of authority—Buck) (the object is to induce the child to lend of his own free will; so long as authority is required, the end aimed at has not been achieved—Russey) (authority in the religious sphere generally means absolute or infallible authority, such as Catholics ascribe to the Church—Inge) Power and authority, especially in the plural, often refer to the persons who have or hold power or authority as defined. Powers, however, usually occurs in the phrase "the powers that be" and is either somewhat more comprehensive or less explicit in its reference than "the authorities," which often means the persons who have authority in the special instance to direct, to decide, or to punish (he is always in instinctive opposition to the powers that be) (he threatened to report the offense to the authorities) Jurisdiction implies possession of legal or actual power to determine, to rule, or to govern within definitely assigned limits, and of the authority to so act in all matters coming within the sphere of that power (the principle of law is too well settled to be disputed, that a court can give no judgment for either party, where it has no jurisdiction—Taney) (this new and populous community must, for the present, the Kansas Board wrote, be accounted under Father Latour's jurisdiction—Cather) Control stresses possession of the authority to restrain or curb and its effective exercise, or of actual power to regulate or keep responsive to one's will not only persons but things; thus, a teacher who has lost control of his class has reached a point where the pupils no longer recognize his authority; a fire has gone beyond control when those who are fighting it have lost all power to check it (completely out of control, the woman had shrugged off her husband's embarrassed efforts to stop her—Wouk) (he was at last in triumphant control of his destiny—Wolfe) Command implies such control as makes one the master of men, and such authority that obedience to one's order or one's will either inevitably follows or is inexorably enforced; thus, one speaks of the officer in command, rather than in control, of a regiment; a person has command of a situation when he completely dominates it or has all persons or things involved in it under control (how, in one house, should many people, under two commands, hold amity?—Shak.) Command is also used in reference to things which one has mastered so thoroughly that one encounters no resistance or interference in using, recalling, or controlling them (his brush did its work with a steady and sure stroke that indicated command of his materials—Jeffries) (something beyond disorderly or careless thinking, something close to a complete loss of emotional command—Anthony West) Sway tends to be slightly rhetorical because its use in this sense was originally figurative and the word still carries a hint of its original implications of swinging or sweeping through an arc or circle; hence, when a word is desired that means power but also connotes extent or scope and such added matters as preponderant influence, compelling authority, or potency, sway is the appropriate choice (the British Empire extended its sway to every quarter of the earth) (primal spirits beneath his sway—Shelley) (the law of compensation rules supreme in art, as it holds sway in life—Lowes) Dominion impues sovereignty to the power in question or supremacy to the authority in question (God of our fathers, known of old, Lord of our far-flung battle line, beneath whose awful Hand we hold dominion over palm and pine—Kipling) (foreign dominion in any shape would soon become hateful—Freeman) Ana (right, privilege, prerogative, birthright: management, direction (see corresponding verbs at CONDUCT): ascendency, *supremacy

powerful, potent, puissant, forceful, forcible are comparable when they mean having or manifesting power to effect great or striking results. Powerful is applicable to something which stands out from the rest of its kind as exceeding the others in its display of strength or force or in its manifestation of energy; the word also usually implies
powerless, impotent both mean unable to effect one's purpose, intention, or end. Powerless denotes merely lack of ability to effect; it often implies the actual exertion of power or force; it usually means merely inability to move: "she was powerless to move." Impotent has a more specific and restricted sense; it is used only of organisms or of impotence acquired by loss of function: "he was impotent because his penis was amputated." *Powerless: inefficacious

Powerless is not limited to the exercise of power; it also refers to that which makes no display of effort or violence, provided it impresses its undoubted force on the observer: "a forceful personality." The term "forceful" is often used to indicate energy or strength regardless of whether it is being exercised or not. The word is applicable even to something which makes no display of effort or violence.

**practice**

Vb Practice, exercise, drill are comparable when they mean, as verbs, to perform or cause one to perform an act or series of acts repeatedly and, as nouns, such repeated activity or exertion. Practice fundamentally implies doing, especially doing habitually or regularly, often in contrast to thinking, believing, and professing or to theory and precept. However, the meaning of a word may change over time, and usage may differ. Therefore, it is important to consider the context in which a word is used.

**Analogous Words**

- Powerless: inefficacious
- Practicable: possible

**Antonyms**

- Able, capable, competent: efficacious, effectual
- Effective, efficient: vigorous, energetic, strenuous
- Practicable 1 feasible, possible

**Contrasted Words**

- اًپت: impotent
- Practical: impracticable

**Related Words**

- Practice vb: Practice, exercise, drill are comparable when they mean, as verbs, to perform or cause one to perform an act or series of acts repeatedly and, as nouns, such repeated activity or exertion. Practice fundamentally implies doing, especially doing habitually or regularly, often in contrast to thinking, believing, and professing or to theory and precept.

**Connoted Words**

- Effective, efficient: vigorous, energetic, strenuous
- Practicable: possible

**Other Relevant Words**

- Power: efficacious
- Practicable: possible

---

**Notes**

The terms "powerless" and "impotent" are often used interchangeably to denote the inability to perform an action or task. However, "powerless" is more general and can refer to the inability to exert power in any form, while "impotent" is more specific and usually refers to the inability to perform a sexual act. "Practicable" and "impracticable" are antonyms, indicating whether something is possible or not. "Practicable" means possible or feasible, while "impracticable" means impossible or not possible. These terms are often used in technical or scientific contexts, but can also be applied in everyday language.

**Explanatory Notes**

See also explanatory notes facing page 1.
occasion for the **exercise** of a number of important virtues, namely, those required by the strong in dealing with the weak—Russell** <i>will can only be exercised in the presence of something which retards or resists it—Inge</i>. Like practice, **exercise** may be used also to imply acts performed repeatedly for the sake of an ulterior end, but **exercise** refers especially to those directed to the attainment of health or vigor (as of body or mind) **Tom was being exercised like a raw recruit** <i>grow mentally dull through lack of physical exercise</i> <i>exercise** is good for the muscles of mind and to keep it well in hand for work—J. R. Lowell</i> <i>poetry is in France an exercise, not an expression. It is to real French expression, to prose, what gymnastics and hygiene are to health—Brownell</i> **Drill** fundamentally connotes an intention to fix physical or mental habits as deeply as though they were bored in by the use of a drill; the term stresses repetition (as of military evolutions, of word pronunciations, or of grammatical rules) as a means of training and disciplining the body or mind or of forming correct habits **<i>drill troops in marching and handling arms</i>** <i>a drill in arithmetic</i> <i>this is a real danger in modern education, owing to the reaction against the old severe drill. The mental work involved in the drill was good; what was bad was the killing of intellectual interests—Russell</i> **An** > **perform, execute, fulfill: follow, pursue: repeat, iterate**

**practice n** 1 habit, custom **An** procedure, process, proceeding: method, system, way, fashion, mode, manner 2 exercise, drill (see under practice vb) **An** use, usefulness: use, form, convention, convenance: pursuit, calling, work **Ant** theory: precept

**praise, laud, acclaim, extol, eulogize** mean to express approval or esteem. Praise often implies no more than warmly expressed commendation <i>what we admire we praise</i> and when we praise, advance it into notice—Cover.> When specifically referred to persons, it frequently suggests the judgment of a superior <i>praise a pupil for his diligence</i> <i>he's given you every encouragement. He's praised you to the skies—Wouk</i> However, it is also used in reference to God or a god or to a saint; then it implies glorification by such acts of homage as song or prayer **praise God from whom all blessings flow—Kent** **Laud** implies high, sometimes excessive, praise **history written by the conqueror, lauding to the skies the victories of its sublime troops—Americas** <i>both of the writers lauded highly . . . contemporaries who were certainly no better than middling performers in their several arts—Montague</i> Acclaim usually suggests enthusiastic and public expression of approval <i>he was acclaimed not only in his own country but throughout the civilized world—Heiser</i> **a new British film that has been widely acclaimed by the critics and public as a classic of its kind—Gillett** Extol retains its original implication of lifting up or raising and suggests praise that exalts or magnifies **extol the Lamb with loftiest song, ascend for him our cheerful prayer** <i>one of those rare days in June eulogized by poets—Barkins</i> **An** commend, applaud, compliment: exalt, magnify, aggrandize **Ant** blame — **Con** asperse, malign, traduce, vilify, calumniate, defame, libel: disparage, decry, detract, belittle: reprehend, reprobrate, censure, denounce, criticize **prank n** Prank, caper, antic, monkeyshine, dido mean a playful, often a mischievous, act or trick. Prank carries the strongest implication of devilry of all these words, though there is little suggestion of malice and primary emphasis upon the practical joke <i>the sons are wild and wanton sons, and perform all the pranks to be expected of them—T. S. Eliot</i> **when, with elfin delight, he performs a successful practical joke—Wouk** however, it is also used <i>a small boy whose antics were somewhat amusing, but not understandable—Terry Southern</i> **Monkeyshine** may be applied to a caper or antic, but, especially in the plural, the term typically applies to behavior or a trick that attracts attention by its inappropriateness and often impropriety <i>scientists on the alert for any atomic monkeyshines—McCarten</i> <i>have been at this monkeyshine for a generation. Today a loaf of "bread" looks deceptively real—Philip Wylie</i> <i>students of political monkeyshines—Newsweek</i> Dido, also frequently used in the plural, applies to an absurd, foolish, or mischievous act and may come close to monkeyshine in suggesting obtrusive inappropriateness <i>this and ancillary didoes culminate in a whopper of an orgy—Perelman</i> <i>some time mayor . . . whose unstatesmanlike didoes made a circus of municipal affairs—Time</i> **Prat** chatter, *chat, gab, patter, prattle, babble, gabble, jabber, gibber **Prattle** chatter, patter, prat, gab, prattle, babble, gabble, jabber, gibber **Pray** plead, petition, appeal, sue (see under PRAYER) **An** supplicate, entreat, beseech, implore, *beg **Prayer**, suit, plea, petition, appeal mean an earnest and usually a formal request for something and their corresponding intransitive verbs <i>pray, sue, plead, petition, appeal** mean to make such a request. Prayer and pray imply that the request is made to a person or body invested with power or especially to God or a god; the words usually therefore connote humility in approach and often fervor in entreating <i>we do pray for mercy; and that same prayer doth teach us all to render the deeds of mercy—Shak</i> In religious use, where <i>pray** andpray** always imply an act of worship, they may or may not connote a request or petition. The implication of making a request is retained, however, in the specific legal use of these terms in a court of equity, where formally one *prays* for relief; the *prayer* in a bill in equity is the part that specifies the kind of relief sought. The words are also used in formal petitions or remonstrances to a legislative body. Suit and sue imply

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
preamble 627 precipitate

da deferential and formal solicitation sometimes for help or relief but often for a favor, a grace, or a kindness. Except in legal use (see suit n 2), in reference to the addresses of a man to the lady he hopes to marry, and in some idiomatic phrases such as "sue for peace," the words are somewhat old-fashioned in flavor (this suit to the Muse . . . relies too much on exertions and capacities—The Nation) <she sued year after year . . . for acceptance by a society of dreary dowagers—E. K. Brown> Plea (see also APOLOGY) and plead often suggest a court of law, the status of a defendant or of an accused person, and formal statements in answer to a plaintiff's allegations or the state's charge. In general use both terms imply argument or urgent entreaty, of which self-justification, a desire for vindication or support, or strong partisanship is usually the motive <make a plea for forgiveness> <plead for a more tolerant attitude> <she dreaded the arguments, their tear-stained pleas—Malamud> <I plead frankly for the theistic hypothesis as involving fewer difficulties than any other—Inge> Petition and its verb petition imply a formal and specific request, often in writing, presented to the person or body that has power to grant it. The words carry little or no connotation of abject humility or of entreaty; rather, they suggest a right to make a request, as one of the sovereign people or as one who is confident that it will be judged on its merits <the flood of interest begging relief from the political crisis—Woodward> <she neither petitioned for her right, nor claimed it—Meredith> Appeal, as noun and verb, basically implies a call for attention to and favorable consideration of one's plea <appeal for mercy> <appeal to one’s family for help> Often it additionally connotes an insistence on being heard and hence a change of plea from an inferior to a superior power (as a higher court or a higher authority) or to an emotion in an attempt to evoke a favorable response or judgment <appeal to the supreme court for a new trial> <to what sources of information do I appeal for guidance?>—Cardozo >Mantalinis and Dobbins who pursue women with appeals to their pity or jealousy or vanity—Shaw> Sometimes, used alone, either noun or verb implies a sympathetic or favorable response or a compelling quality <an appealing child> <the song has a human appeal> Ana supplication, entreaty, beseeching, imploring, begging (see corresponding verbs at BEG): worship, adoration (see under REVERE)
preamble *introduction, prologue, prelude, preface, foreword, exordium

precarious *dangerous, hazardous, perilous, risky Ana *doubtful, dubious, questionable: distrustful, mistrustful (see corresponding verbs at DISTRUST): chance, chancy, haphazard, *random Con *safe, secure: *steady, even, equable, constant

precedence *priority Ana leading or lead, guiding or guide (see GUIDE): antecedent, foregoing (see corresponding adjectives at PRECEDING)

precedent adj *preceding, antecedent, foregoing, previous, prior, former, anterior

preceding, antecedent, precedent, foregoing, previous, prior, former, anterior are comparable when they mean being before, especially in time or in order of arrangement. Preceding, opposed to succeeding and following, is restricted to time and place; it usually means immediately before <the preceding day> <the preceding clause> <events preceding the opening of the story> Antecedent, opposed to subsequent and consequent, usually implies order in time, but unlike preceding, it often suggests an indefinite intervening interval <events antecedent to the opening of the story> <Chaucer’s poems were written in a period antecedent to the Elizabethan Age> Very often, also, the word implies a causal or a logical, as well as a temporal, relation <to understand the success of modern dictators we must have a knowledge of antecedent conditions> <a conclusion is based on a chain of antecedent inferences> Precedent often applies to one thing which must precede another thing if the latter is to be valid or become effective; thus, a condition precedent in law is a condition that must be fulfilled before an estate can be vested in one or before a right accrues to one. Foregoing, opposed to following, applies almost exclusively to statements <the foregoing citations> <the foregoing argument> Previous and prior, opposed to subsequent, are often used almost interchangeably <his life previous to his marriage> <this will cancels all prior wills> But prior sometimes implies greater importance than previous; thus, a previous obligation suggests merely an obligation entered into earlier in point of time, whereas a prior obligation is one which surpasses the other in importance and must be fulfilled in advance of any other; a prior preferred stock is one whose claim to dividends or to a specified sum in liquidation comes before other preferred stocks of a company. Former, opposed to latter, even more definitely than prior, implies comparison; thus, there can be a former engagement only when there is also a later one; a previous or prior engagement may prevent one’s making a second. Anterior, opposed to posterior, also comparative in force, applies to position, usually in space, sometimes in order or time <the anterior lobe of the brain> <organization must presuppose life as anterior to it—Coleridge>

Ant following

precept rule, *law, canon, regulation, statute, ordinance Ana *principle, fundamental, axiom: *doctrine, tenet, dogma: injunction, behest, bidding (see COMMAND n)

Ant practice: counsel

precious *costly, expensive, dear, valuable, invaluable, priceless Ana *choice, exquisite, recherché, rare: valued, prized, appreciated, cherished (see APPRECIATE)

precipitate vb *speed, accelerate, quicken, hasten, hurry Ana drive, impel (see MOVE vb): *force, compel, coerce, constrain

precipitate n *deposit, sediment, dregs, lees, grounds

precipitate adj Precipitate, headlong, abrupt, impetuous, hasty, sudden as applied to persons or their acts or behavior denote characterized by excessive haste and unexpectedness. Precipitate especially stresses lack of due deliberation; sometimes it suggests promptness and is therefore especially applicable to decisions or to actions based on decisions <she was resolved to lose nothing by neglect or delay, but also she meant to do nothing precipitate—H. G. Wells> Headlong throws the emphasis on rashness and lack of forethought; it is used to describe not only persons and their acts but the qualities exhibited by such persons or in such acts <headlong folly> <headlong haste> <the headlong torrent of her feelings scared her—Wouk> Abrupt when applied to actions suggests a complete lack of warning or, sometimes, unceremoniousness <an abrupt departure> <the story came to an abrupt end> and when applied to manners or words, it usually implies coarseness <an abrupt refusal> Impetuous implies violence or vehemence; as applied to persons, it often also suggests impulsiveness or, at times, extreme impatience <no necessity exists for any hurry, except in the brain of that impetuous boy—Meredith> <they had been impetuous and daring, making up their minds in a couple of flashes—Farrell> Hasty stresses quickness of response and often suggests thoughtlessness and hot temper rather than impul-

siveness (often hasty in her judgment of strangers—Dahl) <too passionate and hasty to keep pace with the deliberate steps of his leader—Philip Marsh> Sudden is distinguishable from sudden meaning unexpectedly only by its added implications of extreme hastiness or impetuosity <given to sudden rages> <now and then an access of . . . sudden fury . . . would lay hold on a man or woman—Kipling>

Anna headstrong, willful, refractory (see UNRULY)

Ant deliberate — Con leisurely, *slow

precipitous *steep, abrupt, sheer

Ana soaring, towering, rocketing, ascending, rising (see RISE)

précis sketch, aperçu, survey, *compendium, syllabus, digest, pandect

precise exact, accurate, *correct, nice, right

Ana definite, express, *explicit: strict, *rigid, rigorous, stringent

Ant loose — Con lax, slack (see LOOSE): *careless, heedless

preciseness *precision

precision, preciseness both denote the quality or character of what is precise. Precision denotes a quality that is sought for or is attained usually as a highly desirable thing. When used in reference to language it implies expression with such exactitude that neither more nor less than what applies to the thing under consideration is said <defining words with utmost care, they fashioned their statements of doctrine with meticulous precision—Dinsmore> <a vague term of abuse for any style that is . . . so evidently bad or second-rate that we do not recognize the necessity for greater precision in the phrases we apply to it—T. S. Eliot> When used in reference to the arts and sciences, the term usually implies such clearness of definition or such sharpness in distinction or in distinguishing that there is no confusion about outlines, boundaries, dividing lines, or movements <however we may disguise it by veiling words we do not and cannot carry out the distinction between legislative and executive action with mathematical precision—Justice Holmes> <acting, singing, and dancing seem to me the best methods of teaching aesthetic precision—Russell> Precision is also used in reference to an instrument, a machine, or a part of a machine that must be made with such exactness of measurements that an infinitesimal fraction of an inch would debar it from fulfilling its function <precision instruments> (tiny, Swiss-made replicas, they were precision machined and finely detailed, all scaled to perfection—Terry Southern)

Preciseness is rarely interchangeable with precision, since it carries so strong an implication of severity or of strictness, or sometimes of overnicety in the observance of religious laws, the code of one's profession, or the proprieties as dictated by one's class or social equals that it is deprecative as often as it is laudatory <savoring of Puritanism and overstrict preciseness—Prynne> <the letter . . . had the preciseness of an imperial mandate—Meredith> <there was a certain amount of preciseness about the young man, and his approach to Texas was in the best striped-trowsers tradition—T. D. Clark>

predilection, dilemma, quandary, plight, scrape, fix, jam, pickle can all denote a situation from which one does or can extricate himself only with difficulty. Predilection carries the implication that the situation constitutes a problem for those who are involved in it and may additionally imply lack of freedom to do what one wishes or finds essential for some reason, or it may imply deep perplexity as to ways out of the situation <advice . . . may be of such nature that it will be painful to reject and yet impossible to follow it; and in this predilection I conceive myself to be placed—Crabbé> <the predilection with which our civilization now finds itself confronted—the problem, namely, how to find healthy, happy leisure for all the working millions who are now being liberated by machines—L. P. Smith> Dilemma applies to a situation which constitutes a predilection from which one can escape only by a choice of equally unpleasant or unsatisfactory alternatives <faced with a dilemma: if they discard obsolete, headings, for the librarians may suffer; if they do not discard them, the user may be penalized—Lawler>

Quandary differs from dilemma chiefly in its stress on puzzlement or perplexity; in fact, this implication is often so emphasized that the suggestion of a dilemma or an unavoidable choice between alternatives is lost or obscured <he was in a quandary as to how he could keep his appointment> <all his quandaries terminated in the same catastrophe; a compromise—Disraeli> The remaining words all definitely imply a difficulty, often a very disagreeable situation. Plight suggests an unfortunate, trying, or unhappy situation <the plight in which the world finds itself today—Hobson> <the plight of the ten million forgotten men and women living at or below the destitution level—Crossman> Scrape applies to a specific difficulty in which one is involved through one's own fault; often it suggests a being in disgrace or disadvoyr <he escapes from trouble only to become idiotically concealed; and . . . plunges dementedly into a more ghastly scrape—Swinerton> Fix and jam are somewhat casual terms that stress involvement and entanglement from which extrication is difficult <he will be in a fix if he doesn't settle his debts> <they get sick and it puts them in a jam and they end up under a pile of bills—Basso> Pickle applies to a particularly distressing or sorry plight <but when I was left ashore in Melborne I was in a pretty pickle. I knew nobody, and I had no money—Shaw>

Ana *state, situation, condition, posture: pass, pinch, strait, emergency, exigency, *juncture

Ana *declarative, declarative: *affirm, profess, *assert, aver, protest, avouch, avow, warrant

predilection, partiality, prepossession, prejudice, bias are comparable when they mean an attitude of mind which predisposes one to make a certain choice or judgment or to take a certain view without full consideration or reflection. Predilection implies a strong liking that results from one's temperament, one's principles, or one's previous experience and that predisposes one to prefer certain kinds of things (as friends, books, foods, or methods) or to accept a thing without reference to any other test <a predilection for the strange and whimsical—Coleridge> <one or two authors of fiction for whom I have a predilection—Benson> Partiality implies a disposition to favor a particular person or thing because of some predilection or, more often, because of undue fondness or partialisanship; it may connote unfairness <show partiality in appointments to office> <fond partiality for their own daughters' performance, and total indifference to any other person's—
predispose 629  premature

**Austen** 〈I have a partiality for a man who isolates an issue and pleads to it, not all around the bush—Cozzens〉

Prepossession implies a fixed idea or conception in the light of which a new person, new idea, or new experience is judged 〈no approach opens on anything except from its own point of view and in terms of its own prepossessions—Blackmur〉 〈the prepossessions of childhood and youth—Dugald Stewart〉

**Prejudice** applies to a judgment made before evidence is available and typically to an unfavorable preconception marked by suspicion and antipathy 〈those who use their reason do not reach the same conclusions as those who obey their prejudices—Lippmann〉 〈I do not think I speak only from my prejudices, although in justice I must admit that I approached Riesman's work with animus—Mailer〉

Bias implies a lack of balance or distortion in one's judgment owing to the pull in a predictable or consistent direction of a predilection or a prepossession or of partiality or prejudice and a resulting inclination in favor of or against a person or thing 〈it is as well that you be able to allow for my personal bias—Shaw〉

〈the most pernicious kind of bias consists in falsely supposing yourself to have none—Moberly〉

**pregnant** meaningful, significant, *expressive, eloquent, sentient

**Ana** weighty, momentous, consequential, significant, important (see corresponding nouns at importance)

**prejudice n** bias, partiality, prepossession, *predilection

**Ana** predisposition, disposition, inclination (see corresponding verbs at incline): *leaning, penchant

**preliminary adj** Preliminary, introductory, preparatory, prefatory describe something that serves to make ready the way for something else. Preliminary suggests reference to what must be done or made ready or acquired before entrance into some definitive state or activity becomes possible (the small amount of trouble involved in this preliminary measure will prove to be well worthwhile in avoiding muddle—Dowdeswell) 〈a preliminary education obtained at home and in the local schools—Phalen〉 〈the ideal of cultivation cannot be appealed to as a standard without preliminary explanations and interpretations—Eliot〉

〈the scientific spirit demands . . . a wish to find out the truth . . . There must be preliminary uncertainty, and subsequent decision according to the evidence—Russell〉

**Introductory** usually implies reference to the first steps in a process and therefore seldom applies to what is a prerequisite, as does preliminary, but rather to what sets an action, a work, or a process going (the introductory scene should present the situation to be developed) (an introductory sketch of equity courts and their jurisdiction—Wilkinson)

**Preparatory** comes close to preliminary in meaning, but it throws the emphasis upon matters that should be attended to in order to make a person or thing ready for what ensues or may ensue (take preparatory measures against a possible air raid) (a note on sources and a bibliography . . . indicate the wide range of the author's preparatory reading—Brown)

**Prefatory** usually suggests not absolute need of preparation but a desire on the part of someone to prepare others (as for reading, for hearing, for action, or for understanding) (remarks prefatory to the customary toasts) (he introduces each of them with a really distinguished little group of prefatory passages—Bierstedt)

**Ana** *primary, primal: *elementary, elemental: basic, *fundamental

**prelude** *introduction, prologue, preface, foremost, exordium, preamble

**premature, untimely, forward, advanced, precocious** are comparable though rarely interchangeable when they mean unduly early in coming, happening, or developing.

**Premature** applies usually to something which takes place before its due or proper time (a premature birth) (a premature announcement) or comes into existence before it is fully grown or developed or ready for presentation (a premature baby) (a premature conclusion) or to actions or persons that manifest overhaste or impatience (I have been a little premature, I perceive; I beg your pardon—Austen)

**Untimely** usually means little more than unseasonable but when it is applied to something which comes or occurs in advance of its due or proper time, it approaches very close to premature in meaning; the term, however, applies not so often to what begins a life or outward existence before its proper time as to what ends or destroys a life, a season, or a growing or developing thing before it has run its normal, natural, or allotted course (untimely falling of fruit from a tree) (the untimely death of the son and heir) (the untimely frosts that brought summer's beauty to an end) (whose harvest . . . perished by untimely blight—Bronie)

**Forward** applies chiefly to young living things or to growing crops, but also sometimes to seasons, that show signs of progress beyond those that are normal or usual for things of its kind at the time in question (an unusually forward spring) (a child very forward in mental development for his age)

**Advanced** tends to supplant forward when by comparison with other persons, other growing things, or other seasons of the same kind or class the one so described is notably ahead of the others (the most advanced children in the school) (conflict between the economic interests of the advanced and backward peoples—Hobson)

**Precocious** basically implies an exceptional earliness in development (as in the germinating of seeds, the flowering of plants, the occurring of a process, or especially in the maturing
of the mind) inhibition of precocious germination of seeds—Chronica Botanica (a precocious youth bursting with ideas—Henry Miller) The term is also applied to qualities, conditions, or circumstances which properly belong to maturity but come or belong to one who is otherwise immature (his precocious dignities were hard for youth to support without arrogance—Buchan) Shaw is dramatically precocious, and poetically less than immature—T. S. Eliot

premium, prize, award, reward, meed, guerdon, bounty, bonus are comparable when they mean which is bestowed upon a person as a recompense for cooperation, greater effort, superior merit, or supremacy in competition. Premium is applied usually to something extra or additional that serves as an incentive to buy, sell, loan, compete, or strive (the worker who does more... is rewarded by a premium, which is usually a percentage of the amount the additional work would cost—G. D. Halsey) (racking their brains last fall for a new premium that would intrigue... the breakfast-food public—Cerf) (ask a premium as well as interest for a loan—Prize is applied to something which is striven for or, sometimes, which may be won by chance; it is bestowed upon the winner in a contest or competition or in a lottery (bridge prizes) (a prize for the best composition) (at last the Dodo said, “Everybody has won, and all must have prizes” —Lewis Carroll) In extended use prize commonly implies effort, struggle, and uncertainty in the seeking and often imputes value or worth to what is sought or competed for (let a man contend to the uttermost for his life’s set prize, be it what it will!—Browning) (he had embarked early upon that desperate game of which the prize was a throne, and the forfeit, life—Repplier) (the leading chairməns are regarded as great prizes—Nevins) Award implies both a decision of judges and a bestowment of a prize or an honor; it is therefore often preferred to prize when the recipients have not been competitors in the strict sense but have in their work or performances fulfilled the conditions required by those who offer prizes (receive an award for civic service) (the urge to make the most of ourselves and to get awards along with our success—J. T. Adams) Award is also applicable to the act of awarding a prize or to the decision in a particular competition (the judges may conceivably find themselves... unable to make an award—Barkham) Reward strongly involves the idea of recompense for something good or meritorious or ironically for something evil; it may be used in reference to a prize or premium only when that has been earned (as by effort or sacrifice); thus, a winner of a prize for the best novel of the year may feel that he has been given a reward for intense effort; a reward is offered for the return of a lost article (he scorned to take a reward for doing what in justice he ought to do—Steele) (it may come as a shock to the cynical that the mere embrace of wickedness is no guarantee of financial reward—Sat. Review) Meed and guerdon are close synonyms of reward, often employed without distinction, but the former tends to suggest a reward recognizing merit and proportioned to it, and the latter a prize or honor conferred as a reward (he must not float upon his watery bier unwetted, and weller to the parching wind, without the meed of some melodious tear—Milton) (finds his guerdon in the consciousness of work done perfectly—Beethoven) (verse, like the laurel, its immortal meed, should be the guerdon of a noble deed—Cowper) Bounty and bonus are applicable chiefly to a sum of money or its equivalent given as a premium or reward. Bounty is usually applied to a premium promised by a government or governmental agency as an inducement to some act (as enlistment in the army or navy, emigration to a distant colony, or destruction of noxious animals or pests) or as a subsidy (the State pays a bounty for every wildcat killed) (generous bounties for enlistment were offered by federal, state, and local authorities—T. A. Bailey) Bonus, in contrast, is usually applied to something given over and above what is regularly received or due, either as a reward or encouragement or as a distribution of surplus (a soldier’s bonus) (the subsidies became only a bonus for inefficiency—T. W. Arnold) (bonus... includes extra payments for night work, hazardous work, regular attendance, and overtime, as well as any annual or regular allotment such as a Christmas bonus—Glossary of Currently-Used Wage Terms) (the reader is given a bonus of material not ordinarily found in meteorology texts—Science) Ana *gift, present, gratuity, favor: enhancement, intensification, heightening (see corresponding verbs at intensify)

preoccupied *abstracted, absent, abstemiated, distraught

Ana *intent, engrossed, absorbed: *forgetful, oblivious, unmindful

preparatory *preliminary, introductory, prefatory

Ana fitting, preparing, qualifying, readying, conditioning (see prepare)

prepare, fit, qualify, condition, ready are comparable when they mean to make someone or something ready. Prepare is the most inclusive of these terms; it implies a process, often a complicated process, involving a making ready, a getting ready, or a putting in readiness one or more persons or things (prepare ground for a crop) (prepare a corpse for burial) (prepare a person for bad news) (made a few notes for a paper I was preparing—Dahl) Fit is more limited in its scope than prepare: it suggests a making a person or thing fit for or suitable to a particular end or objective (accomplishments, fitting him to shine both in active and elegant life—Irving) (I had fitted myself to do everything, from sweeping out to writing the editorials—White) (the soldier’s efforts to fit himself into the new world made possible by his sweat and blood—Wecter) Qualify (see also moderate) stresses the implication that a person’s fitness for a duty, office, function, or status requires the fulfillment of some necessary conditions, such as taking certain courses of study or training, an examination, or an oath (do not let druggists prescribe for you; they are not qualified to treat syphilis—Fishbein) (his extensive knowledge of foreign languages specially qualified him for such service—A. P. Wills) Condition implies a getting into or a bringing to the condition that is proper or necessary for a person or, more often, a thing to satisfy a particular purpose or use (condition air by purification, humidification, and adjustment of temperature) (condition an athletic team by exercise and practice) (condition cattle for show or market) Ready emphasizes a putting a thing into order, especially for use, or a making ready a person for action (ready a bedroom for the use of a guest) (the whole town took part in helping to ready the outdoor

*supreme, preeminent, transcendent, surpassing: outstanding, salient, signal (see noticeable)

prepossession partiality, prejudice, bias, *predilection

*bent, turn, knack, aptitude, *gift: *leaning, penchant: predisposition, inclination (see corresponding verbs at incline)

preposterosous absurd, *foolish, silly

*irrational, unreasonable: bizarre, grotesque, *fantastic

prerequisite requisite, *requirement

*necessity, *need, exigency

prerogative *right, privilege, perquisite, appanage, birthright

*immunity, *exemption: *claim, title: *freedom, license, liberty

presage n *foretoken, prognostic, omen, augury, portent

*sign, symptom, mark, token: forewarning, warning (see warn)

presage vb augur, portend, forebode, prognosticate, *foretell, predict, forecast, prophesy

*indicate, betoken, bespeak: signify, import, denote, *mean

prescribe 1 *dictate, ordain, decree, impose

*order, *command, enjoin, bid: exact, *demand, require

2 Prescribe, assign, define mean to fix arbitrarily or authoritatively for the sake of order or of a clear understanding. Prescribe stresses dictation, especially by one in command, and usually implies that the aim is to give explicit directions or clear guidance to those who accept one's authority or are bound to obey one's injunctions {the Constitution prescribes the conditions under which it may be amended} {the attending physician prescribes the medicines for his patient} {the fixed routine of prescribed duties—Wilde} {the code of behavior which the culture prescribes for child training—F. Alexander} Assign (see also allot, ascribe) usually has some suggestion of allotment or ascription; it implies arbitrary but not despotic determination for the sake of some practical end such as harmony in operation or functioning, the proper distribution of a number of things, or the settlement of a dispute by agreement {the city charter assigns the duties of each elected official and the limits of his authority} {the clause, assigning original jurisdiction to the supreme court—John Marshall} {impersonal words, such as those assigning latitude, longitude, and date—Russell} Define (see also bear, deportment, demeanor, mien, port) usually has some suggestion of allotment or ascription; it implies arbitrary but not despotic determination for the sake of some practical end such as harmony in operation or functioning, the proper distribution of a number of things, or the settlement of a dispute by agreement {the city charter assigns the duties of each elected official and the limits of his authority} {the clause, assigning original jurisdiction to the supreme court—John Marshall} {impersonal words, such as those assigning latitude, longitude, and date—Russell} Define (see also bear, deportment, demeanor, mien, port) usually has some suggestion of allotment or ascription; it implies arbitrary but not despotic determination for the sake of some practical end such as harmony in operation or functioning, the proper distribution of a number of things, or the settlement of a dispute by agreement {the city charter assigns the duties of each elected official and the limits of his authority} {the clause, assigning original jurisdiction to the supreme court—John Marshall} {impersonal words, such as those assigning latitude, longitude, and date—Russell}

press vb 1 *give, bestow, confer, donate, afford

*nurse, grant, award, accord

2 *offer, tender, proffer, prefer

*exhibit, display, parade, *show: advance, *adduce, allege, cite

presentment misgiving, foreboding, *apprehension

*feal, dread, alarm, terror: foetrate, anticipation, *prospect: disquieting or disquietude, compromising or discomposing, disturbance, perturbation (see corresponding verbs at discompose)

presently, shortly, soon, directly are comparable when they mean after a little while or before long. Presently carries this as its chief meaning; it is a term of rather vague implication as to the time indicated {the doctor will be here presently} {he said he would tell them the full story presently} {I shall forget you presently, my dear, so make the most of this, your little day—Millay} {I cannot attend to this at once but will do so presently} Shortly is often less vague as to the exact time indicated; it frequently retains one of its earlier implications of following quickly or with little delay {your father will be home shortly, for it is after five o'clock} {the ship will leave the wharf shortly, but perhaps you can catch it} {the two concluding volumes which will appear shortly—P. H. Douglas} {questions of vital importance came up for solution shortly after his appointment—Knott} Soon (see also early) implies that the thing narrated or predicted happened or will happen without much loss of time; otherwise the term is indefinite and may suggest any length of time that seems short, depending on the nature of the matter involved {they will soon repent their anger} {the rout soon became general} {the doctor will see you soon} {the plants soon took root} Directly often replaces its more basic sense of without delay by a value in which it is interchangeable with shortly and implies with little, or a minimum of, delay {I shall be back directly after sundown—Hichens} {I expect Rachel in directly, as she said she should not stay a moment—Henning}

preserve vb *save, conserve

*rescue, deliver, redeem, ransom: protect, guard, safeguard (see defend)

press n throng, crush, *crowd, mob, rout, horde

*multitude, army, host, legion

press vb Press, bear, bear down, squeeze, crowd, jam mean to exert pressure upon something or someone continuously or for a length of time. They are not close synonyms because of added implications and connotations which often give them distinct or specific senses. Press fundamentally implies an effect involving a weighing upon or a steady pushing or thrusting and may suggest little more than this {press down the soil with his feet} {the crowd pressed against them} {press clothes with a hot iron} More often, however, the word is used in any of several extended senses in which it additionally implies such ideas as constraint or compulsion {he pressed the agitated girl into a seat—Hardy} or urgency in driving or in prosecuting {the work was pressed forward with the same feverish haste—Henry Adams} {you see, my people believe tomorrow morning, though they were pressed to stay, the lama insisted on departure—Kipling} {she pressed me to take some cream crackers also—Joyce} or, especially in the intransitive, a pushing or shoving to an objective {as in great numbers or with speedy movement} {he pressed on rapidly . . . towards what was evidently a signal light—Hardy} Bear (see also carry, bear 3) implies the exertion of weight or of pressure upon another person or thing

pressing

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Pressing, urgent, imperative, crying, importunate

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Urgent is stronger than pressing and places greater stress upon the constraint or compulsion of attention (as by a vehement urging), and it also usually connotes the need of promptness (as in replying, considering, or relieving) (an urgent telegram) (the urgent needs of the war—Costain) (the more power the people are given the more urgent becomes the need for some rational and well-informed superpower to dominate them—Shaw) (if human ingenuity fails in an urgent task, fate may take a hand—Buchan) Imperative (see also MASTERY) stresses the obligatory nature of a task, need, or duty, but it also usually implies that immediate attention is essential (I feel it my imperative duty to warn you) (a remonstrance had become imperative—Buchan d. 1902) (military necessity makes it imperative that the bridge should be blown up—Peter Forster) Crying stresses the demand for attention but adds the implication of the extreme or shocking conspicuousness of the need (an organiser of genius in a day when order and discipline were the crying needs—Malone) (our crying need is for more blood donors) Importunate carries a strong implication of pertinacity in demanding or claiming attention; often therefore it is applied to persons or to their acts (an importunate beggar) (an importunate knocking at a door) (when people are importunate, and will not go away when asked, they had better come in—Shaw) but it is also much used in reference to impersonal matters (as problems or difficulties) which persistently and naggingly make claims upon one's full and immediate attention (the demands of the dance becoming...too importunate for a divided attention—Austen) (it is a work which ought to be studied by anyone to whom the relation of Church and State is an actual and important problem—T. S. Eliot) Like importunate, INSISTENT basically implies a quality of persons, that of insisting or maintaining or asserting persistently (how continual and insistent is the cry for characters that can be worshiped—Galsworthy) (de Vaca was insistent, and Charles approached the table—Hergesheimer) and it too is often used in reference to a quality which enforces attention by its perseverance or compels it by obtruding itself upon one's consciousness (an insistent noise) (an insistent voice) (the insistent odor of fertilizer—Amer. Guide Series: Md.) (we who read poetry are ridden and haunted by no such insistent problem—Lowe) Exigent implies less a demand for immediate attention than one for action (as by way of giving assistance or settling matters); moreover, it expresses not pressure upon all sides but (as in reference to a gun, an engine, or a machine) the presence of an obstacle or an obstruction or the displacement of a part which prevents operation (her propeller got foul of a rope, so that the shaft was jammed, and the engines could not be worked—Herschel)

Ana *push, thrust, propel, shove: drive, impel, *move: *pack, cram, stuff, ram

pressing adj Pressing, urgent, imperative, crying, importunate, insistent, exigent, instant are comparable when they imply a pressure exerted by one or more persons in pushing or shoving through a crowd (the speakers crowded their way through the throng to the platform) Jam in its most frequent meaning carries an implication of being wedged in so that pressure on all sides ensues and movement or escape is made impossible (the courts need not be jammed with negligence cases—S. H. Hofstadter) (just above McCauslin's, there is a rocky rapid, where logs jam in the spring—Thoreau) (traffic was completely jammed by the crowd) (a jammed car) (the ride seemed to be stuck) that implies not pressure upon all sides but (as in reference to a gun, an engine, or a machine) the presence of an obstacle or an obstruction or the displacement of a part which prevents operation (her propeller got foul of a rope, so that the shaft was jammed, and the engines could not be worked—Herschel)

Ana *push, thrust, propel, shove: drive, impel, *move: *pack, cram, stuff, ram

prestige

632

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

pressing bore heavily upon him) Like press, the term has extended use; it and bear down may imply the achievement of any end consistent with the action of pressing down or heavily upon (Clan Alpine's best are backward bore—Scott) (his activity and zeal bore down all opposition—Macaulay) Squeeze usually implies the exertion of pressure on both sides or on all sides strongly enough and for a long enough time to accomplish a flattening, a crushing, a shaping, an emptying, or a compression (in washing silk stockings be sure to squeeze them, not wring them) (the child had squeezed the wax doll out of shape) Usually, however, the term carries an added implication that gives it an extended or specific meaning while often retaining its basic implication. Sometimes it implies nothing more than an expression of affection (he squeezed his friend's hand) but at other times it implies such a different idea as extraction (squeeze the juice from a lemon) (approximates a laugh formed by...squeezing) guttural sounds out of the throat—Pynchon (or eliciting with difficulty (we squeezed out of him an admission that he was leaving) or extortion

<squeezing the people...of all the wealth that could be drained out of them—Froude) Squeeze is also susceptible to use even when there is no suggestion of exerting force on another but a clear suggestion of forcing someone, often oneself, or something into a space that is extremely small or is very circumscribed (squeeze through a half-opened window) (squeezes his hand into the hole and grasps the prize—Stevenson-Hamilton) Crowd (see also PACK) implies the exertion of pressure upon and usually suggests such a force as a number of persons or of things closely packed together (great numbers of the birds were crowded to death) (I hope not too many try to crowd in here at once. It isn't a very big room—Steinbeck) (never have more startling twists been crowded into the concluding scene of a melodrama—J. M. Brown) (the multitude of weeds crowded out the flowers) Sometimes crowd implies pressure exerted by one or more persons in pushing or shoving through a crowd (the speakers crowded their way through the throng to the platform) Jam in its most frequent meaning carries an implication of being wedged in so that pressure on all sides ensues and movement or escape is made impossible (the courts need not be jammed with negligence cases—S. H. Hofstadter) (just above McCauslin's, there is a rocky rapid, where logs jam in the spring—Thoreau) (traffic was completely jammed by the crowd) (a jammed car) (the ride seemed to be stuck) that implies not pressure upon all sides but (as in reference to a gun, an engine, or a machine) the presence of an obstacle or an obstruction or the displacement of a part which prevents operation (her propeller got foul of a rope, so that the shaft was jammed, and the engines could not be worked—Herschel)

Ana *push, thrust, propel, shove: drive, impel, *move: *pack, cram, stuff, ram
Presume, presume, assume, postulate, premise, posit (see under PRESUMPTION)

Presumption, presumption, assumption, postulate, premise, posit (see under PRESUMPTION)

Presumptuous *confident, assured, sanguine, sure
Ana self-confident, self-assured, self-possessed (see corresponding nouns at CONFIDENCE): presuming, assuming (see PRESUMPTION): positive, cocksure, certain, *sure: arrogant, insolent, overbearing (see PROUD)

Presuppose, presume, assume, postulate, premise, posit are comparable when they mean to take something for granted or as true or existent especially as a basis for action or reasoning. Their corresponding nouns presupposition, presumption, assumption, postulate, premise, posit when they denote something that is taken for granted or is accepted as true or existent are distinguishable in general by the same implications and connotations as the verbs. Presuppose and presupposition, the most inclusive of these words, need not imply dubiousness about what is taken for granted. At the one extreme they may suggest nothing more than a hazy or imperfectly realized belief that something exists or is true or an uncritical acceptance of some hypothesis, in either case casting doubt on what is taken for granted (a lecturer who talks above the heads of his listeners presupposes too extensive a knowledge on their part); a school of theology that presupposed the total depravity of human nature) (it presupposes an opposition between the end of the individual and that of the State, such as was entirely foreign to the Greek conception—Dickinson) At the other extreme the terms may be used in reference to something that is taken for granted because it is the logically necessary antecedent of a thing known to be true or the truth of which is not presently in question (an effect presupposes a cause) (so deliberate a murder presupposes a motive) (belief in the supernatural presupposes a belief in natural law—Inge) Presume and presumption may imply conjecture (I presume they are now in London) but ordinarily they carry the implication that whatever is taken for granted is entitled to belief until it is disproved. Therefore one presupposes only something for which there is justification in experience, or which has been shown to be sound in practice or in theory or which is the logical inference from such facts as are known (until a man or an organization has been condemned by due process of law he or it must be presumed innocent—Hutchins) (the fact that a custom is ancient and is still revered creates a presumption in its favor) (it cannot be presumed that any clause in the constitution is intended to be without effect—John Marshall) Assume and assumption stress the arbitrary acceptance as true of something which has not yet been proved or demonstrated or about which there is ground for a difference of opinion (some debaters weaken their case by assuming too much) (for the sake of argument let us assume that the accident occurred as contended) (I know of nothing more false in science or more actively poisonous in politics than the assumption that we belong as a race to the Teutonic family—Quiller-Couch) (1... assume that one purpose of the purchase was to suppress competition—Justice Holmes) (she was amazed and at a loss. She had assumed that Elfine's family would be overjoyed at their offspring's luck—Gibbons) Postulate, either as verb or noun, differs from assume or assumption in being more restricted in its application and more exact in its implications. One can assume or make an assumption at any point in a course of reasoning, but one postulates something or lays down a proposition as a postulate only as the groundwork for a single argument or for a chain of reasoning or for a system of thought. Postulate, therefore, has reference to one of the underlying assumptions, which are accepted as true but acknowledged as indemonstrable and without which thought or action or artistic representation is impossible because of the limitations of human knowledge or of human reason or of art (the ordinary man always postulates the reality of time and of space) (the dramatist postulates certain conventions which it is necessary for the audience to accept) (belief in the uniformity of nature, which is said to be a postulate of science—Russell) (the prevailing theological system is one which postulates the reality of guidance by a personal God—Huxley) (what I'm postulating in all this... is that the unconscious, you see, has an enormous teleological sense—Maier) Premise is often used as though it were identical in meaning with postulate. Premise, the noun, in logic denotes a proposition, or one of the two propositions in a syllogism, from which an inference is drawn. In more general use it may refer to a proposition which is the starting point in an argument. But a premise is not a proposition that is frankly an assumption, as a postulate often is; it may have been previously demonstrated or it may be admitted as true or axiomatic, but it is always advanced as true and not as assumed (his listeners could not assent to his conclusion because they doubted the truth of his premises) (begin with a simple statement which is the premise for all that I have to say—F. C. James) Premise, the verb, means to lay down as a premise or to base on or introduce by a premise or other pertinent matter and usually refers to the broader rather than to the technical meaning of the noun (he premised his argument on a proposition which all but a few of his readers accept as true) (it was quickly evident that the decision was not premised upon any abhorrence of the test oath technique—New Republic) (these observations are premised solely for the purpose of rendering more intelligible those which apply more directly to the particular case under consideration—John Marshall) Posit, as noun and verb, comes close to postulate in implying the laying down of a proposition as a base for an argument, a line of reasoning, or a system of thought, but it may differ in suggesting subjective and arbitrary grounds rather than, as postulate regularly does, objective and rational grounds for selection of the proposition (if she needs salvation, she will posit a savior—Santayana) (he did not posit a world of wormless apples to set off the fruit he reported in such wonderful detail—Grattan) (materialism at that time posited the premise that character was the product of environment, and this was the basis for Zola's naturalism—Farrell) but even when it connotes actual falsity it remains very close to postulate (such posits or postulated entities are myths from the standpoint of the level below them, the phenomenalist level—Hofstadter) (kill or be killed, the surgeons cried, discriminating Die from Live, and spoke the truth. And also lied, posited false alternative—Gibson) Ana surmise, *conjecture, guess: *infer, deduce, gather, judge
pretension

2 Pretense, pretension, make-believe are comparable though seldom interchangeable when they involve the idea of offering something false or deceptive as real or true. Pretense may denote false show in general, or the evidence of it (she is utterly devoid of pretense); there is too much pretense in his piety (the pretense that eludes the detection of others and that which deceives the pretended himself—Brownell) (confuse dignity with pomposity and pretense—Cerf) The term may apply also to an act that is performed, an appearance that is assumed, or a statement that is made in the hope that it will convince others of the truth or reality of something that is false or unreal (rushing away from the discussion on the transparent pretense of quieting the dog—Conrad) (my mother's affectionate pretense of his being the head of the family—Mary Austin) Pretension (see also CLAIM, AMBITION) is rarely used in place of pretense as a concrete act, appearance, or statement, but it is often used in the sense of false show or the evidence of it, with, however, somewhat differing implications. Where pretense in this general sense often implies hypocrisy or intentional deceit, pretension suggests rather an unwarranted assumption that one possesses certain desirable qualities or powers, and therefore more often implies overweening conceit or self-deception (his disdain of affectation and prudery was magnificent. He hated all pretension save his own pretension—Mencken) (this mannerism which has become so offensive . . . is Roslyn's social pretension. Perhaps I should say intellectual pretension. She entertains people as if she were conducting a salon—Mailer) (annoyed with . . . the pretensions of simplicity and homeliness in her parlor—Cheever) Make-believe applies usually to pretense or pretenses that arise not so much out of a desire to give others a false impression as out of a strong or vivid imagination (as that of children or poets who like to take what their fancies create as real or as true) (in children, the love of make-believe usually expresses itself in games) The term is occasionally used to denote the acceptance against one's better judgment of something manifestly unreal or untrue because of some power in the thing itself or in its accompaniments (tells us that the make-believe of the stage is a higher reality than life outside—Bentley)

Ana humbug, fake, sham, fraud, deceit, deception, *imposture: affectation, *pose, air, mannerism

pretension 1 *claim, title, pretense
Ana *right, privilege, prerogative: assertion, affirmation, declaration, protestation (see corresponding verbs at ASSERT)
2 *pretense, make-believe
Ana *hypocrisy, sanctimony, cant: dissimulation, duplicity, guile, *deceit
3 *ambition, aspiration
Ana *hoping or hope, expectation (see corresponding verbs at EXPECT): dream, vision, *fancy

pretentious 1 *showy, ostentatious
Ana *gaudy, garish, flashy; *ornate, flamboyant, florid, baroque, rococo
Ant unpretentious
2 *ambitious, utopian
Ana *aiming, aspiring, panting (see AIM vb): conspicuous, striking, arresting (see NOTICEABLE)

preternatural *supernatural, supranatural, miraculous, superhuman
Ana unnatural, anomalous (see IRREGULAR): *abnormal, atypical: outstanding, remarkable, salient (see NOTICEABLE): *exceptional

pretext excuse, plea, alibi, *apology, apologia

Ana ruse, *trick, maneuver, stratagem: *deception: justification, vindication, defending or defense (see corresponding verbs at MAINTAIN)

pretty bonny, comely, fair, *beautiful, lovely, handsome, good-looking, beauteous, pulchritudinous
Ana charming, attractive, alluring (see under ATTRACT): dainty, delicate, exquisite (see CHOICE adj)

prevail *induce, persuade, get
Ana *move, actuate, drive, impel: influence, *affect, impress, sway

prevailing, prevalent, rife, current are comparable when they mean general (as in circulation, acceptance, or use) especially in a given place or at a given time. Prevailing applies especially to something which is predominant or which generally or commonly obtains at the time or in the place indicated or implied (the prevailing winds are westerly) (the prevailing opinion among booksellers) (their frankly barbarous outlook and prevailing grossness of expression—Bridges-Adams) Prevalent applies especially to something which is general or very common over a given area or at a given time. The term, however, does not suggest, as prevailing usually suggests, a predominance in frequency or in favor; rather, it connotes a frequency without necessarily implying that it is the most frequent; thus, the prevailing or usual wind in a region is from the southeast, but southwest winds may, nevertheless, be prevalent there; colds and grippe are prevalent in northern states during the winter; a widely prevalent pronunciation of a word may not necessarily be the prevailing pronunciation (so prevalent is urban blight that the nickname "Garden State" seems a macabre joke—Armbrister) Rife adds to prevalent an implication such as the rapid spread of the thing so qualified, or a great increase in the number of its instances, or merely its commonness or abundance (rumor is already rife here as to Dr. Trefoil's successor—Trollope) (in a national political campaign, when issues are hotly contested and prejudices are rife—Mott) (was a considerable poet himself in days when poets were rife—Gogarty) Current applies especially to things (as language, philosophy, or fashion) that are constantly in process of change or development, or to things (as coins or diseases) that circulate constantly from one person or thing to another; hence, current so often describes what is widespread in its use, adoption, or acceptance at the time in question that it has come to imply the present if no other time is indicated; thus, current English is the English language of the present time; a current notion is one that is widely accepted at the moment; banknotes, postage stamps, or coins of the current series are those still being printed or minted for circulation or sale (current styles in hats) (current tendencies in fiction) (a current practice) However, when the term applies to things (as periodicals) that come out in a series or in installments, current describes the one appearing during the present period (as the week or month) or the latest to appear (the current issue of a magazine) (the current installment of a new novel appearing serially in a periodical) But current is often used in the place of the other words of this group when the time or place is definitely indicated and merely the passing from one person to another is stressed (Shakespeare used the current language of his day—J. R. Lowell) (as current in her time, the Evangelical creed was simple—Ellis) (she had been given, at fourteen, the current version of her origin—Wharton)

Ana *dominant, predominant, preponderant: *common, ordinary, familiar: general, *universal

prevalent *prevailing, rife, current
Ana *common, ordinary, familiar: pervading, impreg-
prevent *lie, equivocate, palter, fib

Prevent, anticipate, forestall can mean to be or get ahead of or to deal with beforehand, with reference especially to a thing's due time or to its actual occurrence or to the action of another. Prevent implies frustration (as of an intention or plan) or an averting (as of a threatened evil) or a rendering impossible (as by setting up an obstacle or obstacles) (the surest way to prevent aggression is to remain strong enough to overpower and defeat any who might attack—Lawrence) Sometimes the emphasis upon hindrance (see prevent 2) is so strong that other implications are nearly lost, but in the sense here considered advance provision or preparation against something possible or probable is clearly implied (medical science knows how to limit these evils and can do much to prevent their destructiveness—Elliot) (steps had therefore to be taken to prevent or impede these unseemly displays—Thorton) (who stands safest? tell me, is it he?... whose preventing care in peace provides fit arms against a war?—Pope)

Anticipate (see also FORESEE) takes the place of prevent when merely getting ahead of another especially as a precursor or forerunner is implied (most of the great European thinkers of the eighteenth and early nineteenth centuries were in some measure inspired, influenced, or anticipated by Shaftesbury—Ellis) (a "Teacher of Righteousness" who seemed in some ways to anticipate Jesus—Edmund Wilson) Like prevent, anticipate sometimes suggests frustrating another in carrying out an intention or plan, but implies its prior performance or execution rather than interposition of obstacles to its performance (he would probably have died by the hand of the executioner, if the executioner had not been anticipated by the populace—Macaulay) (in October came Commodore T. A. C. Jones, palpitating lest Great Britain anticipate him in seizing California—H. I. Priestley) Distinctively, the word implies dealing with (as by using, paying, or acting) in advance of the due time or proper order but it often involves another implication which can be gathered only from the context; thus, one anticipates a payment on a loan by making a payment before it is due; one anticipates his salary by spending its equivalent before it is earned (anticipate some details in telling a story) Forestall, in what has become perhaps the less common meaning, carries over from its earliest sense so strong an implication of intercepting that it means merely to stop in its course (something you were not in the least prepared to face, something you hurried to forestall—Mary Austin) (forestalled by the watchful Julks who fetched it for him—Dahl) But often the word loses most of its suggestion of intercepting and then implies beforehand action that serves to render a thing, and especially something inevitable, powerless to harm or merely useless (to forestall public opinion and guide its judgment—L. P. Smith) (posterity will still be explaining me, long after I am dead. Why, then, should I forestall their labors?—Rose Macaulay)

2 Prevent, preclude, obviate, avert, ward are comparable when they mean to hinder or stop something that may occur or, in the case of prevent and preclude, to hinder or stop someone from doing something. Prevent usually implies the existence of something which serves as an insurmountable obstacle or an impediment (there is no law to prevent you from erecting a building on this spot) (the authority of his presence and the purposefulness of his manner at least prevents the role becoming a minor one—Bentley) (he prevents an innocent man going to the gallows—New Books) Preclude differs from prevent in stressing the existence of some situation or condition or the taking of anticipatory measures that effectually shuts out every possibility of a thing's occurring or of a person's doing something (he makes everything so clear that all misunderstanding is precluded) (death precluded him from completing his investigation) (the doctrine... was adopted, not to promote efficiency but to preclude the exercise of arbitrary power—Brandes) (the roar of the motor precluded further conversation—Gerald Beaumont) Obviate usually implies the use of intelligence or judgment; preclude also often implies these but sometimes it suggests the operation of chance. The chief distinction between these words when anticipatory measures are implied is that obviate usually connotes an attempt to forestall disagreeable eventualities by clearing away obstacles or by disposing of difficulties (the use of bills of exchange obviates the risk in transporting money from one country to another) (no care, no art, no organization of society, could obviate the inherent incompatibility of individual perfection with the course of nature—Dickinson) (ward and, the latter usually with off, differ from the other words of this group in implying prevention of an approaching or oncoming evil. They suggest therefore immediate and effective measures in the face of what threatens. Avert, however, suggests the use of active measures to force back the evil before it is actually encountered (avert a catastrophe by prompt action) (the satisfaction of averting war—J. R. Green) (it was very doubtful whether the consequences could be averted by sealing my lips—Shaw) Ward, on the other hand, implies a close encounter and the use of defensive measures (ward off an opponent's blow) in order to avoid the evil or to diminish its disastrous effects (ward off a chill with hot drinks) (a magic charm to ward off evil—Herskovits) (our nation has warded off all enemies—Eisenhower) (a nation has warded off all enemies—New Books) (ward a catastrophe by prompt action) (ward against war—W. E. B. Du Bois) <steps had therefore to be taken to prevent or impede these unseemly displays—Thorton) (who stands safest? tell me, is it he?... whose preventing care in peace provides fit arms against a war?—Pope)
of the price asked and expense often designating the aggregate amount actually disbursed for something (they found the cost of the piano made too severe a drain on their resources) <the cost of provisions> <traveling expenses> <the heavy expense of a long illness> But cost sometimes replaces price with, however, a difference in connotation. Since cost applies to whatever must be given or sacrificed to obtain something, to produce something, or to attain some end whether it be money, labor, or lives or whether it is actually given or sacrificed, it, when replacing price, tends to suggest what will be taken or accepted from one in exchange rather than what the item is worth (the price of this article is below the cost of its manufacture) <victory will be won only at great cost of life> he felt that the cost in effort was greater than he could afford> Expense also may denote expenditure especially but not only of money <fresh news is got only by enterprise and expense—Justice Holmes> a convenient way of producing the maximum amount of "copy" with the minimum expense of intellect—Babbit>

priceless invaluable, precious, *costly, expensive, dear, (see corresponding adjectives at PRICE)

prick vb 1 punch, puncture, *perforate, bore, drill
Ana *enter, pierce, probe, penetrate; cut, slit, slash 2 urge, egg, exhort, goad, spur, prod, sic
Ana stimulate, excite, pique, *provoke: *activate, actuate, (see corresponding adjectives at ACT)

pride vb 1 Pride, plume, pique, green are all reflexive verbs meaning to congratulate oneself because of something one has, or has done or achieved. Pride usually implies a taking credit to oneself on or upon something that re- dounds to one's honor or gives just cause for pride in oneself <he prides himself on his ancestry> Mark prided himself upon maintaining outwardly a demeanor that showed not the least trace of overstrung nerves—Mackenzie> he prided himself on his part in the new century, but he resisted the installation of a telephone—Frank>
Plume adds to pride the implication of a display of vanity or of a more obvious exhibition of one's gratification; the term usually suggests less justification than does pride <the Viceroy plumed himself on the way in which he had instilled notions of rectitude into his staff—Kipling> Cicero plumed himself on flirting with dis- reputable actresses—Buchan> authors who plume themselves on writing history with "popular appeal"—L. B. Wright>
Pique (see also provoke 1) differs from plume chiefly in carrying a hint of stirred-up pride or satisfaction; usually the cause of the pride is a special accomplishment <every Italian or Frenchman of any rank piques himself on speaking his own tongue correctly—Walpole> "Pride," observed Mary, who piqued herself upon the solidity of her reflections, "is a very common failing, I believe—Austen>
Preen is occasionally used in place of plume, sometimes with a slight suggestion of adorning oneself with one's virtues <he preened himself upon his apiece—Lowell> men have admired, in theory, feminine virtue and preened themselves on the fear they aroused in the timid sex—Cunnington>
Ana *boast, brag, vaunt, crow, gaunconst: congratulate, *felicitate

priggish adj smug, self-complacent, self-satisfied, *complacent
Ana righteous, ethical, *moral: conceited, egotistic, self-esteeming, self-loving (see corresponding nouns at CONCEIT)

prim adj Prim, priggish, prissy, prudish, puritanical, straitlaced, stuffy
Ana see those at priggish 1

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
all over his face—Dahl> (there is . . . no moralizing of that offensively priggish kind which the instinct of boys teaches them to despise and mistrust—Pall Mall Gazette> (it was, as you warned me, very expensive. But I have no priggish objections to a little luxury—Ambler> Prissy, though sometimes very close to prim in meaning, is applied to a person who shows, or to a thing that manifests, an exaggerated sense of what is proper or precise; the term connotes sissiness but usually as a feminine concern for niceties of expression, of conduct, or of design and may imply a lack of forcefulness or virility <an outspoken candidate who offended the prissiest members of his party> (shock words may wear out their welcome just as readily as prissy ones—New Republic> (a shockable, narrow, prissy people obeying the rules . . . and protecting their treasured, specialized pruderies—Theodore Sturgeon> Prudish implies a modesty and decorum so marked as to seem affected or overasserted; the term, however, seldom suggests pretense but rather an undue consciousness of propriety or fear of impropriety or an excessive sense of the importance of modesty and decorum <a verse, not fettered in its movements, or prudish in its expressions—Edinburgh Review> (tried to condemn her own attitude as old-fashioned, prudish. There was no such thing as an adulteress anymore, she told herself—Wouk> had become so serious, so prudish almost, since she had given up balls and taken to visiting the poor—Wharton> Puritanical, often capitalized, may refer specifically to the religion of the Puritans especially as it showed itself in strict regulation of behavior, but in ordinary uncivilized use it more often suggests only an excessive narrowness or illiberality in judgment (as of books, plays, or pictures), in regulation (as of manners and morals), or in narrowly determining the boundary between what is good and what is bad (<the puritanical suspicion of beauty> that Fielding in his hatred for humbug should have condemned purity as puritanical, is clearly lamentable—Stephen> (he held old-fashioned and rather puritanical views as to the vice of luxury and the sin of idleness—Woof> afraid that if it became known he might jeopardize his position in the rather puritanical community, he avoided consulting any of the Coltertown doctors—Elmer Rice> Straitlaced and stuffy are derogatory terms applicable to persons or things that are markedly puritanical or prudish; straitlaced refers more often to a person or his principles from a less subjective point of view than does stuffy, which is usually a term of contempt expressive of their effect upon the observer <“Stuffy, my lord; it’s an expression a good deal used in modern Society.” “What does it mean?” “Straitlaced, my lord”—Galsworthy> (a stuffy book> (abiding by the rather involved, stuffy code of ethics—Riggs> (set himself in- tress such as physics and chemistry—Univ. of Fla. Bulletin> But primary may convey little or no suggestion of a time order and imply superiority in importance, thereby coming close to principal <the primary object of education> (the primary end of poetry) (all of us in the news business ought to remember that our primary responsibility is to the man who buys his newspaper, or turns on his radio, expecting . . . the whole truth—Davis> Primordial applies to what is primary in the sense of initial, fundamental, or elemental (some who maintain that the regime of religious toleration has become possible only because we have lost the primary intensity of religious conviction—Cohen> (not philosophy, after all, but human- ity, just sheer joyous power of song, is the primary thing in poetry—Beethoven> or to what goes back to the origin or to the beginnings, especially of the human race <it hath the primary eldest curse upon’t, a brother’s murder—Shak> The Biblical vocabulary is compact of the primary stuff of our common humanity—Lowes> (ultimate issues, primordial springs—Kipling> Primordial applied to what serves as the starting point in a course of development or growth or is the earliest in order or in formation. The term often suggests a rudimentary quality or state; thus, the primordial ooze is thought of as the substance out of which the earth was formed; a primordial cell is in biology the first and least specialized of a line of cells <primordial germ cells> <primordial man> (assuming that the sun, planets, and their satellites had all originated from a primordial mass of gas—S. F. Mason> Something primitive belongs to or is associated with an early stage, often but not necessarily a remote stage, in the development of something (as the human race). Often, when used in reference to art or manufacture, the term suggests lack of knowledge of such modern techniques or conventions as perspective in painting or modes in mereval music or adornment of industries <primitive potteries> (the symmetry of the body provides the archetype of primitive design in most religious art—Binyon> When used in reference to persons, their ways of living, or their instincts, emotions, or laws, it usually suggests either a connection with a very rudimentary civilization or a retention of a character or quality associated with such a civilization <a primitive but effective police inquiry—T. S. Eliot> (primitive laws to protect inheritance, to safeguard property—Rose Macaulay> (genuinely primitive traits that reveal themselves in the childhood of either the individual or the race—Babbitt> (he worked in the seed gardens, learned the primitive pharmacy of roots, barks, and herbs—Genzmer> Often, however, the term merely stresses an opposition to what is highly civilized or sophistiaced and therefore unduly complicated, and may suggest naturalness or simplicity <life is very primitive here—which doesn’t mean that one is getting down to anything fundamental, but only going back to something immediate and simple—H. G. Wells> (the town band, a very primitive affair, brings up the rear, playing “Yankee Doodle”—Shaw> Pristine applies to something in its earliest and freshest and newest state <an image of the pristine earth—Wordsworth> (the qualities of pristine Christianity> (restored to its pristine freshness <a pru- tine form of air conditioning—Mumford> Primeval in its basic sense applies to something which belongs to
or is characteristic of the first ages of the earth ⟨for food you must still go to the earth and to the sea, as in primeval days—Jefferies⟩ ⟨drawings have a harsh, primeval definiteness, as though the world were in the throes of creation—Eric Newton⟩ Often, however, the term merely suggests extreme antiquity or the absence of all signs of human trespass or influence ⟨primeval ages⟩ ⟨behind the primeval curtain of trees and swamps the old tribal and pagan life went on—Cutforth⟩ Prime in its basic sense comes very close to primordial and primitive in designating what is first in order of time ⟨high heaven and earth all from the prime foundation—Housman⟩ but in its more common use it applies specifically to what is first in rank, degree, or dignity ⟨makes his moral being his prime care—Wordsworth⟩ ⟨a matter of prime importance⟩ or sometimes to what is merely choice or excellent of its kind ⟨prime beef⟩ ⟨a prime claret⟩ *Prime, initiating or initial, beginning, commencing, starting (see corresponding verbs at BEGIN): elemental, *elementary: basic, *fundamental, radical: *chief, leading, principal Con following, succeeding, ensuing (see FOLLOW): secondary, *subordinate prime adj *primary, primal, primordial, primitive, pristine, primeval *Ania *chief, leading, principal, main: *choice, exquisite, recherché prime mover *origin, source, provenance, provenience, inception, root primeval pristine, primitive, primordial, primal, *primary, prime Ania aboriginal, *native, indigenous, autochthonous: original, *new primitive *primary, primal, primordial, pristine, primeval, prime Ania *fundamental, basic, radical: elemental, *elementary: aboriginal, *native primordial 1 primeval, pristine, primitive, primal, *primary, prime 2 *initial, original princedly *kingly, regal, royal, queenly, imperial Ania *luxurious, sumptuous, opulent: munificent, bountiful, bounteous, openhanded, *liberal principal adj *chief, main, leading, foremost, capital Ania *dominant, predominant, paramount: vital, cardinal, fundamental, *essential: preeminent, *supreme, superlative principally mainly, chiefly, mostly, *largely, greatly, generally principle, axiom, fundamental, law, theorem are comparable when they denote a proposition or other formulation stating a fact or a generalization accepted as true and basic. Principle applies to a generalization that provides a basis for reasoning or a guide for conduct or procedure ⟨the principle of free speech⟩ ⟨his remarkable grasp of principle in the remaining field, that of historical geography—Farrington⟩ ⟨the same hankering as their pious ancestors for a cozy universe, a closed system of certainties erected upon a single principle—Muller⟩ ⟨the principle was established that no officer or employee . . . was entitled to any classified information whatever unless it was necessary for the performance of his duties—Baxter⟩ ⟨I do not mean to assert this pedantically as an absolute rule, but as a principle guiding school authorities—Russell⟩ Axiom can apply to a principle that is not open to dispute because self-evident and is usually one upon which a structure of reasoning is or may be erected ⟨the axioms of Euclidean geometry⟩ Perhaps more frequently the term implies a principle universally accepted or regarded as worthy of acceptance rather than one necessarily true ⟨the journalistic axiom that there is nothing as dead as yesterday's newspaper—G. W. Johnson⟩ ⟨the superficial commonplaces which pass as axioms in our popular intellectual milieu—Cohen⟩ Fundamental usually applies to a principle, but sometimes a fact, so essential to a philosophy, religion, science, or art that its rejection would destroy the intellectual structure resting upon it ⟨the fundamentals of scientific research⟩ ⟨developed the arch and other fundamentals of architecture—R. W. Murray⟩ ⟨what they deemed the fundamentals of the Christian faith—Latourette⟩ Law applies to a formulation stating an order or relation of phenomena which is regarded as always holding good ⟨the conquest of nature's procreative forces, through the discovery of the laws of agriculture and animal husbandry—R. W. Murray⟩ ⟨the laws of the rain and of the seasons here are tropic laws—M. S. Douglas⟩ ⟨it is a law that no two electrons may occupy the same orbit—Eddington⟩ Theorem applies to a proposition that admits of rational proof and, usually, is logically necessary to succeeding logical steps in a structure of reasoning ⟨theoretical economics puts the patterns of uniformity in a coherent system [of which] the basic propositions are called assumptions or postulates, the derived propositions are called theorems—Lange⟩ ⟨the error that was to prove most durable of all, the theorem that only a very short land traverse would be found necessary from Missouri to Pacific waters—De Voto⟩ Ania basis, foundation, ground (see base): *law, rule, canon, precept: *form, usage, convention print n *impression, impress, imprint, stamp Ania mark, token, *sign: *trace, vestige printing *edition, impression, reprinting, reissue prior previous, foregoing, precedent, anterior, former, antecedent, *preceding Ania ahead, *before, forward Con behind, *after priority, precedence can both mean the act, the fact, or, especially, the right of preceding another. When the reference is to the right, both terms usually imply an established or accepted code that determines which shall precede the other. Priority is the usual term in law and the sciences and chiefly concerns an order of time. When there is merely a question concerning the time relations of events, the term implies antecedence in occurrence ⟨the courts established the priority of the wife's death in an accident⟩ ⟨the right to inherit a title is dependent mainly on priority of birth⟩ ⟨they disputed priority of invention of the regenerative electron-tube circuit—C. B. Fisher⟩ When, however, the question concerns a number of things (as debts or cases) which cannot be taken care of or dealt with all at once and must be arranged in order of time, priority suggests a rule of arrangement that determines the order in which one goes before another ⟨in payment of debts he must observe the rules of priority—Blackstone⟩ ⟨liens on a property take priority in bankruptcy settlements⟩ ⟨the "law of priority" in biological classification is the principle that the first published name of a genus or species has preference over any one subsequently published⟩ ⟨where roads cross one another without a sign on either, there is no absolute priority, but it is usual to give way to the vehicle on one's right—Joseph⟩ Precedence, though frequent in general use, is, in the sense under consideration, primarily a term of formal etiquette; it then implies an established order (as in receiving, greeting, or seating) which gives preference to those who are superior in rank, dignity, or position ⟨among ambassadors of equal rank, precedence is usually determined by order
of seniority or length of service) <(the order of precedence was very rigidly observed, for the visiting maids and valets enjoyed the same hierarchy as their mistresses and masters—Sackville-West) In more general use the term often suggests a prior place, chance, or seat accorded to one, often because of age, sex, social position, or as a mere courtesy <(no one lost anything by granting precedence to a man so flawlessly urbane—Reppier) to give organizations precedence over persons is to subordinate ends to means—Huxley>

**Ana** ordering or order, arrangement (see corresponding verbs at ORDER): ascendency, *supremacy*; preeminence, transcendence (see corresponding adjectives at SUPREME)

**priory** *cloister, monastery, nunnery, convent, abbey*

**prismatic,** iridescent, opalescent, opaline are comparable when they mean marked by or displaying a variety of colors. Prismatic implies an exhibition of the colors of the spectrum (as when a ray of light is refracted by a prism) or of a rainbow. In its nontechnical and extended use it merely suggests a brilliant or striking variety of colors <Jeremy Taylor's style is prismatic. It unfolds the colors of the rainbow—Hazlitt> <(have you ever observed a hummingbird moving about in an aerial dance among the flowers—a living prismatic gem that changes its color with every change of position?—Hudson>) Iridescent implies a rainbowlike play of shifting, merging colors such as is exhibited by a soap bubble, by mother of pearl, and by the plumage of some birds <the whole texture of his mind, though its substance seem plain and grave, shows itself at every turn iridescent with poetic feeling like shot silk—J. R. Lowell> <something iridescent, like the shining of wet sand—Reppier>

Opalescent and the less frequent opaline imply both the soft milky quality and the iridescence of an opal <Titian hardly ever paints sunshine, but a certain opalescent twilight which has as much of human emotion as of imitative truth in it—Ruskin> <the opaline light which comes through these lateral bays, and makes a sort of veil . . . under the lofty vaulting—Henry Adams>

**prisoner,** captive both denote one who is deprived of his liberty. Prisoner is the general term, applicable to anyone so deprived, but it is frequently used in a more specific sense, and applied to one who is confined to a prison or held under guard <prisoners of war> <(take one prisoner>) <(the prisoners in the penitentiary)>

Captive implies seizure by force (as in war, conquest, or brigandage); it also often implies bondage or slavery rather than imprisonment, and sometimes suggests capture for ransom <he hath brought many captives home to Rome, whose ransoms did the general coffers fill—Shak.>

**prissy** *prim, priggish, prudish, puritanical, straitlaced, stuffy

**Ana** womanish, effeminate, ladylike, *female*; finicky, fastidious, *nice, squeamish*; scrupulous, punctilious, meticulous, *careful

**pristine** primeval, primordial, primitive, primal, *primary, prime

**Ana** original, fresh, *new

**problematic** *doubtful, dubious, questionable
Ana ambiguous, equivocal, *obscure, vague, cryptic, enigmatic: uncertain, suspicious, mistrustful (see corresponding nouns at UNCERTAINTY)

**procedure** *process, proceeding
Ana ordering or order, arrangement (see corresponding verbs at ORDER): *method, system, manner, way: conducting or conduct, management (see corresponding verbs at CONDUCT)

**proceed** issue, emanate, stem, flow, derive, *spring, arise, proceed
Ana *follow, succeed, ensue: *come, arrive

**proceeding** n *process, procedure
Ana *action, act, deed: *affair, business, concern: operation, functioning, working (see corresponding verbs at ACT)

**process, procedure, proceeding** denote the series of actions, operations, or motions involved in the accomplishment of an end. Process is particularly appropriate when progress from a definite beginning to a definite end is implied and something is thereby made, produced, or changed from one thing into another; the term usually suggests a division of the entire sequence of events into steps or stages (describe the process of making sugar from sugar-cane) (the process of digestion) (perfect knowledge is no mere intellectual process)—Inge (I have always liked the process of commuting; every phase of the little journey is a pleasure to me—Dahl) The idiomatic phrase "in process" means in the course of being made, produced, built, constructed, evolved, or attained (for men in practical life perfection is something far off and still in process of achievement)—James

**Procedure** stresses the method followed or the routine to be followed, whether in carrying through an industrial, a chemical, a mental, or other process, or in doing some specific thing (as conducting a meeting, a trial, a conference, or a business, or performing an experiment or an operation, or prosecuting an investigation or a search) (study the rudiments of parliamentary procedure) (knows laboratory procedure thoroughly) (correct legal procedure) (you know what a stickler she is for procedure—"red tape" I called it to her—Terry Southern) (this Byzantine court, which is trying to adapt its procedure to the ideals of its Western education—Edmund Wilson)

**Proceeding,** a much less definite term than the others of this group, applies not only to the sequence of events, actions, or operations directed toward the attainment of an end, but also to any one of such events, acts, or operations. The term throws more stress on the individual or collective items than on their closely knit relation to each other or on the final end which they have in view, and often the term means little more than an instance, sometimes a course, of conduct or behavior (the law... stepped in to prevent a proceeding which it regarded as petty treason to the commonwealth—Froude) (record the proceedings of a meeting of a society) (the precise habits, the incredible proceedings of human insects—L. P. Smith) (legislative proceedings frequently veer off into areas of somewhat less than momentous significance—Armbrister)

Ana progress, advance (see under ADVANCE vb): conducting or conduct, management, controlling or control, direction (see corresponding verbs at CONDUCT): performance, execution, accomplishment, fulfillment (see corresponding verbs at PERFORM)

**procession,** parade, cortège, cavalcade, motorcade mean a body (as of persons and vehicles) moving along in order. Procession stresses the orderly arrangement and smooth procedure; often it suggests formality, solemnity, and pomp (a funeral procession) (and all the priests and friars in my realm shall in procession sing her endless praise—Shak) (and delegate Dead from each past age and race, viewless to man, in large procession pace—Lanier)

**Parade** is used of a usually large and formal procession. The term also implies marching in a more or less military fashion to the accompaniment of a band and often suggests other evidences of pomp and display (see also DISPLAY) (the Fourth of July program includes a parade and fireworks) (the annual parades of both organizations... open-air festivals, with colorful banners, drum and fife bands—Moege) (there was a parade in honor of the successful candidate for governor—Cortege, sometimes used in the meaning of a retinue or train, usually means a procession of mourners at a funeral; it can refer either to those who follow the casket on foot or to those who follow in vehicles (declared that the cortège of the dead emperor must set forth on the journey homeward—Buck) Cavalcade throws the emphasis upon the moving of men on horseback or in vehicles; often it applies specifically to a dignitary and his retinue (the king's cavalcade through the gates of the city the day before his coronation—Walpole) and only indirectly does it suggest the appeal of a spectacle or spectacular procession. Motorcade may replace cavalcade when the intent is to stress mechanized as distinguished from equine power; otherwise the two terms are similar in values (with a motorcade of more than 2,000 vehicles, New York yesterday celebrated its traffic safety record for the first quarter—N. Y. American) (more than 300 floats will form a brilliant motorcade to the fairgrounds—Brooklyn Daily Eagle) (the three heads of state motored to Arlington Cemetery. It was raw and windy as the motorcade entered the cemetery—Time)

Ana *succession, sequence, train: pomp, array (see DISPLAY)

**proclaim** declare, announce, publish, advertise, promulgate, broadcast
Ana *reveal, disclose, discover, divulge, tell: voice, utter, vent, ventilate (see EXPRESS vb): *inform, apprise

**proclamation** declaration, announcement, publication, advertisement, promulgation, broadcasting (see under DECLARE)

**proclivity** propensity, *leaning, penchant, flair
Ana knack, aptitude, *gift, bent, turn: inclination, disposition, predisposition (see corresponding verbs at INCLINE): *predilection, prepossession, prejudice, bias

**procrastinate** *delay, lag, dawdle, loiter
Ana *defer, suspend, stay, postpone: protract, prolong (see EXTEND)

Ana execution, fulfillment, performance (see corresponding verbs at PERFORM): *effort, exertion

2 *product, produce

profanation, desecration, sacrilege, blasphemy can all mean a violation or a misuse of something regarded as sacred. Profanation applies to an irreverent outrage shocking to those who cherish and hold sacred the thing mistreated; although it may suggest base callousness, it often applies to vulgar intrusion or insensitive irreverence (as of vandals) (these sages attribute the calamity to a profanation of the sacred grove—Frazer) Desecration applies especially to any action whereby sacred character is impaired or lost; often it indicates loss of that character through defilement, often malicious or malign and culpable (desecration of the cathedrals by the invading barbarians) (last priest, feeling there was no work to be done in such a dreary outpost, burned the chapel in 1706 to prevent its desecration—Amer. Guide Series: Mich.)

Sacrilège may refer technically to reception or administration of a religious sacrament by one unworthy; it refers commonly to any outrageous profanation (the execution was not followed by any sacrilege to the church or defiling of holy vessels—Cather) (above all things they dread any contact with the spirits of the dead. Only a sorcerer would dare to commit such a sacrilege, an offense punishable with death—Frazer) Blasphemy (see also BLASPHEMY 1; compare blasphemous under IMPIOUS) may refer to any strong irreverence, often one involving or suggesting reviling, defying, mocking, or otherwise treating with indignity something sacred (he cooperated with me in sending the pious elders to unspeakable corners of hell; we arranged a wordless language of blasphemy and signaled to each other across the laps of the godly—Brace)

Ana defilement, pollution, contamination (see corresponding verbs at CONTAMINATE): debasement, vitiation, corruption, perversion (see corresponding verbs at DEBASE): violation, transgression, trespass (see BREACH)

profane adj 1 Profane, secular, lay, temporal mean not dedicated or set apart for religious ends or uses. Profane specifically implies an opposition to sacred (see HOLY); in this sense it is purely descriptive and not derogatory; thus, profane history is history dealing with nations or peoples rather than with biblical events or characters; profane literature comprises all literature except the Scriptures, other sacred writings, and sometimes writings having a definite religious end or use; profane love applies to human love as between man and woman, as distinguished from the love of man for God and of God for man (the profane poet is by instinct a naturalist. He loves landscape, he loves love, he loves the humor and pathos of earthly existence—Santayana) The term also is used to imply an opposition to holy, religious, spiritual (I have observed that profane men living in ships, like the holy men gathered together in monasteries, develop traits of profound resemblance—Conrad) Secular usually

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
implies a relation to the world as distinguished from the church or religion or the religious life; it may come close to profane (secular music) the secular drama or it may be opposed to regular in the sense of governed by a monastic rule; thus, a secular priest is a priest who does not belong to a religious order; a regular priest is one who does. The term is most often opposed to religious in the sense of belonging to or serving the ends of a religion or church, then coming close to civil or public secular schools secular journals the secular authority there are peoples in the world who have no secular dances, only religious dances—Ellis believing that no creed, religious or secular, can be justified except on the basis of reason and evidence—Times Lit. Sup. Lay is applied to persons, or sometimes to their activities, interests, or duties, that do not belong to the clergy and particularly the regularly ordained clergy; it therefore usually implies an opposition to clerical or ecclesiastical laymen and laywomen of the parish a lay preacher lay sermon lay delegates to a diocesan convention In religious orders the term is applied to a class of religious who are occupied chiefly with domestic and manual work as distinguished from those who are occupied with liturgical observances, teaching, and study the lay brothers in a monastery Lay is often extended to other than the clerical profession (compare lay analyst under neurologist) in the sense of nonprofessional or of not having a professional source or character; thus, a lay opinion on a question of law is merely an opinion delivered by one who is neither a lawyer nor a judge the doctrine of scienter in the lay mind has been converted into the popular half truth that a dog is entitled to its first bite—Field-Fisher Temporal implies an opposition to spiritual (in the sense of being concerned not with material or mundane but with immaterial and eternal ends) and is applied chiefly to sovereigns, rulers, or dignitaries having political authority or civil power; thus, lords temporal are those members of the British House of Lords who are not bishops or archbishops (these latter being called lords spiritual) the Papacy had no temporal power between 1870, the year of the fall of the Papal State, and 1929, the year of the establishment of Vatican City persuading the Church to forego its claim to temporal authority and confine its attention to spiritual benefactions—Littlefield Ana worldly, mundane earthly, terrestrial Ant sacred Con holy, divine, religious, spiritual 2 impious, blasphemous, sacrilegious Ana foul, filthy, dirty, nasty: ungodly, godless, irreligious: iniquitous, nefarious, villainous, vicious profanity blasphemy, cursing, swearing Ana imprecation curse, mallection: exegation, objur- gation, damming (see corresponding verbs at EXCRIMATE) profess assert, declare, affirm, aver, protest, avouch, avow, predicate, warrant Ana allege, adduce, advance profession art, handicraft, craft trade proffer offer, tender, present, prefer Ana propose, design, intend: confer, bestow, present, give Con reject, spurn, refuse, decline proficient, adept, skilled, skilful, expert, masterly are comparable when they mean having the knowledge and experience necessary to success in a given line especially of work or endeavor. When applied to things rather than persons, all these terms carry the implication that the quality of the person has been attributed to the thing. Proficient implies training and practice as the source of competency beyond the average proficient in the art of self-defense—Shaw Jane began to type. It bored her, but she was fairly proficient at it—Rose Macaulay Adept implies proficiency but stresses aptitude and often cleverness adept at ledgermaking so adept at the lovely polishing of every grave and lucid phrase Gibbons Skilled, often interchangeable with proficient, may distinctively suggest mastery of the details of a trade or handicraft or of the technique of an art or profession. In modern industrial use skilled simply connotes that one has met a standard set up by employers for a special type of work or job skilled labor the skilled trades by long practice, he was skilled in the arts of teaching Gibbon professors, students, and skilled employees make a varied assault upon the mysteries of marine biology Parsley Skilful implies adeptness coupled with dexterity in execution or performance a skilful operator of an automobile a skilful teacher in little danger with a skilful hand at the helm Nordhoff & Hall the solution achieved by a skilful majority in face of a hostile majority—Parrington Expert applies to one who has attained extraordinary proficiency or is exceptionally adept an expert accountant an expert bridge player expert knowledge of engines neither of them was expert in the roping of cattle Mary Austin explaining at length, but with an expert lucidity, some basic point of law Edmund Wilson Masterly, applied more often to the thing executed or the quality displayed than to the person who executes or displays, is close to expert in its implication of proficiency and adeptness, but it commonly adds a suggestion of confident control (he compressed into the masterly introductory essays . . . his entire theory of the progress of the United States Bidwell his masterly dissimulation Molley how masterly is he in all the points of his profession Trollope Ana efficient, effectual *effective: capable, able, competent, qualified: finished, accomplished, consummate: practiced, drilled, exercised (see practice vb) Con awkward, clumsy, maladroit, inept, gauche: ignorant, untaught profile outline, contour, silhouette, skyline profit n use, service, advantage, account, avail Ana reward, award, meed, guerdon (see premium) gaining or gain, winning (see get) profit vb benefit, avail Ana *get, gain, win: advance, progress profitable 1 beneficial, advantageous Ana *favorable, auspicious, propitious: expedient, advisable, politic Ant disadvantageous 2 *benefitting, gainful, remunerative, lucrative Ana fruitful (see fertile) compensating, recompensing, repaying (see pay) valuable, precious (see costly) profligate adj dissolute, reprobate, abandoned Ana debauched, corrupted, depraved, debased, perverted (see under DEBASE) degenerate, corrupt, vicious, loose, relaxed, slack, lax profligate n spendthrift, prodigal, wastrel, waster Ana debauche, pervert, corrupt (see corresponding verbs at DEBASE) libertine, lecher (see corresponding adjectives at licentious) profound deep, abysmal Ana penetrating, probing, piercing (see enter) scrutinizing, inspecting, examining (see scrutinize) Ant shallow profuse lavish, prodigal, luxuriant, lush, exuberant carry as their basic meaning giving out or given out in great abundance. What is profuse seems to pour or be poured forth in abundance, without restraint, or in a stream...
fuse apologies) (profuse sweating) (pourest thy full heart in profuse strains of unpremeditated art—Shelley) (a land where life was great . . . and beauty lay fuse—Browning) What is lavish is so exceedingly profuse as to suggest, positively, munificence or extravagance or, negatively, the absence of all stint or moderation (lavish gifts) (a lavish feast) (lavish expenditures) (the lavish attentions of his mother—Meredith) (our lavish use of a bountiful supply of crude oil—Morrison) What is prodigal gives or is given so lavishly and so recklessly as to suggest waste or the ultimate exhaustion of resources (chary of praise and prodigal of counsel—Stevenson) (the prodigal expenditures of the recent war—M. W. Childs) (he had been prodigal with his money and she probably imagined that he was still in funds—Cliff. Farrell) What is luxuriant produces or is produced in great and rich abundance; the term usually connotes not only profusion but gorgeousness or splendor in what is produced (her luxuriant hair) (the luxuriant imagination of Milton) (this damp and mild climate makes possible the most luxuriant forest growth—Forde) (rich and luxuriant beauty; a beauty that shines with deep and vivid tints—Hawthorne) What is lush is not only luxuriant but has reached the peak of its perfection; the term distinctively connotes richness, fullness of development, or luxuriousness (how lush and lusty the grass looks! how green!—Shak.) (the lush . . . full-blown landscape of the south through which they had set out that morning—Jan Struther) (the fabulous period of the Nineties, that lush, plush, glittering era with all its sentimentality and opulence and ostentation—S. H. Hay) What is exuberant produces or is produced so abundantly or luxuriantly as to suggest exceedingly great vigor, vitality, or creative power; the term applies chiefly to persons or their words, emotions, or qualities that display a vigor or vitality that is almost rampant (an exuberant fancy) (the exuberant genius of Shakespeare) (to restrain my too exuberant gesture—Mary Austin) (exuberant energy) (actually, in the present context, all our exuberant post-Sputnik talk is irrelevant and even nonsensical—Huxley) Ana copious, abundant (see plentiful): *excessive, immoderate, extravagant: *liberal, bountiful, bounteous, openhanded, munificent, generous Ant spare, scanty, scant —Con *meager, skimpy, scrimpious, exiguous, sparse progenitor *ancestor, forefather, forebear Ant progeny progeny *offspring, young, issue, descendant, posterity Ant progenitor prognosis *diagnosis prognostic *foretoken, presage, omen, augury, portent Ana indication, betokening, bespeaking (see corresponding verbs at indicate): symptom, *sign, mark, token prognosticate *foretell, predict, forecast, prophesy, augur, presage, portend, foretell Ana *indicate, betoken, bespeak: *foresee, knowfore, apprehend, divine, anticipate program, schedule, timetable, agenda denote a formulated plan listing things to be done or to take place, especially in their time order. Program is the term of widest application. It may refer to a mental plan or to one that is written or printed; it may be applied not only to a plan for a meeting, an entertainment, or a service but to one made by an individual in ordering his own day or his own future or to one made by a group that has certain ends in view and proposes their orderly achievement (what is your program for today?) (the program of a concert) (theater programs) (the Five-Year Plan was the name given the industrialization program of the Soviet Union) Schedule and timetable stress the importance of the time element and imply a plan of procedure which establishes not only the chronological order of events or steps but also their time limits (the schedule for a college year) (a schedule of production in a factory) (the timetable life of a New York University student—N. Y. Times) (the timetable for expansion of Soviet power and influence in Asia has been seriously upset—Mosely) Schedule is sometimes used, but timetable distinctly more often, for a tabulated list of regularly recurring events (as arrivals and departures of trains or buses) (a schedule of classes) (it was in October 1839 that George Bradshaw issued the first timetable to show all trains then running in this country—O. S. Nock) Agenda is applied chiefly to a schedule of the order of business for a meeting. progress n 1 advance (see under ADVANCE vb 2) Ana improvement, betterment (see corresponding verbs at IMPROVE): headway, impetus (see SPEED n) 2 Progress, progression are not always clearly distinguished, although they can be more or less sharply differentiated. Both denote movement forward. Progress (see also progress n under ADVANCE vb 2) usually applies to a movement considered as a whole, stressing such aspects as the distance covered, the change or changes taking place, and the amount of improvement made (we made little progress that day) (note the extent of his progress during the past year) (delightful never-ending progress to perfection—Hazlitt) (the history of educational progress) (the rapid progress of a disease) Progression (see also succession) commonly applies to a movement in itself or in its detail, often implying a continuous series of steps, degrees, or stages toward an objective but sometimes implying little more than a moving on more or less continuously (mode of progression) (that slow progression of things, which naturally makes elegance and refinement the last effect of opulence and power—Reynolds) (every generation . . . adds . . . its own discoveries in a progression to which there seems no limit—Peacock) progress vb *advance Ana *move, drive, impel: further, forward, promote, *advance: develop, *mature Ant retrogression progression 1 *succession, series, sequence, chain, train, string 2 *progress progressive *liberal, advanced, radical Ant reactionary prohibit *forbid, inhibit, enjoin, interdict, ban Ana *prevent, preclude, obviate: debar, shut out, *exclude: *hinder, impede, obstruct: *restrain, curb, check Ant permit —Con *let, allow, suffer: tolerate, endure, *bear project n scheme, design, plot, *plan Ana sketch, delineation, draft, outline, diagram (see under sketch vb): *device, contrivance project vb 1 scheme, design, plot, plan (see under plan n) Ana propose, purpose, *intend: *sketch, outline, diagram, delineate 2 *bulge, jut, stick out, protrubere, protrude, overhang, beetle Ana *extend, prolong, lengthen: swell, distend, *expand projection, protrusion, protruberance, bulge all denote something which extends beyond a level or a normal outer surface. Projection is applicable to anything that juts out, especially at a sharp angle (buttresses are projections which serve to support a wall or a building at a point of great strain or pressure) (machinery set in motion to keep a level smooth . . . feels the least projection, and
promising vb promise, engage, pledge, plighted, covenant, contract are comparable when they mean to give one's word that one will act in a specified way (as by doing, making, giving, or accepting) in respect to something or words that suggest the giving of a solemn assurance or the provision of a formal guarantee (pledged their loyalty to their sovereign) (pledge themselves to maintain and uphold the right of the master—Taney) (pledged $1,000 at a charity auction) (pledged to defeat the present conspiracy to set up a Home Rule Parliament in Ireland—Rose Macaulay) Contract (see also CONTRACT vb 3, INCUR) implies the entry into a solemn and usually legally binding agreement (see contract n) (contract for a large loan) (the company has contracted to supply the schools of the state with textbooks) (the good wife realizes that in becoming a wife she contracts to forget self and put her husband's happiness above her own—D. F. Miller)

prone adj quick, ready, apt

prone to forget self and put her husband's happiness above her own—D. F. Miller
prop

Proportional and proportionate both imply due proportions either to a related thing or things, or of things that are related (as by belonging to the same set, series, design, or construction, or by being the effect of a cause or the response to a stimulus). Proportional is the more usual term when a constant and often mathematically precise ratio between corresponding aspects (as size, amount, number, or length) of related things is under consideration; thus, a proportional tax is one assessed as a constant percentage of the value (as of income or realty) being taxed; a proportional wage is a fixed percentage (as of gross sales or profits) (the circumferences of all circles are proportional to the lengths of their radii) (a detailed plan for proportional . . . disarmament to be achieved by stages—Grenville Clark) Proportional may be used, but proportionate is more often used, when the term is intended to imply the adjustment and sometimes the deliberate adjustment of one thing that bears a reciprocal relationship to another thing, so that both are in keeping with each other or not out of keeping with what is just, fair, due, or reasonable (the punishment should be proportionate to the crime) (ponderous bodies forced into velocity move with violence proportionate to their weight—Johnson) (most state taxes produce a yield proportionate only to general economic growth—Armbrister) (they rushed into freedom and enjoyment . . . with an energy proportional to their previous restraint—Dickinson) Commensurate and commensurable differ from the preceding words chiefly in carrying a stronger implication of equality between related things each of which has a value (as of measure, degree, or intensity) that is intimately related to that of the other (the meagerness of the result was commensurate with the crudity of the methods—Buchan) (the two punishments must be perfectly commensurable—Bentham) Sometimes both terms, but especially commensurable, differ from the other words in implying a common scale of values by which outwardly different things can be shown to be equal or proportionate in some significant way (if two magnitudes can both be expressed in whole numbers in terms of a common unit, they are commensurable—W. G. Shute et al) (all civilization[s] . . . are commensurable, and . . . are but ramifications (if not historically, at least phenomenologically) of the one idea of civilization—Schröder) (the measure of a rancher's ability to take care of live- stock while not on public land . . . is referred to as his commensurability and the property so used is his commensurable property—Appraisal Terminology & Handbook) Ana corresponding, correlative, *reciprocal: relative, contingent, *dependent proportionate *proportional, commensurate, commensurable Ana corresponding, correlative, *reciprocal
propose 1 purpose, *intend, mean, design

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

fore often used when the writer or speaker wishes to convey no implications of how the one propounding would answer the question or deal with the proposition (the query is propounded whether the privilege should be accorded to a physician of putting a patient painlessly out of the world when there is incurable disease—Cardozo) (propound the thesis that the great artist is an unconscious artist—T. S. Eliot) (if we may judge from his . . . facility in the propounding of theories—Huxley) Pose often equals propound, except that it frequently implies that no attempt will be or can be made to seek an immediate answer (the problems posed by this situation in the control of cancer and diseases of the heart are receiving the most serious study—Morrison) (I shall try at least to pose basic issues that underlie all our political problems—Frankfurter)

A state (see RELATE): *offer, tender, present

proposition *proposul

propound *propose, pose

proprity *decorum, decency, etiquette, dignity

prorate *apportion, portion, parcel, ration

prosac, proxy, matter-of-fact all denote having a plain, practical, unimaginative, unemotional character or quality. Prosaic implies an opposition to poetic in the extended sense of that word. Although the term suggests the quality of prose, it seldom refers to literary prose as such but rather to the ordinary language of men in communicating their wants, their ideas, or their experiences, or in rendering intelligible what is difficult to understand or make clear; hence, prosaic usually implies a commonplace, unexciting quality, and the absence of everything that would stimulate feeling or awaken great interest (to make verse speak the language of prose, without being prosaic . . . is one of the most arduous tasks a poet can undertake—Copper) (a certain irreverent exuberance which prompts him never to choose a prosaic example for his concrete illustrations—Times Lit. Sup.) (the eighteenth century, from the religious point of view, is a period of rather cold and prosaic common sense—Inge) (a record of mediocrities, of the airless prosaic world of a small college town—E. K. Brown) Prosy, on the other hand, suggests a relation to poetic; it is the verb, rather than to the noun, and heightens the implication in the verb of turning what is poetry or interesting prose into dull plain prose (as by paraphrasing or by translating). Consequently, prosy stresses extreme dullness or tediousness and usually implies a tendency to talk or write at length in a boring or uninviting manner (made me wish that he would be long-winded and prosy instead of twitching me from one thing to another—Sassoon) (call prosy dull society sinners, who chatter and bleat and bore—Gilbert) Matter-of-fact stresses a lack of interest in the imaginative, speculative, visionary, romantic or ideal; sometimes it connotes accuracy in detail, but often it suggests concern only for the obvious and a neglect of the deeper or spiritual reality or an absence of emotional quality (a matter-of-fact account of his experience) (a matter-of-fact historian) (faced with this matter-of-fact skepticism you are driven into pure metaphysics—Shaw) (Lilly, who was matter-of-fact and in whom introspection, poetry or contemplation had no place—Ethel Wilson)

A practical, *practicable: boring, tedious, *irksome

Ana swell, distend, *expand
proud 1 Proud, arrogant, haughty, lordly, insolent, overbearing, supercilious, disdainful can mean in common filled with or showing a sense of one's superiority and scorn for what one regards as in some way inferior. Proud (see also proud under PRIDE n) usually connotes a lofty or imposing manner, attitude, or appearance that may be interpreted as dignified, elevated, spirited, imperious, satisfied, contemptuous, or inordinately conceited according to the circumstances *why, why should the spirit of mortal be proud? Like a swift-flitting meteor, a fast-flying cloud . . . he passeth from life to his rest in the grave—William Knox) <she's a stick-up proud girl, and she hasn't a proper decency—{Buck}) Arrogant implies a disposition to claim for oneself, often domineeringly or aggressively, more consideration or importance than is warranted or justly due <the Junker developed into a judge, dominating, arrogant type of man, without cultivation or culture—Shirer) in holidays the atmosphere of home is apt to be dominated by the young people. Consequently they tend to become arrogant and hard—Russell) Haughty implies a strong consciousness of exalted birth, station, or character, and a more or less obvious scorn of those who are regarded as beneath one <pride goeth before destruction, and an haughty spirit before a fall—Prov 16:18) <his walk, his haughty, indifferent manner spoke his scorn for the two . . . men who accompanied him—Hervey) The last four words of this group are more specific than the preceding terms and refer more to the ways in which arrogance or haughtiness is exhibited than to the temperament or attitude. Lordly usually suggests pomposity, strutting, or an arrogant display of power or magnificence a lordly indifference to making money by his writings—Stephen) a lordly foreman in a shoe factory—a man who, in distributing the envelopes, had the manner of a prince doling out favors to a servile group of petitioners—Dreiser) Insolent implies both haughtiness and extreme contemptuousness; it carries a stronger implication than the preceding words of a will to insult or affront the person so treated <she could not determine whether the silent contempt of the gentlemen, or the insolent smiles of the ladies, were more intolerable—Austen) <vile food, vile beyond belief, slapped down before their sunken faces by insolent waiters—K. A. Porter) Overbearing suggests a bullying or tyrannical disposition, or intolerable insolence <an overbearing employer) <back country militiamen whose rough overbearing manners sorely tried the Indians' patience—Amer. Guide Series: Tenn.) Superficial stresses such superficial aspects of haughtiness as a lofty patronizing manner intended to repel advances. It refers to one's behavior to others rather than to one's conceit of oneself, though the latter is always implied; often it suggests not only scorn but also incivility <they have no blood these people. Their voices, their supercilious eyes that look you up and down—Galsworthy) <supercilious and haughty they [camels] turn this way and that, like the dowagers of very aristocratic families at a plebeian evening party—Huxley) Disdainful implies a more passionate scorn for what is beneath one
than does supercilious; it as often as not suggests justifiable pride or justifiable scorn (very elegant in velvet and broadcloth, with delicately cut, disdaining features)—one had only to see him cross the room . . . to feel the electric quality under his cold reserve—Cather (a democracy smugly disdainful of new ideas would be a sick democracy—Eisenhower)

Ana contemptuous, scornful, disdainful (see corresponding nouns under DESPISE): pretentious, ostentatious (see SHOWY): imperious, domineering, *masterful

Ant humble: ashamed

2 vain, vainglorious (see under PRIDE n)

Ana exalted, magnified, aggrandized (see EXALT): self-satisfied, *complacent, smug: contented, satisfied (see under SATISFY)

Ant ashamed: humble

prove

Prove, try, test, demonstrate are comparable when they mean to establish a given or an implied contention or reach a convincing conclusion by such appropriate means as evidence, argument, or experiment. The same distinctions in implications and connotations are evident in their corresponding nouns proof, trial, demonstration when they denote the process or the means by which a contention is established or a convincing conclusion is reached. Prove and proof (see also INDICATE, REASON n 1) are the most widely useful of these terms, employable not only in reference to contentions and conclusions, but also in reference to persons or things whose quality (as of strength, genuineness, or fitness) is in question. When used in reference to contentions or to conclusions reached by study, they imply that evidence sufficient in amount and sufficiently reliable in its character has been adduced to bring conviction of the truth of the contentions or conclusions and to make other contentions or other conclusions untenable (this proposition may or may not be true; at present there is certainly no evidence sufficient to prove it true—Russell) (the legislation of the different colonies furnishes positive and indubitable proof of this fact—Taney) But prove and proof when used in reference to persons or things about which there is doubt in some particular imply the settlement of this doubt or the establishing of certainty of his or its quality by subjecting the thing to an experiment or by giving the person a chance to manifest his quality in experience, or by such means as assaying, verifying, or checking (we want to realize our spontaneity and prove our powers, for the joy of it—Justice Holmes) (prove a cannon) (proved his courage in action) (put a man’s loyalty to the proof) (the proof of the pudding is in the eating) Try and trial (see also ATTEMPT vb, TRIAL 2) carry implications from their earliest senses of to separate, or the separation of, the good from the bad in a person or thing, and therefore stress not the conclusion reached but the process by which the guilt or innocence of a person is definitely proved, or a thing’s genuineness or falsity, its worth or worthlessness, or its degree of strength or validity is definitely established (try a person for theft) (a boy does not like to be called a fool, and is usually ready to try the question with his fists—Meredith) (some other apparently inaccessible peak on which to try their ardor and endurance—Mays) (the new employee is on trial) (a brief trial of the plan would convince the people of its futility—Osg & Ray) Test, both as a verb and as a noun, implies a putting to decisive proof by means of experiment, use, experience, or comparison with a high standard, or through subjection to a thorough examination or trial for the sake of such proof or a determination of the facts (experience is the surest standard by which to test the real tendency of the existing constitution—Washington) (the first time he made a helmet, he tested its capacity for resisting blows, and battered it out of shape; next time he did not test it but “deemed” it to be a very good helmet—Russell) (one test of a writer’s value lies in the series of illusions and superstitions which surround his work—Geismar) Demonstrate and demonstration (see also SHOW vb 1) imply the conclusive proof of a contention or the reaching of a conclusion about which there can be no doubt. In such use, prove and demonstrate and their corresponding nouns are not distinguishable except that in demonstrate the emphasis is upon the resulting certainty or formality of method (I’ll first imagined, and then demonstrated, that the geologic agencies are not explosive and cataclysmal, but steady and patient—Eliot) Ana corroborate, verify, substantiate, *confirm: *justify, warrant

Ant disprove

2 *indicate, betoken, attest, bespeak, argue

Ana evidence, manifest, evince, *show, demonstrate

provenance, provenience *origin, source, inception, root, prime mover

Ana beginning, commencement, starting (see corresponding verbs at BEGIN)

provender *food, fodder, forage, feed, victuals, viands, provisions, comestibles

proverb maxim, adage, motto, *saying, saw, epigram, aphorism, apothegm

provide, supply, furnish mean to give or to get what is desired by or needed for someone or something. The words are often used interchangeably without seeming loss (provide what is needed for an army) (supply daily rations of food) (furnish enough men for the expedition) but sometimes one of them rather than either of the others may be selected because of the implications or connotations that it stresses. Provide may suggest foresight and stress the idea of making adequate preparation for something by stocking or equipping; the agent of the action in such cases is usually personal (provide for the common defense—U. S. Constitution) (through the long painful days of inaction his wife sought by every possible means to provide him with occupation—Current Biog.) (federal old-age and survivors insurance provides retirement benefits to workers—Collier’s Yr. BK.) Supply may stress the idea of replacing, of making up what is needed, or of satisfying a deficiency (cards . . . and the polished die, the yawning chasm of indolence supply—Cowper) (unable to supply the public demand) (an age which supplied the lack of moral habits by a system of moral attitudes and poses—T. S. Eliot) (the book would be incomplete without some such discussion as I have tried to supply—Inge) Furnish (see also FURNISH) may emphasize the idea of fitting something or someone with whatever is necessary or, sometimes, normal or desirable (as for use, occupancy, service, or emergencies) (a small salary out of which she had to furnish her own wardrobe—Current Biog.) (the . . . tail of this bird . . . is furnished with proper quills—Winchell) (the southeast trade winds and the tropical foliage furnish alleviating coolness—Chippendale)

Ana *prepare, fit, ready: equip, outfit, arm (see FURNISH): purvey, *cater

provided *if

providence *prudence, foresight, forethought, discretion

Ana *care, solicitue, concern: thoughtfulness, consideration (see corresponding adjectives at THOUGHTFUL): frugality, thriftiness, economy (see corresponding adjectives at SPARING)

Ant improvidence

provident prudent, foresighted, forethoughtful, discreet
providential

(provision under PRUDENCE)

Ana careful, solicitous, concerned (see under CARE n):
*thoughtful, considerate: *sparing, economical, frugal, thrifty

Ant improvident

providential *lucky, fortunate, happy

Ana *limit, confine, bound, end

2 •function, office, duty

Ana *work, calling, pursuit, business: *task, duty, job

provincial *insular, parochial, local, small-town

Ana circumscribed, confined, limited, restricted (see LIMIT vb): narrow, narrow-minded, *illiberal, intolerant, hidebound, bigoted

Ant broad

—Con cosmic, cosmopolitan, *universal:

*literal, progressive

provision 1 •condition, stipulation, terms, proviso, reservation, strings

Ana clause, article, *paragraph: prerequisite, requisite, *requirement

2 in plural form provisions •food, feed, victuals, viands,

anaesthetic, anesthetic

costembles, provender, fodder, forage

provisional 1 Provisional, tentative are comparable when they mean not final or definitive. Something provisional is adopted only for the time being and will be discarded when the final or definitive form is established or when the need which called it into being no longer exists. Provisional, therefore, is used to describe something made or devised while its permanent successor is in process of formation or construction (a provisional government) <these provisional assemblies would decide the conditions under which elections should be held—Cronyn> or when circumstances prevent introduction of a corresponding definitive or permanent thing; thus, a provisional order of a government agency is one subject to review and revision by the legislative branch; a provisional license or certificate (as of a driver or a teacher) is one destined to be replaced by a permanent license or certificate if the holder maintains certain standards or meets certain additional qualifications. Something tentative is of the nature of a trial or experiment or serves as a test of a thing's practicability or feasibility <the awakening of the modern world to consciousness, and its first tentative, then fuller, then rapturous expression of it—J. R. Lowth> it would be folly to treat the first tentative results as final—Jeans> <Maria was entranced with this reverent gesture, and her tentative approval of her cousin settled into awed respect—Hervey>

Ana *temporary: conditional, *dependent, contingent

Ant definitive

2 •temporary, ad interim, acting, supply

proviso *condition, stipulation, terms, provision, reservation, strings

Ana clause, article, *paragraph: limitation, restriction (see corresponding verbs at LIMIT): contingency, exigency (see JUNCTURE)

provoke 1 Provoke, excite, stimulate, pique, quicken, galvanize can all mean to rouse one into doing or feeling something or to call something into existence by so rousing a person. Provoke stresses a power in the agent or agency sufficient to produce such an effect, but it is often the least explicit of these terms as to the nature or character of that power and may imply nothing more than the effecting of the stated result (<it is not in . . . the emotions provoked by particular events in his life, that the poet is in any way remarkable or interesting—T. S. Eliot> <inoculate you with that disease . . . in order to provoke you to resist it as the mud provokes the cat to wash itself—Shaw> <his candor provoked a storm of controversy—Times Lit. Sup.> Excite carries so strong an implication of a rousing that stirs up, moves profoundly, or serves as a challenge to one's powers that the term is often used merely in the sense of to rouse in any of these ways (<the ideas which excited my own generation—Æ> <a city beautiful enough to delight the romantic, picturesque enough to excite the jaded—Cassidy> Often, however, excite adds to these implications those found in provoke, and thereby becomes a more explicit or richer word than the latter by suggesting the powerful or stirring nature of the agent or agency and the degree or intensity of the activity stirred up (<the curiosity excited by his long absence burst forth in . . . very direct questions—Austen> <the ruler's rivals, driven to outrage or excited to greed had, . . . , intrigue governments built on stilts—Flora Lewis> Stipulate suggests a provoking or exciting by or more often as if by a prick, a spur, or a goad; sometimes therefore it connotes a rousing out of lethargy, indifference, inaction, or inactivity, or a bringing forth into play something that is latent, dormant, or quiescent <the stupidity of the opposition stimulated him, and made him resolve—Mencken> <I have always believed that it is better to stimulate than to correct, to fortify rather than to punish—Benson> Often stimulate specifically implies excitement or reexcitement of interest, especially of an intellectual interest (<some subjects, which are remarkably stimulating to the mind of the pupil, are neglected, because they are not well adapted for examinations—Inge> <it's stimulating to be outside the law. It makes you look sharp, it simplifies the day's job—'Woud> Pique, a term of more restricted application, suggests provocation or stimulation by or as if by something that pricks or irritates (<a show of secrecy always piques her curiosity> <piqued . . . by what he considered to be a premature disclosure of the plan—Armbrister> Quicken implies a stimulation of life, vigor, energy, or activity with consequent beneficial results (<the mistress which I serve quickens what's dead—Shak> <with his feeling for history quickened and sharpened, he was to find another stimulus to follow up this interest of his boyhood—Brooks> Galvanize suggests a highly artificial stimulating or quickening, especially of something old, or stiff, or dying (<he seemed a mere automaton, galvanized into moving and speaking—Hardy> <galvanize the government into vehement and extraordinary preparation—Str Winston Churchill>)

Ana arouse, rouse, *stir: *thril, electrify, enthuse: *galvanize

2 •irritate, exasperate, nettle, aggravate, rile, peev

Ana affront, *offend, insult, outrage: *anger, incense, madden: agitate, upset, perturb (see DISCOMPOSE)

Ant gratify

prowess *heroism, valor, gallantry

Ana bravery, boldness, audacity, intrepidity (see corresponding adjectives at BRAVE): *courage, mettle, spirit: strength, might, puissance, *power

prowl vb •wander, stray, roam, ramble, rove, range, gad, gallivant, traipse, meander

proximity, propinquity are often used almost interchangeably to denote nearness. Proximity, however, commonly implies simple and often temporary nearness in space; it may be used with reference to either persons or things found in the same vicinity or neighborhood (for centuries and centuries their nests have been placed in the closest proximity to man—Jeffries> <his office geographically was just down the corridor from George's, a proximity which Harry had insisted on—Auchincloss> affected
much as he might have been by the proximity of a large dog of doubtful temper—Shaw—Propinquity may imply proximity, but it then usually distinctively suggests closeness, sometimes even contact: we read a book because it happens to be near us and it looks inviting. It is a case where propinquity is everything—Brothers

(they are jammed into such propinquity with one another in their new suburbia—Whyte) But it is more often used as proximity is not, to imply nearness in relationship: here I disclaim all my paternal care, propinquity, and property of blood—Shak.) or closeness in association, in age, or in tastes. (Environment and propinquity make for a desire to graduate from marijuana to opiates—Mauer & Vogel) or even closeness in time: (events occurring in close propinquity to each other) thereby was declared the propinquity of their desolations, and that their tranquility was of no longer duration than those soon decaying fruits of summer—Browne

Ana nearness, closeness (see corresponding adjectives at CLOSE): adjacency, contiguousness, juxtaposition (see corresponding adjectives at ADJACENT)

Ant distance

proxy 650 pseudonym

prudential: prudence, providence, foresight, forethought, discretion are comparable when they denote a quality that enables a person to choose the wise and sensible course, especially in managing his practical affairs. The same differences in implications and connotations are apparent in the corresponding adjectives prudent, provident, foresighted, forethoughtful, discreet. Prudence and prudent (see also WISE), the most comprehensive of these words, imply both that one does not act rashly or unadvisedly and that one has foreseen the probable consequences of one's act. Consequently the terms usually imply habitual caution and circumspection: that type of person who is conservative from prudence but revolutionary in his dreams—T. S. Eliot (prudence is a virtue that reviews all of the values at stake and then assigns to each its proper weight—JAMA) (had judged it more prudent to hide than to fight—Heiser) Providence and provident imply thought for the future, especially with reference to its difficulties and its needs and, usually, the provision in advance of what will then be required: (the intellectual providence to acquire...vast stores of dry information—Baghetto) a provident, rather thoughtful people, who made their livelihood secure by raising crops and fowl—Cather

Foresight and foresighted stress a power, usually the result of a highly developed intelligence, of seeing what is likely to happen and of being prepared for it: (the more we study the making of the principate, the more we shall be impressed with the grasp and foresight of its founder—Buchan) (incapable of the foresighted control and adjustment of action which are the essence of all the higher forms of behavior—McDougall)

Forethought and the less frequent forethoughtful suggest due consideration of contingencies (in choosing the Yankee dialect, I did not act without forethought—J. R. Lowell) (every newcomer, be he never so forethoughtful, finds himself lacking tools—Bell) Discretion and discreet stress qualities (as good judgment, caution, and self-control) which make for prudent or compel prudent action; they often imply the power to restrain oneself when one is tempted to be temerarious, passionate, incensed, or loquacious: (encountered an eagerness to talk and a candor of expression among officials that...has heavily taxed my discretion—A. E. Stevenson) (I dare say he will be a disreeter man all his life, for the foolishness of his first choice—Austen)

Ana caution, circumspection, calculation (see under CAUTIOUS): expediency, advisableness (see corresponding adjectives at EXPEDIENT): frugality, thriftiness or thrift (see corresponding adjectives at SPARING)

prudent 1 judicious, sensible, sane, *wise, sage, sapient

prudent 2 provident, foresighted, forethoughtful, discreet (see under PRUDENCE)

Ana *cautious, circumspect, calculating, wary: politic, *expedient, advisable: economical, frugal, thrifty, *sparring

3 Prudent, prudential are sometimes confused in use. Prudent applies to persons or their acts or utterances and implies such qualities of mind or character as caution, circumspection, and thrift (see prudent under PRUDENCE), or as wisdom in practical affairs (see WISE) (a prudent man) (a prudent course) (a prudent way of life) (people who are both dissolute and prudent. They want to have their fun, and they want to keep their position—Sackville-West)

Prudential, on the other hand, applies not to individuals but either to habits, motives, policies, or considerations which are dictated or prescribed by prudence, forethought, business sense, or practical wisdom: (in a prudential light it is certainly a very good match for her—Austen) (from obvious prudential considerations the Pacific has been principally sailed over in known tracts—Melville) or to committees, groups, or associations having charge of practical affairs such as expenditures or exercising discretionary or advisory powers in regard to these (a prudential investment society) (the prudential committee of a Congregational church)

Ana political, *expedient, advisable: advising, counseling (see corresponding verbs under ADVICE)

prudential *prudent

prudish *prim, priggish, prissy, puritanical, straitlaced, stuffy

Ana *rigid, strict: stern, *severe, austere: formal, conventional, solemn (see CEREMONIAL)

prune vb trim, lop, *shear, poll, clip, snip, crop

Ana enhance, heighten (see INTENSIFY): eliminate, *exclude

prying *curious, inquisitive, snoopy, nosy

Ana meddlesome, officious, *impertinent, intrusive, obtrusive

pseudo *counterfeit, spurious, bogus, fake, sham, pinchbeck, phony

Ana *false, wrong: *misleading, deceptive, delusive, delusory

pseudonym, alias, nom de guerre, pen name, nom de plume

Incognito all denote a name other than one's true or legal name. Pseudonym usually implies assumption of a fictitious name as an accepted practice of writers, prizefighters, actors, and entertainers; it does not suggest a discreditable motive for one's attempt to conceal one's identity. Alias, in legal use, covers not only assumed names, but those ascribed by others; thus, a boy's true name may be John Potter but he is better known by the alias John Rhoads (Rhoads being his stepfather's name). In more general use alias is associated regularly with offenders against the law and usually connotes an attempt to free oneself by a change of name from the onus of a criminal record. Nom de guerre is a pseudonym assumed by one who seeks anonymity or freedom of scope typically as an adventurer, a critic, or a controversialist; pen name or nom de plume is the pseudonym of a writer. Incognito can denote a name or character adopted especially by a person of rank or eminence from a desire to remain unrecognized or as a polite fiction by which the honors due his rank or eminence may be avoided (the Prince

puberty, pubescence *youth, adolescence

public n *following, clientele, audience

publication declaration, announcement, advertisement, proclamation, promulgation, broadcasting (see under DECLARE)

publicity, ballyhoo, promotion, propaganda are comparable when they mean either a systematic effort to mold public opinion in respect to something or the means or the manner used in such an effect. Each implies a specialized form of advertising. Publicity is used especially in reference to the activities of and the information disseminated by a person or persons in the employ of individuals, corporations, organizations, associations, or institutions that seek advertising through more or less indirect means in order to attract attention to themselves, their products, or their objectives or that wish to provide a source of authoritative information on matters concerning themselves that are of interest to the public; thus, the work of a theatrical press agent and of a public relations counsel is publicity; in the first case, for an actor or producer seeking favorable notices in the press; in the second, for a corporation or institution that seeks to control the kind of information regarding itself that is published some of his carefully planned speeches, always made in the presence of the right listener, are perfect of their kind—their kind being advertisement, or, as we say now, publicity—Lucas

*beauteous, good-looking, comely, bonny, pulchritudinous

pulsate, pulse, beat, throb, palpitate can mean to manifest a rhythmic movement such as or similar to the one which occurs in the circulatory system when blood is forced along by alternate contractions and relaxations of the vessels of the heart. The same distinctions in implications and connotations are to be found in the nouns pulsation, pulse, beat, throb, palpitation when they are used of this rhythmic movement or of one distinct step in it. Pulsate and pulsation carry few specific or distinguishing connotations, but they usually imply regularity, continuity, and vigor in the rhythm whether it is apparent in movements or in sounds (when the heart no longer pulsates, death occurs). Great effort pulsating from the heart of this small island—Sir Winston Churchill (the pulsations of its engine had died away—Bennett) (long heavy pulsation of airplanes passing over—Thirkell) Pulse, the verb, carries a strong implication of impelled movement; in distinction from pulsate it may also connote a lively succession of spurts, waves, or gushes; thus, the arteries pulsate as the blood pulses through them. The term is more common in general and literary than in technical use. It sometimes takes as its subject what flows or moves in this fashion (as the blood) and at other times what evidences the rhythmic movement (as the heart or blood vessels) (the pulsing waters of the sea) (through the tensed veins on his forehead the blood could be seen to pulse in nervous, staccato bounds—Donn Byrne) (that it moved and breathe in an environment that pulses and glows—Mencken) Pulse, the noun, is chiefly a technical term; even its extended use is affected by or dependent on the term's meaning in physiology. In this sense, pulse usually denotes the number of pulsations of the arteries in a minute as observed commonly by feeling the radial artery of the wrist (a normal pulse) (to feel a patient's pulse) (an intermittent pulse) (in his eardrums, his heavy pulse—Lowell) In extended use pulse, when it does not take the place of pulsation is usually a metaphoric extension of the technical use (Rome was the heart and pulse of the empire... and on its well-being hung the future of the civilized world—Buchan) (one felt the pulse of the village in the pub—MaiS) Beat, both verb and noun, is the ordinary non-technical word often used in place of pulsate and pulsation and sometimes in place of pulse. It stresses rhythmic recurrence of sounds more often than rhythmic and continuous alternation in movement (he could hear the beat of his heart) (his breathing was hard and... the blood beat in his ears and eyes—Robertson Davies) (a question was beating unanswered at the back of his brain—Glascow) It is the more usual designation for something (as the tick of a clock, a stroke on a drum, and the accented syllable in verse or note in music) that strikes the ear at regular intervals (the beat of a bird's wings against a windowpane) (the beating of tom-toms) Both the noun and verb throb imply vigorous and often violent or painful pulsation (throb of drum and timbal's rattle—Housman) The throbbing of an abscised tooth Either is especially appropriate when there is the intent to imply excitement, strain, or emotional stress (the love which fills the letter, which thobs and burns in it—H. O. Taylor) (here is a captain, let him tell the tale; your hearts will throb and weep to hear him speak—Shack) (the throb of their activity is felt throughout the whole body politic—R. M. Dawson) Palpitate and palpitation imply rapid, often abnormally rapid and fluttering, pulsation. In medical use the terms commonly imply overexertion, violent emotion, or a diseased condition; in extended use, however, the words more often imply a rapid vibration, quivering, or shaking, without any connotation of something amiss (then, delicate and palpitating as a silver reed, she stood up in the soft light of the morning—Hewlett) (though the book palpitates with its amour, nothing like simple ordinary human love is to be seen anywhere—Barrett) Ana vibrate, fluctuate, waver, oscillate (see SWING) quiver, shudder, quaver, tremble (see SHAKE) Pulsation pulse, beat, throb, palpitation (see under PULSATE) Pulse n pulsation, beat, throb, palpitation (see under PULSATE) Ana *rhythm, cadence, meter: vibration, fluctuation (see corresponding verbs at SWING) Pulse vb *pulsate, beat, throb, palpitate Ana *move, drive, impel: vibrate, fluctuate, oscillate (see SWING) Pummel vb *beat, pound, buffet, baste, belabor, thrash Ana *strike, hit, smite, slug, punch Punch vb 1 *strike, hit, smite, slug, smack, clout, slap, box, cuff Ana *beat, pound, pummel, baste, belabor 2 *perforate, puncture, prick, bore, drill Ana pierce, penetrate, probe, *enter Punch n *vigor, vim, spirit, dash, esprit, verve, élan, drive Punctilious punctual, meticulous, scrupulous, *careful Ana particular, fuss, squeamish, fastidious, *nice: formal, conventional, ceremonious, *ceremonial Punctual punctilious, meticulous, scrupulous, *careful Ana *quick, prompt, ready: precise, *correct, nice, right Puncture vb *perforate, punch, prick, bore, drill Ana pierce, penetrate (see Enter): deflate, shrink (see CONTRACT vb) Pungent, piquant, poigniant, racy, spicy, snappy are comparable when they mean characterized by sharpness, zest, and a piercing or gripping quality. Pungent applies especially to a sharp, piercing, stinging, biting, or penetrating quality, primarily of odors; it may suggest power to excite or stimulate keen interest or telling force and cogency (her perfume, a sweet pungent odor... evocative and compelling—Styron) (the pungent reek of a strong cigar—Doyle) (his pungent pen played its part in rousing the nation to its later struggle with the Crown—J. R. Green) (the mob needs concrete goals and the pungent thrill of hate in order to give vent to its destructive impulses—Cohen) Piquant may indicate an interesting or appetizing tartness, sharpness, or pungency that stimulates or a zestful, arch, provocative, challenging, or exciting quality that is individual or peculiar (a piquant sauce) (piquant with the tart-sweet taste of green apples and sugar—Spitzer) (piquant touch of innocent malice in his narration—Coulton) (those piquant incongruities, which are the chief material of wit—Montague) Poignant (see also MOVING) may describe what is sharply or piercingly effective upon the senses or stirring to one's inmost consciousness or deepest emotions (the air of romantic poverty which Rosalie found so tragically piquant—Wylie) (with poignant flatness, as a lover might put away a rose from a lost romance—Tobull) (a vague but poignant sense of discouragement that the sacrifices of the

faults lie open to the laws; let them, not you, correct him
—Shak.> must moreover know how to correct without wounding—Barzun

purchase vb *buy

Ana gain, win, *get, obtain, procure, secure

pure 1 Pure, absolute, simple, sheer denote free from every-
thing that is foreign to the true nature or the essential
character of the thing specified. Pure distinctively suggests freedom from intermixture. When applied to concrete
things, it usually implies lack of contamination, adultera-
ton, or pollution (pure water) (a pure breed) When ap-
piled to an abstraction or to a concrete example of an
abstraction, it implies the absence of everything that would obscure the thing in its essence or in its ideal character
(pure poetry) <an institute devoted to pure physics, as
distinct from applied physics—Endeavour> (as there is a
constant mingling of Hebrew and Aramaic passages, the
Aramaic is not pure—Barton) Absolute implies freedom
from relation to or dependence on anything else; it is ap-
piled chiefly to abstractions (as space, time, and magni-
tude) viewed independently of experience and considered
in their ultimate ideal character; thus, absolute space, as
used in physics, is space conceived of as apart from the
things which occupy it, and which limit or determine the
ordinary person’s notion of it. Because of such use, abso-
late often comes close to real, as opposed to apparent.

 Absolute music, in theory, is music that depends solely on
such distinctive properties of that art as tone, harmony,
and rhythm to produce its effects, and avoids, in contrast
to program music, all suggestion or characterization of
external things. Absolute is applied to substances less
often than is pure, but both are applied to alcohol: pure
alcohol is free from other matter except for a modicum of
water; absolute alcohol is both pure and completely de-
hydrated. Simple stresses singleness of character and is
distinguished from what is compound or complex. It can
connotate homogeneity and incapacity for analysis or further
reduction <an element is a simple substance> quality and
relation are simple notions <was now confronted by
simple beauty, pure and undeniable—Gibbons> <too-
elaborate deference paid them by the neighbors embarr-
sed them and caused them to clothe their wealth in
muted, simple gray—Styron> Simple, as applied to ab-
stractions or conceptions, often suggests artificial freedom
from complexity, and sometimes also unreality or untruth,
when the simplicity is attained by eliminating essential
factors <the world to which your philosophy professor
introduces you is simple . . . . The contradictions of real
life are absent from it—James Sheer, more than any of
these words, tends to lose its significance and to become a
mere intensive <Sheer nonsense> However, it can distin-

guish such a dissociation from everything else that the
pure and essential character of the quality (as a trait, virtue,
or power) to which it is applied is clearly displayed
<the “Ancient Mariner” . . . is a work of sheer imagination
—Lowes> he was part sheer technician, part delighted
dchild when he could demonstrate his sound system—

Theodore Sturgeon>

An *furnish, equip, outfit
pursuview *range, gamut, reach, radius, compass, sweep, scope, orbit, horizon, ken
push vb Push, shove, thrust, propel mean to use force upon a thing so as to make it move ahead or aside. Push implies the application of force by a body (as a person) already in contact with the body to be moved onward, aside, or out of the way <push a wheelbarrow along the road> <push a door open> <push a man over a cliff> <an extra locomotive was needed at the rear to push the long train up the grade> <push the excited children into another room>
Shove often differs from push in carrying a stronger implication of the exercise of muscular strength and of forcing something along a surface <the boys shoved the furniture up against the walls> <I picked him up trying to shove in the front door. There wouldn't been any door in a minute—Hellman> Often, when muscular exertion is not strongly implied, haste or roughness or rudeness in pushing is suggested <shoved the paper into his pocket> <shove the articles on the desk into a box> <shove a person out of one's way> <I can't say that I took the drink. It got shoved into my hand—Warren>
Thrust differs from push in carrying a weaker implication of steadiness or continuance in the application of force and a stronger suggestion of rapidity in the movement effected or of violence in the force that is used; often the use of actual physical force is not clearly implied <Abraham . . . thrust the old man out of his tent—Taylor> <thrust her hands in her coat pockets in a coquettish pose—Wouk> Often, also, it implies the sudden and forcible pushing (as of a weapon, implement, or instrument) so that it enters into the thing aimed at <thrust a spear into an opponent's breast> <thrusting their money into a stranger's hand—Wolfe>
Propel implies a driving forward or onward by a force or power that imparts motion. In some use it implies pressure exerted from outside or behind, usually by some power that is not human <the flow of air which propels the slow-sailing clouds—Lowes> <she walked—as if she were being propelled from the outside, by a force that she neither knew nor could control—Tate> Additionally, it is the usual term when the use of a mechanical aid or of an actuating power (as steam or electrical power) is implied <ships propelled by steam> <a galley propelled by fifty oars> <automobiles are usually propelled by internal-combustion engines>
In extended uses push implies a pressing or urging forward (as with insistence, with vigor, or with impetuousness) so that one's end may be gained, one's work may be completed, or one's goal be reached <push the nation into war> <push a theory to an extreme> <he directed a year-long probe . . . then pushed through sweeping reforms—Armbrister> Shove often suggests obtrusiveness or intrusiveness or lack of finesse in attaining an end or making a way for oneself or another <shove oneself into society> <shoving the boring tiring jobs off onto other people—Ann Bridge> Thrust implies a forcing upon others of something that is not wanted, desired, or sought for <some have greatness thrust upon 'em—Shak> <Amy had a grievance . . . because Sophia had recently thrust upon her a fresh method of cooking green vegetables—Bennett> Propel is sometimes used in place of impel when a strong inner urge or appetite is implied as pushing one on, especially toward what one desires <anxiety is not the only force that propels us, but it is surely one of the most potent—Binger>
An *move, drive, impel: *force, compel, constrain, oblige
pushing, pushy *aggressive, militant, assertive, self-assertive
An *vigorous, energetic, strenuous: officious, intrusive, obtrusive (see IMPERTINENT): self-confident, confident, self-assured, assured (see corresponding nouns at CONFIDENCE)

put up *reside, live, dwell, sojourn, lodge, stay, stop
puzzle vb Puzzle, perplex, mystify, bewilder, distract, nonplus, confound, dumbfound are comparable when they mean to disturb and baffle mentally or throw into mental confusion. The first three words express various mental reactions to what is intricate, complicated, or involved. Puzzle implies such complication or intricacy that the mind finds it exceedingly, often distressingly, difficult to understand or to solve <a great poet may tax our brains, but he ought not to puzzle our wits—Birell> <there was much that impressed, puzzled and troubled a foreign observer about the new Germany—Shirer> Perplex adds to puzzle the implications of worry and uncertainty, especially about reaching a decision on a course of action or the right solution of a personal problem <Southerners . . . were terribly perplexed and torn when the conceptions on which

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
they had been living began to be broken down—Edmund Wilson
To mystify is to perplex, sometimes by playing upon one's credulity, but more often by concealing important facts or factors or by obscuring issues (when she was weary of mystifying foreign statesmen, she turned to find fresh sport in mystifying her own ministers—J. R. Green) (once prescriptions were written almost altogether in Latin. This was not done to mystify the patient—Fishbein). Bewilder often implies perplexity, but it stresses a confused state of mind that makes clear thinking and complete comprehension practically impossible (bewilder by contradictory statements and orders) (do not run to the Socialists or the Capitalists, or to your favorite newspaper, to make up your mind for you: they will only unsettle and bewilder you—Shaw). Distract implies strong agitation arising from divergent or conflicting considerations or interests (she seemed nervous and distracted, kept glancing over her shoulder, and crushing her handkerchief up in her hands)—Cather. Consciousness of ... a current of unsaid speeches, which would distract her feelings and perhaps confuse a little her thoughts—Gibbons.) The last three words imply less mental disturbance and distress than some of the preceding terms, but they heighten the implication of bafflement and mental confusion. Nonplus implies blankness of mind or utter inability to find anything worth saying or doing (the problem which nonplussed the wisest heads on this planet, has become quite a familiar companion of mine. What is reality?—L. P. Smith) (she was utterly nonplussed by the pair of them. ... What on earth were they?—Goudge.) Confound (see also mistake) implies mental confusion, but it stresses the implication either of mental paralysis or of profound astonishment (so spake the son of God; and Satan stood a while as mute, confounded—Milton) (language to him is a means of communication ... He does not wish to dazzle or confound his friends, but only to make himself understood—Crothers) (this sorrow ... seemed to have confounded him beyond all hope—Styron). Dumbfound tends to replace confound in casual and oral use (I cannot wriggle out of it; I am dumbfounded—Darwin) (he captured the public and dumbfounded the critics—Mac). Sometimes dumbfounded so strongly implies astonishment that it is used in place of astounded (I was dumbfounded to hear him say that I was on a quixotic enterprise—William Lawrence).

**Ana** amaze, astound, flabbergast (see surprise): confuse, muddle, addle: embarrass, disconcert, discomfit

**quality**

one quality in a woman that appealed to him—charm—Galsworthy) (the persistent contemporariness that is a quality of all good art—Huxley) (her self-consciousness awkwardness lent her a dangerous amateur quality—Salinger). A property is a quality that is proper to a species or type; it therefore belongs to a thing by virtue of that thing's true or essential nature (the eye has this strange property: it rests only in beauty—Woolf) (rhythm is a property of words—Rickword) (Sir Joseph Thomson ... pointed out that weight is only an "apparently" invariable property of matter—Ellis). A character is a peculiar or distinctive quality more often of a class than of an individual. The term is used especially in scientific and philosophical writing with reference to the properties which distinguish an isolable subgroup (as a species) within a larger group (as a genus) (wheat and oats share the properties of cereal grasses but have specific characters that clearly differentiate them) (barynite and noselite show characters like sodalite, but they differ from it in containing the radical SO3 in the place of chlorine—Pirsson). An attribute is a quality that is ascribed to a thing. The term may imply a lack of definite knowledge of the thing in question; thus, one can speak of the attributes of God, meaning the qualities men ascribe to him (to endow her with all the attributes of a mythological paragon upon Olympus—Wylie) (historical personages become invested with romantic attributes—Wright). More often attribute denotes a quality that, though ascribed, is felt as an essential concomitant which must belong to a thing by reason of its nature (mercy is ... an attribute to God himself—Shak). This Confederation had none of the attributes of sovereignty in legislative, executive, or judicial power—Taney). An accident basically is a nonessential trait; in philosophical use, however, the term often means one of the qualities by which a thing manifests itself and implies, therefore,

**puzzle**

one, another, as many as, as much as, as much of, as many of, as much as any, as many as any, as much as all, as many as all, as much as some, as many as some
a contrast with the substance—or the real, but unapparent, nature—of the thing <waves [on a Japanese artist's screen] such as these, divested of all accident of appearance, in their naked impetus of movement and recoil—Binyon> In more general use accident usually implies fortuitousness or lack of intrinsic value <rhyme is . . . an accident rather than an essential of verse—Lowers> <certainly many mystics have been ascetic. But that has been the accident of their philosophy, and not the essence of their religion—Ellis> *Ana predication, affirmation (see corresponding verbs at assert): peculiarity, individuality, characteristic (see corresponding adjectives at characteristic)

2 Quality, stature, caliber are often interchangeable as indicating, when used without modifiers, distinctive merit or superiority. Quality implies a complex of qualities <see quality 1> and is therefore always singular in use. The term usually implies a high order of excellence, virtue, strength of character, or worth <splendid writing, of course, but to no purpose . . . It's not quality we look for in a novel, but mileage—Purdy> <they're all made by machinery now. The quality may be inferior, but that doesn't matter. It's the cost of production that counts—Dahl> <this little Tania had quality; she carried her scars without a whimper—Bambrick> Stature implies that the one considered has reached or is in process of reaching the height or greatness possible to one of his kind <problings in the realms of life and matter have seemed to diminish man's stature and to belittle his dignity—Marquand> <every piece of work you do adds something to your stature, increases the power and maturity of your experience—Wolfe> Caliber suggests extent or range especially of one's mind or powers; it may connote unusual but measurable range, scope, or breadth of ability or intellect but often depends on qualification to supply a standard of reference or comparison or to indicate the direction of deviation from the norm <a man of high moral caliber—We are on the hill—John Hammond> <pundits of big and little caliber—Craig Thompson> *Ana *excellence, virtue: value, *worth

qualm, scruple, compunction, demur can all denote a feeling of doubt or hesitation as to the rightness or wisdom of something one is doing or is about to do. Qualm implies an uneasy, often a sickening, sensation that one is not following the dictates of his conscience or of his better judgment <have no qualms at all in committing adultery—Book-of-the-Month Club News> <how few little girls can squash insects and kill rabbits without a qualm—Rose Macaulay> <we go on spreading culture as if it were peanut butter . . . but we feel qualms about the result—Barun> Scruple denotes mental disturbance occasioned by doubt of the rightness, the propriety, the fairness, or, sometimes, the outcome of an act; it often implies a principle as the source of the disturbance, and it may imply an overnice conscience or an extremely delicate sense of honor <she has no scruples about carrying away any of my books> <began to have scruples, to feel obligations, to find that veracity and honor were . . . compelling principles—Shaw> <he has not pretended an apprehension which he does not feel, but has candidly disclosed his conscientious scruples—Meltzer> Compunction (see also penitence) implies a usually transitory prickle or sting of conscience that warns a person that what he is about to do or is doing is wrong, unfair, unjust, or improper; it may additionally suggest a degree of concern for a potential victim <showed no compunction in planning devilish engines of military destruction—Ellis> <he has to be taught . . . to feel compunction when he has wantonly caused tears—Russell> *Demur stresses hesitation to such an extent that it carries a stronger implication of delay than any of the other terms; it usually suggests, however, a delay caused by objections or irresolution rather than by an awakened conscience or by a scruple or compunction <he doubts with a persistence of demur and question that might well have surprised Descartes himself—Times Lit. Sup.> <with some misgivings but without demur his committee accepted the decision—Time> *Ana misgiving, *apprehension, foreboding, presentiment: doubt, mistrust, suspicion, *uncertainty

quandary *predicament, dilemma, plight, scrape, fix, jam, pickle

Ana *juncture, pass, exigency, emergency, contingency, crisis: *difficulty, hardship, vicissitude: puzzling or puzzle, mystification, perplexity, bewilderment (see corresponding verbs at puzzle)

quantity amount, *sum, aggregate, total, whole, number

quarrel n Quarrel, wrangle, altercation, squabble, bicker- ing, spat, tiff are comparable when they mean a dispute marked by anger or discord on both sides. The same distinctions in implications and connotations are found in their corresponding verbs, quarrel, wrangle, altercation, squab- ble, bicker, spat, tiff. Quarrel usually implies heated verbal contention, but it stresses strained or severed relations which may persist even after verbal strife has ceased <patch up a quarrel> <she hated any kind of quarrel . . . shuddered at raised voices and quailed before looks of hate—Stafford> <the middle class had taken over the reins. It quarreled with James I, beheaded Charles I—Barr> Wrangle implies undignified and often futile disputation with noisy insistence on each person's opinion <a vulgar wrangle was unknown and indented it was only among the upper servants that . . . jealous friction existed—Sackville-West> <makes them wrangle interminably about petty details—Laski> Altercation and the rare verb altercate imply fighting with words as the chief weapons, though blows may also be connotated <i have an extreme aversion to public altercation on philosophic points—Franklin> <Lydia, foreseeing an altercation, and alarmed by the threatening aspect of the man, attempted to hurry away—Shaw> <it becomes us not . . . to altercate on the localities of the battle—Lytton> Squabble stresses childish and unseemly wrangling over a petty matter; it does not necessarily imply anger or bitter feeling <they had always squabbled . . . but their scenes, with the shouting, the insults, the threats, and the flare-ups of mutual revulsion had gradually increased—Farrell> <a mere squable in the children's schoolroom—Moorehead> Bickering and bicker imply constant and petulant verbal sparring or interchanges of cutting remarks; they suggest an irritable mood or mutual antagonism <the tearing worries of political snarls, of strife between capital and labor, of factional bickering—Salzberger> <though men may bicker with the things they love, they would not make them laughable in all eyes, not while they loved them—Tennyson> *Spat also implies an insignificant cause but, unlike squabble and bicker, it suggests an angry outburst and a quick ending without hard feelings <it wasn't a fight, really—more of a spat than anything else—Heggen> <a teen-ager who . . . is spattering with her mother over unchaperoned dates—Time> Tiff differs from spat chiefly in implying a disagreement that manifests itself in ill humor or temporarily hurt feelings <at the trial circumstantial evidence piled up against him, including his earlier tiff . . . which was offered as a motive—Hilton>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
quarrel vb wrangle, altercation, squabble, bicker, spat, tiff (see under QUARREL n)

Ant sluggish
quicken vb 1 Quicken, animate, enliven, vivify can mean to make alive or lively, but the words diverge more or less widely in their implications. Quicken stresses either the renewal of life, especially of suspended life or growth, or the rousing of what is inert into fullness of activity. Sometimes the rekindled life is physical but more often it is spiritual, intellectual, or imaginative (it is the Spirit that quickeneth . . . the words that I speak unto you, they are spirit, and they are life—Jn 6:63) its characters never quicken with the life one feels lurks somewhere within them—Jerome Stone) Animate (compare animated under LIVING and LIVELY) emphasizes the imparting of vitality or of motion and activity or the giving of liveliness or of the appearance of life to something previously deficient in or lacking such a quality (that which animates all great art—spiritual ferment—Clive Bell) vendors and shoppers . . . animate its lanes—W. R. Moore) Enliven suggests a stimulating influence that kindles, exalts, or brightens; it therefore presupposes dullness, depression, or torpidity, in the thing affected (the sun . . . was wonderfully warm and enlivening—D. H. Lawrence) but soon the feel of the paint on the canvas begins to enliven his mind; and the mind thus quickened conceives a livelier curiosity about the creature before him—Montague) Vivify sometimes, like quicken, implies the renewal of life and at other times, like animate, implies the giving of the appearance of life. In each case it usually also suggests a freshening or energizing effect and implies vitality more often than activity or motion (in . . . the Elizabethan age, English society at large was accessible to ideas, was permeated by them, was vivified by them—Arnold) (the room was dead. The essence that had vivified it was gone—O. Henry) (that Promethean fire, which animates the canvas and vivifies the marble—Reynolds) Ana activate, *vitalize, energize: rouse, arouse, *stir
Ant deaden

Race •the Celtic race, usually designates the citizenry as a whole of a sovereign state and implies a certain homogeneity because of common laws, institutions, customs, or loyalty •the British nation •the French nation •the house must have been built before this country was a nation •Tate •what is a nation? A group of human beings recognizing a common history and a common culture, yearning for a common future or social rather than a national unity, can apply to a large group crossing national boundaries and with something significantly in common •the children of the world are one nation •the very old, another—Jan Struther •for the two nations that inhabit the earth, the rich and the poor—Sitwell •the Gypsy nation •People, sometimes interchangeable with nation though stressing a cultural or social rather than a national unity, can apply to a body of persons, as a whole or as individuals, who share a consciousness of solidarity or common characteristics suggesting a common culture or common interests or ideals and a sense of kinship •the Mexican people •Prewett •the British and American peoples •Sir Winston Churchill •the people of the United States •U. S. Constitution •the peoples of the United Nations •U. N. Charter

R

rabid *furious, frantic, frenzied, wild, frenetic, delirious •maddened, enraged, infuriated, incensed, angered (see ANGER vb): violent, compulsive (see corresponding nouns at FORCE): *insane, crazed, crazy, demented, deranged

race 1 Race, nation, people, even though in technical use they are commonly differentiated, are often used popularly and interchangeably to designate one of a number of great divisions of mankind, each made up of an aggregate of persons who are thought of, or think of themselves, as comprising a distinct unit. In technical discriminations, all more or less controversial and often lending themselves to great popular misunderstanding or misuse, race is anthropological and ethnological in force, usually implying a distinct physical type with certain unchanging characteristics (as a particular color of skin or shape of skull) •the Caucasian race •the Mongolian race •the Aryan race •the house must have been built before this country was a nation—Tate

2 vb •define, specify, designate—Ant

quote, cite, repeat are not close synonyms, though all mean to speak or write again something already said or written by another. Quote usually implies a use of another's words, commonly with faithful exactness or an attempt at it, for some special effect like adornment, illustration, close examination •I will quote a passage which is unfamiliar enough to be regarded with fresh attention —T. S. Eliot •But sometimes quote is applied to a more general referral to someone as the author or source of information without implication of precise reproduction of an original statement •don't quote me as your authority •in one sense we are quoting all the time. To whistle Tin Pan Alley's latest inanity is to quote •To transmit the tired gag of a television comic is to quote—Fadiman

Cite is likely to stress the idea of adding, bringing forward, or mentioning for a particular reason, like substantiation or proof, with or without the idea of uttering another's words •the critic cited in the opening of this chapter—Leavis •ask a senator if he could cite a single piece of legislation enacted solely for the benefit of the public—Armbrister

Repeat stresses the fact of a saying or writing over again of someone else's words often with no reference to the source •repeat a rumor

Typically it carries none of the implication of formal or dignified reasons for the procedure that attaches to quote and cite •unrealistic to go on repeating phrases about the connection of industry with personal independence—Dewey

Aqu •adduce, allege, advance

random, haphazard, chance, chancy, casual, desultory, hit-or-miss, happy-go-lucky are comparable when they mean having a cause or a character that is determined by accident rather than by design or by method. What is random comes, goes, occurs, or is done or made without a fixed or clearly defined aim, purpose, or evidence of method or system or direction; the term implies an absence of guidance by a governing mind, eye, or objective (a random shot) (a random answer to a question) (my choice was as random as blindman’s buff—Burns) (the tail end of the conference was becoming frayed and random—Rand) (the clerks became tired and bored and start making random mistakes—Martin Gardner) What is haphazard is done, made, arranged, used, or said without concern or without sufficient concern for its fitness, its effectiveness, or its possible ill effects, and is more or less at the mercy of chance or whim or of natural or logical necessity (a haphazard policy) (the disorder ... the haphazard scattering of stray socks, shirts and collars, old shoes, and unpressed trousers—Wolfe (not a collection of haphazard schemes, but rather the orderly component parts of a connected and logical whole—Roosevelt) What is described as chance comes or happens to one or is done or made by one without prearrangement or preawareness or without preparation; the term is applicable not only to things but to persons with whom one comes into contact more or less by accident (a chance acquaintance) (a chance meeting with an old friend) (found it increasingly difficult to welcome chance visitors with his usual affability—Graves) What is chancy involves uncertainty and risk because its results, actions, responses, or condition cannot be predicted; the term applies more often to situations and things than to persons (a chancy road to take at night) (a chancy appeal, at best, to the shifting and unguessable sympathies of their readers—Morse) (despite recent advances in geophysics, oil drilling is still a chancy business—Kane) What is casual (see also accidental) leaves or seems to leave things to chance, and works, acts, comes, or goes haphazardly or by chance, or without method or deliberation or indication of intent or purpose; the term often also suggests offhandedness (a casual remark) (his treatment of his friends is casual) or lightness or spontaneity (she was constantly referring to dear friends ... in a casual way) (in a casual and familiar way—Ellis) or lack of definiteness in terms or intention (their policy was opportunistic at home and casual abroad—Spectator) (the casual allusion, the chance reference to her—Henry Adams) What is desultory is not governed by method or system but jumps or skips erratically from one thing to another; the term may imply additionally such consequences as irregular or inconsistent performance or lack of continuity or plan or persistence (make reading have a purpose instead of being desultory—Russell) (its growth from 1900 to 1950 had been desultory—Michener) (a dragged-out ordeal of worry,
aimless wandering, and desultory shopping—Wouk> What is hit-or-miss is so haphazard in its character or operation as to be or appear so wholly lacking in plan, aim, system, or care that one is indifferent as to how it turns out or as to what pattern or arrangement it makes <hit-or-miss patchwork> <a hit-or-miss policy was pursued by the Department of Justice—Ripley> <his . . . training had given him a profound prejudice against inexact work, experimental work, hit-or-miss work—Forester> A person is happy-go-lucky who leaves everything to chance or who accepts with happiness or easy indifference whatever comes; a thing is happy-go-lucky that is governed by such a disposition <a radical pragmatist on the other hand is a happy-go-lucky . . . sort of creature—James> <a funny little happy-go-lucky native-managed railway—Kipling> Ana fortuitous, *accidental, casual: vagrant, vagabond, truant (see corresponding nouns at VAGABOND)

range n 1 *habitat, biotype, station

2 Range, gamut, reach, radius, compass, sweep, scope, orbit, horizon, ken, purview can denote the extent that lies within the powers of something to cover, grasp, control, or traverse. Range is the general term indicating the extent of one’s perception or the extent of powers, capacities, or possibilities <safe, well out of the range of the pursuers> <a beautiful voice with a wide range between the high and the low tones—Ellis> <a creative writer can do his best only with what lies within the range and character of his deepest sympathies—Cather> <the whole range of Greek political life—Dickinson> Gamut suggests a graduated series running from one possible extreme to another <types of light each occupying its particular place in that far-reaching roster or gamut which is called the spectrum—Darrow> Reach suggests an extent of perception, knowledge, ability, or activity attained to or experienced by or as if by stretching out <moving step by step toward the widest generalizations within his reach—L. J. Henderson> <of out of reach of the first invading forces> <anything like sustained reasoning was beyond his reach—Stephen> Radius suggests a usually circular area (as of activity) implied by a known or determined center <the town’s history has been the history of coal; within a radius of five miles are 12 large mines—Amer. Guide Series: Pa.> Compass implies an extent, sometimes more limited than that suggested by range, of perception, knowledge, or activity; it is likely to connote a bounding circumference <the powers expressly granted to the government . . . are to be contracted . . . into the narrowest possible compass—John Marshall> <here we get in very small compass . . . as many different reminders of the continuity of the country . . . as you will find anywhere—Mails> Sweep suggests extent, often circular or arc-shaped, of motion or activity, which latter notion it more strongly suggests than the preceding terms <the boldness and sweep of Webster’s original scheme appear plain on reflection; it was sweep of their universal robbery, they showed at least no discrimination between native and foreign victims—Osbert Sitwell> Scope is applicable to an area of activity, an area predetermined and limited, but an area of free choice within the set limits <its scope was widened by the legislature to include other departments—Amer. Guide Series: Texas> the infinite scope for personal initiative in business—Shaw> Orbit suggests a range of activity or influence, often circumscribed and bounded, within which forces work toward accentuating, integrating, or absorbing <communities . . . outside the orbit of modernity—Lippmann> <the war as a gigantic cosmic drama, embracing every quarter of the globe and the whole orbit of man’s life—Buchan> Horizon suggests an area, periphery within which forces are working or moving.

ratify, confirm

are comparable when they mean to make something legally valid or operative. Both terms pre- sume previous action by a person or body with power of appointing, of legislating, or of framing such a document as a constitution, a treaty, or a contract, and imply reference therefore only to the act of the person or body endowed with the power to accept or to veto the appointment, bill, or document. The terms are occasionally interchanged without loss, but ratify usually carries a stronger implication of approval than confirm and is therefore used by preference when the acceptance of something (as a constitution, a treaty, or a course of action) that has been framed or proposed by a committee or a small body is put up to a larger body (as a society, legislature, or nation) for a vote that testifies to its approval (the men who had written and signed the Constitution became the leaders of the fight to ratify it—Smelser & Kirwin) confirm, on the other hand, stresses the giving of formal or decisive assent as necessary to a thing's validity; it applies specifically to appointments made by an executive (as a president or governor) that according to the constitution of a nation or state require the consent of a body (as a senate, a legislature, or a council) before they are def- initely settled and made legally valid (the other executive function of the Senate, that of confirming nominations submitted by the president—Bryce) (the Senate's powers to ratify treaties and confirm appointments of ambassadors —Dimond & Pfieger)

ration

Ration, allowance, dole, pittance denote the amount of food, supplies, or money allotted to an individual.

Ration implies apportionment and, often, equal sharing. Specifically it is applied in military and naval use to the daily supply of provisions given each man, and in stock- breeding to the daily or periodical supply of food for each animal. In these uses it generally implies dietary variety and restricted amounts of each food. When used of a particular food or commodity (as meat or gasoline) it implies a shortage in the supply and a limitation on the amount allowed each person. Allowance, though often interchangeable with ration, is wider in its range of application. Both imply restriction in amount, but allowance stresses granting rather than sharing and is applicable to money and many other things besides food or commodities (a daily allowance of tobacco for the old pensioners) (a schoolboy's weekly allowance) (the court determines an heir's allowance during his minority) Dole tends to imply a grudging division and needy or sometimes grasping recipients (cold charity's unwelcome dole—Shelley) (no rich man's largess may suffice his soul, nor are the plundered succored by a dole—E. V. Cooke) In current, chiefly British, use dole is applied to a payment to unem- ployed workers, whether in the form of relief or insurance, by the national government. Pittance is likely to suggest, or even stress, scantiness or meagerness. It is applicable to a ration, an allowance, a dole, or a wage, the context usually making the reference clear (and gained, by spinning hemp, a pittance for herself—Wordsworth) (in England, such a dowry would be a pittance, while elsewhere it is a fortune—Byron)

Anna

apportionment, portioning or portion (see corre-ponding verbs at APPORTION): sharing or share, participation, partaking, (see corresponding verbs at SHARE)

rational, reasonable

may be applied to men, their acts, utterances, or policies in the senses of having or manifesting the power to reason, or of being in accordance with what reason dictates as right, wise, or sensible. Rational usually implies a latent or active power to make inferences from the facts and to draw from such inferences conclusions that enable one to understand the world about him and to relate such knowledge to the attainment of personal and common ends; often, in this use, rational is opposed to emotional or animal (we are rational; but we

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
reach vb Reach, gain, compass, achieve, attain can mean to arrive at a point by effort or work. Reach is the most general term, being capable of reference to whatever can be arrived at by exertion of any degree and applicable to such diverse matters as a point in space, in time, or in a development, or as a destination, a goal, or a position of eminence. <i>They reached the city that night</i> (after a long discussion they reached an understanding) In extended use reach may be predicated even of inanimate things (the hour hand has reached two). Gain usually implies a struggle to reach a contemplated or desired destination or goal (gained the confidence of the mountain people by his . . . sympathetic approach—Persons) (I had gained the frontier and slept safe that night—Browning) Compass implies efforts to get around difficulties or to transcend limitations; it often connotes skill or craft in management (a writer who is attempting a higher strain of elevation or pathos than his powers can compass—Montague) (If you can compass it, do cure the younger girls of running after the officers—Austen) Achieve can stress the skill or the endurance as well as the efforts involved in reaching an end (some are born great, some achieve greatness—Shak.) (no government or private organization could give health; people had to achieve it—Heiser) Often it implies accomplishment of something that is in itself a feat or triumph (a complete moral unity such as England achieved—Bellow) Attain connotes more strongly than any of the others the spur of aspiration or ambition (his constant efforts to attain his ends) It is therefore especially referable to ends beyond the vision, the scope, or the powers of most men (this indispensable condition of the safety and civilization of the world is, indeed, very difficult to attain—Hobson) (a fine balance of all the forces of the human spirit such as but once or twice has been attained in the world's history—Binyon) 

Reach, gain, compass, achieve, attain can mean to reach, gain, compass, achieve, attain can mean to arrive at a point by effort or work. Reach is the most general term, being capable of reference to whatever can be arrived at by exertion of any degree and applicable to such diverse matters as a point in space, in time, or in a development, or as a destination, a goal, or a position of eminence. (they reached the city that night) (after a long discussion they reached an understanding) In extended use reach may be predicated even of inanimate things (the hour hand has reached two). Gain usually implies a struggle to reach a contemplated or desired destination or goal (gained the confidence of the mountain people by his . . . sympathetic approach—Persons) (i had gained the frontier and slept safe that night—Browning) Compass implies efforts to get around difficulties or to transcend limitations; it often connotes skill or craft in management (a writer who is attempting a higher strain of elevation or pathos than his powers can compass—Montague) (If you can compass it, do cure the younger girls of running after the officers—Austen) Achieve can stress the skill or the endurance as well as the efforts involved in reaching an end (some are born great, some achieve greatness—Shak.) (no government or private organization could give health; people had to achieve it—Heiser) Often it implies accomplishment of something that is in itself a feat or triumph (a complete moral unity such as England achieved—Bellow) Attain connotes more strongly than any of the others the spur of aspiration or ambition (his constant efforts to attain his ends) It is therefore especially referable to ends beyond the vision, the scope, or the powers of most men (this indispensable condition of the safety and civilization of the world is, indeed, very difficult to attain—Hobson) (a fine balance of all the forces of the human spirit such as but once or twice has been attained in the world’s history—Binyon)

ize, externalize, objectify, hypostatize, reify are the chief words in English meaning to give concrete or objective existence to something that has existed as an abstraction or a conception or a possibility. They are seldom freely interchangeable, because their implications vary widely and their applications are largely determined by idiom. Realize commonly implies emergence into the sphere of actual things (as of something that has been a dream, an ideal, a hope, or a plan) the project was never realized owing to a lack of funds (he did not realize his ambition until he was past middle life) The implication of attainment, of achievement, or of fulfillment is at times so strong in realize as to obscure or subordinate this fundamental idea of coming into existence to achieve a beautiful relation to another human being is to realize a part of perfection Binyon however evolution is the effect, a divine purpose is being realized in it Inge Actualize, though sometimes used interchangeably with realize, is found chiefly in philosophical or technical writings with the implication of emergence (as of something that has existed only in potentiality) either into fullness or perfection of existence powers of the mind never actualized or into act or action potential energy becomes kinetic energy when it is actualized by motion Embody and incarnate sometimes imply investment with an outward or visible form of something abstract (as a principle, an idea, a trait, or a quality) the poet cannot embody his conceptions so vividly and completely as the painter Binyon Dickens incarnated hypocrisy in his Uriah Heep Materialize stresses emergence into the sphere of what is perceptible or tangible and usually presupposes prior vagueness, haziness, or elusiveness I had the glimmering of an idea, and endeavored to materialize it in words Hawthorne Externalize and objectify emphasize the projection of what is subjective (as a thought, an emotion, or a desire) so that it takes form apart from the mind. Externalize often suggests a conscious or unconscious urge for expression or relief madness has produced valuable art... the artist attempts to rid himself of his abnormality by externalizing it into the work of art Day Lewis Objectify is more likely to suggest a conscious attempt to overcome the limitations of subjectivity and sometimes to contemplate one's own mental processes art has always attempted to express, to objectify the dynamic processes of our inner life Robert Humphrey Hypostatize and reify occur chiefly in philosophical and technical writing. They imply conversion by the mind of something that is a concept or abstraction into a thing that has real and objective even if not tangible existence our ingrained habit of hypostatizing impressions, of seeing things and not the reverse Langer it is people, real flesh and blood human beings not a reified entity called "culture" who do things L A White Ana effect, fulfill, execute, accomplish, achieve, perform 2 think, conceive, imagine, fancy, envisage, envision Ana understand, comprehend, appreciate reap, glean, gather, garner, harvest are comparable when they mean to do the work or a given part of the work of collecting ripened grains in cultivation, reaping as a method of gathering, it may suggest a return or resumption reaping early wheat for market the lucky artisan producing something they could use would reap a fortune Billington Glean basically applies to the stripping of a field or vine that has already been gone over once but may be extended to any picking up of valuable bits from here and there and especially to a gathering of what has been left or missed gleaned the fields after the reapers have gone assembled a multitude of facts gleaned from many and varied sources Amer Guide Series Wash she had gleaned all the information the library contained Robertson Davies data gleaned from the questionnaires Terry Gather, the most general of these terms, applies to the collecting or bringing together of the produce of the farm, plantation, or garden; in extension, it can apply to any similar amassing or accumulating the fruit is gathered in late July and August Amer Guide Series Tenn workers who gathered rubber P E James she had traveled by safari to gather her material Current Biog the multitude of pitfalls in the gathering, writing, and processing of the news Motty mail is gathered and distributed by electrically operated conveyors Amer Guide Series Minn Garner implies the storing of produce as grain; in extension, it can apply to a laying away of a store more harvest than one man can garner Buck a skilled picker may garner 100 quarts Amer Guide Series Ark wisdom garnered through the years Hambly these short pieces garnered from a magazine catering to the masculine taste Lisle Bell Harvest, the general term, may imply any or all of these processes be extended in meaning to apply to any gathering together or husbanding of current phenomena Garside the harvesting of shellfish Amer Guide Series Conn busy harvesting your crop of furs Natl Fur News he had sown pain and harvested regret Samuel Ana collect, assemble (see gather) reason vb 1 build, construct, erect, frame, raise 2 raise lift, elevate, hoist, heave, boost Ana rise, ascend, mount, soar nurse, nurture, foster breed, propagate (see generate) rear adj posterior, after, back, hind, hinder Ant front reason n 1 Reason, ground, argument, proof are comparable when they mean a point or series of points offered or capable of being offered in support of something questioned or disputed. Reason usually implies the need of justification, either to oneself or another, of some practice, action, opinion, or belief; it is usually personal in its reference; thus, a father asks the reason for his son's disobedience a person gives the reasons for his preference. Reason is often applied to a motive, consideration, or inducement which one offers in explanation or defense so convenient it is to be a "reasonable creature," since it enables one to find or make a reason for everything one has in mind to do Franklin Ground is often used in place of reason because it too implies the intent to justify or defend. When, however, the emphasis is on evidence, data, facts, or logical reasoning rather than on motives or considerations, ground is the acceptable word; thus, the reasons for a belief may explain why it is held, but the grounds for it give evidence of the validity of that belief a scientist presents the grounds for his conclusion. Ground also suggests more solid support in fact and therefore greater cogency and objectivity than reason; thus, one may speak of frivolous or of trumped-up reasons but not grounds the future as we see it offers no grounds for easy optimism Current Biog grounds for divorce Argument stresses the intent to convince another or to bring him into agreement with one's view or position. It can imply the use of evidence and reasoning in the making and stating of a point in support of one's contention the debaters came well provided with arguments a party organ providing usable facts and arguments, in terse paragraphs Boatfield but often it suggests reasoning without reference to fact one of the commonest of all evasions
reason 665  rebellion

the argument which is not an argument but an appeal to the emotions—Woolf. Proof in much of its use (see proof under prove) emphasizes not an intent but an effect: that of conclusive demonstration; therefore, a proof is a piece of evidence (as a fact or a document) or of testimony (as of a witness or expert) or an argument that evokes a feeling of certainty in those who are to be convinced. These arguments [for the existence of God] are sometimes called proofs, though they are not demonstrations; they are, however, closely inwoven with the texture of rational experience—Inge. Euclid, the author of the Elements, who gave irrefutable proofs of the looser demonstrations of his predecessors—Farrington. 

ana explanation, justification, rationalization (see corresponding verbs at explain) 2 *cause, determinant, antecedent, occasion ana *motive, incentive, inducement, impulse: basis, foundation, ground (see base n) 3 reason, understanding, intuition can all denote that power of the intellect by which man arrives at truth or knowledge. Reason centers attention on the faculty for order, sense, and rationality in thought, inference, and conclusion about perceptions (the maintenance of reason—the establishment of criteria, by which ideas are tested empirically and in logic—Dorothy Thompson). Reason is logic; its principle is consistency; it requires that conclusions shall contain nothing not already given in their premises—Kallen. Understanding may sometimes widen the scope of reason to include both most thought processes leading to comprehension and also the resultant state of knowledge (understanding is the entire power of perceiving and conceiving, exclusive of the sensibility; the power of dealing with the impressions of sense, and composing them into wholes—Coleridge). Philosophy is said to begin in wonder and end in understanding—Dewey.

Intuition (see under intuitive at instinctive) stresses quick knowledge or comprehension without orderly reason, thought, or cogitation (all this . . . I saw, not discursively, or by effort, or by succession, but by one flash of horrid simultaneous intuition—De Quincey) (do we not really trust these faint lights of intuition, because they are lights, more than reason, which is often too slow a conception of a rebellion, either because it is quickly put down or is of a small and ineffective movement that flares up suddenly and violently among an insurgent class or section . . . I shatter creeds and demolish idols—Shaw) (the blundering crudity of the tough-minded iconoclast—Garrison). Ana *opponent, antagonist, adversary: assailant, attacker (see corresponding verbs at attack) rebellion, revolution, uprising, revolt, insurrection, mutiny, putsch, coup can all denote a war or an armed outbreak against a government or against powers in authority. Rebellion implies open, organized, and formidable armed resistance to constituted authority or to the government in power; the term is usually applied after the event to an instance of such resistance as has failed to overthrow the powers that be (Jack Straw's Rebellion) (the Jacobite rebellions of 1715 and 1745). Revolution applies to a rebellion that has been successful to the extent that the old government is overthrown and a new one substituted (the French Revolution) (the American Revolution). The term, however, does not invariably imply a war or a warlike outbreak (effected a bloodless revolution by a coup d'état). The words are often applied to the same event according to the point of view of the user or sometimes according to the time in which it is used; thus, the American Civil War of 1861-1865 was called the "War of the Rebellion" by Northerners, not only during its progress but for a long time after; a revolution is often called a rebellion by the overthrown government or its supporters until bitterness has faded (the English Civil War (1642-1652) was, after the Restoration (1660), and still sometimes is, called the Great Rebellion). Uprising is a somewhat general term applicable to an act of violence that indicates a popular desire to defy or overthrow the government; it is often used in reference to a small and ineffective movement that flares up suddenly and violently among an insurgent class or section of the people but it is applicable also to the first signs of a general or widespread rebellion (there was fear of uprisings in different parts of the country) (whenever the whole nation should join together in one sudden and vigorous uprising—Freeman). Revolt and insurrection apply to an armed uprising which does not attain the extent of a rebellion, either because it is quickly put down or is
immediately effective. Revolt, however, carries a stronger suggestion of a refusal to accept conditions or continue in allegiance than does insurrection, which often suggests such a seditious act as an attempt to seize the governing power or to gain control for one's party (the Reformation... was no sudden revolt, but the culmination of a long agitation for national independence in religious matters—Inge) (Balzatar's tyranny grew little by little, and the Acoma people were sometimes at the point of revolt—Cather) (insurrections of base people are more furious in their beginnings—Bacon) (excess of obedience is... as bad as insurrection—Meredith) Mutiny applies chiefly to an insurrection against military or especially maritime or naval authority (the ship's master feared mutiny long before it occurred) (the mutiny of a regiment made the situation desperate for the invaders) Putsch may apply to a small popular uprising or demonstration, or a planned attempt to seize power (the Munich beer hall Putsch of Hitler's supporters in 1923) Coup, in full coup d'etat, applies to a sudden overthrowing of a government by other than normal constitutional means; typically it implies careful planning on the part of a comparatively small opposition that usually has such backing from the military forces as insures the success of its effort, often without the need for bloodshed (General Naguib's coup, peaceful only because of the lack of resistance on the part of the falttering king... well illustrates the old definition of a dictator—one who has a bankrupt country—Ayteo) (it's not in our usual tradition of coups d'etat at all. Normally, nobody is killed in a coup d'etat. A certain amount of firing, yes, but over the heads of the crowds, just to show people they are serious—Rama Rau) (Czechoslovakia was absorbed by a coup under the direct threat of nearby Russian military force—Isaacs) Ana *sedition, treason: resistance, opposition, combating, withstanding (see corresponding verbs at RESIST) rebellious *insubordinate, mutinous, seditious, factious, contumacious Ana recalitrant, refractory, intractable, *unruly, ungovernable: estranged, alienated, disaffected (see Extrange) Ant acquiescent, resigned: submissive rebound, reverberate, recoil, resile, repercuss are comparable when they mean to spring back to an original position or shape. Rebound basically implies a springing back after a collision or impact (the ball readily rebounds when thrown against a wall) In extended use the term implies a springing back from one extreme to another or from an abnormal condition to one that is normal (literature is rebounding again from the scientific-classical pole to the poetic-romantic one—Edmund Wilson) Reverberate is used chiefly of rays or waves, most typically of sound waves, which are forced back in the manner of an echo or series of echoes or are repelled or reflected from side to side or from one surface to another (the evening gun thundered from the fortress, and was reverberated from the heights—Hawthorne) but it may be extended to other matters giving a similar effect (presents even simple subjects with a percepitiveness that makes them reverberate in the mind—Babette Deutsch) Recoil (see also recoil 1) often implies a springing back after being stretched, strained, or depressed (a spring recoiling after pressure has been removed) or a sudden or violent backward movement (a gun recoils when it is fired) Sometimes it carries the suggestion of a return to the source or point of origin in the manner of a boomerang (that evidence missed the mark at which it was aimed, and recoiled on him from whom it proceeded—Macaulay) But recoil often implies a springing back in the sense of being forced back by or as if by a blow; it then may connote a retreat, a recoiling, or a reeling (ten paces huge he back recoiled—Milton) (as deep recoiling surges foam below—Burns) (commentators recoiled from the spectacle as if it were too loathsome for remark—S. L. A. Marshall) Resile, much less common than its corresponding adjective resilient, like recoil may imply a springing back (as of an elastic body) into the original state or position, but in practice it is largely restricted to an essentially legal use in which it implies a withdrawing from something to which one has previously committed oneself (the suggestion which he had brought... meant that India was seeking to resile from its solemn international commitments—Pakistan Affairs) Perccuss, also much less common than its corresponding noun repercussion and adjective repercussive, is a close synonym of reverberate and rebound, for it implies the return of something moving ahead with great force or, in extended use, set in motion or operation, back to or toward the starting point. However it distinctively suggests repulsion upon impact and a return with undiminished force, or sometimes even greater force, and often, when persons are involved, with a marked effect upon the ones who initiated the action (the waves dashed against the rocks and repercussed with a great roar) (sickness produces an abnormally sensitive emotional state... and in many cases the emotional state repercusses... on the organic disease—Peabody) Ana bound, *skip, ricochet rebuild *mend, repair, patch Ana *renew, restore, renovate, refresh rebuke *reprove, reprimand, admonish, reproach, chide Ana rate, upbraid, *scold, berate: *criticize, reprehend, reprobrate rebut *disprove, refute, confute, controvert recalcitrant refractory, intractable, headstrong, willful, *unruly, ungovernable Ana rebellious, *insubordinate, factious, contumacious: *obstinate, stubborn: resisting, opposing, withstanding (see RESIST) Ant amenable (sense 2) recall vb 1 recollect, *remember, remind, reminisce, be-think, mind Ana evoke, elicit, extract, *educe: *stir, rouse, arouse, awaken, awaken 2 *revoke, reverse, repeal, rescind Ana *annul, abrogate, void: retract, *abjure, recant recant retract, *abjure, renounce, forswear Ana withdraw, remove recede, retract, retrograde, retract, back can all mean to move or seem to move in a direction that is exactly the opposite of ahead or forward. Recede stresses marked and usually gradually increasing distance from a given point, line, or position, but it implies movement on the part of what recedes only when a fixed point of view is indicated or understood (the tide is receding) (until the flood waters recede) (while I stood gazing, both the children gradually grew fainter to my view, receding, and still receding—Lamb) When the point of view is that of a traveler or the distance is in time rather than in space, the receding thing is subjective and the point of view changes. In such a case either a gradual disappearance (as from view or consciousness) or a change in perspective is implied (he stood at the ship's stern watching the shore recede from view) (past events as they recede appear in truer proportions—L. P. Smith) (the possibility of certain ultimate solutions has rather receded than approached as the years went by—Krutch) When used of persons and their ideas or attitudes, recede suggests departure from a
fixed idea, or determined attitude, or a definite stand (he was far too self-willed to recede from a position, especially as it would involve humiliation—Hardy) Retreat implies withdrawal from a point or position reached, usually because of uncertainty, or of imminent defeat or danger, or in obedience to orders (after the failure of the first attack, the army retreated) (she had retreated inside himself, as into a dense thicket—Hervey) (they frequently approached this theme, and always retreated from it—Meredith) Retrograde implies movement contrary to what is expected, normal, or natural; thus, a planet retrogrades when it moves or seems to move from east to west, or in a direction opposite to that of the usual planetary course. The verb is also used to imply the reverse of progress in the course of development (as of an institution, a species, or an individual) (some races have been stationary, or even have retrograded—Lubbock) (in his Latin and Greek he was retrograding—Meredith) (we have no control over the process by which the arts or sciences advance or retrograde—Whitehead) Occasionally it is used to imply a going backward in time or an inversion of the chronological order (our narrative retrogrades to a period shortly previous to the incidents last mentioned—Scott) Retract suggests a drawing backward or inward from a forward or exposed position, often in reference to those parts of an organism which can be thrust forward or drawn backward (a cat retracting its claws) (throwing out and retracting their left fists like pawing horses—Shaw) Back applies to any retrograde motion and is often qualified by an adverb (as up, out, or down) (back an automobile) (the water in a drain backs up when a pipe cannot carry it off) (back out of a room) (a wind backs when it shifts to a counterclockwise direction) Often when followed by out or down it implies a receding from a stand or attitude, or a retreating from a promise or an undertaking (he will never back down once his word is given) (he is trying to back out now that he sees how much work the project entails) (the opposition forced the governor to back down and to recall his recommendations—Ana) withdraw, retire, depart (see go)—*rebound, recoil
Ant proceed: advance (sense 2)

receipt 667 reception

2 Receipt, recipe, prescription are comparable when they mean a formula or set of directions for the compounding of ingredients especially in cookery and medicine. Receipt is often employed as a designation of a formula for making a homemade medicine (she has an excellent receipt for a cough syrup) Though also often used in reference to cookery formulas, the term in this sense is commonly felt as old-fashioned or dialectal and is being gradually displaced by recipe. Recipe is perhaps the most general of these terms since it can apply not only to a formula or set of instructions for making or doing something but to a method or procedure for attaining some end (recipes are used in making steel, and each ingredient is measured to a fraction of one percent—Hot-Metal Magic) (reading good books . . . is the recipe for those who would learn to read—Adler) In application to medicinal formulas recipe may come close to receipt or it may suggest an old-fashioned empirical remedy as distinct from a modern pharmaceutical product (some of his recipes are printed in pharmacopoeias of today—Norman Douglas) In cookery recipe is the usual and standard English term for a set of directions for preparing a made dish (a family recipe for plum pudding) The usual term for a physician's direction to a pharmacist for the compounding or dispensing of a medicine is prescription. That term is also applied to a medicine which is compounded or dispensed according to such a direction (his doctor gave him three prescriptions (he is still taking the prescription for bronchitis)

receive, accept, admit, take can all mean to permit to come into one's possession, presence, group, mind, or substance. They are seldom interchangeable except within a narrow range and, even then, rarely without modification of the thought expressed. Receive very often implies nothing more than what has been stated in the common definition; it may be predicated of persons or of things (he did not receive the news gladly) (the barrel receives excess rain water) In general receive implies passiveness in the receiver even when the subject is a person and his response is indicated in the context (an infant merely receives impressions, for he does not understand them) (soft wax receives the impression of anything that touches it) Only when it implies welcoming or recognition does receive connote activity in the receiver (after some delay, the king received the ambassador) (the social leaders refused to receive the newcomers) (the indifference and hostility with which his earlier work was received—Day Lewis) Accept adds to receive an implication of some measure of mental consent, even of approval; thus, a person may be received but not necessarily accepted in society; an idea may be received but not accepted by the person who receives it. One may receive with apparently merely accepting an apology. Frequently accept suggests tacit acquiescence rather than active assent or approval. Sometimes it connotes an uncritical attitude (the man who . . . accepted simply, as a matter of course, the tradition—Dickinson) Sometimes it implies a surrender to the inevitable (it is the business of the sensitive artist in life to accept his own nature as it is, not to try to force it into another shape—Huxley) Admit is synonymous with receive only when the agent (the one that lets in) is the one that receives rather than introduces (the king admitted the ambassador to his presence) (the heart admits fluid through these apertures) Admit, in this restricted sense, is distinguishable from receive by slight syntactical differences but chiefly by its strong implications of permission, allowance, or surrender; thus, a judge admits evidence only after its admissibility has been questioned and he has allowed its entrance. The situation remains the same when the subject is impersonal (the archway was wide enough to admit ten men abreast) Admit, in contrast with accept, often adds the implication of concession; thus, one who admits the truth of a contention accepts it more or less unwillingly; one can accept a proposition without question, but one admits it only after he has questioned it. Take is a synonym of receive only when it suggests no reaching out on one's own part or of one's own initiative to get hold of something (see also TAKE 1) or when it suggests an offering, presenting, conferring, or inflicting by another; it then implies merely a letting something be put into one's hands, mind, possession, or control (this gift was meant for you: take it or leave it as you please) (he takes whatever fortune sends him) (the British showed that they can take the German bombing) (what was it that made men follow Oliver Cromwell and take at his hands that which they would not receive from any of his contemporaries?—Crothers) (you don't have to take anything from him, or to stand his bad manners—Cather) Ana *enter, penetrate: seize, *take, grasp
Recent *modern, late
Ana fresh, *new, new-fashioned
Reception, receipt both mean a receiving, but they are not often interchangeable, their use being dependent upon accepted idiom. Reception is the more appropriate term when what is received is a person, especially a caller, a visitor, or a guest; the term may then apply to the act,
fashion, or manner of receiving (she gave all her friends a warm reception) or the manner of being received (much pleased with the reception she had—Pepys) or a ceremonious receiving or entertaining (invite one's circle of friends to a reception) (hold a reception for the out-of-town delegates and their wives) or an admission or entrance (as into a place, a society, or a company) (the house is ready for the reception of its new tenants) (call attention to the reception of several new members into the society.) When what is received is a thing, reception is employed when to the idea of receiving is added the idea of admitting into or as if into a space or enclosure (the tower is large enough for the reception of several bells) or of apprehension (as by a sense, the senses, or the mind) (their minds are not ready for the reception of such ideas) (the proposal met a favorable reception) (television reception was poor during the storm) Receipt (see also receipt 2) stresses the simple fact of receiving and is the customary term when what is received is a thing (as money, goods, or a letter) given or sent by another and delivered into one's custody or possession (acknowledge the receipt of goods ordered) (I am awaiting the receipt of your letter) (making my decision) Receipt is also applied to a signed paper or document testifying to the receiving of money due or of goods delivered.

recess n. *pause, respite, lull, intermission

Ana withdrawal, retirement (see corresponding verbs at go): *break, interruption, interval, gap: relaxation, leisure, *rest

recherché elegant, *choice, exquisite, delicate, dainty, rare

Ana fresh, original, *new, novel: *select, exclusive, picked

Ant banal

recipe *receipt, prescription

reciprocal 1 Reciprocal, mutual, common mean shared, participated, partaken (see SHARE): interchanged, exchanged (see EXCHANGE): balancing, compensating, counterpoising (see COMPENSATE)

2 Reciprocal, corresponding, correlative, complementary, complemental, convertible are not close synonyms, although in some instances they are interchangeable, and all are comparable in meaning like, equivalent, or similarly related to each other (as in kind, quality, or value). Reciprocal (see also reciprocal 1) implies that the likeness or equivalence of two things or of one thing to another rests on the fact of their being returns or its being a return in kind, value, or quality for what one side has given to the other (reciprocal courtesies) (a treaty providing for reciprocal trade privileges) (each flexor muscle which contracts has its reciprocal extensor muscle which operates in the reverse direction—Wier) (public and private systems engage in reciprocal services—Lepawsky) Corresponding implies a likeness or equivalence proceeding from the fact that one answers to the other or conforms to it so that they are fitted to each other, or proportionate to or commensurate with each other, or in perfect accord with each other (corresponding sides of similar triangles are in proportion—G. F. Wilder) (the light, with its corresponding shadow—Kitson) (all rights carry with them corresponding responsibilities—Paepe) Correlative implies a close relationship rather than a likeness and is applicable chiefly to two things, or one of two things, which cannot exist independently of each other either because one logically implies the other (husband and wife, father and child, are correlative terms) or one cannot exist without the other (the "right" of the worker to demand work on reasonable terms, and the correlative obligation of the organized community to provide it—Hobson) In more casual use correlative may imply nothing more than so close a correspondence or relation between two or sometimes more things that they come naturally, necessarily, or logically together (two correlative rules: first, that no one shall be allowed to undertake important work without having acquired the necessary skill; secondly, that this skill shall be taught to the ablest of those who desire it—Russell) (disorder in any one of nature's correlative hierarchies—physical, political, psychological—automatically produces disorder in the others—Bingham) Complementary also implies a close relationship rather than a likeness; the term carries a strong suggestion that one thing is so necessary to another or to others that without it an entire or perfect whole is not possible (it is important to recognize that these two uses of the surplus are complementary and not competitive—Hobson) (the corpuscular and undulatory concepts of light must be regarded as complementary rather than antithetical—Jeans) Complemental has essentially the same meaning, differing only in applying usually to a quantitative completing (revelation is regarded by many theologians as complemental to reason) Convertible implies so strong a likeness that the things, though not identical, are virtually interchangeable (the law, and the opinion of the judge, are not always con-

Ana •correct, amend
Ant abandon —Con desert, forsake (see ABANDON)
recluse, hermit, eremite, anchorite, cénobite all designate a person who lives apart from the world usually in order to devote himself to prayer, contemplation, and penance. Recluse and hermit are also applied to persons who avoid intercourse with men for other than religious motives, but even in such extended use they retain their original
distinguishing implications, for recluse stresses retirement from the world and the life of the world into seclusion but not necessarily into physical isolation and hermit, a solitary life lived apart from men and usually in a place or under conditions where there is little likelihood of intrusion. Recluse is the broader term; it may be applied to a hermit or to a religious who lives in a cloistered community. Hermit is often applied to a member of one of the very few religious orders (as the Carthusians) whose members dwell alone and meet other members of the community only in church and in the refectory on Sundays. Eremite, archaic as a variant of hermit, is sometimes chosen to unequivocally designate a solitary who is under a religious vow. Anchorite and cénobite are contrasted terms for the two leading types of recluses in the Eastern and in the Western Church. Anchorite designates the type known as hermit or eremite; cénobite, the type that dwells in a community, especially a strictly cloistered community of monks or nuns.

recognized, identification, assimilation, apperception are comparable when they designate a form of cognition which relates a perception of something new to knowledge already acquired. Recognition implies that the thing now perceived (as by seeing, hearing, or smelling) has been previously perceived, if not in itself then in another instance of the same kind, and that the mind is aware that the two things are identical or of the same kind. Identification implies not only recognition, but such previous knowledge as permits one to recognize the thing as an individual member of a class of things. Assimilation implies that the mind responds to new facts, new ideas, or new experiences by interpreting them in the light of what is already known, thereby making them also an integral part of one's body of knowledge. Apperception differs from assimilation in implying that the mind responds to new facts, ideas, or situations when and only when it can relate them to what is already known.

her self-imposed task—Hardy> (the process of purgation is always perilous, though it is ... still more perilous to flinch from making the attempt—Toynbee) Flinch is sometimes used but wince more often when by some in- voluntary, often slight, physical movement (as starting or recoiling) one manifests pain, fear, disgust, or acute sensitiveness <cannot bear the slightest touch without flinching—Smollett> his horse stands wincing at the flies, giving sharp shivers of his skin—Hunt> <Old Lady Kew's tongue was a dreadful thong which made numbers of people wince—Thackeray> Mr. Warburton winced when he heard so young a man call him by nickname—Purdy> Blench may be indistinguishable from flinch; it often, however, carries a stronger suggestion of faint-heartedness or of signs of fear <this painful, heroic task he undertook, and never blenched from its fulfillment—Jeffrey> though his death seemed near he did not blench—Masefield> To quail is to shrink cowardingly, as from something which strikes terror <the most formidable woman I have ever known ... eminent men invariably quailed before her—Russell> I am never known to quail at the fury of a gale—Gilbert> Ana waver, falter, *hesitate: shy, balk, stick, stickle (see DEMUR) Ant confront: defy 2 *rebound, reverberate, resile, repercuss Ana retreat, *recede, back, retract: *return, revert recollect *remember, recall, remind, reminisce, bethink, mind Ana *stir, rouse, arouse, rally, waken, awaken recollection *memory, remembrance, reminiscence, mind, souvenir recommend *commend, compliment, applaud Ana *approve, endorse, sanction: *praise, extol, acclaim recommendation testimonial, *credential, character, reference Ana approval, endorsement (see corresponding verbs at APPROVE): commendation (see corresponding verb at COMMEND) recom pense vb reimburse, indemnify, repay, satisfy, remunerate, compensate, *pay Ana award, accord, vouchsafe, *grant: balance, offset, *compensate reconcile conform, accommodate, adjust, *adapt Ana harmonize, accord, square. *agree: *correct, rectify, amend, revise reconcile, abstruse, occult, esoteric can all mean being beyond the power of the average intelligence to grasp or understand. Recondite stresses difficulty resulting from the profundity of the subject matter or its remoteness from ordinary human interest. It often, especially as applied to persons, implies scholarly research carried beyond the bounds of apparent usefulness <the recondite and occult in human nature alike attract the insurgent temper—Lowes> profound and scholarly, but often recondite to the point of obscurity—Woodring> Abstruse suggests extreme complexity or abstractness in the material as well as its remoteness from the ordinary range of human experience or interest <the vast army of illiterate or semi- literate people who distrust the learned world, especially the abstruse world of science—Meyer> the last quartets and piano sonatas of Beethoven, which are some of the most abstruse music ever written—Whitehead> Occult basically implies secret, mysterious knowledge purporting to be attainable only through special and often supernatural or magical agencies and not through ordinary channels of human reason <the occult sciences> whether it be from natural predisposition or from some occult influence of the time—J. R. Lowell> But often the word is used with much weakened force to mean little more than mysterious <the sense of occult rivalry in suitorship was so much superadded to the palpable rivalry of their business lives—Hardy> <juries selected by some occult procedure satisfactory to the judges—Amer. Guide Series: Nev.> Esoteric basically implies knowledge guarded by, and imparted only to, members of a cult or inner circle of initiates <the esoteric sects, which guard a mystery known only to the initiated—Sperry> but it is extended in general use to describe knowledge in the possession only of adepts, students, and specialists (as far as the general public was concerned the museum was an esoteric, occult place in which a mystic language was spoken—Saarinen) Ana scholarly, erudite, *learned: *pedantic, scholastic, academic record vb Record, register, list, enroll, catalog can mean to commit to writing for the sake of immediate or future use. Record usually implies as its purpose the making of an exact or official entry or statement which gives evidence of the facts involved; the act serves as an aid or a check to memory or as a means of supplying details unlikely to be remembered indefinitely <record the proceedings of a meeting> <record the events of each day in a diary> <record a deed in the county clerk's office> <in all recorded history, nothing like this has happened before> Register usually implies accurate entry into a formal record of facts or particulars of a certain kind which require or deserve recording <required by law to register all births> <all purchases are registered in our books> Sometimes register carries a further or a slightly different implication; thus, one registers a letter by payment of a special fee and obtaining a receipt to ensure its safe delivery by requiring a record of each person who handles it; a thermometer registers the temperature when the mercury expands or contracts to a certain mark in degrees. List implies an entering in a list (as of names, figures, needs, or events) <list the achievements of an athlete> <list alphabetically the books you have read> <list the survivors of an accident> <list the food needed for the party> <list your expenses carefully> Enroll may add to list the notion of setting apart those entered in a distinctive category (as members of a body or adherents of a person or cause) and therefore may connote a winning over, an enlisting, or an admission to membership <interested persons are invited to enroll themselves as members of the society> those who are ... tempted to enroll themselves as soldiers—Malthus> as he goes on, he ... enrolls a following—Montague> Enroll is sometimes also used of things in the sense of record, but in its more usual extended sense, it also includes the connotation of honoring <enroll your triumphs o'er the seas and land—Pope> Catalog commonly implies an enumeration of all items making up a class or group, usually with descriptive or defining details <catalog the books in a library> <the porcelains in the collection needed to be cataloged> <allowing time to catalog the items to be sold at auction> Catalog may also imply assignment of an item to its proper place in a list or sometimes in a category <the book has not yet been cataloged> a specimen impossible to catalog in the existent classification often turns out to be a new species> Ana *enter, admit, introduce recount recite, *relate, rehearse, narrate, describe, state, report Ana enumerate, *count, number, tell: detail, itemize, particularize (see corresponding adjectives at CIRCUM-STANTIAL)
recoup vb recruit, retrieve, regain, *reccover

Ana *compensate, balance, offset, counterpoise

recover 1 Recover, regain, retrieve, recoup, recruit can mean to get back something that has been let go or lost. Recover, the most comprehensive of these terms, may imply finding or obtaining something material or immaterial that has been lost (recover a lost watch) (recover his health) (recover peace of mind) (recover his balance) or a getting of something in reparation or compensation (recover damages in a lawsuit) Regain, though often used interchangeably with recover, carries a stronger implication of winning back or getting once more into one's possession something of which one has been deprived (regain a fortune) (regain a person's good will) (regained his sight) (regained freedom) Regain also may imply, as recover seldom implies, success in reaching again a place or point at which one has been before (in his efforts to regain his hotel—Meredith) (the trench allowed the performers, after being thrust down into perdition, to regain the greenroom unobserved—Quiller-Couch) Retrieve implies a recovering or regaining after assiduous effort or search (desperate efforts to retrieve lost territory) (it now seemed impossible to retrieve the foreign trade lost by war) (his desire to retrieve his military reputation—Bello) (marveling at the silent uniting activity with which her popularity had been retrieved—Wharton) But retrieve sometimes takes for its object such words as loss, error, failure, or disaster, then implying not recovery but a setting right or a making what is bad good, or a reparation by making up for what was wrong or unsuccessful (life is not long enough to retrieve so many mistakes) (one false step is never retrieved—Gray) (he is to retrieve his father's failure, to recover the lost gentility of a family that had once been proud—Brooks) Recoup, basically a legal term implying a rightful deduction by a defendant of part of a claim awarded to a successful plaintiff in a lawsuit, can in its general and extended use imply recovery or retrieval, usually in equivalent rather than identical form, of something lost (able to recoup his gambling losses by more careful play) (Elizabeth had lost her venture; but if she was bold, she might recoup herself at Philip's cost—Froude) Recruit fundamentally implies growth through fresh additions; in military use it can imply an increase in numbers through drafting and enlisting or a filling of vacancies in a force resulting from casualties (it was his custom to recruit his army with conquered people—Newton) In more general use it may imply a regaining of what has been lost (as vigor through illness, or money through extravagance or heavy expenditures) by fresh additions or replenishment of the supply (recruiting his strength with a good plain dinner—Dickens) (the middle class is continually recruited from the capitalist families—Shaw) Ana redeem, reclaim (see RESCUE): *compensate, offset, balance

2 improve, recuperate, convalesce, gain

Ana restore, refresh, rejuvenate, *renew: revive, resuscitate, revivify (see RESTORE)

Ant concise —Con terse, succinct, laconic, pithy, summary (see concise): compact, *close

reef vb *shoal, bank, bar

reel vb Reel, whirl, stagger, totter are comparable when they mean to move or seem to move uncertainly or uncontrollably (as in weakness, in giddiness, or in intoxication). Reel usually implies a turning round and round, or a sensation of so turning or being turned <for, while the dagger gleamed on high, reeled soul and sense, reeled brain and eye—Scott> <in these lengthened vigils his brain often reeled—Hawthorne> But it may also imply a being thrown off balance (as an army that recoils before a mighty attack, a ship that has lost its equilibrium, or a person affected by exhaustion, a wound, faintness, or intoxication) <giddy and restless, let them reel like stubble from the wind—Milton> <when Church and State were reeling to their foundations—Stanley> <he . . . placed his open palm gently against the breast of Lucian, who instantly reeled back as if the piston rod of a steam engine had touched him—Shaw> Whirl (see also turn) is often used like reel, especially when referred to the head or to the brain <the dim brain whirls dizzy with delight—Shelley> but it more frequently implies swiftness or impetuosity of movement often by someone or something being carried along blindly or furiously <in popular commotions, each man is whirled along with the herd—Lytton> Stagger stresses uncertainty or uncontrollability of movement, typically of a person walking while weak, giddy, intoxicated, or heavily burdened, but sometimes of whatever meets with difficulty or with adverse conditions; thus, a boat that labors, a mind that is perplexed, confused, or bewildered, and a faith, opinion, or purpose that meets heavy opposition can all be said to stagger <a porter half my size who . . . staggered through the shallow water under what must have been an almost overwhelming weight—Heiser> <at whose immensity even soaring fancy staggers—Shelley> Totter (see also shake) implies not only weakness or unsteadiness as a cause of uncertain movement but often also suggests an approaching complete collapse <from the day of Cressy feudalism tottered slowly but surely to its grave—J. R. Green> <[the waning moon] like a dying lady, lean and pale, who totters forth, wrap in a gauzy veil—Shelley>

Ana *turn, spin, revolve, rotate: sway, waver, *swing: wobble, teeter, quiver (see shake)

refer 1 assign, credit, accredit, *ascribe, attribute, impute, charge

Ana associate, relate, connect (see Join): *direct, aim, point, lay

2 *resort, apply, go, turn

Ana consult, *confer, commune, advise: address, *direct

3 Refer, allude, advert are comparable when they mean to mention something so as to call or direct attention to. Refer, when unqualified, usually suggests intentional introduction and distinct mention <a day or two later she referred to the matter in—Mary Austin> (we may here again refer, in support of this proposition, to the plain and unequivocal language of the laws—Taney) but often it is so qualified as to add the idea of judging to that of mentioning <inclined at times to give a subjective interpretation to mathematical-physical theories and to refer to them as fictions—Cohen> Allude, though often close to refer in the latter's more general sense, distinctively implies indirect reference (as by a hint, a suggestive phrase, a roundabout or covert method of expression, or a figure of speech); it may suggest mere casual interest, modesty, timidity, or reticence in the one who alludes <fruit . . . gives him that intestinal condition I alluded to—Stafford> <the traveling facilities alluded to . . . would date the story as between 1842 and 1844—O. S. Nock> Sometimes, however, it connotes bias or ill will <proposals, which were never called proposals, but always alluded to slightly as innovations—Mackenzie> Advert, which basically means to turn the mind or attention to something (see advert 1), is sometimes interchangeable with refer but in such use it may distinctively imply a slight or glancing reference interpolated in a text or utterance <regards as truly religious certain elevated ethical attitudes and cosmologies that Freud, when he adverted to them at all, regarded as too highbrow to be given the name of religion—Kiesman> <letters from Franklin to his wife's grandmother . . . in which he adverted to having had to do with her education—Justice Holmes>

Ana *introduce, insert, interpolate: *quote, cite

Ana imputing or imputation, ascribing or ascription (see corresponding verbs at ascribe): criticizing or criticism, reprehending or reprehension, blaming or blame (see corresponding verbs at criticize): *attack, assault, onslaught, onset: disparagement, derogation, depreciation (see corresponding verbs at decry)

reflective *thoughtful, contemplative, meditative, pensive, speculative

Ana thinking, reasoning, deliberating, cogitating (see think): analytical, *logical, subtle

reform vb *correct, rectify, amend, amend, remedy, re修复, revise

Ana *mend, repair, rebuild: better, *improve, help, ameliorate

reform n *reformation

reformation, reform can both denote a making better or a giving of a new and improved form or character and are sometimes interchangeable without loss <the reformation of a criminal> <the reformation of society> Reformation is the more usual term as a designation of a movement that has brought about many revolutionary amendments or improvements, especially in morals or religious practices <the Protestant Reformation> It is also appropriate when the idea of making over so as to eradicate defects is stressed <not directed to the reformation of what was ill—Bellow> <never came reformation in a flood, with such a heady currancy, scouring faults—Shak> (it is the moral basis of this reformation that I wish to lay—Hobson) Reform, on the other hand, is more usual as a designation of an attempt to remove abuses, correct corrupt practices, or to make changes for the better <hostile to all persons advocating reform—Boeotia, choose reform or civil war!—Shelley> <a wave of municipal reform had passed over it—Ellis> Reform also applies, as reformation does not, to a particular or specific amendment, whether achieved or proposed, as a measure of reform <initiate sweeping
refractory 673
regard

reforms in the government (a reform worthy of a good prince and of a good parliament—Mackaulay)

refractory recalcitrant, intractable, ungovernable, unruly, headstrong, willful

Ana *contrary, perverse, froward, wayward: *insubordinate, rebellious, contumacious

Ant malleable: amenable (sense 2)

refrain, abstain, forbear are comparable when they mean to keep or withhold oneself voluntarily from something to which one is moved by desire or impulse. Refrain is especially suitable when the checking of a momentary inclination is implied (refrain from laughter) At times, to refrain from an action implies merely its nonperformance (no tolerable parent could refrain from praising a child when it first walks—Russell) Abstain is more emphatic than refrain, because it usually stresses deliberate renunciation or self-denial on principle and often implies permanence of intent (early Christians... abstained from the responsibilities of office—Acton) I have... abstained from the use of many expressions, in themselves proper and beautiful, but which have been foolishly repeated by bad poets—Wordsworth

It is used especially in reference to those natural appetites and passions whose control or renunciation are a part of self-discipline (from this personal blow stemmed, I believe, an act of renunciation, his decision to abstain from meat—Shirer)

Forbear usually implies self-restraint rather than self-denial, be it from patience, charity, or clemency, or from discretion, or from stoicism (he was so poison-mean that the marsh mosquitoes forbore to bite him—S. H. Adams) Wherever he has not the power to do or forbear any act according to the determination or thought of the mind, he is not free—Thilly But often forbear is but vaguely distinguishable from refrain (I cannot forbear quoting what seems to me applicable here—Justice Holmes)

Ana check, *arrest, interrupt: *restrain, curb, inhibit

refresh *new, restore, rejuvenate, renovate, refurbish

Ant jade, addle

refuge asylum, sanctuary, *shelter, cover, retreat

Ana safety, security (see corresponding adjectives at SAFE): stronghold, citadel, *fort, fortress: *harbor, haven, port

refugient effugient, luminous, radiant, lustrous, bright, brilliant, beaming, lambent, lucent, incandescent

refurbish renovate, *newen, refresh, restore, rejuvenate

refuse vb *decline, reject, repudiate, spurn

Ana *deny, gainsay: balk, baffle, *frustrate, thwart, foil: deafen, *exclude, shut out

refuse n Refuse, waste, rubbish, trash, debris, garbage, offal can mean all matter that is regarded as worthless and fit only for throwing away. Refuse, ordinarily the most comprehensive term of the group, stresses the rejection of the matter, or its uselessness from the point of view of the owner (a manufacturer, processor, builder, or housekeeper) and usually implies its being cast aside or thrown away. The term includes anything covered by this description without regard to whether another will find use for it (a stream polluted by refuse from a manufacturing plant) (heaps of refuse left by the former tenant) (arrangements made by the city to collect refuse) (a road surfaced with the hardened refuse from a neighboring tannery) Waste may also be a comprehensive term approaching refuse in meaning, but it typically applies to material that is unused by its producer but can or could be useful in other ways or in other circumstances or to other people (wiped his hands on a wad of cotton waste) Rubbish is likely to mean an accumulation of useless material and worn-out, broken-down, used up, worthless things (throw it in the rubbish barrel) (her closets heaped with rubbish) Trash stresses material of no account (as something worn-out or exhausted of what was good in it or parts discarded in shaping, trimming, or clipping). In general use trash is often employed in place of rubbish as a name for waste materials requiring disposition, but both terms in this sense usually exclude refuse that is animal or vegetable matter. Debris usually applies to what remains from the breaking up, the disintegration, or the destruction of something (as a building, a wall, or a tree); the term usually suggests a loose accumulation of detritus or broken fragments (a pile of debris was the only sign that a house was once there) (the sandstone cliffs... are battered down and their debris carried out to sea—Geikie) (after the air raid nothing was left of the building but a pile of rubble and debris) Garbage chiefly applies to organic refuse (as from a kitchen, a store, or a market) including waste of animal or vegetable origin or animal or vegetable matter that is or is regarded as unfit for human food. Offal may refer to something (as chips of wood or pieces of leather) cut off in dressing or fitting for use, but the term is usually applied specifically to the parts of a butchered animal that are removed in dressing the carcass, that consist chiefly of viscera (as liver, kidneys, and heart) and of trimmings (as tail, hooves, blood, and head meat), and that include edible meats and raw materials for processing as well as refuse. But offal may also be applied to carrion and other worthless or distasteful refuse and tends then and in extended use to stress offensiveness or disagreeableness.

All these terms except waste also have extended use; refuse refers usually to something left after the available supply has been thoroughly picked over and therefore implies the worst, the meanest, or the least desirable of the lot (the refuse of society) Rubbish may be applied to something (as inferior merchandise or a ridiculous or nonsensical idea, argument, or discussion) that in its worthlessness suggests a heap of trash (much of the goods in bargain sales is mere rubbish) (most of the stuff talked about Nordics and Aryans is simply rubbish—Huxley) Trash retains its implication of relative worthlessness (who steals my purse steals trash—Shak.) (most of these paintings are trash, but there are two or three good things) Debris may be applied to something inanimate or intangible that remains as evidence of what the original thing once was (those eastern lands which were the debris of Alexander’s empire—Buchan) Garbage also may be applied to something that in comparison with other things of the same sort may be described as filthy or foul (she flew with voracious appetite to sate herself on the garbage of any circulating library—Porter) Offal ordinarily applies to persons considered as the lowest or meanest of refuse or as offscourings (wretches... whom everybody now believes to have been... the offal of gaols and brothels—Macaulay)

reinforce

regarding

regular adj 1 Regular, normal, typical, natural can all mean being of the sort or kind that is expected as usual, ordinary, or average. A person or, more often, a thing is regular, as opposed to irregular, that conforms to what is the prescribed rule or standard or the established pattern for its kind (a regular verb) (a regular meeting of a society) A person or a thing is normal, as opposed to abnormal or exceptional, that does not deviate in any marked way from what has been discovered or established as the norm (see norm under AVERAGE n) for one of its kind. In contrast with regular, normal carries a stronger implication of conformity within prescribed limits or under given conditions and therefore sometimes admits a wide range of difference among the things that may be described as normal for a class or kind (normal winter weather) (a perfectly normal child physically as well as mentally) (his pulse is normal for a person of his age) (her intensity . . . would leave no emotion on a normal plane—D. H. Lawrence) When applied to persons, normal often specifically connotes mental balance or sanity (his actions are not those of a normal person) but it may connotes merely an approach to the average in mentality, implying the exclusion of those below or above this average (the twins, since they had gone to Oxford, never admitted that they needed for a book that normal people cared for—Rose Macaulay) A person or thing is typical, as opposed to individual, that markedly exhibits the characters or characteristics identifying the type, class, species, or group to which he or it belongs, often to the exclusion or the obscuring of any that differentiate him or it individually (a typical example of Browning's style) (I would suggest that the most typical, as it is probably the oldest of the arts, is the Dance—Binyon) (peculiar to himself, not typical of Greek ideas—Dickinson) (a typical English country town with wide High Street, narrow Market Street, picturesque Market Square—Mackenzie) A person or thing is natural (see also NATURAL 2) that acts, behaves, or operates in accordance with the nature or essence of his or its kind or constitution; the term also applies to what is normal in or suitable to one because of such nature or constitution (the father is the natural protector of his children) (the natural love of a mother) (flesh is the natural food of a dog) (he died from natural causes)

relate vb 1 Relate, rehearse, recite, recount, narrate,
describe, state, report are comparable when they mean to
tell orally or in writing the details or circumstances
necessary to render understanding or knowledge of
real or imagined situation or combination of events. Re-
late implies the giving of a usually detailed or orderly
account of something one has witnessed or experienced
relating the story of his life) then Father Junipero and
his companion related fully their adventure —Cather
Rehearse usually suggests a repetition; it may imply
a summary of what is known (let us rehearse the few facts
known of the inconspicuous life of Thomas Traherne
—Quiller-Couch) or a second or third or oft-repeated
telling (designed to fool the easilyfooled . . . it rehearsed
all the lies with which we are now familiar —Shirer)
or a going over and over something in one's mind, or with
another person, or in privacy before relating or some-
times performing or presenting it to others or to an
audience (Mr. Hynes hesitated a little longer . . . He
seemed to be rehearsing the piece in his mind —Joyce)
 felt certain . . . that his smile was as he had rehearsed it,
polished and genially satanic —Hervey) Recite and the
more common recount imply greater particularity of detail
than the preceding terms; in fact, the implication of enu-
eration or of mention of each particular is so strong that
both verbs usually take a plural object; thus, one relates
an experience, but he recites or recounts his experiences
reciting the events of the day) (as with all mysteries, it
cannot be rationally explained, merely recounted —
Shirer) Narrate suggests the employment of devices
characteristic of the literary narrative such as plot, cre-
ation of suspense, and movement toward a climax (what
verse can sing, what prose narrate the butcher deeds of
bloody Fate —Burns) the discovery of Madeira is nar-
rated with all the exaggerations of romance —Southey
Describe usually implies emphasis upon details that give
the hearer or reader a clear picture or that give not only
a visual representation but one that appeals to the other
senses (bitter sea and glowing light, bright clear air, dry
as dry,—that describes the place —Jeffries) described
her . . . as "a dear little thing. Rather brainy, but quite
a nice little thing" —Gibbons) State stresses particularity,
clearness, and definiteness of detail, and suggests the aim
of presenting material (as facts, ideas, or feelings) in their
naked truth so that they will be distinctly understood or
fixed in others' minds (Dryden's words . . . are precise,
they state immensely, but their suggestiveness is often
nothing —T. S. Eliot) (one should know what one thinks
and what one means, and be able to state it in clear terms
—Rose Macaulay) Report implies a recounting and
narrating, often after investigation, for the information of
others (report the progress on defense projects to the
 cabinet) (he was assigned to report the murder trial for the local newspaper) (in his letters Thaddeus re-
ported approaching an island in an outrigger one evening
—Cheever)
Ana tell, *reveal, disclose, divulge: detail, itemize,
personalize (see corresponding adjectives at CIRCUM-
STANTIAL)
2 associate, link, connect, *join, conjoin, combine, unite
Ana attach, *fasten, fix: refer, assign, credit, impute,
*ascribe
Con disengage, *detach, abstract: divorce, sever, sun-
der, *separate
3 bear, pertain, appertain, belong, apply
related, cognate, kindred, allied, affiliated can all mean
connected by or as if by close family ties. Related, when
referred to persons, usually implies consanguinity, but
sometimes implies connection by marriage —the royal
families in Europe are nearly all related to each other
When applied to things, related suggests and often close
connection; particular nature of which is to be gathered
from the context —related species) related events
related activities) every part of an organism is related
to the other parts) (body and soul are contrasted, but re-
lated, concepts) Cognate differs from related chiefly
in being referable only to things that are genetically alike
or that can be shown to have a common ancestor or source
or to be derived from the same root or stock —cognate
races) cognate languages) cognate words in various
languages, such as pater, Vater, father) (physics and
chemistry are cognate sciences) Kindred, in its primary
sense, stresses blood relationship —kindred members of
a community) In its more common extended sense, it
implies such likenesses as common interests, tastes,
aims, or qualities that might be characteristic of a family.
When the reference is to persons, congeniality is usu-
ally connoted (he would never be popular . . . but he
might appeal to a little circle of kindred minds —Joyce)
When applied to things, a more obvious connection
or a closer likeness is implied than in related —kindred
qualities in two otherwise alien tongues [Hebrew and
English] —Lowes) Allied more often implies connection
by union than by origin, and especially by marriage or
by voluntary association. It often connotes a more re-
 mote family connection than related —the Raycie blood
was . . . still to be traced in various allied families: Kents,
Huzzards, Cosbys —Wharton) In its extended use it
usually stresses relation based on the possession of com-
mon characters, qualities, aims, or effects which lead
either to union or to inclusion in the same class or category
—allied physical types) —allied societies) —allied
diseases) Affiliated also stresses connection by union, but it may
imply a dependent relation such as that of a child to a parent.
Sometimes it implies the adoption of the weaker by the
stronger (a small college affiliated to a university)
Sometimes it connotes a loose union in which the affili-
ating units retain their independence, but derive support
or strength from the main, central, or parent body, or
cooperate in its work —Monte Cassino and affiliated
monasteries) the CIO and its affiliated unions
Ana associated, connected (see JOIN): *reciprocal,
corresponding, correlative, convertible, complementary:
akin, identical, alike, analogous (see LIKE) *relevant,
germane, pertinent
relative *dependent, contingent, conditional
Ant absolute

relent *yield, submit, capitulate, succumb, defer, bow, cave
Ana comply, acquiesce (see corresponding adjectives at Compliant): forbear, *refrain, abstain: *abate, subside, wane, ebb
relevent unrelenting, merciless, implacable, *grim
Ana inexorable, obdurate, adamant, *inflexible: strict, stringent, *rigid, rigorous: *fierce, ferocious, cruel, inhuman
Con *soft, lenient, mild, gentle: *tender, compassionate: yielding, submitting or submissive (see corresponding verbs at YIELD)
relevant, germane, material, pertinent, apposite, applicable, apropos are comparable when they mean having a relation to or a bearing upon the matter in hand or the present circumstances. Something relevant has a traceable connection, especially logical connection, with the thing under consideration and has significance in some degree for those who are engaged in such consideration (the judge decided that the evidence was relevant and therefore admissible) (great books are universally relevant and always contemporary; that is, they deal with the common faculties for absorbing it wholly—Scott) Something germane is so closely related (as in spirit, tone, or quality) to the subject, the matter, the occasion, or the issue that the fitness or appropriateness of their association is beyond question (enliven his lecture by introducing amusing anecdotes germane to his subject) (an interesting point but not germane to the issue) (the passionate cravings which are germane to the hermit life—H. O. Taylor) Something material is so closely related to the matter in hand that it cannot be dispensed with without having an evident and especially a harmful effect (the motion is supported by an affidavit showing that the evidence is material—B. F. Tucker) (certain passages material to his understanding the rest of this important narrative—Scott) Something pertinent is so decisively or significantly relevant that it touches the real point at issue or contributes materially to the understanding of what is under discussion or to the solution of what is in question (once a thing did become pertinent, he had an amazing faculty for absorbing it wholly—Terry Southern) (it is more pertinent to observe that it seems to me that logically and rationally a man cannot be said to be more than once in jeopardy in the same cause, however often he may be tried—Justice Holmes) Something apposite is relevant and germane to such a degree that it strikes one both by its pertinency and by its felicitousness (an apposite illustration) (apposite quotations. . . came easily to his pen to grace the lucid flow of his English—Perring) whatever she did, she made her circumstances appear singularly apposite and becoming—Sackville-West) Something applicable may be brought to bear upon or be used fittingly in reference to a particular case, instance, or problem (the word tool is applicable to a plow only when used in a general sense) (the principle is not applicable to the case in question) (although. . . I do not get much help from general propositions in a case of this sort, I cannot forbear quoting what seems to me applicable here—Justice Holmes) Something apropos is both appropriate and opportune (a person who is not aware of an undercurrent of feeling may make remarks that are far from apropos) (we . . . find a new pleasure in the hackneyed words. They are really not quite apropos—Julian Huxley) Sometimes it can suggest relevancy rather than appropriateness or opportuneness (he is not witty but Frenchily apropos—Flanner)
Ana *related, cognate, allied: fitting, appropriate, proper (see FIT): important, significant, weighty (see corresponding nouns at importance)
Ant extraneous — Con alien, foreign, *extrinsic
reliable, dependable, trustworthy, trusty, tried can be applied to persons, their utterances, views, methods, or instruments to mean having or manifesting qualities which merit confidence or trust. Reliable describes what one can count upon not to fail in doing what is expected (she is a very reliable servant) (one of the most reliable of our employees) (a reliable washing machine) or to give or tell the exact truth (a reliable work of reference) (reliable testimony) Dependable is very close to reliable: it may suggest steadiness or trustworthiness in time of need or in an emergency (ask a friend to recommend a dependable physician) (he is the most dependable of our friends) (a dependable source of information) Dependable is also used merely as a descriptive term implying a character that is predictable or that is the antithesis of what is fickle or capricious (Laura wasn't pretty, but . . . healthy-looking and dependable—Mary Austin) A person or occasionally a thing is trustworthy that merits or has earned one's complete confidence in his or its soundness, integrity, veracity, discretion, or reliability (a trustworthy confidant) (a trustworthy witness) (a trustworthy wife) (the most trustworthy comment on the text of the Gospels and the Epistles is to be found in the practice of the primitive Christians—Macauly) Trusty applies to a person or thing that has been found by experience to be reliable and trustworthy (a trusty guide) (a trusty servant) or that has been found never to have failed one in need or in an emergency or that has been found dependable whenever needed (his trusty sword—Spenser) (he wrapped the trusty garment about him—Cather) Tried also stresses proved reliability, dependability, trustworthiness, or trustiness (a tried and true friend) (a tried remedy) (a tried soldier) (his tried expedients—Bagehot)
Ana *safe, secure: *infallible, inerrant, reliable: cogent, *valid, sound, convincing, compelling, telling
Ant dubious — Con *doubtful, problematic, questionable
reliance *trust, confidence, dependance, faith
Ana credence, credit, *belief, faith: assurance, conviction, certitude, *certainty
relieve, alleviate, lighten, assuage, mitigate, allay are comparable when they mean to make something tolerable or less grievous. Though they are often used interchangeably, they are clearly distinguishable. Relieve implies
a lifting of enough of a burden to make it definitely en-
durable or temporarily forgotten <drugs that relieve pain>
(taking steps to control the fire and relieve the suffering
it entailed—Miliben) Occasionally relieve, when used in
the passive, implies a release from anxiety or fear <they
were greatly relieved when her letter came> Sometimes
it suggests a break in monotony or in routine <I've had
some trouble to get them together to relieve the dullness
of your incarceration—Meredith> Alleviate stresses the
temporary or partial nature of the relief and usually im-
plies a contrast with cure and remedy <oil of cloves will
alleviate a toothache> <to help alleviate New York's
chronic traffic problem—Current Biol.> Lighten implies
credence in the weight of what oppresses or depresses;
it often connotes a cheering or refreshing influence <his
interest in his work lightened his labors> <that blessed
mood. . . in which the heavy and the weary weight of
all this unintelligible world is lightened—Wordsworth>
Assuage suggests the moderation of violent emotion by
influences that soften or mollify or sometimes sweeten
<the good gods assuage thy wrath—Shak.> <the life-giving
zephyrs that assuage the torment of the summer heat—
Cloete> Moderate suggests moderation in the force,
violece or intensity of something painful; it does not,
as assuage does, imply something endured but something
inflicting or likely to inflict pain <mitigate the barbarity
of the criminal law—Inge> <group friction and conflict
are generally mitigated when people realize their common
interests—Cohen> Allay, though it seldom implies com-
plete release from what distresses or disquiets, does
suggest an effective calming or quieting <the report
allayed their fears> <his suspicions were allayed> <these
. . . words. . . allayed agitation; they composed, and con-
sequently must make her happier—Austen>
Ana *comfort, console, solace: *moderate, qualify,
temper: diminish, reduce, lessen, *decrease
Ant intensify: embarrass: alarm

religion, denomination, sect, cult, communion, faith, creed,
persuasion, church can all denote a system of religious
belief and worship or the body of persons who accept
such a system. Religion, the usual uncrowned term, may
apply to a system (as Christianity or Buddhism) which
represents the beliefs and worship of all those who accept
a given revelation or to one (as Anglicanism) which rep-
resents the beliefs and practiced worship of a specific
body of those who accept the same revelation <the religion
of the Arabs> <the religion of the Scribes and Pharisees>
Denomination basically applies to a body of people holding
common and distinctive religious beliefs and called by
a particular name so as to distinguish them from a more
inclusive body <Methodists form one denomination of
Protestants> <the leading Christian denominations>
Sect is applied to a group cut off from a larger body or,
more specifically, from an established or a parent
church through discontent with some matter of doctrine
or observance; thus, one speaks of the Christian religion
as comprising all who accept the New Testament as divine
revelation, but of the various sects into which the seven-
teenth-century and eighteenth-century Protestant de-
nominations were divided. Cult though widely varied in use
is typically applied to any member of a religious
order of women who devote themselves to prayer, con-
templation, and work; and may wear a habit.

relinquish, yield, leave, resign, surrender, cede, abandon,
waive are comparable when they mean to let go from one's
control or possession or to give up completely. Relinquish
in itself seldom carries any added implication, but it of-
ten acquires color from the words with which it is asso-
ciated or from the character of the thing given up <dis-
inclined to relinquish his command> <relinquished his

Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
grasp only after a struggle. She had let something go . . . something very precious, that he could not consciously have relinquished—Cather. Yield adds to relinquish the implication of concession or compliance; in some collocations it does not even suggest finality—a prevailing but not always necessary implication in the words of this group—but rather, a giving way as a favor, or as a sign of weakness, or as an indulgence "yield not thy neck to fortune's yoke, but let thy dauntless mind still ride in triumph over all mischance—Shak." Leave is often used in place of relinquish but distinctively it can imply a forsaking "we have left all, and have followed thee—Mc 10:28" he has left me . . . quitted me! abandoned me!—Bennett. Like relinquish it can be strongly colored by context and may convey such dissimilar notions as a giving up or letting go that constitutes sacrifice "the opium eater who cannot leave his—Wolf" or neglect "by all ye leave or do, the silent, sullen peoples shall weight your Gods and you—Kipling" or concession "the constitution leaves them [the States] this right in the confidence that they will not abuse it—John Marshall" or even imposition upon others "she leaves most of the work to her sister"—Resign emphasizes voluntary or deliberate sacrifice without struggle; it usually connotes either renunciation or acceptance of the inevitable "the ambition which incites a man to seize power seldom allows him to resign it—Times Lit. Sup." in her face . . . was that same strange mingling of resigned despair and almost eager appeal—Galsworthy. Surrender distinctively implies the existence of external compulsion or demand; it commonly suggests submission after a struggle or after resistance or show of resistance "when they saw all that was sacred to them laid waste, the Navaho . . . did not surrender; they simply ceased to fight—Cather." At times the implication of resistance is blurred and that of conscious sacrifice, as for a greater advantage, is heightened "surrender rights to a portion of an estate" Cede is narrower in its application than surrender; as a rule it suggests juridical pressure as expressed in a court decision, the findings of arbitrators, or the terms of a treaty, though it may suggest previous negotiation, and is used in reference to the transfer of lands, territory, or rights "the territory ceded by France, under the name of Louisiana—Taney." Abandon (see also ABANDON 1) stresses finality and completeness in relinquishment, especially of intangible things (as hopes, opinions, methods, or schemes) "no, no; you stick to your prejudices, or at any rate don't abandon them on your account—Mackenzie" Waive, like yield, need not imply finality and often suggests a concession, but unlike yield and the other terms of this group, it seldom implies the compulsion of force or necessity. Its main implication is a refusal to insist on something (as a right, a claim, one's preference, one's immunity, or obedience to a rule, law, or convention) usually for the sake of courtesy, simplicity, or concentration on what is relatively more important "waive extradition proceedings" "waive a jury trial" "he waived his right to be heard in his own defense" "he waived the ceremony of introduction—Burney." if art can enthrall him, he is willing to waive all question of logic or rationality—Babbitt. Ana *abdicate, renounce, resign: *abandon, desert, forsake: *forgo, forbear, abnegate, sacrifice: *discard, shed, cast Ant keep relish n 1 savor, tang, flavor, *taste, smack 2 *taste, palate, gusto, zest Ana liking, loving, enjoying, relishing (see LIKE): *pre-dilection, partiality, prepossession, prejudice, bias: propensity, *leaning, flair, penchant

relish vb fancy, dote, enjoy, *like, love Ana appreciate, *understand, comprehend: *approve, endorse, sanction

relishing *palatable, appetizing, savory, sapid, tasty, toothsome, flavorsome Ana pleasing, gratifying, delicious, delighting, rejoicing, tickling, regaling (see PLEASE) Con flat, *insipid, jejune, banal, insane

reluctant *disinclined, indisposed, hesitant, loath, averse Ana *cautious, circumspect, chary, wary, calculating: *anaptipathetic, unsympathetic Con inclined, disposed, predisposed (see INCLINE vb): *eager, avid, keen

rely, trust, depend, count, reckon, bank can all mean to have or place full confidence. One relies on or upon someone or something that one believes will never fail in giving or doing what one wishes or expects. Rely usually connotes a judgment based on previous experience and, in the case of persons, actual association "he relies on his father to help him out of trouble" "he never relies on the opinions of others" a physician upon whom all his patients rely "bitter experience soon taught him that lordly patrons are fickle and their favor not to be relied on—Huxley" "he is entitled to one or two men whose personal loyalty he can rely upon—Michener." One trusts, or trusts in or to, when one is completely assured or wholly confident that another will not fail one in need. Trust stresses unquestioning faith which need not be based on actual experience "take short views, hope for the best, and trust in God—Sydney Smith" "because he trusted his own individual strength, he was hostile to planning—Commager." One depends on or upon someone or something when one, with or without previous experience, rests confidently on him or it for support or assistance. Depend may connote a lack of self-sufficiency or even weakness; it often implies so strong a belief or so confident an assumption that the hoped-for support or assistance is forthcoming that no provision for the contrary is made "his diﬀerence had prevented his depending on his own judgment . . . but his reliance on mine made everything easy—Austen" "the captain of the ship at sea is a remote, inaccessible creature . . . depending on nobody—Conrad." "the man never cared; he was always getting himself into crusades, or feuds, or love, or debt, and depended on the woman to get him out—Henry Adams." One counts or reckons on something when one takes it into one's calculations as certain or assured; the words often imply even more confidence in expectation than depend and may carry even more than the latter's frequent suggestion of possible distress or disaster if one's expectations are not fulfilled "they told me I was going to get a pension. I counted on it. And now they take it away—Upson." "Christian souls who counted on the slaves for their bread and butter—Brooks" "the Oriental writer reckons largely on the intellectual cooperation of his reader—Cheyne." But these terms are often weakened in use to the point that they mean little more than expect "the Soviet economic administration . . . reckons on good rather than poor crops—Van Valkenburg & Huntington" "he had not counted on having to pay for a room—Irwin Shaw." "One banks on something or someone in which one's confidence is as strong as it would be in a bank to which one would entrust one's money; hence, the term is appropriate when one wishes to express near absolute certainty without any of the other implications inherent in depend, count, and reckon "the kind of people you could bank on in a tight place—J. D. Adams" "you can bank on his honesty" "had reliable sources of information, and you could bank on what he said."
remain *stay, abide, tarry, linger
Ant depart

remains, residue, residuum, remains, leavings, rests, balance, remnant can all mean what is left after the subtraction or removal of a part. Remainder is the technical term for the result in the arithmetical process of subtraction \( \text{subtract } 8 \text{ from } 10 \text{ and the remainder is } 2 \)\). It is otherwise a comprehensive term for things that remain after the others of a collection, assemblage, or stock have been taken away, used up, or accounted for, or for any persons that remain after the others of the group have departed (he spent the remainder of his life in seclusion) (it took a week to eat up the remainder of their Thanksgiving feast) (the remainder of the exploring party turned homeward) Residues and residuum are often interchanged with remainder, but they usually imply whatever may be left of a former whole, often a previously intact whole, after it has been subjected to some process which depletes or diminishes it but does not annihilate it. Both terms, but especially residue, have acquired specific meanings; thus, a testator, after making certain bequests and providing for the payment of all his debts and charges, usually leaves the residue of his estate to a legatee, or to legatees, of his choice; water after evaporation often leaves a residue of mineral material; the residue of something destroyed by burning is called ash or ashes. Residuum is frequently used in place of residue, especially when evaporation or combustion is implied, and it may be preferred to residue when what is left after a process, whether physical or chemical or mental, is such that it cannot be ignored or left out of account or may have value as a product or significance as a result (the residuum of the process by which sugar is extracted from cane is called molasses) (there is always a residuum of air in the lungs after the most forcible expiration possible) (one might say that every fine story must leave in the mind of the sensitive reader an intangible residue of pleasure—Cather) Remainder is chiefly used of what is left after death, decay, decline, disintegration, or consumption; the term is specifically applied to a corpse, to the unpublished works of a dead author, and to the ruins of an ancient civilization (they buried Keats’s remains in the Protestant cemetery in Rome) (appointed executor of a friend’s literary remains) (the remains of Pompeii) (the remains of a meal) Leavings usually implies that the valuable or useful parts or things have been culled out and used up or taken away or that what is left has been rejected or discarded (how like the leavings of some vast overturned scrap basket—Brooks) Rest is seldom distinguishable from remainder (except in the latter’s technical arithmetical sense), and the two are commonly used interchangeably without loss. However it may be preferred to remainder when it means simply the persons or things not previously referred to or mentioned (as in an enumeration or list) and carries no implication of subtraction, deduction, or depletion (England, as well as the rest of Europe, awaited the effect of the ultimatum with anxiety) (only two stories in this book are interesting and the rest are uniformly dull) Balance is sometimes used in the simple sense of remainder or rest (answers will be given in the balance of this chapter—R. W. Murray) But balance is more often found in technical and especially commercial use; thus, in reference to a banking account, balance usually is applied only to the amount left after withdrawals and other charges have been deducted from the deposits and accumulated interest; in a mercantile charge account, balance is usually applied to the amount owed after credits have been deducted from the debts (a balance in the bank is a sum of money to the depositor’s credit) (a balance of a bill is an amount still owed by the debtor) (a balance in hand is an amount left when all assets are reckoned after all liabilities have been discharged) Remnant and its plural remnants are applied to a remainder that is small in size or numbers or that represents only an insignificant part or piece left from a former whole (the remnant of a once powerful army) (a sale of remnants of cloth) (living in Santa Fe on the remnants of the family fortune—Mary Austin) (sleeping bits of woodlands—remnants of the great forests in which Tom had worked as a boy—Anderson) Remains leavings, residue, *remainder, residuum, rest, balance, remnant

remark \( \text{vb} \) 1 notice, note, observe, perceive, discern, *see, behold, descry, esp, view, survey, contemplate 2 Remark, comment, commentate, animadvert are comparable when they mean to make observations or to pass judgment but they diverge in their implications regarding the motive and the nature of these observations and judgments. Remark usually implies little more than a desire to call attention to something (a bore remarks upon everything he sees) (a metropolitan newspaper remarked that no one today hopes for progress—Biersted) Comment stresses interpretation (as by bringing out what is not apparent or by adding details that help to clarify) (the dramatic reader frequently interrupted his performance to comment upon a scene) (whether could be induced to make an oral report on his country or to comment during general discussions—Boesen) Occasionally the word carries some hint of the unfavorable interpretation that is often a feature of the related noun (we cannot help commenting on a certain meanness of culture—T. S. Eliot) Commentate is sometimes used as a substitute for comment to suggest a purely expository or interpretative intent (commentating upon and collating of the works of former times—H. E. Cushman) (emerged from routine commentating to dramatic . . . reporting and interpreting—Life) but the verb is less frequently used than its agent noun, commentator (radio commentators on the news of the day) Animadvert (compare ANIMADVERSION) implies a remarking or commenting on something that may be based on careful judgment (I went to an old-fashioned school. All those who wish to animadvert on education ought to be able to begin that way—Calisher) but this basic implication is often obscured by an emphasis on passing an adverse judgment (we talked of gaming, and animadverted on it with severity—Boswell)

remark \( \text{n} \) Remark, observation, comment, commentary, note, obiter dictum can all denote a brief expression intended to enlighten, clarify, or express an opinion. A remark is a more or less casual expression in speech or writing of an opinion or judgment (as of something seen in passing, something read for the first time, or something to which one’s attention has been called); the term usually carries no implication of a final or considered judgment (comments I have to make . . . on the man . . . Brief remarks, absolutely not exhaustive—Mallor) (had a genius for remembering the most telltale gestures as well as the most self-revelatory remarks . . . of his master—Krutch) Observation may suggest a reasoned judgment based on more or less careful scrutiny of the evidence (he was impressed by my observation that disease had made it largely impossible for Indians to smile—Heiser) (intimate letters . . . even when containing valuable critical observations, should not be published in the same volume as achieved works—Wyndham Lewis)
remarkable

* noticeable, prominent, outstanding, conspicuous

Comment applies to a remark or an observation made in criticism, in interpretation, or in elucidation of something. It is often used to convey a sense of importance or significance. **Gibbons** puts it in context: “Remarkable” comments are those that are unexpected or noteworthy, often highlighting a significant point or insight. **Rose Macaulay** discusses the use of commentaries to accompany a film, where the critic’s obiter dicta (dicta that are not intended to be part of the main narrative) provide additional insights and analysis. **Milton Crane** notes the importance of commentaries in television and radio, where they are often used to provide context or commentary on the main content.

remembrance 681

own recent experience—Mencken> {I will permit my memory to recall the vision of you, by all my dreams attended—Millay} But recall may imply, as recount does not, an agent or an agency other than oneself, and in such use suggests the awakening or evocation of a memory <forty years later Mr. Wilson recalled this circumstance to my memory—Repeil> {that tree always awakened pleasant memories, recalling a garden in the south of France where he used to visit young cousins—Cather} Remind implies the evocation of something forgotten, or not at the time in one’s mind, by some compelling power or agent. Often also it strongly implies a jogging of one’s memory. Usually the agent or agency is someone or something external that causes one to remember <he reminded me of my promise> {this incident reminded him of another and similar one> <he reminded himself that he had made an appointment for eight o’clock> <he found it necessary to keep on reminding himself that the time was short and the work must be finished according to schedule> Reminisce can imply the process of recollecting or of recalling something <how do people remember anything? How do they reminisce?—Lang> but often it suggests a nostalgic dredging up and retelling of events and circumstances of one’s past life <well, anyhow, we old fellows can reminisce—Garland> <he cut me short to reminisce of his schoolmates—Hervey Allen> Bethink, a commonly reflexive verb little used today, can distinctly imply recollection or recalling after reflection or a reminding oneself by thinking back <I have betought me of another fault—Shak> {to be- think themselves how little they may owe to their own merit—Helps> Mind (see also TEND) in the sense of remember is sometimes chosen to convey a dialectal feeling of simplicity or quaintness <I mind him coming down the street—Tennyson> {the lads you leave will mind you till Ludlow tower shall fall—Housman> <I can mind her well as a nursing mother—a comely woman in her day—Quiller-Couch> Ant forget —Con ignore, disregard, *neglect, overlook remembrance* 1 *memory, recollection, reminiscence, mind, souvenir* Ant forgetfulness 2 Remembrance, remembrancer, reminder, memorial, memento, token, keepsake, souvenir denote something that serves to keep a person or thing in mind. Remembrance and the less common remembrancer are applied to an object which causes one to call back to mind someone or something, especially someone dead or far away or an event or occurrence of the past, often the distant past <I desire your acceptance of a ring, a small remembrance of my father—Swift> {every article she possessed . . . is separately bequeathed as an affectionate remembrance—Ellis> {the apricot scent of the gorge, which was ever afterwards to be the remembrancer of their love—Kaye-Smith> Reminder suggests something (as a memorandum) that keeps one from forgetting; the term need not suggest a wish to remember <occasional sawmills, reminders of the once-active lumber industry—Amer. Guide Series: Me.> Memorial suggests a wish or desire to preserve the memory of something (as a person or event) and therefore applies to a reminder (as a building, a monument, an endowment, or an observance) that is of a kind fitted to endure <the Lincoln Memorial in Washington> {the memorials of the rule of the Pharaohs are still engraved on the rocks of Libya—Newman> {it was the white man’s way to assert himself in any landscape . . . to leave some mark or memorial of his sojourn—Cather> The remaining words more consistently suggest a personal association between the thing intended as a remembrance or reminder and the person, experience, or place to be remembered. Memento typically applies to something small or trivial kept to satisfy a desire to renew the remembrance of some past interest; often the word suggests that the thing itself has no longer any value <the drawer was filled with mementos of her girlhood—dance programs, love letters, a glove> Token often refers to something treasured as a memento, but it usually denotes a gift presented to one as a sign of affection, esteem, or regret at parting {a handkerchief, an antique token my father gave my mother—Shak> <I leave in every house some little token, a rosary or a religious picture—Cather> Keepsake represents the attitude of the receiver rather than of the giver; otherwise it differs little in general use from token and memento <perhaps the strongest keepsake is a slice of her . . . wedding cake—Green Peyton> But keepsake may apply specifically to a giftbook, often one made up for a particular group or occasion or as a specimen of fine printing. Souvenir (see also MEMORY) usually implies a material reminder not necessarily given nor received that remains or is kept as a memento (as of a place visited or of an experience worthy of remembrance) <pockmarks in the masonry . . . are souvenirs of the bomb that exploded there—John Brooks> Ana *gift, present, favor remembrancer* *remembrance, reminder, memorial, memento, token, keepsake, souvenir* remind *remember, recollect, recall, reminisce, bethink, mind Ana *suggest, intimate, hint, imply remembrance* *remembrance, remembrancer, memorial, memento, token, keepsake, souvenir* remiss lax, slack, neglectful, *negligent Ana *careless, heedless, thoughtless: *forgetful, oblivious, unmindful: indolent, slothful, faineant, *lazy Ant scrupulous remit 1 pardon, forgive, *excuse, condone Ana *expel, exonerate, acquit, vindicate, absolve 2 forward, transmit, route, ship, *send, dispatch remnant *remainder, residue, residuum, remains, leavings, rest, balance Ana *part, piece, fragment, segment, section: vestige, trace recollectrate expostulate, *object, protest, kick Ana oppose, combat, *resist, withstand, fight: *criticize, denounce, reprobate remorse *penitence, repentance, contrition, attrition, compunction Ana regret, *sorrow, grief: *qualm, scruple, compunction, demur remote* *distant, far, faraway, far-off, removed Ana close move vb *move, shift, transfer Ana convey, *carry, bear, transport, transmit: eradicate, extirpate, uproot (see EXTERMINATE) removed remote, far-off, faraway, far, *distant remunerate* *pay, compensate, satisfy, reimburse, indemnify, repay, recompense Ana award, accord, vouchsafe, *grant remunerative *paying, gainful, lucrative, profitable Ana handsome, bountiful, munificent, *liberal: lavish, prodigal, *profuse Ana analogous words Ant antonyms Con contrasted words See also explanatory notes facing page 1
renew, *restore, refresh, renovate, refurbish, rejuvenate are strongly derogatory terms denoting a person who forsakes his faith or party, a cause, or an allegiance, and aligns himself with another. Renegade, originally applied to a Christian who became a Mohammedan, came to mean one who completely denies all he has been brought up to believe by going over to the enemy or the opposition. <venom the renegade can summon up against his former beliefs and associates—New Yorker> Apostle stresses the giving up, either voluntarily or under compulsion, of something (as one's religious beliefs or political or intellectual principles) one has formerly professed and the acceptance of others which are usually, by implication, of a less exalted character. Apostle therefore usually connotes surrender, but it need not, as renegade often does, imply treachery or hostility to what is forsaken <That incomparable apostate from intelligence—Laski> <prepared to welcome back even the apostate, if he shows repentance and remorse—Bienenstok> Turncoat, a controversial disavowal, differs from renegade and apostate chiefly in its implications that profession of faith or allegiance is regarded lightly and that convenience or profit rather than conviction motivates the change <An American who went abroad and stayed, without an official excuse . . . was regarded as a turncoat—Brooks> Recreant, like apostate, implies a retreat from a stand one has taken, but it stresses cowardice and meanspiritedness, and usually connotes treachery to the party or cause once supported <call such recreants as either refused to sail with the colonists or having sailed with them should afterwards desert—Frazer> Backslider, in contrast to the other terms, usually implies a previous conversion and a reversion to the old indifference or the old beliefs; thus, a convert who goes back to his earlier state morally or to his earlier religious affiliation is regarded as a backslider by one adherent to the position he held as a convert. <Ana *rebel, insurgent, iconoclast: deserter, forsaker, abandoner (see corresponding verbs at abandon): *heretic, schismatic Ant adherent renew, restore, refresh, renovate, refurbish, rejuvenate are comparable when they mean to give a person or thing that has become old, worn, or exhausted the qualities light Shak.y quench thee, thou flaming minister, I can again thy former the loss of a vital or essential quality or character <if I injured, or wrecked (as by passage of time, use, accident, or assault in war) <I their foliage) <I each spring the trees grated <each spring the trees think I will be extravagant enough to new to replace the old that has died, decayed, or disintegrated <each spring the trees renew their foliage <I think I will be extravagant enough to renew my entire wardrobe—Shaw> or a remaking so that it seems like new of a thing which has depleted its vitality or force or has lost its freshness <they that wait upon the Lord shall renew their strength—Isa 40:31> <to renew and re-build civilization, and save the world from suicide—T.-S. Eliot> or a making a fresh start <renewed his efforts> <renewed his offer of assistance> Restore (see also restore 2) definitely implies a return to an original state or to a prime condition typically after depletion, exhaustion, or illness <restored his vigor> <restored his good humor> <a long rest restored him to health> or after being marred, injured, or wrecked (as by passage of time, use, accident, or assault in war) <Rheims Cathedral was restored after World War I> <an attempt to restore a picture> or if the loss of a vital or essential quality or character <if I quench thee, thou flaming minister, I can again thy former light restore, should I repent me—Shak.> Refresh often implies the supplying of something necessary to restore lost strength, animation, or power <sleep refreshes both body and mind> <a cool, refreshing drink> or to make up for what has been lost through forgetfulness or disuse <he made it his business to see Dr. Lavendar, and be refreshed as to facts—Deland> Equally often the term implies the imparting of freshness to something by or as if by cooling, wetting, or allaying thirst; it then usually connotes an enlivening, invigorating, or exhilarating effect <the springs . . . under the earth . . . break forth to refresh and gladden the life of flowers and the life of man—Binyon> <it refreshes me to find a woman so charmingly direct—Bromfield> Renovate and refurbish differ from the preceding terms chiefly in being referred almost exclusively to material things and as a consequence in not having the poetic connotations so often found in renew, restore, and refresh. Renovate is often used in place of renew when cleansing, repairing, or rebuilding is implied <renovate an old colonial house> <drawn into a sequence of violent episodes that cause him to renovate his attitudes toward life and death—Martin Levin> while refurbish implies the restoration of newness or freshness by or as if by scouring or polishing and suggests here little more than a freshening up of the appearance or the external aspects of a thing <refurbish an old table by sandpapering and waxing it> and therefore occasionally is used in depreciation <hoped to reform national conduct . . . by reforming our vocabulary . . . but it does seem a good bit to achieve with nothing more tangible than a refurbished vocabulary—Laird> <the refurbishing of trite thoughts is the sole accomplishment of many would-be poets> Rejuvenate implies a restoration of youthful vigor, powers, appearance, or activities; sometimes it merely suggests a giving a youthful aspect to something old <he . . . had the air of an old bachelor trying to rejuvenate himself—Irving> <outworn themes may be rejuvenated by taking on contemporary garb—Lowes> Ana *mend, repair, rebuild: reform, revise, rectify, *correct Con exhaust, *deplete, drain, impoverish, bankrupt renunciation 1 *abdicate, resign Ana sacrifice, abnegate, *forsgo, forbear, eschew Ant arrogate: covet (sense 2) —Con usurp, preempt, appropriate (see arrogate) 2 *abjure, forswear, recant, retract Ana reject, repudiate, spur (see decline vb): *forsgo, forbear, eschew Ant confess: claim renounce rejuvenate, renounce, *renew, restore, refresh Ana *mend, repair, patch: *clean, cleanse renown *fame, honor, glory, celebrity, reputation, repute, notoriety, éclat Ana prestige, authority, *influence, weight, credit Con contempt, despite, disdain, scorn (see under despise): disrepute, *disgrace, dishonor, obloquy renowned *famous, famed, celebrated, eminent, illustrious Ana praised, acclaimed, lauded, extolled (see PRAISE): outstanding, signal, prominent (see noticeable) rent vb *hire, let, lease, charter rent n *breach, break, split, schism, rupture, rift Ana separation, severance, division (see corresponding verbs at SEPARATE): tearing or tear, cleaving or cleavage (see corresponding verbs at tear): interruption, gap, hiatus (see break) renunciation, abnegation, self-abnegation, self-denial can all mean voluntary surrender or putting aside of something desired or desirable. Renunciation (see also under renounce at abdicate) commonly connotes personal sacrifice for a higher end (as the good of others, or moral A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
discipline, or the attainment of the highest good) <she had learnt the lesson of renunciation, and was as familiar with the wreck of each day's wishes as with the diurnal setting of the sun—Hardy> Historically abnegation is scarcely distinguishable from self-abnegation, although the trend is toward preference for the latter or its equivalent abnegation of self. Both words more often denote a quality of character than an act, and both imply a high degree of unselfishness or a capacity for putting aside all personal interests or desires <individuals who are willing to abandon the pleasures of the world for lepers are rare, but, when found, usually exhibit complete abnegation of self—Heiser> <his self-abnegation prevented him from taking credit for the victory—Patrick> Self-denial, unlike abnegation, is usually applied to an act or a practice. Though it means denial of oneself or forbearance from gratifying one's own desires, it does not necessarily connote nobility in the act, its motive, or its end and is therefore applicable to a larger range of instances than either abnegation or renunciation <her still face, with the mouth closed tight from suffering and disillusion and self-denial—D. H. Lawrence>

as well as by speech. Action can tell a story . . . and depict every kind of human emotion, without the aid of a word—Justice Holmes>

**Portray** suggests the making of a detailed representation of individual persons, or of specific characters, emotions, or qualities (as by drawing, engraving, painting, acting, or describing) *(in literature they are portrayed all human passions, desires, and aspirations—Eliot)* *(a star who unquestionably conveyed to audiences the very essence of the character he was portraying—J. F. Wharton)*

**Delineate** (see also SKETCH) basically implies representation by an art (as engraving or drawing) that uses lines to gain its effects, but, like *portray*, it is often used to stress care for accuracy of detail and fullness of outline *(his brush did its work with a steady and sure stroke that indicated command of his materials. He could delineate whatever he elected with technical skill—Jeffries)* Picture less than any of these terms implies the employment of a particular art; it emphasizes the ability to realize a thing in a pictorial or vivid way and may either imply graphic description *(those villages Mark Twain . . . has pictured for us—Brooks)* or sensible representation in any form *(her emotions are all pictured in her face)* or, sometimes with *"to oneself," mere imaginative power *(the girl was in his mind a lot . . . he had always had a good imagination. He pictured her as she came down the stairs in the morning—Malamud)* *(they tried, in their sympathetic grief, to picture to themselves all that she had been through in her life—Bennett)*

**Limn** is used chiefly as an equivalent of *depict or delineate*, often implying the art of painting vividly and with color *(since not every ancestral likeness had been limned by the brush of a maestro, dignity . . . sometimes seemed merely bovine—Warren)* *(had too much taste to bare all these grubby secret details, but she limned a general picture for him—Stafford)*

**Ana** exhibit, display, *show*; *suggest, hint*; *sketch*, outline, draft, delineate: describe, narrate, *relate*

**representative** *n* delegate, deputy

**repress** *suppress*

**reprimand** *vb* reprove, rebuke, reproach, admonish, chide

**Ana** upbraid, rate, berate, *scold*: censure, denounce, blame, reprehend, reprobate, *criticize*

**reprinting** *edition, impression, printing, reissue*

**reprisal** *retaliation, retribution, revenge, vengeance*

**reproach** *vb* chide, admonish, *reprove, rebuke, reprimand*

**Ana** *criticize, reprehend, censure, reprobate*: *warn, forewarn, caution: counsel, advise* *(see under ADVICE)*

**reprobat e** *vb* censure, reprehend, *criticize, blame, condemn, denounce*

**Ana** *decry, derogate, detract, depreciate, disparage: reject, repudiate, spurn* *(see DECLINE vb)*: reprimand, rebuke, *reprove*

**reprobate** *adj* *abandoned, profligate, dissolute*

**Ana** *vicious, iniquitous, corrupt, degenerate*: *blame-worthy, guilty, culpable*

**Ant** elect *(in theology)* — *Con* righteous, virtuous, *moral*, ethical

**reprobate** *n* outcast, castaway, derelict, pariah, un-touchable

**Ana** sinner, offender *(see corresponding nouns at OFFENSE): transgressor, trespasser *(see corresponding nouns at BREACH)*: *villain, scoundrel, blackguard*

**reproduce** propagate, *generate, engender, breed, beget, get, sire, procreate*

**Ana** produce, *bear*, yield: multiply *(see INCREASE)*

**reproduction**, *duplicate, copy, carbon copy, facsimile, replica, transcript* are comparable when they mean one thing which closely or essentially resembles something that has already been made, produced, or written. *Reproduction* may imply identity in material or substance, in size, and in quality, or it may imply differences, provided that the imitation gives a fairly true likeness of the original; thus, a reproduction of an Elizabethan theater may be on a very small scale; a reproduction of a Sheraton chair may be in cherry rather than in the mahogany of the original *(the present director, on tour in Western Canada, discovered the need for reproductions of Canadian pictures—Report on Nat'l Development (Ottawa)*) *(the late works look finer in reproduction than they do in the original—Kitson)* A *duplicate* is a double of something else: the word may be used of something that exactly corresponds to or is the counterpart of any object; whatsoever *(a duplicate of a bill of sale)* *(this postage stamp is a duplicate of one in my collection)* *(make out a receipt in duplicate)* *(plans a movie of the salvage operations, and will sail a duplicate vessel on the course taken—Current Bio)* A *copy* is a reproduction of something else, often without the exact correspondence which belongs to a duplicate; however copy, rather than *duplicate* *(which logically implies that there is but a single reproduction)*, is applicable to any one of a number of things printed from the same type format, struck off from the same die, or made in the same mold *(a thousand copies of a magazine)* *(production costs of popular records vary, of course, but a sales figure of sixty thousand copies is the . . . break-even point—Robert Rice)* *(modern copies of sixteenth-century chess sets—New Yorker)* *(mimeographed copies of a letter)*

**Carbon copy** stresses the idea of exactness found in *duplicate* *(the full moon rising like an immense red carbon copy of the earth seen from a distance—Peggy Bennett)* *(the civilians . . . seem well-content to let our foreign policy be a carbon copy of the strategy worked out by the military—Atlantic)* A *facsimile* is a close but usually not exact reproduction; the term may imply differences (as in scale) but it implies as close an imitating in details and material as possible or feasible *(the heavy chandeliers were loaded with flattened brass balls, magnified facsimiles of which crowned the uprights of the . . . massively-framed chairs—Shaw)* *(a screen cast . . . presses hard for emotional impact. What results is less a facsimile than a parody of the original—Hatch)* *(looking for an intellectual equal, or at least the facsimile of an intellectual equal—Mailer)*

**Replica** applies specifically to an exact reproduction of a statue, a painting, or a building made by or under the direction of the same artist, architect, or artisan; thus, one does not speak accurately of a modern *replica* of the Winged Victory, but of a modern *reproduction*; one may speak of the confusing tendency of some Renaissance artists to make *replicas* of their paintings. However the word is often used merely to emphasize very close likeness *(collection of miniature sports cars. Tiny, Swiss-made replicas, they were precision machined and finely detailed, all scaled to perfection—Terry Southern)*

**Transcript** applies only to a written, typed, or printed copy made directly from an original or from shorthand notes *(a stenographer's transcript of a letter)* *(ask for a transcript of a will)*

**Reprove**, rebuke, reprimand, admonish, reproach, chide can all mean to criticize adversely, especially in order to warn of or to correct a fault. To *reprove* is to blame or censure, often kindly or without harshness and usually in the hope of correcting the fault *(his voice sounded so bright and cheerful . . . that she could not find it in her
heart to reprove him—Röylaag> Rebuke implies sharp or stern reproof (he could not evade the persistent conviction that she was the Church speaking, rebuking him—Hervey> Reprimand suggests reproof that is formal, and often public or official (a word... which the Duke of Wellington, or Admiral Stopford, would use in reprimanding an officer—Macaulay> Admonish stresses the implication of warning or counsel (count him not as an enemy, but admonish him as a brother—2 Thess 3:15> A highly sensitive dog, and cannot bear reproof. Perhaps this is because he is not admonished sufficiently at home—Littel> Reproach and chide imply dissatisfaction or displeasure; reproach usually connotes criticism or faultfinding; chide implies mild reproof or a slight scolding (if he came home late, and she reproached him, he frowned and turned on her in an overbearing way—D. H. Lawrence> It is not fitting for men of dignity to threaten and reproach because women have had a falling out—Shirley Jackson> The gentle irony with which he chides the overzealousness of modern critics—Joseph Frank> Ana *criticize, reprehend, censure, reprobate: chasten, correct, discipline, *punish

repudiate 1 spurn, reject, refuse, *decline
Ana renounce, *abjure: *forgo, forbear, eschew, sacrifice
Ant adopt —Con *acknowledge, own, admit, avow, confess: embrace, espouse (see ADOPT)
2 *disclaim, disavow, disown, disallow
Ana *abandon, desert, forsake: *discard, cast
Ant own —Con *acknowledge, admit, avow, confess: *grant, concede, allow

repugnant 1 Repugnant, repellent, abhorrent, distasteful, obnoxious, invidious are comparable when they mean so alien or unlikable as to arouse antagonism and aversion. Repugnant is applied to something so incompatible with one's ideas, principles, or tastes as to stir up resistance and loathing (soon the pressures of male eyes, eyes expressing sex... became repugnant to her—Peggy Bennett> The nonlegal methods of the magistrates in dispensing judgment, so repugnant to the spirit of the common law—Parrington> Repellent usually implies a forbidding or unlovely character in something that causes one to back away from it (the mediocre was repellent to them; cant and sentiment made them sick—Rose Macaulay> What he does say is that hanging is barbarous and sickening, that electrocution and the gas chamber are no less brutal and repellent—Rover> Abhorrent (see also Hateful) is applied to something that is incapable of association or existence with something else, and it often implies profound antagonism (dictatorial methods abhorrent to American ways of thinking—Forum> Distasteful is applied to something that one instinctively shrinks from not because it in itself is necessarily unlikable but because it is contrary to one's particular taste or inclination (even the partition of the world into the animate and the inanimate is distasteful to science, which dislikes any lines that cannot be crossed—Inge> She finds it hard to think of using the personal belongings of... previous occupants—Kenneth Roberts> Obnoxious is applied to what is so highly objectionable, usually on personal grounds, that one cannot endure the sight or presence of it or him with equanimity (the nation hadulked itself into a state of tacit rebellion against the obnoxious Volstead Law—S. H. Adams> An opportunity to... make himself generally obnoxious—Simeon Ford
Invidious is applied to something that cannot be used as (a word) or made (as a distinction) or undertaken (as a task or project) without arousing or creating ill will, envy, or resentment (the invidious word usually—Hume> What I would urge, therefore, is that no invidious distinction

should be made between the Old Learning and the New—J. R. Lowell> Undertake the invidious task of deciding what is to be approved and what is to be condemned—Daniel Jones>
